- Collaborate with other NIDRR funded projects, e.g., the Model Spinal Cord Injury and Burn Injury Model System Data Centers, regarding issues such as database development and maintenance, center operations, and data management.

Additional Selection Criterion

We will use the selection criteria in 34 CFR 350.54 to evaluate applications under this program. The maximum score for all the criteria is 100 points; however, we will also use the following criterion so that up to an additional ten points may be earned by an applicant for a total possible score of 110 points.

Up to ten (10) points based on the extent to which an application includes effective strategies for employing and advancing in employment qualified individuals with disabilities in projects awarded under this absolute priority. In determining the effectiveness of those strategies, we will consider the applicant's prior success, as described in the application, in employing and advancing in employment qualified individuals with disabilities.

Thus, for purposes of this competitive preference, applicants can be awarded up to a total of 10 points in addition to those awarded under the published selection criteria for these priorities. That is, an applicant meeting this competitive preference could earn a maximum total of 110 points.

Applicable Program Regulations: 34 CFR part 350.
