SUPPLEMENTARY INFORMATION:

Background

The National Fire Protection Association (NFPA) develops building, fire, and electrical safety codes and standards. Federal agencies frequently use these codes and standards as the basis for developing Federal regulations concerning fire safety. Often, the Office of the **Federal Register** approves the incorporation by reference of these standards under 5 U.S.C. 552(a) and 1 CFR Part 51.

Revisions of existing standards and adoption of new standards are reported by the technical committees at the NFPA's November Meeting or at the May Meeting each year. The NFPA

invites public comments on its "Report on Proposals."

Request for Comments

Interested persons may participate in these revisions by submitting written data, views, or arguments to Casey C. Grant, Secretary, Standards Council, NFPA, 1 Batterymarch Park, Quincy, Massachusetts 02269-9101.

Commenters may use the forms provided for comments in the "Report on Proposals." Each person submitting a comment should include his or her name and address, identify the notice, and give reasons for any recommendations. Comments received on or before March 30, 2001 for the "2001 November Meeting Report on Proposals" will be considered by the NFPA before final action is taken on the proposals.

Copies of all written comments received and the disposition of those comments by the NFPA committees will be published as the "2001 November Meeting Report on Comments" by September 21, 2001, prior to the November Meeting.

A copy of the Report on Comments will be sent automatically to each commenter. Action on the reports of the Technical Committees (adoption or rejection) will be taken by NFPA members at the November Meeting, November 13-17, 2001 in Dallas, Texas.

Dated: December 18, 2000.
