

upon request. Please contact Thomas L. Brand at (609) 883-9500 ext. 221 with any docket-related questions. Persons wishing to testify at this hearing are requested to register in advance with the Secretary at (609) 883-9500 ext. 203.

Individuals in need of an accommodation as provided for in the Americans With Disabilities Act who wish to attend the hearing should contact the Commission Secretary, Pamela M. Bush, directly at (609) 883-9500 ext. 203 or through the New Jersey Relay Service at 1-800-852-7899 (TTY) to discuss how the Commission may accommodate your needs. Driving directions to the meeting location are posted on the Commission's web site, at www.drbc.net.

Dated: December 18, 2000.

Pamela M. Bush,

Commission Secretary.

BILLING CODE 6360-01-P

DEPARTMENT OF EDUCATION

Submission for OMB Review; Comment Request

AGENCY: Department of Education.

SUMMARY: The Leader, Regulatory Information Management Group, Office of the Chief Information Officer invites comments on the submission for OMB review as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before January 25, 2001.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Lauren Wittenberg, Acting Desk Officer, Department of Education, Office of Management and Budget, 725 17th Street, NW., Room 10235, New Executive Office Building, Washington, DC 20503 or should be electronically mailed to the internet address Lauren_Wittenberg@omb.eop.gov.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its

statutory obligations. The Leader, Regulatory Information Management Group, Office of the Chief Information Officer, publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g. new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment.

Dated: December 19, 2000.

John Tressler,

Leader, Regulatory Information Management, Office of the Chief Information Officer.

Office of Special Education and Rehabilitative Services

Type of Review: Revision.

Title: Grantee Reporting Form.

Frequency: Annually.

Affected Public: Not-for-profit institutions; State, Local, or Tribal Gov't, SEAs or LEAs.

Reporting and Recordkeeping Hour Burden: Responses: 165. Burden Hours: 165.

Abstract: Rehabilitation Services Administration (RSA) training grants provide stipends to "RSA Scholars" in order to train skilled rehabilitation personnel. Grantees are required to "track" Scholars relative to the "payback" provision in the Rehab. Act. Data collection is reported annually to RSA in order to monitor performance and report progress to Congress.

Requests for copies of the proposed information collection request may be accessed from <http://edicsweb.ed.gov>, or should be addressed to Vivian Reese, Department of Education, 400 Maryland Avenue, SW, Room 4050, Regional Office Building 3, Washington, DC 20202-4651. Requests may also be electronically mailed to the internet address OCIO_IMG_Issues@ed.gov or faxed to 202-708-9346. Please specify the complete title of the information collection when making your request.

Comments regarding burden and/or the collection activity requirements should be directed to CAREY at (202) 708-6287. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339.

[FR Doc. 00-32808 Filed 12-22-00; 8:45 am]

BILLING CODE 4000-01-U

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services; National Institute on Disability and Rehabilitation Research

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Notice of Final Funding Priorities for Fiscal Years 2001-2002 for collaborative projects in spinal cord injury research.

SUMMARY: The Assistant Secretary for the Office of Special Education and Rehabilitative Services announces final funding priorities for collaborative spinal cord injury research, a spinal cord injury data center, and a spinal cord injury dissemination center under the National Institute on Disability and Rehabilitation Research (NIDRR) for fiscal years 2001-2002. The Assistant Secretary takes this action to focus research attention on areas of national need. We intend these priorities to improve the rehabilitation services and outcomes for individuals with disabilities.

DATES: These priorities take effect on January 25, 2001.

FOR FURTHER INFORMATION CONTACT: Donna Nangle. Telephone: (202) 205-5880. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205-4475. Internet: donna_nangle@ed.gov

Individuals with disabilities may obtain this document in an alternative format (e.g., Braille, large print, audiotape, or computer diskette) on request to the contact person listed in the preceding paragraph.

SUPPLEMENTARY INFORMATION: This notice contains final priorities under the Disability and Rehabilitation Research Projects and Centers Program (DRRP) for collaborative spinal cord injury research, a spinal cord injury data center, and a spinal cord injury dissemination center.

The final priorities refer to NIDRR's Long Range Plan (the Plan). The Plan can be accessed on the World Wide Web at: www.ed.gov/offices/OSERS/NIDRR/#LRP.

Goals 2000: Educate America Act

The Goals 2000: Educate America Act (Goals 2000) focuses the Nation's education reform efforts on the eight National Education Goals and provides a framework for meeting them. Goals 2000 promotes new partnerships to strengthen schools and expands the Department's capacities for helping

communities to exchange ideas and obtain information needed to achieve the goals.

These final priorities will address the National Education Goal that every adult American will be literate and will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship.

The authority for the program to establish research priorities by reserving funds to support particular research activities is contained in sections 202(g) and 204 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 762(g) and 764(b)(4)). Regulations governing this program are found in 34 CFR part 350.

Note: This notice does not solicit applications. A notice inviting applications is published in this issue of the **Federal Register**.

Analysis of Comments and Changes

On September 1, 2000, the Assistant Secretary published a notice of proposed priorities in the **Federal Register** (65 FR 53512). The Department of Education received 5 letters commenting on the notice of proposed priorities by the deadline date. Technical and other minor changes—and suggested changes the Assistant Secretary is not legally authorized to make under statutory authority—are not addressed.

Disability and Rehabilitation Research Projects and Centers Program; Collaborative Spinal Cord Injury Research

Comment: One comment suggested that there is a need for research on initial surgical treatments of the spinal injured patient.

Discussion: NIDRR agrees that this is an appropriate topic for a collaborative research proposal, but elects to leave the choice of topics up to the applicant. The peer review process will evaluate the merits of each proposal.

Changes: None.

Spinal Cord Injury Data Center and Spinal Cord Injury Dissemination Center

Comment: One comment indicated that the requirement that the data center must “incorporate culturally appropriate methods of community outreach and education in areas such as health and wellness, housing, transportation, recreation, employment, and other community activities for individuals with diverse backgrounds with SCI” is inconsistent with other requirements of the data center.

Discussion: NIDRR agrees. Culturally appropriate methods must be applied to

the data collection and dissemination activities that are required of the data center.

Changes: The priority has been changed to reflect this requirement.

Comment: One comment suggested that the data center and dissemination center should be combined to achieve greater efficiency.

Discussion: Historically, the data base and dissemination activities have been conducted as separate projects in this program. Applicants are not precluded from applying for both centers. NIDRR agrees that collaboration between these centers is important and the priority has been modified to include this requirement.

Changes: The data center priority has been modified to require collaboration with the dissemination center.

Comment: One comment suggested that a system for uniform reporting and collection of presentations by the Model SCI Centers to all audiences be a requirement of the dissemination center.

Discussion: NIDRR agrees.

Changes: The priority has been changed to require that the center collect, maintain, and disseminate consumer and professional education materials.

Comment: One comment noted that, while the dissemination center is required to collaborate with the Model SCI Centers, the Model SCI Centers are not required to collaborate with the dissemination center.

Discussion: While the Model SCI Center priority could be interpreted to require such collaboration, the Model SCI Center grants have been awarded and the requirements cannot be changed.

Changes: None.

Disability and Rehabilitation Research Projects and Centers Program

The authority for Disability and Rehabilitation Research Projects (DRRP) is contained in section 204 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 762(g) and 764(b)(4)). The purpose of the DRRP program is to plan and conduct research, demonstration projects, training and related activities to—

(a) Develop methods, procedures, and rehabilitation technology that maximizes the full inclusion and integration into society, employment, independent living, family support, and economic and social self-sufficiency of individuals with disabilities; and

(b) Improve the effectiveness of services authorized under the Act.

Background

The projects in these final priorities are to conduct research in collaboration

with Centers established under the Special Projects and Demonstrations for Spinal Cord Injury (SCI) Program. The following section provides background information regarding that program to assist applicants in developing appropriate collaboration projects.

Special Projects and Demonstrations for Spinal Cord Injury

The authority for Model Spinal Cord Injury Centers (MSCI) is contained in section 204(b)(4) of the Rehabilitation Act of 1973, as amended (29 U.S.C. 764(b)(4)). We may make awards for up to 60 months through grants or cooperative agreements. The MSCI program provides assistance to establish innovative projects for the delivery, demonstration, and evaluation of comprehensive medical, vocational, and other rehabilitation services to meet the wide range of needs of individuals with SCI.

The MSCI program provides assistance for projects that provide comprehensive rehabilitation services to individuals with SCI and conduct spinal cord research, including clinical research and the analysis of standardized data in collaboration with other related projects.

Each MSCI Center establishes a multidisciplinary system of providing rehabilitation services, specifically designed to meet the special needs of individuals with SCI. This includes acute care as well as periodic inpatient or outpatient follow up and vocational services. MSCI Centers demonstrate and evaluate the benefits and cost effectiveness of such a system for the care of individuals with SCI and demonstrate and evaluate existing, new, and improved methods and equipment essential to the care, management, and rehabilitation of individuals with SCI. MSCI Centers demonstrate and evaluate methods of community outreach and education for individuals with SCI in connection with the problems of those individuals in areas such as housing, transportation, recreation, employment, and community activities.

NIDRR is in the final selection process for MSCI Centers for the period 2000–2005. The priority announcement and notice inviting applications were published in the **Federal Register** on March 16, 2000 (65 FR 14346–14377). Additional information about the MSCI Centers Program is available on the World Wide Web at www.ncddr.org/rpp/hf/hfdw/mscis and in the special issue “Current Research Outcomes from the Model Spinal Cord Injury Care Systems”, *Archives of Physical Medicine and Rehabilitation*, Vol. 80, No. 11, November 1999. NIDRR’s

currently funded MSCI Centers are at Thomas Jefferson University; Kessler Medical Rehabilitation Research & Education Corp.; University of Michigan Health Systems, Dept. of Physical Medicine & Rehabilitation; Craig Hospital; Mount Sinai School of Medicine; University of Miami, School of Medicine; University of Missouri, Department of Physical Medicine and Rehabilitation; Santa Clara Valley Medical Center; Virginia Commonwealth University, School of Medicine, Department of Physical Medicine & Rehabilitation; University of Alabama, Department of Physical Medicine & Rehabilitation; University of Washington, Department of Rehabilitation Medicine; Boston Medical Center Corporation, Department of Rehabilitation Medicine; The Institute for Rehabilitation and Research (TIRR); Los Amigos Research & Education Institute, Inc.; and Shepherd Center, Inc., Crawford Research Institute. Contact information and project descriptions can be found for each of these projects on NIDRRs on-line program directory at the National Rehabilitation Research Information Center (NARIC) at www.naric.com/search/

Priority for Collaborative Research Projects in Spinal Cord Injury

In the announcement of March 16, 2000 it was indicated that a separate competition would be held for collaborative projects in SCI. We now propose to establish a priority for those collaborative projects. In addition, we proposed to establish a Data Center to maintain and manage the database of information regarding individuals with SCI who receive treatment in the MSCI Centers. We also proposed to establish a Dissemination Center to manage the collection and dissemination of academic and consumer information developed by those centers.

Collaborative Spinal Cord Injury Research Projects

Estimates of the number of people living with traumatic SCI range from 183,000 to 230,000, with an incidence of approximately 10,000 new cases each year ("Spinal Cord Injury Facts and Figures at a Glance," National Spinal Cord Injury Statistical Center (NSCISC), University of Alabama at Birmingham. Although SCI predominately affects young adults (56% of SCIs occur among people aged 16–30 years), there is an increasing proportion of new SCI cases in the population over 60 years of age (NSCISC, *ibid.*). The true significance of traumatic SCI lies not primarily in the numbers affected, but in the substantial

impact on individuals' lives and the associated substantial health care costs and living expenses. A traumatic SCI has far-reaching repercussions on the lives of the injured persons and their families that can be devastating if not addressed effectively. According to a report from the Agency for Health Care Policy and Research (Hospital Inpatient Statistics, 1996, AHCPR Publication No. 99–0034), SCI is the most expensive condition or diagnosis treated in U.S. hospitals. The estimated lifetime costs for an individual injured at the age of 25 range from \$365,000 for an incomplete injury to more than \$1.7 million for an individual with a high cervical injury (NSCISC, *op cit*).

Collaborative research projects are essential in the development of new knowledge for improved treatment and services for people with SCI. Multi-center collaboration enables the collection of data from a larger number of subjects, increasing the statistical reliability of the information. Collaborative research enables projects with a wider range of expertise than may be available at a single center. Multi-center collaboration may also enable comparisons of different health care delivery systems. Additionally, multi-center projects may facilitate the inclusion of a more diverse range of individuals with SCI than may be available at a single center. It is a requirement of this final priority that the research include two or more centers from the MSCI Centers Program. However, to achieve the combination of target populations and professional expertise necessary to answer relevant questions, collaboration with other NIDRR centers, including the MSCI centers and centers supported by the Department of Veterans Affairs, the National Institutes of Health, and other public and private agencies are encouraged.

Spinal Cord Injury Data Center

The database of the MSCI Centers Program is a collaborative project in which all of the centers participate. The parameters of the database are determined by the directors of the centers, in consultation with NIDRR. The specification of the database as it is currently implemented can be obtained from the National SCI Statistical Center at the University of Alabama at Birmingham. The Center may be contacted on the World Wide Web at www.ncddr.org/rpp/hf/hfdw/mscis/index.html or by e-mail at NSCISC@uab.edu or by telephone at (205) 934–5049. The SCI data center will maintain the database, provide technical assistance regarding data

collection, and collaborate with all of the centers to publish information from the database. Historically the data center has been funded as a supplement to one of the centers in the program. However, we propose to establish a separate center to maintain this information.

Spinal Cord Injury Dissemination Center

The collection and dissemination of academic and consumer education products produced by the centers has been conducted by collaborative efforts among the centers in the program. This has resulted in a bibliography of articles published in professional journals and a database of consumer education materials. The center is to maintain and continue to collect and disseminate this information. This center will be required to collaborate with all of the MSCI Centers and collaborative research projects as well as the Data Center and other NIDRR supported dissemination centers, the National Rehabilitation Information Center (NARIC) and the National Center for the Dissemination of Disability Research (NCDDR).

Priority 1: Collaborative Research in Spinal Cord Injury

The Assistant Secretary will fund collaborative projects in SCI research for the purpose of generating new knowledge through research, development, or demonstration to improve outcomes for SCI through improved interventions and service delivery models. A collaborative SCI Project must:

(1) Conduct a significant and substantial research project in SCI that will contribute to the advancement of knowledge in SCI consistent with the Plan.

Applicants may select from the following examples of research objectives related to specific areas of the Plan or other research objectives, including those that cut across areas of the Plan:

(Chapter 3, Employment Outcomes): Either (1) Assess barriers to employment of people with SCI; or (2) conduct multi-center evaluation of direct intervention strategies for improving employment outcomes.

(Chapter 4, Maintaining Health and Function): Either (1) Conduct multi-center evaluations of interventions to improve outcomes in the preservation or restoration of function or the prevention and treatment of secondary conditions; or (2) assess service delivery models that provide quality care under constraints imposed by recent changes in the health care financing system.

(Chapter 5, Technology for Access and Function): Either (1) Conduct a multi-center evaluation of the impact of selected innovations in technology and rehabilitation engineering on service delivery; or (2) assess the impact of selected innovations in technology and rehabilitation engineering on outcomes such as function, independence, and employment.

(Chapter 6, Independent Living and Community Integration): Measure the environmental factors influencing independence and community integration, employment function, and health maintenance.

(Chapter 7, Associated): Either (1) Evaluate methods to build the capacity for rehabilitation services for individuals with SCI; or (2) Investigate the impact of national telecommunications and information policy on the access of persons with SCI to related education, work, and other opportunities.

(2) Disseminate research and demonstration findings to SCI centers, rehabilitation practitioners, researchers, individuals with SCI and their families or other authorized representatives, and other public and private organizations involved in SCI care and rehabilitation.

In carrying out these purposes, the project must:

- Include two or more centers from the MSCI Centers Program.
- Incorporate culturally appropriate methods of community outreach and education in areas such as health and wellness, housing, transportation, recreation, employment, and other community activities for individuals with diverse backgrounds with SCI;

Priority 2: Data Center

The Assistant Secretary will establish a data center to manage and facilitate the use of information on individuals with SCI collected by the MSCI Centers. The Data Center must:

(1) Establish a hardware and software system to securely maintain data from the MSCI Centers. The system must maintain individual confidentiality and provide for data entry, quality control, data retrieval, and data analysis.

(2) Train and provide technical assistance to the MSCI Centers on proper data collection methods, data entry, and utilization of the database.

(3) Establish methods and procedures to communicate with NIDRR and the directors of the MSCI Centers regarding submissions to the database and the quality and utility of data elements.

(4) Demonstrate the capacity to conduct, facilitate, and disseminate research utilizing the database in

collaboration with the dissemination center.

(5) Develop and facilitate methods for linking the data from the MSCI Centers with other databases to advance knowledge regarding SCI.

In carrying out these purposes the center must:

- Incorporate culturally appropriate methods of data collection and dissemination, including culturally sensitive measurement approaches; and
- Demonstrate the capacity to provide technical assistance to the MSCI Centers and to other related projects regarding database development and maintenance.

Priority 3: Dissemination Center

The Assistant Secretary will establish a center for the purpose of collecting, maintaining and disseminating academic and consumer education materials produced by the MSCI Centers and the Collaborative Research Projects in SCI. The Dissemination Center must:

(1) Establish, maintain, and disseminate a bibliography of the academic publications of the MSCI Centers and the Collaborative Research Projects in SCI.

(2) Establish a system to collect, maintain, and disseminate consumer and professional education materials produced by the MSCI Centers and the Collaborative Research Projects in SCI.

(3) Establish collaborative relationships with NIDRR supported dissemination centers, NARIC (www.naric.com) and NCDDR (www.ncddr.org).

In carrying out these purposes, the project must:

- Incorporate culturally appropriate methods of community outreach and education in areas such as health and wellness, housing, transportation, recreation, employment, and other community activities for individuals with diverse backgrounds with SCI; and
- Establish procedures to collaborate with the SCI Data Center and other information sources supported by public or private agencies to facilitate dissemination of information regarding SCI research.

Additional Selection Criterion

We will use the selection criteria in 34 CFR 350.54 to evaluate applications under this program. The maximum score for all the criteria is 100 points; however, we will also use the following criterion so that up to an additional ten points may be earned by an applicant for a total possible score of 110 points.

Up to ten (10) points based on the extent to which an application includes effective strategies for employing and advancing in employment qualified

individuals with disabilities in projects awarded under this absolute priority. In determining the effectiveness of those strategies, we will consider the applicant's prior success, as described in the application, in employing and advancing in employment qualified individuals with disabilities.

Thus for purposes of this competitive preference, applicants can be awarded up to a total of 10 points in addition to those awarded under the published selection criteria for this priority. That is, an applicant meeting this competitive preference could earn a maximum total of 110 points.

Applicable Program Regulations: 34 CFR part 350.

Electronic Access to This Document
