Federal Register

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/fedreg.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at http://www.access.gpo.gov/nara. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512-1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512–1262; or call (202) 512–1530 or 1–888–293–6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $638, or $697 for a combined **Federal Register,** Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $253. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $9.00 for each issue, or $9.00 for each group of pages as actually bound; or $2.00 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 66 FR 12345.

Printed on recycled paper.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: January 24, 2001, from 9:00 a.m. to Noon (E.S.T.)

WHERE: Office of the Federal Register
Conference Room
800 North Capitol Street, NW.
Washington, DC
(3 blocks north of Union Station Metro)

RESERVATIONS: 202–523–4538

Title 3—

The President

Presidential Determination No. 2001–09 of January 3, 2001

U.S. Contribution to the Korea Peninsula Energy Development Organization (KEDO): Certification and Waiver Under the Heading ''Nonproliferation, Anti-Terrorism, Demining and Related Programs'' in Title II of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 2001, as Enacted in Public Law 106–429

Memorandum for the Secretary of State

Pursuant to section 572(b) of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 2001, (the ''Act'') (Public Law 106–429), I hereby certify that:

(1) the parties to the Agreed Framework have taken and continue to take demonstrable steps to implement the Joint Declaration on Denuclearization of the Korean Peninsula in which the Government of North Korea has committed not to test, manufacture, produce, receive, possess, store, deploy, or use nuclear weapons, and not to possess nuclear reprocessing or uranium enrichment facilities;

(2) the parties to the Agreed Framework have taken and continue to take demonstrable steps to pursue the North-South dialogue;

(3) North Korea is complying with all provisions of the Agreed Framework;

(6) North Korea is complying with its commitments regarding access to suspect underground construction at Kumchang-ni; and

(8) the United States is continuing to make significant progress on eliminating the North Korean ballistic missle threat, including further missle tests and its ballistic missle exports.

Pursuant to the authority vested in me by section 572(c) of the Act, I hereby determine that it is vital to the national security interests of the United States to waive the certification requirements of section 572(b) of the Act with respect to paragraphs (4), (5), and (7) of section 572(b) and therefore hereby waive those three certification requirements in order to furnish up to $55 million in funds made available under the heading ''Nonproliferation, Anti-terrorism, Demining and Related Programs'' of the Act, for assistance for KEDO.

You are hereby authorized and directed to report this certification and waiver and the accompanying Memorandum of Justification to the Congress and to arrange for publication of the certification and waiver in the **Federal Register.**

Rules and Regulations

Federal Register

Vol. 66, No. 8

Thursday, January 11, 2001

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Parts 215, 225, 226, and 245

RIN 0584–AC95

Special Milk Program for Children, Summer Food Service Program, Child and Adult Care Food Program and Determining Eligibility for Free and Reduced Price Meals and Free Milk in Schools: Disclosure of Children's Eligibility Information to State Medicaid and the State Children's Health Insurance Program

AGENCY: Food and Nutrition Service, USDA.

ACTION: Interim rule with request for comments.

SUMMARY: This interim rule amends the regulations for the Special Milk Program for Children, Summer Food Service Program, Child and Adult Care Food Program, and Determining Eligibility for Free and Reduced Price Meals and Milk in Schools. The rule establishes requirements for the disclosure of children's free and reduced price meal or free milk eligibility information to State Medicaid (Medicaid) and the State Children's Health Insurance Program (SCHIP) by State and local agencies responsible for free and reduced price meal or free milk eligibility determinations. These regulations affect State agencies and program operators that administer the Child Nutrition Programs (National School Lunch Program, Special Milk Program for Children, School Breakfast Program, Child and Adult Care Food Program, and the Summer Food Service Program) and who elect to disclose children's free and reduced price meal or free milk eligibility information to Medicaid and SCHIP. The provisions also affect households determined eligible for free and reduced price meals or free milk. The rule reflects the waiver of confidentiality provisions of the Agricultural Risk Protection Act of 2000 and is intended to facilitate enrollment of eligible children in Medicaid and SCHIP.

DATES: *Effective Date:* October 1, 2000. *Comment Date:* To be assured of consideration, comments must be postmarked on or before April 11, 2001.

ADDRESSES: Address all comments concerning this interim rule to Robert M. Eadie, Chief, Policy and Program Development Branch, Child Nutrition Division, Food and Nutrition Service, USDA, 3101 Park Center Drive, Alexandria, VA 22302. You also may submit comments electronically at cndinterim@fns.usda.gov. All written submissions received will be available for public inspection in Room 1007 at the address listed above, during regular business hours (8:30 a.m. to 5:00 p.m.) Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Barbara Semper or Mary Jane Whitney at the above address or by telephone at 703–305–2590. A regulatory cost-benefit analysis was completed for this rule. Single copies may be requested from the FNS officials identified above.

SUPPLEMENTARY INFORMATION:

Background

What Is the Purpose of This Rule?

This interim rule implements a provision of the Agricultural Risk Protection Act of 2000, Public Law (P.L.) 106–224, enacted June 20, 2000. P.L. 106–224 amended section 9(b)(2)(C) of the Richard B. Russell National School Lunch Act (NSLA) (42 U.S.C. 1758(b)(2)(C)) to add Medicaid under title XIX of the Social Security Act (42 U.S.C. 1396 *et seq.*) and SCHIP under title XXI of that Act (42 U.S.C. 1397aa *et seq.*) to the programs that are authorized limited access to children's free and reduced price meal or free milk eligibility information provided:

(1) The State agency and school food authority elect to disclose children's free and reduced price meal or free milk eligibility information to these health insurance programs;

(2) There is a written agreement between the school and the health insurance program agency that requires the health insurance program agency to use the information to seek to enroll children in Medicaid and SCHIP; and

(3) Parents/guardians are notified and given an opportunity to elect not to have their children's eligibility information disclosed to Medicaid or SCHIP.

Does the NSLA Allow Disclosure of Children's Eligibility Information to Other Programs?

On July 25, 2000, the Food and Nutrition Service (FNS) published a proposed rule on the disclosure of children's (and adult participants' in the Child and Adult Care Food Program) free and reduced price meal or free milk eligibility information (65 FR 45725) to implement provisions of Pub. L. 103–448, the Healthy Meals for Healthy Americans Act of 1994. Pub. L. 103–448 amended the NSLA to allow limited disclosure of children's eligibility information to certain programs and individuals. The comment period for the proposed rule closes on November 22, 2000. In accordance with the statute, the proposed rule would authorize disclosure, without parental/guardian consent, to persons directly connected with the administration or enforcement of:

(1) The NSLA or the Child Nutrition Act of 1966 (CNA) (42 U.S.C. § 1771 *et seq.*) or a regulation issued under either of those Acts;

(2) A Federal education program;

(3) A State health or education program (other than Medicaid) administered by the State or local education agency;

(4) A Federal, State or local means-tested nutrition program with eligibility standards comparable to the National School Lunch Program (NSLP);

(5) The Comptroller General of the United States for audit and examination; and

(6) Certain law enforcement officials for investigating alleged program violations.

Pub. L. 103–448 specifically excluded disclosure of children's eligibility information, without consent, to a program under title XIX of the Social Security Act, i.e., Medicaid (42 U.S.C. 1396 et. seq.). Pub. L. 103–448 did not address disclosure of children's eligibility information to SCHIP, which was established in later Federal legislation. The Agricultural Risk Protection Act of 2000, Pub. L. 106–224, subsequently amended the NSLA to provide disclosure of children's eligibility information to Medicaid and

SCHIP. This interim rule promulgates the regulations for Pub. L. 106–224.

FNS previously issued guidance that allows disclosure of eligibility information consistent with P.L. 103–448. Under that guidance, disclosure to Medicaid and SCHIP is allowed with parental/guardian consent. Please refer to the proposed rule published on July 25, 2000 at 65 FR 45725 for a discussion of the disclosure provisions under P.L. 103–448.

Why Is This Rule Being Issued as an Interim Rule and Not a Proposed Rule?

Section 242(c) of Pub. L. 106–224 makes the provisions of that law addressed in this rulemaking effective October 1, 2000 and section 263 requires that FNS promulgate regulations to implement the provisions as soon as practicable after the date of enactment without regard to the Administrative Procedure Act's notice and comment provisions at 5 U.S.C. § 553; the Statement of Policy of the Secretary of Agriculture effective July 24, 1971 (36 FR 13804) relating to notices of proposed rulemaking and public participation in rulemaking; and the Paperwork Reduction Act at 44 U.S.C. chapter 35. In addition, section 172 of Pub. L. 106–224 requires us to promulgate rules to carry out the Act and its amendments not later than 120 days after the date of enactment. For these reasons, we are not taking public comment prior to promulgation of this interim rule.

To benefit from the experiences of program operators and because the disclosure of eligibility information is a sensitive issue, FNS decided to issue this rule as an interim, rather than a final rule, in order to facilitate public comment. FNS intends to issue a final rule combining the proposed disclosure provisions implementing Pub. L. 103–448 and these interim disclosure provisions implementing Pub. L. 106–224 after consideration of the comments received on these rules.

What Programs Are Being Affected?

As with the amendment to the NSLA made by Pub. L. 103–448, the new provisions pertaining to disclosure of children's eligibility information to Medicaid and SCHIP appear in the part of the NSLA that applies to the free and reduced price meal application process for the NSLP. However, based on FNS practices and policies dealing with past issues and the need for consistency among the Child Nutrition Programs, these regulations on the disclosure of free and reduced price meal or free milk eligibility information by determining agencies to Medicaid and SCHIP apply to all the Child Nutrition Programs—the NSLP, School Breakfast Program (SBP), Special Milk Program for Children (SMP), Child and Adult Care Food Program (CACFP), and camps and enrolled sites in the Summer Food Service Program (SFSP). Therefore, this rule amends the regulations for each of these programs. The various sections amended are listed following the discussion of each issue addressed by this rule. The minor wording differences necessary to accommodate the terminology for the specific programs are not addressed in the preamble. School food authorities, SMP child-care institutions, CACFP institutions, and SFSP sponsors are determining agencies and are collectively referred to as ''program operators'' in the preamble. Additionally, this approach is consistent with the July 25, 2000, proposed rule.

What Definitions Will Be Added to the Regulations?

Disclosure. Any time information is revealed or used for a purpose other than for the purpose for which the information was obtained, it is a disclosure. This is true even when the same agency that obtained the information is the one wishing to use it for another purpose. The term ''disclosure,'' refers to access, release, or transfer of personal data about participants by means of print, tape, microfilm, microfiche, electronic communication or any other means. In this rule, the data would be individual children's free and reduced price eligibility status or other information obtained through the free and reduced price meal or free milk application or through direct certification.

Medicaid and SCHIP. Medicaid and SCHIP refers to the Federal and State funded health insurance programs under titles XIX and XXI of the Social Security Act, which provide free and low cost health insurance to needy children.

This interim rule will include the above definitions in the alphabetical listings at 7 CFR 215.2, 225.2, 226.2, and 245.2.

Is Disclosure of Individual Children's Eligibility Information to Medicaid or SCHIP Required?

Section 9(b)(2)(C)(ii)(IV) of the NSLA, as amended by Pub. L. 106–224, specifies that individual children's eligibility information may be disclosed to Medicaid and SCHIP only if the State agency and program operators ''elect'' to do so. Both the State agency and program operator must agree to the disclosure. Since the disclosure provision applies to all the Child Nutrition Programs, in most cases, this would be the State agency and the school food authority or school, SFSP sponsor, or CACFP institution. This provision is included in §§ 215.13a(g)(1), 225.15(g)(1), 226.23(i)(1), 245.6(f)(1) of this interim rule. Additionally, as discussed later in this preamble, parents/guardians must be given the opportunity to elect not to have their information disclosed.

What Information May Be Disclosed for Use by Medicaid and SCHIP?

When both the State agency and program operators elect to disclose eligibility information for use by Medicaid/SCHIP and parents/guardians have not declined the disclosure, program operators may disclose children's eligibility information. In accordance with section 9(b)(2)(C)(iii)(IV) of the NSLA, program operators may disclose children's names, eligibility status (whether they are eligible for free or reduced price meals or free milk), and any other eligibility information obtained from the application for free and reduced price meals or free milk or through direct certification to persons directly connected with the administration of Medicaid or SCHIP. (Please note that for the Child and Adult Care Food Program and the Summer Food Service Program, children's eligibility information may only be disclosed to the extent that there are free and reduced price meal applications for these children.) This provision is included in §§ 215.13a(g)(2), 225.15(g)(2), 226.23(i)(2), and 245.6(f)(2).

Who Is a Person ''directly connected'' With the Administration of Medicaid or SCHIP?

The NSLA permits disclosure and use of program eligibility information specifically to ''a person directly connected with the administration'' of Medicaid or SCHIP for the purpose of identifying and seeking to enroll children in Medicaid or SCHIP. Persons directly connected with the administration of State Medicaid and SCHIP for purposes of disclosure of free and reduced price meal and free milk eligibility information are State employees and persons authorized under Federal and State Medicaid and SCHIP requirements to carry out initial processing of Medicaid or SCHIP applications or to make eligibility determinations for Medicaid or SCHIP. Initial processing of Medicaid or SCHIP applications includes assisting individuals to fill out the application, explaining requirements and similar

activities. In addition to being authorized under Federal and State Medicaid requirements, persons directly connected with Medicaid or SCHIP administration must be designated by the Medicaid or SCHIP agency to receive Medicaid or SCHIP eligibility information. This may include employees of county health departments, county departments of human or social services, family service agencies or income maintenance agencies. This also may include persons under contract to the State health program to make eligibility determinations and enroll children in the State health insurance program. These entities and persons must have a formal relationship with the Medicaid or SCHIP agency to be directly connected with Medicaid or SCHIP administration.

The statute allows disclosure of children's eligibility information to identify children who may be eligible for one of these health insurance programs and to seek to enroll eligible children in the applicable program. The statute does not authorize disclosure to persons connected with Medicaid or SCHIP enforcement activities. Thus, Federal, State and local reviewers responsible for reviewing or auditing compliance with State Medicaid or SCHIP regulations may not have access to children's free and reduced price meal or free milk eligibility information under this rule.

In general, organizations and individuals assisting in Medicaid and SCHIP outreach activities are not authorized access to children's free and reduced price eligibility information. The intent is to limit disclosure of program eligibility information to those who have a ''need to know'' program eligibility information for identifying and seeking to enroll eligible children in Medicaid and SCHIP. Since States have flexibility in implementing Medicaid and SCHIP, FNS recommends that State agencies and determining agencies contact the Medicaid/SCHIP coordinator in their State to determine the persons or entities authorized and designated by Medicaid or SCHIP to receive eligibility information. A description of ''a person directly connected'' with State Medicaid or SCHIP administration is included in §§ 215.13a(g)(3), 225.15(g)(3), 226.23(i)(3), and 245.6(f)(3) of this rule.

What If Student Records and Other Systems Are Computerized?

FNS is concerned about maintaining the confidentiality of children's eligibility information that is maintained in a computerized data base. Procedures must be in place to ensure that only authorized individuals have access to children's eligibility information.

Many schools are now computerized, and individual student information is often part of a Statewide electronic database under the responsibility of the State's Department of Education. The information may also be part of a local school district database. Typically, these databases contain ''directory information,'' such as student's name, address, phone number, and ''education records,'' such as achievement test scores, grades, special education plans, and evaluations. The Department of Education has regulations restricting access to ''education records,'' including those on computerized systems. These regulations are found at 34 CFR Part 99.

Program operators should take note that ''education records'' do not include Child Nutrition Program eligibility information. Therefore, the Department of Education regulations do not extend to program eligibility information for the Child Nutrition Programs. Nor is compliance with the Department of Education confidentiality regulations sufficient to meet the confidentiality protections in the NSLA. Therefore, program operators, who may also be database managers, must ensure that to the extent that Child Nutrition Program eligibility information is kept together with other school records, controls are established and maintained to ensure that the program eligibility information is available only to authorized persons and used only for authorized purposes.

FNS is not proposing any specific methods to ensure compliance with the NSLA confidentiality provisions in these situations. However, FNS remains concerned about the extent of access to the databases, and ways to protect program eligibility information from disclosure and use beyond what is authorized by Congress. Since FNS experience in this area is limited, commenters are encouraged to provide their experiences with student databases in which access restrictions vary according to the sensitivity of the different data items in the database. An example would be a school district database where access to students' academic records is more restricted than is access to students' class schedules, addresses, and other common information. Comments on this subject will aid FNS in determining whether special controls are necessary in situations in which program eligibility information reside in the same database where other student information is maintained. While this rule would not forbid such arrangement, FNS wishes to emphasize that to comply with this rule, database managers, who may also be program operators, must restrict access to program eligibility information to only those individuals and uses authorized by statute and regulation.

Are There Restrictions on How Children's Free and Reduced Price Eligibility Information May Be Used by State Medicaid and SCHIP?

Section 9(b)(2)(C)(iii)(IV) of the NSLA specifies that Medicaid and SCHIP agencies and health insurance program operators receiving children's free and reduced price meal or free milk eligibility information may only use that information to identify children that may be eligible for State Medicaid or SCHIP and to seek to enroll them in those programs. State agencies and program operators must include this restriction in the agreement with Medicaid or SCHIP officials discussed later in this preamble. This provision is added to § § 215.13a(g)(4), 225.15(g)(4), 226.23(i)(4), and 245.6(f)(4).

The statute and this regulation specify that children's eligibility information, when disclosed to Medicaid or SCHIP, must be used to identify and ''seek to enroll'' children in one of these health insurance programs. In actuality, it is unlikely that children will be automatically enrolled in Medicaid or SCHIP based on information from the free or reduced price application or obtained through direct certification, because Medicaid and SCHIP need additional information to enroll children. Rather, children's free and reduced price meal or free milk eligibility information will be used to facilitate Medicaid and SCHIP enrollment. There is concern that households may believe that by allowing their information to be disclosed to Medicaid and SCHIP, their children will be automatically enrolled in one of these health insurance programs without the household taking further action. Medicaid and SCHIP officials and program operators should work together to ensure that once households are identified as potentially eligible for Medicaid or SCHIP, households are aware that they must complete the Medicaid or SCHIP application process.

Must Households Be Notified of Potential Disclosures to Medicaid and SCHIP?

In accordance with section 9(b)(2)(C)(vi)(II)(aa) and (bb) of the NSLA, for any disclosures to State Medicaid and/or SCHIP, parents/guardians must be notified of the potential disclosure and given the opportunity to elect not to have their

information disclosed. The notification must inform the parents/guardians that: (1) They are not required to consent to the disclosure; (2) the information, if disclosed, will be used to facilitate the identification and enrollment of eligible children in a health insurance program; and (3) their decision will not affect their children's eligibility for free and reduced price meals or free milk. The notification may be included in the letter/notice to parents/guardians that accompanies the free and reduced price meal or free milk application, on the application itself or in a separate but concurrent notice provided to parents/guardians. The notice must be given prior to the disclosure and parents/guardians must be given a reasonable time limit to respond. (A discussion about notifying households of potential disclosures of eligibility information for children who are determined eligible for free meals through direct certification is included below.) Only the parent or guardian who is a member of the household or family for purposes of the free and reduced price meal or free milk application, *i.e.,* the parent/guardian included on the application, must be notified and given the option to decline the disclosure of eligibility information. In most cases of divorce or separation, this means the custodial parent or guardian. However, if custody is shared, the parents or guardians must decide who has primary custody for purposes of making application for the program. The parent or guardian having such custody would be the only person who must be notified and given the option to elect to decline the disclosure. In other words, by not declining to have their information disclosed to Medicaid/SCHIP, the parent/guardian is consenting to have their eligibility information shared. FNS is concerned about the personal financial data at stake. This information is unlike other student records that directly concern the education of the child, and in which both parents have a direct interest. The program eligibility information in these circumstances is associated with one parent or guardian, and FNS believes that only that parent or guardian should be given the option of electing whether or not to disclose their eligibility information. FNS recognizes that this is a difficult issue and is particularly interested in comments on this point.

Regardless of the document used to notify parents/guardians and to secure the consent/declination, officials must provide the household with adequate information for them to determine whether or not to allow the disclosure of their eligibility information. This rule would amend §§ 215.13a(g)(5), 225.15(g)(5), 226.23(i)(5), and 245.6(f)(5) to set the minimum standards for the notice of potential disclosure.

How Are Households Who Are Determined Eligible for Free Meals Through Direct Certification Notified About the Potential Disclosure of Eligibility Information?

Section 9(b)(2)(C)(iii) of the NSLA authorizes the disclosure of participants' free and reduced price information obtained from a free and reduced price meal application or obtained through direct certification. As specified in § 245.6(b), direct certification is the process by which program operators determine program eligibility by directly communicating with the appropriate State or local agency to obtain documentation that an individual is a member of a food stamp household (or member of a household receiving benefits under the Food Distribution Program on Indian Reservations (FDPIR) in lieu of food stamps) or a member of a family receiving assistance under certain State programs for the Temporary Assistance for Needy Families (TANF). In the case of direct certification, the agency administering the Food Stamp Program, FDPIR or TANF, as appropriate, may add a notification/declination statement to the notice of eligibility for free meals or milk under the Child Nutrition Programs that is provided to the household as documentation of eligibility for free meals. The household would be asked to contact the program operator if they did not want their information disclosed to Medicaid or SCHIP. Another option is for the program operator to include the notification/declination statement on the notice of eligibility for free meals that the program operator provides to the households when the direct certification is accomplished by computer match. Regardless of the method chosen to notify households of the potential disclosure and to obtain their consent/declination, officials must provide households with adequate information to determine whether to disclose their information and adequate time for the household to respond.

May Social Security Numbers Be Disclosed?

The Privacy Act of 1974 (5 U.S.C. 552a note) requires that notice be given of the intended uses of social security numbers. Thus, if a State agency or program operator intends to disclose social security numbers, either through the disclosure provisions authorized in the NSLA or with specific parental consent, then section 7(b) of the Privacy Act of 1974 (5 U.S.C. 552a note) requires that notice of the planned uses of the social security number be given.

The easiest method is to include the planned uses of social security numbers in the Privacy Act notice currently required by §§ 225.15(f)(4)(iv), 226.23(e)(1)(ii)(F), and 245.6(a)(1), because a Privacy Act notice is already on the free and reduced price meal application. The only uses of social security numbers currently listed in the regulations and the prototype application are for the determination and verification of eligibility for program meals. Any State agency or program operator that plans to disclose all eligibility information, including the social security number, to Medicaid or SCHIP administrators or plans to use the number for purposes not specified in their Privacy Act notice must amend the Privacy Act notice to reflect this. State agencies and program operators are responsible for ensuring the adequacy of their Privacy Act notice, and FNS encourages them to consult with their legal counsel. The requirement regarding Privacy Act compliance is specified in §§ 215.13a(g)(6), 225.15(g)(6), 226.23(i)(6), and 245.6(f)(6) of this interim rule.

Currently, the regulations for the SMP do not include a Privacy Act notice. The addition of a Privacy Act notice to the SMP was proposed in the July 25, 2000 rule (65 FR 45725). To ensure Privacy Act compliance in that program, this rule adds a Privacy Act notice requirement for the SMP in child-care institutions. The Privacy Act notice requirement for the SMP in child-care institutions is added at § 215.13a(f).

This rule amends and simplifies current Privacy Act notice required in §§ 226.23(e) and 245.6(a). The revision to the Privacy Act notice on the free and reduced price application replaces the three sentences giving detailed descriptions of the potential use of the social security number for verification with a more general, simpler statement that the social security number will be used in the administration and enforcement of the program. This revision is intended to respond to concerns about the lengthy Privacy Act notice previously required by program regulations. This revision shortens the notice and reduces the amount of space it takes up on the application. An additional Privacy Act notice is required to be given before verification (for those programs subject to verification). That notice would continue to provide the more detailed description on the potential uses of social security numbers in verification. The sections

revised are §§ 225.15(f)(4)(iv), 226.23(e)(1)(ii)(F), and 245.6(a)(1). This revision was proposed in the July 25, 2000 rule (65 FR 45725).

Must There Be an Agreement With State Medicaid and/or SCHIP?

Section 9(b)(2)(C)(vi)(I) of the NSLA specifies that the determining agency must have a written agreement with the State or local agency or agencies administering Medicaid and/or SCHIP prior to disclosing children's free and reduced price meal or free milk eligibility information. At a minimum, the agreement must: (1) Identify the health insurance program or health agency receiving children's eligibility information; (2) describe the information that will be disclosed; (3) require the insurance program or health agency to use the eligibility information obtained; (4) specify that the information must only be used to identify children eligible for and to seek to enroll children in Medicaid or SCHIP; (5) describe how the information will be protected from unauthorized uses and disclosures; (6) describe the penalties for unauthorized disclosure; and (7) be signed by both the determining agency and the Medicaid/SCHIP program or agency receiving children's eligibility information. This provision is included in §§ 215.13a(g)(7), 225.15(g)(7), 226.23(i)(7), and 245.6(f)(7).

What Are the Penalties for Improper Disclosure?

The NSLA establishes a fine of not more than $1000 or imprisonment of not more than 1 year, or both, for publishing, divulging, disclosing, or making known in any manner or extent not authorized by Federal law, any eligibility information. This includes the disclosure of eligibility information by one entity authorized under the statute to receive the information to any other entity, even if that entity would otherwise be authorized to receive the information directly from the determining agency, i.e., third party disclosures are prohibited. These penalties are described in §§ 215.13a(g)(8), 225.15(g)(8), 226.23(i)(8), and 245.6(f)(8) of this interim rule.

What Are the State Agency's Responsibilities?

A State agency that elects to disclose children's free and reduced price meal or free milk information, with the agreement of the determining agency, must ensure that the determining agency: (1) Has a written agreement with the State or local agency or agencies administering health insurance programs for children under title XIX and XXI of the Social Security Act (42 U.S.C. 1396 *et seq.* and 1397aa *et seq.*) that requires the health agencies to use children's free and reduced price meal or free milk eligibility information to seek to enroll children in those health insurance programs; and (2) notifies each household of the information that will be disclosed, that the information disclosed will be used only to seek to enroll children in Medicaid or the State Children's Health Insurance Program and provides each parent/guardian with an opportunity to elect not to have the information disclosed. Sections 215.13a(g)(9), 225.15(g)(9), 226.23(i)(9), and 245.6(f)(9) specify the State agency's responsibilities regarding disclosures.

Summary

FNS is amending the Child Nutrition Program regulations to permit the disclosure of program eligibility information to Medicaid and SCHIP consistent with the recent amendments to the NSLA made by P.L. 106–224. FNS' goal is to facilitate the enrollment of eligible children in those health insurance programs, without sacrificing the confidentiality of children's eligibility information.

Public Participation

Section 242(c) of Pub. L. 106–224 (7 U.S.C. 1421 note) makes the provisions of this rule effective on October 1, 2000. Further, section 263 of Pub. L. 106–224 directs the Department to implement these provisions without regard to the Administrative Procedure Act's notice and public comment provisions at 5 U.S.C. § 553. The Department is thus promulgating the provisions of this interim rule without prior notice or public comment. As a result, as of October 1, program administrators will be given the opportunity to disclose participant's program eligibility information to Medicaid and SCHIP to facilitate enrollment in those programs. The Department, however, is providing interested parties an opportunity to comment on the interim regulatory provisions during the public comment period and will consider comments submitted when finalizing this rule.

Executive Order 12866

This rule has been determined to be significant and was reviewed by the Office of Management and Budget under Executive Order 12866.

Public Law 104–4

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes a requirement for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, the FNS generally prepares a written statement, including a cost-benefit analysis. This is done for proposed and final rules that have ''Federal mandates'' which may result in expenditures of $100 million or more in any one year by State, local, or tribal governments, in the aggregate, or by the private sector. When this statement is needed for a rule, section 205 of the UMRA generally requires the FNS to identify and consider a reasonable number of regulatory alternatives. It must then adopt the least costly, most cost-effective or least burdensome alternative that achieves the objectives of the rule.

This interim rule contains no Federal mandates of $100 million or more in any one year (under regulatory provisions of Title II of the UMRA) for State, local, and tribal governments or the private sector. Thus, this interim rule is not subject to the requirements of sections 202 and 205 of the UMRA.

Regulatory Flexibility Act

This interim rule has been reviewed with regard to the requirements of the Regulatory Flexibility Act (5 U.S.C. 601–612). Shirley R. Watkins, Under Secretary for Food, Nutrition and Consumer Services, has certified that this rule will not have a significant economic impact on a substantial number of small entities. By permitting access to certain eligibility information, this rule could reduce duplicative paperwork by certain agencies which serve low-income children and adults. The rule could streamline operations of those programs. The provisions of this rule also may enhance access to these programs by needy children. The Department of Agriculture does not anticipate any adverse fiscal impact resulting from implementation of this rulemaking. Although there may be some burdens associated with this rule, the burdens would not be significant and would be outweighed by the benefits of sharing of information.

Executive Order 12372

The Special Milk Program, the Summer Food Service Program, and the Child and Adult Care Food Program are listed in the Catalog of Federal Domestic Assistance under Nos. 10.556, 10.559, and 10.558 respectively. These programs are subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials (7 CFR Part

3015, Subpart V, and final rule related notice at 48 FR 29115, June 24, 1983).

Executive Order 12988

This interim rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is intended to have preemptive effect with respect to any State or local laws, regulations or policies which conflict with its provisions or which would impede its full implementation. This rule is not intended to have retroactive effect unless that is specified in the Effective Date section of the preamble of the final rule. Before any judicial challenge to the provisions of this rule or the application of its provisions, all administrative procedures that apply must be followed. The only administrative appeal procedures relevant to this proposed rule are the hearings that FNS must provide for decisions relating to eligibility for free and reduced price meals and free milk (§ 245.7 for the NSLP, SBP, and SMP in schools; § 226.23(e)(5) for the CACFP).

Paperwork Reduction Act

In accordance with the authority provided under section 263 of Pub. L. 106–224, this rulemaking is made without regard to the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

This rule contains burdens that were included in the burden estimate in the proposed rule, Disclosure of Children's Eligibility Information, published on July 25, 2000, at 65 FR 45725. That rule proposed to allow the disclosure of children's eligibility information to various education, nutrition, and health programs authorized under Pub. L. 103–448. Additionally, under the proposed rule, officials may disclose children's eligibility to other programs, such as Medicaid and SCHIP, with parental consent.

Since many of the provisions in the proposed rule, mentioned above, and this interim rule are similar, such as taking agreements with persons or agencies receiving children's eligibility information and notifying households of potential disclosures, the Department plans to issue one final rule that responds to commenter concerns on the proposed rule and this interim rule. The Department will make any adjustments to the burden estimate in that final rule.

Federalism Summary Impact Statement

Executive Order 13132 requires Federal agencies to consider the impact of their regulatory actions on State and local governments. Where such actions have ''federalism implications,'' agencies are directed to provide a statement for inclusion in the preamble to the regulation describing the agency's considerations in terms of the three categories called for under section (6)(a)(B) of Executive Order 13132:

Prior Consultation With State Officials

Prior to drafting this interim rule, we received input from State and local agencies at various times. Since the Child Nutrition Programs (CNP) are State administered, federally funded programs, our regional offices have informal and formal discussions with State and local officials on an ongoing basis regarding program implementation and performance. This arrangement allows State and local agencies to provide feedback that forms the basis for any discretionary decisions in this and other CNP rules. The provisions in this rule are primarily non-discretionary. Pub. L. 106–224 mandates that we promptly promulgate regulations without regard to the notice and comment provisions of 5 U.S.C. 553. However, because the disclosure of children's eligibility information is a sensitive issue, we are issuing this rule as an interim rule with a request for public comment.

Nature of Concerns and the Need To Issue This Rule

State and local agencies are generally concerned about protecting the confidentiality of children's eligibility information. They are also concerned about the paperwork and financial burdens placed on food service to provide eligibility information to Medicaid and SCHIP officials.

The issuance of a regulation is required by Pub. L. 106–224. Prior to Pub. L. 106–224, program officials were permitted to disclose children's eligibility information to certain programs and individuals without parental consent. Medicaid and SCHIP were not included. Therefore, program officials had to obtain the consent of parents/guardians if they elected to disclose children's eligibility information with Medicaid and SCHIP. A proposed rule to allow the disclosure of eligibility information to these other programs was published on July 25, 2000 (64 FR 45725). In accordance with Pub. L. 106–224, this interim rule will allow the disclosure of children's eligibility information unless parents/guardian elect not to have their information disclosed to Medicaid and SCHIP. Certain other provisions, as specified in the statute, must also be met prior to disclosing information to Medicaid and SCHIP.

Extent to Which We Meet These Concerns

We believe that we adequately address the issue of State and local flexibility. We clarify that the disclosure of children's eligibility information to Medicaid is a State and local decision. They are not required to disclose children's eligibility information. However, we encourage State and local agencies to work with Medicaid and SCHIP officials to make the exchange of eligibility information as streamlined as possible. Additionally, FNS has issued prototype materials, such as a prototype agreement between program operators and an agency receiving eligibility information and a prototype notification to parents/guardians that their eligibility information may be disclosed unless the program operator is notified that they do not want their information disclosed. Additionally, the Department of Health and Human Services, the department that administers Medicaid and SCHIP, is preparing an administrative guidance on reimbursement for costs associated with Medicaid and SCHIP outreach and enrollment. Finally, we will consider all comments received on this rule when we draft the final rule.

List of Subjects

7 CFR Part 215

Food assistance programs, Grant programs-education, Grant programs-health, Infants and children, Milk, Reporting and recordkeeping requirements.

7 CFR Part 225

Food assistance programs, Grant programs-health, Infants and children, Labeling, Reporting and recordkeeping requirements.

7 CFR Part 226

Accounting, Aged, Day care, Food assistance programs, Grant programs, Grant programs-health, Indians, Individuals with disabilities, Infants and children, Intergovernmental relations, Loan programs, Reporting and recordkeeping requirements, Surplus agricultural commodities.

7 CFR Part 245

Civil rights, Food assistance programs, Grant programs-education, Grant programs-health, Infants and children, Milk, Reporting and recordkeeping requirements, School breakfast and lunch programs.

Accordingly, 7 CFR Parts 215, 225, 226, and 245 are amended as follows:

PART 215—SPECIAL MILK PROGRAM FOR CHILDREN

1. Revise the authority citation for Part 215 to read as follows:

Authority: 42 U.S.C. 1772 and 1779.

2. In § 215.2:

a. Add a new paragraph (i–l) *Disclosure*;

b. Add a new paragraph (k–l) *Medicaid*; and

c. Redesignate paragraph (aa) *Summer Food Service Program* as paragraph (bb) *Summer Food Service Program* and add a new paragraph (aa) *State Children's Health Insurance Program* in its place.

The additions read as follows:

§ 215.2 Definitions.

* * * * *

(i–1) *Disclosure* means individual children's program eligibility information obtained through the free milk eligibility process that is revealed or used for a purpose other than for the purpose for which the information was obtained. The term refers to access, release, or transfer of personal data about children by means of print, tape, microfilm, microfiche, electronic communication or any other means.

* * * * *

(k–1) *Medicaid* means the State medical assistance program under title XIX of the Social Security Act (42 U.S.C. 1396 *et seq.*).

* * * * *

(aa) *State Children's Health Insurance Program (SCHIP)* means the State medical assistance program under title XXI of the Social Security Act (42 U.S.C. 1397aa *et seq.*).

* * * * *

3. In § 215.13a, add new paragraphs (f) and (g) to read as follows:

§ 215.13a Determining eligibility for free milk in child-care institutions.

* * * * *

(f) *Is a Privacy Act notice required on the free milk application?* Each free milk application must include substantially the following statement: ''Unless you include your child's case number for the Food Stamp Program, the Food Distribution Program on Indian Reservations (or other identifier for the Food Distribution Program on Indian Reservations) or the Temporary Assistance for Needy Families Program, you must include the social security number of the adult household member signing the application or indicate that the household member does not have a social security number. This is required by section 9 of the National School Lunch Act. The social security number is not mandatory, but the application cannot be approved if a social security number is not given or an indication is not made that the signer does not have a social security number. The social security number will be used in the administration and enforcement of the program.''

(g) *Disclosure of program eligibility information to State Medicaid (Medicaid) and the State Children's Health Insurance Program (SCHIP)* Program eligibility information about children eligible for free milk may be disclosed to Medicaid and SCHIP as described in this section.

(1) *Who decides whether to disclose program eligibility information to Medicaid and/or SCHIP?* The State agency may elect to allow child care institutions to disclose children's free milk eligibility information to Medicaid and SCHIP. Child care institutions may then elect to do so. Children's program eligibility information may only be disclosed to Medicaid or SCHIP when both the State agency and the child care institution so elect, the parent/guardian does not decline to have their eligibility information disclosed as described in paragraph (g)(5), and the requirements in this paragraph (g) are met.

(2) *What information may we disclose for use by Medicaid and SCHIP?* The State agency or child care institution, as appropriate, may disclose children's names, eligibility status (whether they are eligible for free milk), and any other eligibility information obtained through the free milk application or obtained through direct certification to persons directly connected with the administration of Medicaid or SCHIP.

(3) *Who are persons ''directly connected'' with the administration of Medicaid and SCHIP?* State employees and persons authorized under Federal and State Medicaid and SCHIP requirements to carry out initial processing of Medicaid or SCHIP applications or to make eligibility determinations are persons directly connected with the administration of Medicaid and SCHIP for purposes of disclosure of children's free milk eligibility information.

(4) *What are the restrictions on how Medicaid and SCHIP use children's free milk eligibility information?* Medicaid and SCHIP agencies and health insurance program operators receiving children's free milk eligibility information may only use the information to seek to enroll children in Medicaid or SCHIP. The Medicaid and SCHIP enrollment process may include targeting and identifying children from low-income households who are potentially eligible for Medicaid or SCHIP for the purpose of seeking to enroll them in Medicaid or SCHIP.

(5) *Must we notify households of potential disclosure to Medicaid or SCHIP?* The State agency or child care institution, as appropriate, must notify parents/guardians that their children's free milk eligibility information will be disclosed to Medicaid and/or SCHIP unless the parent/guardian elects not to have their information disclosed. Additionally, the State agency or sponsor, as appropriate, must give parents/guardians an opportunity to elect not to have their information disclosed to Medicaid or SCHIP. Only the parent or guardian who is a member of the household or family for purposes of the free and reduced price meal or free milk application may decline the disclosure of eligibility information. The notification must inform parents/guardians that they are not required to consent to the disclosure, that the information, if disclosed, will be used to identify children eligible for and to seek to enroll children in a health insurance program, and that their decision will not affect their children's eligibility for free milk. The notification may be included in the letter/notice to parents/guardians that accompanies the free milk application, on the application itself or in a separate notice provided to parents/guardians. The notice must give parents/guardians adequate time to respond. For children determined eligible through direct certification, the notice of potential disclosure may be included in the document informing parents/guardians of their children's eligibility for free milk through direct certification.

(6) *May social security numbers be disclosed?* The State agency or child care institution, as appropriate, may disclose social security numbers to any programs or persons authorized to receive all program eligibility information under this paragraph (g), provided parents/guardians have not declined to have their information disclosed. However State agencies and child care institutions that plan to disclose social security numbers must give notice of the planned use of the social security numbers. This notice must be in accordance with section 7(b) of the Privacy Act of 1974 (5 U.S.C. 552a note). The application must include substantially the following language for disclosures of social security numbers to Medicaid or SCHIP: ''The social security number may also be disclosed to Medicaid and the State Children's Health Insurance Program for the purpose of identifying and seeking to enroll eligible children in one of these health insurance programs.'' This

language is in addition to the notice required in paragraph (f) of this section. State agencies and child care institutions are responsible for drafting the appropriate notice for disclosures of social security numbers.

(7) *Are agreements required before disclosing program eligibility information?* The State agency or child care institution, as appropriate, must have a written agreement with the State or local agency or agencies administering Medicaid or SCHIP prior to disclosing children's free milk eligibility information. At a minimum, the agreement must:

(i) Identify the health insurance program or health agency receiving children's eligibility information;

(ii) Describe the information that will be disclosed;

(iii) Require that the Medicaid or SCHIP agency use the information obtained and specify that the information must only be used to seek to enroll children in Medicaid or SCHIP;

(iv) Describe how the information will be protected from unauthorized uses and disclosures;

(v) Describe the penalties for unauthorized disclosure; and

(vi) Be signed by both the Medicaid or SCHIP program or agency and the State agency or child care institution, as appropriate.

(8) *What are the penalties for unauthorized disclosure or misuse of information?* In accordance with section 9(b)(2)(C)(v) of the Richard B. Russell National School Lunch Act (42 U.S.C. 1758(b)(2)(C)(v)), any individual who publishes, divulges, discloses or makes known in any manner, or to any extent not authorized by statute or this section, any information obtained under this paragraph (g) will be fined not more than $1,000 or imprisoned for up to 1 year, or both.

(9) *What are the State agency's responsibilities regarding disclosures?* State agencies that elect to allow disclosure of children's free milk eligibility information to Medicaid or SCHIP, as provided in this paragraph (g), must ensure that any child care institution acting in accordance with that option:

(i) Has a written agreement with the State or local agency or agencies administering health insurance programs for children under titles XIX and XXI of the Social Security Act (42 U.S.C. 1396 et seq. and 1397aa et seq.) that requires the health agencies to use children's free milk eligibility information to seek to enroll children in those health insurance programs; and

(ii) Notifies each household of the information that will be disclosed, that the information disclosed will be used only to seek to enroll children in Medicaid or SCHIP and provides each parent/guardian with an opportunity to elect not to have the information disclosed.

PART 225—SUMMER FOOD SERVICE PROGRAM

1. The authority citation for Part 225 continues to read as follows:

Authority: Secs. 9, 13, and 14, National School Lunch Act, as amended (42 U.S.C. 1758, 1761, and 1762a).

2. In § 225.2, add new paragraphs *Disclosure; Medicaid;* and *State Children's Health Insurance Program (SCHIP)* in alphabetical order to read as follows:

§ 225.2 Definitions.

* * * * *

Disclosure means individual children's program eligibility information obtained through the free and reduced price meal eligibility process that is revealed or used for a purpose other than for the purpose for which the information was obtained. The term refers to access, release, or transfer of personal data about children by means of print, tape, microfilm, microfiche, electronic communication or any other means.

* * * * *

Medicaid means the State medical assistance program under title XIX of the Social Security Act (42 U.S.C. 1396 et seq.).

* * * * *

State Children's Health Insurance Program (SCHIP) means the State medical assistance program under title XXI of the Social Security Act (42 U.S.C. 1397aa et seq.).

* * * * *

3. In § 225.15:

a. Revise paragraph (f)(4)(iv), and

b. Redesignate paragraphs (g) and (h) as paragraphs (h) and (i) and add a new paragraph (g).

The revision and addition reads as follows:

§ 225.15 Management responsibilities of sponsors.

* * * * *

(f) * * *

(4) * * *

(iv) The following statement that provides notice to the household member whose social security number is disclosed: ''Unless you include your child's case number for the Food Stamp Program, the Food Distribution Program on Indian Reservations (or other identifier for the Food Distribution Program on Indian Reservations) or the Temporary Assistance for Needy Families Program, you must include the social security number of the adult household member signing the application or indicate that the household member does not have a social security number. This is required by section 9 of the National School Lunch Act. The social security number is not mandatory, but the application cannot be approved if a social security number is not given or an indication is not made that the signer does not have a social security number. The social security number will be used in the administration and enforcement of the program.''

* * * * *

(g) *Disclosure of program eligibility information to State Medicaid (Medicaid) and the State Children's Health Insurance Program (SCHIP).* Program eligibility information about children eligible for free and reduced price meals may be disclosed to Medicaid and SCHIP as described in this section.

(1) *Who decides whether to disclose program eligibility information to Medicaid and/or SCHIP?* The State agency may elect to allow sponsors to disclose children's free and reduced price meal eligibility information to Medicaid and SCHIP. Sponsors may then elect to do so. Children's program eligibility information may only be disclosed to Medicaid or SCHIP when both the State agency and the sponsor so elect, the parent/guardian does not decline to have their eligibility information disclosed as described in paragraph (g)(5), and the requirements in this paragraph (g) are met. y

(2) *What information may we disclose for use by Medicaid and SCHIP?* The State agency or sponsor, as appropriate, may disclose children's names, eligibility status (whether they are eligible for free or reduced price meals), and any other eligibility information obtained through the free and reduced price meal application or obtained through direct certification to persons directly connected with the administration of Medicaid or SCHIP.

(3) *Who are persons ''directly connected'' with the administration of Medicaid and SCHIP?* State employees and persons authorized under Federal and State Medicaid and SCHIP requirements to carry out initial processing of Medicaid or SCHIP applications or to make eligibility determinations are persons directly connected with the administration of Medicaid and SCHIP for purposes of disclosure of children's free and

reduced price meal eligibility information.

(4) *What are the restrictions on how Medicaid and SCHIP use children's free and reduced price meal eligibility information?* Medicaid and SCHIP agencies and health insurance program operators receiving children's free and reduced price meal eligibility information may only use the information to enroll children in Medicaid or SCHIP. The Medicaid and SCHIP enrollment process may include targeting and identifying children from low-income households who are potentially eligible for Medicaid or SCHIP for the purpose of seeking to enroll them in Medicaid or SCHIP.

(5) *What are the requirements for notifying households of potential disclosure to Medicaid or SCHIP?* The State agency or sponsor, as appropriate, must notify parents/guardians that their children's free or reduced price meal eligibility information will be disclosed to Medicaid and/or SCHIP unless the parent/guardian elects not to have their information disclosed. Additionally, the State agency or sponsor, as appropriate, must give parents/guardians an opportunity to elect not to have their information disclosed to Medicaid or SCHIP. Only the parent or guardian who is a member of the household or family for purposes of the free and reduced price meal or free milk application may decline the disclosure of eligibility information. The notification must inform parents/guardians that they are not required to consent to the disclosure, that the information, if disclosed, will be used to identify children eligible for and seek to enroll children in a health insurance program, and that their decision will not affect their children's eligibility for free or reduced price meals. The notification may be included in the letter/notice to parents/guardians that accompanies the free and reduced price application, on the application itself or in a separate notice provided to parents/guardians. The notice must give parents/guardians adequate time to respond. For children determined eligible through direct certification, the notice of potential disclosure may be included in the document informing parents/guardians of their children's eligibility for free meals through direct certification.

(6) *May social security numbers be disclosed?* The State agency or sponsor, as appropriate, may disclose social security numbers to any programs or persons authorized to receive all program eligibility information under this paragraph (g), provided parents/guardians have not declined to have their information disclosed. However, State agencies and sponsors that plan to disclose social security numbers must give notice of the planned use of the social security number. This notice must be in accordance with section 7(b) of the Privacy Act of 1974 (5 U.S.C. 552a note). The application must include substantially the following language for disclosures of social security numbers to Medicaid or SCHIP: ''The social security number may also be disclosed to Medicaid and the State Children's Health Insurance Program for the purpose of identifying and seeking to enroll eligible children in one of these health insurance programs.'' This language is in addition to the notice required in paragraph (f)(4)(iv) of this section. State agencies and sponsors are responsible for drafting the appropriate notice for disclosures of social security numbers.

(7) *Are agreements required before disclosing program eligibility information?* The State agency or sponsor, as appropriate, must have a written agreement with the State or local agency or agencies administering Medicaid or SCHIP prior to disclosing children's free and reduced price eligibility information. At a minimum, the agreement must:

(i) Identify the health insurance program or health agency receiving children's eligibility information;

(ii) Describe the information that will be disclosed;

(iii) Require that the Medicaid or SCHIP agency use the information obtained and specify that the information must only be used to seek to enroll children in Medicaid or SCHIP;

(iv) Describe how the information will be protected from unauthorized uses and disclosures;

(v) Describe the penalties for unauthorized disclosure; and

(vi) Be signed by both the Medicaid or SCHIP program or agency and the State agency or sponsor, as appropriate.

(8) *What are the penalties for unauthorized disclosure or misuse of information?* In accordance with section 9(b)(2)(C)(v) of the Richard B. Russell National School Lunch Act (42 U.S.C. 1758(b)(2)(C)(v)), any individual who publishes, divulges, discloses or makes known in any manner, or to any extent not authorized by statute or this section, any information obtained under this paragraph (g) will be fined not more than $1,000 or imprisoned for up to 1 year, or both.

(9) *What are the State agency's responsibilities regarding disclosures?* State agencies that elect to allow disclosure of children's free and reduced price meal eligibility information to Medicaid or SCHIP, as provided in this paragraph (g), must ensure that any sponsor acting in accordance with that option:

(i) Has a written agreement with the State or local agency or agencies administering health insurance programs for children under titles XIX and XXI of the Social Security Act (42 U.S.C. 1396 *et seq.* and 1397aa *et seq.*) that requires the health agencies to use children's free and reduced price meal eligibility information to seek to enroll children in those health insurance programs; and

(ii) Notifies each household of the information that will be disclosed, that the information disclosed will be used only to seek to enroll children in Medicaid or SCHIP and provides each parent/guardian with an opportunity to elect not to have the information disclosed.

* * * * *

PART 226—CHILD AND ADULT CARE FOOD PROGRAM

1. The authority citation for Part 226 continues to read as follows:

Authority: Secs. 9, 11, 14, 16 and 17, National School Lunch Act, as amended (42 U.S.C. 1758, 1759a, 1762a, 1765, and 1766).

2. In § 226.2, add new paragraphs *Disclosure; Medicaid;* and *State Children's Health Insurance Program (SCHIP)* in alphabetical order to read as follows:

§ 226.2 Definitions.

* * * * *

Disclosure means individual children's program eligibility information obtained through the free and reduced price meal eligibility process that is revealed or used for a purpose other than for the purpose for which the information was obtained. The term refers to access, release, or transfer of personal data about children by means of print, tape, microfilm, microfiche, electronic communication or any other means.

* * * * *

Medicaid means *Title XIX* of the Social Security Act.

* * * * *

State Children's Health Insurance Program (SCHIP) means the State medical assistance program under title XXI of the Social Security Act (42 U.S.C. 1397aa et seq.).

* * * * *

3. In § 226.23, revise paragraph (e)(1)(ii)(F) and add a new paragraph (i) to read as follows:

§ 226.23 Free and reduced-price meals.

* * * * *

(e)(1) * * *

(ii) * * *

(F) A statement that includes substantially the following information: ''Unless you include your child's case number for the Food Stamp Program, the Food Distribution Program on Indian Reservations (or other identifier for the Food Distribution Program on Indian Reservations) or the Temporary Assistance for Needy Families Program, you must include the social security number of the adult household member signing the application or indicate that the household member does not have a social security number. This is required by section 9 of the National School Lunch Act. The social security number is not mandatory, but the application cannot be approved if a social security number is not given or an indication is not made that the signer does not have a social security number. The social security number will be used in the administration and enforcement of the program.'' State agencies and institutions must ensure that the notice complies with section 7(b) of the Privacy Act of 1974 (5 U.S.C. 552a note); and

* * * * *

(i) *Disclosure of program eligibility information to State Medicaid (Medicaid) and the State Children's Health Insurance Program (SCHIP)* Program eligibility information about children eligible for free and reduced price meals may be disclosed to Medicaid and SCHIP as described in this section.

(1) *Who decides whether to disclose program eligibility information to Medicaid and/or SCHIP?* The State agency may elect to allow institutions to disclose children's free and reduced price meal eligibility information to Medicaid and SCHIP. Institutions may then elect to do so. Children's program eligibility information may only be disclosed to Medicaid or SCHIP when both the State agency and the institution so elect, the parent/guardian does not decline to have their eligibility information disclosed as described in paragraph (i)(5), and the requirements in this paragraph (i) are met.

(2) *What information may we disclose for use by Medicaid and SCHIP?* The State agency or institution, as appropriate, may disclose children's names, eligibility status (whether they are eligible for free or reduced price meals), and any other eligibility information obtained through the free and reduced price meal application to persons directly connected with the administration of Medicaid or SCHIP.

(3) *Who are persons ''directly connected'' with the administration of Medicaid and SCHIP?* State employees and persons authorized under Federal and State Medicaid and SCHIP requirements to carry out initial processing of Medicaid or SCHIP applications or to make eligibility determinations are persons directly connected with the administration of Medicaid and SCHIP for purposes of disclosure of children's free and reduced price meal eligibility information.

(4) *What are the restrictions on how Medicaid and SCHIP use children's free and reduced price meal eligibility information?* Medicaid and SCHIP agencies and health insurance program operators receiving children's free and reduced price meal eligibility information may only use the information to seek to enroll children in Medicaid or SCHIP. The Medicaid and SCHIP enrollment process may include targeting and identifying children from low-income households who are potentially eligible for Medicaid or SCHIP for the purpose of seeking to enroll them in Medicaid or SCHIP.

(5) *What are the requirements for notifying households of potential disclosure to Medicaid or SCHIP?* The State agency or institution, as appropriate, must notify parents/guardians that children's free or reduced price meal eligibility information will be disclosed to Medicaid and/or SCHIP unless the parent/guardian elects not to have their information disclosed. Additionally, the State agency or institution, as appropriate, must give parents/guardians an opportunity to elect not to have their information disclosed to Medicaid or SCHIP. Only the parent or guardian who is a member of the household or family for purposes of the free and reduced price meal or free milk application may decline the disclosure of eligibility information. The notification must inform parents/guardians that they are not required to consent to the disclosure, that the information, if disclosed, will be used to identify children eligible for and to seek to enroll children in a health insurance program, and that their decision will not affect their children's eligibility for free or reduced price meals. The notification may be included in the letter/notice to parents/guardians that accompanies the free and reduced price application, on the application itself or in a separate notice provided to parents/guardians. The notice must give parents/guardians adequate time to respond. For children determined eligible through direct certification, the notice of potential disclosure may be included in the document informing parents/guardians of their children's eligibility for free meals through direct certification.

(6) *May social security numbers be disclosed?* The State agency or institution, as appropriate, may disclose social security numbers to any programs or persons authorized to receive all program eligibility information under this paragraph (i), provided parents/guardians have not declined to have their information disclosed. However, State agencies and institutions that plan to disclose social security numbers must give notice of the planned use of the social security numbers. This notice must be in accordance with section 7(b) of the Privacy Act of 1974 (5 U.S.C. 552a note). The application must include substantially the following language for disclosures of social security numbers to Medicaid or SCHIP: ''The social security number may also be disclosed to Medicaid and the State Children's Health Insurance Program for the purpose of identifying and seeking to enroll eligible children in one of these health insurance programs.'' This language is in addition to the notice required in paragraph (e)(1)(i)(F) of this section. State agencies and institutions are responsible for drafting the appropriate notice for disclosures of social security numbers.

(7) *Are agreements required before disclosing program eligibility information?* The State agency or institution, as appropriate, must have a written agreement with the State or local agency or agencies administering Medicaid or SCHIP prior to disclosing children's free and reduced price eligibility information. At a minimum, the agreement must:

(i) Identify the health insurance program or health agency receiving children's eligibility information;

(ii) Describe the information that will be disclosed;

(iii) Require that the Medicaid or SCHIP agency use the information obtained and specify that the information must only be used to seek to enroll children in Medicaid or SCHIP;

(iv) Describe how the information will be protected from unauthorized uses and disclosures;

(v) Describe the penalties for unauthorized disclosure; and

(vi) Be signed by both the Medicaid or SCHIP program or agency and the State agency or institution, as appropriate.

(8) *What are the penalties for unauthorized disclosure or misuse of information?* In accordance with section 9(b)(2)(C)(v) of the Richard B. Russell National School Lunch Act (42 U.S.C. 1758(b)(2)(C)(v)), any individual who publishes, divulges, discloses or makes known in any manner, or to any extent

not authorized by statute or this section, any information obtained under this paragraph (i) will be fined not more than $1,000 or imprisoned for up to 1 year, or both.

(9) *What are the State agency's responsibilities regarding disclosures?* State agencies that elect to allow disclosure of children's free and reduced price meal eligibility information to Medicaid or SCHIP, as provided in this paragraph (i), must ensure that any institution acting in accordance with that option:

(i) Has a written agreement with the State or local agency or agencies administering health insurance programs for children under titles XIX and XXI of the Social Security Act (42 U.S.C. 1396 *et seq.* and 1397aa *et seq.*) that requires the health agencies to use children's free and reduced price meal eligibility information to seek to enroll children in those health insurance programs; and

(ii) Notifies each household of the information that will be disclosed, that the information disclosed will be used only to seek to enroll children in Medicaid or SCHIP and provides each parent/guardian with an opportunity to elect not to have the information disclosed.

PART 245—DETERMINING ELIGIBILITY FOR FREE AND REDUCED PRICE MEALS AND FREE MILK IN SCHOOLS

1. The authority citation for Part 245 is revised to read as follows:

Authority: 42 U.S.C. 1752, 1758, 1759a, 1772, 1773, and 1779.

2. In § 245.2:

a. Redesignate paragraph (a–3) as paragraph (a–4) and add new paragraph (a–3) in its place;

b. Redesignate paragraph (f–1) as paragraph (f–2) and add a new paragraph (f–1) in its place; and

c. Redesignate paragraphs (k) and (l) as paragraphs (l) and (m) and add a new paragraph (k).

The additions read as follows:

§ 245.2 Definitions.

* * * * *

(a–3) *Disclosure* means individual children's program eligibility information obtained through the free and reduced price meal or free milk eligibility process that is revealed or used for a purpose other than for the purpose for which the information was obtained. The term refers to access, release, or transfer of personal data about children by means of print, tape, microfilm, microfiche, electronic communication or any other means.

* * * * *

(f–1) *Medicaid* means the State medical assistance program under title XIX of the Social Security Act (42 U.S.C. 1396 *et seq.*).

* * * * *

(k) *State Children's Health Insurance Program (SCHIP)* means the State medical assistance program under title XXI of the Social Security Act (42 U.S.C. 1397aa *et seq.*).

* * * * *

3. In § 245.6, revise paragraph (a)(1) and add a new paragraph (f) to read as follows:

§ 245.6 Certification of children for free and reduced price meals and free milk.

(a) * * *

(1) ''Unless you include your child's case number for the Food Stamp Program, the Food Distribution Program on Indian Reservations (or other identifier for the Food Distribution Program on Indian Reservations) or the Temporary Assistance for Needy Families Program, you must include the social security number of the adult household member signing the application or indicate that the household member does not have a social security number. This is required by section 9 of the National School Lunch Act. The social security number is not mandatory, but the application cannot be approved if a social security number is not given or an indication is not made that the signer does not have a social security number. The social security number will be used in the administration and enforcement of the program.'' State agencies and school food authorities must ensure that the notice complies with section 7(b) of the Privacy Act of 1974 (5 U.S.C. 552a note); and

* * * * *

(f) *Disclosure of program eligibility information to State Medicaid (Medicaid) and the State Children's Health Insurance Program (SCHIP)* Program eligibility information about children eligible for free and reduced price meals may be disclosed to Medicaid and SCHIP as described in this section.

(1) *Who decides whether to disclose program eligibility information to Medicaid and/or SCHIP?* The State agency may elect to allow school food authorities to disclose children's free and reduced price meal eligibility information to Medicaid and SCHIP. School food authorities may then elect to do so. Children's program eligibility information may only be disclosed to Medicaid or SCHIP when both the State agency and the school food authority so elect, the parent/guardian does not decline to have their eligibility information disclosed as described in paragraph (f)(5), and the requirements in this paragraph (f) are met.

(2) *What information may we disclose for use by Medicaid and SCHIP?* The State agency or school food authority, as appropriate, may disclose children's names, eligibility status (whether they are eligible for free or reduced price meals or free milk), and any other eligibility information obtained through the free and reduced price meal/milk application or obtained through direct certification to persons directly connected with the administration of Medicaid or SCHIP.

(3) *Who are persons ''directly connected'' with the administration of Medicaid and SCHIP?* State employees and persons authorized under Federal and State Medicaid and SCHIP requirements to carry out initial processing of Medicaid or SCHIP applications or to make eligibility determinations are persons directly connected with the administration of Medicaid and SCHIP for purposes of disclosure of children's free and reduced price meal and free milk eligibility information.

(4) *What are the restrictions on how Medicaid and SCHIP use children's free and reduced price meal and free milk eligibility information?* Medicaid and SCHIP agencies and health insurance program operators receiving children's free and reduced price meal and free milk eligibility information may only use the information to seek to enroll children in Medicaid or SCHIP. The Medicaid and SCHIP enrollment process may include targeting and identifying children from low-income households who are potentially eligible for Medicaid or SCHIP for the purpose of seeking to enroll them in Medicaid or SCHIP.

(5) *Must we notify households of potential disclosure to Medicaid or SCHIP?* The State agency or school food authority, as appropriate, must notify parents/guardians that their children's free or reduced price meal or free milk eligibility information will be disclosed to Medicaid and/or SCHIP unless the parent/guardian elects not to have their information disclosed. Additionally, the State agency or school food authority, as appropriate, must give parents/guardians an opportunity to elect not to have their information disclosed to Medicaid or SCHIP. Only the parent or guardian who is a member of the household or family for purposes of the free and reduced price meal or free milk

application may decline the disclosure of eligibility information. The notification must inform parents/guardians that they are not required to consent to the disclosure, that the information, if disclosed, will be used to identify children eligible for and seek to enroll children in a health insurance program, and that their decision will not affect their children's eligibility for free or reduced price meals or free milk. The notification may be included in the letter/notice to parents/guardians that accompanies the free and reduced price meal or free milk application, on the application itself or in a separate notice provided to parents/guardians. The notice must give parents/guardians adequate time to respond. For children determined eligible through direct certification, the notice of potential disclosure may be included in the document informing parents/guardians of their children's eligibility for free meals or free milk through direct certification.

(6) *May social security numbers be disclosed?* The State agency or school food authority, as appropriate, may disclose social security numbers to any programs or persons authorized to receive all program eligibility information under this paragraph (f), provided parents/guardians have not declined to have their information disclosed. However, State agencies and school food authorities that plan to disclose social security numbers must give notice of the planned use of the social security numbers. This notice must be in accordance with section 7(b) of the Privacy Act of 1974 (5 U.S.C. 552a note). The application must include substantially the following language for disclosures of social security numbers to Medicaid or SCHIP: ''The social security number may also be disclosed to Medicaid and the State Children's Health Insurance Program for the purpose of identifying and seeking to enroll eligible children in one of these health insurance programs.'' This language is in addition to the notice required in paragraph (a)(1) of this section. State agencies and school food authorities are responsible for drafting the appropriate notice for disclosures of social security numbers.

(7) *Are agreements required before disclosing program eligibility information?* The State agency or school food authority, as appropriate, must have a written agreement with the State or local agency or agencies administering Medicaid or SCHIP prior to disclosing children's free and reduced price eligibility information. At a minimum, the agreement must:

(i) Identify the health insurance program or health agency receiving children's eligibility information;

(ii) Describe the information that will be disclosed;

(iii) Require that the Medicaid or SCHIP agency use the information obtained and specify that the information must only be used to seek to enroll children in Medicaid or SCHIP;

(iv) Describe how the information will be protected from unauthorized uses and disclosures;

(v) Describe the penalties for unauthorized disclosure; and

(vi) Be signed by both the Medicaid or SCHIP program or agency and the State agency or school food authority, as appropriate.

(8) *What are the penalties for unauthorized disclosure or misuse of information?* In accordance with section 9(b)(2)(C)(v) of the Richard B. Russell National School Lunch Act (42 U.S.C. 1758(b)(2)(C)(v)), any individual who publishes, divulges, discloses or makes known in any manner, or to any extent not authorized by statute or this section, any information obtained under this paragraph (f) will be fined not more than $1,000 or imprisoned for up to 1 year, or both.

(9) *What are the State agency's responsibilities regarding disclosures?* State agencies that elect to allow disclosure of children's free and reduced price meal eligibility information to Medicaid or SCHIP, as provided in this paragraph (f), must ensure that any school food authority acting in accordance with that option:

(i) Has a written agreement with the State or local agency or agencies administering health insurance programs for children under titles XIX and XXI of the Social Security Act (42 U.S.C. 1396 *et seq.* and 1397aa *et seq.*) that requires the health agencies to use children's free and reduced price meal eligibility information to seek to enroll children in those health insurance programs; and

(ii) Notifies each household of the information that will be disclosed, that the information disclosed will be used only to seek to enroll children in Medicaid or SCHIP and provides each parent/guardian with an opportunity to elect not to have the information disclosed.

Dated: January 5, 2001.

Shirley R. Watkins,

Under Secretary, Food, Nutrition and Consumer Services.

BILLING CODE 3410–30–P

DEPARTMENT OF AGRICULTURE

9 CFR Parts 331 and 381

[Docket No. 00–052F]

Termination of Designation of the State of Missouri With Respect to the Inspection of Meat and Meat Food Products and Poultry and Poultry Food Products

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Final rule and termination of designation.

SUMMARY: This final rule amends the Federal meat and poultry products inspection regulations by terminating the designation of the State of Missouri under Titles I, II, and IV of the Federal Meat Inspection Act (FMIA) and under sections 1 through 4, 6 through 11, and 12 through 22 of the Poultry Products Inspection Act (PPIA).

DATES: This final rule is effective January 1, 2001.

FOR FURTHER INFORMATION CONTACT: Dr. William F. Leese, Director, Federal-State Relations Staff, Food Safety and Inspection Service; telephone (202) 418–8900 or fax (202) 418–8834.

SUPPLEMENTARY INFORMATION:

Background

Section 301(c) of the FMIA (21 U.S.C. 661(c)) and section 5(c) of the PPIA (21 U.S.C. 454(c)) authorize the Secretary of Agriculture (Secretary) to designate a State as one in which the provisions of Titles I and IV of the FMIA and sections 1–4, 6–11, and 12–22 of the PPIA will apply to operations and transactions wholly within the State after the Secretary has determined that requirements at least ''equal to'' those imposed under the Acts have not been developed and effectively enforced by the State.

On August 18, 1972, the Secretary designated the State of Missouri under section 301(c) of the FMIA and section 5(c) of the PPIA as a State in which the Federal Government is responsible for providing meat and poultry inspection at eligible establishments and for otherwise enforcing the applicable provisions of the FMIA and the PPIA with regard to intrastate activities in the State.

In addition, on January 31, 1975, the Federal Government assumed the responsibility of administering the authorities provided for under sections 202 and 203 of the FMIA (21 U.S.C. 642 and 643) and sections 11(b) and (c) of the PPIA (21 U.S.C. 460(b) and (c)) regarding certain classes of operators of meat and poultry products in Missouri.

These designations were undertaken by the Secretary when he determined that the State of Missouri was not in a position to enforce requirements that are at least ''equal to'' the requirements of FMIA and PPIA enforced by the Federal Government.

The Director of Agriculture of the State of Missouri has advised FSIS that on January 1, 2001, the State of Missouri will be in a position to administer a State meat and poultry products inspection program that includes requirements at least ''equal to'' those imposed under the Federal meat and poultry products inspection program.

Section 301(c) of the FMIA and section 5(c) of the PPIA provide that whenever the Secretary of Agriculture determines that any designated State has developed and will enforce State meat and poultry products inspection requirements at least ''equal to'' those imposed by the Federal Government under the FMIA and the PPIA with regard to intrastate operations and transactions, the Secretary will terminate the designation of such State. The Secretary has determined that the State of Missouri has developed, and will enforce, such a State meat and poultry products inspection program in accordance with the applicable provisions of the FMIA and the PPIA.

Since it does not appear that public participation in this matter would make additional relevant information available to the Secretary under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that such procedure is impracticable and unnecessary.

Executive Order 12866

This final rule is issued in conformance with Executive Order 12886 and has been determined not to be a major rule. It will not result in an annual effect on the economy of $100 million or more and will not adversely affect the economy or any segment of the economy. Because this final rule is not a significant rule under Executive Order 12866, it has not undergone review by the Office of Management and Budget.

Effect on Small Entities

The FSIS Administrator has determined that this action will not have a significant economic impact on a substantial number of small entities, as defined by the Regulatory Flexibility Act (Pub. L. 96–354; 6 U.S.C. 601). As stated above, the State of Missouri is assuming a responsibility, previously limited to the Federal Government, of administering the meat and poultry products inspection program for intrastate operations and transactions.

Additional Public Notification

FSIS has considered the potential civil rights impact of this final rule on minorities, women, and persons with disabilities. Public involvement in all segments of rulemaking and policy development is important. Consequently, in an effort to better ensure that minorities, women, and persons with disabilities are aware of this rulemaking, FSIS will announce it and provide copies of this **Federal Register** publication in the FSIS Constituent Update.

FSIS provides a weekly Constituent Update, which is communicated via fax to more than 300 organizations and individuals. In addition, the update is available on-line through the FSIS web page located at *http://fsis.usda.gov.* The update is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, recalls, and any other types of information that could affect or be of interest to our constituents and shareholders. The constituent fax list consists of industry, trade, and farm groups, consumer interest groups, allied health professionals, and other persons who have requested to be included. Through these various channels, FSIS is able to provide information to a much broader and diverse audience. For more information and to be added to the constituent fax list, fax your request to (202) 720–5704.

BILLING CODE 1410–DM–P

DEPARTMENT OF ENERGY

Office of Energy Efficiency and Renewable Energy

10 CFR Part 490

RIN 1904–AB–00

Alternative Fuel Transportation Program; Biodiesel Fuel Use Credit

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy (DOE).

ACTION: Final rule.

SUMMARY: The Department of Energy (DOE) adopts with changes an interim final rule published on May 19, 1999, to implement the Energy Conservation Reauthorization Act of 1998 (ECRA). This Act amended title III of the Energy Policy Act of 1992 (EPACT). ECRA allows fleets that are required to purchase alternative fueled vehicles under titles III and V of EPACT to meet these requirements, in part, through the use of biodiesel fuel use credits. The rule establishes procedures for fleets and covered persons to request credits for specified biodiesel fuel use and implements ECRA's credit eligibility and allocation provisions. The biodiesel fuel use credit gives fleets and covered persons, who are otherwise required under EPACT to purchase an alternative fueled vehicle, the option of purchasing and using 450 gallons of biodiesel in vehicles in excess of 8,500 pounds gross vehicle weight instead of acquiring an alternative fueled vehicle.

DATES: This final rule is effective February 12, 2001.

FOR FURTHER INFORMATION CONTACT: David Rodgers, Office of Energy Efficiency and Renewable Energy, EE–34, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9118.

G. Review Under the Unfunded Mandates Reform Act of 1995
H. Congressional Notification

I. Introduction and Background

This notice of final rulemaking concludes a regulatory action that is mandated under section 7 of the Energy Conservation Reauthorization Act of 1998 (ECRA), Pub. L. No. 105–388. ECRA adds section 312 to title III of the Energy Policy Act of 1992 (EPACT), 42 U.S.C. 13211–13219. Section 312 allows titles III and V fleets and covered persons, that are required to acquire certain annual percentages of alternative fueled vehicles, to use biodiesel fuel use credits to meet, in part, these acquisition requirements. (Although title IV is included as one of the titles covered in ECRA, this inclusion appears to be a drafting error since title IV has no mandated acquisition requirements for fleets and covered persons.) DOE is required to allocate one credit to fleets and covered persons for using, in certain vehicles, 450 gallons (or ''qualifying volume'') of the biodiesel component of a motor fuel containing at least 20 percent biodiesel by volume.

Additionally, the vehicles in which the fuel is used must weigh more than 8,500 pounds gross vehicle weight rating. Fleets and covered persons must own or operate these vehicles and the biodiesel fuel must be used in these vehicles if the fleets and covered persons are to receive credits. Credits will be allocated only for the biodiesel fuel purchased after the enactment of ECRA, *i.e.,* November 13, 1998. The legislation prohibits the allocation of biodiesel fuel use credits for the purchase of biodiesel when the biodiesel is used in alternative fueled vehicles that are utilized to satisfy the EPACT alternative fueled vehicle purchase requirements, or when biodiesel fuel use is required by Federal or State law. With the exception of biodiesel fuel providers, allocated credits can be used to satisfy up to 50 percent of a fleet's or covered person's alternative fueled vehicles requirements. For biodiesel fuel providers, biodiesel credits can satisfy up to 100 percent of the requirements.

On May 19, 1999, DOE issued an interim final rule (64 FR 27169) that added a new subpart H to DOE's Alternative Fuel Transportation Program rules at 10 CFR part 490. The interim final rule became effective on June 18, 1999. The interim final rule established procedures for fleets that are required to purchase alternative fueled vehicles under titles III and V of EPACT to meet these requirements, in part, through the use of biodiesel fuel use credits. With changes, this final rule adopts the interim final rule.

II. Section-by-Section Discussion of Public Comment and Rule Provisions

DOE received from 10 interested organizations comments on the interim final rule. Most commenters addressed essentially the same issues.

A. Section 490.703—Biodiesel Fuel Use Credit Allocation

Five commenters all argued that there is no evidence that Congress intended to compel the use of biodiesel within the model year in which the biodiesel is purchased. It appears that the commenters wish to carry forward unused biodiesel to another model year or that they wish to sell excess purchases of biodiesel to other fleets. DOE believes that ECRA bases the allocation of biodiesel fuel use credits on biodiesel purchases. However, DOE points out that ECRA requires that the fuel must be purchased for use in the covered entities' vehicles to earn credits. Credits are earned when the fuel is purchased for use in the covered entities' vehicles, even though the fuel may be used at a later date. On this issue, DOE explained in the Preamble that ''[t]he use of biodiesel fuel credit to serve as the acquisition of one alternative fueled vehicle is restricted to the model year, or the fiscal year in the case of Federal fleets, in which the biodiesel is purchased and cannot be carried forward like alternative fueled vehicle acquisition credits generated under Subpart F.'' DOE reinforced this statement by citing language from the House of Representatives Commerce Committee Report 105–727. That report provided that credits ''may only be used by the fleet or covered person that earned the credits and only in the year that the credit is issued, so they cannot be traded or banked.'' H.R. Rep. No. 727, 105th Cong., 2d Sess., at 20 (1998). (See also the discussion under section 490.705.)

Three commenters submitted similar comments on language contained in section 490.703 (b). That paragraph prohibits the allocation of biodiesel fuel use credits if: (1) the biodiesel is used in an alternative fueled vehicle; or (2) if the biodiesel fuel use is required by Federal or State law. They argue that there are certain circumstances where a covered fleet may want to acquire an alternative fueled vehicle (AFV) as a result of a local, State or Federal incentive program or policy, unrelated to EPACT AFV purchase requirements. Allowing fleets to count biodiesel fuel used in AFVs, provided those AFVs are not used to meet EPACT AFV requirements, according to one commenter, would increase the flexibility of covered fleets to integrate biodiesel fuel into their fuel mix. This commenter recommends that DOE amend the language in section 490.703(b) in two ways. First, that DOE clarify that the prohibition against allocating a credit for biodiesel fuel use in AFVs be restricted to only AFVs used to meet EPACT AFV purchase requirements. DOE agrees with this comment and has integrated it into the final regulatory language.

Second, this commenter suggests that DOE delete the prohibition against allocating a credit where biodiesel fuel use is also used to meet other Federal or State requirements. DOE does not agree with this comment. The statutory language in ECRA states quite clearly that no credit can be allocated if the fuel is required by Federal or State law. This prohibition appears to be intended to prevent fleets from meeting both EPACT and other Federal and State requirements through the same biodiesel fuel use.

B. Section 490.704—Procedures and Documentation

Eight commenters argued that the procedures and documentation requirements of section 490.704 should include only that information that is necessary to support the verification of the biodiesel fuel purchase. They claim that asking for information on vehicle make and model, vehicle model year and vehicle identification number does not relate to fuel purchases of biodiesel and could make reporting more onerous. Providing such information would

impose an unnecessary burden on the reporting entities. DOE agrees that requesting specific vehicle data may be burdensome, and believes that asking for such data may reduce the attractiveness of the biodiesel fuel use credit option. DOE has, therefore, revised the Annual Alternative Fuel Vehicle Acquisition Report For State Government and Alternative Fuel Provider Fleets (DOE/OTT/101 form). The revised form only requests that fleets claiming the biodiesel fuel use credit submit model year specific biodiesel purchases and that such fleets maintain records of those purchases for three years. The updated form is posted on the DOE's Office of Transportation Technologies website at *http://www.ott.doe.gov/credits.* It can also be obtained by calling the National Alternative Fuels Hotline at 1–800–423–1DOE.

C. Section 490.705—Use of Credits

Most commenters argued that the language in Sections 705(a) and (b) is too narrow in limiting the biodiesel fuel use credit to fleets covered by section 490.201, section 490.302, section 490.307 and title III of EPACT. A consequence of narrowing the language, according to these commenters, is that the biodiesel fuel use credit regulation may not apply to certain private and municipal fleets if DOE adds these fleets to the Alternative Fuel Transportation Program. These commenters recommend expanding the regulatory language so that it applies to fleets or covered persons identified in EPACT titles III and V, rather than the specific sections in the regulation. DOE believes that the current regulatory language is appropriate. Specifically, DOE noted in the Preamble that these fleets would be covered if DOE decides to include them under this subpart in the Alternative Fuel Transportation Program. Section 490.701 also acknowledges that Title V fleets are covered under this subpart. However, DOE recognizes that the rule language could have been clearer. Therefore the language in sections 705(a) and 705(b) has been amended to include references only to EPACT titles III and V.

Seven commenters argued that section 490.705(a) should not restrict the allocation of a biodiesel fuel use credit to the model year in which it is generated. They also contended that fleets should be able to trade excess credits to other covered fleets or bank excess credits for future model years. One commenter asserts that this limitation will prevent over compliance and reduce the likelihood of achieving higher volumes and economies of scale in biodiesel production. Six commenters meanwhile, claim that DOE's reliance on the House of Representatives Commerce Committee Report 105–727 for this restriction is misplaced. They contend that this is not the intent of Congress, and that the restriction would have an adverse impact on the production, sale and use of biodiesel.

Although DOE respects the commenters' views, DOE has not revised section 490.705. We believe that both the statutory language and the House of Representatives Commerce Committee Report support the restriction. Section 312(b)(1) of EPACT, as amended by ECRA, declares that a credit is to be allocated in the year in which the purchase of a qualifying volume of biodiesel is made. Furthermore, section 312(c) states that a credit under this section shall not be considered a credit as defined by section 508 of EPACT. DOE believes that this statutory view is supported by the House of Representatives Commerce Committee Report 105–727. It stated that biodiesel fuel use credits ''may only be used by the fleet or covered person that earned the credits and only in the year the credit is issued, so they cannot be traded or banked.'' [1] For these reasons, the rule cannot allow trading or banking of biodiesel fuel use credits. To avoid future questions on this issue, DOE has added to this section a new paragraph (d). Paragraph (d) specifically speaks to this prohibition.

D. Section 490.707—Increasing the Qualifying Volume of the Biodiesel Component

One commenter suggested that DOE annually publish in the **Federal Register** the ''qualifying volume,'' which is the amount of biodiesel purchases required to be allocated one biodiesel fuel use credit. As reflected in section 490.707, section 312(d) gives DOE authority, via rulemaking, to increase the qualifying volume. Since the qualifying volume is set at 450 gallons and cannot be changed except via a rulemaking process, DOE sees no reason to annually publish the qualifying volume in the **Federal Register**. Thus, DOE has not revised this section. Interested parties can be assured that the qualifying volume will stay at 450 gallons, unless DOE commences a rulemaking to increase it. If this happens, DOE will notify the public via a **Federal Register** notice. DOE will provide ample time and opportunity for the public to submit comments.

[1] H.R. Rep. No. 727, 105th Cong., 2d Sess. at 20 (1998).

III. Regulatory and Procedural Requirements

A. Review Under Executive Order 12866

Today's regulatory action has been determined not to be a ''significant regulatory action'' under Executive Order 12866, ''Regulatory Planning and Review,'' 58 FR 51735 (October 4, 1993). Accordingly, this rulemaking has not been reviewed by the Office of Information and Regulatory Affairs of the Office of Management and Budget.

B. Review Under Executive Order 13132

Executive Order 13132 (64 FR 43255, August 10, 1999) requires agencies to develop an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have ''federalism implications.'' Policies that have federalism implications are defined in the Executive Order to include regulations that have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.'' On March 14, 2000, DOE published a statement of policy describing the intergovernmental consultation process it will follow in the development of such regulations (65 FR 13735). DOE has examined today's rule and determined that it does not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. No further action is required by the Executive Order.

C. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, requires preparation of an initial regulatory flexibility analysis for every rule for which the law requires publication of a general notice of proposed rulemaking unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. The Regulatory Flexibility Act's requirements do not apply to this final rule because a general notice of proposed rulemaking was not required by law. Accordingly, DOE did not prepare a regulatory flexibility analysis for this rule.

D. Review Under the National Environmental Policy Act

The Department has determined that this rule is covered by categorical

exclusion in paragraph A5 to subpart D, 10 CFR part 1021. Accordingly, neither an environmental assessment nor an environmental impact statement is required.

E. Review Under the Paperwork Reduction Act

This final rule contains a collection of information that the Office of Management and Budget (OMB) reviews under the Paperwork Reduction Act of 1995. The Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chapter 35) requires agencies to submit information collection requests for OMB review and approval. Accordingly, DOE submitted to OMB the interim final rule. DOE sought public comments on: (1) Whether the proposed collection of information is necessary, (2) the accuracy of DOE's estimate of the burden of the proposed information collection, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) ways to minimize the burden of the collection of information on those who choose to respond.

As mentioned in this rule's Preamble, several entities submitted comments recommending that DOE only require information that is necessary to verify the biodiesel fuel purchase. In particular, they contended that DOE should not require information on vehicle make and model, vehicle model year and vehicle identification number. They opined that this information does not relate to fuel purchases of biodiesel and would impose an unnecessary burden on the reporting entities. DOE incorporated these recommendations into its information collection request to OMB.

On October 25, 1999, DOE issued a **Federal Register** notice (64 FR 57445) that announced that DOE had submitted to OMB a proposed information collection request for the collection of biodiesel purchase data from fleets participating in DOE's Alternative Fuel Transportation Program. No additional comments were received in response to the October 25, 1999, **Federal Register** notice. During the OMB review period, DOE issued interim reporting guidance and placed that guidance on DOE's Office of Transportation Technologies website at *http://www.ott.doe.gov/credits.*

On February 2, 2000, OMB approved the biodiesel data collection and revised the Annual Alternative Fuel Vehicle Acquisition Report For State Government and Alternative Fuel Provider Fleets (DOE/OTT/101 form, approved under OMB Control No. 1910–5101). Fleets claiming the biodiesel fuel use credit must submit to DOE model year specific biodiesel purchases and maintain records of those purchases for three years. The updated form is posted on the DOE's Office of Transportation Technologies website at *http://www.ott.doe.gov/credits* or can be obtained by calling the National Alternative Fuels Hotline at 1–800–423–1DOE.

F. Review Under Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of Executive Order 12988, ''Civil Justice Reform,'' 61 FR 4729 (February 7, 1996) imposes on executive agencies the general duty to adhere to the following requirements: (1) Eliminate drafting errors and ambiguity; (2) write regulations to minimize litigation; and (3) provide a clear legal standard for affected conduct rather than a general standard and promote simplification and burden reduction. Section 3(b) of Executive Order 12988 specifically requires that executive agencies make every reasonable effort to ensure that the regulation: (1) Clearly specifies the preemptive effect, if any; (2) clearly specifies any effect on existing Federal law or regulation; (3) provides a clear legal standard for affected conduct, while promoting simplification and burden reduction; (4) specifies the retroactive effect, if any; (5) adequately defines key terms; and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General. Section 3(c) of Executive Order 12988 requires executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. DOE has completed the required review and determined that, to the extent permitted by law, this final rule meets the relevant standards of Executive Order 12988.

G. Review Under the Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) requires each Federal agency to prepare a written assessment of the effects of any Federal mandate in a proposed or final agency rule that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million in any one year. The Act also requires a Federal agency to develop an effective process to permit timely input by elected officers of State, local, and tribal governments on a proposed ''significant intergovernmental mandate.'' Additionally, it requires an agency plan for giving notice and opportunity for timely input to potentially affected small governments before establishing any requirements that might significantly or uniquely affect small governments. The final rule published today does not contain any Federal mandate, so these requirements do not apply.

H. Congressional Notification

As required by 5 U.S.C. 801, DOE will report to Congress the promulgation of this rule prior to its effective date. The report will state that it has been determined that the rule is not a ''major rule'' as defined by 5 U.S.C. 801(2).

List of Subjects in 10 CFR Part 490

Administrative practice and procedure, Energy conservation, Fuel, Motor vehicles.

Issued in Washington, DC, on January 4, 2001.

Dan W. Reicher,

Assistant Secretary, Energy Efficiency and Renewable Energy.

Accordingly, the interim final rule amending part 490 of title 10, chapter II, subchapter D of the Code of Federal Regulations, which was published at 64 FR 27169 on May 19, 1999, is adopted as a final rule with the following changes:

PART 490—ALTERNATIVE FUEL TRANSPORTATION PROGRAM

1. The authority citation for part 490 is revised to read as follows:

Authority: 42 USC. 7191, 13211–13212, 13220, 13235, 13251, 13257, 13260–13263.

2. Amend § 490.703 by revising paragraph (b) to read as follows:

§ 490.703 Biodiesel fuel use credit allocation.

* * * * *

(b) No credit shall be allocated under this subpart for a purchase of the biodiesel component of a fuel if the fuel is:

(1) For use in alternative fueled vehicles which have been used to satisfy the alternative fueled vehicle acquisition requirements under Titles III and V of the Energy Policy Act of 1992; or

(2) Required by Federal or State law.

3. Amend § 490.705 by revising paragraphs (a) and (b) and adding paragraph (d) to read as follows:

§ 490.705 Use of Credits.

(a) At the request of a fleet or covered person allocated a credit under this subpart, DOE shall, for the model year

in which the purchase of a qualifying volume is made, treat that purchase as the acquisition of one alternative fueled vehicle the fleet or covered person is required to acquire under titles III and V of the Energy Policy Act of 1992.

(b) Except as provided in paragraph (c) of this section, credits allocated under this subpart may not be used to satisfy more than 50 percent of the alternative fueled vehicle requirements of a fleet or covered person under titles III and V of the Energy Policy Act of 1992.

* * * * *

(d) A fleet or covered person may not trade or bank biodiesel fuel credits.

[FR Doc. 01–744 Filed 1–10–01; 8:45 am]

BILLING CODE 6450–01–P

FEDERAL RESERVE SYSTEM

12 CFR Part 201

[Regulation A]

Extensions of Credit by Federal Reserve Banks; Change in Discount Rate

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board of Governors has amended its Regulation A on Extensions of Credit by Federal Reserve Banks to reflect its approval of a decrease in the basic discount rate at each Federal Reserve Bank. The Board acted on requests submitted by the Boards of Directors of the twelve Federal Reserve Banks.

DATES: The amendments to part 201 (Regulation A) were effective January 4, 2001. The rate changes for adjustment credit were effective on the dates specified in 12 CFR 201.51.

FOR FURTHER INFORMATION CONTACT: Jennifer J. Johnson, Secretary of the Board, at (202) 452–3259; for users of Telecommunications Device for the Deaf (TDD), contact Janice Simms, at (202) 872–4984, Board of Governors of the Federal Reserve System, 20th and C Streets NW., Washington, DC 20551.

SUPPLEMENTARY INFORMATION: Pursuant to the authority of sections 10(b), 13, 14, 19, *et al.,* of the Federal Reserve Act, the Board has amended its Regulation A (12 CFR part 201) to incorporate changes in discount rates on Federal Reserve Bank extensions of credit. The discount rates are the interest rates charged to depository institutions when they borrow from their district Reserve Banks.

The ''basic discount rate'' is a fixed rate charged by Reserve Banks for adjustment credit and, at the Reserve Banks' discretion, for extended credit for up to 30 days. In decreasing the basic discount rate from 6.0 percent to 5.5 percent, the Board acted on requests submitted by the Boards of Directors of the twelve Federal Reserve Banks. The new rate of 5.5 percent was effective for all twelve Reserve Banks on the dates specified below. (Seven of the twelve Reserve Banks reduced the basic discount rate in two steps, from 6.0 percent to 5.75 percent, then from 5.75 percent to 5.5 percent, as specified in the footnote to § 201.51 of revised Regulation A.) The 50-basis-point decrease in the discount rate was associated with a 50-basis-point decrease in the federal funds rate approved by the Federal Open Market Committee.

These actions were taken in light of further weakening of sales and production, and in the context of lower consumer confidence, tight conditions in some segments of financial markets, and high energy prices sapping household and business purchasing power. Moreover, inflation pressures remain contained. Nonetheless, to date there is little evidence to suggest that longer-term advances in technology and associated gains in productivity are abating.

Regulatory Flexibility Act Certification

Pursuant to section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), the Board certifies that the change in the basic discount rate will not have a significant adverse economic impact on a substantial number of small entities. The rule does not impose any additional requirements on entities affected by the regulation.

Administrative Procedure Act

The provisions of 5 U.S.C. 553(b) relating to notice and public participation were not followed in connection with the adoption of the amendment because the Board for good cause finds that delaying the change in the basic discount rate in order to allow notice and public comment on the change is impracticable, unnecessary, and contrary to the public interest in fostering price stability and sustainable economic growth.

The provisions of 5 U.S.C. 553(d) that prescribe 30 days prior notice of the effective date of a rule have not been followed because section 553(d) provides that such prior notice is not necessary whenever there is good cause for finding that such notice is contrary to the public interest. As previously stated, the Board determined that delaying the changes in the basic discount rate is contrary to the public interest.

List of Subjects in 12 CFR Part 201

Banks, banking, Credit, Federal Reserve System.

For the reasons set out in the preamble, 12 CFR part 201 is amended as set forth below:

PART 201—EXTENSIONS OF CREDIT BY FEDERAL RESERVE BANKS (REGULATION A)

1. The authority citation for 12 CFR part 201 continues to read as follows:

Authority: 12 U.S.C. 343 *et seq.*, 347a, 347b, 347c, 347d, 348 *et seq.*, 357, 374, 374a and 461.

2. Section 201.51 is revised to read as follows:

§ 201.51 Adjustment credit for depository institutions.

The rates for adjustment credit provided to depository institutions under § 201.3(a) are:

Federal Reserve Bank	Rate	Effective [1]
Boston	5.5	January 4, 2001
New York	5.5	January 4, 2001
Philadelphia	5.5	January 4, 2001
Cleveland	5.5	January 4, 2001
Richmond	5.5	January 4, 2001
Atlanta	5.5	January 4, 2001
Chicago	5.5	January 4, 2001
St. Louis	5.5	January 5, 2001
Minneapolis	5.5	January 4, 2001
Kansas City	5.5	January 4, 2001
Dallas	5.5	January 4, 2001
San Francisco	5.5	January 4, 2001

[1] On January 3, 2001, the rate for adjustment credit was 5.75 percent for the following Federal Reserve Banks: New York, Cleveland, Atlanta, Kansas City, Dallas, and San Francisco. On January 4, the rate for adjustment credit was 5.75 percent for the Federal Reserve Bank of St. Louis.

By order of the Board of Governors of the Federal Reserve System, January 5, 2001.

Robert deV. Frierson,

Associate Secretary of the Board.

[FR Doc. 01–784 Filed 1–10–01; 8:45 am]

BILLING CODE 6210–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2000–CE–82–AD; Amendment 39–12069; AD 2000–26–19]

RIN 2120–AA64

Airworthiness Directives; SOCATA—Groupe AEROSPATIALE Model TBM 700 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that applies to certain SOCATA—Groupe AEROSPATIALE (Socata) Model TBM 700 airplanes. This AD requires you to inspect for a low point in the fuel tank air vent valve hose; and reroute the hose as necessary. This AD is the result of mandatory continuing airworthiness information (MCAI) issued by the airworthiness authority for France. The actions specified by this AD are intended to prevent in-flight damage to the wing skins caused by abnormal venting conditions of the wing fuel tank, which could result in severe handling problems or reduced structural capability. Continued operation with such structural deformation or handling problems could result in loss of control of the airplane.

DATES: This AD becomes effective on February 2, 2001.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in the regulation as of February 2, 2001.

The Federal Aviation Administration (FAA) must receive any comments on this rule by February 15, 2001.

ADDRESSES: Send three copies of comments to FAA, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 2000–CE–82–AD, 901 Locust, Room 506, Kansas City, Missouri 64106.

You may get service information referenced in this AD from SOCATA Groupe AEROSPATIALE, Customer Support, Aerodrome Tarbes-Ossun-Lourdes, BP 930—F65009 Tarbes Cedex, France; telephone: (33) (0)5.62.41.73.00; facsimile: (33) (0)5.62.41.76.54; or the Product Support Manager, SOCATA—Groupe AEROSPATIALE, North Perry Airport, 7501 Pembroke Road, Pembroke Pines, Florida 33023; telephone: (954) 894–1160; facsimile: (954) 964–4191. You may read this information at FAA, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 2000–CE–821–AD, 901 Locust, Room 506, Kansas City, Missouri 64106; or at the Office of the Federal Register, 800 North Capitol Street, NW, suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Karl Schletzbaum, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4146; facsimile: (816) 329–4090.

SUPPLEMENTARY INFORMATION:

Discussion

What events have caused this AD? The Direction Geenerale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, recently notified FAA that an unsafe condition may exist on certain Socata Model TBM 700 airplanes. The DGAC reports two occurrences on Socata Model TBM 700 airplanes of abnormal venting conditions of the wing fuel tank.

One occurrence was where an airplane experienced leaking during refueling. Inspection revealed the wing skin had come apart from the rib breaking the sealer, allowing the fuel to leak.

Another reported occurrence was in-flight where the pilot saw a wing skin deformation. These occurrences are caused by low pressure resulting from a misrouted fuel tank air vent valve hose and the fuel tank vent not operating.

What are the consequences if the condition is not corrected? This condition, if not corrected, could result in severe handling problems or reduced structural capability. Continued operation with such structural deformation or handling problems could result in loss of control of the airplane.

Is there service information that applies to this subject? Socata has issued Service Bulletin SB 70–088, dated November 2000. This service bulletin includes procedures for:

—Inspecting for a low point in the fuel tank air vent valve hose; and
—Rerouting the hose as necessary.

What action did DGAC take? The DGAC classified this service bulletin as mandatory and issued French AD T2000–545(A), dated December 20, 2000, to ensure the continued airworthiness of these airplanes in France.

Was this in accordance with the bilateral airworthiness agreement? These airplane models are manufactured in France and are type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement.

In carrying out this bilateral airworthiness agreement, the DGAC has kept FAA informed of the situation described above.

The FAA's Determination and an Explanation of the Provisions of the AD

What has FAA decided? The FAA has examined the findings of the DGAC; reviewed all available information, including the service information referenced above; and determined that:

—The unsafe condition referenced in this document exists or could develop on other Socata Model TBM 700 airplanes of the same type design;
—The actions specified in the previously-referenced service information (as specified in this AD) should be accomplished on the affected airplanes; and
—AD action should be taken in order to correct this unsafe condition.

What does this AD require? This AD requires you to do the actions previously specified in accordance with Socata Service Bulletin SB 70–088, dated November 2000.

Will I have the opportunity to comment prior to the issuance of the rule? Because the unsafe condition described in this document could result in structural failure with possible loss of control of the airplane, FAA finds that notice and opportunity for public prior comment are impracticable. Therefore, good cause exists for making this amendment effective in less than 30 days.

Comments Invited

How do I comment on this AD? Although this action is in the form of a final rule and was not preceded by notice and opportunity for public comment, we invite your comments on the rule. You may send whatever written data, views, or arguments you choose. You need to include the rule's docket number and send three copies of your comments to the address specified under the caption **ADDRESSES**. We will consider all comments received by the closing date specified above. We may change this rule in light of comments received. Factual information that supports your ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether we need to take additional rulemaking action.

Are there any specific portions of the AD I should pay attention to? The FAA specifically invites comments on the overall regulatory, economic, environmental, and energy aspects of

the rule that might require a change to the rule. You may look at all comments we receive. We will file a report in the Rules Docket that summarizes each FAA contact with the public that concerns the substantive parts of this proposal.

We are reviewing the writing style we currently use in regulatory documents, in response to the Presidential memorandum of June 1, 1998. That memorandum requires federal agencies to communicate more clearly with the public. We are interested in your comments on whether the style of this document is clear, and any other suggestions you might have to improve the clarity of FAA communications that affect you. You can get more information about the Presidential memorandum and the plain language initiative at *http://www.plainlanguage.gov.*

How can I be sure FAA receives my comment? If you want us to acknowledge the receipt of your comments, you must include a self-addressed, stamped postcard. On the postcard, write ''Comments to Docket No. 2000–CE–82–AD.'' We will date stamp and mail the postcard back to you.

Regulatory Impact

Does this AD impact various entities? These regulations will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, FAA has determined that this final rule does not have federalism implications under Executive Order 13132.

Does this AD involve a significant rule or regulatory action? The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and is not a significant regulatory action under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket (otherwise, an evaluation is not required). A copy of it, if filed, may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by Reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. FAA amends § 39.13 by adding a new airworthiness directive (AD) to read as follows:

2000–26–19 SOCATA—Groupe Aerospatiale: Amendment 39–12069; Docket No. 2000–CE–82–AD.

(a) *What airplanes are affected by this AD?* This AD affects Model TBM 700 airplanes, serial numbers 1 through 182, that are certificated in any category.

(b) *Who must comply with this AD?* Anyone who wishes to operate any of the above airplanes must comply with this AD.

(c) *What problem does this AD address?* The actions specified by this AD are intended to prevent in-flight damage to the wing skins caused by abnormal venting conditions of the wing fuel tank, which could result in severe handling problems or reduced structural capability. Continued operation with such structural deformation could result in loss of control of the airplane.

(d) *What must I do to address this problem?* To address this problem, unless already done, you must do the following actions:

Action	Compliance time	Procedures
(1) Inspect for a low point in the fuel tank air vent valve hose.	Within the next 5 hours time-in-service (TIS) after February 2, 2001 (the effective date of this AD).	Do this action following the ACCOMPLISHMENT INSTRUCTIONS paragraph in Socata Service Bulletin SB 70–088, dated November 2000, and the applicable maintenance manual.
(2) If there is a low point in the fuel tank air vent valve hose, reroute the hose.	Before further flight after the inspection	Do this action following the ACCOMPLISHMENT INSTRUCTIONS paragraph in Socata Service Bulletin SB 70–088, dated November 2000, and the applicable maintenance manual.

(e) *Can I comply with this AD in any other way?* You may use an alternative method of compliance or adjust the compliance time if:

(1) Your alternative method of compliance provides an equivalent level of safety; and

(2) The Manager, Small Airplane Directorate, approves your alternative. Send your request through an FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Small Airplane Directorate.

Note 1: This AD applies to each airplane identified in paragraph (a) of this AD, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if you have not eliminated the unsafe condition, specific actions you propose to address it.

(f) *Where can I get information about any already-approved alternative methods of compliance?* Contact Karl Schletzbaum, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4146; facsimile: (816) 329–4090.

(g) *What if I need to fly the airplane to another location to comply with this AD?* The FAA can issue a special flight permit under sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate your airplane to a location where you can accomplish the requirements of this AD.

(h) *Are any service bulletins incorporated into this AD by reference?* Actions required by this AD must be done following Socata Service Bulletin 70–088, dated November 2000. The Director of the Federal Register approved this incorporation by reference under 5 U.S.C. 552(a) and 1 CFR part 51. You can get copies from SOCATA Groupe AEROSPATIALE, Customer Support, Aerodrome Tarbes-Ossun-Lourdes, BP 930–F65009 Tarbes Cedex, France; or the Product Support Manager, SOCATA—Groupe AEROSPATIALE, North Perry Airport, 7501 Pembroke Road, Pembroke Pines, Florida 33023. You can look at copies at FAA, Central Region, Office of the Regional

Counsel, 901 Locust, Room 506, Kansas City, Missouri, or at the Office of the Federal Register, 800 North Capitol Street, NW, suite 700, Washington, DC .

(i) *When does this amendment become effective?* This amendment becomes effective on February 2, 2001.

Note 2: The subject of this AD is addressed in French AD T2000–545(A), dated December 20, 2000.

Issued in Kansas City, Missouri, on December 29, 2000.

David R. Showers,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 00–ACE–28]

Amendment to Class E Airspace; Pittsburg, KS

AGENCY: Federal Aviation Administration, DOT.

ACTION: Direct final rule; confirmation of effective date.

SUMMARY: This document confirms the effective date of a direct final rule which revises Class E airspace at Pittsburg, KS.

EFFECTIVE DATE: 0901 UTC, March 22, 2001.

FOR FURTHER INFORMATION CONTACT: Kathy Randolph, Air Traffic Division, Airspace Branch, ACE–520C, DOT Regional Headquarters Building, Federal Aviation Administration, 901 Locust, Kansas City, MO 64106; telephone: (816) 329–2525.

SUPPLEMENTARY INFORMATION: The FAA published this direct final rule with a request for comments in the **Federal Register** on October 24, 2000 (65 FR 63544). The FAA uses the direct final rulemaking procedure for a non-controversial rule where the FAA believes that there will be no adverse public comment. This direct final rule advised the public that no adverse comments were anticipated, and that unless a written adverse comment, or a written notice of intent to submit such an adverse comment, were received within the comment period, the regulation would become effective on march 22, 2001. No adverse comments were received, and thus this notice confirms that this direct final rule will become effective on that date.

Issued in Kansas City, MO on December 15, 2000.

Herman J. Lyons, Jr.,

Manager, Air Traffic Division, Central Region.

BILLING CODE 4910–13–M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR PART 1306

[DEA–190F]

RIN 1117–AA54

Facsimile Transmission of Prescriptions for Patients Enrolled in Hospice Programs

AGENCY: Drug Enforcement Administration (DEA), Justice.

ACTION: Final rule.

SUMMARY: DEA is finalizing, without change, the interim rule with request for comment published in the **Federal Register** on July 25, 2000 (65 FR 45712). The interim rule amended Title 21, Code of Federal Regulations (CFR) 1306.11(g) to clearly articulate that prescriptions for Schedule II narcotic substances for patients enrolled in hospice care certified by Medicare under Title XVIII or licensed by the state may be transmitted by facsimile. No comments to the interim rule were received. This final rule makes the clarification permanent.

EFFECTIVE DATE: February 12, 2001.

FOR FURTHER INFORMATION CONTACT: Patricia M. Good, Chief, Liaison and Policy Section, Office of Diversion Control, Drug Enforcement Administration, Washington, DC 20537, telephone (202) 307–7297.

SUPPLEMENTARY INFORMATION:

What Does This Final Rule Accomplish?

On July 25, 2000 DEA published an interim rule with request for comment (65 FR 45712) amending 21 CFR 1306.11(g) to clearly articulate that prescriptions for Schedule II narcotic substances for patients enrolled in hospice care certified by Medicare under Title XVIII or licensed by the state, regardless of whether the patient resides in a hospice facility or other care setting, may be transmitted by facsimile. This final rule makes the clarification permanent.

Why Was Clarification of the Regulation Necessary?

Section 1306.11(g) of the regulations originally provided that a pharmacy could dispense a Schedule II narcotic substance pursuant to a prescription transmitted to the pharmacy via facsimile for a patient residing in a hospice certified by Medicare under Title XVIII or licensed by the state. The use of the language ''residing in a hospice certified by Medicare under Title XVIII or licensed by the state'' was perceived by the regulated industry as requiring that the patient reside in a hospice facility to the exclusion of other care settings, such as home hospice care. DEA regulations were meant to cover all patients enrolled in hospice programs certified by Medicare under Title XVIII or licensed by the state, regardless of where the patient resides.

The interim rule amended Section 1306.11(g) to refer to ''* * * a patient enrolled in a hospice care program certified and/or paid for by Medicare under Title XVIII or a hospice program which is licensed by the state'' to clarify that prescriptions for Schedule II narcotic substances for patients enrolled in recognized hospice programs, regardless of where the patients reside, may be transmitted via facsimile.

What Comments Were Received Regarding the Interim Rule?

No comments were submitted regarding this interim rulemaking. Accordingly, the interim rule amending 21 CFR part 1306, which was published in the **Federal Register** on July 25, 2000, at 65 FR 45712 is adopted as a final rule.

Regulatory Certifications

Regulatory Flexibility Act

The Deputy Assistant Administrator hereby certifies that this rulemaking has been drafted in a manner consistent with the principles of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). It will not have a significant economic impact on a substantial number of small business entities. This rulemaking clarifies the regulations regarding the facsimile transmission of prescriptions for Schedule II narcotic substances for patients enrolled in hospice programs.

Executive Order 12866

The Deputy Assistant Administrator further certifies that this rulemaking has been drafted in accordance with the principles in Executive Order 12866, Section 1(b). DEA has determined that this is not a significant rulemaking action. This rulemaking clarifies the regulations regarding the facsimile transmission of prescriptions for Schedule II narcotic substances for patients enrolled in hospice programs. Therefore, this action has not been

reviewed by the Office of Management and Budget.

Executive Order 12988

This regulation meets the applicable standards set forth in Sections 3(a) and 3(b)(2) of Executive Order 12988 Civil Justice Reform.

Executive Order 13132

This rulemaking does not preempt or modify any provision of state law; nor does it impose enforcement responsibilities on any state; nor does it diminish the power of any state to enforce its own laws. Accordingly, this rulemaking does not have federalism implications warranting the application of Executive Order 13132.

Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by state, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more in any one year, and will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by section 804 of the Small Business Regulatory Enforcement Fairness Act of 1996. This rule will not result in an annual effect on the economy of $100,000,000 or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign-based companies in domestic and export markets.

Plain Language Instructions

The Drug Enforcement Administration makes every effort to write clearly. If you have suggestions as to how to improve the clarity of this regulation, call or write Patricia M. Good, Chief, Liaison and Policy Section, Office of Diversion Control, Drug Enforcement Administration, Washington, DC 20537, telephone (202) 307–7297.

The interim rule amending 21 CFR part 1306, which was published in the **Federal Register** on July 25, 2000, at 65 FR 45712, is adopted as a final rule without change.

Dated: December 28, 2000.

John H. King,

Deputy Assistant Administrator, Office of Diversion Control.

[FR Doc. 01–545 Filed 1–10–01; 8:45 am]

BILLING CODE 4410–09–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[TD 8927]

RIN 1545–AW34

Conversion to the Euro

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations and removal of temporary regulations.

SUMMARY: This document contains final Income Tax Regulations relating to U.S. taxpayers operating, investing, or otherwise conducting business in the currencies of certain European countries that replace their national currencies with a single, multinational currency called the euro. These regulations provide rules relating to adjustments required for qualified business units operating in such currencies and rules relating to the tax effect of holding such currencies, or financial instruments or contracts denominated in such currencies.

DATES: *Effective Date:* These regulations are effective January 11, 2001.

Applicability Date: These regulations are applicable for tax years ending after July 29, 1998.

FOR FURTHER INFORMATION CONTACT: John W. Rogers III of the Office of Associate Chief Counsel (International), (202) 622–3870, regarding the change in functional currency rules and Thomas Preston of the Office of Assistant Chief Counsel (Financial Institutions and Products), (202) 622–3930, regarding section 1001 (not toll free calls).

SUPPLEMENTARY INFORMATION:

Background

On March 9, 1998, the IRS issued Announcement 98–18 (1998–9 IRB 44) requesting comments relating to the tax issues for U.S. taxpayers operating, investing, or otherwise conducting business in a currency that is converting to the euro. Numerous comments were received. After consideration of the comments, and in order to provide immediate guidance, the Treasury and the IRS published in the **Federal Register** temporary regulations (63 FR 40366) and a notice of proposed rulemaking by cross-reference to the temporary regulations (63 FR 40383) on July 29, 1998. No public hearing was held in conjunction with the notice of proposed rulemaking because no taxpayers requested to speak at the hearing.

In the notice of proposed rulemaking, the Treasury and The IRS requested comments with respect to certain additional issues. Two comments were received in connection with the request for comments and are discussed in greater detail below.

Explanation of Provisions and Discussion of Comments

The temporary regulations provide rules relating to U.S. taxpayers operating, investing, or otherwise conducting business in the currencies of countries that replace their national currencies (legacy currencies) with a single, multinational currency called the euro. Thus, a legacy currency would include former currencies of the eleven countries that adopted the euro in 1999 as well as the currency of a country after it adopts the euro at some later date. The temporary regulations generally provide guidance relating to the circumstances under which the euro conversion creates a realization event with respect to instruments and contracts denominated in a legacy currency, and the circumstances under which the euro conversion constitutes a change in functional currency for a qualified business unit (QBU or QBUs, as the case may be) whose functional currency is a legacy currency, and certain consequences thereof. The temporary regulations published in the **Federal Register** on July 29, 1998, are finalized substantially as proposed. See the preamble to the temporary regulations for an explanation of the provisions of those regulations.

As noted above, two comments were received in connection with the publication of the temporary regulations and the notice of proposed rulemaking. One comment addressed the effect of the euro conversion to a corporation that has significant numbers of legacy currency transactions but has a non-legacy currency as its functional currency. For example, a corporation may have a non-legacy currency as its functional currency because its economic environment reflected more significant activities denominated in such currency (*e.g.,* the U.S. dollar or the Swiss franc) relative to any single legacy currency. However, given the aggregation of the individual legacy currencies into the euro, the currency of the corporation's economic environment

in which a significant part of its activities are conducted is the euro. The commenter suggested that, in such circumstances, the corporation should be allowed to change its functional currency to the euro automatically.

In response to the comment, the regulation provides a new rule in which a QBU that uses a non-legacy currency as its functional currency may change its functional currency to the euro provided that the euro is a currency of the economic environment in which a significant part of the QBU's activities are conducted, the QBU maintains its books and records in the euro after conversion, and the QBU is not required to use the dollar as its functional currency. The change is deemed to be made with the consent of the Commissioner if the change is made within the period set forth in § 1.985–8(b)(2). A QBU changing its functional currency under this new rule is required to make the change in method of accounting adjustments under § 1.985–5. Treasury and the IRS believe that the rules of § 1.985–5 appropriately apply to this circumstance because the change in functional currency is not an involuntary change of the same nature as a QBU whose functional currency is a legacy currency.

The second comment suggested that the temporary regulations do not provide clear guidance in the case where, prior to conversion, the functional currency of a taxpayer and one of its QBU branches is the same legacy currency, and either the taxpayer or its QBU branch converts to the euro as its functional currency in a taxable year prior to the conversion of the other. The comment noted that the temporary regulations presume that the taxpayer and its branch have a different functional currency, but do not address instances where they have the same functional currency. The comment recommended that the regulations provide rules that require calculation of section 987 gain or loss during the period in which the taxpayer and its branch have different functional currencies. The recommendation is not adopted because section 987 currency gain or loss should not arise when a taxpayer and its branch use the same legacy currency as their functional currencies even if each adopts the euro as its functional currency in different years.

Finally, the notice of proposed rulemaking requested comments regarding the treatment of section 988 transactions that are held by euro functional currency QBUs and that are denominated in a currency that is replaced by the euro in the future. While no comments were received, Treasury and the IRS believe that rules relating to this issue should be clarified. Accordingly, § 1.985–8(d) provides that the principles of § 1.985–8(c)(3) apply in this context. Under this rule, legacy currency transactions generally continue to be treated as section 988 transactions and the principles of section 988 apply. Further, the principles provided in § 1.985–8(c)(3)(iii) and (iv) continue to apply to currency and accounts payable and receivable, respectively.

Special Analysis

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It has also been determined that section 553(b) of the Administrative Procedures Act (5 U.S.C. chapter 5) does not apply to these regulations, and because the final rule does not impose a collection of information on small entities, the provisions of the Regulatory Flexibility Act do not apply. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations were submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal authors of these final regulations are John W. Rogers III of the Office of the Associate Chief Counsel (International) and Thomas Preston of the Office of Associate Chief Counsel (Financial Institutions and Products). Other personnel from the IRS and Treasury Department also participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and record keeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

§ 1.985–1 [Amended]

Par. 2. In § 1.985–1, paragraph (c)(6), in the last sentence, the reference ''§ 1.985–8T'' is removed and ''§ 1.985–8'' is added in its place.

§ 1.985–4 [Amended]

Par. 3. In § 1.985–4, paragraph (a), in the last sentence, the reference ''§ 1.985–8T'' is removed and ''§ 1.985–8'' is added in its place.

Par. 4. Section 1.985–8 is added to read as follows:

§ 1.985–8 Special rules applicable to the European Monetary Union (conversion to euro).

(a) *Definitions*—(1) *Legacy currency.* A legacy currency is the former currency of a Member State of the European Community which is substituted for the euro in accordance with the Treaty establishing the European Community signed February 7, 1992. The term legacy currency shall also include the European Currency Unit.

(2) *Conversion rate.* The conversion rate is the rate at which the euro is substituted for a legacy currency.

(b) *Operative rules*—(1) *Initial adoption.* A QBU (as defined in § 1.989(a)–1(b)) whose first taxable year begins after the euro has been substituted for a legacy currency may not adopt a legacy currency as its functional currency.

(2) *QBU with a legacy currency as its functional currency*—(i) *Required change.* A QBU with a legacy currency as its functional currency is required to change its functional currency to the euro beginning the first day of the first taxable year—

(A) That begins on or after the day that the euro is substituted for that legacy currency (in accordance with the Treaty on European Union); and

(B) In which the QBU begins to maintain its books and records (as described in § 1.989(a)–1(d)) in the euro.

(ii) Notwithstanding paragraph (b)(2)(i) of this section, a QBU with a legacy currency as its functional currency is required to change its functional currency to the euro no later than the last taxable year beginning on or before the first day such legacy currency is no longer valid legal tender.

(3) Q*BU with a non-legacy currency as its functional currency* —(i) *In general.* A QBU with a non-legacy currency as its functional currency may change its functional currency to the euro pursuant to this § 1.985–8 if—

(A) Under the rules set forth in § 1.985–1(c), the euro is the currency of the economic environment in which a significant part of the QBU's activities are conducted;

(B) After conversion, the QBU maintains its books and records (as described in § 1.989(a)–1(d)) in the euro; and

(C) The QBU is not required to use the dollar as its functional currency under § 1.985–1(b).

(ii) *Time period for change.* A QBU with a non-legacy currency as its functional currency may change its functional currency to the euro under this section only if it does so within the period set forth in paragraph (b)(2) of this section as if the functional currency of the QBU was a legacy currency.

(4) *Consent of Commissioner.* A change made pursuant to paragraph (b) of this section shall be deemed to be made with the consent of the Commissioner for purposes of § 1.985–4. A QBU changing its functional currency to the euro pursuant to paragraph (b)(2) of this section must make adjustments as provided in paragraph (c) of this section. A QBU changing its functional currency to the euro pursuant to paragraph (b)(3) must make adjustments as provided in § 1.985–5.

(5) *Statement to file upon change.* With respect to a QBU that changes its functional currency to the euro under paragraph (b) of this section, an affected taxpayer shall attach to its return for the taxable year of change a statement that includes the following: ''TAXPAYER CERTIFIES THAT A QBU OF THE TAXPAYER HAS CHANGED ITS FUNCTIONAL CURRENCY TO THE EURO PURSUANT TO TREAS. REG. § 1.985–8.'' For purposes of this paragraph (b)(5), an affected taxpayer shall be in the case where the QBU is: a QBU of an individual U.S. resident (as a result of the activities of such individual), the individual; a QBU branch of a U.S. corporation, the corporation; a controlled foreign corporation (as described in section 957)(or QBU branch thereof), each United States shareholder (as described in section 951(b)); a partnership, each partner separately; a noncontrolled section 902 corporation (as described in section 904(d)(2)(E)) (or branch thereof), each domestic shareholder as described in § 1.902–1(a)(1); or a trust or estate, the fiduciary of such trust or estate.

(c) *Adjustments required when a QBU changes its functional currency from a legacy currency to the euro pursuant to paragraph (b)(2) of this section*—(1) *In general.* A QBU that changes its functional currency from a legacy currency to the euro pursuant to paragraph (b)(2) of this section must make the adjustments described in paragraphs (c)(2) through (5) of this section. Section 1.985–5 shall not apply.

(2) *Determining the euro basis of property and the euro amount of liabilities and other relevant items.* The euro basis in property and the euro amount of liabilities and other relevant items shall equal the product of the legacy functional currency adjusted basis or amount of liabilities multiplied by the applicable conversion rate.

(3) *Taking into account exchange gain or loss on legacy currency section 988 transactions*—(i) *In general.* Except as provided in paragraphs (c)(3)(iii) and (iv) of this section, a legacy currency denominated section 988 transaction (determined after applying section 988(d)) outstanding on the last day of the taxable year immediately prior to the year of change shall continue to be treated as a section 988 transaction after the change and the principles of section 988 shall apply.

(ii) *Examples.* The application of this paragraph (c)(3) may be illustrated by the following examples:

Example 1. X, a calendar year QBU on the cash method of accounting, uses the deutschmark as its functional currency. X is not described in section 1281(b). On July 1, 1998, X converts 10,000 deutschmarks (DM) into Dutch guilders (fl) at the spot rate of fl1 = DM1 and loans the 10,000 guilders to Y (an unrelated party) for one year at a rate of 10% with principal and interest to be paid on June 30, 1999. On January 1, 1999, X changes its functional currency to the euro pursuant to this section. Assume that the euro/deutschmark conversion rate is set by the European Council at 1= DM2. Assume further that the euro/guilder conversion rate is set at 1 = fl2.25. Accordingly, under the terms of the note, on June 30, 1999, X will receive 4444.44 (fl10,000/2.25) of principal and 444.44 (fl1,000/2.25) of interest. Pursuant to this paragraph (c)(3), X will realize an exchange loss on the principal computed under the principles of § 1.988–2(b)(5). For this purpose, the exchange rate used under § 1.988–2(b)(5)(i) shall be the guilder/euro conversion rate. The amount under § 1.988–2(b)(5)(ii) is determined by translating the fl10,000 at the guilder/deutschmark spot rate on July 1, 1998, and translating that deutschmark amount into euros at the deutschmark/euro conversion rate. Thus, X will compute an exchange loss for 1999 of 555.56 determined as follows: [4444.44 (fl10,000/2.25)–5000 ((fl10,000/1)/2) = – 555.56]. Pursuant to this paragraph (c)(3), the character and source of the loss are determined pursuant to section 988 and regulations thereunder. Because X uses the cash method of accounting for the interest on this debt instrument, X does not realize exchange gain or loss on the receipt of that interest.

Example 2. (i) X, a calendar year QBU on the accrual method of accounting, uses the deutschmark as its functional currency. On February 1, 1998, X converts 12,000 deutschmarks into Dutch guilders at the spot rate of fl1 = DM1 and loans the 12,000 guilders to Y (an unrelated party) for one year at a rate of 10% with principal and interest to be paid on January 31, 1999. In addition, assume the average rate (deutschmark/guilder) for the period from February 1, 1998, through December 31, 1998 is fl1.07 = DM1. Pursuant to § 1.988–2(b)(2)(ii)(C), X will accrue eleven months of interest on the note and recognize interest income of DM1028.04 (fl1100/1.07) in the 1998 taxable year.

(ii) On January 1, 1999, the euro will replace the deutschmark as the national currency of Germany pursuant to the Treaty on European Union signed February 7, 1992. Assume that on January 1, 1999, X changes its functional currency to the euro pursuant to this section. Assume that the euro/deutschmark conversion rate is set by the European Council at 1 = DM2. Assume further that the euro/guilder conversion rate is set at 1 = fl2.25. In 1999, X will accrue one month of interest equal to 44.44 (fl100/2.25). On January 31, 1999, pursuant to the note, X will receive interest denominated in euros of 533.33 (fl1200/2.25). Pursuant to this paragraph (c)(3), X will realize an exchange loss in the 1999 taxable year with respect to accrued interest computed under the principles of § 1.988–2(b)(3). For this purpose, the exchange rate used under § 1.988–2(b)(3)(i) is the guilder/euro conversion rate and the exchange rate used under § 1.988–2(b)(3)(ii) is the deutschmark/euro conversion rate. Thus, with respect to the interest accrued in 1998, X will realize exchange loss of 25.13 under § 1.988–2(b)(3) as follows: [488.89 (fl1100/2.25)– 514.02 (DM1028.04/2) =– 25.13]. With respect to the one month of interest accrued in 1999, X will realize no exchange gain or loss since the exchange rate when the interest accrued and the spot rate on the payment date are the same.

(iii) X will realize exchange loss of 666.67 on repayment of the loan principal computed in the same manner as in Example 1 [5333.33 (fl12,000/2.25)– 6000 fl12,000/1)/2)]. The losses with respect to accrued interest and principal are characterized and sourced under the rules of section 988.

(iii) *Special rule for legacy nonfunctional currency.* The QBU shall realize or otherwise take into account for all purposes of the Internal Revenue Code the amount of any unrealized exchange gain or loss attributable to nonfunctional currency (as described in section 988(c)(1)(C)(ii)) that is denominated in a legacy currency as if the currency were disposed of on the last day of the taxable year immediately prior to the year of change. The character and source of the gain or loss are determined under section 988.

(iv) *Legacy currency denominated accounts receivable and payable*—(A) *In general.* A QBU may elect to realize or otherwise take into account for all purposes of the Internal Revenue Code the amount of any unrealized exchange gain or loss attributable to a legacy currency denominated item described in section 988(c)(1)(B)(ii) as if the item were terminated on the last day of the taxable year ending prior to the year of change.

(B) *Time and manner of election.* With respect to a QBU that makes an

election described in paragraph (c)(3)(iv)(A) of this section, an affected taxpayer (as described in paragraph (b)(5) of this section) shall attach a statement to its tax return for the taxable year ending immediately prior to the year of change which includes the following: ''TAXPAYER CERTIFIES THAT A QBU OF THE TAXPAYER HAS ELECTED TO REALIZE CURRENCY GAIN OR LOSS ON LEGACY CURRENCY DENOMINATED ACCOUNTS RECEIVABLE AND PAYABLE UPON CHANGE OF FUNCTIONAL CURRENCY TO THE EURO.'' A QBU making the election must do so for all legacy currency denominated items described in section 988(c)(1)(B)(ii).

(4) *Adjustments when a branch changes its functional currency to the euro*—(i) *Branch changing from a legacy currency to the euro in a taxable year during which taxpayer's functional currency is other than the euro.* If a branch changes its functional currency from a legacy currency to the euro for a taxable year during which the taxpayer's functional currency is other than the euro, the branch's euro equity pool shall equal the product of the legacy currency amount of the equity pool multiplied by the applicable conversion rate. No adjustment to the basis pool is required.

(ii) *Branch changing from a legacy currency to the euro in a taxable year during which taxpayer's functional currency is the euro.* If a branch changes its functional currency from a legacy currency to the euro for a taxable year during which the taxpayer's functional currency is the euro, the taxpayer shall realize gain or loss attributable to the branch's equity pool under the principles of section 987, computed as if the branch terminated on the last day prior to the year of change. Adjustments under this paragraph (c)(4)(ii) shall be taken into account by the taxpayer ratably over four taxable years beginning with the taxable year of change.

(5) *Adjustments to a branch's accounts when a taxpayer changes to the euro*—(i) *Taxpayer changing from a legacy currency to the euro in a taxable year during which a branch's functional currency is other than the euro.* If a taxpayer changes its functional currency to the euro for a taxable year during which the functional currency of a branch of the taxpayer is other than the euro, the basis pool shall equal the product of the legacy currency amount of the basis pool multiplied by the applicable conversion rate. No adjustment to the equity pool is required.

(ii) *Taxpayer changing from a legacy currency to the euro in a taxable year during which a branch's functional currency is the euro.* If a taxpayer changes its functional currency from a legacy currency to the euro for a taxable year during which the functional currency of a branch of the taxpayer is the euro, the taxpayer shall take into account gain or loss as determined under paragraph (c)(4)(ii) of this section.

(6) *Additional adjustments that are necessary when a corporation changes its functional currency to the euro.* The amount of a corporation's euro currency earnings and profits and the amount of its euro paid-in capital shall equal the product of the legacy currency amounts of these items multiplied by the applicable conversion rate. The foreign income taxes and accumulated profits or deficits in accumulated profits of a foreign corporation that were maintained in foreign currency for purposes of section 902 and that are attributable to taxable years of the foreign corporation beginning before January 1, 1987, also shall be translated into the euro at the conversion rate.

(d) *Treatment of legacy currency section 988 transactions with respect to a QBU that has the euro as its functional currency*—(1) *In general.* This § 1.985–8(d) applies to a QBU that has the euro as its functional currency and that holds a section 988 transaction denominated in, or determined by reference to, a currency that is substituted by the euro. For example, this paragraph (d) will apply to a German QBU with the euro as its functional currency if the QBU is holding Country X currency or other section 988 transactions denominated in such currency on the day in the year 2005 when the euro is substituted for the Country X currency.

(2) *Principles of paragraph (c)(3) of this section shall apply.* With respect to a QBU described in paragraph (d) of this section, the principles of paragraph (c)(3) of this section shall apply. For example, if a German QBU with the euro as its functional currency is holding a Country X currency denominated debt instrument on the day in the year 2005 when the euro is substituted for the Country X currency, the instrument shall continue to be treated as a section 988 transaction pursuant to the principles of paragraph (c)(3)(i) of this section. However, if such QBU holds Country X currency, the QBU shall take into account any unrealized exchange gain or loss pursuant to the principles of paragraph (c)(3)(iii) of this section as if the currency was disposed of on the day prior to the day the euro is substituted for the Country X currency. Similarly, if the QBU makes an election under the principles of paragraph (c)(3)(iv) of this section, the QBU shall take into account for all purposes of the Internal Revenue Code the amount of any unrealized exchange gain or loss attributable to a legacy currency denominated item described in section 988(c)(1)(B)(ii) as if the item were terminated on the day prior to the day the euro is substituted for the Country X currency.

(e) *Effective date.* This section applies to tax years ending after July 29, 1998.

§ 1.985–8T [Removed]

Par. 5. Section 1.985–8T is removed.

Par. 6. Section 1.1001–5 is added to read as follows:

§ 1.1001–5 European Monetary Union (conversion to the euro).

(a) *Conversion of currencies.* For purposes of § 1.1001–1(a), the conversion to the euro of legacy currencies (as defined in § 1.985–8(a)(1)) is not the exchange of property for other property differing materially in kind or extent.

(b) *Effect of currency conversion on other rights and obligations.* For purposes of § 1.1001–1(a), if, solely as the result of the conversion of legacy currencies to the euro, rights or obligations denominated in a legacy currency become rights or obligations denominated in the euro, that event is not the exchange of property for other property differing materially in kind or extent. Thus, for example, when a debt instrument that requires payments of amounts denominated in a legacy currency becomes a debt instrument requiring payments of euros, that alteration is not a modification within the meaning of § 1.1001–3(c).

(c) *Effective date.* This section applies to tax years ending after July 29, 1998.

§ 1.1001–5T [Removed]

Par. 7. Section 1.1001–5T is removed.

Approved: December 13, 2000.

Robert E. Wenzel,

Deputy Commissioner of Internal Revenue.

Jonathan Talisman,

Acting Assistant Secretary of the Treasury.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 602

[TD 8929]

RIN 1545–AQ30

Accounting for Long-Term Contracts

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations describing how income from a long-term contract must be accounted for under section 460 of the Internal Revenue Code, which was enacted by the Tax Reform Act of 1986. A taxpayer manufacturing or constructing property under a long-term contract will be affected by these regulations.

DATES: *Effective Date:* These regulations are effective on January 11, 2001.

Applicability Date: These regulations apply to any contract entered into on or after January 11, 2001.

FOR FURTHER INFORMATION CONTACT: Leo F. Nolan II or John M. Aramburu of the Office of Associate Chief Counsel (Income Tax and Accounting) at (202) 622–4960 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in these final regulations has been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) under control number 1545–1650. Responses to this collection of information are mandatory.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

The estimated annual burden per respondent and/or recordkeeper is 15 minutes.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be sent to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, W:CAR:MP:FP:S:O, Washington, DC 20224, and to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Books or records relating to a collection of information must be retained as long as their contents might become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

Section 460, which was enacted by section 804 of the Tax Reform Act of 1986, Public Law 99–514 (100 Stat. 2085, 2358–2361), generally requires a taxpayer to determine the taxable income from a long-term contract using the percentage-of-completion method. Section 460 was amended by section 10203 of the Omnibus Budget Reconciliation Act of 1987, Public Law 100–203 (101 Stat. 1330, 1330–394); by sections 1008(c) and 5041 of the Technical and Miscellaneous Revenue Act of 1988, Public Law 100–647 (102 Stat. 3342, 3438–3439 and 3673–3676); by sections 7621 and 7811(e) of the Omnibus Budget Reconciliation Act of 1989, Public Law 101–239 (103 Stat. 2106, 2375–2377 and 2408–2409); by section 11812 of the Omnibus Budget Reconciliation Act of 1990, Public Law 101–508 (104 Stat. 1388, 1388–534 to 1388-536); by sections 1702(h)(15) and 1704(t)(28) of the Small Business Job Protection Act of 1996, Public Law 104–188 (110 Stat. 1755, 1874, 1888); and by section 1211 of the Taxpayer Relief Act of 1997, Public Law 105–34 (111 Stat. 788, 998–1000).

Section 460(h) directs the Secretary to prescribe regulations to the extent necessary or appropriate to carry out the purpose of section 460, including regulations to prevent a taxpayer from avoiding section 460 by using related parties, pass-through entities, intermediaries, options, and other similar arrangements.

On May 5, 1999, the IRS and Treasury Department published a notice of proposed rulemaking (64 FR 24096 [REG–208156–91, 1999–22 I.R.B. 11]) relating to section 460. Comments responding to the notice were received, and a public hearing was scheduled for September 14, 1999.

The IRS and Treasury Department received eleven comment letters concerning the notice of proposed rulemaking. After considering the comments contained in these letters, the IRS and Treasury Department adopt the proposed regulations as revised by this Treasury decision. The comments and revisions are discussed below.

Explanation of Provisions

1. Overview

Section 460 generally requires the income from a long-term contract to be determined using the percentage-of-completion method based on a cost-to-cost comparison (PCM). However, the income from exempt construction contracts still may be determined using the completed-contract method (CCM), the exempt-contract percentage-of-completion method (EPCM), or any other permissible method. Contracts that are not long-term contracts must be accounted for using a permissible method of accounting other than a long-term contract method (*i.e.,* a method other than the PCM, the CCM, or the EPCM). See section 446 and the regulations thereunder.

One commentator suggested that the exceptions to the mandatory use of the PCM included in the proposed regulations be expanded to include ''any portion of the long-term manufacturing contract for which no payment for the manufacture of the subject matter of the contract is required to be made before the manufacture of the item is completed.'' The exceptions contained in the proposed regulations were specifically provided by the statute and the statute does not include the suggestion made by the commentator. Thus, the IRS and Treasury Department did not adopt this suggestion.

2. Definition of Long-Term Contract

Under section 460(f), ''long-term contract'' generally means any contract for the building, installation, construction (construction), or the manufacture, of property if the contract is not completed within the taxable year the taxpayer enters into the contract (contracting year). However, a manufacturing contract is not a long-term contract unless it involves the manufacture of (1) a unique item of a type that is not normally included in the finished goods inventory of the taxpayer or (2) an item normally requiring more than 12 calendar months to complete, regardless of the duration of the contract.

Continuing the policy established in Notice 89–15 (1989–1 C.B. 634), the proposed regulations provide that it is not relevant whether the customer has title to, control over, or risk of loss with respect to the property. One commentator suggested that the final regulations should not retain the rule that requires a contractor to ignore title and risk-of-loss issues relative to the applicability of section 460 because a contractor has little freedom to restructure a contract to ''construct'' into a contract to ''sell.'' The IRS and Treasury Department did not adopt this suggestion because we believe that a contract's classification should be based on the performance required of the taxpayer under the contract regardless

of whether that contract otherwise would be classified as a sales contract or a construction or manufacturing contract. Moreover, the IRS and Treasury Department continue to believe that the rule in the proposed regulations is necessary to prevent a taxpayer from circumventing section 460 by structuring a construction contract to resemble a sales contract without changing the taxpayer's obligations under the contract. Another commentator asked whether a contract is subject to section 460 if it requires the taxpayer to manufacture or construct property in order to fulfill its contractual obligation but the property is never delivered to the customer (*e.g.*, a research contract for test results). Again, the IRS and Treasury Department believe that a contract's classification should depend upon the performance required of the taxpayer under the contract. Thus, the final regulations clarify that it is irrelevant whether title in the property manufactured or constructed under the contract is delivered to the customer.

The proposed regulations provide that a contract is not a construction contract if it requires the taxpayer to provide land to the customer and the estimated total allocable contract costs attributable to the taxpayer's construction activities are less than 10 percent of the contract's total contract price. One commentator asked for clarification concerning whether the estimated total allocable contract costs attributable to the taxpayer's construction activities includes the cost of the land provided under the contract. The final regulations clarify that the cost of this land is not an allocable contract cost when the taxpayer determines whether the cost of its construction activities is less than 10 percent of the contract's total contract price.

3. Date Taxpayer Completes a Long-Term Contract

The proposed regulations provide that a long-term contract is completed in the earlier taxable year (completion year) that: (1) The customer uses the subject matter of the contract (other than for testing) and at least 95 percent of the total allocable contract costs attributable to the subject matter have been incurred by the taxpayer; or (2) the subject matter of the contract is finally completed and accepted. To the extent that the ''customer-use'' rule requires a taxpayer to treat a contract as completed before final completion and acceptance have occurred, the proposed regulations explicitly adopt a rule different from that considered in *Ball, Ball and Brosamer, Inc.* v. *Commissioner,* 964 F.2d 890 (9th Cir. 1992), *aff'g* T.C. Memo. 1990–454.

Some commentators argued against having a rule that will declare a contract completed earlier than under the finally-completed-and-accepted standard illustrated in *Ball.* Some commentators also argued that the customer-use rule is confusing to subcontractors because it is unclear whether a subcontractor's ''customer'' is the general, or ''prime,'' contractor or the ultimate owner of the property. On the other hand, one commentator asked for a bright-line standard for completion and suggested, among other possibilities, that completion occur when 95 percent of the estimated costs have been incurred.

The IRS and Treasury Department continue to believe that a contract is complete for all practical purposes when the customer uses the subject matter of that contract and the taxpayer has only five percent or less of the total allocable contract costs remaining to be incurred. Delaying a contract's completion beyond this point, as the Tax Court permitted in *Ball,* does not reflect the substance of the transaction and could encourage the use of formalities to delay a contract's completion unreasonably. Thus, the final regulations do not substantively change the customer-use rule contained in the proposed regulations. However, the final regulations clarify that a subcontractor's customer is the general contractor.

Several commentators expressed concern that the customer-use rule contained in the proposed regulations will create additional administrative burdens for taxpayers using the PCM because they often will have to apply the look-back method two times, first upon customer use and again upon final completion and acceptance. Though the IRS and Treasury Department believe that the customer-use rule results in an appropriate determination of completion, we understand these concerns. Thus, to simplify a taxpayer's reporting requirements under the look-back method, the IRS and Treasury Department have modified the look-back regulations to require a taxpayer to delay the first application of the look-back method until the taxable year in which a long-term contract is finally completed and accepted.

4. Severing and Aggregating Contracts

The proposed regulations allow the Commissioner, and generally require a taxpayer, to sever and aggregate contracts when necessary to clearly reflect income. The proposed regulations provide the following criteria for determining whether severance or aggregation is required: Independent versus interdependent pricing, separate delivery or acceptance, and the reasonable businessperson standard. However, under the proposed regulations, a taxpayer may not sever a contract subject to the PCM. In addition, the proposed regulations require a taxpayer to notify the Commissioner when severing a long-term contract not accounted for using the PCM and provide agreement-specific information, including the criteria for severing or aggregating the agreement.

Some commentators criticized the ''no severance'' rule for long-term contracts subject to the PCM. The ''no severance'' rule is provided in the proposed regulations because the IRS and Treasury Department believe that in most cases, a taxpayer's use of the PCM and look-back method will clearly reflect the taxpayer's income from a long-term contract. To date, the only identified reason to allow severance of a contract subject to the PCM related to the application of the 10-percent method as shown in § 1.460–1(j) *Example 8* of the proposed income tax regulations. Conversely, the IRS and Treasury Department believe that permitting a taxpayer to sever a contract subject to the PCM could allow the taxpayer to manipulate taxable income (*e.g.,* by severing to create a loss contract and accelerate the loss) or to avoid the application of section 460 (*e.g.,* by ''completing'' the contract during the contracting year). Nonetheless, the IRS and Treasury Department agree with the commentators' concerns that to the extent severance is necessary to clearly reflect income from a long-term contract (*e.g.,* due to the application of the 10-percent method), it should be permitted. Accordingly, the final regulations allow a taxpayer to sever a long-term contract if necessary to clearly reflect income, but only if the taxpayer has obtained the Commissioner's prior written consent.

Some commentators criticized the notification requirement for severed and aggregated contracts as being unduly burdensome. The IRS and Treasury Department continue to believe that notification will help taxpayers and the IRS consistently apply the severing and aggregating rules. In recognition of the potential burden associated with the proposed notification requirement, however, the final regulations simplify the notification by only requiring that a taxpayer inform the IRS when it has severed or aggregated agreements. Thus, the taxpayer is no longer required to provide agreement-specific information.

One commentator suggested that the reasonable businessperson standard be

eliminated because it is merely a subset of independent pricing and interdependent pricing (the pricing standards), which should be the primary criteria for determining whether long-term contracts must be severed or aggregated to clearly reflect income. The IRS and Treasury Department agree that the pricing standards and the reasonable businessperson standard overlap, but believe that the pricing standard is a subset of the reasonable businessperson standard. Besides requiring an analysis of pricing, the reasonable businessperson standard requires an analysis of all the facts and circumstances of the business arrangement between the taxpayer and the customer. Thus, because the absence of the reasonable businessperson standard might change the decision to sever or aggregate in some cases, the final regulations retain this criterion and clarify its distinction from the pricing standards.

5. Hybrid Contracts

Under the proposed regulations, a taxpayer generally must classify a contract that requires the taxpayer to manufacture personal property and to construct real property (hybrid contract) as separate manufacturing and construction contracts. If at least 95 percent of the estimated allocable contract costs are reasonably allocable to manufacturing (or construction) activities, the taxpayer may classify the contract as a manufacturing (or construction) contract.

One commentator suggested that the final regulations allow a taxpayer to elect to use the PCM to account for a hybrid contract instead of requiring the taxpayer to account for both parts separately. The IRS and Treasury Department agree with the commentator's request for simplification. Accordingly, the final regulations allow a taxpayer to elect, on a contract-by-contract basis, to classify a hybrid contract as a long-term manufacturing contract subject to the PCM. In addition, because this election effectively supersedes the 95-percent election that would have applied to hybrid contracts that are primarily manufacturing contracts, the final regulations retain the 95-percent election as a second election that applies only to hybrid contracts that are primarily construction contracts.

6. Contracts of Related Parties

The proposed regulations provide that if a related party and its customer enter into a long-term contract subject to the PCM, and a taxpayer performs any activity that is incident to or necessary for the related party's long-term contract, the taxpayer must account for the gross receipts and costs attributable to the activity using the PCM. However, the proposed regulations contain an inventory exception for components and subassemblies produced by the taxpayer if the taxpayer regularly carries these items in its finished goods inventories and 80 percent or more of the gross receipts from the sale of these items typically comes from unrelated parties.

One commentator suggested that the percentage threshold be lowered from 80 percent to 50 percent and that the exception not be limited to items regularly carried in the taxpayer's finished goods inventories. The IRS and Treasury Department included the related party rule, originally promulgated in Notice 89–15, in the proposed regulations to prevent taxpayers from establishing special-purpose subsidiaries to avoid the application of section 460. However, in recognition that a related party that sells most units of a manufactured item to unrelated parties was not established for the purpose of avoiding section 460, the IRS and Treasury Department added the inventory exception to the proposed regulations to reduce the related party's accounting burden. The IRS and Treasury Department agree, however, that the inventory exception is too narrow. Accordingly, the final regulations lower the percentage threshold from ''80 percent or more'' to ''more than 50 percent'' and eliminate the requirement that the components or subassemblies be carried in finished goods inventories.

7. Unique Items

Section 460 applies if a taxpayer manufactures a unique item of a type that is not normally included in the finished goods inventory of the taxpayer and if the contract is not completed by the close of the contracting year. The proposed regulations provide that ''unique'' means specifically designed for the needs of a customer. In addition, the proposed regulations contain three safe harbors concerning contracts to manufacture unique items. First, an item is not unique if the taxpayer normally completes the item within 90 days. Second, an item is not unique if the total allocable contract costs attributable to customizing activities that are incident to or necessary for the production of the item do not exceed 5 percent of the estimated total costs allocable to the item. Third, a unique item ceases to be unique no later than when the taxpayer normally includes similar items in its finished goods inventory. For an item that does not satisfy one of these three safe harbors, the determination of whether the item is unique is based on the facts and circumstances.

Some commentators suggested that the final regulations contain either a 140-day or a 180-day safe harbor instead of the 90-day safe harbor. The IRS and Treasury Department did not adopt these suggestions because we believe that a 90-day safe harbor appropriately limits the meaning of ''unique'' in most cases. However, the IRS and Treasury Department have modified the 90-day safe harbor to clarify that in the case of a contract to manufacture multiple units of the same item, the 90-day safe harbor applies only if each unit normally is completed within 90 days.

Some commentators suggested that the final regulations contain either a 10-percent, 15-percent, or 20-percent safe harbor instead of the 5-percent safe harbor. In particular, these commentators stated that a 5-percent safe harbor will not alleviate any controversy between taxpayers and revenue agents because revenue agents generally do not raise the issue of unique items if the taxpayer's customizing costs do not exceed 5 percent. The IRS and Treasury Department agree that it is reasonable to assume that an item is not unique if the taxpayer's customizing costs do not exceed 10 percent. Thus, the customization safe harbor in the final regulations has been increased to 10 percent.

One commentator suggested that the cost of a taxpayer's customizing activities should not include the cost of any customized equipment purchased by a taxpayer from an unrelated party under a ''special accommodation'' arrangement with the customer that requires the taxpayer to acquire and install that customized equipment. The IRS and Treasury Department did not adopt this suggestion because such a special accommodation rule could enable taxpayers to avoid section 460 by having some long-term contract activities performed by outside parties.

Several commentators questioned the relevance of the ''basic design'' concept included in § 1.460–2(e) *Example 1* of the proposed regulations. To determine whether an item is unique, the relevant analysis is whether an item is customized (or manufactured according to a customer's specifications) regardless of whether the item is customized from a basic design. Accordingly, the final regulations delete the reference to the taxpayer's basic design in the example to eliminate any confusion.

One commentator questioned how the safe harbor applies in the case of a contract to manufacture multiple units of the same item. The IRS and Treasury Department believe that if significant customization is necessary to produce an item for a customer under the contract, that item is specifically designed for the needs of the customer, and thus is a unique item, regardless of the number of units produced for the customer under the contract. Thus, the final regulations clarify that for the purposes of applying the 10-percent safe harbor to a contract to manufacture multiple units of the same item, a taxpayer must allocate all customization costs to the first unit manufactured under the contract.

Some commentators suggested the addition of a fourth safe harbor that would exclude ''income on contracts for which progress payments have not been received by year end.'' The IRS and Treasury Department did not adopt this suggestion because we do not believe that such a rule bears any relationship to a determination of the uniqueness of an item and because such a rule is inconsistent with the statute.

8. 12-Month Completion Period

The proposed regulations provide that a manufactured item normally requires more than 12 months to complete if its ''production period,'' as defined in § 1.263A–12, is reasonably expected to exceed 12 months, determined at the end of the contracting year. In general, the production period for an item or unit begins when the taxpayer incurs at least 5 percent of the estimated total allocable contract costs, including planning and design expenditures, allocable to the item or unit, and the production period ends when the item or unit is ready for shipment to the taxpayer's customer.

Some commentators suggested that the final regulations be clarified to provide that ''normal time to complete'' includes only the time of physical production activity and not the time of any research, development, planning, or design activity. The IRS and Treasury Department did not adopt this suggestion because we believe that the definition of ''production period'' under § 1.263A–12(c)(3), which includes the time required for planning and design activity, is consistent with the allocation of costs to extended-period long-term contracts under § 1.451–3(d)(6) and with section 460(c)(1), which requires that costs be allocated under the rules applicable to extended-period long-term contracts. In addition, if an item manufactured under a long-term contract requires a significant amount of design time to produce, it is appropriate to include the time needed to perform these activities when determining that item's ''normal time to complete'' because these activities are directly attributable to that contract and are necessary to manufacture the subject matter of the contract. However, the final regulations clarify that a taxpayer is not required to consider activities related to costs that are not allocable contract costs under section 460 (*e.g.*, independent research and development expenses, marketing expenses) when determining the item's normal time to complete.

Some commentators asked how the 12-month rule applies in the case of a contract to manufacture multiple units of the same item. The final regulations clarify, that for the purposes of applying the 12-month rule to this type of contract, the time required to design and manufacture the first unit generally does not reflect the item's ''normal time to complete.'' For example, the time required to design the first unit of an item should not be considered as time required to manufacture subsequent identical units. The final regulations also include an example illustrating the determination of normal time to complete an item in the case of a contract to manufacture multiple units of the same item.

9. Percentage-of-Completion Method

The proposed regulations provide that, under the PCM, a taxpayer generally includes a portion of the total contract price in income for each taxable year that the taxpayer incurs contract costs allocable to the long-term contract. Under the proposed regulations, total contract price included all bonuses, awards, and incentive payments if it is reasonably estimated that they will be received, even if the all events test has not yet been met. If, by the end of the completion year, a taxpayer cannot reasonably estimate whether a contingency will be satisfied, the bonus, award, or incentive payment is not includible in total contract price.

Some commentators argued that a taxpayer should not have to include contingent compensation in ''total contract price'' until the all events test for the item has been satisfied. The IRS and Treasury Department did not adopt this suggestion because the all events test is a judicially created test applying to taxpayers using an accrual method. *U.S.* v. *Anderson*, 269 U.S. 422 (1926). Conversely, section 460 is a self-contained, statutorily created accounting method that requires taxpayers to use estimated amounts when computing taxable income under the PCM and to use actual amounts when applying the look-back method. In addition, using the most accurate estimate of total contract price and total contract costs will produce the most accurate annual reporting of income and costs and will minimize discrepancies that could necessitate paying look-back interest. See *Tutor-Saliba Corp.* v. *Commissioner*, 115 T.C. No. 1 (July 17, 2000). However, in response to comments and questions concerning the contingent income rule, the final regulations provide that contingent income is includible in total contract price not later than when it is included in income for financial reporting purposes under generally accepted accounting principles.

One commentator suggested that the final regulations incorporate the rule under § 1.451–3(a)(1) that allows a taxpayer to account for long-term contracts of less-than-substantial duration using a method of accounting other than a long-term contract method of accounting. The IRS and Treasury Department did not adopt this suggestion because such a rule would be inconsistent with the statutory definition of ''long-term contract.''

One commentator asked how a contractor should account for the subject matter of a long-term contract when the customer breaches that contract before the contractor has transferred title to the customer but after the contractor has reported taxable income from that contract under the PCM (*e.g.*, unfinished condominium unit). In response to this comment, the final regulations include new § 1.460–4(b)(7), which provides that if a long-term contract is terminated before completion and, as a result, the taxpayer retains ownership of the property that is the subject matter of that contract, the taxpayer must reverse the previously reported gross income (loss) from the transaction in the taxable year of termination. As a result of reversing its previously reported gross income under this rule, a taxpayer generally will have an adjusted basis in the retained property equal to its previously deducted allocable contract costs. The look-back method does not apply to any terminated contract to the extent it is subject to this rule. The IRS and Treasury Department request suggestions for rules that will apply when the customer acquires ownership of some, but not all, of the property that is the subject matter of the contract.

10. Cost Allocation Rules

The proposed and final regulations provide that a taxpayer generally must

allocate costs to a contract subject to section 460(a) in the same manner as direct and indirect costs are capitalized to property produced by a taxpayer under section 263A. The regulations provide exceptions, however, that reflect the differences in the cost allocation rules of sections 263A and 460.

One commentator argued that the final regulations should contain a single standard for determining when the cost of a direct material is allocable to a long-term contract. In response to this comment, the final regulations contain a single standard linked to the uniform capitalization (UNICAP) rules of section 263A. The final regulations also clarify that, among other methods, a taxpayer dedicates direct materials by associating them with a specific contract (*e.g.*, by purchase order, entry on books and records, shipping instructions).

One commentator suggested that the final regulations clarify that taxpayers should not treat software development and software implementation costs as customization costs for the purposes of the proposed 5-percent safe harbor. The IRS and Treasury Department did not adopt this suggestion because we believe that software costs are allocable contract costs (and thus customization costs) to the extent they are incident to or necessary for the manufacture of the subject matter of the contract.

This commentator also suggested that the final regulations clarify that taxpayers should not treat guarantee, warranty, and maintenance costs as customization costs for the purposes of the proposed 5-percent safe harbor. The IRS and Treasury Department modified § 1.460–1(d)(2) to clarify that these types of costs are not allocable contract costs.

11. Simplified Cost-to-Cost Method

The proposed regulations generally permit a taxpayer to elect to allocate contract costs using the simplified cost-to-cost method. Under the simplified cost-to-cost method, a taxpayer must determine a contract's completion factor based upon only direct material costs; direct labor costs; and depreciation, amortization, and cost recovery allowances on equipment and facilities directly used to manufacture or construct property under the contract.

One commentator suggested that the final regulations clarify whether a taxpayer using the simplified cost-to-cost method is allowed or required to include subcontracted costs in a contract's completion factor. In response to this comment, the final regulations clarify that subcontracted costs represent either direct material or direct labor costs and thus must be allocated to a contract under the simplified cost-to-cost method when incurred under § 1.461–4(d)(2)(ii). In addition, a taxpayer must allocate subcontracted costs for all section 460 purposes (*e.g.*, applying the 10-percent safe harbor under § 1.460–2(b)(2)(ii)).

12. Statute of Limitations and Compound Interest on Look-Back Interest

One commentator requested guidance concerning the statute of limitations applicable to payments of, and claims for, look-back interest. The final regulations amend § 1.460–6(f)(1) and (2) to clarify the reporting requirements and add new § 1.460–6(f)(3). New § 1.460–6(f)(3) provides guidance on the statute of limitations applicable to the assessment and collection of look-back interest owed by a taxpayer. In addition, new § 1.460–6(f)(3) provides that a taxpayer's claim for credit or refund of look-back interest previously paid by or collected from the taxpayer is a claim for credit or refund of an overpayment of tax for federal income tax purposes, which is subject to the section 6511 statute of limitations. In contrast, new § 1.460–6(f)(3) provides that a taxpayer's claim for look-back interest (or interest payable on look-back interest) that is not attributable to an amount previously paid by or collected from the taxpayer is a general claim against the federal government, which is subject to the statutes of limitations found in 28 U.S.C. sections 2401 and 2501.

13. Effective Date

These final regulations apply to any contract entered into on or after January 11, 2001.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations. Pursuant to section 7805(f) of the Internal Revenue Code, this Treasury decision was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business. It is hereby certified that the collection of information in this Treasury decision will not have a significant economic impact on a substantial number of small entities. The regulations require a taxpayer to attach a statement to its original federal income tax return if the taxpayer severs or aggregates a long-term contract. The statement is needed so the Commissioner can determine whether the taxpayer properly severed or aggregated the contract. It is uncommon for a taxpayer that has a long-term contract to sever or aggregate that contract. In addition, if a contract is severed or aggregated and a statement is required, it is estimated that it will, on average, require only 15 minutes to complete.

Drafting Information

The principal author of these regulations is Leo F. Nolan II, Office of Associate Chief Counsel (Income Tax and Accounting). However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 602 are amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation is amended by removing the entry for ''Section 1.451–3 and 1.451–5'', revising the entry for ''Section 1.460–4'', and adding the following entries in numerical order to read as follows:

Authority: 26 U.S.C. 7805 * * *

* * * * *

Section 1.451–5 also issued under 96 Stat. 324, 493.

* * * * *

Section 1.460–1 also issued under 26 U.S.C. 460(h).

Section 1.460–2 also issued under 26 U.S.C. 460(h).

Section 1.460–3 also issued under 26 U.S.C. 460(h).

Section 1.460–4 also issued under 26 U.S.C. 460(h) and 1502.

Section 1.460–5 also issued under 26 U.S.C. 460(h).

* * * * *

§ 1.446–1 [Amended]

Par. 2. Section 1.446–1 is amended as follows:

1. In the second sentence of paragraph (c)(1)(iii), the language ''451'' is removed and ''460'' is added in its place.

2. In the fourth sentence of paragraph (e)(2)(ii)(*a*), the language ''§ 1.451–3'' is

removed and ''§ 1.460–4'' is added in its place.

§ 1.451–3 [Removed]

Par. 3. Section 1.451–3 is removed.

§ 1.451–5 [Amended]

Par. 4. Section 1.451–5 is amended by removing the language ''§ 1.451–3'' and adding ''§ 1.460–4'' in its place in the first sentence of paragraph (b)(3).

Par. 5. Section 1.460–0 is amended by:

1. Revising the introductory text.
2. Revising the entries for §§ 1.460–1 through 1.460–3, 1.460–4(a) through (i), and 1.460–5.
3. Adding an entry for § 1.460–4(k).
4. Removing the entry for § 1.460–6(c)(4)(iv).
5. Adding an entry for § 1.460–6(f)(3).
6. Removing the entries for §§ 1.460–7 and 1.460–8.

The revisions and addition read as follows:

§ 1.460–0 Outline of regulations under section 460.

This section lists the paragraphs contained in § 1.460–1 through § 1.460–6.

§ 1.460–1 Long-term contracts.

(a) Overview.
(1) In general.
(2) Exceptions to required use of PCM.
(i) Exempt construction contract.
(ii) Qualified ship or residential construction contract.
(b) Terms.
(1) Long-term contract.
(2) Contract for the manufacture, building, installation, or construction of property.
(i) In general.
(ii) De minimis construction activities.
(3) Allocable contract costs.
(4) Related party.
(5) Contracting year.
(6) Completion year.
(7) Contract commencement date.
(8) Incurred.
(9) Independent research and development expenses.
(10) Long-term contract methods of accounting.
(c) Entering into and completing long-term contracts.
(1) In general.
(2) Date contract entered into.
(i) In general.
(ii) Options and change orders.
(3) Date contract completed.
(i) In general.
(ii) Secondary items.
(iii) Subcontracts.
(iv) Final completion and acceptance.
(A) In general.
(B) Contingent compensation.
(C) Assembly or installation.
(D) Disputes.
(d) Allocation among activities.
(1) In general.
(2) Non-long-term contract activity.
(e) Severing and aggregating contracts.
(1) In general.
(2) Facts and circumstances.
(i) Pricing.
(ii) Separate delivery or acceptance.
(iii) Reasonable businessperson.
(3) Exceptions.
(i) Severance for PCM.
(ii) Options and change orders.
(4) Statement with return.
(f) Classifying contracts.
(1) In general.
(2) Hybrid contracts.
(i) In general.
(ii) Elections.
(3) Method of accounting.
(4) Use of estimates.
(i) Estimating length of contract.
(ii) Estimating allocable contract costs.
(g) Special rules for activities benefitting long-term contracts of a related party.
(1) Related party use of PCM.
(i) In general.
(ii) Exception for components and subassemblies.
(2) Total contract price.
(3) Completion factor.
(h) Effective date.
(1) In general.
(2) Change in method of accounting.
(i) [Reserved]
(j) Examples.

§ 1.460–2 Long-term manufacturing contracts.

(a) In general.
(b) Unique.
(1) In general.
(2) Safe harbors.
(i) Short production period.
(ii) Customized item.
(iii) Inventoried item.
(c) Normal time to complete.
(1) In general.
(2) Production by related parties.
(d) Qualified ship contracts.
(e) Examples.

§ 1.460–3 Long-term construction contracts.

(a) In general.
(b) Exempt construction contracts.
(1) In general.
(2) Home construction contract.
(i) In general.
(ii) Townhouses and rowhouses.
(iii) Common improvements.
(iv) Mixed use costs.
(3) $10,000,000 gross receipts test.
(i) In general.
(ii) Single employer.
(iii) Attribution of gross receipts.
(c) Residential construction contracts.

§ 1.460–4 Methods of accounting for long-term contracts.

(a) Overview.
(b) Percentage-of-completion method.
(1) In general.
(2) Computations.
(3) Post-completion-year income.
(4) Total contract price.
(i) In general.
(A) Definition.
(B) Contingent compensation.
(C) Non-long-term contract activities.
(ii) Estimating total contract price.
(5) Completion factor.
(i) Allocable contract costs.
(ii) Cumulative allocable contract costs.
(iii) Estimating total allocable contract costs.
(iv) Pre-contracting-year costs.
(v) Post-completion-year costs.
(6) 10-percent method.
(i) In general.
(ii) Election.
(7) Terminated contract.
(i) Reversal of income.
(ii) Adjusted basis.
(iii) Look-back method.
(c) Exempt contract methods.
(1) In general.
(2) Exempt-contract percentage-of-completion method.
(i) In general.
(ii) Determination of work performed.
(d) Completed-contract method.
(1) In general.
(2) Post-completion-year income and costs.
(3) Gross contract price.
(4) Contracts with disputed claims.
(i) In general.
(ii) Taxpayer assured of profit or loss.
(iii) Taxpayer unable to determine profit or loss.
(iv) Dispute resolved.
(e) Percentage-of-completion/capitalized-cost method.
(f) Alternative minimum taxable income.
(1) In general.
(2) Election to use regular completion factors.
(g) Method of accounting.
(h) Examples.
(i) [Reserved]

* * * * *

(k) Mid-contract change in taxpayer [Reserved]

§ 1.460–5 Cost allocation rules.

(a) Overview.
(b) Cost allocation method for contracts subject to PCM.
(1) In general.
(2) Special rules.
(i) Direct material costs.
(ii) Components and subassemblies.
(iii) Simplified production methods.
(iv) Costs identified under cost-plus long-term contracts and federal long-term contracts.
(v) Interest.
(A) In general.
(B) Production period.
(C) Application of section 263A(f).
(vi) Research and experimental expenses.
(vii) Service costs.
(A) Simplified service cost method.
(*1*) In general.
(*2*) Example.
(B) Jobsite costs.
(C) Limitation on other reasonable cost allocation methods.
(c) Simplified cost-to-cost method for contracts subject to the PCM.
(1) In general.
(2) Election.
(d) Cost allocation rules for exempt construction contracts reported using CCM.
(1) In general.
(2) Indirect costs.
(i) Indirect costs allocable to exempt construction contracts.

(ii) Indirect costs not allocable to exempt construction contracts.
(3) Large homebuilders.
(e) Cost allocation rules for contracts subject to the PCCM.
(f) Special rules applicable to costs allocated under this section.
(1) Nondeductible costs.
(2) Costs incurred for non-long-term contract activities.
(g) Method of accounting.

§ 1.460–6 Look-back method.

* * * * *

(f) * * *

(3) Statutes of limitations and compounding of interest on look-back interest.

* * * * *

Par. 6. Sections 1.460–1 through 1.460–3 are revised to read as follows:

§ 1.460–1 Long-term contracts.

(a) *Overview*—(1) *In general.* This section provides rules for determining whether a contract for the manufacture, building, installation, or construction of property is a long-term contract under section 460 and what activities must be accounted for as a single long-term contract. Specific rules for long-term manufacturing and construction contracts are provided in §§ 1.460–2 and 1.460–3, respectively. A taxpayer generally must determine the income from a long-term contract using the percentage-of-completion method described in § 1.460–4(b) (PCM) and the cost allocation rules described in § 1.460–5(b) or (c). In addition, after a contract subject to the PCM is completed, a taxpayer generally must apply the look-back method described in § 1.460-6 to determine the amount of interest owed on any hypothetical underpayment of tax, or earned on any hypothetical overpayment of tax, attributable to accounting for the long-term contract under the PCM.

(2) *Exceptions to required use of PCM*—(i) *Exempt construction contract.* The requirement to use the PCM does not apply to any exempt construction contract described in § 1.460–3(b). Thus, a taxpayer may determine the income from an exempt construction contract using any accounting method permitted by § 1.460–4(c) and, for contracts accounted for using the completed-contract method (CCM), any cost allocation method permitted by § 1.460–5(d). Exempt construction contracts that are not subject to the PCM or CCM are not subject to the cost allocation rules of § 1.460–5 except for the production-period interest rules of § 1.460–5(b)(2)(v). Exempt construction contractors that are large homebuilders described in § 1.460–5(d)(3) must capitalize costs under section 263A. All other exempt construction contractors must account for the cost of construction using the appropriate rules contained in other sections of the Internal Revenue Code or regulations.

(ii) *Qualified ship or residential construction contract.* The requirement to use the PCM applies only to a portion of a *qualified ship contract* described in § 1.460–2(d) or *residential construction contract* described in § 1.460–3(c). A taxpayer generally may determine the income from a qualified ship contract or residential construction contract using the percentage-of-completion/capitalized-cost method (PCCM) described in § 1.460–4(e), but must use a cost allocation method described in § 1.460–5(b) for the entire contract.

(b) *Terms*—(1) *Long-term contract. A long-term contract* generally is any contract for the manufacture, building, installation, or construction of property if the contract is not completed within the contracting year, as defined in paragraph (b)(5) of this section. However, a contract for the manufacture of property is a long-term contract only if it also satisfies either the unique item or 12-month requirements described in § 1.460–2. A contract for the manufacture of personal property is a *manufacturing contract.* In contrast, a contract for the building, installation, or construction of real property is a *construction contract.*

(2) *Contract for the manufacture, building, installation, or construction of property*—(i) *In general.* A contract is a *contract for the manufacture, building, installation, or construction of property* if the manufacture, building, installation, or construction of property is necessary for the taxpayer's contractual obligations to be fulfilled and if the manufacture, building, installation, or construction of that property has not been completed when the parties enter into the contract. If a taxpayer has to manufacture or construct an item to fulfill its obligations under the contract, the fact that the taxpayer is not required to deliver that item to the customer is not relevant. Whether the customer has title to, control over, or bears the risk of loss from, the property manufactured or constructed by the taxpayer also is not relevant. Furthermore, how the parties characterize their agreement (*e.g.,* as a contract for the sale of property) is not relevant.

(ii) *De minimis construction activities.* Notwithstanding paragraph (b)(2)(i) of this section, a contract is not a construction contract under section 460 if the contract includes the provision of land by the taxpayer and the estimated total allocable contract costs, as defined in paragraph (b)(3) of this section, attributable to the taxpayer's construction activities are less than 10 percent of the contract's total contract price, as defined in § 1.460–4(b)(4)(i). For the purposes of this paragraph (b)(2)(ii), the allocable contract costs attributable to the taxpayer's construction activities do not include the cost of the land provided to the customer. In addition, a contract's estimated total allocable contract costs include a proportionate share of the estimated cost of any common improvement that benefits the subject matter of the contract if the taxpayer is contractually obligated, or required by law, to construct the common improvement.

(3) *Allocable contract costs. Allocable contract costs* are costs that are allocable to a long-term contract under § 1.460–5.

(4) *Related party.* A *related party* is a person whose relationship to a taxpayer is described in section 707(b) or 267(b), determined without regard to section 267(f)(1)(A) and determined by replacing ''at least 80 percent'' with ''more than 50 percent'' for the purposes of determining the ownership of the stock of a corporation in sections 267(b)(2), (8), (10)(A), and (12).

(5) *Contracting year.* The *contracting year* is the taxable year in which a taxpayer enters into a contract as described in paragraph (c)(2) of this section.

(6) *Completion year.* The *completion year* is the taxable year in which a taxpayer completes a contract as described in paragraph (c)(3) of this section.

(7) *Contract commencement date.* The *contract commencement date* is the date that a taxpayer or related party first incurs any allocable contract costs, such as design and engineering costs, other than expenses attributable to bidding and negotiating activities. Generally, the contract commencement date is relevant in applying § 1.460–6(b)(3) (concerning the de minimis exception to the look-back method under section 460(b)(3)(B)); § 1.460–5(b)(2)(v)(B)(1)(*i*) (concerning the production period subject to interest allocation); § 1.460–2(d) (concerning qualified ship contracts); and § 1.460–3(b)(1)(ii) (concerning the construction period for exempt construction contracts).

(8) *Incurred. Incurred* has the meaning given in § 1.461–1(a)(2) (concerning the taxable year a liability is incurred under the accrual method of accounting), regardless of a taxpayer's overall method of accounting. See § 1.461–4(d)(2)(ii) for economic performance rules concerning the PCM.

(9) *Independent research and development expenses. Independent*

research and development expenses are any expenses incurred in the performance of research or development, except that this term does not include any expenses that are directly attributable to a particular long-term contract in existence when the expenses are incurred and this term does not include any expenses under an agreement to perform research or development.

(10) *Long-term contract methods of accounting. Long-term contract methods of accounting*, which include the PCM, the CCM, the PCCM, and the exempt-contract percentage-of-completion method (EPCM), are methods of accounting that may be used only for long-term contracts.

(c) *Entering into and completing long-term contracts*—(1) *In general.* To determine when a contract is entered into under paragraph (c)(2) of this section and completed under paragraph (c)(3) of this section, a taxpayer must consider all relevant allocable contract costs incurred and activities performed by itself, by related parties on its behalf, and by the customer, that are incident to or necessary for the long-term contract. In addition, to determine whether a contract is completed in the contracting year, the taxpayer may not consider when it expects to complete the contract.

(2) *Date contract entered into*—(i) *In general.* A taxpayer enters into a contract on the date that the contract binds both the taxpayer and the customer under applicable law, even if the contract is subject to unsatisfied conditions not within the taxpayer's control (such as obtaining financing). If a taxpayer delays entering into a contract for a principal purpose of avoiding section 460, however, the taxpayer will be treated as having entered into a contract not later than the contract commencement date.

(ii) *Options and change orders.* A taxpayer enters into a new contract on the date that the customer exercises an option or similar provision in a contract if that option or similar provision must be severed from the contract under paragraph (e) of this section. Similarly, a taxpayer enters into a new contract on the date that it accepts a change order or other similar agreement if the change order or other similar agreement must be severed from the contract under paragraph (e) of this section.

(3) *Date contract completed*—(i) *In general.* A taxpayer's contract is completed upon the earlier of—

(A) Use of the subject matter of the contract by the customer for its intended purpose (other than for testing) and at least 95 percent of the total allocable contract costs attributable to the subject matter have been incurred by the taxpayer; or

(B) Final completion and acceptance of the subject matter of the contract.

(ii) *Secondary items.* The date a contract accounted for using the CCM is completed is determined without regard to whether one or more secondary items have been used or finally completed and accepted. If any secondary items are incomplete at the end of the taxable year in which the primary subject matter of a contract is completed, the taxpayer must separate the portion of the gross contract price and the allocable contract costs attributable to the incomplete secondary item(s) from the completed contract and account for them using a permissible method of accounting. A permissible method of accounting includes a long-term contract method of accounting only if a separate contract for the secondary item(s) would be a long-term contract, as defined in paragraph (b)(1) of this section.

(iii) *Subcontracts.* In the case of a subcontract, a subcontractor's customer is the general contractor. Thus, the subject matter of the subcontract is the relevant subject matter under paragraph (c)(3)(i) of this section.

(iv) *Final completion and acceptance*—(A) *In general.* Except as otherwise provided in this paragraph (c)(3)(iv), to determine whether final completion and acceptance of the subject matter of a contract have occurred, a taxpayer must consider all relevant facts and circumstances. Nevertheless, a taxpayer may not delay the completion of a contract for the principal purpose of deferring federal income tax.

(B) *Contingent compensation.* Final completion and acceptance is determined without regard to any contractual term that provides for additional compensation that is contingent on the successful performance of the subject matter of the contract. A taxpayer must account for all contingent compensation that is not includible in total contract price under § 1.460–4(b)(4)(i), or in gross contract price under § 1.460–4(d)(3), using a permissible method of accounting. For application of the look-back method for contracts accounted for using the PCM, see § 1.460–6(c)(1)(ii) and (2)(vi).

(C) *Assembly or installation.* Final completion and acceptance is determined without regard to whether the taxpayer has an obligation to assist or supervise assembly or installation of the subject matter of the contract where the assembly or installation is not performed by the taxpayer or a related party. A taxpayer must account for the gross receipts and costs attributable to such an obligation using a permissible method of accounting, other than a long-term contract method.

(D) *Disputes.* Final completion and acceptance is determined without regard to whether a dispute exists at the time the taxpayer tenders the subject matter of the contract to the customer. For contracts accounted for using the CCM, see § 1.460–4(d)(4). For application of the look-back method for contracts accounted for using the PCM, see § 1.460–6(c)(1)(ii) and (2)(vi).

(d) *Allocation among activities*—(1) *In general.* Long-term contract methods of accounting apply only to the gross receipts and costs attributable to long-term contract activities. Gross receipts and costs attributable to long-term contract activities means amounts included in total contract price or gross contract price, whichever is applicable, as determined under § 1.460–4, and costs allocable to the contract, as determined under § 1.460–5. Gross receipts and costs attributable to non-long-term contract activities (as defined in paragraph (d)(2) of this section) generally must be taken into account using a permissible method of accounting other than a long-term contract method. See section 446(c) and § 1.446–1(c). However, if the performance of a non-long-term contract activity is incident to or necessary for the manufacture, building, installation, or construction of the subject matter of one or more of the taxpayer's long-term contracts, the gross receipts and costs attributable to that activity must be allocated to the long-term contract(s) benefitted as provided in §§ 1.460–4(b)(4)(i) and 1.460–5(f)(2), respectively. Similarly, if a single long-term contract requires a taxpayer to perform a non-long-term contract activity that is not incident to or necessary for the manufacture, building, installation, or construction of the subject matter of the long-term contract, the gross receipts and costs attributable to that non-long-term contract activity must be separated from the contract and accounted for using a permissible method of accounting other than a long-term contract method. But see paragraph (g) of this section for related party rules.

(2) *Non-long-term contract activity. Non-long-term contract activity* means the performance of an activity other than manufacturing, building, installation, or construction, such as the provision of architectural, design, engineering, and construction management services, and the development or implementation of computer software. In addition, performance under a guaranty,

warranty, or maintenance agreement is a non-long-term contract activity that is never incident to or necessary for the manufacture or construction of property under a long-term contract.

(e) *Severing and aggregating contracts*—(1) *In general.* After application of the allocation rules of paragraph (d) of this section, the severing and aggregating rules of this paragraph (e) may be applied by the Commissioner or the taxpayer as necessary to clearly reflect income (*e.g.*, to prevent the unreasonable deferral (or acceleration) of income or the premature recognition (or deferral) of loss). Under the severing and aggregating rules, one agreement may be treated as two or more contracts, and two or more agreements may be treated as one contract. Except as provided in paragraph (e)(3)(ii) of this section, a taxpayer must determine whether to sever an agreement or to aggregate two or more agreements based on the facts and circumstances known at the end of the contracting year.

(2) *Facts and circumstances.* Whether an agreement should be severed, or two or more agreements should be aggregated, depends on the following factors:

(i) *Pricing.* Independent pricing of items in an agreement is necessary for the agreement to be severed into two or more contracts. In the case of an agreement for similar items, if the price to be paid for the items is determined under different terms or formulas (e.g., if some items are priced under a cost-plus incentive fee arrangement and later items are to be priced under a fixed-price arrangement), then the difference in the pricing terms or formulas indicates that the items are independently priced. Similarly, interdependent pricing of items in separate agreements is necessary for two or more agreements to be aggregated into one contract. A single price negotiation for similar items ordered under one or more agreements indicates that the items are interdependently priced.

(ii) *Separate delivery or acceptance.* An agreement may not be severed into two or more contracts unless it provides for separate delivery or separate acceptance of items that are the subject matter of the agreement. However, the separate delivery or separate acceptance of items by itself does not necessarily require an agreement to be severed.

(iii) *Reasonable businessperson.* Two or more agreements to perform manufacturing or construction activities may not be aggregated into one contract unless a reasonable businessperson would not have entered into one of the agreements for the terms agreed upon without also entering into the other agreement(s). Similarly, an agreement to perform manufacturing or construction activities may not be severed into two or more contracts if a reasonable businessperson would not have entered into separate agreements containing terms allocable to each severed contract. Analyzing the reasonable businessperson standard requires an analysis of all the facts and circumstances of the business arrangement between the taxpayer and the customer. For purposes of this paragraph (e)(2)(iii), a taxpayer's expectation that the parties would enter into another agreement, when agreeing to the terms contained in the first agreement, is not relevant.

(3) *Exceptions*—(i) *Severance for PCM.* A taxpayer may not sever under this paragraph (e) a long-term contract that would be subject to the PCM without obtaining the Commissioner's prior written consent.

(ii) *Options and change orders.* Except as provided in paragraph (e)(3)(i) of this section, a taxpayer must sever an agreement that increases the number of units to be supplied to the customer, such as through the exercise of an option or the acceptance of a change order, if the agreement provides for separate delivery or separate acceptance of the additional units.

(4) *Statement with return.* If a taxpayer severs an agreement or aggregates two or more agreements under this paragraph (e) during the taxable year, the taxpayer must attach a statement to its original federal income tax return for that year. This statement must contain the following information—

(i) The legend NOTIFICATION OF SEVERANCE OR AGGREGATION UNDER SEC. 1.460–1(e);

(ii) The taxpayer's name; and

(iii) The taxpayer's employer identification number or social security number.

(f) *Classifying contracts*—(1) *In general.* After applying the severing and aggregating rules of paragraph (e) of this section, a taxpayer must determine the classification of a contract (*e.g.*, as a long-term manufacturing contract, long-term construction contract, non-long-term contract) based on all the facts and circumstances known no later than the end of the contracting year. Classification is determined on a contract-by-contract basis. Consequently, a requirement to manufacture a single unique item under a long-term contract will subject all other items in that contract to section 460.

(2) *Hybrid contracts*—(i) *In general.* A long-term contract that requires a taxpayer to perform both manufacturing and construction activities (hybrid contract) generally must be classified as two contracts, a manufacturing contract and a construction contract. A taxpayer may elect, on a contract-by-contract basis, to classify a hybrid contract as a long-term construction contract if at least 95 percent of the estimated total allocable contract costs are reasonably allocable to construction activities. In addition, a taxpayer may elect, on a contract-by-contract basis, to classify a hybrid contract as a long-term manufacturing contract subject to the PCM.

(ii) *Elections.* A taxpayer makes an election under this paragraph (f)(2) by using its method of accounting for similar construction contracts or for manufacturing contracts, whichever is applicable, to account for a hybrid contract entered into during the taxable year of the election on its original federal income tax return for the election year. If an electing taxpayer's method is the PCM, the taxpayer also must use the PCM to apply the look-back method under § 1.460–6 and to determine alternative minimum taxable income under § 1.460–4(f).

(3) *Method of accounting.* Except as provided in paragraph (f)(2)(ii) of this section, a taxpayer's method of classifying contracts is a method of accounting under section 446 and, thus, may not be changed without the Commissioner's consent. If a taxpayer's method of classifying contracts is unreasonable, that classification method is an impermissible accounting method.

(4) *Use of estimates*—(i) *Estimating length of contract.* A taxpayer must use a reasonable estimate of the time required to complete a contract when necessary to classify the contract (e.g., to determine whether the five-year completion rule for qualified ship contracts under § 1.460–2(d), or the two-year completion rule for exempt construction contracts under § 1.460–3(b), is satisfied, but not to determine whether a contract is completed within the contracting year under paragraph (b)(1) of this section). To be considered reasonable, an estimate of the time required to complete the contract must include anticipated time for delay, rework, change orders, technology or design problems, or other problems that reasonably can be anticipated considering the nature of the contract and prior experience. A contract term that specifies an expected completion or delivery date may be considered evidence that the taxpayer reasonably expects to complete or deliver the

subject matter of the contract on or about the date specified, especially if the contract provides bona fide penalties for failing to meet the specified date. If a taxpayer classifies a contract based on a reasonable estimate of completion time, the contract will not be reclassified based on the actual (or another reasonable estimate of) completion time. A taxpayer's estimate of completion time will not be considered unreasonable if a contract is not completed within the estimated time primarily because of unforeseeable factors not within the taxpayer's control, such as third-party litigation, extreme weather conditions, strikes, or delays in securing permits or licenses.

(ii) *Estimating allocable contract costs.* A taxpayer must use a reasonable estimate of total allocable contract costs when necessary to classify the contract (e.g., to determine whether a contract is a home construction contract under § 1.460–(3)(b)(2)). If a taxpayer classifies a contract based on a reasonable estimate of total allocable contract costs, the contract will not be reclassified based on the actual (or another reasonable estimate of) total allocable contract costs.

(g) *Special rules for activities benefitting long-term contracts of a related party*—(1) *Related party use of PCM*—(i) *In general.* Except as provided in paragraph (g)(1)(ii) of this section, if a related party and its customer enter into a long-term contract subject to the PCM, and a taxpayer performs any activity that is incident to or necessary for the related party's long-term contract, the taxpayer must account for the gross receipts and costs attributable to this activity using the PCM, even if this activity is not otherwise subject to section 460(a). This type of activity may include, for example, the performance of engineering and design services, and the production of components and subassemblies that are reasonably expected to be used in the production of the subject matter of the related party's contract.

(ii) *Exception for components and subassemblies.* A taxpayer is not required to use the PCM under this paragraph (g) to account for a component or subassembly that benefits a related party's long-term contract if more than 50 percent of the average annual gross receipts attributable to the sale of this item for the 3-taxable-year-period ending with the contracting year comes from unrelated parties.

(2) *Total contract price.* If a taxpayer is required to use the PCM under paragraph (g)(1)(i) of this section, the total contract price (as defined in § 1.460–4(b)(4)(i)) is the fair market value of the taxpayer's activity that is incident to or necessary for the performance of the related party's long-term contract. The related party also must use the fair market value of the taxpayer's activity as the cost it incurs for the activity. The fair market value of the taxpayer's activity may or may not be the same as the amount the related party pays the taxpayer for that activity.

(3) *Completion factor.* To compute a contract's completion factor (as described in § 1.460–4(b)(5)), the related party must take into account the fair market value of the taxpayer's activity that is incident to or necessary for the performance of the related party's long-term contract when the related party incurs the liability to the taxpayer for the activity, rather than when the taxpayer incurs the costs to perform the activity.

(h) *Effective date*—(1) *In general.* Except as otherwise provided, this section and §§ 1.460–2 through 1.460–5 are applicable for contracts entered into on or after January 11, 2001.

(2) *Change in method of accounting.* Any change in a taxpayer's method of accounting necessary to comply with this section and §§ 1.460–2 through 1.460–5 is a change in method of accounting to which the provisions of section 446 and the regulations thereunder apply. For the first taxable year that includes January 11, 2001, a taxpayer is granted the consent of the Commissioner to change its method of accounting to comply with the provisions of this section and §§ 1.460–2 through 1.460–5 for long-term contracts entered into on or after January 11, 2001. A taxpayer that wants to change its method of accounting under this paragraph (h)(2) must follow the automatic consent procedures in Rev. Proc. 99–49 (1999–52 I.R.B. 725) (see § 601.601(d)(2) of this chapter), except that the scope limitations in section 4.02 of Rev. Proc. 99–49 do not apply. Because a change under this paragraph (h)(2) is made on a cut-off basis, a section 481(a) adjustment is not permitted or required. Moreover, the taxpayer does not receive audit protection under section 7 of Rev. Proc. 99–49 for a change in method of accounting under this paragraph (h)(2). A taxpayer that wants to change its exempt-contract method of accounting is not granted the consent of the Commissioner under this paragraph (h)(2) and must file a Form 3115, ''Application for Change in Accounting Method,'' to obtain consent. See Rev. Proc. 97–27 (1997–1 C.B. 680) (see § 601.601(d)(2) of this chapter).

(i) [Reserved]

(j) *Examples.* The following examples illustrate the rules of this section:

Example 1. Contract for manufacture of property. B notifies C, an aircraft manufacturer, that it wants to purchase an aircraft of a particular type. At the time C receives the order, C has on hand several partially completed aircraft of this type; however, C does not have any completed aircraft of this type on hand. C and B agree that B will purchase one of these aircraft after it has been completed. C retains title to and risk of loss with respect to the aircraft until the sale takes place. The agreement between C and B is a contract for the manufacture of property under paragraph (b)(2)(i) of this section, even if labeled as a contract for the sale of property, because the manufacture of the aircraft is necessary for C's obligations under the agreement to be fulfilled and the manufacturing was not complete when B and C entered into the agreement.

Example 2. De minimis construction activity. C, a master developer whose taxable year ends December 31, owns 5,000 acres of undeveloped land with a cost basis of $5,000,000 and a fair market value of $50,000,000. To obtain permission from the local county government to improve this land, a service road must be constructed on this land to benefit all 5,000 acres. In 2001, C enters into a contract to sell a 1,000-acre parcel of undeveloped land to B, a residential developer, for its fair market value, $10,000,000. In this contract, C agrees to construct a service road running through the land that C is selling to B and through the 4,000 adjacent acres of undeveloped land that C has sold or will sell to other residential developers for its fair market value, $40,000,000. C reasonably estimates that it will incur allocable contract costs of $50,000 (excluding the cost of the land) to construct this service road, which will be owned and maintained by the county. C must reasonably allocate the cost of the service road among the benefitted parcels. The portion of the estimated total allocable contract costs that C allocates to the 1,000-acre parcel being sold to B (based upon its fair market value) is $10,000 ($50,000 x ($10,000,000 $50,000,000)). Construction of the service road is finished in 2002. Because the estimated total allocable contract costs attributable to C's construction activities, $10,000, are less than 10 percent of the contract's total contract price, $10,000,000, C's contract with B is not a construction contract under paragraph (b)(2)(ii) of this section. Thus, C's contract with B is not a long-term contract under paragraph (b)(2)(i) of this section, notwithstanding that construction of the service road is not completed in 2001.

Example 3. Completion—customer use. In 2002, C, whose taxable year ends December 31, enters into a contract to construct a building for B. In November of 2003, the building is completed in every respect necessary for its intended use, and B occupies the building. In early December of 2003, B notifies C of some minor deficiencies that need to be corrected, and C agrees to correct them in January 2004. C reasonably estimates that the cost of correcting these deficiencies will be less than five percent of

the total allocable contract costs. C's contract is complete under paragraph (c)(3)(i)(A) of this section in 2003 because in that year, B used the building and C had incurred at least 95 percent of the total allocable contract costs attributable to the building. C must use a permissible method of accounting for any deficiency-related costs incurred after 2003.

Example 4. Completion—customer use. In 2001, C, whose taxable year ends December 31, agrees to construct a shopping center, which includes an adjoining parking lot, for B. By October 2002, C has finished constructing the retail portion of the shopping center. By December 2002, C has graded the entire parking lot, but has paved only one-fourth of it because inclement weather conditions prevented C from laying asphalt on the remaining three-fourths. In December 2002, B opens the retail portion of the shopping center and the paved portion of the parking lot to the general public. C reasonably estimates that the cost of paving the remaining three-fourths of the parking lot when weather permits will exceed five percent of C's total allocable contract costs. Even though B is using the subject matter of the contract, C's contract is not completed in December 2002 under paragraph (c)(3)(i)(A) of this section because C has not incurred at least 95 percent of the total allocable contract costs attributable to the subject matter.

Example 5. Completion—customer use. In 2001, C, whose taxable year ends December 31, agrees to manufacture 100 machines for B. By December 31, 2002, C has delivered 99 of the machines to B. C reasonably estimates that the cost of finishing the related work on the contract will be less than five percent of the total allocable contract costs. C's contract is not complete under paragraph (c)(3)(i)(A) of this section in 2002 because in that year, B is not using the subject matter of the contract (all 100 machines) for its intended purpose.

Example 6. Non-long-term contract activity. On January 1, 2001, C, whose taxable year ends December 31, enters into a single long-term contract to design and manufacture a satellite and to develop computer software enabling B to operate the satellite. At the end of 2001, C has not finished manufacturing the satellite. Designing the satellite and developing the computer software are non-long-term contract activities that are incident to and necessary for the taxpayer's manufacturing of the subject matter of a long-term contract because the satellite could not be manufactured without the design and would not operate without the software. Thus, under paragraph (d)(1) of this section, C must allocate these non-long-term contract activities to the long-term contract and account for the gross receipts and costs attributable to designing the satellite and developing computer software using the PCM.

Example 7. Non-long-term contract activity. C agrees to manufacture equipment for B under a long-term contract. In a separate contract, C agrees to design the equipment being manufactured for B under the long-term contract. Under paragraph (d)(1) of this section, C must allocate the gross receipts and costs related to the design to the long-term contract because designing the equipment is a non-long-term contract activity that is incident to and necessary for the manufacture of the subject matter of the long-term contract.

Example 8. Severance. On January 1, 2001, C, a construction contractor, and B, a real estate investor, enter into an agreement requiring C to build two office buildings in different areas of a large city. The agreement provides that the two office buildings will be completed by C and accepted by B in 2002 and 2003, respectively, and that C will be paid $1,000,000 and $1,500,000 for the two office buildings, respectively. The agreement will provide C with a reasonable profit from the construction of each building. Unless C is required to use the PCM to account for the contract, C is required to sever this contract under paragraph (e)(2) of this section because the buildings are independently priced, the agreement provides for separate delivery and acceptance of the buildings, and, as each building will generate a reasonable profit, a reasonable businessperson would have entered into separate agreements for the terms agreed upon for each building.

Example 9. Severance. C, a large construction contractor whose taxable year ends December 31, accounts for its construction contracts using the PCM and has elected to use the 10-percent method described in § 1.460–4(b)(6). In September 2001, C enters into an agreement to construct four buildings in four different cities. The buildings are independently priced and the contract provides a reasonable profit for each of the buildings. In addition, the agreement requires C to complete one building per year in 2002, 2003, 2004, and 2005. As of December 31, 2001, C has incurred 25 percent of the estimated total allocable contract costs attributable to one of the buildings, but only five percent of the estimated total allocable contract costs attributable to all four buildings included in the agreement. C does not request the Commissioner's consent to sever this contract. Using the 10-percent method, C does not take into account any portion of the total contract price or any incurred allocable contract costs attributable to this agreement in 2001. Upon examination of C's 2001 tax return, the Commissioner determines that C entered into one agreement for four buildings rather than four separate agreements each for one building solely to take advantage of the deferral obtained under the 10-percent method. Consequently, to clearly reflect the taxpayer's income, the Commissioner may require C to sever the agreement into four separate contracts under paragraph (e)(2) of this section because the buildings are independently priced, the agreement provides for separate delivery and acceptance of the buildings, and a reasonable businessperson would have entered into separate agreements for these buildings.

Example 10. Aggregation. In 2001, C, a shipbuilder, enters into two agreements with the Department of the Navy as the result of a single negotiation. Each agreement obligates C to manufacture a submarine. Because the submarines are of the same class, their specifications are similar. Because C has never manufactured submarines of this class, however, C anticipates that it will incur substantially higher costs to manufacture the first submarine, to be delivered in 2007, than to manufacture the second submarine, to be delivered in 2010. If the agreements are treated as separate contracts, the first contract probably will produce a substantial loss, while the second contract probably will produce substantial profit. Based upon these facts, aggregation is required under paragraph (e)(2) of this section because the submarines are interdependently priced and a reasonable businessperson would not have entered the first agreement without also entering into the second.

Example 11. Aggregation. In 2001, C, a manufacturer of aircraft and related equipment, agrees to manufacture 10 military aircraft for foreign government B and to deliver the aircraft by the end of 2003. When entering into the agreement, C anticipates that it might receive production orders from B over the next 20 years for as many as 300 more of these aircraft. The negotiated contract price reflects C's and B's consideration of the expected total cost of manufacturing the 10 aircraft, the risks and opportunities associated with the agreement, and the additional factors the parties considered relevant. The negotiated price provides a profit on the sale of the 10 aircraft even if C does not receive any additional production orders from B. It is unlikely, however, that C actually would have wanted to manufacture the 10 aircraft but for the expectation that it would receive additional production orders from B. In 2003, B accepts delivery of the 10 aircraft. At that time, B orders an additional 20 aircraft of the same type for delivery in 2007. When negotiating the price for the additional 20 aircraft, C and B consider the fact that the expected unit cost for this production run of 20 aircraft will be lower than the unit cost of the 10 aircraft completed and accepted in 2003, but substantially higher than the expected unit cost of future production runs. Based upon these facts, aggregation is not permitted under paragraph (e)(2) of this section. Because the parties negotiated the prices of both agreements considering only the expected production costs and risks for each agreement standing alone, the terms and conditions agreed upon for the first agreement are independent of the terms and conditions agreed upon for the second agreement. The fact that the agreement to manufacture 10 aircraft provides a profit for C indicates that a reasonable businessperson would have entered into that agreement without entering into the agreement to manufacture the additional 20 aircraft.

Example 12. Classification and completion. In 2001, C, whose taxable year ends December 31, agrees to manufacture and install an industrial machine for B. C elects under paragraph (f) of this section to classify the agreement as a long-term manufacturing contract and to account for it using the PCM. The agreement requires C to deliver the machine in August 2003 and to install and test the machine in B's factory. In addition, the agreement requires B to accept the machine when the tests prove that the machine's performance will satisfy the environmental standards set by the Environmental Protection Agency (EPA),

even if B has not obtained the required operating permit. Because of technical difficulties, C cannot deliver the machine until December 2003, when B conditionally accepts delivery. C installs the machine in December 2003 and then tests it through February 2004. B accepts the machine in February 2004, but does not obtain the operating permit from the EPA until January 2005. Under paragraph (c)(3)(i)(B) of this section, C's contract is finally completed and accepted in February 2004, even though B does not obtain the operating permit until January 2005, because C completed all its obligations under the contract and B accepted the machine in February 2004.

§ 1.460–2 Long-term manufacturing contracts.

(a) *In general.* Section 460 generally requires a taxpayer to determine the income from a long-term manufacturing contract using the percentage-of-completion method described in § 1.460–4(b) (PCM). A contract not completed in the contracting year is a long-term manufacturing contract if it involves the manufacture of personal property that is—

(1) A unique item of a type that is not normally carried in the finished goods inventory of the taxpayer; or

(2) An item that normally requires more than 12 calendar months to complete (regardless of the duration of the contract or the time to complete a deliverable quantity of the item).

(b) *Unique*—(1) *In general. Unique* means designed for the needs of a specific customer. To determine whether an item is designed for the needs of a specific customer, a taxpayer must consider the extent to which research, development, design, engineering, retooling, and similar activities (customizing activities) are required to manufacture the item and whether the item could be sold to other customers with little or no modification. A contract may require the taxpayer to manufacture more than one unit of a unique item. If a contract requires a taxpayer to manufacture more than one unit of the same item, the taxpayer must determine whether that item is unique by considering the customizing activities that would be needed to produce only the first unit. For the purposes of this paragraph (b), a taxpayer must consider the activities performed on its behalf by a subcontractor.

(2) *Safe harbors.* Notwithstanding paragraph (b)(1) of this section, an item is not unique if it satisfies one or more of the safe harbors in this paragraph (b)(2). If an item does not satisfy one or more safe harbors, the determination of uniqueness will depend on the facts and circumstances. The safe harbors are:

(i) *Short production period.* An item is not unique if it normally requires 90 days or less to complete. In the case of a contract for multiple units of an item, the item is not unique only if it normally requires 90 days or less to complete each unit of the item in the contract.

(ii) *Customized item.* An item is not unique if the total allocable contract costs attributable to customizing activities that are incident to or necessary for the manufacture of the item do not exceed 10 percent of the estimated total allocable contract costs allocable to the item. In the case of a contract for multiple units of an item, this comparison must be performed on the first unit of the item and the total allocable contract costs attributable to customizing activities that are incident to or necessary for the manufacture of the item must be allocated to the first unit.

(iii) *Inventoried item.* A unique item ceases to be unique no later than when the taxpayer normally includes similar items in its finished goods inventory.

(c) *Normal time to complete*—(1) *In general.* The amount of time normally required to complete an item is the item's reasonably expected *production period,* as described in § 1.263A–12, determined at the end of the contracting year. Thus, in general, the expected production period for an item begins when a taxpayer incurs at least five percent of the costs that would be allocable to the item under § 1.460–5 and ends when the item is ready to be held for sale and all reasonably expected production activities are complete. In the case of components that are assembled or reassembled into an item or unit at the customer's facility by the taxpayer's employees or agents, the production period ends when the components are assembled or reassembled into an operable item or unit. To the extent that several distinct activities related to the production of the item are expected to occur simultaneously, the period during which these distinct activities occur is not counted more than once. Furthermore, when determining the normal time to complete an item, a taxpayer is not required to consider activities performed or costs incurred that would not be allocable contract costs under section 460 (*e.g.,* independent research and development expenses (as defined in § 1.460–1(b)(9)) and marketing expenses). Moreover, the time required to design and manufacture the first unit of an item for which the taxpayer intends to produce multiple units generally does not indicate the normal time to complete the item.

(2) *Production by related parties.* To determine the time normally required to complete an item, a taxpayer must consider all relevant production activities performed and costs incurred by itself and by related parties, as defined in § 1.460–1(b)(4). For example, if a taxpayer's item requires a component or subassembly manufactured by a related party, the taxpayer must consider the time the related party takes to complete the component or subassembly and, for purposes of determining the beginning of an item's production period, the costs incurred by the related party that are allocable to the component or subassembly. However, if both requirements of the exception for components and subassemblies under § 1.460–1(g)(1)(ii) are satisfied, a taxpayer does not consider the activities performed or the costs incurred by a related party when determining the normal time to complete an item.

(d) *Qualified ship contracts.* A taxpayer may determine the income from a long-term manufacturing contract that is a qualified ship contract using either the PCM or the percentage-of-completion/capitalized-cost method (PCCM) of accounting described in § 1.460–4(e). A *qualified ship contract* is any contract entered into after February 28, 1986, to manufacture in the United States not more than 5 seagoing vessels if the vessels will not be manufactured directly or indirectly for the United States Government and if the taxpayer reasonably expects to complete the contract within 5 years of the contract commencement date. Under § 1.460–1(e)(3)(i), a contract to produce more than 5 vessels for which the PCM would be required cannot be severed in order to be classified as a qualified ship contract.

(e) *Examples.* The following examples illustrate the rules of this section:

Example 1. Unique item and classification. In December 2001, C enters into a contract with B to design and manufacture a new type of industrial equipment. C reasonably expects the normal production period for this type of equipment to be eight months. Because the new type of industrial equipment requires a substantial amount of research, design, and engineering to produce, C determines that the equipment is a unique item and its contract with B is a long-term contract. After delivering the equipment to B in September 2002, C contracts with B to produce five additional units of that industrial equipment with certain different specifications. These additional units, which also are expected to take eight months to produce, will be delivered to B in 2003. C determines that the research, design,

engineering, retooling, and similar customizing costs necessary to produce the five additional units of equipment does not exceed 10 percent of the first unit's share of estimated total allocable contract costs. Consequently, the additional units of equipment satisfy the safe harbor in paragraph (b)(2)(ii) of this section and are not unique items. Although C's contract with B to produce the five additional units is not completed within the contracting year, the contract is not a long-term contract since the additional units of equipment are not unique items and do not normally require more than 12 months to produce. C must classify its second contract with B as a non-long term contract, notwithstanding that it classified the previous contract with B for a similar item as a long-term contract, because the determination of whether a contract is a long-term contract is made on a contract-by-contract basis. A change in classification is not a change in method of accounting because the change in classification results from a change in underlying facts.

Example 2. 12-month rule—related party. C manufactures cranes. C purchases one of the crane's components from R, a related party under § 1.460–1(b)(4). Less than 50 percent of R's gross receipts attributable to the sale of this component comes from sales to unrelated parties; thus, the exception for components and subassemblies under § 1.460–1(g)(1)(ii) is not satisfied. Consequently, C must consider the activities of R as R incurs costs and performs the activities rather than as C incurs a liability to R. The normal time period between the time that both C and R incur five percent of the costs allocable to the crane and the time that R completes the component is five months. C normally requires an additional eight months to complete production of the crane after receiving the integral component from R. C's crane is an item of a type that normally requires more than 12 months to complete under paragraph (c) of this section because the production period from the time that both C and R incur five percent of the costs allocable to the crane until the time that production of the crane is complete is normally 13 months.

Example 3. 12-month rule—duration of contract. The facts are the same as in *Example 2,* except that C enters into a sales contract with B on December 31, 2001 (the last day of C's taxable year), and delivers a completed crane to B on February 1, 2002. C's contract with B is a long-term contract under paragraph (a)(2) of this section because the contract is not completed in the contracting year, 2001, and the crane is an item that normally requires more than 12 calendar months to complete (regardless of the duration of the contract).

Example 4. 12-month rule—normal time to complete. The facts are the same as in *Example 2,* except that C (and R) actually complete B's crane in only 10 calendar months. The contract is a long-term contract because the normal time to complete a crane, not the actual time to complete a crane, is the relevant criterion for determining whether an item is subject to paragraph (a)(2) of this section.

Example 5. Normal time to complete. C enters into a multi-unit contract to produce four units of an item. C does not anticipate producing any additional units of the item. C expects to perform the research, design, and development that are directly allocable to the particular item and to produce the first unit in the first 24 months. C reasonably expects the production period for each of the three remaining units will be 3 months. This contract is not a contract that involves the manufacture of an item that normally requires more than 12 months to complete because the normal time to complete the item is 3 months. However, the contract does not satisfy the 90-day safe harbor for unique items because the normal time to complete the first unit of this item exceeds 90 days. Thus, the contract might involve the manufacture of a unique item depending on the facts and circumstances.

§ 1.460–3 Long-term construction contracts.

(a) *In general.* Section 460 generally requires a taxpayer to determine the income from a long-term construction contract using the percentage-of-completion method described in § 1.460–4(b) (PCM). A contract not completed in the contracting year is a long-term construction contract if it involves the building, construction, reconstruction, or rehabilitation of real property; the installation of an integral component to real property; or the improvement of real property (collectively referred to as construction). *Real property* means land, buildings, and *inherently permanent structures*, as defined in § 1.263A–8(c)(3), such as roadways, dams, and bridges. Real property does not include vessels, offshore drilling platforms, or unsevered natural products of land. An *integral component to real property* includes property not produced at the site of the real property but intended to be permanently affixed to the real property, such as elevators and central heating and cooling systems. Thus, for example, a contract to install an elevator in a building is a construction contract because a building is real property, but a contract to install an elevator in a ship is not a construction contract because a ship is not real property.

(b) *Exempt construction contracts*—(1) *In general.* The general requirement to use the PCM and the cost allocation rules described in § 1.460–5(b) or (c) does not apply to any long-term construction contract described in this paragraph (b) (exempt construction contract). *Exempt construction contract* means any—

(i) Home construction contract; and

(ii) Other construction contract that a taxpayer estimates (when entering into the contract) will be completed within 2 years of the contract commencement date, provided the taxpayer satisfies the $10,000,000 gross receipts test described in paragraph (b)(3) of this section.

(2) *Home construction contract*—(i) *In general.* A long-term construction contract is a *home construction contract* if a taxpayer (including a subcontractor working for a general contractor) reasonably expects to attribute 80 percent or more of the estimated total allocable contract costs (including the cost of land, materials, and services), determined as of the close of the contracting year, to the construction of—

(A) Dwelling units, as defined in section 168(e)(2)(A)(ii)(I), contained in buildings containing 4 or fewer dwelling units (including buildings with 4 or fewer dwelling units that also have commercial units); and

(B) Improvements to real property directly related to, and located at the site of, the dwelling units.

(ii) *Townhouses and rowhouses.* Each townhouse or rowhouse is a separate building.

(iii) *Common improvements.* A taxpayer includes in the cost of the dwelling units their allocable share of the cost that the taxpayer reasonably expects to incur for any common improvements (e.g., sewers, roads, clubhouses) that benefit the dwelling units and that the taxpayer is contractually obligated, or required by law, to construct within the tract or tracts of land that contain the dwelling units.

(iv) *Mixed use costs.* If a contract involves the construction of both commercial units and dwelling units within the same building, a taxpayer must allocate the costs among the commercial units and dwelling units using a reasonable method or combination of reasonable methods, such as specific identification, square footage, or fair market value.

(3) *$10,000,000 gross receipts test*—(i) *In general.* Except as otherwise provided in paragraphs (b)(3)(ii) and (iii) of this section, the $10,000,000 gross receipts test is satisfied if a taxpayer's (or predecessor's) average annual gross receipts for the 3 taxable years preceding the contracting year do not exceed $10,000,000, as determined using the principles of the gross receipts test for small resellers under § 1.263A–3(b).

(ii) *Single employer.* To apply the gross receipts test, a taxpayer is not required to aggregate the gross receipts of persons treated as a single employer solely under section 414(m) and any regulations prescribed under section 414.

(iii) *Attribution of gross receipts.* A taxpayer must aggregate a proportionate

share of the construction-related gross receipts of any person that has a five percent or greater interest in the taxpayer. In addition, a taxpayer must aggregate a proportionate share of the construction-related gross receipts of any person in which the taxpayer has a five percent or greater interest. For this purpose, a taxpayer must determine ownership interests as of the first day of the taxpayer's contracting year and must include indirect interests in any corporation, partnership, estate, trust, or sole proprietorship according to principles similar to the constructive ownership rules under sections 1563(e), (f)(2), and (f)(3)(A). However, a taxpayer is not required to aggregate under this paragraph (b)(3)(iii) any construction-related gross receipts required to be aggregated under paragraph (b)(3)(i) of this section.

(c) *Residential construction contracts.* A taxpayer may determine the income from a long-term construction contract that is a residential construction contract using either the PCM or the percentage-of-completion/capitalized-cost method (PCCM) of accounting described in § 1.460–4(e). A *residential construction contract* is a home construction contract, as defined in paragraph (b)(2) of this section, except that the building or buildings being constructed contain more than 4 dwelling units.

Par. 7. Section 1.460–4 is amended by adding paragraphs (a) through (i) to read as follows:

§ 1.460–4 Methods of accounting for long-term contracts.

(a) *Overview.* This section prescribes permissible methods of accounting for long-term contracts. Paragraph (b) of this section describes the percentage-of-completion method under section 460(b) (PCM) that a taxpayer generally must use to determine the income from a long-term contract. Paragraph (c) of this section lists permissible methods of accounting for exempt construction contracts described in § 1.460–3(b)(1) and describes the exempt-contract percentage-of-completion method (EPCM). Paragraph (d) of this section describes the completed-contract method (CCM), which is one of the permissible methods of accounting for exempt construction contracts. Paragraph (e) of this section describes the percentage-of-completion/capitalized-cost method (PCCM), which is a permissible method of accounting for qualified ship contracts described in § 1.460–2(d) and residential construction contracts described in § 1.460–3(c). Paragraph (f) of this section provides rules for determining the alternative minimum taxable income (AMTI) from long-term contracts that are not exempted under section 56. Paragraph (g) of this section provides rules concerning consistency in methods of accounting for long-term contracts. Paragraph (h) of this section provides examples illustrating the principles of this section. Paragraph (j) of this section provides rules for taxpayers that file consolidated tax returns.

(b) *Percentage-of-completion method*—(1) *In general.* Under the PCM, a taxpayer generally must include in income the portion of the *total contract price,* as defined in paragraph (b)(4)(i) of this section, that corresponds to the percentage of the entire contract that the taxpayer has completed during the taxable year. The percentage of completion must be determined by comparing allocable contract costs incurred with estimated total allocable contract costs. Thus, the taxpayer includes a portion of the total contract price in gross income as the taxpayer incurs allocable contract costs.

(2) *Computations.* To determine the income from a long-term contract, a taxpayer—

(i) Computes the *completion factor* for the contract, which is the ratio of the cumulative allocable contract costs that the taxpayer has incurred through the end of the taxable year to the estimated total allocable contract costs that the taxpayer reasonably expects to incur under the contract;

(ii) Computes the amount of *cumulative gross receipts* from the contract by multiplying the completion factor by the total contract price;

(iii) Computes the amount of *current-year gross receipts,* which is the difference between the amount of cumulative gross receipts for the current taxable year and the amount of cumulative gross receipts for the immediately preceding taxable year (the difference can be a positive or negative number); and

(iv) Takes both the current-year gross receipts and the allocable contract costs incurred during the current year into account in computing taxable income.

(3) *Post-completion-year income.* If a taxpayer has not included the total contract price in gross income by the completion year, as defined in § 1.460–1(b)(6), the taxpayer must include the remaining portion of the total contract price in gross income for the taxable year following the completion year. For the treatment of post-completion costs, see paragraph (b)(5)(v) of this section. See § 1.460–6(c)(1)(ii) for application of the look-back method as a result of adjustments to total contract price.

(4) *Total contract price*—(i) *In general*—(A) *Definition. Total contract price* means the amount that a taxpayer reasonably expects to receive under a long-term contract, including holdbacks, retainages, and cost reimbursements. See § 1.460–6(c)(1)(ii) and (2)(vi) for application of the look-back method as a result of changes in total contract price.

(B) *Contingent compensation.* Any amount related to a contingent right under a contract, such as a bonus, award, incentive payment, and amount in dispute, is included in total contract price as soon as the taxpayer can reasonably predict that the amount will be earned, even if the all events test has not yet been met. For example, if a bonus is payable to a taxpayer for meeting an early completion date, the bonus is includible in total contract price at the time and to the extent that the taxpayer can reasonably predict the achievement of the corresponding objective. Similarly, a portion of the contract price that is in dispute is includible in total contract price at the time and to the extent that the taxpayer can reasonably predict that the dispute will be resolved in the taxpayer's favor (regardless of when the taxpayer actually receives payment or when the dispute is finally resolved). Total contract price does not include compensation that might be earned under any other agreement that the taxpayer expects to obtain from the same customer (*e.g.*, exercised option or follow-on contract) if that other agreement is not aggregated under § 1.460–1(e). For the purposes of this paragraph (b)(4)(i)(B), a taxpayer can reasonably predict that an amount of contingent income will be earned not later than when the taxpayer includes that amount in income for financial reporting purposes under generally accepted accounting principles. If a taxpayer has not included an amount of contingent compensation in total contract price under this paragraph (b)(4)(i) by the taxable year following the completion year, the taxpayer must account for that amount of contingent compensation using a permissible method of accounting. If it is determined after the taxable year following the completion year that an amount included in total contract price will not be earned, the taxpayer should deduct that amount in the year of the determination.

(C) *Non-long-term contract activities.* Total contract price includes an allocable share of the gross receipts attributable to a non-long-term contract activity, as defined in § 1.460–1(d)(2), if the activity is incident to or necessary

for the manufacture, building, installation, or construction of the subject matter of the long-term contract. Total contract price also includes amounts reimbursed for independent research and development expenses (as defined in § 1.460–1(b)(9)), or for bidding and proposal costs, under a federal or cost-plus long-term contract (as defined in section 460(d)), regardless of whether the research and development, or bidding and proposal, activities are incident to or necessary for the performance of that long-term contract.

(ii) *Estimating total contract price.* A taxpayer must estimate the total contract price based upon all the facts and circumstances known as of the last day of the taxable year. For this purpose, an event that occurs after the end of the taxable year must be taken into account if its occurrence was reasonably predictable and its income was subject to reasonable estimation as of the last day of that taxable year.

(5) *Completion factor*—(i) *Allocable contract costs.* A taxpayer must use a cost allocation method permitted under either § 1.460–5(b) or (c) to determine the amount of cumulative allocable contract costs and estimated total allocable contract costs that are used to determine a contract's completion factor. Allocable contract costs include a reimbursable cost that is allocable to the contract.

(ii) *Cumulative allocable contract costs.* To determine a contract's completion factor for a taxable year, a taxpayer must take into account the cumulative allocable contract costs that have been incurred, as defined in § 1.460–1(b)(8), through the end of the taxable year.

(iii) *Estimating total allocable contract costs.* A taxpayer must estimate total allocable contract costs for each long-term contract based upon all the facts and circumstances known as of the last day of the taxable year. For this purpose, an event that occurs after the end of the taxable year must be taken into account if its occurrence was reasonably predictable and its cost was subject to reasonable estimation as of the last day of that taxable year. To be considered reasonable, an estimate of total allocable contract costs must include costs attributable to delay, rework, change orders, technology or design problems, or other problems that reasonably can be predicted considering the nature of the contract and prior experience. However, estimated total allocable contract costs do not include any contingency allowance for costs that, as of the end of the taxable year, are not reasonably predicted to be incurred in the performance of the contract. For example, estimated total allocable contract costs do not include any costs attributable to factors not reasonably predictable at the end of the taxable year, such as third-party litigation, extreme weather conditions, strikes, and delays in securing required permits and licenses. In addition, the estimated costs of performing other agreements that are not aggregated with the contract under § 1.460–1(e) that the taxpayer expects to incur with the same customer (*e.g.*, follow-on contracts) are not included in estimated total allocable contract costs for the initial contract.

(iv) *Pre-contracting-year costs.* If a taxpayer reasonably expects to enter into a long-term contract in a future taxable year, the taxpayer must capitalize all costs incurred prior to entering into the contract that will be allocable to that contract (*e.g.*, bidding and proposal costs). A taxpayer is not required to compute a completion factor, or to include in gross income any amount, related to allocable contract costs for any taxable year ending before the contracting year or, if applicable, the 10-percent year defined in paragraph (b)(6)(i) of this section. In that year, the taxpayer is required to compute a completion factor that includes all allocable contract costs that have been incurred as of the end of that taxable year (whether previously capitalized or deducted) and to take into account in computing taxable income the related gross receipts and the previously capitalized allocable contract costs. If, however, a taxpayer determines in a subsequent year that it will not enter into the long-term contract, the taxpayer must account for these pre-contracting-year costs in that year (*e.g.*, as a deduction or an inventoriable cost) using the appropriate rules contained in other sections of the Code or regulations.

(v) *Post-completion-year costs.* If a taxpayer incurs an allocable contract cost after the completion year, the taxpayer must account for that cost using a permissible method of accounting. See § 1.460–6(c)(1)(ii) for application of the look-back method as a result of adjustments to allocable contract costs.

(6) *10-percent method*—(i) *In general.* Instead of determining the income from a long-term contract beginning with the contracting year, a taxpayer may elect to use the 10-percent method under section 460(b)(5). Under the 10-percent method, a taxpayer does not include in gross income any amount related to allocable contract costs until the taxable year in which the taxpayer has incurred at least 10 percent of the estimated total allocable contract costs (10-percent year). A taxpayer must treat costs incurred before the 10-percent year as pre-contracting-year costs described in paragraph (b)(5)(iv) of this section.

(ii) *Election.* A taxpayer makes an election under this paragraph (b)(6) by using the 10-percent method for all long-term contracts entered into during the taxable year of the election on its original federal income tax return for the election year. This election is a method of accounting and, thus, applies to all long-term contracts entered into during and after the taxable year of the election. An electing taxpayer must use the 10-percent method to apply the look-back method under § 1.460–6 and to determine alternative minimum taxable income under paragraph (f) of this section. This election is not available if a taxpayer uses the simplified cost-to-cost method described in § 1.460-5(c) to compute the completion factor of a long-term contract.

(7) *Terminated contract*—(i) *Reversal of income.* If a long-term contract is terminated before completion and, as a result, the taxpayer retains ownership of the property that is the subject matter of that contract, the taxpayer must reverse the transaction in the taxable year of termination. To reverse the transaction, the taxpayer reports a loss (or gain) equal to the cumulative allocable contract costs reported under the contract in all prior taxable years less the cumulative gross receipts reported under the contract in all prior taxable years.

(ii) *Adjusted basis.* As a result of reversing the transaction under paragraph (b)(7)(i) of this section, a taxpayer will have an adjusted basis in the retained property equal to the cumulative allocable contract costs reported under the contract in all prior taxable years. However, if the taxpayer received and retains any consideration or compensation from the customer, the taxpayer must reduce the adjusted basis in the retained property (but not below zero) by the fair market value of that consideration or compensation. To the extent that the amount of the consideration or compensation described in the preceding sentence exceeds the adjusted basis in the retained property, the taxpayer must include the excess in gross income for the taxable year of termination.

(iii) *Look-back method.* The look-back method does not apply to a terminated contract that is subject to this paragraph (b)(7).

(c) *Exempt contract methods*—(1) *In general.* An *exempt contract method* means the method of accounting that a

taxpayer must use to account for all its long-term contracts (and any portion of a long-term contract) that are exempt from the requirements of section 460(a). Thus, an exempt contract method applies to exempt construction contracts, as defined in § 1.460–3(b); the non-PCM portion of a qualified ship contract, as defined in § 1.460–2(d); and the non-PCM portion of a residential construction contract, as defined in § 1.460–3(c). Permissible exempt contract methods include the PCM, the EPCM described in paragraph (c)(2) of this section, the CCM described in paragraph (d) of this section, or any other permissible method. See section 446.

(2) *Exempt-contract percentage-of-completion method*—(i) *In general.* Similar to the PCM described in paragraph (b) of this section, a taxpayer using the EPCM generally must include in income the portion of the total contract price, as described in paragraph (b)(4) of this section, that corresponds to the percentage of the entire contract that the taxpayer has completed during the taxable year. However, under the EPCM, the percentage of completion may be determined as of the end of the taxable year by using any method of cost comparison (such as comparing direct labor costs incurred to date to estimated total direct labor costs) or by comparing the work performed on the contract with the estimated total work to be performed, rather than by using the cost-to-cost comparison required by paragraphs (b)(2)(i) and (5) of this section, provided such method is used consistently and clearly reflects income. In addition, paragraph (b)(3) of this section (regarding post-completion-year income), paragraph (b)(6) of this section (regarding the 10-percent method) and § 1.460–6 (regarding the look-back method) do not apply to the EPCM.

(ii) *Determination of work performed.* For purposes of the EPCM, the criteria used to compare the work performed on a contract as of the end of the taxable year with the estimated total work to be performed must clearly reflect the earning of income with respect to the contract. For example, in the case of a roadbuilder, a standard of completion solely based on miles of roadway completed in a case where the terrain is substantially different may not clearly reflect the earning of income with respect to the contract.

(d) *Completed-contract method*—(1) *In general.* Except as otherwise provided in paragraph (d)(4) of this section, a taxpayer using the CCM to account for a long-term contract must take into account in the contract's completion year, as defined in § 1.460–1(b)(6), the gross contract price and all allocable contract costs incurred by the completion year. A taxpayer may not treat the cost of any materials and supplies that are allocated to a contract, but actually remain on hand when the contract is completed, as an allocable contract cost.

(2) *Post-completion-year income and costs.* If a taxpayer has not included an item of contingent compensation (*i.e.*, amounts for which the all events test has not been satisfied) in gross contract price under paragraph (d)(3) of this section by the completion year, the taxpayer must account for this item of contingent compensation using a permissible method of accounting. If a taxpayer incurs an allocable contract cost after the completion year, the taxpayer must account for that cost using a permissible method of accounting.

(3) *Gross contract price.* Gross contract price includes all amounts (including holdbacks, retainages, and reimbursements) that a taxpayer is entitled by law or contract to receive, whether or not the amounts are due or have been paid. In addition, gross contract price includes all bonuses, awards, and incentive payments, such as a bonus for meeting an early completion date, to the extent the all events test is satisfied. If a taxpayer performs a non-long-term contract activity, as defined in § 1.460–1(d)(2), that is incident to or necessary for the manufacture, building, installation, or construction of the subject matter of one or more of the taxpayer's long-term contracts, the taxpayer must include an allocable share of the gross receipts attributable to that activity in the gross contract price of the contract(s) benefitted by that activity. Gross contract price also includes amounts reimbursed for independent research and development expenses (as defined in § 1.460–1(b)(9)), or bidding and proposal costs, under a federal or cost-plus long-term contract (as defined in section 460(d)), regardless of whether the research and development, or bidding and proposal, activities are incident to or necessary for the performance of that long-term contract.

(4) *Contracts with disputed claims*—(i) *In general.* The special rules in this paragraph (d)(4) apply to a long-term contract accounted for using the CCM with a dispute caused by a customer's requesting a reduction of the gross contract price or the performance of additional work under the contract or by a taxpayer's requesting an increase in gross contract price, or both, on or after the date a taxpayer has tendered the subject matter of the contract to the customer.

(ii) *Taxpayer assured of profit or loss.* If the disputed amount relates to a customer's claim for either a reduction in price or additional work and the taxpayer is assured of either a profit or a loss on a long-term contract regardless of the outcome of the dispute, the gross contract price, reduced (but not below zero) by the amount reasonably in dispute, must be taken into account in the completion year. If the disputed amount relates to a taxpayer's claim for an increase in price and the taxpayer is assured of either a profit or a loss on a long-term contract regardless of the outcome of the dispute, the gross contract price must be taken into account in the completion year. If the taxpayer is assured a profit on the contract, all allocable contract costs incurred by the end of the completion year are taken into account in that year. If the taxpayer is assured a loss on the contract, all allocable contract costs incurred by the end of the completion year, reduced by the amount reasonably in dispute, are taken into account in the completion year.

(iii) *Taxpayer unable to determine profit or loss.* If the amount reasonably in dispute affects so much of the gross contract price or allocable contract costs that a taxpayer cannot determine whether a profit or loss ultimately will be realized from a long-term contract, the taxpayer may not take any of the gross contract price or allocable contract costs into account in the completion year.

(iv) *Dispute resolved.* Any part of the gross contract price and any allocable contract costs that have not been taken into account because of the principles described in paragraph (d)(4)(i), (ii), or (iii) of this section must be taken into account in the taxable year in which the dispute is resolved. If a taxpayer performs additional work under the contract because of the dispute, the term *taxable year in which the dispute is resolved* means the taxable year the additional work is completed, rather than the taxable year in which the outcome of the dispute is determined by agreement, decision, or otherwise.

(e) *Percentage-of-completion/capitalized-cost method.* Under the PCCM, a taxpayer must determine the income from a long-term contract using the PCM for the applicable percentage of the contract and its exempt contract method, as defined in paragraph (c) of this section, for the remaining percentage of the contract. For residential construction contracts described in § 1.460–3(c), the applicable percentage is 70 percent, and the

remaining percentage is 30 percent. For qualified ship contracts described in § 1.460–2(d), the applicable percentage is 40 percent, and the remaining percentage is 60 percent.

(f) *Alternative minimum taxable income*—(1) *In general.* Under section 56(a)(3), a taxpayer (not exempt from the AMT under section 55(e)) must use the PCM to determine its AMTI from any long-term contract entered into on or after March 1, 1986, that is not a home construction contract, as defined in § 1.460–3(b)(2). For AMTI purposes, the PCM must include any election under paragraph (b)(6) of this section (concerning the 10-percent method) or under § 1.460–5(c) (concerning the simplified cost-to-cost method) that the taxpayer has made for regular tax purposes. For exempt construction contracts described in § 1.460–3(b)(1)(ii), a taxpayer must use the simplified cost-to-cost method to determine the completion factor for AMTI purposes. Except as provided in paragraph (f)(2) of this section, a taxpayer must use AMTI costs and AMTI methods, such as the depreciation method described in section 56(a)(1), to determine the completion factor of a long-term contract (except a home construction contract) for AMTI purposes.

(2) *Election to use regular completion factors.* Under this paragraph (f)(2), a taxpayer may elect for AMTI purposes to determine the completion factors of all of its long-term contracts using the methods of accounting and allocable contract costs used for regular federal income tax purposes. A taxpayer makes this election by using regular methods and regular costs to compute the completion factors of all long-term contracts entered into during the taxable year of the election for AMTI purposes on its original federal income tax return for the election year. This election is a method of accounting and, thus, applies to all long-term contracts entered into during and after the taxable year of the election. Although a taxpayer may elect to compute the completion factor of its long-term contracts using regular methods and regular costs, an election under this paragraph (f)(2) does not eliminate a taxpayer's obligation to comply with the requirements of section 55 when computing AMTI. For example, although a taxpayer may elect to use the depreciation methods used for regular tax purposes to compute the completion factor of its long-term contracts for AMTI purposes, the taxpayer must use the depreciation methods permitted by section 56 to compute AMTI.

(g) *Method of accounting.* A taxpayer that uses the PCM, EPCM, CCM, PCCM, or elects the 10-percent method or special AMTI method (or changes to another method of accounting with the Commissioner's consent) must apply the method(s) consistently for all similarly classified long-term contracts, until the taxpayer obtains the Commissioner's consent under section 446(e) to change to another method of accounting. A taxpayer-initiated change in method of accounting will be permitted only on a cut-off basis (*i.e.*, for contracts entered into on or after the year of change), and thus, a section 481(a) adjustment will not be permitted or required.

(h) *Examples.* The following examples illustrate the rules of this section:

Example 1. PCM—estimating total contract price. C, whose taxable year ends December 31, determines the income from long-term contracts using the PCM. On January 1, 2001, C enters into a contract to design and manufacture a satellite (a unique item). The contract provides that C will be paid $10,000,000 for delivering the completed satellite by December 1, 2002. The contract also provides that C will receive a $3,000,000 bonus for delivering the satellite by July 1, 2002, and an additional $4,000,000 bonus if the satellite successfully performs its mission for five years. C is unable to reasonably predict if the satellite will successfully perform its mission for five years. If on December 31, 2001, C should reasonably expect to deliver the satellite by July 1, 2002, the estimated total contract price is $13,000,000 ($10,000,000 unit price + $3,000,000 production-related bonus). Otherwise, the estimated total contract price is $10,000,000. In either event, the $4,000,000 bonus is not includible in the estimated total contract price as of December 31, 2001, because C is unable to reasonably predict that the satellite will successfully perform its mission for five years.

Example 2. PCM—computing income. (i) C, whose taxable year ends December 31, determines the income from long-term contracts using the PCM. During 2001, C agrees to manufacture for the customer, B, a unique item for a total contract price of $1,000,000. Under C's contract, B is entitled to retain 10 percent of the total contract price until it accepts the item. By the end of 2001, C has incurred $200,000 of allocable contract costs and estimates that the total allocable contract costs will be $800,000. By the end of 2002, C has incurred $600,000 of allocable contract costs and estimates that the total allocable contract costs will be $900,000. In 2003, after completing the contract, C determines that the actual cost to manufacture the item was $750,000.

(ii) For each of the taxable years, C's income from the contract is computed as follows:

	Taxable Year		
	2001	2002	2003
(A) Cumulative incurred costs	$200,000	$600,000	$750,000
(B) Estimated total costs	800,000	900,000	750,000
(C) Completion factor: (A) ÷ (B)	25.00%	66.67%	100.00%
(D) Total contract price	1,000,000	1,000,000	1,000,000
(E) Cumulative gross receipts: (C) × (D)	250,000	666,667	1,000,000
(F) Cumulative gross receipts (prior year)	(0)	(250,000)	(666,667)
(G) Current-year gross receipts	250,000	416,667	333,333
(H) Cumulative incurred costs	200,000	600,000	750,000
(I) Cumulative incurred costs (prior year)	(0)	(200,000)	(600,000)
(J) Current-year costs	200,000	400,000	150,000
(K) Gross income: (G) − (J)	$50,000	$16,667	$183,333

Example 3. PCM—computing income with cost sharing. (i) C, whose taxable year ends December 31, determines the income from long-term contracts using the PCM. During 2001, C enters into a contract to manufacture a unique item. The contract specifies a target price of $1,000,000, a target cost of $600,000, and a target profit of $400,000. C and B will share the savings of any cost underrun (actual total incurred cost is less than target cost) and the additional cost of any cost overrun (actual total incurred cost is greater than target cost) as follows: 30 percent to C and 70 percent to B. By the end of 2001, C has incurred $200,000 of allocable contract costs and estimates that the total allocable contract costs will be $600,000. By the end of 2002, C has incurred $300,000 of allocable contract costs and estimates that the total allocable contract costs will be $400,000. In 2003, after completing the contract, C determines that the actual cost to manufacture the item was $700,000.

(ii) For each of the taxable years, C's income from the contract is computed as follows (note that the sharing of any cost underrun or cost overrun is reflected as an adjustment to C's target price under paragraph (b)(4)(i) of this section):

	Taxable Year		
	2001	2002	2003
(A) Cumulative incurred costs	$200,000	$300,000	$700,000
(B) Estimated total costs	600,000	400,000	700,000
(C) Completion factor: (A) ÷ (B)	33.33%	75.00%	100.00%
(D) Target price	$1,000,000	$1,000,000	$1,000,000
(E) Estimated total costs	600,000	400,000	700,000
(F) Target costs	600,000	600,000	600,000
(G) Cost (underrun)/overrun: (E) − (F)	0	(200,000)	100,000
(H) Adjustment rate	70%	70%	70%
(I) Target price adjustment	0	(140,000)	70,000
(J) Total contract price: (D) + (I)	$1,000,000	$860,000	$1,070,000
(K) Cumulative gross receipts: (C) × (J)	$333,333	$645,000	$1,070,000
(L) Cumulative gross receipts (prior year):	(0)	(333,333)	(645,000)
(M) Current-year gross receipts	333,333	311,667	425,000
(N) Cumulative incurred costs	200,000	300,000	700,000
(O) Cumulative incurred costs (prior year):	(0)	(200,000)	(300,000)
(P) Current-year costs	200,000	100,000	400,000
(Q) Gross income: (M) − (P)	$133,333	$211,667	$25,000

Example 4. PCM—10 percent method. (i) C, whose taxable year ends December 31, determines the income from long-term contracts using the PCM. In November 2001, C agrees to manufacture a unique item for $1,000,000. C reasonably estimates that the total allocable contract costs will be $600,000. By December 31, 2001, C has received $50,000 in progress payments and incurred $40,000 of costs. C elects to use the 10 percent method effective for 2001 and all subsequent taxable years. During 2002, C receives $500,000 in progress payments and incurs $260,000 of costs. In 2003, C incurs an additional $300,000 of costs, C finishes manufacturing the item, and receives the final $450,000 payment.

(ii) For each of the taxable years, C's income from the contract is computed as follows:

	Taxable Year		
	2001	2002	2003
(A) Cumulative incurred costs	$40,000	$300,000	$600,000
(B) Estimated total costs	600,000	600,000	600,000
(C) Completion factor (A) ÷ (B)	6.67%	50.00%	100.00%
(D) Total contract price	1,000,000	1,000,000	1,000,000
(E) Cumulative gross receipts: (C) × (D)*	0	500,000	1,000,000
(F) Cumulative gross receipts (prior year):	(0)	(0)	(500,000)
(G) Current-year gross receipts	0	500,000	500,000
(H) Cumulative incurred costs	0	300,000	600,000
(I) Cumulative incurred costs (prior year):	(0)	(0)	(300,000)
(J) Current-year costs	0	300,000	300,000
(K) Gross income: (G) − (J)	$0	$200,000	$200,000

*Unless (C) <10 percent.

Example 5. PCM—contract terminated. C, whose taxable year ends December 31, determines the income from long-term contracts using the PCM. During 2001, C buys land and begins constructing a building that will contain 50 condominium units on that land. C enters into a contract to sell one unit in this condominium to B for $240,000. B gives C a $5,000 deposit toward the purchase price. By the end of 2001, C has incurred $50,000 of allocable contract costs on B's unit and estimates that the total allocable contract costs on B's unit will be $150,000. Thus, for 2001, C reports gross receipts of $80,000 ($50,000 ÷ $150,000 × $240,000), current-year costs of $50,000, and gross income of $30,000 ($80,000—$50,000). In 2002, after C has incurred an additional $25,000 of allocable contract costs on B's unit, B files for bankruptcy protection and defaults on the contract with C, who is permitted to keep B's $5,000 deposit as liquidated damages. In 2002, C reverses the transaction with B under paragraph (b)(7) of this section and reports a loss of $30,000 ($50,000–$80,000). In addition, C obtains an adjusted basis in the unit sold to B of $70,000 ($50,000 (current-year costs deducted in 2001)—$5,000 (B's forfeited deposit) + $25,000 (current-year costs incurred in 2002). C may not apply the look-back method to this contract in 2002.

Example 6. CCM—contracts with disputes from customer claims. In 2001, C, whose taxable year ends December 31, uses the CCM to account for exempt construction contracts. C enters into a contract to construct a bridge for B. The terms of the contract provide for a $1,000,000 gross contract price. C finishes the bridge in 2002 at a cost of $950,000. When B examines the bridge, B insists that C either repaint several girders or reduce the contract price. The amount reasonably in dispute is $10,000. In 2003, C and B resolve their dispute, C repaints the girders at a cost of $6,000, and C and B agree that the contract price is not to be reduced. Because C is assured a profit of $40,000 ($1,000,000—$10,000—$950,000) in 2002 even if the dispute is resolved in B's favor, C must take this $40,000 into account in 2002. In 2003, C will earn an additional $4,000 profit ($1,000,000—$956,000—$40,000) from the contract with B. Thus, C must take into account an additional $10,000 of gross contract price and $6,000 of additional contract costs in 2003.

Example 7. CCM—contracts with disputes from taxpayer claims. In 2003, C, whose taxable year ends December 31, uses the CCM to account for exempt construction contracts. C enters into a contract to construct a building for B. The terms of the contract provide for a $1,000,000 gross contract price. C finishes the building in 2004 at a cost of $1,005,000. B examines the building in 2004 and agrees that it meets the contract's specifications; however, at the end of 2004, C and B are unable to agree on the merits of C's claim for an additional $10,000 for items that C alleges are changes in contract specifications and B alleges are within the scope of the contract's original specifications. In 2005, B agrees to pay C an additional $2,000 to satisfy C's claims under the contract. Because the amount in dispute affects so much of the gross contract price that C cannot determine in 2004 whether a profit or loss will ultimately be realized, C may not taken any of the gross contract price or allocable contract costs into account in 2004. C must take into account $1,002,000 of gross contract price and $1,005,000 of allocable contract costs in 2005.

Example 8. CCM—contracts with disputes from taxpayer and customer claims. C, whose taxable year ends December 31, uses the CCM to account for exempt construction contracts. C constructs a factory for B pursuant to a long-term contract. Under the terms of the contract, B agrees to pay C a total of $1,000,000 for construction of the factory. C finishes construction of the factory in 2002 at a cost of $1,020,000. When B takes possession of the factory and begins operations in December 2002, B is dissatisfied with the location and workmanship of certain heating ducts. As of the end of 2002, C contends that the heating ducts are constructed in accordance with contract specifications. The amount of the gross contract price reasonably in dispute with respect to the heating ducts is $6,000. As of this time, C is claiming $14,000 in addition to the original contract price for certain changes in contract specifications which C alleges have increased his costs. B denies that these changes have increased C's costs. In 2003, the disputes between C and B are resolved by performance of additional work by C at a cost of $1,000 and by an agreement that the contract price would be revised downward to $996,000. Under these circumstances, C must include in his gross income for 2002, $994,000 (the gross contract price less the amount reasonably in dispute because of B's claim, or $1,000,000—$6,000). In 2002, C must also take into account $1,000,000 of allocable contract costs (costs incurred less the amounts in dispute attributable to both B's and C's claims, or $1,020,000—$6,000—$14,000). In 2003, C must take into account an additional $2,000 of gross contract price ($996,000—$994,000) and $21,000 of allocable contract costs ($1,021,000—$1,000,000).

(i) [Reserved]

* * * * *

(k) *Mid-contract change in taxpayer.* [Reserved]

Par. 8. Section 1.460–5 is added to read as follows:

§ 1.460–5 Cost allocation rules.

(a) *Overview.* This section prescribes methods of allocating costs to long-term contracts accounted for using the percentage-of-completion method described in § 1.460–4(b) (PCM), the completed-contract method described in § 1.460–4(d) (CCM), or the percentage-of-completion/capitalized-cost method described in § 1.460–4(e) (PCCM). Exempt construction contracts described in § 1.460–3(b) accounted for using a method other than the PCM or CCM are not subject to the cost allocation rules of this section (other than the requirement to allocate production-period interest under paragraph (b)(2)(v) of this section). Paragraph (b) of this section describes the regular cost allocation methods for contracts subject to the PCM. Paragraph (c) of this section describes an elective simplified cost allocation method for contracts subject to the PCM. Paragraph (d) of this section describes the cost allocation methods for exempt construction contracts reported using the CCM. Paragraph (e) of this section describes the cost allocation rules for contracts subject to the PCCM. Paragraph (f) of this section describes additional rules applicable to the cost allocation methods described in this section. Paragraph (g) of this section provides rules concerning consistency in method of allocating costs to long-term contracts.

(b) *Cost allocation method for contracts subject to PCM*—(1) *In general.* Except as otherwise provided in paragraph (b)(2) of this section, a taxpayer must allocate costs to each long-term contract subject to the PCM in the same manner that direct and indirect costs are capitalized to property produced by a taxpayer under § 1.263A–1(e) through (h). Thus, a taxpayer must allocate to each long-term contract subject to the PCM all direct costs and certain indirect costs properly allocable to the long-term contract (*i.e.*, all costs that directly benefit or are incurred by reason of the performance of the long-term contract). However, see paragraph (c) of this section concerning an election to allocate contract costs using the simplified cost-to-cost method. As in section 263A, the use of the practical capacity concept is not permitted. See § 1.263A–2(a)(4).

(2) *Special rules*—(i) *Direct material costs.* The costs of direct materials must be allocated to a long-term contract when dedicated to the contract under principles similar to those in § 1.263A–11(b)(2). Thus, a taxpayer dedicates direct materials by associating them with a specific contract, including by purchase order, entry on books and records, or shipping instructions. A taxpayer maintaining inventories under § 1.471–1 must determine allocable contract costs attributable to direct materials using its method of accounting for those inventories (*e.g.*, FIFO, LIFO, specific identification).

(ii) *Components and subassemblies.* The costs of a component or subassembly (component) produced by the taxpayer must be allocated to a long-term contract as the taxpayer incurs costs to produce the component if the taxpayer reasonably expects to incorporate the component into the subject matter of the contract. Similarly,

the cost of a purchased component (including a component purchased from a related party) must be allocated to a long-term contract as the taxpayer incurs the cost to purchase the component if the taxpayer reasonably expects to incorporate the component into the subject matter of the contract. In all other cases, the cost of a component must be allocated to a long-term contract when the component is dedicated, under principles similar to those in § 1.263A–11(b)(2). A taxpayer maintaining inventories under § 1.471–1 must determine allocable contract costs attributable to components using its method of accounting for those inventories (*e.g.*, FIFO, LIFO, specific identification).

(iii) *Simplified production methods.* A taxpayer may not determine allocable contract costs using the simplified production methods described in § 1.263A–2(b) and (c).

(iv) *Costs identified under cost-plus long-term contracts and federal long-term contracts.* To the extent not otherwise allocated to the contract under this paragraph (b), a taxpayer must allocate any identified costs to a cost-plus long-term contract or federal long-term contract (as defined in section 460(d)). *Identified cost* means any cost, including a charge representing the time-value of money, identified by the taxpayer or related person as being attributable to the taxpayer's cost-plus long-term contract or federal long-term contract under the terms of the contract itself or under federal, state, or local law or regulation.

(v) *Interest*—(A) *In general.* If property produced under a long-term contract is *designated property*, as defined in § 1.263A–8(b) (without regard to the exclusion for long-term contracts under § 1.263A–8(d)(2)(v)), a taxpayer must allocate interest incurred during the production period to the long-term contract in the same manner as interest is allocated to property produced by a taxpayer under section 263A(f). See §§ 1.263A–8 to 1.263A–12 generally.

(B) *Production period.* Notwithstanding § 1.263A–12(c) and (d), for purposes of this paragraph (b)(2)(v), the production period of a long-term contract—

(*1*) Begins on the later of—

(*i*) The contract commencement date, as defined in § 1.460–1(b)(7); or

(*ii*) For a taxpayer using the accrual method of accounting for long-term contracts, the date by which 5 percent or more of the total estimated costs, including design and planning costs, under the contract have been incurred; and

(*2*) Ends on the date that the contract is completed, as defined in § 1.460–1(c)(3).

(C) *Application of section 263A(f).* For purposes of this paragraph (b)(2)(v), section 263A(f)(1)(B)(iii) (regarding an estimated production period exceeding 1 year and a cost exceeding $1,000,000) must be applied on a contract-by-contract basis; except that, in the case of a taxpayer using an accrual method of accounting, that section must be applied on a property-by-property basis.

(vi) *Research and experimental expenses.* Notwithstanding § 1.263A–1(e)(3)(ii)(P) and (iii)(B), a taxpayer must allocate research and experimental expenses, other than independent research and development expenses (as defined in § 1.460–1(b)(9)), to its long-term contracts.

(vii) *Service costs*—(A) *Simplified service cost method*—(1) *In general.* To use the simplified service cost method under § 1.263A–1(h), a taxpayer must allocate the otherwise capitalizable mixed service costs among its long-term contracts using a reasonable method. For example, otherwise capitalizable mixed service costs may be allocated to each long-term contract based on labor hours or contract costs allocable to the contract. To be considered reasonable, an allocation method must be applied consistently and must not disproportionately allocate service costs to contracts expected to be completed in the near future.

(2) *Example.* The following example illustrates the rule of this paragraph (b)(2)(vii)(A):

Example. Simplified service cost method. During 2001, C, whose taxable year ends December 31, produces electronic equipment for inventory and enters into long-term contracts to manufacture specialized electronic equipment. C's method of allocating mixed service costs to the property it produces is the labor-based, simplified service cost method described in § 1.263A–1(h)(4). For 2001, C's total mixed service costs are $100,000, C's section 263A labor costs are $500,000, C's section 460 labor costs (*i.e.,* labor costs allocable to C's long-term contracts) are $250,000, and C's total labor costs are $1,000,000. To determine the amount of mixed service costs capitalizable under section 263A for 2001, C multiplies its total mixed service costs by its section 263A allocation ratio (section 263A labor costs ÷ total labor costs). Thus, C's capitalizable mixed service costs for 2001 are $50,000 ($100,000 x $500,000 ÷ $1,000,000). Thereafter, C allocates its capitalizable mixed service costs to produced property remaining in ending inventory using its 263A allocation method (*e.g.,* burden rate, simplified production). Similarly, to determine the amount of mixed service costs that are allocable to C's long-term contracts for 2001, C multiplies its total mixed service costs by its section 460 allocation ratio (section 460 labor ÷ total labor costs). Thus, C's allocable mixed service contract costs for 2001 are $25,000 ($100,000 x $250,000 ÷ $1,000,000). Thereafter, C allocates its allocable mixed service costs to its long-term contracts proportionately based on its section 460 labor costs allocable to each long-term contract.

(B) *Jobsite costs.* If an administrative, service, or support function is performed solely at the jobsite for a specific long-term contract, the taxpayer may allocate all the direct and indirect costs of that administrative, service, or support function to that long-term contract. Similarly, if an administrative, service, or support function is performed at the jobsite solely for the taxpayer's long-term contract activities, the taxpayer may allocate all the direct and indirect costs of that administrative, service, or support function among all the long-term contracts performed at that jobsite. For this purpose, jobsite means a production plant or a construction site.

(C) *Limitation on other reasonable cost allocation methods.* A taxpayer may use any other reasonable method of allocating service costs, as provided in § 1.263A–1(f)(4), if, for the taxpayer's long-term contracts considered as a whole, the—

(*1*) Total amount of service costs allocated to the contracts does not differ significantly from the total amount of service costs that would have been allocated to the contracts under § 1.263A–1(f)(2) or (3);

(*2*) Service costs are not allocated disproportionately to contracts expected to be completed in the near future because of the taxpayer's cost allocation method; and

(*3*) Taxpayer's cost allocation method is applied consistently.

(c) *Simplified cost-to-cost method for contracts subject to the PCM*—(1) *In general.* Instead of using the cost allocation method prescribed in paragraph (b) of this section, a taxpayer may elect to use the simplified cost-to-cost method, which is authorized under section 460(b)(3)(A), to allocate costs to a long-term contract subject to the PCM. Under the simplified cost-to-cost method, a taxpayer determines a contract's completion factor based upon only direct material costs; direct labor costs; and depreciation, amortization, and cost recovery allowances on equipment and facilities directly used to manufacture or construct the subject matter of the contract. For this purpose, the costs associated with any manufacturing or construction activities performed by a subcontractor are considered either direct material or direct labor costs, as appropriate, and

therefore must be allocated to the contract under the simplified cost-to-cost method. An electing taxpayer must use the simplified cost-to-cost method to apply the look-back method under § 1.460–6 and to determine alternative minimum taxable income under § 1.460–4(f).

(2) *Election.* A taxpayer makes an election under this paragraph (c) by using the simplified cost-to-cost method for all long-term contracts entered into during the taxable year of the election on its original federal income tax return for the election year. This election is a method of accounting and, thus, applies to all long-term contracts entered into during and after the taxable year of the election. This election is not available if a taxpayer does not use the PCM to account for all long-term contracts or if a taxpayer elects to use the 10-percent method described in § 1.460–4(b)(6).

(d) *Cost allocation rules for exempt construction contracts reported using the CCM*—(1) *In general.* For exempt construction contracts reported using the CCM, other than contracts described in paragraph (d)(3) of this section (concerning contracts of homebuilders that do not satisfy the $10,000,000 gross receipts test described in § 1.460–3(b)(3) or will not be completed within two years of the contract commencement date), a taxpayer must annually allocate the cost of any activity that is incident to or necessary for the taxpayer's performance under a long-term contract. A taxpayer must allocate to each exempt construction contract all direct costs as defined in § 1.263A–1(e)(2)(i) and all indirect costs either as provided in § 1.263A–1(e)(3) or as provided in paragraph (d)(2) of this section.

(2) *Indirect costs*—(i) *Indirect costs allocable to exempt construction contracts.* A taxpayer allocating costs under this paragraph (d)(2) must allocate the following costs to an exempt construction contract, other than a contract described in paragraph (d)(3) of this section, to the extent incurred in the performance of that contract—

(A) Repair of equipment or facilities;

(B) Maintenance of equipment or facilities;

(C) Utilities, such as heat, light, and power, allocable to equipment or facilities;

(D) Rent of equipment or facilities;

(E) Indirect labor and contract supervisory wages, including basic compensation, overtime pay, vacation and holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d) as it existed prior to its repeal in 1983), shift differential, payroll taxes, and contributions to a supplemental unemployment benefits plan;

(F) Indirect materials and supplies;

(G) Noncapitalized tools and equipment;

(H) Quality control and inspection;

(I) Taxes otherwise allowable as a deduction under section 164, other than state, local, and foreign income taxes, to the extent attributable to labor, materials, supplies, equipment, or facilities;

(J) Depreciation, amortization, and cost-recovery allowances reported for the taxable year for financial purposes on equipment and facilities to the extent allowable as deductions under chapter 1 of the Internal Revenue Code;

(K) Cost depletion;

(L) Administrative costs other than the cost of selling or any return on capital;

(M) Compensation paid to officers other than for incidental or occasional services;

(N) Insurance, such as liability insurance on machinery and equipment; and

(O) Interest, as required under paragraph (b)(2)(v) of this section.

(ii) *Indirect costs not allocable to exempt construction contracts.* A taxpayer allocating costs under this paragraph (d)(2) is not required to allocate the following costs to an exempt construction contract reported using the CCM—

(A) Marketing and selling expenses, including bidding expenses;

(B) Advertising expenses;

(C) Other distribution expenses;

(D) General and administrative expenses attributable to the performance of services that benefit the taxpayer's activities as a whole (*e.g.,* payroll expenses, legal and accounting expenses);

(E) Research and experimental expenses (described in section 174 and the regulations thereunder);

(F) Losses under section 165 and the regulations thereunder;

(G) Percentage of depletion in excess of cost depletion;

(H) Depreciation, amortization, and cost recovery allowances on equipment and facilities that have been placed in service but are temporarily idle (for this purpose, an asset is not considered to be temporarily idle on non-working days, and an asset used in construction is considered to be idle when it is neither en route to nor located at a job-site), and depreciation, amortization and cost recovery allowances under chapter 1 of the Internal Revenue Code in excess of depreciation, amortization, and cost recovery allowances reported by the taxpayer in the taxpayer's financial reports;

(I) Income taxes attributable to income received from long-term contracts;

(J) Contributions paid to or under a stock bonus, pension, profit-sharing, or annuity plan or other plan deferring the receipt of compensation whether or not the plan qualifies under section 401(a), and other employee benefit expenses paid or accrued on behalf of labor, to the extent the contributions or expenses are otherwise allowable as deductions under chapter 1 of the Internal Revenue Code. Other employee benefit expenses include (but are not limited to): Worker's compensation; amounts deductible or for whose payment reduction in earnings and profits is allowed under section 404A and the regulations thereunder; payments pursuant to a wage continuation plan under section 105(d) as it existed prior to its repeal in 1983; amounts includible in the gross income of employees under a method or arrangement of employer contributions or compensation which has the effect of a stock bonus, pension, profit-sharing, or annuity plan, or other plan deferring the receipt of compensation or providing deferred benefits; premiums on life and health insurance; and miscellaneous benefits provided for employees such as safety, medical treatment, recreational and eating facilities, membership dues, *etc.*;

(K) Cost attributable to strikes, rework labor, scrap and spoilage; and

(L) Compensation paid to officers attributable to the performance of services that benefit the taxpayer's activities as a whole.

(3) *Large homebuilders.* A taxpayer must capitalize the costs of home construction contracts under section 263A and the regulations thereunder, unless the contract will be completed within two years of the contract commencement date and the taxpayer satisfies the $10,000,000 gross receipts test described in § 1.460–3(b)(3).

(e) *Cost allocation rules for contracts subject to the PCCM.* A taxpayer must use the cost allocation rules described in paragraph (b) of this section to determine the costs allocable to the entire qualified ship contract or residential construction contract accounted for using the PCCM and may not use the simplified cost-to-cost method described in paragraph (c) of this section.

(f) *Special rules applicable to costs allocated under this section*—(1) *Nondeductible costs.* A taxpayer may not allocate any otherwise allocable contract cost to a long-term contract if any section of the Internal Revenue Code disallows a deduction for that type of payment or expenditure (*e.g.,* an illegal bribe described in section 162(c)).

(2) *Costs incurred for non-long-term contract activities.* If a taxpayer performs a non-long-term contract activity, as defined in § 1.460–1(d)(2), that is incident to or necessary for the manufacture, building, installation, or construction of the subject matter of one or more of the taxpayer's long-term contracts, the taxpayer must allocate the costs attributable to that activity to such contract(s).

(g) *Method of accounting.* A taxpayer that adopts or elects a cost allocation method of accounting (or changes to another cost allocation method of accounting with the Commissioner's consent) must apply that method consistently for all similarly classified contracts, until the taxpayer obtains the Commissioner's consent under section 446(e) to change to another cost allocation method. A taxpayer-initiated change in cost allocation method will be permitted only on a cut-off basis (*i.e.,* for contracts entered into on or after the year of change) and thus, a section 481(a) adjustment will not be permitted or required.

Par. 9. Section 1.460–6 is amended as follows:

1. A sentence is added to the end of paragraph (a)(2).

2. The third sentence of paragraph (b)(1) is removed.

3. In the fourth sentence of paragraph (b)(1), ''Therefore, to the extent that the percentage of completion method is required to be used'' is removed and ''To the extent that the percentage of completion method is required to be used under § 1.460–1(g)'' is added in its place.

4. The first sentence of paragraph (c)(1)(ii)(A) is revised.

5. In the first sentence of paragraph (c)(1)(ii)(B), the language ''no later than the year'' is removed and ''in the year'' is added in its place and ''§ 1.451–3(b)(*2*)'' is removed and ''§ 1.460–1(c)(3)'' is added in its place.

6. The last two sentences of paragraph (c)(1)(ii)(B) are removed.

7. In the last sentence of paragraph (c)(1)(ii)(C)(*2*), the language ''§ 5h.6'' is removed and ''§ 301.9100–8 of this chapter'' is added in its place.

8. In the fourth sentence of paragraph (c)(2)(v)(A), the language ''similarly'' is removed.

9. The first, second, fifth, and sixth sentences of paragraph (c)(2)(v)(A) are removed.

10. In the first sentence of paragraph (c)(2)(vi)(B), the language ''§ 1.453(b)(2)(ii), (iii), (iv), and § 1.451–3(d)(2), (3), and (4)'' is removed and ''§ 1.460–4(b)(4)(i)'' is added in its place.

11. In the second sentence of paragraph (c)(2)(vi)(B), the language ''the percentage of completion method and'' is removed.

12. In the third sentence of paragraph (c)(2)(vi)(B), the language '', for purposes of both the percentage of completion method and the look-back method'' is removed.

13. In the fourth sentence of paragraph (c)(2)(vi)(B), the language ''Similarly, a'' is removed and ''A'' is added in its place.

14. In the first sentence of paragraph (c)(2)(vi)(C), the language ''§ 1.451–3(e)'' is removed and ''§ 1.460–1(e)'' is added in its place.

15. Paragraph (c)(4)(iv) is removed.

16. In the first sentence of paragraph (d)(4)(ii)(C), the language ''within the meaning of section 1504(a)'' is removed and '', as defined in § 1.1502–1(h)'' is added in its place.

17. In the fourth sentence of paragraph (e)(2), the language ''within the meaning of section 1504(a)'' is removed and '', as defined in § 1.1502–1(h)'' is added in its place.

18. In the first sentence of paragraph (f)(1), the language ''or to be refunded'' is removed and ''from, or payable to, a taxpayer'' is added in its place.

19. In the first sentence of paragraph (f)(1), the language ''and reported'' is removed.

20. In the second sentence of paragraph (f)(1), the language ''and Form 8697 is filed by'' is removed.

21. In the second sentence of paragraph (f)(2)(i), the language ''fails to file Form 8697 with respect to interest required to be paid or that'' is removed.

22. In the second sentence of paragraph (f)(2)(i), the language ''a penalty for failing to file Form 8697'' is removed and ''an underpayment penalty under section 6651, and the taxpayer also is liable for underpayment interest under section 6601'' is added in its place.

23. In the third sentence of paragraph (f)(2)(i), the language ''penalty'' is removed and ''subtitle F'' is added in its place.

24. In the fourth sentence of paragraph (f)(2)(i), the language ''or a tax refund'' is added after ''liability''.

25. In the first sentence of paragraph (f)(2)(ii), the language ''refunded'' is removed and ''payable'' is added in its place.

26. Paragraph (f)(3) is added.

The revisions and additions read as follows:

§ 1.460–6 Look-back method.

(a) * * *

(2) * * * Paragraph (j) of this section provides guidance concerning the election not to apply the look-back method in de minimis cases.

* * * * *

(c) * * * (1) * * *

(ii) * * * (A) *In general.* Except as otherwise provided in section 460(b)(6) (see § 1.460–6(j) for method of electing) or § 1.460–6(e), a taxpayer must apply the look-back method to a long-term contract in the completion year and in any post-completion year for which the taxpayer must adjust total contract price or total allocable contract costs, or both, under the PCM. * * *

* * * * *

(f) * * *

(3) *Statute of limitations and compounding of interest on look-back interest.* For guidance on the statute of limitations applicable to the assessment and collection of look-back interest owed by a taxpayer, see sections 6501 and 6502. A taxpayer's claim for credit or refund of look-back interest previously paid by or collected from a taxpayer is a claim for credit or refund of an overpayment of tax and is subject to the statute of limitations provided in section 6511. A taxpayer's claim for look-back interest (or interest payable on look-back interest) that is not attributable to an amount previously paid by or collected from a taxpayer is a general, non-tax claim against the federal government. For guidance on the statute of limitations that applies to general, non-tax claims against the federal government, see 28 U.S.C. sections 2401 and 2501. For guidance applicable to the compounding of interest when the look-back interest is not paid, see sections 6601 to 6622.

* * * * *

§§ 1.460–7 and 1.460–8 [Removed]

Par. 10. Sections 1.460–7 and 1.460–8 are removed.

§ 1.471–10 [Amended]

Par. 11. Section 1.471–10 is amended by removing the language ''§ 1.451–3'' and adding ''§ 1.460–2'' in its place.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 12. The authority citation for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 13. In § 602.101, paragraph (b) is amended by:

1. Removing the entry for ''1.451–3''.

2. The following entries are added in numerical order to the table:

§ 602.101 OMB Control numbers.

* * * * *

(b) * * *

Qualified Transportation Fringe Benefits

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulation.

SUMMARY: This document contains final regulations relating to qualified transportation fringe benefits. These final regulations provide rules to ensure that transportation benefits provided to employees are excludable from gross income. These final regulations reflect changes to the law made by the Energy Policy Act of 1992, the Taxpayer Relief Act of 1997, and the Transportation Equity Act for the 21st Century. These final regulations affect employers that offer qualified transportation fringes and employees who receive these benefits.

DATES: *Effective Date:* These regulations are effective January 11, 2001.

Applicability Date: For dates of applicability, see § 1.132–9(b), Q/A–25.

FOR FURTHER INFORMATION CONTACT: John Richards, (202) 622–6040 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in these final regulations has been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507) under control number 1545–1676. Responses to this collection of information are mandatory to obtain the benefit described under section 132(f).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

The estimated average annual recordkeeping burden per recordkeeper is 26.5 hours. The estimated annual reporting burden per respondent is .8 hours.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be sent to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, W:CAR:MP:FP:S:O, Washington, DC 20224, and to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Books or records relating to a collection of information must be retained as long as their contents might become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

This document contains amendments to 26 CFR part 1 (Income Tax Regulations). On January 27, 2000, a proposed regulation (REG–113572–99) relating to qualified transportation fringes was published in the **Federal Register** (65 FR 4388). A public hearing was held on June 1, 2000. Written or electronic comments responding to the notice of proposed rulemaking were received. After consideration of all the comments, the proposed regulations are adopted as amended by this Treasury decision. The revisions are discussed below.

Explanation of Provisions and Summary of Comments

In general, comments received on the proposed regulations were favorable and, accordingly, the final regulations retain the general structure of the proposed regulations, including the question and answer format and a variety of examples illustrating the substance of the final regulations. However, commentators made a number of specific recommendations for modifications and clarifications of the regulations. In response to these comments, the final regulations incorporate the modifications and clarifications described below.

A. Whether Vouchers are Readily Available

Section 132(f)(3) provides that qualified transportation fringes include cash reimbursement for transit passes ''only if a voucher or similar item which may be exchanged only for a transit pass is not readily available for direct distribution by the employer to the employee.'' Thus, if vouchers are readily available, the employer must use vouchers and cash reimbursement of a mass transit expense would not be a qualified transportation fringe.

Most of the comments received addressed the issue of whether vouchers are ''readily available.'' Commentators representing employers generally favored rules permitting cash reimbursement. Commentators representing transit operators and voucher providers generally favored rules not permitting cash reimbursement. The following discusses three issues raised by commentators: first, whether the proposed regulations' 1 percent safe harbor should be retained; second, whether internal administrative costs should be considered in applying the 1 percent test; and third, whether other nonfinancial restrictions should be considered in determining whether vouchers are readily available.

1. The 1 Percent Safe Harbor

Under Notice 94–3, 1994–1 C.B. 327, and the proposed regulations, a voucher is readily available if an employer can obtain it on terms no less favorable than those available to an individual employee and without incurring a significant administrative cost. Under the proposed regulations, administrative costs relate only to fees paid to fare media providers, and the determination of whether obtaining a voucher would result in a significant administrative cost is made with respect to each transit system voucher. The proposed regulations provide a rule under which administrative costs are treated as significant if the average monthly administrative costs incurred by the employer for a voucher (disregarding delivery charges imposed by the fare media provider to the extent not in excess of $15 per order) are more than 1 percent of the average monthly value of the vouchers for a system.

Commentators, in particular those representing fare media providers and transit operators, suggested that the fare media provider fee percentage causing vouchers to not be readily available should be raised because many fare media providers charge fees in excess of the 1 percent limit and, thus, under this

test, transit vouchers would not be considered readily available in some large metropolitan areas. These commentators assert that the 1 percent test is therefore contrary to the intent of the statute. Commentators suggested that the 1 percent test, particularly if combined with inadequate cash reimbursement substantiation requirements, may result in taxpayer abuse, with the result that the benefit might not be used for the purpose for which it is intended, which is to increase the use of mass transit. In addition, commentators testified at the public hearing that the mandatory use of vouchers (with no ability to use cash reimbursement if vouchers are readily available) would increase the use of vouchers and promote the development of advanced technologies that minimize the burden on employers while ensuring that the benefit is used for mass transit. These new technologies might allow an employer to make payment directly to the transit operator, who in turn credits fare to the employee's magnetic media fare card, thus eliminating the need for employers to incur the expense of distributing vouchers.

Other commentators, in particular groups representing employers, generally favored the 1 percent test, but suggested that internal costs be considered in applying the test (discussed below). These commentators took the position that an increase in the percentage might affect the market charge for such services. There was also a concern that a strict voucher-use requirement would result in fewer employers adopting transit pass programs, thus frustrating the purpose of section 132(f) to increase the use of mass transit.

The final regulations retain the 1 percent test. The 1 percent test, applicable for years beginning after December 31, 2003, is appropriate in light of the rule (discussed below) that only voucher provider fees are considered in determining availability. It is intended that the delayed application of this rule would provide sufficient time for those affected by this rule to modify their systems and procedures appropriately. The 1 percent threshold, coupled with the exclusion of internal administrative costs from the readily available determination, represents a balanced approach that will promote the growth of voucher programs in most transportation areas. In addition, raising the percentage threshold could curtail the growth in transit benefit programs, which would be contrary to the goal of increasing the use of mass transit. Finally, in cases where cash reimbursement is allowed, adequate substantiation requirements will ensure that transit pass benefits will actually go toward mass transportation usage. In this regard, the proposed regulations provide that employers must implement reasonable procedures to ensure that an amount equal to the reimbursement was incurred for transit passes. For example, the final regulations clarify that in circumstances when employee certification is a reasonable reimbursement procedure, it must occur after the expense is incurred.

The final regulations also clarify the application of the 1 percent rule if multiple vouchers for a transit system are available for distribution by an employer to employees, and if multiple transit system vouchers are required in an area to meet the transit needs of an employer's employees. The final regulations provide that if multiple transit system vouchers are available for direct distribution to employees, the employer must consider the lowest cost voucher for purposes of determining whether the voucher provider fees cause vouchers to not be readily available. However, if multiple vouchers are required in an area to meet the transit needs of the individual employees in that area, the employer has the option of averaging the costs applied to vouchers from each system for purposes of determining whether the voucher provider fees cause vouchers to not be readily available.

2. Internal Administrative Costs

Several commentators representing employers recommended that, in addition to fare media provider fees, internal administrative costs, especially security and distribution costs, should be considered in determining whether vouchers are readily available. These commentators noted that administrative costs are increased when an employer must maintain both a voucher system and a reimbursement system to provide qualified transportation fringes. For example, the employer may maintain a cash reimbursement system for transportation in a commuter highway vehicle and qualified parking, and also maintain a voucher system for transit passes. In addition, several commentators suggested that the increased costs and administrative burden for employers that maintain offices in multiple cities should also be considered in determining whether vouchers are readily available.

The final regulations retain the test considering only fees paid to voucher providers in determining availability based on a plain reading of the terms of the statute. The language ''readily available for direct distribution by the employer to the employee'' under section 132(f)(3) in its plain, ordinary sense means that vouchers are easily obtainable for direct distribution to the employer's employees. The determination of availability bears no relationship with costs that may be incurred after vouchers have been obtained. The service fees charged by voucher providers and delivery costs can reasonably be viewed as affecting whether vouchers are easily obtainable; an employer's internal costs of subsequently administering a voucher program would not. Thus, based upon the plain language of section 132(f), internal administrative costs do not affect whether vouchers are readily available.

Moreover, the test considering only voucher provider fees is a comparatively simple bright line test. A test that depends on the employer's internal administrative costs would necessarily be complex, requiring complex rules that would be difficult for employers to apply.

3. Other Nonfinancial Restrictions

Commentators representing employers suggested that nonfinancial factors should be considered in determining whether vouchers are readily available. They suggested that factors such as whether there are reasonable advance purchase and minimum purchase requirements, and whether vouchers can be purchased in appropriate denominations, should be considered in determining availability. The final regulations adopt this suggestion because nonfinancial restrictions would reasonably affect whether vouchers are available for distribution by an employer to an employee.

The final regulations provide guidance on the types of nonfinancial restrictions that cause vouchers to not be readily available. The final regulations provide that certain nonfinancial restrictions, such as a voucher provider not making vouchers available for purchase at reasonable intervals or failing to provide the vouchers within a reasonable period after receiving payment for the voucher, cause vouchers to not be readily available. In addition, if a voucher provider does not provide vouchers in reasonably appropriate quantities, or in reasonably appropriate denominations, vouchers may not be readily available.

When and as the standards in these final regulations go into effect, they will supercede the current law standards in Notice 94–3.

B. Advance Transit Passes

Commentators suggested that the administrability of transit pass programs would be improved if vouchers were permitted to be distributed in advance for more than one month. The final regulations adopt this suggestion.

In October of this year, the IRS issued Announcement 2000–78 (2000–43 I.R.B. 428) to notify taxpayers that, when finalized, the regulations will clarify that transit passes may be distributed in advance for more than one month (such as for a calendar quarter) by taking into account the monthly limits for all months for which the transit passes are distributed. The announcement further provides, however, that if an employee receives advance transit passes, and the employee's employment terminates before the beginning of the last month of the period for which the transit passes were provided, the employer must include in the employee's wages, for income and for employment tax purposes (FICA, FUTA, and income tax withholding), the value of the passes provided for those month(s) beginning after the employee's employment terminates to the extent the employer does not recover those transit passes or the value of those passes. The announcement provides that pending the issuance of these final regulations, employers may rely on the announcement.

The final regulations differ from the announcement in one respect. In any case in which transit passes are provided in advance for a period of no more than three months (such as for a calendar quarter), but the recipient ceases to be an employee before the beginning of the last month in that period, the final regulations provide that the value of a transit pass provided in advance for a month is excluded from wages for employment tax (FICA, FUTA, and income tax withholding) purposes (but not for income tax purposes) unless at the time the transit passes were distributed there was an established termination date that was before the beginning of the last month of that period and the employee does in fact terminate employment before the beginning of the last month of that period.

C. Qualified Parking

The final regulations address whether reimbursement paid to an employee for parking at a work location away from the employee's permanent work location is excludable from wages for income and employment tax purposes under section 132(f). Section 132(f)(5)(C) defines qualified parking, in part, as ''parking provided to an employee on or near the business premises of the employer * * * .'' The final regulations provide that qualified parking includes parking on or near a work location at which the employee performs services for the employer. However, qualified parking does not include reimbursement for parking that is otherwise excludable from gross income as a reimbursement treated as paid under an accountable plan under § 1.62–2 of the Income Tax Regulations, or parking provided in kind to an employee that is excludable from the employee's gross income as a working condition fringe under section 132(a)(3). Thus, if the exclusion at § 1.62–2 or section 132(a)(3) is available (even if not reimbursed by the employer), then section 132(f) does not apply.

Whether a reimbursement for local transportation expenses, including parking at a work location away from the employee's permanent work location, is excludable from the employee's gross income under § 1.62–2, or whether parking provided in kind to an employee is excludable from the employee's gross income under section 132(a)(3), is determined based upon whether the parking expenses would be deductible if paid or incurred by the employee under section 162(a) as an expense incurred in the employee's trade or business of being an employee for the employer. §§ 1.62–2(d); 1.132–5(a)(2). Revenue Ruling 99–7 (1999–1 C.B. 361) addresses under what circumstances daily transportation expenses, including parking, incurred by a taxpayer in going between the taxpayer's residence and a work location are deductible by the taxpayer under section 162(a).

The final regulations provide the minimum requirements to ensure that transportation benefits are qualified transportation fringes under section 132(f). An employer may have a transit benefit program that is more restrictive than a program meeting the minimum requirements under the regulations. In addition, these regulations do not affect the application of authorities outside the Internal Revenue Code which may restrict a transportation benefit program. Federal Government agencies, for example, may be required by other federal law to implement restrictions beyond those required under these regulations.

D. Applicability Date

The regulations are generally applicable for taxable years beginning after December 31, 2001. However, in order to provide a transition period for those affected by the 1 percent rule (described under ''The 1 percent safe harbor'' in this preamble), that rule is applicable for taxable years beginning after December 31, 2003.

Effect on Other Documents

The following document is obsolete as of January 11, 2001: Announcement 2000–78 (2000–43 I.R.B. 428).

The following document is modified as of the date these regulations become applicable (see Q/A–25): Notice 94–3 (1994–1 C.B. 327).

Special Analyses

It has been determined that this Treasury Decision is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations. A final regulatory flexibility analysis has been prepared for the collection of information in this Treasury decision under 5 U.S.C. 604. A summary of the analysis is set forth in this preamble under the heading ''Summary of Final Regulatory Flexibility Analysis.''

Summary of Final Regulatory Flexibility Analysis

This analysis is required under the Regulatory Flexibility Act (5 U.S.C. chapter 6). The collection of information under this rule is based upon the requirements under section 132(f). We estimate that approximately 265,000 employers that provide qualified transportation fringes to their employees will be affected by the recordkeeping requirements of this rule. None of the comments received in response to the notice of proposed rulemaking specifically addressed the initial regulatory flexibility analysis.

Section 132(f)(3) provides that qualified transportation fringes may be provided in the form of cash reimbursement. The legislative history indicates that an employer providing cash reimbursement to the employer's employees for qualified transportation fringes must establish a bona fide reimbursement arrangement. As a condition to providing cash reimbursement for qualified transportation fringes, this rule provides that employers must receive substantiation from employees. The objective of this rule is to ensure that reimbursements are made for qualified transportation fringes.

Whether an arrangement constitutes a bona fide reimbursement arrangement varies depending on the facts and circumstances, including the method or

methods of payment utilized within a mass transit system. An employee certification in either written or electronic form may be sufficient depending upon the facts and circumstances. For example, if receipts are not provided in the ordinary course of business, such as with respect to metered parking or used transit passes that cannot be returned to the user, an employee certification that expenses have been incurred constitutes a reasonable reimbursement procedure. A certification that expenses will be incurred in the future, by itself, is not a reasonable reimbursement procedure. There are no particular professional skills required to maintain these records.

In addition, section 132(f)(4) provides that an employee may choose between cash compensation and qualified transportation fringes. This rule provides that an employer may allow an employee the choice to receive either a fixed amount of cash compensation at a specified future date or a fixed amount of qualified transportation fringes to be provided for a specified future period (such as qualified parking to be used during a future calendar month). This rule provides that employers must keep records with respect to employee compensation reduction elections. An employee's election must be in writing or some other permanent and verifiable form, and include the date of the election, the amount of compensation to be reduced, and the period for which the qualified transportation fringes will be provided. The objective of this rule is to ensure against recharacterization of taxable compensation after it has been paid to the employee. There are no particular professional skills required to maintain these records.

A less burdensome alternative for small organizations would be to exempt those entities from the recordkeeping requirements under this rule. However, it would be inconsistent with the statutory provisions and legislative history to exempt those entities from the recordkeeping requirements imposed under this rule.

This rule provides several options which avoid more burdensome recordkeeping requirements for small entities. This rule provides that (1) there are no substantiation requirements if the employer distributes transit passes in kind; (2) a compensation reduction election may be made electronically; (3) an election to reduce compensation may be automatically renewed; (4) an employer may provide for deemed compensation reduction elections under its qualified transportation fringe benefit plan; and (5) a requirement that a voucher be distributed in-kind by the employer is satisfied if the voucher is distributed by the employer or by another person on behalf of the employer (for example, if a transit operator credits amounts to the employee's fare card as a result of payments made to the operator by the employer).

Drafting Information

The principal author of these regulations is John Richards, Office of the Assistant Chief Counsel (Exempt Organizations/Employment Tax/Government Entities). However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects

26 CFR Part 1

Employment taxes, Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 602 are amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 1.132–0 is amended by:

1. Adding an entry for § 1.132–5(p)(4)
2. Adding entries for § 1.132–9.

The additions read as follows:

§ 1.132–0 Outline of regulations under section 132.

* * * * *

§ 1.132–5 Working condition fringes.

* * * * *

(p) * * *

(4) Dates of applicability.

* * * * *

§ 1.132–9 Qualified transportation fringes.

(a) Table of contents.

(b) Questions and answers.

Par. 3. Section 1.132–5 is amended by adding paragraph (p)(4) to read as follows:

§ 1.132–5 Working condition fringes.

* * * * *

(p) * * *

(4) *Dates of applicability.* This paragraph (p) applies to benefits provided before January 1, 1993. For benefits provided after December 31, 1992, see § 1.132–9.

* * * * *

Par. 4. Section 1.132–9 is added to read as follows:

§ 1.132–9 Qualified transportation fringes.

(a) *Table of contents.* This section contains a list of the questions and answers in § 1.132–9.

(1) *General rules.*

Q–1. What is a qualified transportation fringe?

Q–2. What is transportation in a commuter highway vehicle?

Q–3. What are transit passes?

Q–4. What is qualified parking?

Q–5. May qualified transportation fringes be provided to individuals who are not employees?

Q–6. Must a qualified transportation fringe benefit plan be in writing?

(2) *Dollar limitations.*

Q–7. Is there a limit on the value of qualified transportation fringes that may be excluded from an employee's gross income?

Q–8. What amount is includible in an employee's wages for income and employment tax purposes if the value of the qualified transportation fringe exceeds the applicable statutory monthly limit?

Q–9. Are excludable qualified transportation fringes calculated on a monthly basis?

Q–10. May an employee receive qualified transportation fringes from more than one employer?

(3) *Compensation reduction.*

Q–11. May qualified transportation fringes be provided to employees pursuant to a compensation reduction agreement?

Q–12. What is a compensation reduction election for purposes of section 132(f)?

Q–13. Is there a limit to the amount of the compensation reduction?

Q–14. When must the employee have made a compensation reduction election and under what circumstances may the amount be paid in cash to the employee?

Q–15. May an employee whose qualified transportation fringe costs are less than the employee's compensation reduction carry over this excess amount to subsequent periods?

(4) *Expense reimbursements.*

Q–16. How does section 132(f) apply to expense reimbursements?

Q–17. May an employer provide nontaxable cash reimbursement under section 132(f) for periods longer than one month?

Q–18. What are the substantiation requirements if an employer distributes transit passes?

Q–19. May an employer choose to impose substantiation requirements in addition to those described in this regulation?

(5) *Special rules for parking and vanpools.*

Q–20. How is the value of parking determined?

Q–21. How do the qualified transportation fringe rules apply to van pools?

(6) *Reporting and employment taxes.*

Q–22. What are the reporting and employment tax requirements for qualified transportation fringes?
(7) *Interaction with other fringe benefits.*
Q–23. How does section 132(f) interact with other fringe benefit rules?
(8) *Application to individuals who are not employees.*
Q–24. May qualified transportation fringes be provided to individuals who are partners, 2-percent shareholders of S-corporations, or independent contractors?
(9) *Effective date.*
Q–25. What is the effective date of this section?

(b) *Questions and answers.*

Q–1. What is a qualified transportation fringe?

A–1. (a) The following benefits are qualified transportation fringe benefits:

(1) Transportation in a commuter highway vehicle.

(2) Transit passes.

(3) Qualified parking.

(b) An employer may simultaneously provide an employee with any one or more of these three benefits.

Q–2. What is transportation in a commuter highway vehicle?

A–2. Transportation in a commuter highway vehicle is transportation provided by an employer to an employee in connection with travel between the employee's residence and place of employment. A commuter highway vehicle is a highway vehicle with a seating capacity of at least 6 adults (excluding the driver) and with respect to which at least 80 percent of the vehicle's mileage for a year is reasonably expected to be—

(a) For transporting employees in connection with travel between their residences and their place of employment; and

(b) On trips during which the number of employees transported for commuting is at least one-half of the adult seating capacity of the vehicle (excluding the driver).

Q–3. What are transit passes?

A–3. A transit pass is any pass, token, farecard, voucher, or similar item (including an item exchangeable for fare media) that entitles a person to transportation—

(a) On mass transit facilities (whether or not publicly owned); or

(b) Provided by any person in the business of transporting persons for compensation or hire in a highway vehicle with a seating capacity of at least 6 adults (excluding the driver).

Q–4. What is qualified parking?

A–4. (a) Qualified parking is parking provided to an employee by an employer—

(1) On or near the employer's business premises; or

(2) At a location from which the employee commutes to work (including commuting by carpool, commuter highway vehicle, mass transit facilities, or transportation provided by any person in the business of transporting persons for compensation or hire).

(b) For purposes of section 132(f), parking on or near the employer's business premises includes parking on or near a work location at which the employee provides services for the employer. However, qualified parking does not include—

(1) The value of parking provided to an employee that is excludable from gross income under section 132(a)(3) (as a working condition fringe), or

(2) Reimbursement paid to an employee for parking costs that is excludable from gross income as an amount treated as paid under an accountable plan. See § 1.62–2.

(c) However, parking on or near property used by the employee for residential purposes is not qualified parking.

(d) Parking is provided by an employer if—

(1) The parking is on property that the employer owns or leases;

(2) The employer pays for the parking; or

(3) The employer reimburses the employee for parking expenses (see Q/A–16 of this section for rules relating to cash reimbursements).

Q–5. May qualified transportation fringes be provided to individuals who are not employees?

A–5. An employer may provide qualified transportation fringes only to individuals who are currently employees of the employer at the time the qualified transportation fringe is provided. The term employee for purposes of qualified transportation fringes is defined in § 1.132–1(b)(2)(i). This term includes only common law employees and other statutory employees, such as officers of corporations. See Q/A–24 of this section for rules regarding partners, 2-percent shareholders, and independent contractors.

Q–6. Must a qualified transportation fringe benefit plan be in writing?

A–6. No. Section 132(f) does not require that a qualified transportation fringe benefit plan be in writing.

Q–7. Is there a limit on the value of qualified transportation fringes that may be excluded from an employee's gross income?

A–7. (a) *Transportation in a commuter highway vehicle and transit passes.* Before January 1, 2002, up to $65 per month is excludable from the gross income of an employee for transportation in a commuter highway vehicle and transit passes provided by an employer. On January 1, 2002, this amount is increased to $100 per month.

(b) *Parking.* Up to $175 per month is excludable from the gross income of an employee for qualified parking.

(c) *Combination.* An employer may provide qualified parking benefits in addition to transportation in a commuter highway vehicle and transit passes.

(d) *Cost-of-living adjustments.* The amounts in paragraphs (a) and (b) of this Q/A–7 are adjusted annually, beginning with 2000, to reflect cost-of-living. The adjusted figures are announced by the Service before the beginning of the year.

Q–8. What amount is includible in an employee's wages for income and employment tax purposes if the value of the qualified transportation fringe exceeds the applicable statutory monthly limit?

A–8. (a) Generally, an employee must include in gross income the amount by which the fair market value of the benefit exceeds the sum of the amount, if any, paid by the employee and any amount excluded from gross income under section 132(a)(5). Thus, assuming no other statutory exclusion applies, if an employer provides an employee with a qualified transportation fringe that exceeds the applicable statutory monthly limit and the employee does not make any payment, the value of the benefits provided in excess of the applicable statutory monthly limit is included in the employee's wages for income and employment tax purposes. See § 1.61–21(b)(1).

(b) The following examples illustrate the principles of this Q/A–8:

Example 1. (i) For each month in a year in which the statutory monthly transit pass limit is $100 (i.e., a year after 2001), Employer M provides a transit pass valued at $110 to Employee D, who does not pay any amount to Employer M for the transit pass.

(ii) In this *Example 1,* because the value of the monthly transit pass exceeds the statutory monthly limit by $10, $120 ($110—$100, times 12 months) must be included in D's wages for income and employment tax purposes for the year with respect to the transit passes.

Example 2. (i) For each month in a year in which the statutory monthly qualified parking limit is $175, Employer M provides qualified parking valued at $195 to Employee E, who does not pay any amount to M for the parking.

(ii) In this *Example 2,* because the fair market value of the qualified parking exceeds the statutory monthly limit by $20, $240 ($195—$175, times 12 months) must be included in Employee E's wages for income and employment tax purposes for the year with respect to the qualified parking.

Example 3. (i) For each month in a year in which the statutory monthly qualified parking limit is $175, Employer P provides

qualified parking with a fair market value of $220 per month to its employees, but charges each employee $45 per month.

(ii) In this *Example 3,* because the sum of the amount paid by an employee ($45) plus the amount excludable for qualified parking ($175) is not less than the fair market value of the monthly benefit, no amount is includible in the employee's wages for income and employment tax purposes with respect to the qualified parking.

Q–9. Are excludable qualified transportation fringes calculated on a monthly basis?

A–9. (a) *In general.* Yes. The value of transportation in a commuter highway vehicle, transit passes, and qualified parking is calculated on a monthly basis to determine whether the value of the benefit has exceeded the applicable statutory monthly limit on qualified transportation fringes. Except in the case of a transit pass provided to an employee, the applicable statutory monthly limit applies to qualified transportation fringes used by the employee in a month. Monthly exclusion amounts are not combined to provide a qualified transportation fringe for any month exceeding the statutory limit. A month is a calendar month or a substantially equivalent period applied consistently.

(b) *Transit passes.* In the case of transit passes provided to an employee, the applicable statutory monthly limit applies to the transit passes provided by the employer to the employee in a month for that month or for any previous month in the calendar year. In addition, transit passes distributed in advance for more than one month, but not for more than twelve months, are qualified transportation fringes if the requirements in paragraph (c) of this Q/A–9 are met (relating to the income tax and employment tax treatment of advance transit passes). The applicable statutory monthly limit under section 132(f)(2) on the combined amount of transportation in a commuter highway vehicle and transit passes may be calculated by taking into account the monthly limits for all months for which the transit passes are distributed. In the case of a pass that is valid for more than one month, such as an annual pass, the value of the pass may be divided by the number of months for which it is valid for purposes of determining whether the value of the pass exceeds the statutory monthly limit.

(c) *Rule if employee's employment terminates*—(1) *Income tax treatment.* The value of transit passes provided in advance to an employee with respect to a month in which the individual is not an employee is included in the employee's wages for income tax purposes.

(2) *Reporting and employment tax treatment.* Transit passes distributed in advance to an employee are excludable from wages for employment tax purposes under sections 3121, 3306, and 3401 (FICA, FUTA, and income tax withholding) if the employer distributes transit passes to the employee in advance for not more than three months and, at the time the transit passes are distributed, there is not an established date that the employee's employment will terminate (for example, if the employee has given notice of retirement) which will occur before the beginning of the last month of the period for which the transit passes are provided. If the employer distributes transit passes to an employee in advance for not more than three months and at the time the transit passes are distributed there is an established date that the employee's employment will terminate, and the employee's employment does terminate before the beginning of the last month of the period for which the transit passes are provided, the value of transit passes provided for months beginning after the date of termination during which the employee is not employed by the employer is included in the employee's wages for employment tax purposes. If transit passes are distributed in advance for more than three months, the value of transit passes provided for the months during which the employee is not employed by the employer is includible in the employee's wages for employment tax purposes regardless of whether at the time the transit passes were distributed there was an established date of termination of the employee's employment.

(d) *Examples.* The following examples illustrate the principles of this Q/A–9:

Example 1. (i) Employee E incurs $150 for qualified parking used during the month of June of a year in which the statutory monthly parking limit is $175, for which E is reimbursed $150 by Employer R. Employee E incurs $180 in expenses for qualified parking used during the month of July of that year, for which E is reimbursed $180 by Employer R.

(ii) In this *Example 1,* because monthly exclusion amounts may not be combined to provide a benefit in any month greater than the applicable statutory limit, the amount by which the amount reimbursed for July exceeds the applicable statutory monthly limit ($180 minus $175 equals $5) is includible in Employee E's wages for income and employment tax purposes.

Example 2. (i) Employee F receives transit passes from Employer G with a value of $195 in March of a year (for which the statutory monthly transit pass limit is $65) for January, February, and March of that year. F was hired during January and has not received any transit passes from G.

(ii) In this *Example 2,* the value of the transit passes (three months times $65 equals $195) is excludable from F's wages for income and employment tax purposes.

Example 3. (i) Employer S has a qualified transportation fringe benefit plan under which its employees receive transit passes near the beginning of each calendar quarter for that calendar quarter. All employees of Employer S receive transit passes from Employer S with a value of $195 on March 31 for the second calendar quarter covering the months April, May, and June (of a year in which the statutory monthly transit pass limit is $65).

(ii) In this *Example 3,* because the value of the transit passes may be calculated by taking into account the monthly limits for all months for which the transit passes are distributed, the value of the transit passes (three months times $65 equals $195) is excludable from the employees' wages for income and employment tax purposes.

Example 4. (i) Same facts as in *Example 3,* except that Employee T, an employee of Employer S, terminates employment with S on May 31. There was not an established date of termination for Employee T at the time the transit passes were distributed.

(ii) In this *Example 4,* because at the time the transit passes were distributed there was not an established date of termination for Employee T, the value of the transit passes provided for June ($65) is excludable from T's wages for employment tax purposes. However, the value of the transit passes distributed to Employee T for June ($65) is not excludable from T's wages for income tax purposes.

(iii) If Employee T's May 31 termination date was established at the time the transit passes were provided, the value of the transit passes provided for June ($65) is included in T's wages for both income and employment tax purposes.

Example 5. (i) Employer F has a qualified transportation fringe benefit plan under which its employees receive transit passes semi-annually in advance of the months for which the transit passes are provided. All employees of Employer F, including Employee X, receive transit passes from F with a value of $390 on June 30 for the 6 months of July through December (of a year in which the statutory monthly transit pass limit is $65). Employee X's employment terminates and his last day of work is August 1. Employer F's other employees remain employed throughout the remainder of the year.

(ii) In this *Example 5,* the value of the transit passes provided to Employee X for the months September, October, November, and December ($65 times 4 months equals $260) of the year is included in X's wages for income and employment tax purposes. The value of the transit passes provided to Employer F's other employees is excludable from the employees' wages for income and employment tax purposes.

Example 6. (i) Each month during a year in which the statutory monthly transit pass limit is $65, Employer R distributes transit

passes with a face amount of $70 to each of its employees. Transit passes with a face amount of $70 can be purchased from the transit system by any individual for $65.

(ii) In this *Example 6,* because the value of the transit passes distributed by Employer R does not exceed the applicable statutory monthly limit ($65), no portion of the value of the transit passes is included as wages for income and employment tax purposes.

Q–10. May an employee receive qualified transportation fringes from more than one employer?

A–10. (a) *General rule.* Yes. The statutory monthly limits described in Q/A–7 of this section apply to benefits provided by an employer to its employees. For this purpose, all employees treated as employed by a single employer under section 414(b), (c), (m), or (o) are treated as employed by a single employer. See section 414(t) and § 1.132–1(c). Thus, qualified transportation fringes paid by entities under common control under section 414(b), (c), (m), or (o) are combined for purposes of applying the applicable statutory monthly limit. In addition, an individual who is treated as a leased employee of the employer under section 414(n) is treated as an employee of that employer for purposes of section 132. See section 414(n)(3)(C).

(b) *Examples.* The following examples illustrate the principles of this Q/A–10:

Example 1. (i) During a year in which the statutory monthly qualified parking limit is $175, Employee E works for Employers M and N, who are unrelated and not treated as a single employer under section 414(b), (c), (m), or (o). Each month, M and N each provide qualified parking benefits to E with a value of $100.

(ii) In this *Example 1,* because M and N are unrelated employers, and the value of the monthly parking benefit provided by each is not more than the applicable statutory monthly limit, the parking benefits provided by each employer are excludable as qualified transportation fringes assuming that the other requirements of this section are satisfied.

Example 2. (i) Same facts as in Example 1, except that Employers M and N are treated as a single employer under section 414(b).

(ii) In this *Example 2,* because M and N are treated as a single employer, the value of the monthly parking benefit provided by M and N must be combined for purposes of determining whether the applicable statutory monthly limit has been exceeded. Thus, the amount by which the value of the parking benefit exceeds the monthly limit ($200 minus the monthly limit amount of $175 equals $25) for each month in the year is includible in E's wages for income and employment tax purposes.

Q–11. May qualified transportation fringes be provided to employees pursuant to a compensation reduction agreement?

A–11. Yes. An employer may offer employees a choice between cash compensation and any qualified transportation fringe. An employee who is offered this choice and who elects qualified transportation fringes is not required to include the cash compensation in income if—

(a) The election is pursuant to an arrangement described in Q/A–12 of this section;

(b) The amount of the reduction in cash compensation does not exceed the limitation in Q/A–13 of this section;

(c) The arrangement satisfies the timing and reimbursement rules in Q/A–14 and 16 of this section; and

(d) The related fringe benefit arrangement otherwise satisfies the requirements set forth elsewhere in this section.

Q–12. What is a compensation reduction election for purposes of section 132(f)?

A–12. (a) *Election requirements generally.* A compensation reduction arrangement is an arrangement under which the employer provides the employee with the right to elect whether the employee will receive either a fixed amount of cash compensation at a specified future date or a fixed amount of qualified transportation fringes to be provided for a specified future period (such as qualified parking to be used during a future calendar month). The employee's election must be in writing or another form, such as electronic, that includes, in a permanent and verifiable form, the information required to be in the election. The election must contain the date of the election, the amount of the compensation to be reduced, and the period for which the benefit will be provided. The election must relate to a fixed dollar amount or fixed percentage of compensation reduction. An election to reduce compensation for a period by a set amount for such period may be automatically renewed for subsequent periods.

(b) *Automatic election permitted.* An employer may provide under its qualified transportation fringe benefit plan that a compensation reduction election will be deemed to have been made if the employee does not elect to receive cash compensation in lieu of the qualified transportation fringe, provided that the employee receives adequate notice that a compensation reduction will be made and is given adequate opportunity to choose to receive the cash compensation instead of the qualified transportation fringe.

Q–13. Is there a limit to the amount of the compensation reduction?

A–13. Yes. Each month, the amount of the compensation reduction may not exceed the combined applicable statutory monthly limits for transportation in a commuter highway vehicle, transit passes, and qualified parking. For example, for a year in which the statutory monthly limit is $65 for transportation in a commuter highway vehicle and transit passes, and $175 for qualified parking, an employee could elect to reduce compensation for any month by no more than $240 ($65 plus $175) with respect to qualified transportation fringes. If an employee were to elect to reduce compensation by $250 for a month, the excess $10 ($250 minus $240) would be includible in the employee's wages for income and employment tax purposes.

Q–14. When must the employee have made a compensation reduction election and under what circumstances may the amount be paid in cash to the employee?

A–14. (a) The compensation reduction election must satisfy the requirements set forth under paragraphs (b), (c), and (d) of this Q/A–14.

(b) *Timing of election.* The compensation reduction election must be made before the employee is able currently to receive the cash or other taxable amount at the employee's discretion. The determination of whether the employee is able currently to receive the cash does not depend on whether it has been constructively received for purposes of section 451. The election must specify that the period (such as a calendar month) for which the qualified transportation fringe will be provided must not begin before the election is made. Thus, a compensation reduction election must relate to qualified transportation fringes to be provided after the election. For this purpose, the date a qualified transportation fringe is provided is—

(1) The date the employee receives a voucher or similar item; or

(2) In any other case, the date the employee uses the qualified transportation fringe.

(c) *Revocability of elections.* The employee may not revoke a compensation reduction election after the employee is able currently to receive the cash or other taxable amount at the employee's discretion. In addition, the election may not be revoked after the beginning of the period for which the qualified transportation fringe will be provided.

(d) *Compensation reduction amounts not refundable.* Unless an election is revoked in a manner consistent with paragraph (c) of this Q/A–14, an employee may not subsequently receive the compensation (in cash or any form other than by payment of a qualified transportation fringe under the employer's plan). Thus, an employer's

qualified transportation fringe benefit plan may not provide that an employee who ceases to participate in the employer's qualified transportation fringe benefit plan (such as in the case of termination of employment) is entitled to receive a refund of the amount by which the employee's compensation reductions exceed the actual qualified transportation fringes provided to the employee by the employer.

(e) *Examples.* The following examples illustrate the principles of this Q/A–14:

Example 1. (i) Employer P maintains a qualified transportation fringe benefit arrangement during a year in which the statutory monthly limit is $100 for transportation in a commuter highway vehicle and transit passes (2002 or later) and $180 for qualified parking. Employees of P are paid cash compensation twice per month, with the payroll dates being the first and the fifteenth day of the month. Under P's arrangement, an employee is permitted to elect at any time before the first day of a month to reduce his or her compensation payable during that month in an amount up to the applicable statutory monthly limit ($100 if the employee elects coverage for transportation in a commuter highway vehicle or a mass transit pass, or $180 if the employee chooses qualified parking) in return for the right to receive qualified transportation fringes up to the amount of the election. If such an election is made, P will provide a mass transit pass for that month with a value not exceeding the compensation reduction amount elected by the employee or will reimburse the cost of other qualified transportation fringes used by the employee on or after the first day of that month up to the compensation reduction amount elected by the employee. Any compensation reduction amount elected by the employee for the month that is not used for qualified transportation fringes is not refunded to the employee at any future date.

(ii) In this *Example 1*, the arrangement satisfies the requirements of this Q/A–14 because the election is made before the employee is able currently to receive the cash and the election specifies the future period for which the qualified transportation fringes will be provided. The arrangement would also satisfy the requirements of this Q/A–14 and Q/A–13 of this section if employees are allowed to elect to reduce compensation up to $280 per month ($100 plus $180).

(iii) The arrangement would also satisfy the requirements of this Q/A–14 (and Q/A–13 of this section) if employees are allowed to make an election at any time before the first or the fifteenth day of the month to reduce their compensation payable on that payroll date by an amount not in excess of one-half of the applicable statutory monthly limit (depending on the type of qualified transportation fringe elected by the employee) and P provides a mass transit pass on or after the applicable payroll date for the compensation reduction amount elected by the employee for the payroll date or reimburses the cost of other qualified transportation fringes used by the employee on or after the payroll date up to the compensation reduction amount elected by the employee for that payroll date.

Example 2. (i) Employee Q elects to reduce his compensation payable on March 1 of a year (for which the statutory monthly mass transit limit is $65) by $195 in exchange for a mass transit voucher to be provided in March. The election is made on the preceding February 27. Employee Q was hired in January of the year. On March 10 of the year, the employer of Employee Q delivers to Employee Q a mass transit voucher worth $195 for the months of January, February, and March.

(ii) In this *Example 2*, $65 is included in Employee Q's wages for income and employment tax purposes because the compensation reduction election fails to satisfy the requirement in this Q/A–14 and Q/A–12 of this section that the period for which the qualified transportation fringe will be provided not begin before the election is made to the extent the election relates to $65 worth of transit passes for January of the year. The $65 for February is not taxable because the election was for a future period that includes at least one day in February.

(iii) However, no amount would be included in Employee Q's wages as a result of the election if $195 worth of mass transit passes were instead provided to Q for the months of February, March, and April (because the compensation reduction would relate solely to fringes to be provided for a period not beginning before the date of the election and the amount provided does not exceed the aggregate limit for the period, *i.e.,* the sum of $65 for each of February, March, and April). See Q/A–9 of this section for rules governing transit passes distributed in advance for more than one month.

Example 3. (i) Employee R elects to reduce his compensation payable on March 1 of a year (for which the statutory monthly parking limit is $175) by $185 in exchange for reimbursement by Employer T of parking expenses incurred by Employee R for parking on or near Employer T's business premises during the period beginning after the date of the election through March. The election is made on the preceding February 27. Employee R incurs $10 in parking expenses on February 28 of the year, and $175 in parking expenses during the month of March. On April 5 of the year, Employer T reimburses Employee R $185 for the parking expenses incurred on February 28, and during March, of the year.

(ii) In this *Example 3*, no amount would be includible in Employee R's wages for income and employment tax purposes because the compensation reduction related solely to parking on or near Employer R's business premises used during a period not beginning before the date of the election and the amount reimbursed for parking used in any one month does not exceed the statutory monthly limitation.

Q–15. May an employee whose qualified transportation fringe costs are less than the employee's compensation reduction carry over this excess amount to subsequent periods?

A–15. (a) Yes. An employee may carry over unused compensation reduction amounts to subsequent periods under the plan of the employee's employer.

(b) The following example illustrates the principles of this Q/A–15:

Example. (i) By an election made before November 1 of a year for which the statutory monthly mass transit limit is $65, Employee E elects to reduce compensation in the amount of $65 for the month of November. E incurs $50 in employee-operated commuter highway vehicle expenses during November for which E is reimbursed $50 by Employer R, E's employer. By an election made before December, E elects to reduce compensation by $65 for the month of December. E incurs $65 in employee-operated commuter highway vehicle expenses during December for which E is reimbursed $65 by R. Before the following January, E elects to reduce compensation by $50 for the month of January. E incurs $65 in employee-operated commuter highway vehicle expenses during January for which E is reimbursed $65 by R because R allows E to carry over to the next year the $15 amount by which the compensation reductions for November and December exceeded the employee-operated commuter highway vehicle expenses incurred during those months.

(ii) In this *Example*, because Employee E is reimbursed in an amount not exceeding the applicable statutory monthly limit, and the reimbursement does not exceed the amount of employee-operated commuter highway vehicle expenses incurred during the month of January, the amount reimbursed ($65) is excludable from E's wages for income and employment tax purposes.

Q–16. How does section 132(f) apply to expense reimbursements?

A–16. (a) *In general.* The term qualified transportation fringe includes cash reimbursement by an employer to an employee for expenses incurred or paid by an employee for transportation in a commuter highway vehicle or qualified parking. The term qualified transportation fringe also includes cash reimbursement for transit passes made under a bona fide reimbursement arrangement, but, in accordance with section 132(f)(3), only if permitted under paragraph (b) of this Q/A–16. The reimbursement must be made under a bona fide reimbursement arrangement which meets the rules of paragraph (c) of this Q/A–16. A payment made before the date an expense has been incurred or paid is not a reimbursement. In addition, a bona fide reimbursement arrangement does not include an arrangement that is dependent solely upon an employee certifying in advance that the employee will incur expenses at some future date.

(b) *Special rule for transit passes*—(1) *In general.* The term *qualified transportation fringe* includes cash reimbursement for transit passes made

under a bona fide reimbursement arrangement, but, in accordance with section 132(f)(3), only if no voucher or similar item that may be exchanged only for a transit pass is readily available for direct distribution by the employer to employees. If a voucher is readily available, the requirement that a voucher be distributed in-kind by the employer is satisfied if the voucher is distributed by the employer or by another person on behalf of the employer (for example, if a transit operator credits amounts to the employee's fare card as a result of payments made to the operator by the employer).

(2) *Voucher or similar item.* For purposes of the special rule in paragraph (b) of this Q/A–16, a transit system voucher is an instrument that may be purchased by employers from a voucher provider that is accepted by one or more mass transit operators (*e.g.,* train, subway, and bus) in an area as fare media or in exchange for fare media. Thus, for example, a transit pass that may be purchased by employers directly from a voucher provider is a transit system voucher.

(3) *Voucher provider.* The term voucher provider means any person in the trade or business of selling transit system vouchers to employers, or any transit system or transit operator that sells vouchers to employers for the purpose of direct distribution to employees. Thus, a transit operator might or might not be a voucher provider. A voucher provider is not, for example, a third-party employee benefits administrator that administers a transit pass benefit program for an employer using vouchers that the employer could obtain directly.

(4) *Readily available.* For purposes of this paragraph (b), a voucher or similar item is readily available for direct distribution by the employer to employees if and only if an employer can obtain it from a voucher provider that—

(i) does not impose fare media charges that cause vouchers to not be readily available as described in paragraph (b)(5) of this section; and

(ii) does not impose other restrictions that cause vouchers to not be readily available as described in paragraph (b)(6) of this section.

(5) *Fare media charges.* For purposes of paragraph (b)(4) of this section, fare media charges relate only to fees paid by the employer to voucher providers for vouchers. The determination of whether obtaining a voucher would result in fare media charges that cause vouchers to not be readily available as described in this paragraph (b) is made with respect to each transit system voucher. If more than one transit system voucher is available for direct distribution to employees, the employer must consider the fees imposed for the lowest cost monthly voucher for purposes of determining whether the fees imposed by the voucher provider satisfy this paragraph. However, if transit system vouchers for multiple transit systems are required in an area to meet the transit needs of the individual employees in that area, the employer has the option of averaging the costs applied to each transit system voucher for purposes of determining whether the fare media charges for transit system vouchers satisfy this paragraph. Fare media charges are described in this paragraph (b)(5), and therefore cause vouchers to not be readily available, if and only if the average annual fare media charges that the employer reasonably expects to incur for transit system vouchers purchased from the voucher provider (disregarding reasonable and customary delivery charges imposed by the voucher provider, *e.g.,* not in excess of $15) are more than 1 percent of the average annual value of the vouchers for a transit system.

(6) *Other restrictions.* For purposes of paragraph (b)(4) of this section, restrictions that cause vouchers to not be readily available are restrictions imposed by the voucher provider other than fare media charges that effectively prevent the employer from obtaining vouchers appropriate for distribution to employees. Examples of such restrictions include—

(i) *Advance purchase requirements.* Advance purchase requirements cause vouchers to not be readily available only if the voucher provider does not offer vouchers at regular intervals or fails to provide the voucher within a reasonable period after receiving payment for the voucher. For example, a requirement that vouchers may be purchased only once per year may effectively prevent an employer from obtaining vouchers for distribution to employees. An advance purchase requirement that vouchers be purchased not more frequently than monthly does not effectively prevent the employer from obtaining vouchers for distribution to employees.

(ii) *Purchase quantity requirements.* Purchase quantity requirements cause vouchers to not be readily available if the voucher provider does not offer vouchers in quantities that are reasonably appropriate to the number of the employer's employees who use mass transportation (for example, the voucher provider requires a $1,000 minimum purchase and the employer seeks to purchase only $200 of vouchers).

(iii) *Limitations on denominations of vouchers that are available.* If the voucher provider does not offer vouchers in denominations appropriate for distribution to the employer's employees, vouchers are not readily available. For example, vouchers provided in $5 increments up to the monthly limit are appropriate for distribution to employees, while vouchers available only in a denomination equal to the monthly limit are not appropriate for distribution to employees if the amount of the benefit provided to the employer's employees each month is normally less than the monthly limit.

(7) *Example.* The following example illustrates the principles of this paragraph (b):

Example. (i) Company C in City X sells mass transit vouchers to employers in the metropolitan area of X in various denominations appropriate for distribution to employees. Employers can purchase vouchers monthly in reasonably appropriate quantities. Several different bus, rail, van pool, and ferry operators service X, and a number of the operators accept the vouchers either as fare media or in exchange for fare media. To cover its operating expenses, C imposes on each voucher a 50 cents charge, plus a reasonable and customary $15 charge for delivery of each order of vouchers. Employer M disburses vouchers purchased from C to its employees who use operators that accept the vouchers and M reasonably expects that $55 is the average value of the voucher it will purchase from C for the next calendar year.

(ii) In this *Example*, vouchers for X are readily available for direct distribution by the employer to employees because the expected cost of the vouchers disbursed to M's employees for the next calendar year is not more than 1 percent of the value of the vouchers (50 cents divided by $55 equals 0.91 percent), the delivery charges are disregarded because they are reasonable and customary, and there are no other restrictions that cause the vouchers to not be readily available. Thus, any reimbursement of mass transportation costs in X would not be a qualified transportation fringe.

(c) *Substantiation requirements.* Employers that make cash reimbursements must establish a bona fide reimbursement arrangement to establish that their employees have, in fact, incurred expenses for transportation in a commuter highway vehicle, transit passes, or qualified parking. For purposes of section 132(f), whether cash reimbursements are made under a bona fide reimbursement arrangement may vary depending on the facts and circumstances, including the method or methods of payment utilized within the mass transit system. The

employer must implement reasonable procedures to ensure that an amount equal to the reimbursement was incurred for transportation in a commuter highway vehicle, transit passes, or qualified parking. The expense must be substantiated within a reasonable period of time. An expense substantiated to the payor within 180 days after it has been paid will be treated as having been substantiated within a reasonable period of time. An employee certification at the time of reimbursement in either written or electronic form may be a reasonable reimbursement procedure depending on the facts and circumstances. Examples of reasonable reimbursement procedures are set forth in paragraph (d) of this Q/A–16.

(d) *Illustrations of reasonable reimbursement procedures.* The following are examples of reasonable reimbursement procedures for purposes of paragraph (c) of this Q/A–16. In each case, the reimbursement is made at or within a reasonable period after the end of the events described in paragraphs (d)(1) through (d)(3) of this section.

(1) An employee presents to the employer a parking expense receipt for parking on or near the employer's business premises, the employee certifies that the parking was used by the employee, and the employer has no reason to doubt the employee's certification.

(2) An employee either submits a used time-sensitive transit pass (such as a monthly pass) to the employer and certifies that he or she purchased it or presents an unused or used transit pass to the employer and certifies that he or she purchased it and the employee certifies that he or she has not previously been reimbursed for the transit pass. In both cases, the employer has no reason to doubt the employee's certification.

(3) If a receipt is not provided in the ordinary course of business (*e.g.,* if the employee uses metered parking or if used transit passes cannot be returned to the user), the employee certifies to the employer the type and the amount of expenses incurred, and the employer has no reason to doubt the employee's certification.

Q–17. May an employer provide nontaxable cash reimbursement under section 132(f) for periods longer than one month?

A–17. (a) *General rule.* Yes. Qualified transportation fringes include reimbursement to employees for costs incurred for transportation in more than one month, provided the reimbursement for each month in the period is calculated separately and does not exceed the applicable statutory monthly limit for any month in the period. See Q/A–8 and 9 of this section if the limit for a month is exceeded.

(b) *Example.* The following example illustrates the principles of this Q/A–17:

Example. (i) Employee R pays $100 per month for qualified parking used during the period from April 1 through June 30 of a year in which the statutory monthly qualified parking limit is $175. After receiving adequate substantiation from Employee R, R's employer reimburses R $300 in cash on June 30 of that year.

(ii) In this *Example*, because the value of the reimbursed expenses for each month did not exceed the applicable statutory monthly limit, the $300 reimbursement is excludable from R's wages for income and employment tax purposes as a qualified transportation fringe.

Q–18. What are the substantiation requirements if an employer distributes transit passes?

A–18. There are no substantiation requirements if the employer distributes transit passes. Thus, an employer may distribute a transit pass for each month with a value not more than the statutory monthly limit without requiring any certification from the employee regarding the use of the transit pass.

Q–19. May an employer choose to impose substantiation requirements in addition to those described in this regulation?

A–19. Yes.

Q–20. How is the value of parking determined?

A–20. Section 1.61–21(b)(2) applies for purposes of determining the value of parking.

Q–21. How do the qualified transportation fringe rules apply to van pools?

A–21. (a) *Van pools generally.* Employer and employee-operated van pools, as well as private or public transit-operated van pools, may qualify as qualified transportation fringes. The value of van pool benefits which are qualified transportation fringes may be excluded up to the applicable statutory monthly limit for transportation in a commuter highway vehicle and transit passes, less the value of any transit passes provided by the employer for the month.

(b) *Employer-operated van pools.* The value of van pool transportation provided by or for an employer to its employees is excludable as a qualified transportation fringe, provided the van qualifies as a commuter highway vehicle as defined in section 132(f)(5)(B) and Q/A–2 of this section. A van pool is operated by or for the employer if the employer purchases or leases vans to enable employees to commute together or the employer contracts with and pays a third party to provide the vans and some or all of the costs of operating the vans, including maintenance, liability insurance and other operating expenses.

(c) *Employee-operated van pools.* Cash reimbursement by an employer to employees for expenses incurred for transportation in a van pool operated by employees independent of their employer are excludable as qualified transportation fringes, provided that the van qualifies as a commuter highway vehicle as defined in section 132(f)(5)(B) and Q/A–2 of this section. See Q/A–16 of this section for the rules governing cash reimbursements.

(d) *Private or public transit-operated van pool transit passes.* The qualified transportation fringe exclusion for transit passes is available for travel in van pools owned and operated either by public transit authorities or by any person in the business of transporting persons for compensation or hire. In accordance with paragraph (b) of Q/A–3 of this section, the van must seat at least 6 adults (excluding the driver). See Q/A–16(b) and (c) of this section for a special rule for cash reimbursement for transit passes and the substantiation requirements for cash reimbursement.

(e) *Value of van pool transportation benefits.* Section 1.61–21(b)(2) provides that the fair market value of a fringe benefit is based on all the facts and circumstances. Alternatively, transportation in an employer-provided commuter highway vehicle may be valued under the automobile lease valuation rule in § 1.61–21(d), the vehicle cents-per-mile rule in § 1.61–21(e), or the commuting valuation rule in § 1.61–21(f). If one of these special valuation rules is used, the employer must use the same valuation rule to value the use of the commuter highway vehicle by each employee who share the use. See § 1.61–21(c)(2)(i)(B).

(f) *Qualified parking prime member.* If an employee obtains a qualified parking space as a result of membership in a car or van pool, the applicable statutory monthly limit for qualified parking applies to the individual to whom the parking space is assigned. This individual is the prime member. In determining the tax consequences to the prime member, the statutory monthly limit amounts of each car pool member may not be combined. If the employer provides access to the space and the space is not assigned to a particular individual, then the employer must designate one of its employees as the prime member who will bear the tax consequences. The employer may not designate more than one prime member for a car or van pool during a month.

The employer of the prime member is responsible for including the value of the qualified parking in excess of the statutory monthly limit in the prime member's wages for income and employment tax purposes.

Q–22. What are the reporting and employment tax requirements for qualified transportation fringes?

A–22. (a) *Employment tax treatment generally.* Qualified transportation fringes not exceeding the applicable statutory monthly limit described in Q/A–7 of this section are not wages for purposes of the Federal Insurance Contributions Act (FICA), the Federal Unemployment Tax Act (FUTA), and federal income tax withholding. Any amount by which an employee elects to reduce compensation as provided in Q/A–11 of this section is not subject to the FICA, the FUTA, and federal income tax withholding. Qualified transportation fringes exceeding the applicable statutory monthly limit described in Q/A–7 of this section are wages for purposes of the FICA, the FUTA, and federal income tax withholding and are reported on the employee's Form W–2, Wage and Tax Statement.

(b) *Employment tax treatment of cash reimbursement exceeding monthly limits.* Cash reimbursement to employees (for example, cash reimbursement for qualified parking) in excess of the applicable statutory monthly limit under section 132(f) is treated as paid for employment tax purposes when actually or constructively paid. See §§ 31.3121(a)–2(a), 31.3301–4, 31.3402(a)–1(b) of this chapter. Employers must report and deposit the amounts withheld in addition to reporting and depositing other employment taxes. See Q/A–16 of this section for rules governing cash reimbursements.

(c) *Noncash fringe benefits exceeding monthly limits.* If the value of noncash qualified transportation fringes exceeds the applicable statutory monthly limit, the employer may elect, for purposes of the FICA, the FUTA, and federal income tax withholding, to treat the noncash taxable fringe benefits as paid on a pay period, quarterly, semi-annual, annual, or other basis, provided that the benefits are treated as paid no less frequently than annually.

Q–23. How does section 132(f) interact with other fringe benefit rules?

A–23. For purposes of section 132, the terms working condition fringe and de minimis fringe do not include any qualified transportation fringe under section 132(f). If, however, an employer provides local transportation other than transit passes (without any direct or indirect compensation reduction election), the value of the benefit may be excludable, either totally or partially, under fringe benefit rules other than the qualified transportation fringe rules under section 132(f). See §§ 1.132–6(d)(2)(i) (occasional local transportation fare), 1.132–6(d)(2)(iii) (transportation provided under unusual circumstances), and 1.61–21(k) (valuation of local transportation provided to qualified employees). See also Q/A–4(b) of this section.

Q–24. May qualified transportation fringes be provided to individuals who are partners, 2-percent shareholders of S-corporations, or independent contractors?

A–24. (a) *General rule.* Section 132(f)(5)(E) states that self-employed individuals who are employees within the meaning of section 401(c)(1) are not employees for purposes of section 132(f). Therefore, individuals who are partners, sole proprietors, or other independent contractors are not employees for purposes of section 132(f). In addition, under section 1372(a), 2-percent shareholders of S corporations are treated as partners for fringe benefit purposes. Thus, an individual who is both a 2-percent shareholder of an S corporation and a common law employee of that S corporation is not considered an employee for purposes of section 132(f). However, while section 132(f) does not apply to individuals who are partners, 2-percent shareholders of S corporations, or independent contractors, other exclusions for working condition and de minimis fringes may be available as described in paragraphs (b) and (c) of this Q/A–24. See §§ 1.132–1(b)(2) and 1.132–1(b)(4).

(b) *Transit passes.* The working condition and de minimis fringe exclusions under section 132(a)(3) and (4) are available for transit passes provided to individuals who are partners, 2-percent shareholders, and independent contractors. For example, tokens or farecards provided by a partnership to an individual who is a partner that enable the partner to commute on a public transit system (not including privately-operated van pools) are excludable from the partner's gross income if the value of the tokens and farecards in any month does not exceed the dollar amount specified in § 1.132–6(d)(1). However, if the value of a pass provided in a month exceeds the dollar amount specified in § 1.132–6(d)(1), the full value of the benefit provided (not merely the amount in excess of the dollar amount specified in § 1.132–6(d)(1)) is includible in gross income.

(c) *Parking.* The working condition fringe rules under section 132(d) do not apply to commuter parking. See § 1.132–5(a)(1). However, the de minimis fringe rules under section 132(e) are available for parking provided to individuals who are partners, 2-percent shareholders, or independent contractors that qualifies under the de minimis rules. See § 1.132–6(a) and (b).

(d) *Example.* The following example illustrates the principles of this Q/A–24:

Example. (i) Individual G is a partner in partnership P. Individual G commutes to and from G's office every day and parks free of charge in P's lot.

(ii) In this *Example,* the value of the parking is not excluded under section 132(f), but may be excluded under section 132(e) if the parking is a de minimis fringe under § 1.132–6.

Q–25. What is the effective date of this section?

A–25. (a) Except as provided in paragraph (b) of this Q/A–25, this section is applicable for taxable years beginning after December 31, 2001.

(b) The last sentence of paragraph (b)(5) of Q/A–16 of this section (relating to whether transit system vouchers for transit passes are readily available) is effective for taxable years beginning after December 31, 2003.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 5. The authority citation for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 6. In § 602.101, paragraph (b) is amended by adding an entry in numerical order to the table to read as follows:

§ 602.101 OMB Control numbers.

* * * * *

(b)

CFR part or section where identified and described	Current OMB control No.
* * * * *	
1.132–9(b)	1545–1676

[TD 8936]

RIN 1545–AW17

Definition of Contribution in Aid of Construction Under Section 118(c)

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations concerning an exclusion from gross income for a contribution in aid of construction under section 118(c) that is treated as a contribution to capital under section 118(a). The final regulations affect a regulated public utility that provides water or sewerage services because a qualifying contribution in aid of construction is treated as a contribution to the capital of the utility and excluded from gross income. The final regulations provide guidance on the definition of a contribution in aid of construction, the adjusted basis of any property acquired with a contribution in aid of construction, the information relating to a contribution in aid of construction required to be furnished by the utility, and the time and manner for providing that information to the IRS.

DATES: *Effective Date:* These regulations are effective January 11, 2001.

Date of Applicability: For date of applicability of § 1.118–2, see § 1.118–2(f).

FOR FURTHER INFORMATION CONTACT: Paul Handleman, (202) 622–3040 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collections of information contained in these final regulations have been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507) under control number 1545–1639. Responses to these collections of information are mandatory.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number.

The estimated annual burden per respondent varies from .5 hour to 5 hours, depending on individual circumstances, with an estimated average of 1 hour.

Comments concerning the accuracy of these burden estimates and suggestions for reducing these burdens should be sent to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, W:CAR:MP:FP:S:O, Washington, DC 20224, and to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Books or records relating to this collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

On December 20, 1999, the IRS published proposed regulations (REG–106012–98) in the **Federal Register** (64 FR 71082) inviting comments under section 118(c). A public hearing was held April 27, 2000. Numerous comments have been received. After consideration of all the comments, the proposed regulations are adopted as revised by this Treasury decision.

Summary of Comments

Under section 118(a), gross income does not include any contribution to the capital of the taxpayer. Section 118(c)(1) provides that a contribution to the capital of a taxpayer includes any amount of money or other property received from any person (whether or not a shareholder) by a regulated public utility that provides water or sewerage disposal services if the amount is a contribution in aid of construction, satisfies the expenditure rule, and is not included in rate base for ratemaking purposes. Pursuant to the authority granted to the Secretary under section 118(c)(3)(A), the proposed regulations define a *contribution in aid of construction* as any amount of money or other property contributed to a regulated public utility that provides water or sewerage disposal services to the extent that the purpose of the contribution is to provide for the expansion, improvement, or replacement of the utility's water or sewerage disposal facilities.

Customer Connection Fees

The proposed regulations define nontaxable contributions in aid of construction to exclude customer connection fees. Customer connection fees are defined in the proposed regulations to include amounts paid for the cost of installing a connection or service line (including the cost of meters and piping) from the utility's main lines to the lines owned by the customer, unless the connection or service line serves, or is designed to serve, more than one customer. Customer connection fees also are defined in the proposed regulations to include any amounts paid as service charges for starting or stopping services.

Several commentators contend that connection and service lines should not be treated as taxable customer connection fees for a number of reasons. For example, these commentators argue that the omission from the current law of the language included in former section 118(b)(3)(A) that directed the Secretary to define a contribution in aid of construction to exclude amounts paid to connect the customer's line to a main water or sewer line signals congressional intent to include connection and service lines in the definition of a nontaxable contribution in aid of construction. In addition, some of these commentators believe that the inclusion of connection and service lines as taxable customer connection fees is inconsistent with the judicial interpretation of a contribution in aid of construction, which arguably would treat contributions for main lines and connection and service lines as taxable prerequisites for services under the Supreme Court's decision in *United States* v. *Chicago, Burlington & Quincy R.R.*, 412 U.S. 401 (1973) (1973–2 C.B. 428). Some of these commentators also contend that the exclusion of connection and service lines from the definition of a nontaxable contribution in aid of construction is inconsistent with regulatory accounting treatment, which does not distinguish between main lines and connection and service lines for purposes of classifying property or for purposes of ratemaking. Finally, a few of these commentators point out that the inclusion of connection and service lines as taxable customer connection fees will result in customers being required to gross-up their contributions of connection and service lines for taxes, increasing the cost of housing and development and creating a competitive disadvantage for investor-owned utilities.

The IRS and Treasury Department do not agree with the commentators' position with respect to connection and service lines. As explained in the preamble to the proposed regulations, the inclusion of connection and service lines in the definition of taxable customer connection fees is consistent with the legislative history explanation that section 118(c) was intended to restore the contribution in aid of construction provision of former section

118(b) that was repealed by The Tax Reform Act of 1986 for regulated public utilities that provide water or sewerage disposal services. H.R. Conf. Rep. No. 737, 104th Cong., 2d Sess. 316 (1996) (1996–3 C.B. 741, 1056). While the language regarding the definition of a contribution in aid of construction did change from the language in former section 118(b), Congress did not explicitly include connection and service lines in the definition of a contribution in aid of construction but instead directed the Secretary to define a contribution in aid of construction, presumably aware of the IRS' and Treasury Department's position that connection and service lines are taxable customer connection fees based on Rev. Rul. 75–557 (1975–2 C.B. 33), and the proposed regulations under former section 118(b) (43 FR 22997 (May 30, 1978)). Moreover, the IRS and Treasury Department continue to believe that the exclusion of connection and service lines from a nontaxable contribution in aid of construction is more consistent with the judicial and regulatory interpretation of a contribution in aid of construction and with the Supreme Court's directive that exclusions be narrowly construed. See, for example, *Edwards* v. *Cuba R.R.*, 268 U.S. 628 (1925) (IV–2 C.B. 122); *Detroit Edison Co.* v. *Commissioner*, 319 U.S. 98 (1943) (1943 C.B. 1019); *Chicago, Burlington & Quincy R.R.*, 412 U.S. at 401; *Florida Progress Corp.* v. *United States*, No. 93–246–CIV–T–25A (M.D. Fla. July 2, 1998), *appeal docketed,* No. 99–15389–FF (11th Cir. Dec. 29, 1999); *Commissioner* v. *Schleier*, 515 U.S. 323, 328 (1995); and Rev. Rul. 75–557. As explained by the court in *Teco Energy, Inc.* v. *United States*, No. 98–430–Civ–J–TJC (M.D. Fla. Oct. 21, 1999), ''former [section] 118(b) codifies the principles of *Edwards* that payments made by a government or other group to a utility to encourage the extension of facilities into new areas benefiting a large number of people are given tax free status, while also affirming the reasoning of *Detroit Edison* Revenue Ruling 75–557, that payments made by an individual or business entity to a utility as a prerequisite to receiving water or sewage services would be treated as taxable income to the utility.'' Further, the IRS and Treasury Department believe that the definition of a contribution in aid of construction used for regulatory accounting purposes should not control for tax purposes. See, for example, *Thor Power Tool Co.* v. *Commissioner*, 439 U.S. 522, 541–45 (1979) (1979–1 C.B. 167). Accordingly, the final regulations retain the exclusion of connection and service lines from the definition of a nontaxable contribution in aid of construction.

Some commentators state that, before the proposed regulations were published, some utilities took the position that payments for connection and service lines were not taxable and did not charge their contributors a sufficient amount to cover their tax liabilities. The IRS and Treasury Department understand that there was uncertainty before the proposed regulations were published and that some utilities may have reasonably interpreted section 118(c)(3)(A) to mean that connection and service lines should not be treated as taxable. It is clear that these final regulations apply to money and other property received on or after January 11, 2001 and do not apply to transactions entered into prior to that date. In addition, the IRS will take into account all the facts and circumstances in applying section 118(c) to such transactions.

Commentators suggest that customer connection fees relating to services provided to public authorities, such as schools, hospitals, public libraries, and governmental entities, should be included in the definition of nontaxable contributions in aid of construction because these services provide a broad public benefit. In addition, commentators recommend that customer connection fees relating to fire protection services should qualify as nontaxable contributions in aid of construction because a utility receives no revenue for public fire protection services and only a nominal standby fee for private fire protection services. The IRS and Treasury Department believe that, regardless of whether the activities of public authorities provide a public benefit, connection and service lines that serve these customers should be treated in the same manner as connection or service lines to any paying customer—as a prerequisite for services. Consequently, the final regulations continue to treat amounts paid for connection and service lines with respect to public authorities as customer connection fees. However, the IRS and the Treasury Department agree with commentators that amounts paid with respect to fire protection services should not be considered customer connection fees.

Several commentators suggest that connection and service lines that serve more than one user, such as lines for apartment houses, condominium projects, shopping malls, and office buildings, should be considered to serve more than one customer and, thus, be excluded from taxable customer connection fees, regardless of whether the utility treats the facility as one customer or many. The final regulations do not adopt this suggestion because whether connection or service lines are designed to serve more than one customer does not depend on the number of users but upon the number of customers. Thus, for example, if a water or sewerage disposal utility treats an apartment or office building as one utility customer, then the cost of connecting the utility's main lines to the connection or service lines serving that single customer is a taxable customer connection fee.

Binding Agreement Rule

The proposed regulations provide that if a water or sewerage disposal facility is placed in service by the utility before an amount is contributed to the utility, the contribution is not a nontaxable contribution in aid of construction unless, at the time the facility is placed in service by the utility, there is an agreement, binding under local law between the prospective contributor and the utility, that the utility is to receive the amount as reimbursement for the cost of acquiring or constructing the facility.

Commentators suggest that the binding agreement rule should be expanded to include enforceable public utility commission orders and tariffs. The final regulations adopt this suggestion by treating an order or a tariff, issued or approved by the applicable public utility commission, that requires a current or prospective customer to reimburse the utility for the cost of acquiring or constructing the facility as a binding agreement. Because public utility commission orders or tariffs may be issued or approved before or after the facility is placed in service, the final regulations also extend the time for entering into a binding agreement or the issuance or approval of an order or a tariff to no later than 8½ months after the close of the taxable year (the usual due date with extensions for a taxpayer's return) in which the facility is placed in service.

One commentator suggests adding an example demonstrating that payments made pursuant to a binding agreement qualify as a contribution in aid of construction under section 118(c). The final regulations adopt this suggestion.

Basis Rules

The proposed regulations provide that the basis of a water or sewerage facility acquired or constructed with a contribution under a binding agreement must be reduced by the amount of the contribution at the time the facility is

placed in service. Several commentators suggest that if the receipt of all of the expected contributions under the agreement occurs more than one or two years after a facility is placed in service, the utility should be permitted to claim the full cost of the facility as basis for depreciation purposes, subject to adjustment as the contributions are received. The final regulations do not adopt this comment because section 118(c)(4) disallows any depreciation deductions for a water or sewerage disposal facility that is fully paid with a nontaxable contribution in aid of construction under section under section 118(c). This result is consistent with similar rules that either exclude expected contributions from basis or deny a deduction to the extent the taxpayer has a right to, or reasonable prospect of, reimbursement. See, for example, § 1.110–1(b)(4)(ii)(B); § 1.165–1(d)(2)(i); and Rev. Rul. 79–263 (1979–2 C.B. 82).

The proposed regulations provide that, if a contribution in aid of construction treated as a contribution to the capital of the taxpayer is repaid to the contributor, either in whole or in part, then the repayment amount is a capital expenditure in the taxable year in which it is paid or incurred, resulting in an increase in the property's adjusted basis in such year. A couple of commentators suggest that the repayment should be depreciated over the remaining life of the property. The final regulations adopt this suggestion.

Reporting Requirement

The proposed regulations provide that a taxpayer treating a contribution in aid of construction as a contribution to capital must file a statement with its tax returns to report the amount of the contribution in aid of construction the taxpayer: (1) Expended during the taxable year for property described in section 118(c)(2)(A) (qualified property); (2) does not intend to expend for qualified property; and (3) failed to expend for qualified property. Several commentators express concern that the reporting requirement in the proposed regulations exceeds the intent of the statute because section 118(c)(2)(C) only requires the maintenance of adequate records. However, section 118(d)(1) provides that if the taxpayer for any taxable year treats an amount as a contribution to the capital of the taxpayer described in section 118(c), then the statutory period for the assessment of any deficiency attributable to any part of the amount does not expire before the expiration of 3 years from the date the Secretary is notified by the taxpayer (in such manner as the Secretary may prescribe) of the amount of the expenditure referred to in section 118(c)(2)(A), of the taxpayer's intention not to make the expenditures referred to in section 118(c)(2)(A), or of a failure to make the expenditure within the period described in section 118(c)(2)(B). Thus, the regulations do not impose an additional reporting requirement but merely provide the time and manner in which taxpayers must notify the Secretary under section 118(d)(1) of amounts treated as contributions in aid of construction.

Collection of Information under Paperwork Reduction Act

Two comments were sent to OMB on the collection of information contained in the proposed regulations, with copies of the comments sent to the IRS Reports Clearance Officer. The commentators estimate that complying with the recordkeeping requirements of section 118(c)(2)(C) involves more hours and that the number of respondents is greater than estimated. The collection of information burden under the proposed regulations is based only upon the time for notifying the IRS of the required information under section 118(d)(1) and is not required to include the time for maintaining accurate books and records. Thus, the individual time to comply with the collection of information burden was not increased to reflect these commentators concerns. However, the estimated number of annual respondents has been increased to 300 and the estimated total annual reporting burden has been increased to 300 hours.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations. It is hereby certified that the collection of information in these regulations will not have a significant economic impact on a substantial number of small entities. This certification is based upon the fact that any burden on taxpayers is minimal. Accordingly, a Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. chapter 6) is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking preceding these regulations was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Drafting Information

The principal author of these regulations is Paul F. Handleman, Office of the Associate Chief Counsel (Passthroughs and Special Industries), IRS. However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 602 are amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 is amended by adding an entry in numerical order to read in part as follows:

Authority: 26 U.S.C. 7805 * * *
Section 1.118–2 also issued under 26 U.S.C. 118(c)(3)(A); * * *

Par. 2. Section 1.118–2 is added to read as follows:

§ 1.118–2 Contribution in aid of construction.

(a) *Special rule for water and sewerage disposal utilities*—(1) *In general.* For purposes of section 118, the term *contribution to the capital of the taxpayer* includes any amount of money or other property received from any person (whether or not a shareholder) by a regulated public utility that provides water or sewerage disposal services if—

(i) The amount is a contribution in aid of construction under paragraph (b) of this section;

(ii) In the case of a contribution of property other than water or sewerage disposal facilities, the amount satisfies the expenditure rule under paragraph (c) of this section; and

(iii) The amount (or any property acquired or constructed with the amount) is not included in the taxpayer's rate base for ratemaking purposes.

(2) *Definitions*—(i) *Regulated public utility* has the meaning given such term by section 7701(a)(33), except that such term does not include any utility which is not required to provide water or sewerage disposal services to members of the general public in its service area.

(ii) *Water or sewerage disposal facility* is defined as tangible property described in section 1231(b) that is used predominately (80% or more) in the trade or business of furnishing water or sewerage disposal services.

(b) *Contribution in aid of construction*—(1) *In general.* For purposes of section 118(c) and this section, the term *contribution in aid of construction* means any amount of money or other property contributed to a regulated public utility that provides water or sewerage disposal services to the extent that the purpose of the contribution is to provide for the expansion, improvement, or replacement of the utility's water or sewerage disposal facilities.

(2) *Advances.* A contribution in aid of construction may include an amount of money or other property contributed to a regulated public utility for a water or sewerage disposal facility subject to a contingent obligation to repay the amount, in whole or in part, to the contributor (commonly referred to as an advance). For example, an amount received by a utility from a developer to construct a water facility pursuant to an agreement under which the utility will pay the developer a percentage of the receipts from the facility over a fixed period may constitute a contribution in aid of construction. Whether an advance is a contribution or a loan is determined under general principles of federal tax law based on all the facts and circumstances. For the treatment of any amount of a contribution in aid of construction that is repaid by the utility to the contributor, see paragraphs (c)(2)(ii) and (d)(2) of this section.

(3) *Customer connection fee*—(i) *In general.* Except as provided in paragraph (b)(3)(ii) of this section, a customer connection fee is not a contribution in aid of construction under this paragraph (b) and generally is includible in income. The term *customer connection fee* includes any amount of money or other property transferred to the utility representing the cost of installing a connection or service line (including the cost of meters and piping) from the utility's main water or sewer lines to the line owned by the customer or potential customer. A customer connection fee also includes any amount paid as a service charge for starting or stopping service.

(ii) *Exceptions*—(A) *Multiple customers.* Money or other property contributed for a connection or service line from the utility's main line to the customer's or the potential customer's line is not a customer connection fee if the connection or service line serves, or is designed to serve, more than one customer. For example, a contribution for a split service line that is designed to serve two customers is not a customer connection fee. On the other hand, if a water or sewerage disposal utility treats an apartment or office building as one utility customer, then the cost of installing a connection or service line from the utility's main water or sewer lines serving that single customer is a customer connection fee.

(B) *Fire protection services.* Money or other property contributed for public and private fire protection services is not a customer connection fee.

(4) *Reimbursement for a facility previously placed in service*—(i) *In general.* If a water or sewerage disposal facility is placed in service by the utility before an amount is contributed to the utility, the contribution is not a contribution in aid of construction under this paragraph (b) with respect to the cost of the facility unless, no later than 8½ months after the close of the taxable year in which the facility was placed in service, there is an agreement, binding under local law, that the utility is to receive the amount as reimbursement for the cost of acquiring or constructing the facility. An order or tariff, binding under local law, that is issued or approved by the applicable public utility commission requiring current or prospective utility customers to reimburse the utility for the cost of acquiring or constructing the facility, is a binding agreement for purposes of the preceding sentence. If an agreement exists, the basis of the facility must be reduced by the amount of the expected contributions. Appropriate adjustments must be made if actual contributions differ from expected contributions.

(ii) *Example.* The application of paragraph (b)(4)(i) of this section is illustrated by the following example:

Example. M, a calendar year regulated public utility that provides water services, spent $1,000,000 for the construction of a water facility that can serve 200 customers. M placed the facility in service in 2000. In June 2001, the public utility commission that regulates M approves a tariff requiring new customers to reimburse M for the cost of constructing the facility by paying a service availability charge of $5,000 per lot. Pursuant to the tariff, M expects to receive reimbursements for the cost of the facility of $100,000 per year for the years 2001 through 2010. The reimbursements are contributions in aid of construction under paragraph (b) of this section because no later than 8½ months after the close of the taxable year in which the facility was placed in service there was a tariff, binding under local law, approved by the public utility commission requiring new customers to reimburse the utility for the cost of constructing the facility. The basis of the $1,000,000 facility is zero because the expected contributions equal the cost of the facility.

(5) *Classification by ratemaking authority.* The fact that the applicable ratemaking authority classifies any money or other property received by a utility as a contribution in aid of construction is not conclusive as to its treatment under this paragraph (b).

(c) *Expenditure rule*—(1) *In general.* An amount satisfies the expenditure rule of section 118(c)(2) if the amount is expended for the acquisition or construction of property described in section 118(c)(2)(A), the amount is paid or incurred before the end of the second taxable year after the taxable year in which the amount was received as required by section 118(c)(2)(B), and accurate records are kept of contributions and expenditures as provided in section 118(c)(2)(C).

(2) *Excess amount*—(i) *Includible in the utility's income.* An amount received by a utility as a contribution in aid of construction that is not expended for the acquisition or construction of water or sewerage disposal facilities as required by paragraph (c)(1) of this section (the excess amount) is not a contribution to the capital of the taxpayer under paragraph (a) of this section. Except as provided in paragraph (c)(2)(ii) of this section, such excess amount is includible in the utility's income in the taxable year in which the amount was received.

(ii) *Repayment of excess amount.* If the excess amount described in paragraph (c)(2)(i) of this section is repaid, in whole or in part, either—

(A) Before the end of the time period described in paragraph (c)(1) of this section, the repayment amount is not includible in the utility's income; or

(B) After the end of the time period described in paragraph (c)(1) of this section, the repayment amount may be deducted by the utility in the taxable year in which it is paid or incurred to the extent such amount was included in income.

(3) *Example.* The application of this paragraph (c) is illustrated by the following example:

Example. M, a calendar year regulated public utility that provides water services, received a $1,000,000 contribution in aid of construction in 2000 for the purpose of constructing a water facility. To the extent that the $1,000,000 exceeded the actual cost of the facility, the contribution was subject to being returned. In 2001, M built the facility at a cost of $700,000 and returned $200,000 to the contributor. As of the end of 2002, M had not returned the remaining $100,000. Assuming accurate records are kept, the requirement under section 118(c)(2) is satisfied for $700,000 of the contribution.

Because $200,000 of the contribution was returned within the time period during which qualifying expenditures could be made, this amount is not includible in M's income. However, the remaining $100,000 is includible in M's income for its 2000 taxable year (the taxable year in which the amount was received) because the amount was neither spent nor repaid during the prescribed time period. To the extent M repays the remaining $100,000 after year 2002, M would be entitled to a deduction in the year such repayment is paid or incurred.

(d) *Adjusted basis*—(1) *Exclusion from basis.* Except for a repayment described in paragraph (d)(2) of this section, to the extent that a water or sewerage disposal facility is acquired or constructed with an amount received as a contribution to the capital of the taxpayer under paragraph (a) of this section, the basis of the facility is reduced by the amount of the contribution. To the extent the water or sewerage disposal facility is acquired as a contribution to the capital of the taxpayer under paragraph (a) of this section, the basis of the contributed facility is zero.

(2) *Repayment of contribution.* If a contribution to the capital of the taxpayer under paragraph (a) of this section is repaid to the contributor, either in whole or in part, then the repayment amount is a capital expenditure in the taxable year in which it is paid or incurred, resulting in an increase in the property's adjusted basis in such year. Capital expenditures allocated to depreciable property under paragraph (d)(3) of this section may be depreciated over the remaining recovery period for that property.

(3) *Allocation of contributions.* An amount treated as a capital expenditure under this paragraph (d) is to be allocated proportionately to the adjusted basis of each property acquired or constructed with the contribution based on the relative cost of such property.

(4) *Example.* The application of this paragraph (d) is illustrated by the following example:

Example. A, a calendar year regulated public utility that provides water services, received a $1,000,000 contribution in aid of construction in 2000 as an advance from B, a developer, for the purpose of constructing a water facility. To the extent that the $1,000,000 exceeds the actual cost of the facility, the contribution is subject to being returned. Under the terms of the advance, A agrees to pay to B a percentage of the receipts from the facility over a fixed period, but limited to the cost of the facility. In 2001, A builds the facility at a cost of $700,000 and returns $300,000 to B. In 2002, A pays $20,000 to B out of the receipts from the facility. Assuming accurate records are kept, the $700,000 advance is a contribution to the capital of A under paragraph (a) of this section and is excludable from A's income. The basis of the $700,000 facility constructed with this contribution to capital is zero. The $300,000 excess amount is not a contribution to the capital of A under paragraph (a) of this section because it does not meet the expenditure rule described in paragraph (c)(1) of this section. However, this excess amount is not includible in A's income pursuant to paragraph (c)(2)(ii) of this section since the amount is repaid to B within the required time period. The repayment of the $300,000 excess amount to B in 2001 is not treated as a capital expenditure by A. The $20,000 payment to B in 2002 is treated as a capital expenditure by A in 2002 resulting in an increase in the adjusted basis of the water facility from zero to $20,000.

(e) *Statute of limitations*—(1) *Extension of statute of limitations.* Under section 118(d)(1), the statutory period for assessment of any deficiency attributable to a contribution to capital under paragraph (a) of this section does not expire before the expiration of 3 years after the date the taxpayer notifies the Secretary in the time and manner prescribed in paragraph (e)(2) of this section.

(2) *Time and manner of notification.* Notification is made by attaching a statement to the taxpayer's federal income tax return for the taxable year in which any of the reportable items in paragraphs (e)(2)(i) through (iii) of this section occur. The statement must contain the taxpayer's name, address, employer identification number, taxable year, and the following information with respect to contributions of property other than water or sewerage disposal facilities that are subject to the expenditure rule described in paragraph (c) of this section—

(i) The amount of contributions in aid of construction expended during the taxable year for property described in section 118(c)(2)(A) (qualified property) as required under paragraph (c)(1) of this section, identified by taxable year in which the contributions were received;

(ii) The amount of contributions in aid of construction that the taxpayer does not intend to expend for qualified property as required under paragraph (c)(1) of this section, identified by taxable year in which the contributions were received; and

(iii) The amount of contributions in aid of construction that the taxpayer failed to expend for qualified property as required under paragraph (c)(1) of this section, identified by taxable year in which the contributions were received.

(f) *Effective date.* This section is applicable for any money or other property received by a regulated public utility that provides water or sewerage disposal services on or after January 11, 2001.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 3. The authority citation for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 4. In § 602.101, paragraph (b) is amended by adding an entry to the table in numerical order to read as follows:

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 7

[TD 8937]

RIN 1545–AY53

Stock Transfer Rules: Transition Rules

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations and removal of temporary regulations.

SUMMARY: This document contains final regulations addressing distributions with respect to, or a disposition of, certain stock that was subject to prior temporary regulations under section 367(b). Section 367(b) addresses the application of nonrecognition exchange provisions in Subchapter C of the Internal Revenue Code to transactions that involve one or more foreign corporations.

DATES: *Effective Date.* These regulations are effective as of January 11, 2001.

Applicability Dates. These regulations apply to distributions or dispositions that occur on or after January 11, 2001.

FOR FURTHER INFORMATION CONTACT: Mark D. Harris, (202) 622–3860 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

On January 24, 2000, the IRS and Treasury issued final regulations under section 367(b) of the Internal Revenue Code (Code). At the same time, the IRS and Treasury also modified temporary regulation § 7.367(b)-12(a). The final regulations and modified temporary regulation were effective as of February 23, 2000.

As modified, § 7.367(b)-12(a) addresses distributions with respect to, or a disposition of, stock that was subject to certain provisions of the temporary section 367(b) regulations that were in effect before February 23, 2000. This document finalizes the rule stated in § 7.367(b)-12(a) in order to insure its continued application. See section 7805(e)(2) (stating a ''sunset rule'' applicable to temporary regulations).

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because the notice of proposed rulemaking preceding the regulations was issued prior to March 29, 1996, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply.

Pursuant to section 7805(f) of the Code, the notice of proposed rulemaking preceding these regulations was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on the impact of the proposed regulations on small business.

Drafting Information

The principal author of these regulations is Mark Harris of the Office of Associate Chief Counsel (International). However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects 26 CFR Parts 1 and 7

(b) Applicable rules.
(c) Effective date.

Par. 3. Section 1.367(b)–12 is added to read as follows:

§ 1.367(b)–12 Subsequent treatment of amounts attributed or included in income.

(a) *In general.* This section applies to distributions with respect to, or a disposition of, stock—

(1) To which, in connection with an exchange occurring before February 23, 2000, an amount has been attributed pursuant to § 7.367(b)–9 or 7.367(b)–10 of this chapter (as in effect prior to February 23, 2000, see 26 CFR part 1 revised as of April 1, 1999); or

(2) In respect of which, before February 23, 2000, an amount has been included in income or added to earnings and profits pursuant to § 7.367(b)–7 or § 7.367(b)–10 of this chapter (as in effect prior to February 23, 2000, see 26 CFR part 1 revised as of April 1, 1999).

(b) *Applicable rules.* See § 7.367(b)–12(b) through (e) of this chapter (as in effect prior to January 11, 2001, see 26 CFR part 1 revised as of April 1, 2000) for purposes of applying paragraph (a) of this section.

(c) *Effective date.* This section applies to distributions or dispositions that occur on or after January 11, 2001.

PART 7—TEMPORARY INCOME TAX REGULATIONS UNDER THE TAX REFORM ACT OF 1976

Par. 4. The authority citation for part 7 is amended by removing the entry for § 7.367(b)–12 and continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

§ 7.367(b)–12 [Removed]

Par. 5. Section 7.367(b)–12 is removed.

Approved: December 28, 2000

Timely Mailing Treated as Timely Filing/Electronic Postmark

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations; and removal of temporary regulations.

SUMMARY: This document contains regulations relating to timely mailing treated as timely filing and paying under section 7502 of the Internal Revenue Code. The regulations generally reflect changes to the law made since 1960. In addition, the regulations provide that the date of an electronic postmark will be the filing date under certain circumstances. The regulations affect taxpayers who file documents or make payments or deposits.

DATES: *Effective Date:* These regulations are effective January 11, 2001.

Applicability Date: For dates of applicability, see §§ 301.7502–1(g) and 301.7502–2(e).

FOR FURTHER INFORMATION CONTACT: Charles A. Hall, (202) 622–4940 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document contains amendments to the Regulations on Procedure and Administration (26 CFR part 301) under section 7502 relating to timely mailing treated as timely filing and paying. A notice of proposed rulemaking (REG–115433–98) was published in the **Federal Register** (64 FR 2606) on January 15, 1999. Temporary regulations (TD 8807) relating to electronic postmarks for electronically filed income tax returns were published in the **Federal Register** for the same day (64 FR 2568). No public hearing was requested or held. No comments were received from the public in response to the notice of proposed rulemaking. The proposed regulations under section

7502 are adopted as revised by this Treasury decision and the corresponding temporary regulations are removed. The revisions are discussed below.

Explanation of Revisions

In the notice of proposed rulemaking, the IRS and the Treasury Department requested comments regarding whether section 7502 should apply to claims for credit or refund made on late filed original income tax returns. No comments were received on this issue. However, the IRS and the Treasury Department have determined that, in certain situations, a claim for credit or refund made on a late filed original income tax return should be treated under section 7502 as timely filed on the postmark date for purposes of section 6511(b)(2)(A). This is consistent with the opinion of the United States Court of Appeals for the Second Circuit in *Weisbart* v. *United States Department of Treasury and Internal Revenue Service,* 222 F.3d 93 (2d Cir. 2000), *rev'g* 99–1 USTC (CCH) ¶ 50,549 (E.D.N.Y. 1999), AOD–CC–2000–09 (Nov. 13, 2000).

The IRS and the Treasury Department have further determined that claims for credit or refund made on late filed original tax returns other than income tax returns should also be treated under section 7502 as timely filed on the postmark date for purposes of section 6511(b)(2)(A). This would include returns such as Form 720, Quarterly Federal Excise Tax Return, and Form 706, U.S. Estate Tax Return. Moreover, the IRS and the Treasury Department have determined that the late filed original tax return, as well as the claim for credit or refund, should also be treated as filed on the postmark date. These changes, which are reflected in § 301.7502–1(f), will assist taxpayers in filing timely claims for credit or refund, and will be applied retroactively to certain previously disallowed claims for credit or refund.

These changes are effective for any claim for credit or refund on a late filed tax return described in § 301.7502–1(f)(1) except for those claims for credit or refund which (without regard to paragraph (f) of this section) were barred by the operation of section 6532(a) or any other law or rule of law (including res judicata) as of January 11, 2001. See § 301.7502–1(g)(2), which provides the effective date rules for § 301.7502–1(f).

Consistent with the effective date rules for § 301.7502–1(f), the IRS will attempt to identify as many claims as possible that were filed on untimely original individual income tax returns and that were previously disallowed based on the Government's position in *Weisbart*. In these cases, the IRS intends to issue a refund, or credit the overpayment against a liability as provided in section 6402, without the need for the taxpayer to contact the IRS. Such automatic reconsideration of the claim will generally occur if the claim was filed on an individual income tax return for 1995 or a subsequent calendar year. Claims filed on other types of original returns will not receive automatic reconsideration under this program, *e.g.,* individual returns for years prior to 1995.

Because the IRS will be undertaking the automatic reconsideration program described above and intends to complete the program by June 30, 2001, taxpayers who have filed income tax refund claims for tax year 1995 and later years that qualify under § 301.7502–1(f) need not contact the IRS regarding their claims unless the two-year period for filing a refund suit under section 6532(a) for their denied claim will expire prior to June 30, 2001. In such cases, taxpayers are advised to file a request for reconsideration with the appropriate IRS Service Center. Such a request should include a notation on the top of the first page that it is a ''*Weisbart* Claim.'' Such taxpayers are also advised to file a refund suit to protect their legal rights with respect to the claim. The IRS will respond to the requests for reconsideration after the IRS has finished identifying eligible claims under the automatic reconsideration program and paying those refunds. Taxpayers whose two-year period for filing a refund suit under section 6532(a) does not expire until after June 30, 2001, and who have not received a refund by that date, are advised to file a request for reconsideration with the appropriate IRS Service Center at that time.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because these regulations do not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking preceding these regulations was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Drafting Information

The principal author of these regulations is Charles A. Hall of the Office of Associate Chief Counsel, Procedure and Administration (Administrative Provisions and Judicial Practice Division). However, other personnel from the IRS and Treasury Department participated in their development.

Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Penalties, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 301 is amended as follows:

PART 301—PROCEDURE AND ADMINISTRATION

Paragraph 1. The authority citation for part 301 is amended by adding entries in numerical order to read as follows:

Authority: 26 U.S.C. 7805 * * *

Section 301.7502–1 also issued under 26 U.S.C. 7502.

Section 301.7502–2 also issued under 26 U.S.C. 7502.

* * * * *

Par. 2. Section 301.7502–1 is revised to read as follows:

§ 301.7502–1 Timely mailing of documents and payments treated as timely filing and paying.

(a) *General rule.* Section 7502 provides that, if the requirements of that section are met, a document or payment is deemed to be filed or paid on the date of the postmark stamped on the envelope or other appropriate wrapper (envelope) in which the document or payment was mailed. Thus, if the envelope that contains the document or payment has a timely postmark, the document or payment is considered timely filed or paid even if it is received after the last date, or the last day of the period, prescribed for filing the document or making the payment. Section 7502 does not apply in determining whether a failure to file a return or pay a tax has continued for an additional month or fraction thereof for purposes of computing the penalties and additions to tax imposed by section 6651. Except as provided in section 7502(e) and § 301.7502–2, relating to the timely mailing of deposits, and paragraph (d) of this section, relating to

electronically filed documents, section 7502 is applicable only to those documents or payments as defined in paragraph (b) of this section and only if the document or payment is mailed in accordance with paragraph (c) of this section and is delivered in accordance with paragraph (e) of this section.

(b) *Definitions*—(1) *Document defined.* (i) The term *document,* as used in this section, means any return, claim, statement, or other document required to be filed within a prescribed period or on or before a prescribed date under authority of any provision of the internal revenue laws, except as provided in paragraph (b)(1)(ii), (iii), or (iv) of this section.

(ii) The term does not include returns, claims, statements, or other documents that are required under any provision of the internal revenue laws or the regulations thereunder to be delivered by any method other than mailing.

(iii) The term does not include any document filed in any court other than the Tax Court, but the term does include any document filed with the Tax Court, including a petition and a notice of appeal of a decision of the Tax Court.

(iv) The term does not include any document that is mailed to an authorized financial institution under section 6302. However, see § 301.7502–2 for special rules relating to the timeliness of deposits and documents required to be filed with deposits.

(2) *Claims for refund.* In the case of certain taxes, a return may constitute a claim for credit or refund. In such a case, section 7502 is applicable to the claim for credit or refund if the conditions of such section are met, irrespective of whether the claim is also a return. For rules regarding claims for refund on late filed tax returns, see paragraph (f) of this section.

(3) *Payment defined.* (i) The term *payment,* as used in this section, means any payment required to be made within a prescribed period or on or before a prescribed date under the authority of any provision of the internal revenue laws, except as provided in paragraph (b)(3)(ii), (iii), (iv), or (v) of this section.

(ii) The term does not include any payment that is required under any provision of the internal revenue laws or the regulations thereunder to be delivered by any method other than mailing. See, for example, section 6302(h) and the regulations thereunder regarding electronic funds transfer.

(iii) The term does not include any payment, whether it is made in the form of currency or other medium of payment, unless it is actually received and accounted for. For example, if a check is used as the form of payment, this section does not apply unless the check is honored upon presentation.

(iv) The term does not include any payment to any court other than the Tax Court.

(v) The term does not include any deposit that is required to be made with an authorized financial institution under section 6302. However, see § 301.7502–2 for rules relating to the timeliness of deposits.

(4) *Last date or last day prescribed.* As used in this section, the term *the last date, or the last day of the period, prescribed for filing the document or making the payment* includes any extension of time granted for that action. When the last date, or the last day of the period, prescribed for filing the document or making the payment falls on a Saturday, Sunday or legal holiday, section 7503 applies. Therefore, in applying the rules of this paragraph (b)(4), the next succeeding day that is not a Saturday, Sunday, or legal holiday is treated as the last date, or the last day of the period, prescribed for filing the document or making the payment. Also, when the last date, or the last day of the period, prescribed for filing the document or making the payment falls within a period disregarded under section 7508 or section 7508A, the next succeeding day after the expiration of the section 7508 period or section 7508A period that is not a Saturday, Sunday, or legal holiday is treated as the last date, or the last day of the period, prescribed for filing the document or making the payment.

(c) *Mailing requirements*—(1) *In general.* Section 7502 does not apply unless the document or payment is mailed in accordance with the following requirements:

(i) *Envelope and address.* The document or payment must be contained in an envelope, properly addressed to the agency, officer, or office with which the document is required to be filed or to which the payment is required to be made.

(ii) *Timely deposited in U.S. mail.* The document or payment must be deposited within the prescribed time in the mail in the United States with sufficient postage prepaid. For this purpose, a document or payment is deposited in the mail in the United States when it is deposited with the domestic mail service of the U.S. Postal Service. The domestic mail service of the U.S. Postal Service, as defined by the Domestic Mail Manual as incorporated by reference in the postal regulations, includes mail transmitted within, among, and between the United States of America, its territories and possessions, and Army post offices (APO), fleet post offices (FPO), and the United Nations, NY. (See Domestic Mail Manual, section G011.2.1, as incorporated by reference in 39 CFR 111.1.) Section 7502 does not apply to any document or payment that is deposited with the mail service of any other country.

(iii) *Postmark*—(A) *U.S. Postal Service postmark.* If the postmark on the envelope is made by the U.S. Postal Service, the postmark must bear a date on or before the last date, or the last day of the period, prescribed for filing the document or making the payment. If the postmark does not bear a date on or before the last date, or the last day of the period, prescribed for filing the document or making the payment, the document or payment is considered not to be timely filed or paid, regardless of when the document or payment is deposited in the mail. Accordingly, the sender who relies upon the applicability of section 7502 assumes the risk that the postmark will bear a date on or before the last date, or the last day of the period, prescribed for filing the document or making the payment. See, however, paragraph (c)(2) of this section with respect to the use of registered mail or certified mail to avoid this risk. If the postmark on the envelope is made by the U.S. Postal Service but is not legible, the person who is required to file the document or make the payment has the burden of proving the date that the postmark was made. Furthermore, if the envelope that contains a document or payment has a timely postmark made by the U.S. Postal Service, but it is received after the time when a document or payment postmarked and mailed at that time would ordinarily be received, the sender may be required to prove that it was timely mailed.

(B) *Postmark made by other than U.S. Postal Service*—(*1*) *In general.* If the postmark on the envelope is made other than by the U.S. Postal Service—

(*i*) The postmark so made must bear a legible date on or before the last date, or the last day of the period, prescribed for filing the document or making the payment; and

(*ii*) The document or payment must be received by the agency, officer, or office with which it is required to be filed not later than the time when a document or payment contained in an envelope that is properly addressed, mailed, and sent by the same class of mail would ordinarily be received if it were postmarked at the same point of origin by the U.S. Postal Service on the last date, or the last day of the period, prescribed for filing the document or making the payment.

(*2*) *Document or payment received late.* If a document or payment described in paragraph (c)(1)(iii)(B)(*1*) is received after the time when a document or payment so mailed and so postmarked by the U.S. Postal Service would ordinarily be received, the document or payment is treated as having been received at the time when a document or payment so mailed and so postmarked would ordinarily be received if the person who is required to file the document or make the payment establishes—

(*i*) That it was actually deposited in the U.S. mail before the last collection of mail from the place of deposit that was postmarked (except for the metered mail) by the U.S. Postal Service on or before the last date, or the last day of the period, prescribed for filing the document or making the payment;

(*ii*) That the delay in receiving the document or payment was due to a delay in the transmission of the U.S. mail; and

(*iii*) The cause of the delay.

(*3*) *U.S. and non-U.S. postmarks.* If the envelope has a postmark made by the U.S. Postal Service in addition to a postmark not so made, the postmark that was not made by the U.S. Postal Service is disregarded, and whether the envelope was mailed in accordance with this paragraph (c)(1)(iii)(B) will be determined solely by applying the rule of paragraph (c)(1)(iii)(A) of this section.

(2) *Registered or certified mail.* If the document or payment is sent by U.S. registered mail, the date of registration of the document or payment is treated as the postmark date. If the document or payment is sent by U.S. certified mail and the sender's receipt is postmarked by the postal employee to whom the document or payment is presented, the date of the U.S. postmark on the receipt is treated as the postmark date of the document or payment. Accordingly, the risk that the document or payment will not be postmarked on the day that it is deposited in the mail may be eliminated by the use of registered or certified mail.

(d) *Electronically filed documents*—(1) *In general.* A document filed electronically with an electronic return transmitter (as defined in paragraph (d)(3)(i) of this section and authorized pursuant to paragraph (d)(2) of this section) in the manner and time prescribed by the Commissioner is deemed to be filed on the date of the electronic postmark (as defined in paragraph (d)(3)(ii) of this section) given by the authorized electronic return transmitter. Thus, if the electronic postmark is timely, the document is considered filed timely although it is received by the agency, officer, or office after the last date, or the last day of the period, prescribed for filing such document.

(2) *Authorized electronic return transmitters.* The Commissioner may enter into an agreement with an electronic return transmitter or prescribe in forms, instructions, or other appropriate guidance the procedures under which the electronic return transmitter is authorized to provide taxpayers with an electronic postmark to acknowledge the date and time that the electronic return transmitter received the electronically filed document.

(3) *Definitions*—(i) *Electronic return transmitter.* For purposes of this paragraph (d), the term *electronic return transmitter* has the same meaning as contained in section 3.01(4) of Rev. Proc. 2000–31 (2000–31 I.R.B. 146 (July 31, 2000))(see § 601.601(d)(2) of this chapter) or in procedures prescribed by the Commissioner.

(ii) *Electronic postmark.* For purposes of this paragraph (d), the term *electronic postmark* means a record of the date and time (in a particular time zone) that an authorized electronic return transmitter receives the transmission of a taxpayer's electronically filed document on its host system. However, if the taxpayer and the electronic return transmitter are located in different time zones, it is the taxpayer's time zone that controls the timeliness of the electronically filed document.

(e) *Delivery*—(1) Except as provided in section 7502(f) and paragraph (d) of this section, section 7502 is not applicable unless the document or payment is delivered by U.S. mail to the agency, officer, or office with which the document is required to be filed or to which payment is required to be made. However, in the case of a document (but not a payment) sent by registered or certified mail, proof that the document was properly registered or that a postmarked certified mail sender's receipt was properly issued and that the envelope was properly addressed to the agency, officer, or office constitutes prima facie evidence that the document was delivered to the agency, officer, or office.

(2) Section 7502 is applicable to the determination of whether a claim for credit or refund is timely filed for purposes of section 6511(a), assuming all the requirements of section 7502 are satisfied. Section 7502 is also applicable when a claim for credit or refund is delivered after the last day of the period specified in section 6511(b)(2)(A) or in any other corresponding provision of law relating to the limit on the amount of credit or refund that is allowable.

(3) *Example.* The rules of paragraph (e)(2) of this section are illustrated by the following example:

Example. (i) Taxpayer A, an individual, mailed his 1998 Form 1040, ''U.S. Individual Income Tax Return,'' on May 10, 1999, but no tax was paid at that time because the tax liability disclosed by the return had been completely satisfied by the income tax that had been withheld on A's wages. On April 15, 2002, A mails in accordance with the requirements of this section, a Form 1040X, ''U.S. Amended Individual Income Tax Return,'' claiming a refund of a portion of the tax that had been paid through withholding during 1998. The date of the postmark on the envelope containing the claim for refund is April 15, 2002. The claim is received by the Internal Revenue Service (IRS) on April 18, 2002.

(ii) Under section 6511(a), A's claim for refund is timely if filed within three years from May 10, 1999, the date on which A's 1998 return was filed. However, as a result of the limitations of section 6511(b)(2)(A), if his claim is not filed within three years after April 15, 1999, the date on which he is deemed under section 6513 to have paid his 1998 tax, he is not entitled to any refund. Thus, because A's claim for refund is postmarked and mailed in accordance with the requirements of this section and is delivered after the last day of the period specified in section 6511(b)(2)(A), section 7502 is applicable and the claim is deemed to have been filed on April 15, 2002.

(f) *Claim for credit or refund on late filed tax return*—(1) *In general.* Generally, an original income tax return may constitute a claim for credit or refund of income tax. See § 301.6402–3(a)(5). Other original tax returns can also be considered claims for credit or refund if the liability disclosed on the return is less than the amount of tax that has been paid. If section 7502 would not apply to a return (but for the operation of paragraph (f)(2) of this section) that is also considered a claim for credit or refund because the envelope that contains the return does not have a postmark dated on or before the due date of the return, section 7502 will apply separately to the claim for credit or refund if—

(i) The date of the postmark on the envelope is within the period that is three years (plus the period of any extension of time to file) from the day the tax is paid or considered paid (see section 6513), and the claim for credit or refund is delivered after this three-year period; and

(ii) The conditions of section 7502 are otherwise met.

(2) *Filing date of late filed return.* If the conditions of paragraph (f)(1) of this section are met, the late filed return will be deemed filed on the postmark date.

(3) *Example.* The rules of this paragraph (f) are illustrated by the following example:

Example. (i) Taxpayer A, an individual, mailed his 2001 Form 1040, ''U.S. Individual Income Tax Return,'' on April 15, 2005, claiming a refund of amounts paid through withholding during 2001. The date of the postmark on the envelope containing the return and claim for refund is April 15, 2005. The return and claim for refund are received by the Internal Revenue Service (IRS) on April 18, 2005. Amounts withheld in 2001 exceeded A's tax liability for 2001 and are treated as paid on April 15, 2002, pursuant to section 6513.

(ii) Even though the date of the postmark on the envelope is after the due date of the return, the claim for refund and the late filed return are treated as filed on the postmark date for purposes of this paragraph (f). Accordingly, the return will be treated as filed on April 15, 2005. In addition, the claim for refund will be treated as timely filed on April 15, 2005. Further, the entire amount of the refund attributable to withholding is allowable as a refund under section 6511(b)(2)(A).

(g) *Effective date*—(1) *In general.* Except as provided in paragraphs (g)(2) and (3) of this section, the rules of this section apply to any payment or document mailed and delivered in accordance with the requirements of this section in an envelope bearing a postmark dated after January 11, 2001.

(2) *Claim for credit or refund on late filed tax return.* Paragraph (f) of this section applies to any claim for credit or refund on a late filed tax return described in paragraph (f)(1) of this section except for those claims for credit or refund which (without regard to paragraph (f) of this section) were barred by the operation of section 6532(a) or any other law or rule of law (including res judicata) as of January 11, 2001.

(3) *Electronically filed documents.* This section applies to any electronically filed return, claim, statement, or other document transmitted to an electronic return transmitter that is authorized to provide an electronic postmark pursuant to paragraph (d)(2) of this section after January 11, 2001.

§ 301.7502–1T [Removed]

Par. 3. Section 301.7502–1T is removed.

Par. 4. Section 301.7502–2 is added to read as follows:

§ 301.7502–2 Timely mailing of deposits.

(a) *General rule*—(1) *Two day rule.* Section 7502(e) provides that, if the requirements of that section are met, a deposit is deemed to be received on the date the deposit was mailed even though it is received after the date prescribed for making the deposit. The requirements of the section are met if the person required to make the deposit establishes that the date of mailing was on or before the second day preceding the date prescribed for making the deposit. If the date of mailing was not established to be on or before the second day preceding the date prescribed for making the deposit, the deposit will not be considered timely received unless it is actually received on or before the date prescribed for making the deposit. Section 7502(e) only applies to a deposit mailed to the financial institution authorized to receive that deposit. Thus, section 7502(e) does not apply to any remittance mailed to an internal revenue service center.

(2) *Deposits of $20,000 or more.* Paragraph (a)(1) of this section does not apply with respect to any deposit of $20,000 or more by any person required to deposit any tax more than once a month. Any such deposit must be made by the due date for such deposit, regardless of the method of delivery.

(b) *Deposit defined.* The term *deposit,* as used in this section, means any deposit of tax required to be made on or before a prescribed date at an authorized financial institution pursuant to regulations prescribed under section 6302.

(c) *Mailing requirements*—(1) *In general.* Section 7502(e) does not apply unless the deposit is mailed in accordance with the requirements of paragraph (c)(2) of this section.

(2) *Requirements.* The date of mailing must fall on or before the second day preceding the prescribed date for making a deposit (including any extension of time granted for making the deposit). For example, if a deposit is due on or before January 15, the date of mailing must fall on or before January 13. The deposit must be contained in an envelope or other appropriate wrapper approved for use in the mails by the U.S. Postal Service, properly addressed to the financial institution authorized to receive the deposit. The deposit must be deposited with sufficient postage prepaid in the mail in the United States within the meaning of § 301.7502–1 on or before the second day preceding the prescribed date for making a deposit.

(3) *Registered and certified mail.* The provisions of § 301.7502–1(c)(2) apply to a deposit sent by U.S. registered mail or U.S. certified mail as if the deposit were a payment, except that the date of registration or the date of the postmark on the sender's receipt is considered the date of mailing of such deposit.

(d) *Delivery.* Section 7502(e) does not apply unless a deposit is actually delivered by U.S. mail to the authorized financial institution with which the deposit is required to be made and is accepted by that financial institution. For rules relating to the acceptance of deposits by authorized financial institutions see 31 CFR 203.18. The fact that a deposit is sent by U.S. registered or U.S. certified mail does not constitute prima facie evidence that the deposit was delivered to the financial institution authorized to receive the deposit. Section 7502(e) does not apply unless the deposit is delivered after the date prescribed for making the deposit.

(e) *Effective date.* This section applies to all deposits required to be made after January 11, 2001.

Robert E. Wenzel,

Deputy Commissioner of Internal Revenue.

Approved: December 21, 2000.

Jonathan Talisman,

Acting Assistant Secretary of the Treasury.

RIN 1545–AY59

Disclosure of Returns and Return Information to Designee of Taxpayer

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Temporary regulation.

SUMMARY: This document contains a temporary regulation relating to the disclosure of returns and return information to a designee of the taxpayer. The temporary regulation provides guidance to IRS employees responsible for disclosing returns and return information and to taxpayers who wish to designate a person or persons to whom returns and return information may be disclosed. The portion of this temporary regulation pertaining to nonwritten requests or consents reflects changes to the law made by the Taxpayer Bill of Rights II, Public Law 104–168, section 1207, 110 Stat. 1473. With respect to written requests or consents, the temporary regulation amends the existing regulation to provide further guidance in certain limited situations and to clarify existing procedures. The text of the temporary regulation also serves as the text of the proposed regulation set forth in the notice of proposed rulemaking on this subject in the Proposed Rules section of this issue of the **Federal Register**.

DATES: *Effective Date:* This regulation is effective January 11, 2001.

Applicability Date: For dates of applicability, see § 301.6103(c)–1T(g).

FOR FURTHER INFORMATION CONTACT: Joseph Conley, (202) 622–4580 (not a toll-free number).

Background

Under section 6103(a), returns and return information are confidential unless disclosure is otherwise authorized by the Internal Revenue Code. Section 6103(c), as amended by section 1207 of the Taxpayer Bill of Rights II, Public Law 104–168 (110 Stat. 1452), authorizes the IRS to disclose returns and return information to such person or persons as the taxpayer may designate in a request for or consent to disclosure, or to any other person at the taxpayer's request to the extent necessary to comply with a request for information or assistance made by the taxpayer to such other person. Disclosure is permitted subject to such requirements and conditions as may be prescribed by regulations. With the amendment in 1996, Congress eliminated the longstanding requirement that disclosures to designees of the taxpayer must be pursuant to the written request or consent of the taxpayer. The purpose of this amendment to section 6103(c) was to assist the IRS in developing a paperless tax administration system that relies on, among other things, electronic communication. H.R. Rep. No. 104–506, at 49 (1996), reprinted in 1996 U.S.C.A.N. 1143, 1172. This document contains a temporary regulation that authorizes the disclosure of tax returns and return information to a designee of the taxpayer pursuant to a nonwritten request or consent when the taxpayer seeks the assistance of a third party in resolving a tax matter.

This document also amends the existing regulation to clarify the rules applicable to written requests or consents to disclosure. On October 3, 1980, a final regulation (TD 7723) relating to the disclosure of tax returns and return information to a person designated by the taxpayer in a written request or consent were published in the **Federal Register** (45 FR 65564). Since the publication of this final regulation, the IRS and the Treasury Department have determined that further guidance on written consent requirements is necessary.

Explanation of Provisions

Nonwritten consents

Under the existing regulation, if a taxpayer wishes a third party to assist in the resolution of a tax matter between the taxpayer and the IRS, and the third party is not otherwise authorized to practice before the Internal Revenue Service, a written section 6103(c) request or consent must be executed by the taxpayer.

The temporary regulation authorizes the IRS to accept nonwritten requests or consents authorizing the disclosure of tax returns and return information to third parties assisting taxpayers in resolving tax related matters. Thus, for example, the temporary regulation clarifies that the taxpayer can orally consent to disclosures by the IRS to a person accompanying the taxpayer to meetings or interviews with the IRS, or participating in a telephone conversation with the taxpayer. When the taxpayer is present, either physically or on the telephone, the taxpayer will be able to knowingly and voluntarily consent to the disclosure without the need for further expressing that intent in writing.

Thus, the use of nonwritten consents will enable the IRS to improve its customer service in that, with the assistance of their designees, taxpayers will be able to resolve tax problems in a more timely fashion, without the need for burdensome paperwork. Additionally, nonwritten requests or consents will assist the IRS in moving to a paperless environment by further facilitating the use of electronic communication systems.

As with written requests or consents, before disclosing tax returns and return information to a third party pursuant to a taxpayer's nonwritten request or consent, the IRS will take reasonable steps to confirm the identity of the taxpayer and the designee. For example, IRS personnel, pursuant to existing procedures, verify that they are speaking to the taxpayer prior to disclosing return information to that taxpayer.

Nonwritten requests for or consents to disclosure do not take the place of a power of attorney authorizing a third party to represent the taxpayer before the IRS. Practice before the IRS remains governed by the regulations at 26 CFR 601.501 *et seq.* and Treasury Department Circular 230 (31 CFR part 10).

Acknowledgments of, and Notices Regarding, Electronically Filed Returns

The temporary regulation also provides parameters for the development of consents for the electronic filing program. The IRS currently provides an acknowledgment to an electronic return originator (ERO) to indicate that it has received information from the ERO in an acceptable form, and that the taxpayer identity information, as defined by section 6103(b)(6), matches IRS records. Alternatively, the IRS may notify the ERO that it has rejected the ERO's electronic submission because the taxpayer identity information does not match IRS records or, for example, because the taxpayer is not responsible for the tax payment. The taxpayer may also have authorized an electronic debit to pay a tax debt, and the taxpayer may want the IRS to send an acknowledgment to the ERO that the account has been properly debited, or to disclose information to the taxpayer's financial institution to resolve a problem with the electronic debit transaction. To ensure that the IRS is authorized to disclose tax returns and return information to third parties in an electronic system, the IRS must receive a valid request for or consent to disclosure pursuant to section 6103(c). The current system requires the taxpayer to execute a written consent on Form 8453 to permit these disclosures.

The temporary regulation authorizes an electronic consent to permit the disclosures of the return information described above and such other information as the IRS determines is necessary to the operation of the electronic filing program. Such consent must inform the taxpayer of the return information that will be transmitted to the ERO and other third parties as a result of the electronic filing of the taxpayer's return or other information.

Combined FedState Filing Programs

The temporary regulation also reduces the burden on taxpayers in combined Federal-State (FedState) return filing programs. If the taxpayer files a single combined Federal and State tax return with the IRS, the information contained in such FedState return that is gathered with respect to a taxpayer's liability under both Federal and State law, including the taxpayer's name, taxpayer identification number, and adjusted gross income, is return information protected by section 6103. If the IRS discloses such return information to the State in satisfaction of the taxpayer's State filing obligations, the information can be used by the State only for State tax administration purposes under section 6103(d). On the other hand, if a State tax return is filed directly with the State, information on the State return is not subject to the restrictions of section 6103(d) and can be used for appropriate non-tax purposes permitted under State law.

In the current electronic FedState filing program, to avoid these section 6103 restrictions, return preparers make two separate electronic transmissions to the IRS—one for the Federal return and one for the State return. The common items of data are sent twice, once in the

Federal ''packet'' and once in the State ''packet.'' The items of information in the State packet are not restricted by section 6103 because they have not been filed with the IRS with regard to Federal tax liability.

Alternatively, in the FedState telefile program, a consent has been developed that permits the Internal Revenue Service to disclose common data items to the State tax agency. The information received by the State pursuant to the taxpayer's request or consent is treated, for purposes of section 6103, as if the State had received the information directly from the taxpayer, and therefore the information can be used for appropriate non-tax purposes under State law.

Under the existing regulation, consents for FedState filing programs must comply with current § 301.6103(c)–1(a). The existing regulation requires, among other things, a separate written consent document. The IRS and the Treasury Department believe a taxpayer's voluntary participation in an optional FedState filing program that provides the taxpayer with notice of the disclosures to be made to the State as part of the program constitutes a sufficient knowing and voluntary consent to permit disclosures to States in this situation. To reduce the burden on taxpayers and improve the efficiency of tax administration, the temporary regulation provides that by filing a combined FedState return, the taxpayer consents to the disclosure of the common data items to the State tax agency, and that the information will be treated as if it had been received directly by the State from the taxpayer. As noted above, the temporary regulation requires a notice of the disclosures that are to be made in the FedState filing program so that taxpayers may choose to participate in such programs with knowledge of such disclosures.

Other Changes

The temporary regulation also provides needed clarification in a number of areas not specifically addressed under the existing regulation. The temporary regulation provides rules for receipt of section 6103(c) consents by entities other than the IRS. Certain Treasury Department agencies, such as the Financial Management Service, perform Federal tax administration functions and receive tax information from the IRS. In addition, IRS contractors receive tax information to provide tax administration services pursuant to section 6103(n). The existing regulation provides only for receipt of requests for or consents to disclosure by the IRS. The temporary regulation permits Federal government agencies performing Federal tax administration functions to receive section 6103(c) consents and disclose returns and return information in the possession of such agency to the taxpayer's designee. For example, the temporary regulation clarifies that the Financial Management Service can disclose return information related to the offset of the taxpayer's tax refund to the designee of the taxpayer, such as in response to a Congressional inquiry. The temporary regulation also clarifies that receipt of a request or consent by an agent or contractor of the IRS is the same as receipt by the IRS. However, an agent or contractor of the IRS may make disclosures with the taxpayer's consent only if such disclosures are specifically authorized in the contract or otherwise specifically authorized in writing by the IRS. § 301.6103(n)–1(a).

The temporary regulation defines the term *separate written document* to conform to current IRS practice. The temporary regulation also specifies the Secretary of the Treasury's authority to provide for methods of signing requests for or consents to disclosure. See § 301.6061–1(b).

The temporary regulation clarifies the requirements for identifying the designee to whom disclosure is to be made when the disclosure occurs in a public forum, such as a courtroom, a congressional hearing, or in the media. In these circumstances, it may not be possible to designate specifically every person to whom disclosure is to be made. While identifying individual designees in a public forum may not be practical, a taxpayer can knowingly and voluntarily authorize disclosure in a public forum by specifically indicating the circumstances surrounding the public disclosure, including, for example, a description of the place, date, and time. The temporary regulation also incorporates the longstanding IRS practice that entities, such as corporations and State and local government agencies, are appropriate designees.

The temporary regulation also affirms longstanding practices of the IRS regarding the authority to execute consents. Generally, persons that may receive returns pursuant to section 6103(e), paragraphs (1) through (5), may execute disclosure consents under section 6103(c). However, a one percent shareholder of a corporation, who may receive corporate returns pursuant to section 6103(e)(1)(D)(iii), may not execute disclosure consents because the right of inspection is personal to the shareholder, and such shareholder is not permitted to redisclose such information. See Internal Revenue Code §§ 6103(a)(3), 7213(a)(5). The temporary regulation also provides that if the taxpayer is an entity, generally a person with authority under State law to bind the entity may execute a section 6103(c) consent. Finally, the temporary regulation provides that the holder of a taxpayer's power of attorney may not execute a disclosure consent unless that authority is specifically granted in the power.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. This temporary regulation provides taxpayers with enhanced procedures to resolve problems with the IRS. For this reason, notice and public procedure and a delayed effective date would be contrary to the public interest pursuant to 5 U.S.C. 553(b)(B) and 553(d), respectively. Because this notice of proposed rulemaking is required, the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) do not apply. Pursuant to section 7805(f) of the Internal Revenue Code, this temporary regulation will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Drafting Information

The principal author of this regulation is Jamie Bernstein, Office of the Associate Chief Counsel, Procedure and Administration (Disclosure & Privacy Law Division). However, other personnel from the IRS and Treasury Department participated in its development.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 301 is amended as follows:

PART 301—PROCEDURE AND ADMINISTRATION

Paragraph 1. The authority citation for part 301 is amended by adding an entry in numerical order to read as follows:

Authority: 26 U.S.C. 7805 * * *

Section 301.6103(c)–1 also issued under 26 U.S.C. 6103(c). * * *

§ 301.6103(c)–1 [Removed]

Par. 2. Section 301.6103(c)–1 is removed.

Par. 3. Section 301.6103(c)–1T is added to read as follows:

§ 301.6103(c)–1T Disclosure of returns and return information to designee of taxpayer.

(a) *Overview.* Subject to such requirements and conditions as the Secretary of the Treasury may prescribe by regulation, section 6103(c) of the Internal Revenue Code authorizes the Internal Revenue Service to disclose a taxpayer's return or return information to such person or persons as the taxpayer may designate in a request for or consent to such disclosure, or to any other person at the taxpayer's request to the extent necessary to comply with the taxpayer's request to such other person for information or assistance. This regulation contains the requirements that must be met before, and the conditions under which, the Internal Revenue Service may make such disclosures. Paragraph (b) of this section provides the requirements that are generally applicable to designate a third party to receive the taxpayer's returns and return information. Paragraph (c) of this section provides requirements under which the Internal Revenue Service may disclose information in connection with a taxpayer's written or nonwritten request for a third party to provide information or assistance with regard to a tax matter, for example, a Congressional inquiry. Paragraph (d) of this section provides the parameters for disclosure consents connected with electronic return filing programs and combined Federal State filing. Finally, paragraph (e) provides definitions and general rules related to requests for or consents to disclosure.

(b) *Disclosure of returns and return information to person or persons designated in a written request or consent*—(1) *General requirements.* Pursuant to section 6103(c) of the Internal Revenue Code, the Internal Revenue Service (or an agent or contractor of the Internal Revenue Service) may disclose a taxpayer's return or return information to such person or persons as the taxpayer may designate in a request for or consent to such disclosure. A request for or consent to disclosure under this paragraph (b) must be in the form of a separate written document pertaining solely to the authorized disclosure. (For the meaning of separate written document, see paragraph (e)(1) of this section.) The separate written document must be signed (see paragraph (e)(2) of this section) and dated by the taxpayer who filed the return or to whom the return information relates. The taxpayer must also indicate in the written document—

(i) The taxpayer's taxpayer identity information described in section 6103(b)(6);

(ii) The identity of the person or persons to whom the disclosure is to be made;

(iii) The type of return (or specified portion of the return) or return information (and the particular data) that is to be disclosed; and

(iv) The taxable year or years covered by the return or return information.

(2) *Requirement that request or consent be received within sixty days of when signed and dated.* The disclosure of a return or return information authorized by a written request for or written consent to the disclosure shall not be made unless the request or consent is received by the Internal Revenue Service (or an agent or contractor of the Internal Revenue Service) within 60 days following the date upon which the request or consent was signed and dated by the taxpayer.

(c) *Disclosure of returns and return information to designee of taxpayer to comply with a taxpayer's request for information or assistance.* Where a taxpayer makes a written or nonwritten request, directly to another person or to the Internal Revenue Service, that such other person (for example, a member of Congress, friend, or relative of the taxpayer) provide information or assistance relating to the taxpayer's return or to a transaction or other contact between the taxpayer and the Internal Revenue Service, the Internal Revenue Service (or an agent or contractor of the Internal Revenue Service or a Federal government agency performing a Federal tax administration function) may disclose returns or return information to such other person under the circumstances set forth in paragraphs (c) (1) through (3) of this section.

(1) *Written request for information or assistance.* (i) The taxpayer's request for information or assistance may be in the form of a letter or other written document, which must be signed (see paragraph (e)(2) of this section) and dated by the taxpayer. The taxpayer must also indicate in the written request—

(A) The taxpayer's taxpayer identity information described in section 6103(b)(6);

(B) The identity of the person or persons to whom disclosure is to be made; and

(C) Sufficient facts underlying the request for information or assistance to enable the Internal Revenue Service to determine the nature and extent of the information or assistance requested and the returns or return information to be disclosed in order to comply with the taxpayer's request.

(ii) A person who receives a copy of a taxpayer's written request for information or assistance but who is not the addressee of the request, such as a member of Congress who is provided with a courtesy copy of a taxpayer's letter to another member of Congress or to the Internal Revenue Service, cannot receive returns or return information under paragraph (c)(1) of this section.

(2) *Nonwritten request or consent.* (i) A request for information or assistance may also be nonwritten. Disclosure of returns and return information to a designee pursuant to a taxpayer's nonwritten request will be made only after the Internal Revenue Service has—

(A) Obtained from the taxpayer sufficient facts underlying the request for information or assistance to enable the Internal Revenue Service to determine the nature and extent of the information or assistance requested and the return or return information to be disclosed in order to comply with the taxpayer's request;

(B) Confirmed the identity of the taxpayer and the designee; and

(C) Confirmed the date, the nature, and the extent of the information or assistance requested.

(ii) Examples of disclosures pursuant to nonwritten requests for information or assistance under this paragraph (c)(2) include, but are not limited to, disclosures to a friend, relative, or other person whom the taxpayer brings to an interview or meeting with Internal Revenue Service officials, or disclosures to a person whom the taxpayer wishes to involve in a telephone conversation with Internal Revenue Service officials.

(3) *Rules applicable to written and nonwritten requests for information or assistance.* A return or return information will be disclosed to the taxpayer's designee as provided by this paragraph only to the extent considered necessary by the Internal Revenue Service to comply with the taxpayer's request or consent. Such disclosures shall not be made unless the request or consent is received by the Internal Revenue Service, its agent or contractor, or a Federal government agency performing a Federal tax administration function in connection with a request for advice or assistance relating to such function. This paragraph (c) does not apply to disclosures to a taxpayer's representative in connection with

practice before the Internal Revenue Service (as defined in Treasury Department Circular No. 230). For disclosures in these cases, see section 6103(e)(6) and §§ 601.501 through 601.508 of this chapter.

(d) *Acknowledgments of electronically filed returns and other documents; combined filing programs with State tax agencies—(1) Acknowledgment of, and notices regarding, electronically filed returns and other documents.* When a taxpayer files returns or other documents or information with the Internal Revenue Service electronically, the taxpayer may consent to the disclosure of return information to the transmitter or other third party, such as the taxpayer's financial institution, necessary to acknowledge that the electronic transmission was received and either accepted or rejected by the Internal Revenue Service, the reason for any rejection, and such other information as the Internal Revenue Service determines is necessary to the operation of the electronic filing program. The consent must inform the taxpayer of the return information that will be transmitted and to whom disclosure will be made. The requirements of paragraphs (b) and (c) of this section do not apply to a consent under this paragraph (d)(1).

(2) *Combined return filing programs with State tax agencies.* (i) A taxpayer's participation in a combined return filing program between the Internal Revenue Service and a State agency, body, or commission (State agency) described in section 6103(d)(1) constitutes a consent to the disclosure by the Internal Revenue Service, to the State agency, of taxpayer identity information, signature, and items of common data contained on such return. For purposes of this paragraph, common data means information reflected on the Federal return required by State law to be attached to or included on the State return. Instructions accompanying the forms or published procedures involved in such program must indicate that by participating in the program, the taxpayer is consenting to the Internal Revenue Service's disclosure to the State agency of the taxpayer identity information, signature, and items of common data, and that such information will be treated by the State agency as if it had been directly filed with the State agency. Such instructions or procedures must also describe any verification that takes place before the taxpayer identity information, signature and common data is transmitted by the Internal Revenue Service to the State agency.

(ii) No disclosures may be made under this paragraph (d)(2) unless there are provisions of State law protecting the confidentiality of such items of common data.

(e) *Definitions and rules applicable to this section—(1) Separate written document.* (i) For the purposes of paragraph (b) of this section, *separate written document* means—

(A) One side of a standard (8½″ by 11″ or larger) sheet of paper, which may be included as part of a larger document;

(B) Text appearing on a single computer screen containing all the elements described in paragraph (b)(1) of this section, which can be signed (see paragraph (e)(2) of this section) and dated by the taxpayer, and which can be reproduced, if necessary; or

(C) A consent on the record in an administrative or judicial proceeding, or a transcript of such proceeding recording such consent, containing the information required under paragraph (b)(1) of this section.

(ii) A provision included in a taxpayer's application for a loan or other benefit authorizing the grantor of the loan or other benefit to obtain any financial information, including returns or return information, from any source as the grantor may request for purposes of verifying information supplied on the application, does not meet the requirements of paragraph (b)(1) of this section because the provision is not a separate written document relating solely to the disclosure of returns and return information. In addition, the provision does not contain the other information specified in paragraph (b)(1) of this section.

(2) *Method of signing.* A request for or consent to disclosure may be signed by any method of signing the Secretary of the Treasury has prescribed pursuant to § 301.6061–1(b) in forms, instructions, or other appropriate guidance.

(3) *Permissible designees and public forums.* Permissible designees under this section include individuals; trusts; estates; corporations; partnerships; Federal, State, local and foreign government agencies or subunits of such agencies; or the general public. When disclosures are to be made in a public forum, such as in a courtroom or congressional hearing, the request for or consent to disclosure must describe the circumstances surrounding the public disclosure, e.g., congressional hearing, judicial proceeding, media, and the date or dates of the disclosure.

(4) *Authority to execute a request for or consent to disclosure.* Any person who may obtain returns under section 6103(e)(1) through (5), except section 6103(e)(1)(D)(iii), may execute a request for or consent to disclose a return or return information to third parties. For taxpayers that are legal entities, such as corporations and municipal bond issuers, any officer of the entity with authority under applicable State law to legally bind the entity may execute a request for or consent to disclosure. A person described in section 6103(e)(6) (a taxpayer's representative or individual holding a power of attorney) may not execute a request for or consent to disclosure unless the designation of representation or power of attorney specifically delegates such authority. A designee pursuant to this section does not have authority to execute a request for or consent to disclosure permitting the Internal Revenue Service to disclose returns or return information to another person.

(5) *No disclosure of return information if impairment.* A disclosure of return information shall not be made under this section if the Internal Revenue Service determines that the disclosure would seriously impair Federal tax administration (as defined in section 6103(b)(4) of the Internal Revenue Code).

(f) *Effective date.* This section is applicable on January 11, 2001 through January 12, 2004.

Robert E. Wenzel,

Deputy Commissioner of Internal Revenue.

Approved: December 29, 2000.

Jonathan Talisman

Assistant Secretary of the Treasury.

BILLING CODE 4830–01–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1956

RIN 1218–AB98

Notice of Initial Approval Determination; New Jersey Public Employee Only State Plan

AGENCY: Occupational Safety and Health Administration, Department of Labor (OSHA).

ACTION: Final Rule: Initial State Plan Approval; New Jersey Public Employee Only State Plan.

SUMMARY: The New Jersey Public Employee Only State plan, a State occupational safety and health plan applicable only to public sector employees (employees of the State and its political subdivisions), is approved

as a developmental plan under section 18 of the Occupational Safety and Health Act of 1970 and 29 CFR part 1956. Under the approved plan, the New Jersey Department of Labor is designated as the State agency responsible for the development and enforcement of occupational safety and health standards applicable to public employment throughout the State. The Occupational Safety and Health Administration (OSHA) retains full authority for coverage of private sector employees in the State of New Jersey as well as for coverage of Federal government employees.

EFFECTIVE DATE: January 11, 2001.

FOR FURTHER INFORMATION CONTACT: Paula O. White, Director, Federal-State Operations, Occupational Safety and Health Administration, U.S. Department of Labor, Room N–3700, 200 Constitution Avenue, NW., Washington, DC 20210. Telephone: (202) 693–2200, Fax: (202) 693–1671, E-mail: *Paula.White@osha.gov.*

SUPPLEMENTARY INFORMATION:

A. Introduction

Section 18 of the Occupational Safety and Health Act of 1970 (the ''OSH Act''), 29 U.S.C. 667, provides that a State which desires to assume responsibility for the development and enforcement of occupational safety and health standards relating to any occupational safety and health issue with respect to which a Federal standard has been promulgated may submit a State plan to the Assistant Secretary of Labor for Occupational Safety and Health (''Assistant Secretary'') documenting in detail the proposed program. Regulations promulgated pursuant to the OSH Act at 29 CFR part 1956 provide that a State may submit a State plan for the development and enforcement of standards applicable only to employees of the State and its political subdivisions (''public employees''). State and local government workers are excluded from Federal coverage under the OSH Act and are provided protection only through the vehicle of a State Plan approved pursuant to Section 18 of the Act.

Under these regulations, the Assistant Secretary will approve a State plan for public employees if the plan provides for the development and enforcement of standards relating to hazards in employment covered by the plan which are, or will be, at least as effective in providing safe and healthful employment and places of employment for public employees as standards promulgated and enforced under section 6 of the OSH Act, giving due consideration to differences between public and private sector employment. In making this determination the Assistant Secretary will consider, among other things, the criteria and indices of effectiveness set forth in 29 CFR Part 1956, Subpart B. A State plan for public employees may receive initial approval even though, upon submission, it does not fully meet the criteria set forth in §§ 1956.10 and 1956.11, if it includes satisfactory assurances by the State that it will take the necessary steps, and establishes an acceptable developmental schedule, to meet the criteria within a 3-year period (29 CFR 1956.2(b)). The Assistant Secretary publishes a notice of ''certification of completion of developmental steps'' when all of a State's developmental commitments have been met satisfactorily (29 CFR 1956.23; 1902.33 and 1902.34) and the plan is structurally complete. After certification of a State plan for public employees, OSHA may initiate a period of at least one year of intensive monitoring, after which OSHA may make a determination under the procedures of §§ 1902.38, 1902.39, 1902.40 and 1902.41 as to whether, on the basis of actual operations, the criteria set forth in §§ 1956.10 and 1956.11 for ''at least as effective'' State plan performance are being applied under the plan—a determination of ''operational effectiveness.''

B. History of the Present Proceeding

In 1973, the New Jersey Department of Labor and Industry obtained OSHA approval of a State plan for the enforcement of occupational safety and health standards covering private sector workplaces as well as a program for public employees in New Jersey. That plan was approved by the Assistant Secretary on January 22, 1973 ((37 FR 2426); 29 CFR 1952.140 et seq). That plan was subsequently withdrawn by the State of New Jersey effective June 30, 1975, after the State was unable to gain enactment of the necessary State OSHA legislation (40 FR 27655).

In 1984, the New Jersey State Legislature passed the New Jersey Public Employees Occupational Safety and Health (PEOSH) Act, N.J.S.A. 34:6A (the ''State Act''), which was signed into law by the Governor, and which provided the basis for establishing a comprehensive occupational safety and health program applicable to the public employees in the State.

The State formally submitted for Federal approval a plan applicable only to public employees in February 1988. OSHA's review findings were detailed in an October 1988 letter to the State in which OSHA determined that the New Jersey statute, as then structured, and the proposed State plan failed to meet Federal Public Employee Only State plan approval criteria.

A revised plan was submitted by the State on February 19, 1992. On March 27, 1992, OSHA informed the State of its findings, identifying areas of the proposed plan which needed to be addressed or needed clarification. Amended enabling legislation was signed into law on July 25, 1995, to conform the proposed State plan to OSHA requirements. On October 11, 1995, the New Jersey State Labor Commissioner submitted a newly revised State plan which OSHA determined was conceptually approvable as a developmental State plan, but which could not be approved until additional Federal matching grant funds, necessary for approval of a new State plan, were appropriated under section 23(g) of the OSH Act. (The OSH Act provides for funding ''up to 50%'' of the State plan costs, but longstanding language in OSHA's appropriation legislation further provides that OSHA must fund ''* * * no less than 50% of the costs required to be incurred'' by an approved State plan. Thus Federal matching grant funds must be available before a State plan can be approved.)

On August 1, 2000, current New Jersey Commissioner of Labor, Mark B. Boyd, and Commissioner of Health and Senior Services, Christine Grant, submitted a further revised plan document, with subsequent amendments submitted on August 15, August 29, September 1, September 22, September 28, and October 5, 2000. On December 21, 2000, the President signed the appropriation act for FY 2001 for the Department of Labor, as approved by the Congress, which includes funding for the Occupational Safety and Health Administration specifically designated for initial approval of the New Jersey State plan.

On November 13, 2000, OSHA published notice in the **Federal Register** (65 FR 67672) concerning the submission of the New Jersey Public Employee Only State plan, announcing that initial Federal approval of the plan was at issue, and offering interested parties an opportunity to review the plan and submit data, views, arguments or requests for a hearing concerning the plan. The New Jersey Department of Labor published similar notices throughout the State from November 15–17, 2000, in the following New Jersey newspapers: *The Newark Star-Ledger, The South Jersey Courier-Post,*

The Trenton Times, The Atlantic City Press, and *The Bergen Record.* (Ex. #5)

To assist and encourage public participation in the initial approval process, copies of the New Jersey State plan were maintained as Docket No. T–034 in the Docket Office, Department of Labor, Occupational Safety and Health Administration, Third Street and Constitution Avenue, NW, Room N–2625, Washington, DC 20210; Office of the New York Regional Administrator, U.S. Department of Labor, Occupational Safety and Health Administration, 201 Varick Street, Room 670, New York, New York 10014; and the New Jersey Department of Labor, Division of Public Safety and Occupational Safety and Health, Office of Public Employees' Safety, P.O. Box 386, 225 East State Street, 8th Floor West, Trenton, New Jersey 08625–0386.

C. Summary and Evaluation of Comments Received

In response to OSHA's November 13, 2000, **Federal Register** notice, which announced submission of the New Jersey State plan and its availability for public comment, three (3) written public comments were submitted by: (1) Peter P. Guzzo, Executive Director/Legislative Agent, for Consumers for Civil Justice (OSHA Docket #T–034, Exhibit 3–1.); (2) Rick Engler, Director, New Jersey Work Environment Council, cosigned by the following 15 organizations: Harold Schaitberger, General President, for International Association of Fire Fighters, AFL–CIO; Thomas Canzanella, President, for Professional Firefighters Association of New Jersey, IAFF; William J. Lavin, for New Jersey Firemen's Mutual Benevolent Association; Michael Johnson, President, for New Jersey Education Association; David Legrande, Director of Occupational Safety and Health, for Communications Workers of America (CWA), AFL–CIO; Robert Pursell, New Jersey Area Director, for CWA District 1; Carla Katz, President, for CWA Local 1034; Michael Lohman, Staff Representative, for CWA, Local 1033, and Chairman, CWA New Jersey State Worker Locals Health and Safety Coordinating Committee; Bill Borwegan, Director of Occupational Safety and Health, for Service Employees International Union, AFL–CIO; Daryl Alexander, Associate Director for Occupational Safety and Health, for American Federation of Teachers (AFT), AFL–CIO; Nicholas C. Yovnello, President, for Council of New Jersey State College Locals, AFT; Ken Carlson, President for Rutgers Council of American Association of University Professors; Gerald Newsome, Trustee, for International Federation of Professional and Technical Engineers Local, 195, AFL–CIO; Edward II Lennon, President, for State Troopers Fraternal Association of New Jersey; Mark Dudzie, President, for Paper, Allied-Industrial, Chemical, and Energy Workers Local 2–149, AFL–CIO (OSHA Docket # T–034, Exhibit 3–2.); and; (3) Verri Andrea, student, University of Wisconsin-Madison. (OSHA Docket # T–034, Exhibit #4–1.)

All of the commenters listed above indicated their support for OSHA approval of the New Jersey Public Employee Only State plan. None has requested a public hearing or raised any issues for consideration.

D. Review Findings

As required by 29 CFR 1956.2 in considering the granting of initial approval to a State public employee only plan, OSHA must determine whether the State plan meets or will meet the criteria in 29 CFR 1956.10 and the indices of effectiveness in 29 CFR 1956.11. Findings and conclusions in each of the major State plan areas addressed by 29 CFR part 1956 are as follows:

(1) Designated Agency

Section 18(c)(1) of the OSH Act provides that a State occupational safety and health plan must designate a State agency or agencies responsible for administering the plan throughout the State (29 CFR 1956.10(b)(1)). The plan must describe the authority and responsibilities of the designated agency and provide assurance that other responsibilities of the agency will not detract from its responsibilities under the plan (29 CFR 1956.10(b)(2)). The New Jersey Department of Labor is designated by revised N. J. S. A. 34:6A–25 *et seq.*, as the sole agency responsible for administering and enforcing the New Jersey Public Employee Occupational Safety and Health (PEOSH) plan. (New Jersey State plan, p. 15.) The plan also describes the authority of the New Jersey Department of Labor and its other responsibilities. (New Jersey State plan, pp.16–16.2.) The New Jersey Department of Health and Senior Services has responsibility for conducting inspections with regard to occupational health hazards but all standards adoption and enforcement authority rests with the New Jersey Department of Labor. (N.J.S.A. 34:6A–30(e))

(2) Scope

Section 18(c)(6) of the OSH Act provides that the State, to the extent permitted by its law, shall under its plan establish and maintain an effective and comprehensive occupational safety and health program applicable to all employees of the State and its political subdivisions. Only where a State is constitutionally precluded from regulating occupational safety and health conditions in certain political subdivisions may the State exclude such political subdivision employees from coverage (29 CFR 1956.2(c)(1)). Further, the State may not exclude any occupational, industrial or hazard grouping from coverage under its plan unless OSHA finds that the State has shown there is no necessity for such coverage (29 CFR 1956.2(c)(2)).

The scope of the New Jersey State plan includes any employee of the State and any political subdivision thereof, including a public authority or any other governmental agency or authority. No employees of any political subdivision of the State or local government are excluded from the plan. (New Jersey State plan, pp 10–11.) The New Jersey Department of Labor adopts all Federal OSHA occupational safety and health standards, and the plan excludes no occupational, industrial or hazard grouping. (New Jersey State plan, p. 10)

Consequently, OSHA finds that the New Jersey plan contains satisfactory assurances that no employees of the State and its political subdivisions are excluded from coverage, and the plan excludes no occupational, industrial or hazard grouping.

(3) Standards

Section 18(c)(2) of the OSH Act requires State plans to provide for occupational safety and health standards which are at least as effective as Federal OSHA standards. A State plan for public employees must therefore provide for the development or adoption of such standards and must contain assurances that the State will continue to develop or adopt such standards (29 CFR 1956.10(c); 1956.11(b)(2)(ii)). A State may establish the same standards as Federal OSHA (29 CFR 1956.11(a)(1)), or alternative standards that are at least as effective as those of Federal OSHA (29 CFR 1956.11(a)(2)). Where a State's standards are not identical to Federal OSHA, they must meet the following criteria: they must be promulgated through a procedure allowing for consideration of all pertinent factual information and participation of all interested persons (29 CFR 1956.11(b) (2)(iii)); must, where dealing with toxic materials or harmful physical agents, assure employee protection throughout his or her working life (29 CFR 1956. 11(b)(2)(i));

must provide for furnishing employees appropriate information regarding hazards in the workplace through labels, posting, medical examinations, etc. (29 CFR 1956.11(b)(2)(vi)); and, must require suitable protective equipment, technological control, monitoring, etc. (29 CFR 1956.11(b)(2)(vii)).

In addition, the State plan must provide for prompt and effective standards setting actions for protection of employees against new and unforeseen hazards, by such means as authority to promulgate emergency temporary standards (29 CFR 1956.11(b)(2)(v)).

The PEOSH Act, 34:6A–30 *et seq.*, mandates that the Commissioner of Labor (the ''Commissioner'') shall adopt all safety and health standards promulgated under the OSH Act which are in effect on the effective date of the State Act (January 17, 1984, as amended July 25, 1995), and incorporate future revisions. (New Jersey State plan, p.19) The procedures for State adoption of Federal occupational safety and health standards include publication in the New Jersey Register in accordance with N.J.S.A. 52:14B–5. New Jersey has adopted State standards identical to Federal occupational safety and health standards promulgated as of December 7, 1998, with the exception of the hazard communication and fire protection standards. The State plan includes a commitment to bring those standards into conformance with OSHA requirements and to update all standards within one year after plan approval. (The State intends to incorporate appropriate provisions of the New Jersey Right to Know Act into its public sector occupational hazard communication standard.) The State plan also provides that future OSHA standards and revisions will be adopted by the State in accordance with 29 CFR 1953.21.

Under the New Jersey State plan, the Commissioner of Labor, in consultation with the Commissioner of Health and Senior Services, and the Commissioner of Community Affairs, and with the advice of the Public Employees' Safety and Health Advisory Board may adopt alternative or different occupational safety and health standards where no federal standards are applicable or where more stringent standards are deemed advisable. (N.J.S.A. 34:6A–30(c); New Jersey State plan, pp.21–28). Such standards will be adopted in accordance with the State Act and the New Jersey Administrative Procedures Act, N.J.S.A. 52–148–1 *et seq.*, which include provisions for interested persons to petition the State for a new or revised standard and which give interested persons the opportunity to participate in any hearing for the development, modification or establishment of standards.

Section 34:6A–30(b) of the amended State Act provides for coordination of the provisions of the State uniform construction code and the uniform fire safety code with State occupational safety and health standards. The Commissioner of Community Affairs is charged with amending the uniform construction or fire codes to reflect any more stringent applicable provisions of the State OSHA standards and with preparing an application to the Assistant Secretary for approval of any equally effective provision of the uniform construction or fire codes for incorporation into the State plan. In response to OSHA's concerns that building or fire codes may not appropriately address employee protection, New Jersey amended its State Act and provided assurance that Federal approval will be obtained prior to the incorporation of building or fire codes as State occupational safety and health standards into the State plan. (New Jersey State plan, p.27)

The New Jersey State plan also provides for the adoption of Federal emergency temporary standards within 30 days of Federal promulgation. State regulations will be amended to reflect this. (New Jersey State plan, p. 27)

Based on the foregoing plan provisions and assurances and commitments, OSHA finds the New Jersey State plan to have met the statutory and regulatory requirements for initial plan approval with respect to occupational safety and health standards.

(4) Variances

A State plan must provide authority for the granting of variances from State standards upon application of a public employer or employers which corresponds to variances authorized under the OSH Act, and for consideration of the views of interested parties, by such means as giving affected employees notice of each application and an opportunity to request and participate in hearings or other appropriate proceedings relating to applications for variances (29 CFR 1956.11(b)(2)(iv)).

The State Act provides for the granting of permanent and temporary variances from State standards (N.J.S.A., Section 34:6A–39; New Jersey State Plan, pp. 35–51) in terms substantially similar to the variance provisions of the OSH Act. The State provisions require employee notification of variance applications as well as employee rights to participate in hearings held on variance applications. Variances may not be granted unless it is established that adequate protection is afforded employees under the terms of the variance. However, the State's variance procedures at N.J.A.C. 12:110–6.5(c) require revision. The State has provided assurance in its developmental schedule that within two years of initial plan approval it will amend its regulations to reflect variance provisions contained in the Federal 29 CFR Part 1905. (New Jersey State Plan p. 38.)

Accordingly, OSHA finds that the New Jersey State plan effectively provides or will provide opportunity and procedures for variances from its occupational safety and health standards.

(5) Enforcement

Section 18(c)(2) of the OSH Act and 29 CFR 1956.10(d)(1) require a State plan to include provisions for enforcement of State standards which are or will be at least as effective in providing safe and healthful employment and places of employment as the Federal program, and to assure that the State's enforcement program for public employees will continue to be at least as effective as the Federal program in the private sector.

(a) *Legal Authority.* The State must require public employer and employee compliance with all applicable standards, rules and orders (29 CFR 1956.10(d)(2)) and must have the legal authority for standards enforcement (section 18(c)(4)) including compulsory process (29 CFR 1956.11(c)(2)(viii)).

Section 34:6A–33 of the State Act requires public employers to comply with the New Jersey Department of Labor's occupational safety and health standards; section 34:6A–34 requires employees to comply with all standards and regulations applicable to their own actions and conduct. Section 34:6A–31 of the revised State Act also provides that space leased by a public employer must be in conformance with current occupational safety and health requirements at the time a lease is executed.

(b) *Inspections.* A State plan must provide for inspection of covered workplaces, including in response to complaints, where there are reasonable grounds to believe a hazard exists (29 CFR 1956.11(c)(2)(i)).

When no compliance action results from inspection of violations alleged by employee complaints, the State must notify the complainant of its decision not to take compliance action by such means as written notification and

opportunity for informal review (29 CFR 1956.11(c)(2)(iii)).

The State Act provides for inspections of covered workplaces including inspections in response to employee complaints by the Commissioner of Labor, and with regard to health hazards, by the Commissioner of Health and Senior Services (N.J.S.A., Sections 34:6A–35, 36, and 38.) The New Jersey State plan (Section 1, pp. 73–75) provides that when a determination has been made that a complaint does not warrant an inspection, the complainant shall be notified in writing of the determination and given an opportunity to request a review of that determination. In response to OSHA comments, New Jersey revised its regulations and procedures to allow complainants to elect anonymity in the process.

(c) *Employee Notice and Participation in Inspection.* In conducting inspections, the State plan must provide an opportunity for employees and their representatives to point out possible violations through such means as employee accompaniment or interviews with employees (29 CFR 1956.11(c)(2)(ii)).

The State Act provides the opportunity for an employer and employee representative to accompany a Department of Labor or Department of Health and Senior Services inspector for the purpose of aiding in the inspection. (N.J.S.A., Section 34:6A–36 and –38.) Where there is no authorized employee representative, the inspectors are required to consult with a reasonable number of employees concerning matters of safety and health in the workplace. Any employee who accompanies an inspector representing either Commissioner on an inspection shall receive payment of normal wages for the time spent on the inspection. (N.J.S.A. Sec 34:6A–35,–36, –38)

In addition, the State plan must provide that employees be informed of their protections and obligations under the Act by such means as the posting of notices (29 CFR 1956.11(c)(2)(iv)); and provide that employees have access to information on their exposure to regulated agents and access to records of the monitoring of their exposure to such agents (29 CFR 1956.11(c)(2)(vi)).

The State Act provides that the Commissioner of Labor must issue regulations requiring that employers, through posting of notices, training or other appropriate means, keep their employees informed of their protections. (N.J.S.A., Section 34:6A–31.) A poster, which outlines employee protections and obligations under the Act, has been designed and distributed to public employers. Specific regulations as well as the poster have been submitted by the State. (New Jersey State Plan, Attachments 3 and 9.)

Information on employee exposure to regulated agents (in the public sector), access to medical and exposure records, and provision and use of suitable protective equipment is provided through State standards. New Jersey has adopted all Federal standards as of December 7, 1998 with the exception of 29 CFR part 1910, subpart L—Fire protection, and 29 CFR 1910.1200 Hazard Communication. The State plan contains an assurance that the State intends to adopt all applicable Federal standards either identically or submit alternative standards which are at least as effect as the Federal standards within one year of plan approval as a part of the 3-year developmental schedule. (New Jersey State Plan, pp. 28–32)

(d) *Nondiscrimination.* A State is expected to provide appropriate protection to employees against discharge or discrimination for exercising their rights under the State's program, including provision for employer sanctions and employee confidentiality (29 CFR 1956.11(c)(2)(v)).

The State Act provides that no person shall discharge, or otherwise discipline, or in any manner discriminate against any employee because such employee has filed a complaint or instituted or caused to be instituted any proceeding under or related to this section or has testified or is about to testify in any such proceeding, or because of the exercise by such employee on behalf of the employee or others of any right under this section. (N.J.S.A., Section 34:6A–45.)

The State Act provides that an employee who believes that he or she has been discharged, disciplined or otherwise discriminated against by any person in violation of this section, may within 180 days after the employee first has knowledge such a violation did occur, file a complaint with the Commissioner of Labor alleging that discrimination. (N.J.S.A., Section 34:6A–45b.) The Commissioner shall investigate such complaints as appropriate and make a determination within 90 days which shall include an order for all appropriate relief. The monetary penalty established for repeated violations may also be applied to repeated discriminatory acts. (N.J.S.A. 34:6A–41(d))

New Jersey will amend its regulations on nondiscrimination procedures, N.J.A.C. 12:110–7, to conform with Federal guidelines within two years after plan approval. (New Jersey State Plan, p. 80; Attachment 3.)

e. *Restraint of Imminent Danger.* A State plan is required to provide for the prompt restraint of imminent danger situations (29 CFR 1956.11(c)(2)(vii)).

Section 34:6A.44 of the State Act provides that the Attorney General, at the request of and on behalf of the Commissioner of Labor, may bring an action in the Superior Court to restrain any conditions or practices in any workplace which the Commissioner determines, in accordance with the State Act (N.J.S.A. 34:6A–41), are such that a danger exists which could reasonably be expected to cause death or serious physical harm immediately or before the danger could be eliminated through the enforcement process. (New Jersey State plan, pp. 66–69.)

(f) *Right of Entry; Advance Notice.* A State program is required to have authority for right of entry to inspect and compulsory process to enforce such right equivalent to the Federal program (section 18(c)(3) of the Act and 29 CFR 1956.10(e)). Likewise, a State is expected to prohibit advance notice of inspection, allowing exception thereto no broader than in the Federal program (29 CFR 1956.10(f)).

The State Act provides that the Commissioner of Labor and the Commissioner of Health and Senior Services both have the right of immediate entry of any premises occupied by a public employer at reasonable hours, and without advance notice if there is reason to believe that a violation of this section of State law has occurred. (N.J.S.A., 34:3A–35.)

The New Jersey State plan (p.63–64) describes its general policy and procedures prohibiting advance notice of inspections and allowing exception thereto. Any person who gives advance notice of any inspection to be conducted under this act, without authority from the Commissioner of Labor or the Commissioner of Health and Senior Services or their designees, shall upon conviction, be punished by a fine of not more than $1,000 or by imprisonment for not more than six (6) months, or by both. (N.J.S.A. 34:6A–35(g)).

(g) *Citations, Sanctions, and Abatement.* A State plan is expected to have authority and procedures for promptly notifying employers and employees of violations, including proposed abatement requirements, identified during inspection, for the proposal of effective first-instance sanctions against employers found in violation of standards, and for prompt employer notification of any such sanctions. In lieu of monetary penalties as a sanction, a complex of enforcement

tools and rights, including administrative orders and employee right to contest citations (as well as abatement dates), may be demonstrated to be as effective as monetary penalties in achieving compliance in public employment (29 CFR 1956.11(c)(2)(ix) and (x)).

The State Act describes the authority and general procedures of the Commissioner of Labor to promptly notify public employers and employees of violations, and abatement requirements and to compel compliance therewith. The Commissioner of Labor must issue a written order to comply with reasonable promptness which is in no case no more than six months after determination of the existence of a safety violation or certification from the Commissioner of Health and Senior Services of a health violation. (N.J.S.A., Section 34:6A–35 and –41.)

The New Jersey State plan (pp. 87–90) provides that when an inspection of an establishment has been made, and the Commissioner of Labor has issued an order to comply, the employer shall post such order or a copy thereof at or near each location of the violation cited in the order so that it is clearly visible to affected employees. The Commissioner must make such order available to employee representatives, affected employees and the public. A written citation (Order to Comply) will be issued, citing the sections of the law, standards, rules or regulations alleged to be violated, the location of the violation, the abatement period, posting requirements and will also include the employer's and employee's right to contest any or all orders.

Although the State Plan does not provide for first instance sanctions, it does provide for monetary penalties for failures-to-abate and willful and repeated violations. The State Act (N.J.S.A., Section 34:6A–41(d)) provides that if the time for compliance with an order has elapsed, and the employer has not contested and has not made a good faith effort to comply, the Commissioner of Labor shall impose a civil administrative penalty of up to $7,000 per day for each violation. In addition, any employer who willfully or repeatedly violates the requirements of any standard, rule, order or regulation shall be assessed a civil administrative penalty of up to $70,000 for each violation. Penalties may be recovered with costs in a civil action commenced by the Commissioner by a summary proceeding under the Penalty Enforcement Law. (N.J.S.2A:58–1 *et seq.*) The State has given an assurance that it will adopt appropriate penalty procedures that will include gravity-based penalties (severity and probability) as well as penalty adjustment factors (size, history, and good faith) as a part of its developmental step commitment to adopt amendments to regulations regarding inspections, citations, and proposed penalties equivalent to 29 CFR 1903 within one year after state plan approval. Specific regulations and detailed procedures on compliance orders, abatement and sanctions will be submitted by New Jersey in accordance with its developmental schedule. (New Jersey State plan, pp. 96–96.)

(h) *Contested Cases.* A State plan must have authority and procedures for employer contest of violations alleged by the State, penalties/sanctions and abatement requirements at full administrative or judicial hearings. Employees must also have the right to contest abatement periods and the opportunity to participate as parties in all proceedings resulting from an employer's contest (29 CFR 1956.11(c)(2)(xi)).

The State Act provides that any employer, employee or employee representative affected by a determination of the Commissioner of Labor may file with the Commissioner, within fifteen working days of the issuance of an order to comply, a notice to contest any provision of the order. (N.J.S.A. Sections 34:6A–36, 41 and N.J.A.C. 12:110–4.13.) The Commissioner must immediately advise the Occupational Safety and Health Review Commission of the notification and the Commission will afford an opportunity for a hearing. The Review Commission will issue an order, based on a finding of fact, affirming, modifying, or vacating the Commissioner's order to comply or the proposed penalty, or directing other appropriate relief, and the order shall become final 45 days after its issuance. (N.J.S.A. 34:6A–42) N.J.A.C. 12:110, establishes the opportunity for the Commissioner of Labor to hold an informal conference. Such a conference would be for the purpose of discussing any issue raised by an inspection, order to comply, a notice of proposed penalty, or notice of intention to contest. No such conference or request for such conference will serve as a stay of any 15 working day period for filing a notice of intention to contest as prescribed in N.J.A.C. 12:110–4.14. Appeals from decisions of the Review Commission are to the Appellate Division of the Superior Court. (N.J.S.A. 34:6A–43)

(i) *Enforcement Conclusion.* Accordingly, OSHA finds that the enforcement provisions of the New Jersey State plan as described above meet or will meet the statutory and regulatory requirements for initial State plan approval.

6. Staffing and Resources

Section 18(c)(4) of the OSH Act requires State plans to provide the qualified personnel necessary for the enforcement of standards. In accordance with 29 CFR 1956.10(g), one factor which OSHA must consider in considering a plan for initial approval is whether the State has or will have a sufficient number of adequately trained and competent personnel to discharge its responsibilities under the plan.

The New Jersey State plan (pp. 150–154) provides assurances of a fully trained, adequate staff, including 20 safety and 7 health compliance officers for enforcement inspections, and 4 safety and 3 health consultants to perform consultation services in the public sector, and 2 safety and 3 health training and education staff. The compliance staffing requirements (or benchmarks) for State plans covering both the private and public sectors are established based on the ''fully effective'' test established in *AFL–CIO* v. *Marshall*, 570 F.2d 1030 (D.C. Cir., 1978). This staffing test, and the formula used to derive benchmarks for complete private/public sector plans, is not intended, nor is it appropriate, for application to the staffing needs of public employee only plans. However, the State has given satisfactory assurance (New Jersey State plan, p.156) that it will meet the staffing requirements of 29 CFR 1956.10.

Section 18(c)(5) of the OSH Act requires that the State plan devote adequate funds to administration and enforcement of its standards (29 CFR 1956.10(h)). New Jersey has funded its public employee occupational safety and health program since 1984 solely utilizing State funds. The State plan will be funded at $5,118,360 ($1,771,000 Federal 50% share; $1,771,000 State 50% matching share; $1,576,360 100% State funds) during federal fiscal year 2001.

Accordingly, OSHA finds that the New Jersey State plan has provided for sufficient, qualified personnel and adequate funding for the various activities to be carried out under the plan.

7. Records and Reports

State plans must assure that employers in the State submit reports to the Secretary in the same manner as if the plan were not in effect (section 18(c)(7)) of the OSH Act). Under a public employee State plan, public employers must maintain records and

make reports on occupational injuries and illnesses in a manner similar to that required of private sector employers under the OSH Act and (29 CFR 1956.10(i)). The plan must also provide assurances that the designated agency will make such reports to the Secretary in such form and containing such information as he may from time to time require (section 18(c)(8) of the OSH Act and 29 CFR 1956.10(j)).

New Jersey has provided assurance in its State plan (pp. 139–144) that all jurisdictions covered by the State plan will maintain valid records and make timely reports on occupational injuries and illnesses as required for private employers under the OSH Act. Specific regulations on this aspect of the State plan will be submitted by New Jersey in accord with its developmental schedule in which the State has agreed to adopt amendments to regulations regarding recordkeeping equivalent to 29 CFR part 1904 within two years after state plan approval. Current State recordkeeping regulations, at N.J.A.C. 12:110–5., infer that employees' names may be considered confidential. As this conflicts with the Federal requirement at 29 CFR 1904.7 which provides for full access to the OSHA Log including Column C, ''Employee's Name,'' for compliance staff, employees, former employees and employee representatives, the State has provided assurance that it will comply with § 1904.7 upon plan approval and will amend its regulation accordingly. (New Jersey State Plan, p. 140)

New Jersey has also provided assurance in its State plan (pp. 144 and 148) that it will continue its participation in the Bureau of Labor Statistics Annual Survey of Injuries and Illnesses (for the private sector) and will similarly continue its statistical survey of the public sector under its approved plan. The New Jersey State plan also contains assurances that it will provide reports to OSHA in the desired form and participate in OSHA's Integrated Management Information System. (New Jersey State plan, pp. 145–148)

OSHA finds that the New Jersey State plan has met the requirements of section 18(c)(7) and (8) of the OSH Act on employer and State reports to the Secretary.

8. Voluntary Compliance Program

A State plan must undertake programs to encourage voluntary compliance by employers by such means as conducting training and consultation with employers and employees (29 CFR 1956.11(c)(2)(xii)).

The New Jersey State plan (pp.125–130) provides that the State Labor and Health Departments will include voluntary compliance as an essential component of its program. Training will be provided to public employers and employees; seminars will be conducted to familiarize affected individuals with OSHA standards and requirements, and safe work practices; and, an on-site consultation program in the public sector parallel to New Jersey State's existing private sector on-site consultation program (under section 21(d) of the OSH Act) will be established. The public employee consultation program will have both safety and health consultants available to employers who request such service. All State agencies and political subdivisions will also be encouraged to develop and maintain self-inspection programs and to develop internal safety and health programs in accordance with the State public employee safety and health program guidelines. The State has committed under its developmental schedule to fully implement public employer/employee consultation, training and education program equivalent to 29 CFR part 1908 within three years after state plan approval.

OSHA finds that the New Jersey State plan provides for the establishment and administration of an effective voluntary compliance program.

E. Decision

OSHA, after carefully reviewing the New Jersey State plan for the development and enforcement of State standards applicable to State and local government employees and the record developed during the above described proceedings, has determined that the requirements and criteria for initial approval of a developmental plan have been met. The plan is hereby approved as a developmental plan under section 18 of the Act and 29 CFR part 1956. This decision incorporates the requirements of the Act and of regulations applicable to State plans generally.

The initial approval of a State plan for public employees in New Jersey is not a significant regulatory action as defined in Executive Order 12866.

F. Regulatory Flexibility Act

OSHA certifies pursuant to the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) that the proposed initial approval of the New Jersey State Plan will not have a significant economic impact on a substantial number of small entities. By its own terms, the plan will have no effect on private sector employment, but is limited to the State and its political subdivisions. Moreover, the New Jersey legislation has been in effect since 1984, when the State first established a safety and health program for State and local government employees. Since that time, the New Jersey program has been in operation with State funding and most public sector employers in the State, including small units of local government, have been subject to its terms. Compliance with State OSHA standards is required by State law; Federal approval of a State plan imposes regulatory requirements only on the agency responsible for administering the State plan. Accordingly, no new obligations would be placed on public sector employers as a result of Federal approval of the plan.

G. Federalism

Executive Order 13132, ''Federalism,'' emphasizes consultation between Federal agencies and the States and establishes specific review procedures the Federal government must follow as it carries out policies which affect state or local governments. OSHA has consulted extensively with New Jersey throughout the development, submission and consideration of its proposed State plan. Although OSHA has determined that the requirements and consultation procedures provided in Executive Order 13132 are not applicable to initial approval decisions under the Act, which have no effect outside the particular State receiving the approval, OSHA has reviewed the New Jersey initial approval decision proposed today, and believes it is consistent with the principles and criteria set forth in the Executive Order.

H. List of Subjects in 29 CFR PART 1956

Intergovernmental relations, Law enforcement, Occupational Safety and Health, Reporting and recordkeeping requirements.

I. Effective Date January 11, 2001

OSHA's decision granting initial Federal approval to the New Jersey State plan for public employees only is effective January 11, 2001. The program described in the plan has been in effect for many years and no immediate modifications of the program are required by today's decision. Federal 50% matching funds have been explicitly provided in the Department of Labor's FY 2001 appropriation. Notice of proposed initial approval of the plan was published both in the **Federal Register** and in several newspapers throughout the State with requests for comment. No comments opposing initial approval of the plan were received, and OSHA believes that no

party is adversely affected by initial approval of the plan. OSHA therefore finds, pursuant to section 553(d) of the Administrative Procedures Act, that good cause exists for making Federal approval of the New Jersey Public Employee Only State plan effective upon publication in the **Federal Register**.

J. Authority

This document was prepared under the direction of Charles N. Jeffress, Assistant Secretary of Labor for Occupational Safety and Health. It is issued under Section 18 of the OSH Act, (29 U. S. C. 667), 29 CFR parts 1902 and 1956, and Secretary of Labor's Order No. 3–2000 (65 FR 50017).

Signed at Washington, D.C. this 4th of January, 2000.

Charles N. Jeffress,

Assistant Secretary of Labor.

For the reasons set out in the preamble, 29 CFR Part 1956 is hereby amended by adding a new Subpart G as follows:

Subpart G—New Jersey

Sec.

1956.60 Description of the plan as initially approved.
1956.61 Developmental schedule.
1956.62 Completion of developmental steps and certification. [Reserved]
1956.63 Determination of operational effectiveness. [Reserved]
1956.64 Location of plan for inspection and copying.

Subpart G—New Jersey

Authority: Section 18 of the OSH Act, (29 U.S.C. 667), 29 CFR Part 1902, 29 CFR 1956, and Secretary of Labor's Order No. 3–2000 (65 FR 50017).

§ 1956.60 Description of the plan as initially approved.

(a) *Authority and scope.* The New Jersey State Plan for Public Employee Occupational Safety and Health received initial OSHA approval on January 11, 2001. The plan designates the New Jersey Department of Labor as the State agency responsible for administering the plan throughout the State. The plan includes enabling legislation, Public Employees Occupational Safety and Health Act of 1995 (N.J.S.A. 34:6A–25 *et seq.*), enacted in 1984, and amended on July 25, 1995. Under this legislation, the State Commissioner of Labor has full authority to enforce and administer all laws and rules protecting the safety and health of all employees of the State and its political subdivisions under the Public Employee Occupational Safety and Health program (PEOSH). The Commissioner of Health and Senior Services has authority for occupational health matters including the authority to conduct health inspections, investigations and related activities. However, all standards adoption and enforcement authority for both occupational safety and health remain the responsibility of the New Jersey Department of Labor.

(b) *Standards.* New Jersey has adopted State standards identical to OSHA occupational safety and health standards promulgated as of December 7, 1998, with differences only in its hazard communication and fire protection standards. The State plan includes a commitment to bring those two (2) standards into conformance with OSHA requirements and to update all standards within one year after plan approval. The State plan also provides that future OSHA standards and revisions will be adopted by the State within six (6) months of Federal promulgation, in accordance with 29 CFR 1953.21. Any emergency temporary standards will be adopted within 30 days of Federal adoption. The State will adopt Federal OSHA standards in accordance with the provisions of New Jersey statute, N.J.S.A. 52:14B–5; Federal standards shall be deemed to be duly adopted as State regulations upon publication by the Commissioner of Labor. The plan also provides for the adoption of alternative or different occupational safety and health standards by the Commissioner of Labor in consultation with the Commissioner of Health and Senior Services, the Commissioner of Community Affairs, and the Public Employee Occupational Safety and Health Advisory Board, where no Federal standards are applicable to the conditions or circumstances or where standards more stringent than the Federal are deemed advisable.

(c) *Variances.* The plan includes provisions for the granting of permanent and temporary variances from State standards in terms substantially similar to the variance provisions contained in the OSH Act. The State provisions require employee notification of variance applications as well as employee rights to participate in hearings held on variance applications. Variances may not be granted unless it is established that adequate protection is afforded employees under the terms of the variance. The State has committed to amend its current variance procedures at N.J.A.C. 12:110–6 to bring them into conformance with Federal procedures at 29 CFR Part 1905 within two years after state plan approval.

(d) *Employee notice and discrimination protection.* The plan provides for notification to employees of their protections and obligations under the plan by such means as a State poster, and required posting of notices of violations. The plan also provides for protection of employees against discharge or discrimination resulting from exercise of their rights under the State's Act in terms similar to section ll(c) of the OSH Act. However, employees have 180 days to file complaints of discrimination with the Commissioner of Labor; and the Commissioner is authorized to both investigate and order all appropriate relief. The monetary penalty for repeated violations (up to $70,000 per violation) may also be applicable to repeated employer acts of discrimination.

(e) *Inspections and enforcement.* The plan provides for inspection of covered workplaces including inspections in response to employee complaints, by both the Department of Labor, and by the Department of Health and Senior Services with regard to health issues. If a determination is made that an employee complaint does not warrant an inspection, the complainant shall be notified, in writing, of such determination and afforded an opportunity to seek informal review of the determination. The plan also provides the opportunity for employer and employee representatives to accompany the inspector during an inspection for the purpose of aiding in the inspection. Employee(s) accompanying an inspector are entitled to normal wages for the time spent during the inspection. The plan also provides for right of entry for inspection and prohibition of advance notice of inspection. The Commissioner of Labor is responsible for all enforcement actions including the issuance of citations/Orders to Comply which must also specify the abatement period, posting requirements and the employer's and employee's right to contest any or all orders. Although the plan does not provide for initial (first instance) monetary sanctions, the Commissioner of Labor has the authority to impose civil administrative penalties of up to $7,000 per day for each violation, for failure to abate, if the time for compliance with an order has elapsed, and the employer has not contested and has not made a good faith effort to comply. Willful or repeated violations also are subject to civil administrative penalties of up to $70,000 for each violation. Penalties may be recovered with costs in a civil

action brought under the New Jersey Penalty Enforcement Act (N.J.S.2A.:58–1 *et seq.*)

(f) *Review procedures.* Under the plan, employers, employees and other affected parties may seek informal review with the Department of Labor relative to a notice of violation/Order to Comply, the reasonableness of the abatement period, any penalty and/or may seek formal administrative review with the Occupational Safety and Health Review Commission, a board appointed by the Governor and authorized under section 34:6A.42 of the New Jersey Act to hear and rule on appeals of orders to comply and any penalties proposed. Any employer, employee or employee representative affected by a determination of the Commissioner may file a contest within fifteen (15) working days of the issuance of an order to comply. The Review Commission will issue an order, based on a finding of fact, affirming, modifying, or vacating the commissioner's order to comply or the proposed penalty, or directing other appropriate relief, and the order shall become final 45 days after its issuance. Judicial review of the decision of the Review Commission may be sought at the Appellate Division of the Superior Court.

(g) *Staffing and Resources.* The plan further provides assurances of a fully trained, adequate staff, including 20 safety and 7 health compliance officers for enforcement inspections, and 4 safety and 3 health consultants to perform consultation services in the public sector, and 2 safety and 3 health training and education staff. The State has assured that it will continue to provide a sufficient number of adequately trained and qualified personnel necessary for the enforcement of standards as required by 29 CFR 1956.10. The State has also given satisfactory assurance of adequate funding to support the plan.

(h) *Records and reports.* The plan provides that public employers in New Jersey will maintain appropriate records and make timely reports on occupational injuries and illnesses in a manner substantially identical to that required for private sector employers under Federal OSHA. New Jersey has assured that it will continue its participation in the Bureau of Labor Statistics Annual Survey of Injuries and Illnesses with regard to both private and public sector employers. The State will comply with the provisions of 29 CFR 1904.7 which allows full employee and employee representative access, including employee's names, to the log of workplace injuries and illnesses; and will amend its regulations accordingly. The plan also contains assurances that the Commissioner of Labor will provide reports to OSHA in such form as the Assistant Secretary may require, and that New Jersey will participate in OSHA's Integrated Management Information System.

(i) *Voluntary compliance programs.* The plan provides that training will be provided to public employers and employees; seminars will be conducted to familiarize affected individuals with OSHA standards, requirements and safe work practices; an on-site consultation program in the public sector will be established to provide services to public employers who so desire; and, all State agencies and political subdivisions will be encouraged to develop and maintain self inspection programs as well as internal safety and health programs as an adjunct to but not a substitute for the Commissioner of Labor's enforcement.

§ 1956.61 Developmental Schedule.

The New Jersey State plan is developmental. The following is a schedule of major developmental steps as provided in the plan:

(a) Adopt standards identical to or at least as effective as all existing OSHA standards within one year after plan approval.

(b) Adopt amendments to regulations regarding inspections, citations, and proposed penalties equivalent to 29 CFR part 1903 within one year after plan approval.

(c) Develop a five year strategic plan within two years after plan approval.

(d) Develop field inspection reference manual and/or field operations manual within two years after plan approval.

(e) Fully implement public employer/employee consultation, training and education program equivalent to 29 CFR part 1908 within three years after plan approval.

(f) Adopt amendments to regulations regarding discrimination against employees equivalent to 29 CFR part 1977 within two years after plan approval.

(g) Adopt amendments to regulations regarding variances equivalent to 29 CFR part 1905 within two years after plan approval.

(h) Adopt amendments to regulations regarding record keeping equivalent to 29 CFR part 1904 within two years after plan approval.

§ 1956.62 Completion of developmental steps and certification. (Reserved).

§ 1956.63 Determination of operational effectiveness. (Reserved).

§ 1956.64 Location of plan for inspection and copying.

A copy of the plan may be inspected and copied during normal business hours at the following locations: Office of State Programs, U.S. Department of Labor, Occupational Safety and Health Administration, 200 Constitution Avenue, N.W., Room N–3700, Washington, D.C. 20210; Office of the Regional Administrator, U.S. Department of Labor, Occupational Safety and Health Administration, 1201 Varick Street, Room 670, New York, New York 10014; and New Jersey Department of Labor, Division of Public Safety and Occupational Safety and Health, Office of Public Employees' Safety, P.O. Box 386, 225 East State Street, 8th Floor West, Trenton, New Jersey 08625–0386.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 141

[FRL–6920–6]

RIN 2040–AD58

Unregulated Contaminant Monitoring Regulation for Public Water Systems; Analytical Methods for List 2 Contaminants; Clarifications to the Unregulated Contaminant Monitoring Regulation

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Safe Drinking Water Act (SDWA), as amended in 1996, requires the U.S. Environmental Protection Agency to establish criteria for a program to monitor unregulated contaminants and to publish a list of contaminants to be monitored. In fulfillment of this requirement, EPA published the Revisions to the Unregulated Contaminant Monitoring Regulation (UCMR) for public water systems on September 17, 1999, which included lists of contaminants for which monitoring was required or would be required in the future. These lists included: List 1 for contaminants with approved analytical methods; List 2 for contaminants with methods that were being refined; and List 3 for

contaminants with methods that were still being developed.

Today's rule approves the analytical methods for thirteen chemical contaminants on List 2, and requires monitoring for those contaminants in drinking water. This rule also sets the schedule for monitoring one microbiological contaminant, *Aeromonas,* contingent on promulgation of its analytical method. These methods and associated monitoring will be used to support EPA decisions concerning whether or not to regulate and establish standards for these contaminants in drinking water. The intent of regulating and setting standards for any of these contaminants that may be found to occur at levels of health concern is to protect public health. Additionally, in today's rule, EPA includes modifications to the UCMR (published September 17, 1999) that affect the implementation of monitoring for both List 1 and List 2 contaminants.

DATES: *Effective Date:* The final rule is effective January 11, 2001.

The incorporation by reference of the publications listed in today's rule is approved by the Director of the Federal Register as of January 11, 2001.

For purposes of judicial review, this final rule is promulgated as of 1 p.m. Eastern time on January 11, 2001, as provided in 40 CFR 23.7.

ADDRESSES: Documents relevant to this action are available for inspection from 9 a.m. to 4 p.m., Eastern Time, Monday through Friday, excluding legal holidays, at the Water Docket, East Tower Basement, Room 57, U.S. EPA, 401 M Street, SW., Washington DC. For access to docket (Docket No. W–00–01) materials, please call (202) 260–3027 between 9 a.m. and 3:30 p.m, Eastern Time, Monday through Friday, to schedule an appointment. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Charles Job, Drinking Water Protection Division, Office of Ground Water and Drinking Water (MC–4607), U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue, NW., Washington D.C. 20460, (202) 260–7084. General information may also be obtained from the EPA Safe Drinking Water Hotline. Callers within the United States may reach the Hotline at (800) 426–4791. The Hotline is open Monday through Friday, excluding federal holidays, from 9 a.m. to 5:30 p.m. Eastern Time.

Abbreviations and Acronyms Used in the Preamble and Final Rule

2,4-DNT—2,4-dinitrotoluene
2,6-DNT—2,6-dinitrotoluene
4,4′-DDE—4,4′-dichloro dichlorophenyl ethylene, a degradation product of DDT
Alachlor ESA—alachlor ethanesulfonic acid, a degradation product of alachlor
AOAC—Association of Official Analytical Chemists
APHA—American Public Health Association
ASDWA—Association of State Drinking Water Administrators
ASTM—American Society for Testing and Materials
CAS—Chemical Abstract Service
CASRN—Chemical Abstract Service Registry Number
CCL—Contaminant Candidate List
CCR—Consumer Confidence Reports
CERCLA—Comprehensive Environmental Response, Compensation & Liability Act
CFR—Code of Federal Regulations
CFU/mL—colony forming units per milliliter
CWS—community water system
DCPA—dimethyl tetrachloroterephthalate, chemical name of the herbicide dacthal
DCPA mono- and di-acid degradates—degradation products of DCPA
DDE—dichloro dichlorophenyl ethylene, a degradation product of DDT
DDT—dichloro diphenyl trichloroethane, a general insecticide
DNA—deoxyribonucleic acid
EDL—estimated detection limit
EPA—Environmental Protection Agency
EPTC—s-ethyl-dipropylthiocarbamate, an herbicide
EPTDS—Entry Point to the Distribution System
ESA—ethanesulfonic acid, a degradation product of alachlor and other acetanilide pesticides
FACA—Federal Advisory Committee Act
FSIS—federalism summary impact statement
FTE—full-time equivalent
GC—gas chromatography, a laboratory method
GLI method—Great Lakes Instruments method
GW—ground water
GUDI—ground water under the direct influence (of surface water)
HPLC—high performance liquid chromatography, a laboratory method
IC—ion chromatography
ICR—Information Collection Rule
IRFA—initial regulatory flexibility analysis
IMS—immunomagnetic separation
IRIS—Integrated Risk Information System
IS—internal standard
LLE—liquid/liquid extraction, a laboratory method
MAC—*Mycobacterium avium* complex
MCL—maximum contaminant level
MCT—matrix conductivity threshold
MDL—method detection limit
MOA—Memorandum of agreements
MRL—minimum reporting level
MS—mass spectrometry, a laboratory method
MS—sample matrix spike
MSD—sample matrix spike duplicate
MTBE—methyl tertiary-butyl ether, a gasoline additive
NAICS—North American Industry Classification System
NAWQA—National Water Quality Assessment Program
NCOD—National Drinking Water Contaminant Occurrence Database
NDWAC—National Drinking Water Advisory Council
NERL—National Environmental Research Laboratory
NPS—National Pesticide Survey
NTIS—National Technical Information Service
NTNCWS—non-transient non-community water system
NTTAA—National Technology Transfer and Advancement Act
OGWDW—Office of Ground Water and Drinking Water
OMB—Office of Management and Budget
PAH—Polycyclic aromatic hydrocarbon
PB—particle beam
PBMS—Performance-Based Measurement System
pCi/L—picocuries per liter
PCR—polymerase chain reaction
^{210}Pb—Lead-210 (also Pb-210), a lead isotope and radionuclide; part of the uranium decay series
^{210}Po—Polonium-210 (also Po-210), a polonium isotope and radionuclide; part of the uranium decay series
PWS—Public Water System
PWSF—Public Water System Facility
QA—quality assurance
QC—quality control
RDX—royal demolition explosive, hexahydro-1,3,5-trinitro-1,3,5-triazine
RFA—Regulatory Flexibility Act
RPD—relative percent difference
RSD—relative standard deviation
SBREFA—Small Business Regulatory Enforcement Fairness Act
SD—standard deviation
SDWA—Safe Drinking Water Act
SDWIS—Safe Drinking Water Information System
SDWIS/FED—the Federal Safe Drinking Water Information System
SM—Standard Methods for the Examination of Water and Wastewater
SMF—Standard Compliance Monitoring Framework

SOC—synthetic organic compound
SOP—standard operating procedure
SPE—solid phase extraction, a laboratory method
spp.—multiple species
SRF—State Revolving Fund
STORET—Storage and Retrieval System
SW—surface water
TBD—to be determined
TDS—total dissolved solid
TNCWS—transient non-community water system
TTHM—total trihalomethane
UCMR—Unregulated Contaminant Monitoring Regulation/Rule
UCM—Unregulated Contaminant Monitoring
UMRA—Unfunded Mandates Reform Act of 1995
USEPA—United States Environmental Protection Agency
UV—ultraviolet
VOC—volatile organic compound
µg/L—micrograms per liter
µS/cm—microsiemens per centimeter

Preamble Outline

I. Statutory Authority
II. Major Program Revisions
III. Summary of Today's Rule
IV. Process of Preparing the Final Rule
V. Explanation of Today's Action
A. Relation to the UCMR Published in September 1999
B. Systems Affected by This Rule
C. Changes to the UCMR Associated with the Screening Survey for List 2 Contaminants
1. Description of Screening Surveys for List 2 Contaminants
2. Contaminants and Analytical Methods
a. New Methods for Use in Screening Survey One
(i) Summary of EPA Method 532.0: Determination of Phenylurea Compounds in Drinking Water by Solid Phase Extraction and High Performance Liquid Chromatography with Ultraviolet Detection
(ii) Summary of EPA Method 528: Determination of Phenols in Drinking Water by Solid Phase Extraction and Capillary Column Gas Chromatography/Mass Spectrometry (GC/MS)
(iii) Summary of EPA Method 526: Determination of Selected Semivolatile Organic Compounds in Drinking Water by Solid Phase Extraction and Capillary Column GC/MS
(iv) Peer Review
(v) Laboratory Approval and Certification
b. Monitoring Nitrobenzene at Low-Level in Screening Survey One
c. Monitoring of *Aeromonas* in Screening Survey Two
d. Exclusion of RDX, and Alachlor ESA and Other Acetanilide Pesticide Degradation Products from Monitoring under Screening Survey at This Time
e. Movement of Polonium-210 from UCMR (1999) List 2 to UCMR (1999) List 3
3. All List 2 Monitoring at Entry Points to the Distribution System
4. Implementation
a. Coordination of Assessment Monitoring and Screening Surveys
b. Selection of Systems by Water Source and Size
c. Sampling Period, Location and Frequency
d. Sample Analysis
e. Reporting
D. Other Technical Changes and Clarifications to the UCMR (40 CFR 141.40)
1. Updating the National Drinking Water Contaminant Occurrence Database
2. Reporting System and Laboratory Contacts
3. Modification of Data Element Definitions
4. Clarification of Data Reporting Procedures
5. Clarification of Systems Purchasing Water from Other Systems
6. Clarification of Source (Raw) Water Monitoring Alternative
7. Clarification of Treatment Plant Latitude/Longitude Options
8. Addition of Consensus Method for Testing
9. Approval of EPA Method 502.2 and Standard Methods 6200C for the Analysis of MTBE
10. Approval of EPA Methods 515.3 and 515.4 for the Analysis of DCPA mono-acid degradate and DCPA di-acid degradate
11. Use of pH as a Water Quality Parameter
12. Detection Limit Reference
13. Detection Confirmation
14. Method Defined Quality Control
15. Clarification of Resampling
16. Identification of Laboratories Approved for UCMR Monitoring
VI. Additional Issues From Public Comment and EPA Response
A. Reporting Data on Other Contaminants
B. More Complete Specification of Contaminants for Unregulated Contaminant Monitoring in the Future

Potentially Regulated Entities

The regulated entities are public water systems. All large community and non-transient non-community water systems serving more than 10,000 persons are required to monitor. A community water system (CWS) means a public water system which serves at least 15 service connections used by year-round residents or regularly serves at least 25 year-round residents. Non-transient non-community water system (NTNCWS) means a public water system that is not a community water system and that regularly serves at least 25 of the same persons over 6 months per year. Only a national representative sample of community and non-transient non-community systems serving 10,000 or fewer persons will be required to monitor. Transient non-community systems (i.e., systems that do not regularly serve at least 25 of the same persons over six months per year) will not be required to monitor. States, Territories, and Tribes, with primacy to administer the regulatory program for public water systems under the Safe Drinking Water Act, sometimes conduct analyses to measure for contaminants in water samples and are regulated by this action. Categories and entities potentially regulated by this action include the following:

Category	Examples of potentially regulated entities	NAICS
State, Territorial and Tribal Governments ...	States, Territories, and Tribes that analyze water samples on behalf of public water systems required to conduct such analysis; States, Territories, and Tribes that themselves operate community and non-transient non-community water systems required to monitor.	924110
Industry	Private operators of community and non-transient non-community water systems required to monitor.	221310
Municipalities	Municipal operators of community and non-transient non-community water systems required to monitor.	924110

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated by this action. This table lists the types of entities that EPA is now aware of that could potentially be regulated by this action. Other types of entities not listed in the table could also be regulated. If you have questions regarding the applicability of this action to a particular entity, consult the person listed in the preceding **FOR FURTHER INFORMATION CONTACT** section.

I. Statutory Authority

SDWA section 1445 (a)(2), as amended in 1996, requires EPA to establish criteria for a program to monitor unregulated contaminants and to issue, by August 6, 1999, a list of contaminants to be monitored. In fulfillment of this requirement, EPA published the Revisions to the Unregulated Contaminant Monitoring Regulation (UCMR) for public water systems on September 17, 1999 (64 FR 50556), which included lists of contaminants for which monitoring was required or would be required in the future. These lists included: List 1 for contaminants with approved analytical methods; List 2 for contaminants with methods that were being refined; and List 3 for contaminants with methods that were still being developed. The rule covered: (1) The frequency and schedule for monitoring, based on PWS size, water source, and likelihood of finding contaminants; (2) a new, shorter list of contaminants for which systems will monitor; (3) procedures for selecting and monitoring a nationally representative sample of small PWSs (those serving 10,000 or fewer persons); and (4) procedures for entering the monitoring data in the National Drinking Water Contaminant Occurrence Data Base (NCOD), as required under section 1445.

II. Major Program Revisions

Today's action establishes analytical methods for measurement of 13 chemical contaminants, which were included on the UCMR (1999) List 2, and requirements for monitoring of those contaminants by public water systems. The 1999 List 2 contaminants and their sources, including amendments to List 2 established today, are presented in Table 1, Uses and Environmental Sources of UCMR (1999) List 2 Contaminants. This action also establishes modifications affecting the sample collection, analysis and reporting of both List 1 and List 2 contaminants. Such modifications include clarifying source water monitoring, resampling conditions, additional methods, and clarification of definitions of some data elements for reporting. None of these changes result in a major burden or impact and some changes may reduce burden, but they should improve data quality.

TABLE 1.—USES AND ENVIRONMENTAL SOURCES OF UCMR (1999) LIST 2 CONTAMINANTS

Contaminant Name	CASRN	Use or Environmental Source
Final Chemical Contaminants		
1,2-diphenylhydrazine	122–66–7	Used in the production of benzidine and anti-inflammatory drugs.
2-methylphenol	95–48–7	Released in automobile and diesel exhaust, coal tar and petroleum refining, and wood pulping.
2,4-dichlorophenol	120–83–2	Chemical intermediate in herbicide production.
2,4-dinitrophenol	51–28–5	Released from mines, metal, petroleum, and dye plants.
2,4,6-trichlorophenol	88–06–2	By-product of fossil fuel burning, used as bactericide and wood/glue preservative.
Alachlor ESA and other acetanilide pesticides.	N/A	Degradation product of alachlor and other acetanilide pesticides, herbicides generally used with corn, bean, peanut, and soybean crops to control grasses and weeds.
Diazinon	333–41–5	Insecticide used with rice, fruit, vineyards, and corn crops.
Disulfoton	298–04–4	Insecticide used with cereal, cotton, tobacco, and potato crops.
Diuron	330–54–1	Herbicide used on grasses in orchards and wheat crops.
Fonofos	944–22–9	Soil insecticide used on worms and centipedes.
Linuron	330–55–2	Herbicide used with corn, soybean, cotton, and wheat crops.
Nitrobenzene	98–95–3	Used in the production of aniline, which is used to make dyes, herbicides, and drugs.
Prometon	1610–18–0	Herbicide used on annual and perennial weeds and grasses.
RDX (royal demolition explosive, hexahydro-1,3,5-trinitro-1,3,5-triazine).	121–82–4	Used in explosives; ammunition plants.
Terbufos	13071–79–9	Insecticide used with corn, sugar beet, and grain sorghum crops.
Microbiological Contaminant		
Aeromonas	N/A	Present in all freshwater and brackish water.

III. Summary of Today's Rule

The September 1999 rule included a list of contaminants to be monitored which was further subdivided into three lists: List 1 for contaminants with current approved analytical methods, List 2 for contaminants with methods being refined, and List 3 for contaminants with methods being developed in research. In a supplemental rule, published March 2, 2000, (65 FR 11371), the methods for two List 1 contaminants were established as were some technical corrections to the UCMR rule.

Sixteen contaminants were included on the UCMR (1999) List 2, with their analytical methods listed as ''reserved,'' pending the conclusion of EPA refinement and review of the analytical methods. EPA proposed analytical methods for 13 chemical contaminants and nitrobenzene, as well as *Aeromonas,* a microbiological contaminant, on List 2 on September 13, 2000. Today's final rule amends the 1999 UCMR to specify analytical methods for monitoring for 13 organic chemical contaminants, and it establishes the monitoring schedule for 13 contaminants (13 organic chemicals) on List 2. Today's rule adds one contaminant to List 2, nitrobenzene, (**Note**: Nitrobenzene is also on List 1 using a method with a higher minimum reporting level) and moves one other

contaminant, polonium-210, from List 2 to List 3. In addition, today's final rule activates Screening Survey monitoring for these 13 contaminants, as described in § 141.40(a)(3), Table 1, List 2. This final rule also contains several minor wording and technical changes to the September 1999 rule in response to comments received on the September 2000 proposal. Additionally, the preamble to today's rule includes discussion of EPA's responses to the comments received on the proposed rule.

IV. Process of Preparing the Final Rule

EPA has been developing the final revisions to the Unregulated Contaminant Monitoring Regulation (UCMR) for public water systems since 1997. In December 1997, EPA's UCMR development workgroup held a stakeholders meeting to obtain input from the public on major issues and options affecting the program and emanating from the Safe Drinking Water Act, as amended in 1996. EPA held a second stakeholders meeting in May 1998, on options under serious consideration for the UCMR. EPA engaged eleven external expert reviewers from March 1 through April 22, 1999, to examine and comment on the technical aspects of the UCMR. These technical reviewers evaluated and commented on the chemical and microbiological contaminant analytical methods and reporting requirements, the statistical approach for the representative sample of small systems, and the sampling and monitoring approach. The comments of the technical reviewers were available to the public through the official docket and on the Internet through EPA's Office of Ground Water and Drinking Water electronic homepage.

The comment period on the original UCMR revision (published in the **Federal Register** on April 30, 1999) closed on June 14, 1999, with submissions from 155 commenters meeting the deadline and addressing all major aspects of the proposed rule.

The final rule on the original UCMR revisions was published on September 17, 1999 (64 FR 50556). EPA conducted five national workshops on implementation of the final regulation. At these workshops, EPA received many comments from State, Tribal and Regional participants concerning various aspects of implementing the rule. As a result of this additional input, EPA subsequently modified the original UCMR on March 2, 2000 (65 FR 11371) through a direct final rule and proposed additional changes to the original rule on September 13, 2000. Today's final rule promulgates the modifications proposed on September 13, 2000 (in addition to establishing List 2 monitoring requirements).

The comment period for the September 13, 2000, List 2 proposal (65 FR 55362) closed on October 13, 2000. EPA received 15 comments which were submitted within the specified comment period. These comments addressed all major aspects of the proposal and EPA considered and addressed all comments in the process of developing this final regulation.

V. Explanation of Today's Action

A. Relation to the UCMR Published in September 1999

The final UCMR, published on September 17, 1999, and subsequently revised on March 2, 2000, consisted of many program elements designed to enhance and improve the unregulated contaminant monitoring program in several important ways. The rule specifies (1) which systems must monitor, including a statistical approach to select a representative sample of small public water systems; (2) a list of contaminants for which systems must monitor; (3) the monitoring time, frequency, and location of sampling; (4) which methods are to be used for analyzing the contaminants; (5) quality control elements that must be followed in addition to those specified in each analytical method; (6) reporting requirements; and (7) State and Tribal participation concerning the implementation of the monitoring program.

EPA divided the list of contaminants for which systems must monitor into three separate lists based on the availability of analytical methods and the scope of monitoring to be required. List 1, Assessment Monitoring, consisted of 12 contaminants for which analytical methods were available. List 2, Screening Survey, consisted of 16 contaminants for which EPA expected analytical methods would be developed by the time of initial monitoring in 2001. Pre-Screen Testing, List 3, consisted of eight contaminants for which analytical methods research was being conducted. Only the contaminants on List 1 must be monitored at all 2,774 large community and non-transient non-community public water systems serving more than 10,000 persons, and at a representative sample of approximately 800 systems serving 10,000 or fewer persons. From this set of approximately 3,600 large and small public water systems, EPA has randomly selected approximately 300 large and small systems to monitor for List 2 contaminants in Screening Surveys. Today's rule specifies the analytical methods for 13 List 2 contaminants. The method for the microbiological contaminant, *Aeromonas,* is reserved in today's notice, but EPA expects to promulgate EPA Method 1605 in 2001. Methods for the other two List 2 contaminants, RDX and Alachlor ESA, need to be refined for analysis in treated drinking water.

The placement of 16 contaminants on List 2 meant that their analytical methods were being further refined and were not ready for the extensive monitoring that would occur for the List 1 contaminants. The evaluation of the 13 new methods during monitoring for List 2 contaminants will include developing the data necessary to support the determination of practical quantitation levels, which are needed to support possible future regulations, as well as determining the occurrence of the analytes measured. Today's final rule provides for monitoring 13 List 2 chemical contaminants at the 180 small systems randomly selected from the 800 small systems in the State Monitoring Plans beginning in January 2001 (with the small systems (or State) doing the sampling and EPA conducting the testing and reporting). State Monitoring Plans (SMPs) collectively specify the 800 randomly selected small water systems serving 10,000 or fewer persons and constitute the national representative sample of small systems. The SMPs also collectively specify 120 randomly selected large systems that must monitor for List 2 contaminants, beginning in January 2002. A second Screening Survey for one List 2 microbiological contaminant *(Aeromonas)* will be performed in 2003 by 180 other small systems and 120 other large systems once the final method is promulgated. The delay of the Screening Survey for the microbiological contaminant will allow EPA to publish the new method and will allow time for laboratories to gain experience with the new method and have capacity available for large system testing.

The rule establishes timing that will allow monitoring of these List 2 contaminants at small systems concurrently with the List 1, Assessment Monitoring, contaminants. Small systems will monitor in 2001 for List 2 contaminants ahead of large systems in 2002 because EPA is paying for the small system monitoring, and also plans to review the performance of the methods prior to large system monitoring, which must be paid for by the large systems.

Methods are still being refined for the remaining two List 2 chemical contaminants. If methods for these contaminants are developed in a timely fashion, they may be added for monitoring in a separate rule, probably during the next UCMR 5-year regulatory cycle.

As provided in the September 1999 rule (64 FR 50556), surface water systems will monitor quarterly for one year, and ground water systems will monitor twice in one year for List 2 chemical contaminants. Today's final rule specifies quarterly monitoring for microbiological contaminants with monthly monitoring during the vulnerable (warm) quarter. List 1 Assessment Monitoring must be done within the three years of 2001 through 2003, which is intended to allow coordination with the three-year compliance monitoring cycle for regulated contaminants. The exceptions that would involve Assessment Monitoring beyond 2003 include: loss of samples for any reason, necessitating another sampling event, or initiating sampling at entry points to the distribution system if contaminants are found in systems that conduct their other compliance monitoring at source (raw) water sampling points. One of these quarterly or semiannual sampling events must occur in the most vulnerable period of May through July, or an alternate vulnerable period designated by the State, to ensure monitoring of seasonally elevated contaminant concentrations.

B. Systems Affected by This Rule

The focus of UCMR List 2 is on the occurrence or likely occurrence of contaminants in drinking water of community and non-transient, non-community water systems. For regulatory purposes, public water systems are categorized as ''community water systems,'' or ''non-community water systems.'' Community water systems are specifically defined as ''public water systems which serve at least 15 service connections used by year-round residents or regularly serve at least 25 year round residents'' (40 CFR 141.2). A ''non-community water system'' means any other public water system. Non-community water systems include non-transient non-community water systems and transient non-community water systems. Non-transient non-community systems are those that regularly serve at least 25 of the same persons over six months per year (e.g., schools, industrial buildings). Transient systems are all other non-community systems, which typically serve a transient population such as restaurants or hotels. As explained in the September 1999 UCMR, EPA is excluding transient water systems from monitoring for unregulated contaminants, including those on List 2. The results from the small community and non-transient non-community systems can be extrapolated to the transient non-community systems, if needed.

With respect to size, about 2,800 large systems (defined here as those serving more than 10,000 persons) provide drinking water to about 80 percent of the U.S. population that is served by public water systems. The SDWA does not provide for EPA funding of this monitoring. Under the UCMR program, all large systems are required to monitor for List 1 unregulated contaminants. Only a representative sample of systems serving 10,000 persons or fewer can be required to monitor for unregulated contaminants. SDWA authorizes EPA to pay for the reasonable testing costs for the national representative sample of small systems.

As described in the September 17, 1999, **Federal Register** (64 FR 50556), EPA has selected 300 large and small systems from the systems required to conduct Assessment Monitoring for List 1 to participate in the monitoring for List 2 contaminants. The 300 systems were divided as follows: 120 large systems serving more than 10,000 persons and 180 small systems serving 10,000 or fewer persons. These allocations were approximately subdivided as follows: For the large systems, 60 systems were selected from systems serving more than 50,000 persons and 60 were from systems serving from 10,001 to 50,000 persons. For the small systems, 60 systems were selected from each of the following service size categories: 25 to 500 persons, 501 to 3,300 persons, and 3,301 to 10,000 persons. These systems were further allocated by water source type and were randomly selected from the systems required to conduct Assessment Monitoring for List 1 contaminants. The final systems selected are identified in the final State Monitoring Plans that EPA is sending to the States. The final allocations may vary from these numbers based on the State Monitoring Plan review and final system selection.

TABLE 2.—STATUS OF ANALYTICAL METHODS FOR CHEMICAL CONTAMINANTS ON THE UCMR (1999) LIST

	CAS#	Availability of analytical methods	Status of availability
UCMR (1999) List 1—Chemical Contaminant:			
2,4-dinitrotoluene	121–14–2	EPA Method 525.2	Methods is adequate for List 1 monitoring.
2,6-dinitrotoluene	606–20–2	EPA Method 525.2	Method is adequate for List 1 monitoring.
4,4'–DDE	72–55–9	EPA Method 508, EPA Method 508.1, EPA Method 525.2, D5812–96, AOAC 990.06.	Methods are adequate for List 1 monitoring.
Acetochlor	34256–82–1	EPA Method 525.2	Method is adequate for List 1 monitoring.
DCPA di acid degradate	2136–79–0	EPA Method 515.1, EPA Method 515.2, EPA Method 515.3, EPA Method 515.4, D5317–93, AOAC 992.32.	Methods are adequate for List 1 monitoring.
DCPA mono acid degradate	887–54–7	EPA Method 515.1, EPA Method 515.2, EPA Method 515.3, EPA Method 515.4, D5317–93, AOAC 992.32.	Methods are adequate for List 1 monitoring.
EPTC	759–94–4	EPA Method 507, EPA Method 525.2, D5475–93, AOAC 991.07.	Methods are adequate for List 1 monitoring.
Molinate	2212–67–1	EPA Method 507, EPA Method 525.2, D5475-93, AOAC 991.07.	Methods are adequate for List 1 monitoring.
MTBE	1634–04–4	EPA Method 502.2, EPA Method 524.2, D5790–95, SM6210D, SM6200B, SM6200C.	

TABLE 2.—STATUS OF ANALYTICAL METHODS FOR CHEMICAL CONTAMINANTS ON THE UCMR (1999) LIST—Continued

	CAS#	Availability of analytical methods	Status of availability
Nitrobenzene	98–95–3	EPA Method 524.2, D5790–95, SM6210D, SM6200B.	Methods are adequate for List 1 monitoring.
Perchlorate	14797–73–0	EPA Method 314.0	Method is adequate for List 1 monitoring.
Terbacil	5902–51–2	EPA Method 507, EPA Method 525.2, D5475–93, AOAC 991.07.	Methods are adequate for List 1 monitoring.
UCMR (1999) List 2—Chemical Contaminant			
1,2-diphenylhydrazine	122–66–7	EPA Method 526	Methods is adequate for List 2 Monitoring in 2001–2002 [a]
2,4,6-trichlorophenol	88–06–2	EPA Method 528	Method is adequate for List 2 Monitoring in 2001–2002 [a]
2,4-dichlorophenol	120–83–2	EPA Method 528	Method is adequate for List 2 Monitoring in 2001–2002 [a]
2,4-dinitrophenol	51–28–5	EPA Method 528	Methods is adequate for List 2 Monitoring in 2001–2002 [a]
2-methyl-phenol	95–48–7	EPA Method 528	Method is adequate for List 2 Monitoring in 2001–2002 [a]
Alachlor ESA and degradation by-products of acetanilide pesticides.		Being refined	Candidate for a 3rd Screening Survey, if conducted
Diazinon	333–41–5	EPA Method 526	Method is adequate for List 2 Monitoring in 2001–2002 [a]
Disulfoton	298–04–4	EPA Method 526	Method is adequate for List 2 Monitoring in 2001–2002 [a]
Diuron	330–54–1	EPA Method 532	Method is adequate for List 2 Monitoring in 2001–2002 [a]
Fonofos	944–22–9	EPA Method 526	Method is adequate for List 2 Monitoring in 2001–2002 [a]
Linuron	330–55–2	EPA Method 532	Method is adequate for List 2 Monitoring in 2001–2002 [a]
Nitrobenzene	98–95–3	EPA Method 526	Method is adequate for List 2 Monitoring in 2001–2002 [a]
Prometon	1610–18–0	EPA Method 526	Method is adequate for List 2 Monitoring in 2001–2002 [a]
RDX	121–82–4	Being refined	Candidate for a 3rd Screening Survey, if conducted
Terbufos	13071–79–9	EPA Method 526	Method is adequate for List 2 Monitoring in 2001–2002 [a]
UCMR (1999) List 3—Chemical Contaminant:			
Polonium-210 (^{210}Po)	13981–52–7	In development	Radichemistry laboratory capacity is limited.
Lead-210 (^{210}Pb)	14255–04–0	In development	Method is time-consuming and expensive. Radiochemistry laboratory capacity is limited.

[a] Small systems selected for the Screening Survey One will monitor for these contaminants in 2001, and large systems selected for the Screening Survey One will monitor in 2002.

TABLE 3.—STATUS OF ANALYTICAL METHODS FOR MICROBIOLOGICAL CONTAMINANTS ON THE UCMR (1999) LIST

	Availability of Analytical Methods	Status of Availability
UCMR (1999) List 2—Microbiological Contaminants:		
Aeromonas	Reserved	Method has been proposed. EPA expects to promulgate the method in 2001.
UCMR (1999) List 3—Microbiological Contaminants:		
Cyanobacteria (blue-green algae, other freshwater algae and their toxins).	Methods available but not standardized.	Methods are avialable for counting cyanobacteria but new, standardized methods are needed for direct counts of targeted species with filtration methods or a counting chamber. Standardized analytical methods are also needed to detect the more important cyanobacterial toxins.
Echoviruses	Methods available but not standardized.	Echoviruses can be cultured on BGM cells available and detected by the ICR method but require supplemental methods such as serological typing to distinguish echoviruses from other viruses. Cost of cell culture assays plus serotyping can be high. RT/PCR methods are subject to interferences and do not demonstrate infectivity. Combined cell culture and PCR, which demonstrates infectivity, may be considered.

TABLE 3.—STATUS OF ANALYTICAL METHODS FOR MICROBIOLOGICAL CONTAMINANTS ON THE UCMR (1999) LIST—Continued

	Availability of Analytical Methods	Status of Availability
Coxsackieviruses	Methods available but not standardized.	Group B coxsackieviruses are easy to grow in tissue culture but group A coxsackievirus detection in cell culture is variable. Culturable coxsackieviruses can be detected with the ICR method but serological typing is needed to distinguish coxsackieviruses from other viruses. RT/PCR methods are subject to interferences and do not demonstrate infectivity. New, standardized methods are needed. Combined cell culture and PCR methods may be considered.
Helicobacter pylori	No suitable method currently available.	*Helicobacter pylori* is difficult to cultivate because of its slow growth rate and the need for a low oxygen environment. No selective medium exists that will discriminate *H. pylori* from background bacteria. A culture-based method that demonstrates viability is preferred. Methods are needed for selective growth and identification. IMS has been used to concentrate *Helicobacter pylori.* Methods using PCR alone have been used but have not been validated by EPA. In general, PCR methods are not preferred due to interferences and their inability to demonstrate viability. A combined cultural and molecular method may be considered.
Microsporidia	No suitable method currently available.	No methods are available for the monitoring of the two species of human microsporidia which may have a waterborne route of transmission [*Enterocytozoon bienuesi* and *Encephalitozoon* (formerly *Septata*) *intestinalis*]. Spores could possibly be detected by methods similar to those being developed for *Cryptosporidium parvum.* Potential methods may utilize water filtration, clean-up with IMS, and detection using microscopy with either fluorescent antibody or gene probe procedures. Provided that procedures are validated by EPA, reverse-transcriptase (RT)–PCR techniques may be considered for monitoring, although PCR methods in general are not preferred at this time due to interferences and their inability to demonstrate viability. Due to the small size of microsporida, problems could be encountered during filtration.
Adenoviruses	No suitable method currently available.	Adenoviruses serotypes 1 to 39 and 42 to 47 can be grown in tissue culture but enteric adenoviruses 40 to 41 are difficult to grow. Several selective tissue culture methods and detection methods have been reported. A selective, standardized method is needed for monitoring. PCR methods are not preferred, as they are subject to interferences and do not demonstrate infectivity. A combined cell culture and PCR method may be considered.
Caliciviruses	No suitable method currently available.	No tissue culture methods exist for the two genogroups of caliciviruses on the CCL (the Norwalk-like and the Snow Mountain-like agents). No sensitive or fully developed detection methods exist. PCR methods are not preferred, as they are subject to interferences and do not demonstrate infectivity. A combined cell culture and PCR method may be considered if a suitable cell line is found.

C. Changes to the UCMR Associated With the Screening Survey for List 2 Contaminants

1. Description of Screening Surveys for List 2 Contaminants

The contaminants for which EPA is promulgating new methods are listed in § 141.40(a)(3), Table 1, List 2. Today's rule activates the Screening Survey monitoring for these List 2 contaminants for which methods are being promulgated today. The purpose of the Screening Survey is to analyze for contaminants where the use of newly developed, non-routine analytical methods are required. The Screening Survey approach will allow EPA to maximize scientifically-defensible occurrence data for emerging contaminants of concern more quickly than could be obtained through a more standard unregulated contaminant monitoring effort. The Screening Survey will, for example, be useful in addressing questions concerning whether a contaminant of concern is in fact occurring in drinking water and the range of concentrations of that occurrence. The Screening Survey is also intended to allow EPA to screen contaminants to see if they occur at high enough frequencies or at concentrations that justify inclusion in future unregulated contaminant Assessment Monitoring or at sufficiently low frequencies so that they do not require further monitoring or regulation.

Under today's rule, the Screening Survey for List 2 contaminants will be implemented in two parts: Screening Survey One for chemical contaminants in 2001 at selected small systems and 2002 at selected large systems, and Screening Survey Two for *Aeromonas,* a microbiological contaminant, in 2003 at selected small and large systems.

The contaminants in UCMR (1999) List 2 will be monitored, as part of a Screening Survey, by a smaller, statistically selected sample of 300 systems which represent all (large and small) community and non-transient non-community water systems. As in Assessment Monitoring for List 1 contaminants, public water systems serve as a surrogate for the population potentially affected, and are a more efficient way to develop a sampling approach to estimate exposure to contaminants. These systems have been selected using a random number generator. As discussed in the proposal, EPA will use the data from the Screening Survey as an initial assessment of occurrence to determine whether: (1) More extensive monitoring of a contaminant is warranted (*e.g.,* in the next round of Assessment Monitoring) to determine the need for future regulation; (2) a contaminant

should be eliminated from further consideration for regulation; or, (3) under circumstances of wide-spread occurrence, a contaminant should be moved directly into consideration for regulatory development. EPA will, of course, evaluate other factors and not just this measure of occurrence before deciding to regulate a contaminant.

EPA will pay for the shipping, testing, and reporting for the Screening Survey for systems serving 10,000 or fewer persons. Systems serving 10,000 or fewer persons will be responsible for sample collection and preparing the samples for shipment. EPA will pay for the shipping of these samples to an EPA-designated laboratory for testing and for reporting of monitoring results to EPA, with a copy to the State. Large systems, those serving more than 10,000 persons, must arrange and pay for the monitoring, shipping, testing, and reporting of results.

2. Contaminants and Analytical Methods

In today's final rule, EPA establishes the use of three new EPA methods for the monitoring of 13 chemical contaminants on List 2. These contaminants and methods are listed in Table 2. In addition, EPA has added nitrobenzene to List 2. Methods for two chemical contaminants alachlor ESA and RDX are still being refined and remain reserved on List 2. EPA has moved polonium-210 to List 3. Finally, *Aeromonas* remains reserved for List 2 monitoring (see Table 3). Other pertinent information is listed on Table 4 related to the detection and quantitation for the 13 contaminants to be monitored from List 2. The status of the contaminants and methods are discussed in further detail in this section.

TABLE 4.—DETECTION AND QUANTITATION FOR LIST 2 CONTAMINANTS

	Detection limit	Final MRL [a]
Contaminant:		
2-methylphenol	0.03 µg/L	1 µg/L
2,4,6-trichlorophenol	0.05 µg/L	1 µg/l
2,4-dichlorophenol	0.03 µg/L	1 µg/L
2,4-dinitrophenol	0.3 µg/L	5 µg/L
1,2 diphenylhydrazine	0.03 µg/L	0.5 µg/L
Diazinon	0.02 µg/L	0.5 µg/L
Disulfoton	0.02 µg/L	0.5 µg/L
Fonofos	0.02 µg/L	0.5 µg/L
Prometon	0.04 µg/L	0.5 µg/L
Terbufos	0.02 µg/L	0.5 µg/L
Nitrobenzene	0.01 µg/L	0.5 µg/L
Linuron	0.07 µg/L	1 µg/L
Diuron	0.1 µg/L	1 µg/L
Alachlor ESA and other acetanilide pesticide degradates	Reserved [b]	Reserved [b]
RDX	Reserved [b]	Reserved [b]
Microbiological Contaminant:		
Aeromonas	Reserved [b]	Reserved [b]

[a] Minimum Reporting Level based upon precision and accuracy data derived during methods development and verified in second laboratory validation.
[b] To be determined.

a. New Methods for Use in Screening Survey One

This section includes summaries of the three analytical methods for use for the chemicals included in the Screening Survey in 2001 and 2002. Tables 2 and 3 list the contaminants and new methods. The details of these methods and the results of their peer reviews are documented in Water Docket W–00–01.

(i) *Summary of EPA Method 532.0: Determination of Phenylurea Compounds in Drinking Water by Solid Phase Extraction and High Performance Liquid Chromatography with Ultraviolet Detection.* Today, EPA establishes the use of EPA Method 532.0 to analyze for diuron and linuron. Under this method, a 500 milliliter volume of water is extracted on a chemically bonded C_{18} cartridge or disk, extracted with a small amount of methanol, and the resulting extract injected into a high performance liquid chromatographic (HPLC) system equipped with a C_{18} column and a UV detector. All positive results are confirmed using a second, dissimilar HPLC column.

• *Refinements from Previous Methods.* While linuron and diuron are included in the scope of NPS Method 4 (LLE/HPLC/UV) and EPA Method 553 (SPE/HPLC/MS), these methods were determined to be inappropriate for this monitoring. NPS Method 4 uses mercuric chloride for biological stabilization, does not contain any reagents to reduce disinfectant residuals, and requires the extraction of 1 liter water samples with 180 mL of methylene chloride. EPA Method 553 does not include biological stabilization, and requires the use of a HPLC/MS equipped with a particle beam interface. EPA Method 532, copper sulfate is used to biologically stabilize samples, rather than the toxic compound mercuric chloride, solid phase extraction of 500 mL samples, rather than extracting one liter samples with methylene chloride results in a significant reduction of solvent. In addition, analysis is conducted by performing separation and detection using more commonly available HPLC/UV instrumentation, rather than particle beam interfaces which are no longer manufactured.

(ii) *Summary of EPA Method 528: Determination of Phenols in Drinking Water by Solid Phase Extraction and Capillary Column Gas Chromatography/Mass Spectrometry (GC/MS).* Under this final regulation, EPA requires the use of EPA Method 528 to analyze for 2-methyl-phenol, 2,4,6-trichlorophenol, 2,4-dichlorophenol, and 2,4-dinitrophenol. Under this method, a 1 liter water sample is extracted on a solid phase extraction cartridge containing 0.5 grams of a modified polystyrene divinyl benzene solid phase which is eluted with a small amount of methylene chloride. The resulting extract is then analyzed using a capillary column equipped with GC/MS.

• *Refinements from Previous Methods.* EPA Method 552 lists 2,4-dichlorophenol and 2,4,6-trichlorophenol as an analyte; however,

under the conditions specified, the analytes interfere with one another. Other methods evaluated required the use of techniques that are no longer used in modern laboratories such as large volume solvent extraction, acid, base/neutral fractionation, and were developed for packed column chromatography. In addition, no documentation of either aqueous or extract analyte stability was available.

In EPA Method 528, sample extractions are performed using solid phase extraction without fractionation, capillary column separation without the need to derivatize the analytes, and uses mass spectrometry to reduce false positives. Samples are biologically preserved through acidification and disinfectant residuals are reduced with sodium sulfite.

(iii) *Summary of EPA Method 526: Determination of Selected Semivolatile Organic Compounds in Drinking Water by Solid Phase Extraction and Capillary Column GC/MS.* Under this final regulation, EPA requires the use of EPA Method 526 to analyze for 1,2-diphenylhydrazine, diazinon, disulfoton, fonofos, prometon, nitrobenzene, and terbufos. Under this method, a 1 liter sample is extracted on a chemically bonded styrene divinyl benzene organic phase cartridge or disk. The cartridge or disk is eluted with small quantities of ethyl acetate followed by methylene chloride. The resulting extract is then analyzed on a capillary column equipped GC/MS.

• *Refinements from Previous Methods.* While several of the analytes included in EPA Method 526 are also listed as analytes in EPA Method 507, EPA Method 508, EPA Method 525.2 and other methods, accurate and precise measurement of these analytes in stored samples is not achieved, because of extremely rapid aqueous degradation of these analytes. Literature searches and data collected during methods development of EPA Method 526 demonstrated that many of these analytes are subject to both acid and base catalyzed hydrolysis and that this hydrolysis is also catalyzed by the presence of metals. These compounds are also subject to biological degradation in stored samples, and degradation by free chlorine. In EPA Method 526, reagents are added to all samples to stabilize the analytes. This includes a buffer to neutralize pH, EDTA to complex metals, a biocide to stabilize analytes against biological degradation, and a reagent to reduce disinfectant residuals. Using these reagents, analyte stability has been demonstrated. In addition, all of these reagents can be added to the sample bottles prior to their shipment to the sample collection site.

(iv) *Peer Review.* EPA conducted peer reviews of the analytical methods made final today. The peer reviews were conducted both within EPA and by personnel from Montgomery Watson Laboratories, Philadelphia Suburban Water Company, and the American Water Works Service Company. Summaries of these reviews and EPA responses to them are available at the Water Docket (MC 4101), U.S. EPA, 401 M Street, SW, Washington DC 20460, Docket number W–00–01.

(v) Laboratory Approval and Certification. Laboratories currently certified to conduct drinking water compliance monitoring using EPA Method 525.2 are automatically approved to conduct UCMR analysis using EPA Methods 526 and/or 528. Laboratories currently certified to conduct drinking water compliance monitoring using EPA Methods 549.1 or 549.2, are automatically approved to conduct UCMR analysis using EPA Method 532. As noted earlier, EPA Method 525.2 is a solid phase extraction GC/MS method as are both EPA Methods 526 and 528. EPA Methods 549.1 and 549.2 are solid phase extraction HPLC methods as is EPA Method 532. Using this system of laboratory approval for the UCMR ensures that the laboratories that perform these analysis are currently certified to perform compliance monitoring with methods that use the same technologies as those incorporated in the UCMR methods, while providing PWSs with the widest possible source of approved laboratories.

For small systems, EPA conducted a competitive solicitation to select laboratories to analyze for List 2 contaminants under contract to EPA. All small system shipping and analysis costs will be paid by EPA.

b. Monitoring Nitrobenzene at Low-Level in Screening Survey One

One comment was received on the proposed rule concerning the monitoring of nitrobenzene in both the Assessment and Screening phases of the UCMR. The commentor questioned EPA's retention of a much less sensitive analytical method to test for nitrobenzene under the initial Assessment Monitoring, when nitrobenzene will be measured by a method that is 100 times more sensitive during the Screening (List 2) Monitoring. The commentor added that restricting nitrobenzene to List 2 contaminant monitoring avoids a redundant and costly element in Assessment Monitoring, while providing a statistically significant estimation of occurrence that could, if warranted, trigger more comprehensive monitoring.

EPA believes that nitrobenzene can be reliably and accurately measured at concentrations above 10 μg/L using the purge and trap GC/MS methods approved for use in the Assessment Monitoring phase of the UCMR. Even though currently available preliminary health effects information suggests that nitrobenzene may be of concern at concentrations lower than can be reliably measured using purge and trap GC/MS methods, nitrobenzene was nonetheless included in the monitoring required under Assessment Monitoring since methods reliably measuring nitrobenzene at lower concentrations were not then available. In addition, since the same purge and trap GC/MS methods were being approved of the analyses of other compounds in the assessment phase of the UCMR monitoring, monitoring for nitrobenzene using these methods could be accomplished at very little additional cost to the regulated utilities, States, or EPA. Therefore, EPA felt it was prudent to require this monitoring to obtain valid national occurrence data for this compound.

Since health effects information under current review indicates that nitrobenzene may be of concern at concentrations lower than that measured under Assessment Monitoring, EPA also included nitrobenzene in the list of compounds for which additional methods development was required (List 2 compounds). The analytical method (EPA Method 526) developed for the analyses of diazinon, disulfoton, fonofos, 1,2-diphenylhydrazine, and prometon can also reliably measure nitrobenzene at considerably lower concentrations than can the purge and trap methods approved for the analyses of nitrobenzene under Assessment Monitoring. EPA Method 526 was not available at the time that methods were approved for the Assessment. Therefore, EPA is retaining the required monitoring for nitrobenzene in the Assessment Monitoring phase of the UCMR using the previously approved purge and trap GC/MS methods to collect national monitoring data, but it is also requiring monitoring for nitrobenzene in this Screening Survey phase of the UCMR using EPA Method 526. This will permit the Agency to obtain substantial amounts of occurrence data for nitrobenzene at concentrations above 10 ug/L through UCMR assessment monitoring and a statistically significant estimate of

nitrobenzene at much lower concentrations with the Screening Survey monitoring, and yet not impose additional substantial cost burdens on affected entities. Including nitrobenzene under both Assessment Monitoring and the Screening Survey may also eliminate the need for future UCMR monitoring of nitrobenzene.

c. Monitoring of *Aeromonas* in Screening Survey Two

Under today's action, EPA is approving the proposed monitoring plan for *Aeromonas* as part of Screening Survey Two, to be conducted by 180 small systems and 120 large systems beginning in 2003. Many of the options for monitoring Aeromonas were discussed in the proposed rule published on September 13, 2000 (65 FR 55362). As part of this final rule, EPA is reserving the method for *Aeromonas,* and expects to promulgate EPA Method 1605 in 2001 (briefly summarized below) for monitoring *Aeromonas* for Screening Survey Two.

Analytical Method. The proposed *Aeromonas* spp. method in the proposed rule for List 2 monitoring was EPA Method 1605, which is a membrane filter assay based on the ampicillin-dextrin agar (ADA) method of Havelaar *et al.* (1987), with two additional tests for confirmation: cytochrome oxidase and trehalose fermentation. Proposed EPA Method 1605, ''Determination of *Aeromonas* in Water'', is currently available on-line at *http://www.EPA.gov/nerlcwww/1605sp00.pdf* or by contacting the Safe Drinking Water Hotline at (800) 426–4791; however, the final approval of the method and minimum reporting level will be reserved until promulgated in a subsequent method update rule. This proposed method identifies *Aeromonas* to the genus level and detects *A. hydrophila* and a majority of the other aeromonad species. Laboratories wishing to analyze samples for *Aeromonas* for the UCMR must use the final approved EPA Method 1605 after it is promulgated. *Aeromonas* analyses must be performed by laboratories certified under § 141.28 for compliance analysis of coliform indicator bacteria using an EPA approved membrane filtration procedure. Because of differences between Method 1605 and existing membrane filtration methods, laboratories performing EPA Method 1605 must also participate in performance testing (PT) studies to be conducted by EPA. EPA received five comments regarding performance testing (PT) for *Aeromonas.* EPA has decided once the method is published as final, to require laboratories that analyze samples for *Aeromonas* to participate in a PT program. Laboratories wishing to participate in the *Aeromonas* PT program and be approved must submit a ''request to participate'' letter to EPA. EPA has established a tentative time of late 2001 and early 2002 by which to receive the ''request to participate'' letter, contingent on the publication of the final *Aeromonas* method. EPA will publish further information on the *Aeromonas* PT program for potential participants at the time it promulgates the final method. Any interested laboratory which does not apply for participation or fails to successfully pass the initial PT study but still wishes to support this monitoring, will need to submit a request letter at a later time that will be specified with the promulgation of the final method to be eligible for the second or third PT study. Upon completion of the *Aeromonas* PT Program, EPA will provide each successful laboratory with an approval letter identifying the laboratory by name and the approval date. This letter may then be presented to any Public Water System (PWS) as evidence of laboratory approval for *Aeromonas* analysis supporting the UCMR. Laboratory approval is contingent upon the laboratory maintaining certification to perform drinking water compliance monitoring using an approved coliform membrane filtration method.

EPA Method 1605 identifies *Aeromonas* to the genus level, but does not distinguish between pathogenic and nonpathogenic types. To obtain additional information on *Aeromonas* strains detected with Method 1605, isolates from the ADA plates will be tested for taxonomic characteristics that are associated with pathogenic clinical isolates in follow-up tests conducted by EPA or an EPA contractor. EPA will do these additional analyses for small and large systems that have confirmed positive colonies of *Aeromonas* (see proposed § 141.40(a)(3), Table 1, List 2, footnote j). Confirmed *Aeromonas* colonies must be archived by analytical laboratories performing Method 1605, and shipped to EPA. The Agency will arrange to have additional analyses done on isolates to determine the hybridization groups that are associated with pathogenic forms.

Analytical Method for Determining Hybridization Groups. The phenotypic method described by Abbott *et al.,* (1992) will be used to identify the hybridization group of each isolate. These investigators described a group of biochemical tests that were able to place 132 of 133 *Aeromonas* isolates in the correct hybridization group. The use of biochemical tests to determine hybridization groups of *Aeromonas* is well established (Borrell *et al.,* 1998, Altwegg *et al.,* 1990 and others). EPA may also use restriction fragment length polymorphism (RFLP) for hybridization group identification.

Sampling Times and Locations. As included in EPA's proposal at § 141.40(a)(5)(ii)(B), Table 3, Monitoring Frequency by Contaminant and Water Source Types, EPA is requiring, once the method is promulgated as final, that systems monitoring for *Aeromonas* under Screening Survey Two sample six times during the year, once per quarter during the cooler seasons and once per month during the warmest (vulnerable) quarter, unless the EPA or the State designates a different vulnerable period. This results in one of three sampling schemes: (1) January, April, July, August, September, and October, (2) February, May, July, August, September, and November, or (3) March, June, July, August, September, and December, unless the EPA or State designates a different vulnerable period. Public comments received asked for an option for greater flexibility in setting the sampling schedule for the warmest (vulnerable) month. These sampling times have been revised in response to comments received. At each sample time, three samples must be taken from the distribution system owned or controlled by the PWS selected to monitor. In response to public comments, consecutive systems are no longer included for this monitoring in the distribution system for *Aeromonas.* Sampling locations must include one midpoint in the distribution system where the disinfectant residual will be expected to be typical for the system (midpoint, or MD, as defined in the Rule), and two other points: One of maximum retention time and one where the disinfectant residual will have typically declined (point of maximum residence, or MR, and location of lowest disinfectant residual or LD, respectively, as defined in the Rule). Each sample analyzed for *Aeromonas* will be considered to be an individual data point and will not be averaged with values determined for other samples.

Sites selected for *Aeromonas* samples may utilize locations identified for certain other contaminants which may occur under similar conditions to those described for *Aeromonas.* Sampling for coliform indicator bacteria, which includes midpoint samples, is described in 40 CFR 141.21. Compliance monitoring samples for coliform bacteria are taken from a variety of locations through the distribution system. Some of these samples are from

locations where the disinfectant residual is representative of the distribution system and will not have significantly declined. Locations specified in the sample plan for coliform bacteria that meet this description may be used for the *Aeromonas* midpoint sample. Additionally, a sample must be taken from a location in the distribution system where the disinfectant residual is expected to be low, which is similar to total trihalomethane (TTHM) sample points. Sample locations for TTHMs are described in 63 FR 69468 (1998), the Disinfectants and Disinfection Byproducts Rule, and 40 CFR 141.30. These sample locations must be at distal parts of the distribution system (taking care to avoid disinfectant booster stations) or dead ends, or locations which had previously been determined to have the lowest disinfectant residual. Ground water systems that do not disinfect may utilize the same distal sample locations as those that disinfect. Additional information on *Aeromonas* occurrence in relation to retention time or disinfectant residual are given in Havelaar *et al.,* 1990, Burke *et al.,* 1984, Gavriel *et al.,* 1998, Holmes and Nicolls, 1995. These studies suggest that *Aeromonas* is more likely to occur where the disinfectant residual has declined to less than 0.3 mg/L or where the residence time in the distribution system is longest. Stelzer *et al.* (1992) found *Aeromonas* more commonly at distances greater than 10 km from the treatment plant. Holmes *et al.* (1996) reported after growth of *Aeromonas* in part of a distribution system where the retention time of treated water could exceed 72 hours.

Sample location descriptions for large distribution systems may not be applicable for small systems (or ground water systems that do not disinfect). In the event that the midpoint and distal or low disinfectant residual sample locations described for larger systems do not apply, small systems may use a coliform sample location, and two samples at the farthest point(s) from the source water intake.

Water Quality Parameters Required for Aeromonas Samples. The water quality parameters identified in § 141.40(a)(4)(i)(B), Table 2, Water Quality Parameters to be Monitored with UCMR Contaminants, must be analyzed and reported for the microbiological contaminant on List 2, *Aeromonas,* once its analytical method is final and ready for use. These parameters include water pH, turbidity, temperature, and free and total disinfectant residual.

d. Exclusion of RDX, and Alachlor ESA and Other Acetanilide Pesticide Degradation Products From Monitoring Under Screening Survey at This Time

Not all of the contaminants included in the UCMR (1999) List 2 in the final UCMR Rule (64 FR 50556) are activated for Screening Survey monitoring by this rule. In the proposal for this final rule, EPA identified many important issues, including the development of appropriate analytical methods, that must be resolved before monitoring can be conducted for RDX and Alachlor ESA. The public comments that were received supported the reserve status for these methods and contaminants at this time. The methods for these contaminants (as well as all the List 3 contaminants identified in the September 1999 Revisions to the UCMR) are currently under development and it is not certain when these methods will be completed. If these methods are still in development in December 2001, EPA will consider including these contaminants in the next five-year cycle of UCMR, rather than proposing their methods during this first five-year UCMR cycle.

e. Movement of Polonium-210 From UCMR (1999) List 2 to UCMR (1999) List 3

With today's action, EPA is removing the radionuclide polonium-210 from List 2 of the UCMR (1999) List and moving it to List 3. As discussed in the proposal, many issues still need to be addressed before monitoring is required for this contaminant. Public comments supported moving polonium-210 to List 3. In particular, additional development and validation work is needed before possible methods can be used for routine drinking water analysis. Furthermore, there are laboratory capacity and capability concerns, as an appropriate method for polonium-210 may be very time consuming and will likely require an experienced analyst. Unlike RDX and alachlor ESA, for which analytical methods are available but are being refined, the methods for polonium-210 are not yet at a sufficient point to be used for drinking water analyses, let alone be refined for routine application. Thus, for drinking water analyses, the methods still require development, peer review and EPA approval. As a result, polonium-210 is more appropriately placed on List 3. The movement of polonium-210 from List 2 to List 3 is reflected in § 141.40(a)(3), Table 1, List 3.

3. All List 2 Monitoring at Entry Points to the Distribution System

Today's action also modifies § 141.40(a)(7), which addresses monitoring for List 2 contaminants, to clarify that all List 2 monitoring for chemical contaminants in Screening Survey One must be done at entry points to the distribution system (EPTDS). Public comment supported this approach. The only exception to this requirement for EPTDS sampling is where the EPA or State determines that no treatment or processing is in place between the source water and the EPTDS that would affect measurement of the contaminants involved. Under Assessment Monitoring, systems that routinely sample at source (raw) water sampling points are allowed to sample List 1 contaminants at those points until an unregulated chemical contaminant is found. After such a detection, the system must generally initiate monitoring at the entry points to the distribution system for those contaminants detected. For monitoring for List 2 contaminants, however, EPA believes that allowing such flexibility in sampling locations would jeopardize the consistency of the data generated by the Screening Surveys. Specifically, the revisions to § 141.40(a)(7) specify that List 2 chemical contaminant monitoring must be at the entry point to the distribution system for all systems, to provide for consistent results nationally. In addition, EPA is specifying that List 2 monitoring must be conducted over 1 year (2001 for the first Screening Survey of small systems and 2002 for the first Screening Survey of large systems), rather than any 12 months over the 3-year period, as with List 1 Assessment Monitoring.

4. Implementation

a. Coordination of Assessment Monitoring and Screening Surveys

While EPA has not modified the regulation for coordination of Assessment Monitoring of List 1 and Screening Surveys for List 2, such coordination, to the extent possible, is an important aspect of the UCMR program. For small systems that are required to conduct both Assessment Monitoring and Screening Survey One for chemicals during 2001, the timing and location of sampling will be the same. The one exception will occur for systems that are collecting their Assessment Monitoring samples from source (raw) water sampling points. Sampling locations for Assessment Monitoring and Screening Survey One for chemicals will not coincide for these systems, because all Screening Survey

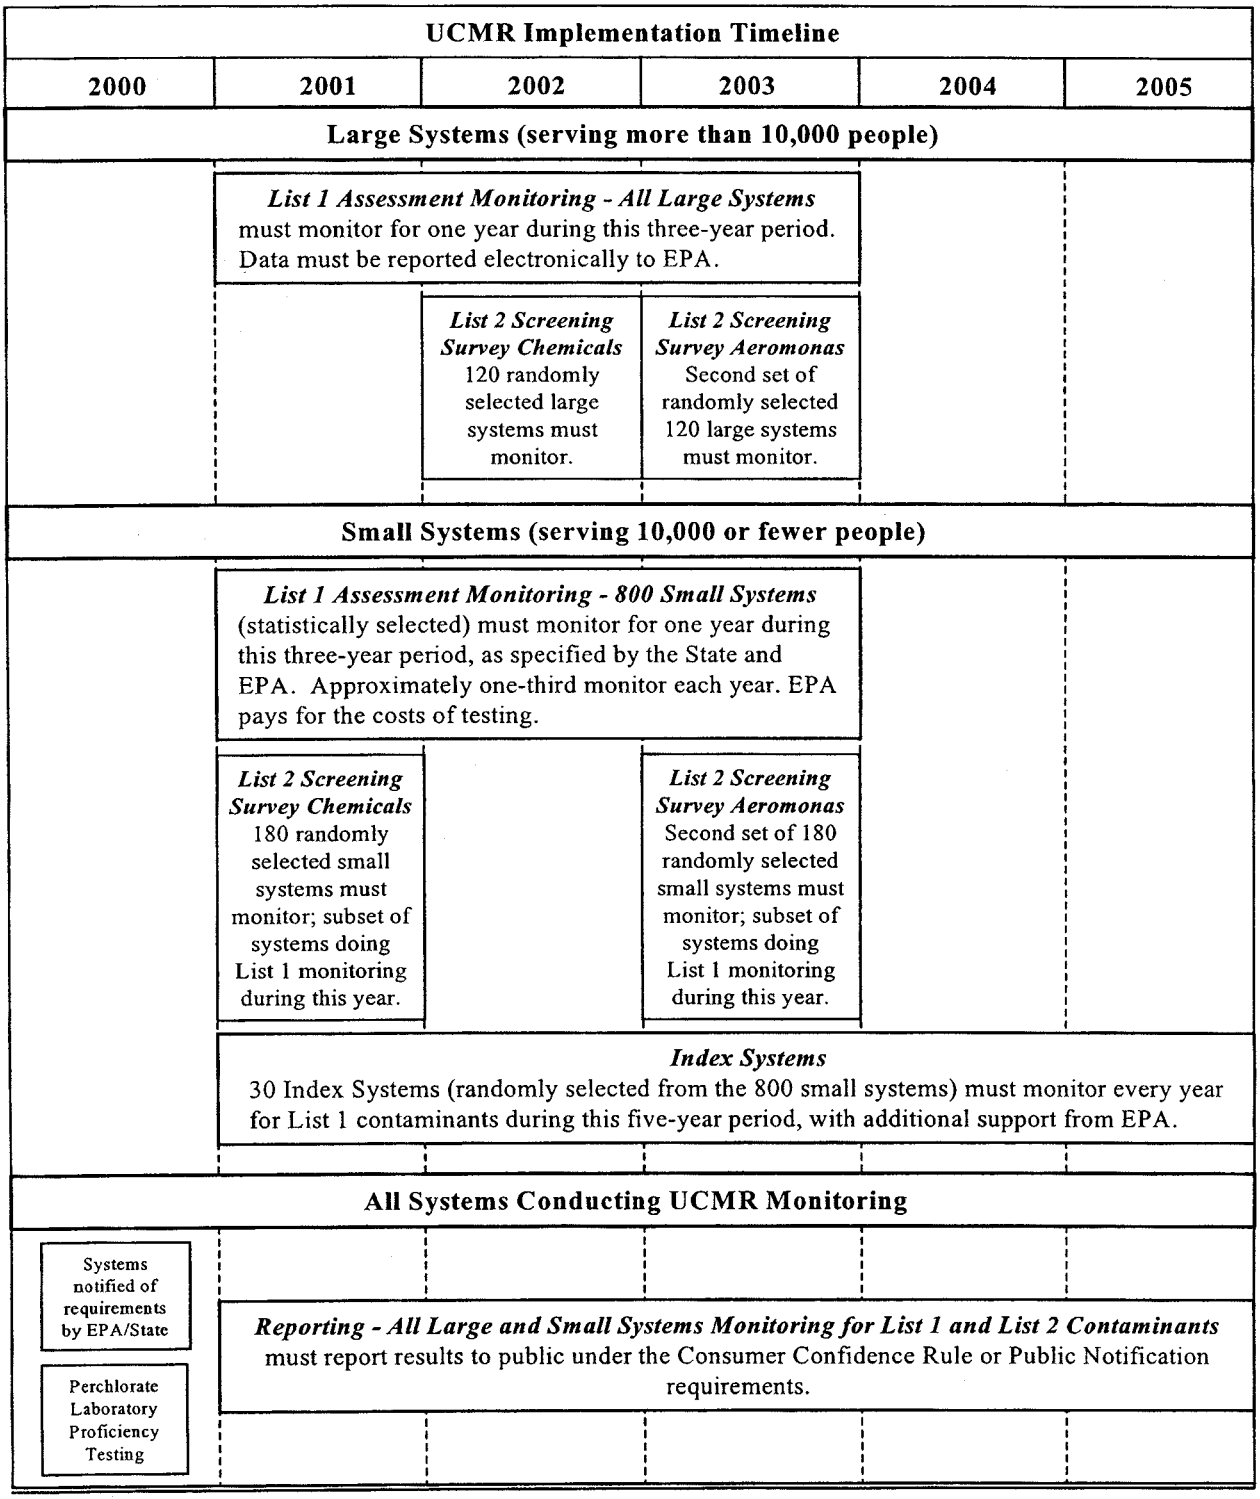
One samples must be collected from the entry points to the distribution system. Note that not all small systems conducting Assessment Monitoring in 2001 were selected for Screening Survey monitoring, but for those that are, this is clearly indicated in the UCMR State Monitoring Plans for small systems. For large systems serving more than 10,000 persons, the systems randomly selected for Screening Survey One must carry out the monitoring for that survey in 2002.

Assuming the method to analyze for *Aeromonas* is published as final, large and small systems selected for the Screening Survey Two for *Aeromonas* must monitor for that microorganism in 2003. This second Screening Survey does not coincide with Assessment Monitoring from the standpoint of sampling time and location. However, the monitoring for *Aeromonas* is only being conducted at 300 large and small systems in 2003, which has a limited effect on the systems overall. This is a one time, one-year survey, specific to *Aeromonas,* which is being conducted with the expectation that it will provide a nationally consistent result. Figure 1 provides a timeline for implementation of the UCMR, including the Screening Survey for List 2 contaminants.

BILLING CODE 6560–50–P

Figure 1

Implementation Timeline for UCMR (1999): Public Water Systems



BILLING CODE 6560–50–P

b. Selection of Systems by Water Source and Size

EPA selected the systems required to conduct List 2 monitoring from the approximately 2,800 large systems and 800 small systems previously identified by EPA for Assessment Monitoring. One hundred twenty (120) large systems and 180 small systems were randomly selected to monitor for each Screening Survey (i.e., both Screening Survey One for chemicals and Two for *Aeromonas*), approximately based on the following allocation:

System size (persons)	Water source	
	Ground water	Surface water
25–500	30	30
501–3,300	30	30
3,301–10,000	30	30
10,001–50,000	30	30
50,000 or more persons	30	30

This allocation was designed to ensure adequate coverage in both small and large system size and the source water categories. The final selection of Screening Survey systems may vary from this allocation, given the logistical adjustments that some States had to make to their State Monitoring Plans.

c. Sampling Period, Location and Frequency

For small systems serving 10,000 or fewer persons, monitoring for List 2 chemicals is to be conducted in 2001 (Screening Survey One for chemicals), which is also the first year of Assessment Monitoring. EPA will pay for sample shipping, testing, and reporting for small systems. EPA expects to evaluate both the occurrence and the analytical methods used for List 2 contaminants at this time. If adjustments to the methods need to be made before large systems are required to monitor in 2002, EPA has time to make these changes before large systems conduct Screening Survey One monitoring. Large systems serving more than 10,000 persons are required to conduct monitoring in 2002. Once the analytical method is promulgated, the monitoring for *Aeromonas* in Screening Survey Two is to be conducted by all selected small and large systems in 2003.

The sampling location for the chemical contaminants on List 2 is the entry point to the distribution system. For *Aeromonas*, the sampling locations are three places in the distribution system, which is owned or controlled by the selected PWS, representing: (1) A point (midpoint (MD) in the distribution system from § 141.35(d)(3), Table 1) where the disinfectant residual is representative of the distribution system. This sample location may be selected from sample locations which have been previously identified for samples to be analyzed for coliform indicator bacteria. Coliform sample locations are described in 40 CFR 141.21. This same approach must be used for the *Aeromonas* midpoint sample where the disinfectant residual would not have declined and would be typical for the distribution system; (2) The distal or dead-end location in the distribution system (point of maximum retention (MR) furthest from the entry point to the distribution system from § 141.35(d)(3), Table 1), avoiding disinfectant booster stations; and (3) A location where previous determinations have indicated the lowest disinfectant residual in the distribution system (point where the disinfectant residual is lowest (LD) from § 141.35(d)(3), Table 1). If these two locations of distal and low disinfectant residual sites coincide, then the second sample must be taken at a location between the MD and MR sites. Locations in the distribution system where the disinfectant residual is expected to be low are similar to TTHM sampling points. Sampling locations for TTHMs are described in 63 FR 69468.

The frequency of sampling for chemical contaminants on List 2 is the same as for List 1 Assessment Monitoring: four consecutive quarters for surface water systems and two times six months apart for ground water systems, with one of these sampling events (for both water source types) during the vulnerable time specified by EPA in the rule, or by the State in its State Monitoring Plan. For *Aeromonas*, sampling frequency is six times during the year 2003: during the same month (first, second or third month) selected by the system in each quarter, and each month during the warmest quarter (July, August and September, or other vulnerable (warm) period designated by EPA or the State). Additionally, a footnote was added to the year 2003 in column 6 (Table 1, List 2), ''Period During Which Monitoring to be Completed,'' indicating that the monitoring period is contingent on promulgation of the analytical method and minimum reporting level for *Aeromonas*.

d. Sample Analysis

Large systems will sample and send their samples to the EPA certified laboratory of their choice and report the results to EPA as specified in § 141.35. Large systems will pay for the cost of the shipping, testing, and reporting of the results. At small systems, unless the State has agreed to collect the samples for small systems, the owner or operator will collect the sample in EPA-provided equipment. EPA will pay for the shipment, analysis of the samples, and reporting of test results for small systems.

Large systems selected for the Screening Survey will be notified by the State or EPA at least 90 days before the dates established for collecting and submitting samples to determine the presence of contaminants on List 2. One commentor expressed concern over the timing of this notification, noting that systems need adequate time to properly coordinate with contract laboratories. EPA notes that it intends (with assistance from partner States) to provide notification more than 120 days in advance and that 90 days would be the minimum.

e. Reporting

Systems are responsible for reporting the results of UCMR monitoring to EPA, with a copy to the State in a format specified by EPA, through their analytical agent or laboratory, within 30 days following the month in which the results are received from the laboratory. EPA will allow an additional 60 days for system, State, and EPA quality control review before posting the results to the National Drinking Water Contaminant Occurrence Database (NCOD) portion of the Safe Drinking Water Information System. Additionally, EPA has modified the regulation in response to comments about the readiness of the electronic reporting system. Systems will not be required to submit data until September 30, 2001 for the first two quarters of calendar year 2001, but may begin reporting as early as July 1, 2001. EPA has modified § 141.35(c) to reflect this change and provide sufficient time for the reporting system to be ready to accept results.

EPA contract laboratories will generate small system results and will report the data directly into the EPA system. EPA will provide small systems the opportunity to conduct a 30-day quality control review of their results before EPA reports them to the NCOD and before the 60-day quality control review by systems and States. During this 60-day period, EPA will also conduct its own quality control review.

Figures 2 and 3, below, illustrate the UCMR monitoring approach, as well as the timeline for implementation of the first cycle of UCMR monitoring.

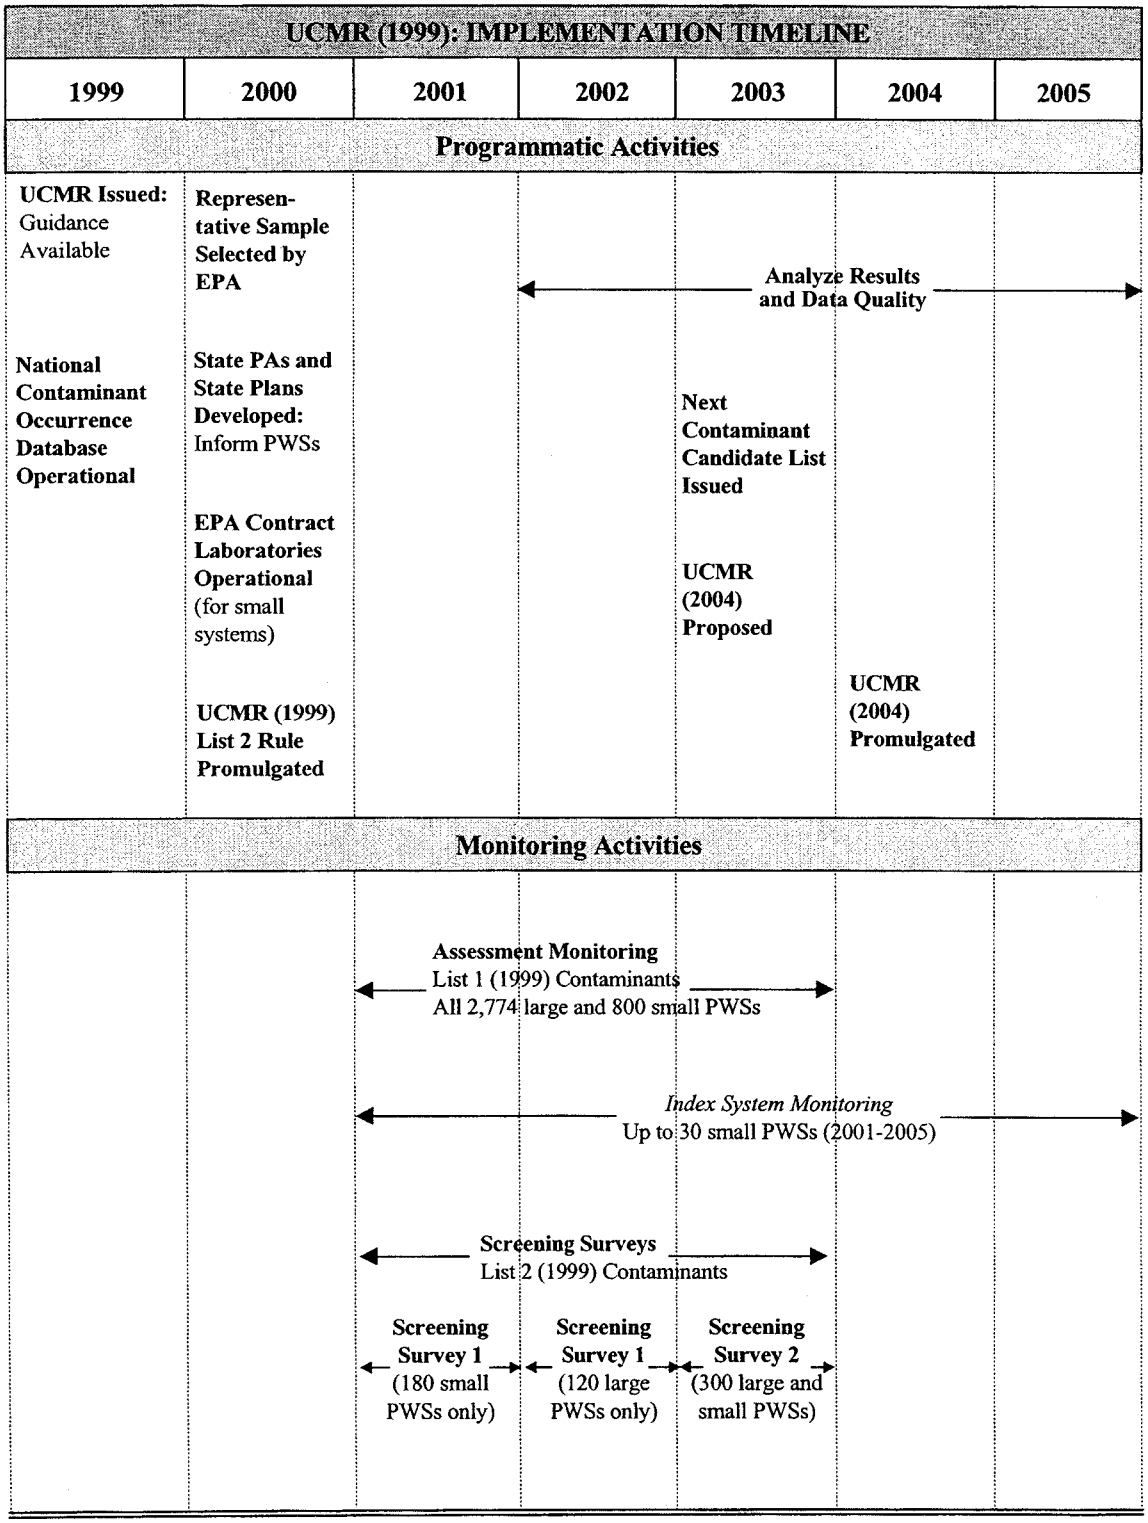
Unregulated Contaminant Monitoring Approach

Figure 3
Implementation Timeline of UCMR (1999) and Related Activities



BILLING CODE 6560–50–C

D. Other Technical Changes and Clarifications to the UCMR (40 CFR 141.40)

Changes described in this section will affect monitoring and reporting for both List 1 and List 2 contaminants beginning in 2001.

1. Updating the National Drinking Water Contaminant Occurrence Database

EPA modified § 141.35(c) to recognize the updating cycle of the National Drinking Water Contaminant Occurrence Database (NCOD). The existing rule provides for placing the data reported to EPA by systems in the NCOD after a 60-day quality control review period. Today's final rule will continue to provide for the 60-day quality control review by systems, States and the Agency. However, today's rule requires that EPA place the available unregulated contaminant occurrence data resulting from UCMR monitoring in the NCOD at the time of each update of the database, which currently is on the same quarterly update cycle as the Safe Drinking Water Information System. Since updating the databases incurs costs, being able to coordinate this update with an existing update process provides a lower level of expenditure for database maintenance. The NCOD will be updated four times per year, rather than six times. Public comments supported this reporting process. Because these data are for long-term analytical purposes, this change should not inhibit their principal use for regulatory determination and development. The data will still be regularly available to the public through the NCOD. The results of detections of unregulated contaminants is also required to be reported by PWS to consumers through consumer confidence reports.

2. Reporting System and Laboratory Contacts

Section 141.35(d) identifies the data elements to be reported with UCMR contaminant monitoring results. In the process of initiating implementation of the UCMR, including discussions with stakeholders, EPA realized that to facilitate communication in a rule for which EPA had direct implementation responsibility, the agency needed points of contact with public water systems and their analytical agents or organizations (laboratories). In today's final rule, EPA is amending § 141.35(d) to clarify that systems must provide ''point-of-contact'' information. Today's action amends the UCMR to require systems and laboratories to provide the following information: name, mailing address, phone number, and email address for: (1) PWS technical person (i.e., the person at the PWS who is responsible for the technical aspects of UCMR activities, such as details concerning sampling and reporting); (2) PWS official UCMR spokesperson (i.e., the person at the PWS who is able to function as the official spokesperson for the PWS); and (3) laboratory contact person (i.e., the person at the laboratory who is able to address questions concerning the analyses performed). Systems are asked to update this information if it changes during the course of UCMR implementation. The information will be used to facilitate: communication with PWSs and labs regarding any reporting system problems/modifications; resolution of specific data questions; and periodic distribution of any related materials. Public comments supported this technical change.

3. Modification of Data Element Definitions

With today's rule, EPA made minor changes in nine data element definitions, in response to comments received on the final UCMR during implementation workshops and to clarify what is to be reported. These data elements are: PWS facility identification number, sample identification number, sample analysis type, sample batch identification number, analytical precision, analytical accuracy, detection level, detection level unit of measure, and presence/absence. The changes appear in § 141.35, Table 1. The clarifications are as follows:

(a) PWS facility identification sampling point number is now to be a two-part number, made up of the PWS facility identification number and a unique sampling point number within the PWS and assigned by the State, as well as the sampling point type, to allow for relationships between sampling points and other facilities to be reported and maintained, and for appropriate analyses to be made.

(b) Sample identification number has been changed to specify a sample or group of samples that are collected at the same time and place.

(c) Sample analysis type has been modified to address raw and treated field and duplicate samples to ensure that the full range of sample types can be reported.

(d) Sample batch identification number has been changed to clarify that an extraction or an analysis batch number are to be reported along with the laboratory identification number and analysis date.

(e) Analytical accuracy and analytical precision have both been modified to clarify the meaning of each variable identified in the current equations.

(f) EPA modified and eliminated reporting of the detection level and detection level unit of measure to provide additional reporting flexibility. EPA is requiring the reporting of ''minimum reporting level'' and ''minimum reporting level unit of measure,'' in the data elements. PWSs are required to report all detections occurring at or above the minimum reporting level (MRL). Several commentors were concerned about allowing laboratories to establish their own minimum reporting levels (MRL) as long as they are lower than the UCMR MRL for that analyte. Five comments were received questioning the usefulness of data reported below the UCMR MRL and wondered if it would defeat the purpose of setting standardized MRLs. EPA agrees with the commentors and has changed the final regulation to remove the option for reporting of data below the UCMR MRL.

(g) The presence/absence data element is being reserved for potential future use. All of the contaminants currently being monitored can be accurately and precisely quantified. Therefore, their presence or absence does not need to be reported; however, the data element is not deleted. This data element is being reserved for future contaminants to permit the use of presence/absence measured if warranted in future regulations.

Special Note on PWS Facility Identification Number. Table 1 of Section 141.35 previously required that the same PWS Facility Identification Number be used consistently throughout the history of unregulated contaminant monitoring to facilitate analysis of the data. States are already required to number and report to EPA water source intakes and treatment plants, but there is no requirement to hold those numbers static, or even to store them in the State's database. EPA is aware that States converting to the State version of the Safe Drinking Water Information System (SDWIS/STATE) will have new numbers assigned to PWS facilities within that State. Other States converting to other databases during the next several years may face a similar problem. It may be less burdensome on the State to be able to change the number, but the State must report what number the new number is replacing so that SDWIS/FED can link the two for historical tracking. As a result, EPA is including additional flexibility in this definition to allow tracing of historical to current facility identification numbers.

4. Clarification of Data Reporting Procedures

EPA also modified § 141.35 to improve the electronic process that EPA intends to implement for the large amount of data that is expected to be

reported under the UCMR. As EPA evolves its electronic reporting approach Agency-wide, EPA is trying to learn from lessons of such streamlining in the past. Specifically, the electronic reporting that occurred under the Information Collection Rule resulted in a process whereby laboratories entered data electronically using their own formats, provided a hard copy of the report to the public water system, and then the system reentered the data to an electronic disc which was sent to EPA. This resulted in rekeying (data entry) errors and transmission errors, including loss of discs (through mail or damage). EPA is moving toward a ''one-entry'' approach for data reporting. This will improve reporting quality and reduce reporting errors and reduce the time involved in investigating, checking and correcting errors at all levels (laboratory, system, State and EPA). This one-entry approach will make the data more useful and available earlier.

In light of these electronic reporting developments and experiences, EPA modified § 141.35(e) and (f) to clarify its format for reporting and to indicate that a system must instruct the agent or organization that conducts the testing and laboratory analysis for the unregulated contaminants (herein after referred to as ''the laboratory'') to enter the data into the UCMR electronic reporting system. EPA is developing a template for electronically reporting UCMR results to the Agency. The template will allow a PWS regulated by the UCMR to review and approve submission of the results to EPA. The template is being developed in both direct ''batch'' electronic data transfer and web-based ''manual'' entry formats. If the laboratory cannot enter the monitoring results using EPA's direct or manual electronic reporting system, then the PWS must explain to EPA in writing the reasons why alternate reporting is necessary and must receive EPA's approval to use an alternate reporting procedure. To ensure security, laboratories and public water systems will need to register to have access to the UCMR database. Registration will begin after January 16, 2001. EPA will provide systems with information on the registration process. During the PWS registration process, the PWSs will have the opportunity to review and correct relevant PWS inventory information. (Questions may be directed to the Safe Drinking Water Hotline, 1–800–426–4791.)

In addition to reporting analytical results, such data entry also includes the sample collection and PWS information specified in Table 1 of § 141.35.

A public water system has choices for reporting the data to EPA:

(a) The public water system can instruct its analytical agent (laboratory) to electronically report its UCMR results to EPA on the system's behalf. The lab can use either the batch transfer protocol or the web-interface data entry template that EPA will make available over the internet. After the data are submitted by the lab, the PWS can review the results on-line and electronically indicate its approval. Only after the system has submitted the approved data to EPA, and final quality reviews are completed, will the results be available for Agency decision-making or public review.

(b) Systems may require their laboratories to receive their approval before the laboratories report the UCMR results to EPA. In this case, the PWS can review the results prior to the laboratory reporting the data to EPA's electronic reporting system through its own arrangements for receiving data from the laboratory. Typically, the laboratory has already entered the data into its electronic laboratory information management system (LIMS). Once the laboratory receives approval to submit the data from the PWS, it could electronically send the data in batch form from its LIMS to EPA's electronic reporting system.

(c) A system may determine that its laboratory does not have the capability to report electronically (even through entering the data on the web-based screen format) or does not have the capability to provide data to the system prior to submitting it to EPA without rekeying. In this case, the system may submit a request to EPA to use an alternate reporting format.

Under any circumstances, the results must be submitted to EPA within 30 days following the month the PWS receives the results. EPA received comments expressing concern with the reporting deadline relative to the first UCMR sampling in 2001. Commentors were concerned that the new electronic reporting system would not be ready in time for reporting the data that are collected in the first months of 2001, and/or that problems with the initial use of the system would delay reporting. To address the concerns raised by the commentors, EPA has put extra resources toward having the reporting system ready for late January 2001. EPA has also revised the rule to require initial reporting of UCMR data to be done between July 1 and September 30, 2000.

For small water systems, EPA will enter and report the results directly to its electronic reporting system through its contract laboratories. Since the samples, once sent to EPA by the small system, are in EPA's charge, EPA potentially may be required to make the data available to the public if requested prior to the system's review. Again, however, EPA will consider the small system data preliminary and unreliable until the data have undergone quality control review by the system and EPA, and will so inform the public if the Agency is required to release the data before it is reviewed.

This final rule further clarifies that if a PWS chooses to report multiple results for a particular contaminant for the same sampling point and same monitoring event (*i.e.,* date) via the UCMR electronic reporting system, the highest reported value will be used as the official result.

While § 141.35 (b) specifies that the PWS ''must report the results of unregulated contaminant monitoring to EPA *and provide a copy to the State* * * *'', note that States will have electronic access to the monitoring results for State review concurrent with the PWS reporting those results to EPA. Therefore, States may decide to forego the requirement for an independent copy and are free to do so. PWSs should also be aware that some States may have additional requirements (*i.e.,* beyond those specified in this rule), such as immediate reporting of monitoring results which suggest an imminent threat to public health. States are asked to address any additional reporting requirements (or waiver of requirements) when they notify PWSs of their UCMR responsibilities. In the absence of any State direction on this matter, PWSs are expected to provide States with a copy of monitoring results concurrent with reporting those results to EPA via the electronic reporting system.

Additionally, for small systems in States requiring immediate reporting by PWSs of contaminants found in those systems, EPA will report these results to the system and the State promptly after EPA receives the results from its laboratory. In these States, systems still have the responsibility to report the results to the State, regardless of EPA's arrangements to make the data available to the State. Such a State requirement for systems to immediately report any contaminants found is not a requirement on EPA and EPA bears no liability if such reporting is beyond a State's reporting date or if there are errors in the reporting of the information. An example in which reporting results may present a concern to a small system is when EPA sends a paper report to the PWS and the PWS

does not report to the State, and the Agency's electronic process does not recognize the State as a State requiring immediate reporting which precludes the State from obtaining the PWS data from the EPA information system within the time specified by State law.

5. Clarification of Systems Purchasing Water From Other Systems

In § 141.40(a)(1)(ii), the UCMR indicates that large public water systems not purchasing their water from another wholesale or retail public water system must monitor under the requirements outlined in the rule. However, at § 141.40(a)(1)(iii) and (v), it specifies monitoring requirements for large and small public water systems purchasing their water supply from a wholesale public water system only, with no mention of retail systems. Sections 141.40(a)(1)(iii) and (v) have been modified to address both wholesale and retail systems. This technical correction clarifies and provides consistency in regards to wholesale and retail systems in the rule. The original intent was to address purchase of water from another system in these cases, whether or not it was a wholesale or retail system. Additionally, for small systems purchasing their entire water supply, today's rule changes the wording ''wholesale'' to ''another'' public water system to clarify that the selected small system may have to monitor, in particular in the distribution system, regardless of the type of system from which it purchases water. EPA had also proposed to require monitoring for *Aeromonas* in selected consecutive systems. However, stakeholder comments pointed out various problems with conducting such monitoring for Screening Surveys and EPA has modified the final rule to eliminate these systems from monitoring. Only the systems statistically selected and notified must conduct the Screening Survey monitoring for *Aeromonas,* as discussed elsewhere in this Rule.

6. Clarification of Source (Raw) Water Monitoring Alternative

In § 141.40(a)(5)(ii)(C), the UCMR allows systems in States requiring source (raw) water monitoring for compliance monitoring to conduct UCMR monitoring in the source water for List 1 contaminants. However, once one or more contaminants on the UCMR list are found, the monitoring must also be done at the entry points to the distribution system. This final rule establishes that should a system in a State requiring source (raw) water monitoring find a contaminant in the source water, the system must initiate monitoring at the entry point to the distribution system only for the contaminant(s) found, unless it desires to sample and test for all contaminants analyzed by that same method, or for all the contaminants, at its option. EPA has also clarified the rule to specify that the monitoring, once initiated at the entry point to the distribution system, must be conducted for the next 12 month period (four times for surface water systems and two times five to seven months apart for ground water systems), even if the monitoring extends past the end of 2003. This requirement to move the monitoring activity was necessary to allow EPA to assemble a nationally consistent data set for UCMR contaminants.

While this was the original intent, the September 1999 final rule was not clear on this matter. In response to comments, the rule also clarifies (see § 141.40(a)(5)(ii)(C)), however, that EPA or the State may determine that sampling at the entry point to the distribution system is unnecessary because no treatment was instituted between the source water sampling point and the distribution system that would affect measurement of the contaminants involved. Further, if a system would like to guard against the possibility of extending the sampling period then it can take all UCMR samples at the EPTDS. These samples would be separate from compliance monitoring samples for regulated contaminants taken at the source water.

7. Clarification of Treatment Plant Latitude/Longitude Options

At § 141.40(b)(1)(ix), the existing rule states that, if a State enters into a Memorandum of Agreement with EPA to implement the UCMR, the State must report the latitude and longitude of its systems' treatment plants when the systems report the first Assessment Monitoring results for List 1 contaminants. The agency wants to clarify that this requirement under the UCMR is in addition to a preexisting requirement to report by January 1, 2000, either the latitude and longitude or the street address of each treatment plant location. The preexisting reporting requirement is based on 40 CFR 142.15(b)(1) (which requires States to submit inventory information concerning their public water systems, according to a format and schedule prescribed by EPA; the requirement for reporting latitude/longitude information for treatment plants was transmitted to States by memorandum of July 10, 1998, from Robert J. Blanco, Director, Implementation and Assistance Division, OGWDW, as ''Revised Inventory Reporting Requirements for the Safe Drinking Water Information System,'' June 1998, EPA 816–R–98–007, with a reporting date of January 1, 2000) and the EPA Locational Data Policy (published as Information Resources Management Policy Manual 2600, Chapter 13, April 8, 1991). The EPA Locational Data Policy specifies the content of latitude and longitude data that are to be reported by facilities and other entities. The final rule establishes that the State may use the latitude and longitude of closely adjacent facilities at or near the same site, when the facilities are associated with the treatment plant(s). Specifically, the State may use the latitude and longitude of the intake or wellhead/field if the treatment plant is on the same site, or the latitude and longitude of the entry point to the distribution system if it is on the same site as the treatment plant. Other facilities located closely adjacent to the treatment plant and part of the PWS for which it has a latitude and longitude may also be used. As a guide, ''closely adjacent'' should be taken to mean approximately ¼ mile or 400 meters away from the treatment plant or a reasonable location determined by the State. This approach provides the State with the flexibility to use closely associated measurements without having to return to take field measurements. It also provides EPA with the information to be used in health risk assessment relating to the location of contaminants to populations potentially affected. This report of latitude and longitude will be a one-time reporting, unless the information needs to be updated.

8. Addition of Consensus Method for Testing

The 1999 UCMR required systems to arrange for testing of the listed contaminants by a laboratory certified for compliance analysis using specified EPA analytical methods. Since the September 17, 1999, publication of the UCMR, EPA has approved a consensus organization method for compliance monitoring that is also approved for UCMR analysis. Therefore, EPA revised § 141.40(a)(5)(ii)(G), ''Testing'', to allow laboratories certified to perform compliance monitoring using any approved consensus methods that are also approved for UCMR monitoring to be automatically approved to perform UCMR monitoring using that method. The same holds true for any aproved EPA method.

9. Approval of EPA Method 502.2 and Standard Methods 6200C for the Analysis of MTBE

With today's action, in response to comments from stakeholders, EPA is approving the use of EPA Method 502.2 and Standard Methods 6200C for analyses of MTBE, included on List 1 for Assessment Monitoring. Those methods are an addition to those previously identified in § 141.40(a)(3), Table 1, for analysis of MTBE. For systems that want to report MTBE data collected prior to 2001 to meet the UCMR regulatory requirements, they will need to use the UCMR (1999) data elements, as revised by this rule, to meet the reporting requirements of the UCMR. Otherwise, the data will not meet EPA's minimum reporting requirements for UCMR data and will limit the use of the data in subsequent regulatory analyses. This final rule also modifies § 141.40(a)(3), Table 1, List 1, footnote ''n,'' that sample preservation techniques and holding times specified in EPA Method 524.2 must be used by laboratories using either EPA Method 502.2 or Standard Methods 6200C, as the sampling and holding time requirements of Standard Methods 6010B are not adequate for the purposes of the UCMR.

10. Approval of EPA Methods 515.3 and 515.4 for the Analysis of DCPA Mono-acid Degradate and DCPA Di-acid Degradate

In today's final rule, and in response to comments, EPA modified § 141.40(a)(3), Table 1, List 1, to add EPA Methods 515.3 and 515.4 for analysis of DCPA acid metabolites. Adding these methods will provide systems and their laboratories more flexibility in analyzing these UCMR contaminants and managing costs. These methods are an addition to those previously identified in § 141.40(a)(3), Table 1, for analysis of DCPA mono and di-acid degradates. In this rule, EPA also modified § 141.40(a)(3), Table 1, List 1, footnote ''j,'' to permit the use of EPA Method 515.3 for the analysis of DCPA mono-acid and di-acid degradates in the UCMR with the following conditions:

1. When monitoring is conducted using EPA Method 515.3, only the results for DCPA mono-acid and di-acid degradates which are less than the UCMR MRL for these analytes may be reported.

2. If DCPA mono-acid or di-acid degradates are observed at greater than or equal to the UCMR MRL using EPA Method 515.3, then either a duplicate sample must be analyzed within the method specified sample holding time, or a replacement sample, collected within the same month as the original sample, must be analyzed using one of the other methods approved for UCMR analysis of DCPA mono-acid and di-acid degradates. The PWS will then only report the result of subsequent analysis.

EPA also recently developed a revised version of EPA Method 515.3 titled EPA Method 515.4, which includes a wash step following hydrolysis that will remove the parent compound, DCPA. In this rule, EPA is approving the use of EPA Method 515.4 for UCMR monitoring of DCPA mono-acid and di-acid degradates. As this method includes a wash step to remove the parent compound, the use of EPA Method 515.4 is not subject to the conditions described above. EPA may also propose the approval of Method 515.4 for compliance monitoring in a future regulation. Until that time, EPA Method 515.4 is not approved for drinking water compliance monitoring. EPA Method 515.4, ''Determination of Chlorinated Acids in Drinking Water by Liquid-Liquid Extraction, Derivatization and Gas Chromatography with Electron Capture Detection,'' April 2000; EPA #815/B–00/001, is available by requesting a copy from the EPA Safe Drinking Water Hotline within the United States at 800–426–4791 (Hours are Monday through Friday, excluding federal holidays, from 9:00 a.m. to 5:30 p.m. Eastern Time). Alternatively, the method can be assessed and downloaded directly on-line at www.epa.gov/safewater/methods/sourcalt.html.

11. Use of pH as a Water Quality Parameter

Today's final rule also clarifies that pH need not be reported as a water quality parameter for *chemical* contaminants. For the reasons explained in the proposal (65 FR 55362), EPA does not believe that analyzing the pH of finished drinking water will provide relevant data related to the occurrence of these particular UCMR chemical contaminants. Thus, EPA has eliminated pH as a water quality parameter for chemical contaminants. EPA still requires, however, that all the water quality parameters in § 141.40(a)(4)(i)(B), Table 2, Water Quality Parameters to be Monitored with UCMR Contaminants, be reported for microbiological contaminants. The only microbiological contaminant currently required to be monitored under the 1999 UCMR is *Aeromonas,* under Screening Survey Two, to be conducted in 2003, after promulgation of its method.

12. Detection Limit Reference

EPA had proposed to remove the reference to the 40 CFR part 136 appendix B definition of method detection limit (MDL) in the Appendix to § 141.40 and instead to reference the detection limit calculations listed in each method. EPA received three comments on this subject. These commentors support EPA's proposed approach for drinking water. These commentors stated that the requirement to fortify samples for detection limit determination at a level less than or equal to the minimum reporting level (MRL) is a logical simplification and results in significant savings for analytical laboratories on multi-element analyses. While all three of these commentors were strongly in support of the proposed change, two of them also stated that this proposed change should not apply to all programs. Specifically, these commentors stated that the 40 CFR part 136 appendix B concept should continue to be applied to wastewater. These two commentors further stated that the MRL concept used in the UCMR makes sense because there is no meaning attached to levels below the MRL and it is more appropriately based on data quality objectives (DQOs).

EPA agrees with the commentors that the use of the 40 CFR part 136 appendix B MDL concept is not required for purposes of this rule because EPA's goal is to collect analytical data at the MRL or above. The MRL represents a concentration that can be both quantitatively measured and may be of potential health concern. EPA also wishes to affirm the commentors' statements related to the continued application of the 40 CFR part 136 appendix B MDL concept to other programs.

With respect to today's action, EPA is implementing the proposed approach as described in appendix A to § 141.40, paragraph (2). In particular, the regulatory provision in today's final rule requires the calculation of a detection limit, consistent with the procedures described in each respective method for the analyte under consideration. However, the Agency wants to eliminate any potential confusion between this approach and the 40 CFR part 136 appendix B MDL methodology. The approach in today's rule includes other considerations not included in 40 CFR part 136 appendix B, such as requiring the detection limit to be determined over multiple days and not requiring the detection limit samples to be fortified near the calculated detection limit, that may result in a different calculated level

of detection for those analytes measured than would be obtained through use of the procedures described in 40 CFR part 136 appendix B. EPA has determined that the data gathering needs under the UCMR lend themselves to the use of quantitation based limits such as the MRL and less stringent requirements for determination of detection than the needs of other compliance monitoring programs with differing data quality objectives and programmatic requirements.

13. Detection Confirmation

With the addition of an HPLC method for the determination of linuron and diuron, and a proposed membrane filtration method for the analysis of *Aeromonas,* the previous UCMR requirement to confirm all detections by GC/MS can no longer apply to all analyses. Therefore, EPA has modified appendix to § 141.40 to clarify that all detections observed using a gas chromatographic analytical method are to be confirmed by GC/MS, however this confirmation requirement does not apply to analytes detected using a non-gas chromatographic method.

14. Method Defined Quality Control

EPA received questions from representatives of PWS and laboratories concerning the quality control requirements specified for UCMR analyses. EPA has clarified the quality control requirements contained in the appendix to § 141.40 to indicate that by specifying quality control elements specific to UCMR analyses, EPA did not intend to change the methods requirements concerning the analyses of Laboratory Fortified Blanks or Laboratory Performance checks.

15. Clarification of Resampling

EPA offers the following guidance on resampling in response to questions about the 1999 UCMR since its publication in September 1999. If laboratory or shipping problems cause the loss of a sample, then all efforts should be made to replace that sample at the earliest possible time (*i.e.,* resample). EPA's preference is that the sample be replaced within the same month it was originally sampled. If this is not possible, EPA's next preference is within the same quarter. In all but one case, the schedule for future samples should not change: for example, if a surface water PWS is on a sampling schedule of January, April, July, and October and an April sample is lost, it should be resampled as soon as possible (*i.e.,* in April or early May) and the next quarter's samples shall still be taken in July as previously scheduled. The only time this guideline should not be followed is when all the samples from the first sampling period are lost. In this case, the sampling frequency will be determined by when the first set of samples is collected, analyzed and reported: for example, if the plan was to take samples in January, April, July and October, but all the January samples were lost. In such an event, the PWS may decide to resample in February, and its new sampling schedule would become February, May, August and November.

16. Identification of Laboratories Approved for UCMR Monitoring

EPA has received questions from State and PWS representatives regarding the availability of a comprehensive list of laboratories approved to conduct the analysis which support UCMR monitoring. Approval to conduct analysis for the other UCMR contaminants on List 1, Assessment Monitoring and List 2, Screening Survey (chemical monitoring only) relies on existing State or primacy agency laboratory certification for compliance monitoring. For the List 1, Assessment Monitoring contaminants, the existing certifications for methods used in compliance monitoring are directly applicable. For example, a laboratory that has State certification to conduct compliance monitoring in drinking water using EPA Method 525.2 is automatically approved to use that method for UCMR monitoring of any parameter which has EPA Method 525.2 as the UCMR approved method. For the List 2, Screening Survey One for chemical contaminants, the compliance methods and certifications are not directly applicable because none of the approved UCMR List 2 methods are currently used for compliance monitoring. However, the List 2 methods for chemicals are similar (both mechanistically and in terms of the determinative step) to other compliance monitoring methods and consequently, State or primacy agency certification in a specified similar analytical procedure will serve as an approval to conduct these List 2 chemical analyses, as specified in today's rule at § 141.40(a)(5)(ii)(G), ''Testing.'' Following the example cited above, and applying it to the List 2 chemical monitoring, a laboratory with certification to conduct compliance monitoring using EPA Method 525.2 is automatically approved to use EPA Method 526 and 528 to support monitoring for those respective List 2, Screening Survey chemical contaminants. EPA Method 532 is the third approved method for the List 2 chemical contaminants and for this method approval is contingent upon State or primacy agency certification in EPA Method 549.1 or EPA Method 549.2.

For both perchlorate and *Aeromonas* (once EPA promulgates a final analytical method), a laboratory must pass a performance test in addition to using its certification for related methods for approval to analyze and report results for public water systems under the revised UCMR. This is addressed in the rule in § 141.40(a)(5)(G).

EPA does not have a comprehensive or accurate list of laboratories which are currently certified at the State level for drinking water compliance monitoring. Most States have primacy over drinking water compliance issues in their respective State, and laboratory certification is a key component of their State program. If a PWS is attempting to locate a certified laboratory for any of these UCMR analysis, they should first check with the certified laboratory which normally conducts their compliance monitoring. If their regular compliance laboratory does not have the capability or the proper certifications, they should contact their State drinking water administrator to assist in locating an alternate State certified laboratory. Since UCMR monitoring is a direct implementation rule, the PWS could choose a laboratory which has the proper certification for the UCMR approved methods in any other State (several, but not all, of the UCMR perchlorate approved laboratories would qualify). However, if the PWS wishes their UCMR laboratory to provide concurrent compliance monitoring data (*i.e.* Phase II/V) with these UCMR analysis, that alternate laboratory will need to have certification in their respective State.

Currently, the only list of approved laboratories, which has been published by EPA, is specific to the List 1, Assessment Monitoring of perchlorate using EPA Method 314.0 (available at: www.epa.gov/safewater/standard/ucmr/aprvlabs.html). This perchlorate approval is contingent on these labs maintaining their State or primacy agency certification for an inorganic parameter using an approved ion chromatographic compliance monitoring method, and is only granted after these labs have passed the EPA perchlorate PT program.

VI. Additional Issues From Public Comment and EPA Response

Several issues were raised during the public comment processes. EPA received a total of 15 public comments within the specified public comment

period. Other major issues that were addressed that have not been discussed are summarized below.

A. Reporting Data on Other Contaminants

EPA will be paying for the analysis of samples for small systems. The analytical methods used for the List 1 and 2 contaminants will routinely determine the presence of other contaminants for which testing is not required to be done and reported. The contaminants that are not required to be reported but are identified in the analysis of samples from small systems will become research data for EPA and may provide the basis of future Contaminant Candidate Lists. Commentors generally supported collecting such data from small systems (where EPA is conducting the analytical work) but differed on how best to store data in the EPA database. EPA will place these data in the NCOD since they would be considered reliable results for unregulated contaminants under the SDWA and, therefore, must be placed in the NCOD under SDWA Section 1445(g). EPA plans to clearly label these data to indicate that monitoring for these contaminants is not required under this regulation and that reporting under the CCR is not required. Also, because large systems are not included, these data are not completely representative and EPA will not use the data to make a determination to regulate, without supplemental information.

B. More Complete Specification of Contaminants for Unregulated Contaminant Monitoring in the Future

The current approach of listing specific contaminants for monitoring under the UCMR program does not address the complete effect of the individual contaminant on the environment and in drinking water. For example, a pesticide may have several degradates. Unregulated contaminant monitoring only for the parent pesticide may entirely miss potentially harmful degradates and by products. For example, the European Union treats several categories of contaminants as groups for the specification of monitoring requirements, such as ''pesticides and degradates.'' (European Union, 1997). Public comments were mixed on the issue of how to group unregulated contaminants to more completely assess the occurrence of such contaminants in source water and drinking water. The current CCL includes contaminants that are parent compounds, degradates and groups of degradates. EPA will consider the comments received in developing any future proposals for the UCMR. This is a complex topic and further expert and stakeholder discussions may be warranted.

C. Synchronization of UCMR and CCL in the Future

The current schedules for the development of the CCL and UCMR are February 1998 and August 1999, respectively, and then every five years after each of those dates. This scheduling means that the UCMR responds to the contaminant list of the CCL, rather than allowing the UCMR to anticipate contaminants for which the CCL deliberations could evaluate and decide whether or not to regulate. Given the current characteristics of the UCMR program and CCL process, EPA requested public comment on whether the UCMR monitoring list revisions could be promulgated at the same time as the publication of the revised CCL, indicating which contaminants would be on the Lists 1, 2 or 3 about 1½ years earlier than under the current process.

The comments provided a wide range of opinions reflecting the complexity of the issue. While commentors supported some synchronization, they also expressed reservations, noting that the CCL needed to come first to establish the candidate list and priorities. There is no decision on this process and EPA will continue to consider the comments.

VII. Guidance Manuals

EPA will provide guidance manuals to further explain the quality control measures that laboratories are required to perform for List 2 (appendix A to 40 CFR 141.40), as well as all unregulated contaminant monitoring. For small systems that are part of the national representative sample, the sampling guidance, ''Unregulated Contaminant Monitoring Regulation Guidance for Operators of Public Water Systems Serving 10,000 or Fewer Persons'' (EPA 815–R–00–018, December 2000), is available. The ''Unregulated Contaminant Monitoring Regulation Analytical Methods and Quality Control Manual'' (EPA 815–R–99–003, March 2000) and its ''Supplement A to the Unregulated Contaminant Monitoring Regulation Analytical Methods and Quality Control Manual'' (EPA 815–R–00–002, March 2000) are available. These documents are available through the EPA Safe Drinking Water Hotline at 800–426–4791, or through EPA's Office of Ground Water and Drinking Water Homepage at *http://www.epa.gov/safewater.*

VIII. Costs and Benefits of the Rule

A. Program Cost Estimates

Today's amendment to the UCMR (64 FR 50556) adds methods for monitoring the UCMR (1999) List 2 contaminants. The average annual cost for Screening Survey One over the period 2001–2005 is $428,720: EPA, $127,650; States, $0; small systems $120; and large systems, $300,950. The first set of List 2 contaminants may be collected at the same time as the Assessment Monitoring component of the UCMR program. As described elsewhere in this Preamble, the first Screening Survey will be conducted over a 2-year period from 2001 to 2002. One hundred eighty small systems randomly selected from the first 267 small systems monitoring in 2001, and 120 large systems randomly selected from the 2,774 large PWSs will monitor in 2002.

Of the 16 List 2 contaminants, today's rule establishes the analytical methods for 13 chemical contaminants, which will be monitored under Screening Survey One. Today's rule also sets the schedule for the monitoring of *Aeromonas,* which will be monitored under Screening Survey Two once its analytical method is promulgated. Since the method for *Aeromonas* is not being established under today's rule, the estimated costs associated with *Aeromonas* monitoring are not included here, but will be addressed with the promulgation of the final method for *Aeromonas.* Estimated system and EPA costs are based on the analytical costs for these methods. EPA recognizes that these Screening Survey methods are new and will not coincide with other compliance monitoring. However, since the 13 List 2 chemical contaminants for the first Screening Survey may be analyzed by laboratories using water samples that are collected at the same time as the Assessment Monitoring contaminants, there are only minimal incremental labor costs anticipated for systems, in the form of taking an additional sample for List 2 contaminants at the same time of List 1 sampling. The Agency assumes there is minimal added labor burden associated with filling one more sample bottle.

In addition, today's Rule makes several clarifications and technical corrections to the UCMR (1999). EPA believes that none of these clarifications and corrections will increase the costs or labor burden to public water systems or States. Most of these items were already included in the cost and burden analyses for the UCMR (1999); their explanation is simply being clarified. These assumptions are discussed below.

Updating the NCOD on a quarterly basis rather than six times per year will not be an additional expense to systems or States, and will reduce EPA costs marginally. Requiring one-time reporting of system and laboratory points-of-contact will improve the implementation of the program by allowing EPA to convey important testing and reporting information to systems and laboratories, thereby enhancing the long-term data quality. Clarifying the data element definitions will provide more usable information by more clearly conveying the data that should be reported and should not be an additional cost to any entity. Clarifying the data reporting procedures through a ''single-entry'' electronic data reporting process, will reduce costs to systems marginally. Clarification of the source (raw) water monitoring alternative option does not increase the costs to systems beyond those that EPA had anticipated originally in adopting the alternative so that systems in States requiring source water compliance monitoring could coordinate unregulated contaminant monitoring with other monitoring. Providing options for reporting treatment plant latitude and longitude should marginally reduce costs to States which had not previously reported these locational data. Approval of EPA Method 502.2 and Standard Methods 6200C for the analysis of MTBE provides systems more flexibility to use methods that they may already be using to monitor for this unregulated contaminant, possibly providing cost savings to them. Approval of EPA Methods 515.3 and 515.4 for the analysis of DCPA mono-acid degradate and DCPA di-acid degradate provides flexibility to systems to use methods similar to those used in compliance monitoring and may reduce costs for testing and analysis of those unregulated contaminants. Eliminating the use of pH as a water quality parameter required for reporting chemical contaminant results will marginally reduce costs to systems for testing and analysis. Removing the reference to 40 CFR Part 136, Appendix B definition of Minimum Detection Limit is a technical change with no cost. Providing contaminant detection confirmation clarification for linuron and diuron as applying only to non-gas chromatographic methods does not change the costs of the rule for the other unregulated contaminants. This change only applies to these two List 2 contaminants and is included in the cost analysis for the List 2 contaminant methods. Clarifying that the method quality controls for UCMR contaminants are to be used along with the UCMR-specific quality controls for testing and analysis does not increase the cost of the regulation. Finally, clarifying the resampling process when samples must be resubmitted does not increase the cost of the regulation. These costs were included in the original analysis.

As noted, additional non-labor costs from this rule are solely attributed to the laboratory fees that will be charged for analysis of these contaminants. These costs will only be incurred by EPA and by large PWSs. EPA assumes that there will be additional charges imposed for analysis of the List 2 contaminants, since these contaminants will be analyzed under new methods or modifications of existing methods. EPA estimates that the average laboratory fee for the analyses for the 13 Screening Survey One chemical contaminants, using EPA Methods 526, 528, and 532 will be $560. The costs for Screening Survey One for laboratory analyses are calculated as follows: the number of systems multiplied by the number of entry or sampling points, multiplied by the sampling frequency, and then multiplied by the cost of analysis.

IX. Administrative Requirements

A. Executive Order 12866—Regulatory Planning and Review

Under Executive Order 12866 (58 FR 51735, October 4, 1993), the Agency must determine whether a regulatory action is ''significant'' and therefore subject to OMB review and the requirements of the Executive Order. The Order defines ''significant regulatory action'' as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or Tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

It has been determined that this rule is not a ''significant regulatory action'' under the terms of Executive Order 12866 and is therefore not subject to OMB review.

B. Executive Order 13045—Protection of Children From Environmental Health Risks and Safety Risks

Executive Order 13045, ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997), applies to any rule that: (1) Is determined to be ''economically significant'' as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency.

This rule is not subject to Executive Order 13045 because it is not ''economically significant'' as defined under Executive Order 12866. Further, this rule does not concern an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. This rule makes only clarifying changes to the September 1999 UCMR and establishes analytical methods and procedures for monitoring of the List 2 unregulated contaminants.

However, this rule is part of the Agency's overall strategy for deciding which contaminants to set drinking water standards for under the Safe Drinking Water Act (see discussion of the Contaminant Candidate List (CCL) at 63 FR 10273). Its purpose is to ensure that EPA obtains data on the occurrence of contaminants on the CCL—specifically, 13 of the List 2 chemical contaminants—where those data are currently lacking. In addition, today's rule sets the schedule for monitoring one microbiological contaminant. The method for this contaminant, *Aeromonas,* is reserved, and will be published in a subsequent notice. EPA is also taking steps to ensure that the Agency will have data on the health effects of these contaminants on children through its research program. The Agency will use these occurrence and health effects data to decide whether to regulate these contaminants.

C. Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and Tribal governments and the private sector. Under UMRA section 202, EPA generally must prepare a written

statement, including a cost-benefit analysis, for proposed and final rules with ''Federal mandates'' that may result in expenditures to State, local, and Tribal governments, in the aggregate, or to the private sector, of $100 million or more in any one year. Before promulgating an EPA rule for which a written statement is needed, UMRA section 205 generally requires EPA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows EPA to adopt an alternative other than the least costly, most cost-effective, or least burdensome alternative, if the Administrator publishes with the final rule an explanation of why that alternative was not adopted. Before EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including Tribal governments, it must have developed under UMRA section 203 a small government agency plan. The plan must provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

EPA has determined that today's rule does not contain a Federal mandate that may result in expenditures of $100 million or more for State, local, and Tribal governments, in the aggregate, or for the private sector in any one year. Total annual costs of today's rule (across the implementation period of 2001–2005), for State, local, and Tribal governments and the private sector, are estimated to be $428,720, of which EPA will pay $127,650, or approximately 30 percent. Again, States are assumed to incur no additional costs associated with the Screening Survey component of the UCMR. Thus, today's rule is not subject to the requirements of UMRA sections 202 and 205.

EPA has determined that this rule contains no regulatory requirements that might significantly or uniquely affect small governments because EPA will pay for the costs of shipping and sample testing for the small PWSs required to sample and test for unregulated contaminants under this rule, including those owned and operated by small governments. The only thing small governments will have to pay for is the cost of collecting the sample and reviewing the sample result. Screening Survey One samples will generally be collected coincident with Assessment Monitoring and therefore have minimal associated additional burden. These labor costs are minimal. This rule will, therefore, not significantly or uniquely affect small governments. Thus, today's rule is not subject to the requirements of UMRA section 203.

D. Paperwork Reduction Act

The Office of Management and Budget (OMB) has approved the information collection requirements contained in this rule under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* and has assigned OMB control number 2040–0208.

The information to be collected under today's rule fulfills the statutory requirements of section 1445(a)(2) of the Safe Drinking Water Act, as amended in 1996. The data to be collected will describe the source of the water, location of the water source and treatment plant, and test results for samples taken from PWSs. The concentrations of any of the 13 UCMR List 2 contaminants will be evaluated regarding health effects and will be considered for future regulation accordingly. Reporting is mandatory. The data are not subject to confidentiality protection.

The cost estimates described below for the List 2 contaminants are attributed to sampling and additional contract laboratory fees. The additional labor burden that will be incurred by PWSs during the ICR period (2001–2003) for sampling is 100 hours. Screening Survey One sampling will generally be coincident with Assessment Monitoring and the burden and costs for sample collection, packing, and shipping, and reporting were included in the original ICR for the UCMR (1999), except for the small incremental sampling burden of 100 hours. For the first Screening Survey, 180 small water systems (from the national representative sample of systems serving 10,000 or fewer people) will collect and test samples during 2001, and 120 large public water systems will collect and test samples during 2002. It is estimated that each small system will incur an average of 0.06 hours of labor per system per year, with an average labor cost of $1 per system per year. During the ICR period, large systems and EPA will incur costs for the analysis of the 13 List 2 chemical contaminants (e.g., Screening Survey One). Each large system respondent will incur an annual average cost of $4,200. Program implementation costs and burdens for the States, Territories and EPA were already included in the original ICR for UCMR (1999).

EPA will incur no additional labor costs for implementation of today's rule. EPA's annual non-labor costs for the ICR period 2001–2003 are estimated to be $212,700 for Screening Survey One, which consists of 13 chemical contaminants. The non-labor costs are solely attributed to the cost of sample testing by contract laboratories and the shipping of the sample kits to the 180 small systems.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and use technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. EPA is not amending the table in 40 CFR part 9 of currently approved ICR control numbers. The control number previously approved for UCMR and the approved sections of 40 CFR Part 141 have not been changed.

E. Regulatory Flexibility Act (RFA), as Amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), 5 U.S.C. 601 et seq.

The RFA generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

The RFA provides default definitions for each type of small entity. It also authorizes an agency to use alternative definitions for each category of small entity, ''which are appropriate to the

activities of the agency'' after proposing the alternative definition(s) in the **Federal Register** and taking comment. 5 U.S.C. 601(3)–(5). In addition to the above, to establish an alternative small business definition, agencies must consult with the Small Business Administration's (SBA) Chief Counsel for Advocacy.

For purposes of assessing the impacts of today's rule on small entities, EPA considered small entities to be systems serving 10,000 or fewer persons. This is the size of system specified in SDWA as requiring special consideration with respect to small system flexibility. In accordance with the RFA requirements, EPA proposed using this alternative definition in the **Federal Register,** (63 FR 7605, February 13, 1998), requested public comment, consulted with SBA on the definition as it relates to small businesses, and expressed its intention to use the alternative definition for all future drinking water regulations in the final Consumer Confidence Reports regulation (63 FR 44511, August 19, 1998). As stated in that final rule, the alternative definition would be applied to regulation, as well.

After considering the economic impacts of today's final rule on small entities, I certify that this action will not have a significant economic impact on a substantial number of small entities. The estimated distribution of the representative sample of small entities required to monitor under today's rule, categorized by ownership type, source water and system size, is presented in Table 1.

TABLE 1.—NUMBER OF PUBLICLY AND PRIVATELY OWNED SYSTEMS TO PARTICIPATE IN SCREENING SURVEY ONE

Size category	Publicly owned systems	Privately owned systems	Total—all systems
Ground Water Systems			
500 and under	8	31	39
501 to 3,300	31	14	45
3,301 to 10,000	24	7	31
Subtotal Ground Water Systems	63	52	115
Surface Water Systems			
500 and under	6	14	20
501 to 3,300	10	5	15
3,301 to 10,000	24	7	30
Subtotal Surface Water Systems	40	26	65
Total	102	78	180

The basis for the UCMR RFA certification for today's rule, which adds the Screening Survey contaminants and methods to the UCMR program, is as follows: The average annual compliance cost of the rule for a small system is $1 which represents 0.0004 percent of revenue/sales for the 180 small systems required to monitor in Screening Survey One as a result of today's rule. In order to reduce burden on small systems, EPA is paying for the costs of analyses, shipping and quality control for all small systems (97% of the entire cost of monitoring and testing by small systems).

F. National Technology Transfer and Advancement Act

As noted in the proposed rule, section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104–113, section 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so will be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. The NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

This rulemaking involves technical standards. Therefore, the Agency conducted a search to identify potentially applicable voluntary consensus standards. However, we identified no such standards. Therefore, EPA has decided to use EPA Methods 526, 528, and 532.

G. Executive Order 12898—Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order 12898, ''Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations'' (February 11, 1994), focuses Federal attention on the environmental and human health conditions of minority and low-income populations with the goal of achieving environmental protection for all communities. By seeking to identify unregulated contaminants that may pose health risks via drinking water from all PWSs, today's regulation furthers the protection of public health for all citizens, including minority and low-income populations using public water supplies.

H. Executive Order 13132 (Federalism)

Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' ''Policies that have federalism implications'' is defined in the Executive Order to include regulations that have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.''

This final rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various

levels of government, as specified in Executive Order 13132. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. This Rule specifies the approved analytical methods for 13 List 2 chemical contaminants, thereby allowing these contaminants to be included in the UCMR Screening Survey program, and makes other minor corrections to the September rule (64 FR 50556). The cost to State and local governments is minimal, and the rule does not preempt State law. Thus, Executive Order 13132 does not apply to this rule.

I. Executive Order 13084—Consultation and Coordination With Indian Tribal Governments

Under Executive Order 13084, EPA may not issue a regulation that is not required by statute, that significantly or uniquely affects the communities of Indian Tribal governments, and that imposes substantial direct compliance costs on those communities, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by the Tribal governments, or EPA consults with those governments. If EPA complies by consulting, Executive Order 13084 requires EPA to provide to OMB, in a separately identified section of the preamble to the rule, a description of the extent of EPA's prior consultation with representatives of affected Tribal governments, a summary of the nature of their concerns, and a statement supporting the need to issue the regulation. In addition, Executive Order 13084 requires EPA to develop an effective process permitting elected officials and other representatives of Indian Tribal governments ''to provide meaningful and timely input in the development of regulatory policies on matters that significantly or uniquely affect their communities.''

Today's rule does not significantly or uniquely affect the communities of Indian Tribal governments. Only one Tribal water system serves more than 10,000 persons and will be required to monitor and test under this rule. The costs for monitoring and testing for the large system are not significant. All the other Tribal water systems serve 10,000 or fewer persons, and in today's rule had an equal probability of being selected in the national representative sample of small systems. EPA will pay the costs of unregulated contaminant testing for small Tribal water systems just as they will for other small water systems. The actual cost of taking the sample is considered minimal. Tribal water systems will be treated the same as other water systems and the impact of this rule on them will not be significant or unique. There are no costs associated with the minor amendments that clarify the September 1999 UCMR.

This rule will not impose substantial direct compliance costs on Tribal communities either because, with the exception of the one large Tribal water system, the Federal government will provide the funds necessary to pay the potential direct costs incurred by Tribal governments in complying with the rule for the testing and reporting of contaminant occurrence of small systems. By statute, EPA must pay the reasonable testing and laboratory analysis costs for small systems selected to participate in this monitoring program. Accordingly, the requirements of section 3(b) of Executive Order 13084 do not apply to this Rule.

J. Plain Language

Executive Order 12866 and the President's memorandum of June 1, 1998, require each agency to write all rules in plain language. EPA requested comment in the proposed rule on ways to make this rule easier to understand. The Agency did not receive any comments on this matter.

K. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register.** A major rule cannot take effect until 60 days after it is published in the **Federal Register.** This action is not a ''major rule'' as defined by U.S.C. 804(2). This rule will be effective January 11, 2001.

L. Administrative Procedure Act

Under the Administrative Procedure Act (APA), 5 U.S.C. 553(d), an agency must normally provide a minimum of 30 days between publication of a final rule and its effective date. The effective date for today's rule will be January 11, 2001. Hence, there will be less than 30 days between publication and the effective date. The APA provides that an agency can make a rule effective in less than 30 days, however, where the agency finds ''good cause'' for doing so and publishes the reasons with the rule.

EPA believes that such ''good cause'' exists for making this rule effective in less than 30 days. These reasons are as follows. With respect to List 1 Assessment Monitoring, this is primarily a supplemental rulemaking related to the Unregulated Contaminant Monitoring Regulation (UCMR), that was published on September 17, 1999, and which specified that List 1 monitoring would begin on January 1, 2001. Today's rule does not alter the original effective date for List 1 monitoring but it does make minor revisions to requirements to conducting the monitoring and reporting monitoring results for List 1 contaminants. Because List 1 monitoring has long been scheduled to begin on January 1, 2001, and affected systems have been gearing up to do so, it is critical that all the minor amendments to the original UCMR be effective as soon as possible, so that systems that are scheduled to begin monitoring can do so in compliance with the new requirements.

With respect to List 2 Screening Survey monitoring for 13 contaminants, EPA wants to make this rule effective January 11, 2001, in order to reduce the burden on small systems and allow them to complete their List 2 monitoring coincident with their List 1 Assessment Monitoring.

X. Public Involvement in Regulation Development

EPA's Office of Ground Water and Drinking Water has developed a process for stakeholder involvement in its regulatory activities to provide early input to regulation development. Today's rule amended the September 1999 UCMR, by establishing the method requirements for 13 List 2 chemical contaminants and making other minor changes in the UCMR. At the time of UCMR publication—September 1999—the methods for these contaminants were still being refined by EPA. For a description of public involvement activities related to the UCMR, please see the discussion at 64 FR 50556. EPA conducted a series of five national implementation workshops for States and EPA Regions, regarding the September 1999 UCMR, from March 26 through April 27, 2000, in Philadelphia, Atlanta, Kansas City, Denver, and San Francisco. Participants, other than EPA personnel, represented 35 States, two territories, and one Tribe. Questions about implementation of the UCMR

prompted many of today's technical changes and clarifications.

List of Subjects in 40 CFR Part 141

Environmental protection, Analytical methods, Chemicals, Incorporation by reference, Intergovernmental relations, Microorganisms, Monitoring, Water supply.

Dated: December 15, 2000.

Carol M. Browner,

Administrator.

For the reasons set out in the preamble, title 40, chapter I of the Code of Federal Regulations is amended as follows:

PART 141—NATIONAL PRIMARY DRINKING WATER REGULATIONS

1. The authority citation for part 141 continues to read as follows:

Authority: 42 U.S.C. 300f, 300g–1, 300g–2, 300g–3, 300g–4, 300g–5, 300g–6, 300j–4, 300j–9, and 300j–11.

2. Section 141.35 is amended by:

a. Revising paragraph (c);

b. Revising paragraph (d) (including Table 1);

c. Revising paragraph (e); and

d. Revising paragraph (f).

The Revisions read as follows:

§ 141.35 Reporting of unregulated contaminant monitoring results.

* * * * *

(c) *When must I report monitoring results?* You must report the results of unregulated contaminant monitoring within thirty (30) days following the month in which you received the results from the laboratory. EPA will conduct its quality control review of the data for sixty (60) days after you report the data, which will also allow for quality control review by systems and States. After the quality control review, EPA will place the data in the national drinking water contaminant occurrence database at the time of the next database update. Exception: Reporting of monitoring results to EPA received by public water systems prior to June 30, 2001, must occur between July 1 and September 30, 2001.

(d) *What information must I report?* (1) You must provide the following ''point of contact'' information: name, mailing address, phone number, and e-mail address for:

(i) PWS Technical Contact, the person at your PWS that is responsible for the technical aspects of your unregulated contaminant monitoring regulation (UCMR) activities, such as details concerning sampling and reporting;

(ii) PWS Official, the person at your PWS that is able to function as the official spokesperson for your UCMR activities; and

(iii) Laboratory Contact Person, the person at your laboratory that is able to address questions concerning the analysis that they provided for you.

(2) You must update this information if it changes during the course of UCMR implementation.

(3) You must report the information specified for data elements 1 through 16 in the following table for each sample.

TABLE 1.—UNREGULATED CONTAMINANT MONITORING REPORTING REQUIREMENTS

Data Element	Definition
1. Public Water System (PWS) Identification Number.	The code used to identify each PWS. The code begins with the standard two-character postal State abbreviation; the remaining seven characters are unique to each PWS.
2. Public Water System Facility Identification Number—Sampling Point Identification Number and Sampling Point Type Identification.	The Sampling point identification number and sampling point type identification must either be static or traceable to previous numbers and type identifications throughout the period of unregulated contaminant monitoring. The Sampling point identification number is a three-part alphanumeric designation, made up of:

TABLE 1.—UNREGULATED CONTAMINANT MONITORING REPORTING REQUIREMENTS—Continued

Data Element	Definition
	a. The Public Water System Facility Identification Number is an identification number established by the State, or at the State's discretion the PWS, that is unique to the PWS for an intake for each source of water, a treatment plant, a distribution system, or any other facility associated with water treatment or delivery and provides for the relationship of facilities to each other to be maintained; b. The Sampling Point Identification Number is an identification number established by the State, or at the State's discretion the PWS, that is unique to each PWS facility that identifies the specific sampling point and allows the relationship of the sampling point to other facilities to be maintained; and c. Sampling Point Type Identification is one of following: SR—Untreated water collected at the source of the water system facility. EP—Entry point to the distribution system. MD—midpoint in the distribution system where the disinfectant residual would be expected to be typical for the system such as the location for sampling coliform indicator bacteria as described in 40 CFR 141.21. MR—point of maximum retention is the point located the furthest from the entry point to the distribution system which is approved by the State for trihalomethane (THM) (disinfectant byproducts (DBP)) and/or total coliform sampling. LD—location in the distribution system where the disinfectant residual is the lowest which is approved by the State for THM (DBP) and/or total coliform sampling.
3. Sample Collection Date	The date the sample is collected reported as 4-digit year, 2-digit month, and 2-digit day.
4. Sample Identification Number	An alphanumeric value of up to 15 characters assigned by the laboratory to uniquely identify containers or groups of containers containing water samples collected at the same time and sampling point.
5. Contaminant/Parameter	The unregulated contaminant or water quality parameter for which the sample is being analyzed.
6. Analytical Results—Sign	An alphanumeric value indicating whether the sample analysis result was: a. (<) ''less than'' means the contaminant was not detected or was detected at a level ''less than'' the MRL. b. (=) ''equal to'' means the contaminant was detected at a level ''equal to'' the value reported in ''Analytical Result—Value.''
7. Analytical Result—Value	The actual numeric value of the analysis for chemical and microbiological results, or the minimum reporting level (MRL) if the analytical result is less than the contaminant's MRL.
8. Analytical Result—Unit of Measure	The unit of measurement for the analytical results reported. [e.g., micrograms per liter, (μg/L); colony-forming units per 100 milliliters, (CFU/100 mL), etc.]
9. Analytical Method Number	The identification number of the analytical method used.
10. Sample Analysis Type	The type of sample collected. Permitted values include: a. RFS—Raw field sample—untreated sample collected and submitted for analysis under this rule. b. RDS—Raw duplicate field sample—untreated field sample duplicate collected at the same time and place as the raw field sample and submitted for analysis under this rule. c. TFS—Treated field sample—treated sample collected and submitted for analysis under this rule. d. TDS—Treated duplicate field sample—treated field sample duplicate collected at the same time and place as the treated field sample and submitted for analysis under this rule.
11. Sample Batch Identification Number	The sample batch identification number consists of three parts: a. Up to a 10-character laboratory identification code assigned by EPA. b. Up to a 15-character code assigned by the laboratory to uniquely identify each extraction or analysis batch. c. The date that the samples contained in each extraction batch extracted or in an analysis batch were analyzed, reported as an 8-digit number in the form 4-digit year, 2-digit month, and 2-digit day.
12. Minimum Reporting Level	Minimum Reporting Level (MRL) refers to the lowest concentration of an analyte that may be reported. Unregulated contaminant monitoring (UCM) MRLs are established in §141.40 monitoring requirements for unregulated contaminants.
13. Minimum Reporting Level Unit of Measure	The unit of measure to express the concentration, count, or other value of a contaminant level for the Minimum Reporting Level reported. (e.g., μg/L, colony forming units/100 mL (CFU/100 mL), etc.).
14. Analytical Precision	Precision is the degree of agreement between two repeated measurements and is monitored through the use of duplicate spiked samples. For purposes of the Unregulated Contaminant Monitoring Regulation (UCMR), Analytical Precision is defined as the relative percent difference (RPD) between spiked matrix duplicates. The RPD for the spiked matrix duplicates analyzed in the same batch of samples as the analytical result being reported is to be entered in this field. Precision is calculated as Relative Percent Difference (RPD) of spiked matrix duplicates from the mean using: RPD = absolute value of $[(X_1—X_2) /(X_1 +X_2)/2] \times 100\%$. where: X_1 is the concentration observed in spiked field sample minus the concentration observed in unspiked field sample. X_2 is the concentration observed in duplicate spiked field sample minus the concentration observed in unspiked field sample.

TABLE 1.—UNREGULATED CONTAMINANT MONITORING REPORTING REQUIREMENTS—Continued

Data Element	Definition
15. Analytical Accuracy	Accuracy describes how close a result is to the true value measured through the use of spiked field samples. For purposes of unregulated contaminant monitoring, accuracy is defined as the percent recovery of the contaminant in the spiked matrix sample analyzed in the same analytical batch as the sample result being reported and calculated using: % recovery = [(amt. found in spiked sample—amt. found in sample) − amt. spiked] × 100%.
16. Spiking Concentration	The concentration of method analyte(s) added to a sample to be analyzed for calculating analytical precision and accuracy where the value reported use the same unit of measure reported for Analytical Results.
17. Presence/Absence	Reserved.

(e) *How must I report this information?* (1) You must report results from monitoring under this rule using EPA's electronic reporting system. For quality control purposes, you must instruct the organization(s) responsible for the analysis of unregulated contaminant samples taken under § 141.40 to *enter* the results into the reporting system, in the format specified by EPA. You are responsible for *reviewing* those results and *approving* the reporting (via the electronic system) of the results to EPA. You must also provide a copy of the results to the State, as directed by the State.

(2) If you report more than one set of valid results for the same sampling point and the same sampling event (for example, because you have had more than one organization (*e.g.,* a laboratory) analyze replicate samples collected under § 141.40, or because you have collected multiple samples during a single monitoring event at the same sampling point), EPA will use the highest of the reported values as the official result.

(f) *Does the laboratory to which I send samples report the results for me?* While you must instruct the organization conducting unregulated contaminant analysis (*e.g.,* a laboratory) to enter the results into EPA's electronic reporting system, you are responsible for reviewing and approving the submission of the results to EPA. If the analytical organization or laboratory cannot enter these data for you using EPA's electronic reporting system, then you may explain to EPA in writing the reasons why alternate reporting is necessary and must receive EPA's approval to use an alternate reporting procedure.

* * * * *

3. Section 141.40 is amended by:

a. Revising paragraph (a)(1)(iii) introductory text;

b. Revising paragraph (a)(1)(v) introductory text;

c. Revising Table 1, List 1, List 2 and List 3, in paragraph (a)(3);

d. Revising Table 2, in paragraph (a)(4)(i);

e. Revising paragraph (a)(5)(ii)(B) (including table 3);

f. Revising paragraph (a)(5)(ii)(C);

g. Revising paragraph (a)(5)(ii)(G);

h. Revising paragraphs (a)(7)(i), (ii), and (iii);

i. Revising paragraph (b)(1)(ix);

j. In the Appendix A to § 141.40 by revising paragraphs (2) and (9); and

k. Adding paragraph (11) to the Appendix A to § 141.40.

The revisions and additions read as follows:

§ 141.40 Monitoring requirements for unregulated contaminants.

(a) * * *

(1) * * *

(iii) *Large systems purchasing their entire water supply from another system.* If you own or operate a public water system (other than a transient system) that serves more than 10,000 persons and purchase your entire water supply from a wholesale or retail public water system, you must monitor as follows:

* * * * *

(v) *Small systems purchasing their entire water supply from another system.* If you own or operate a public water system (other than a transient system) that serves 10,000 or fewer persons and purchase your entire water supply from another public water system, you must monitor as follows:

* * * * *

Column headings are:

[1]—Chemical or microbiological contaminant: the name of the contaminants to be analyzed.

[2]—CAS (Chemical Abstract Service Number) Registry No. or Identification Number: a unique number identifying the chemical contaminants.

[3]—Analytical Methods: method numbers identifying the methods that must be used to test the contaminants.

[4]—Minimum Reporting Level: the value and unit of measure at or above which the concentration or density of the contaminant must be measured using the Approved Analytical Methods.

[5]—Sampling Location: the locations within a PWS at which samples must be collected.

[6]—Years During Which Monitoring to be Completed: The years during which the sampling and testing are to occur for the indicated contaminant.

The procedures shall be done in accordance with the documents listed next in these footnotes. The incorporation by reference of the following documents listed in footnotes b-d, i, k and l was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of the documents may be obtained from the following sources. Information regarding obtaining these documents can be obtained from the Safe Drinking Water Hotline at 800–426–4791. Documents may be inspected at EPA's Drinking Water Docket, 401 M Street, SW., Washington, DC 20460 (Telephone: 202–260–3027); or at the Office of FEDERAL REGISTER, 800 North Capitol Street, NW., Suite 700, Washington, DC.

[a] The version of the EPA methods which you must follow for this Rule are listed at § 141.24 (e).

[b] Annual Book of ASTM Standards, 1996, 1998 and 1999, Vol. 11.02, American Society for Testing and Materials. Method D5812–96, ''Standard Test Method for Determination of Organochlorine Pesticides in Water by Capillary Column Gas Chromatography'', is located in the Annual Book of ASTM Standards, 1998 and 1999, Vol. 11.02. Methods D5790–95, ''Standard Test Method for Measurement of Purgeable Organic Compounds in Water by Capillary Column Gas Chromatography/Mass Spectrometry''; D5475–93, ''Standard Test Method for Nitrogen- and Phosphorus-Containing Pesticides in Water by Gas Chromatography with a Nitrogen-Phosphorus Detector''; and D5317–93, ''Standard Test Method for Determination of Chlorinated Organic Acid Compounds in Water by Gas Chromatography with an Electron Capture Detector'' are located in the Annual Book of ASTM Standards, 1996 and 1998, Vol 11.02. Copies may be obtained from the American Society for Testing and Materials, 100 Barr Harbor Drive, West Conshohocken, PA 19428.

[c] Official Methods of Analysis of AOAC (Association of Official Analytical Chemist) International, Sixteenth Edition, 4th Revision, 1998, Volume I, AOAC International, First Union National Bank Lockbox, PO Box 75198, Baltimore, MD 21275–5198. 800–379–2622.

[d] SM 6210 D is only found in the 18th and 19th editions of Standard Methods for the Examination of Water and Wastewater, 1992 and 1995, American Public Health Association; either edition may be used. SM 6200 B and 6200 C are only found in the 20th edition of Standard Methods for the Examination of Water and Wastewater, 1998. Copies may be obtained from the American Public Health Association, 1015 Fifteenth Street NW, Washington, DC 20005.

[e] Minimum Reporting Level determined by multiplying by 10 the least sensitive method's detection limit (detection limit =standard deviation times the Student's t value for 99% confidence level with n-1 degrees of freedom), or when available, multiplying by 5 the least sensitive method's estimated detection limit (where the estimated detection limit equals the concentration of compound yielding approximately a 5 to 1 signal to noise ratio or the calculated detection limit, whichever is greater).

[f] Entry Points to the Distribution System (EPTDS), after treatment, representing each non-emergency water source in use over the twelve-month period of monitoring: this only includes entry points for sources in operation during the months in which sampling is to occur. Sampling must occur at the EPTDS, unless the State has specified other sampling points that are used for compliance monitoring under 40 CFR 141.24 (f)(1), (2), and (3). See 40 CFR 141.40(a)(5)(ii)(C) for a complete explanation of requirements, including the use of source (raw) water sampling points.

[g] Minimum Reporting Levels (MRL) for Volatile Organic Compounds (VOC) determined by multiplying either the published detection limit or 0.5 µg/L times 10, whichever is greater. The detection limit of 0.5 µg/L (0.0005 mg/L) was selected to conform to VOC detection limit requirements of 40 CFR 141.24(f)(17)(E).

[h] The approved methods do not allow for the identification and quantitation of the individual acids. The single analytical result obtained should be reported as total DCPA mono- and di-acid degradates.

[i] EPA Method 515.3, ''Determination of Chlorinated Acids in Drinking Water by Liquid-Liquid Extraction, Derivatization and Gas Chromatography with Electron Capture Detection,'' Revision 1.0 July 1996. EPA 815-R–00–014, ''Methods for the Determination of Organic and Inorganic compounds in Drinking Water, Volume 1,'' August 2000. Available from the National Technical Information Service, NTIS PB2000–106981, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161. The toll free number is 800–553–6847. Alternatively, the method can be assessed and downloaded directly on-line at www.epa.gov/safewater/methods/sourcalt.html.

[J] Since EPA Method 515.3 does not include a solvent wash step following hydrolysis, the parent DCPA is not removed prior to analysis, therefore, only non-detect data may be reported using EPA Method 515.3. All samples with results above the MRL must be analyzed by one of the other approved methods.

[k] EPA Method 515.4, ''Determination of Chlorinated Acids in Drinking Water by Liquid-Liquid Microextraction, Derivatization and Fast Gas Chromatography with Electron Capture Detection,'' Revision 1.0, April 2000, EPA #815/B–00/001. Available by requesting a copy from the EPA Safe Drinking Water Hotline within the United States at 800–426–4791 (Hours are Monday through Friday, excluding federal holidays, from 9 a.m. to 5:30 p.m. Eastern Time). Alternatively, the method can be assessed and downloaded directly on-line at www.epa.gov/safewater/methods/sourcalt.html.

[l] EPA Method 314.0, ''Determination of Perchlorate in Drinking Water Using Ion Chromatography,'' Revision 1.0, EPA 815-B–99–003, November 1999. EPA 815-R–00–014, ''Methods for the Determination of Organic and Inorganic Compounds in Drinking Water, Volume 1,'' August 2000. Available from the National Technical Information Service, NTIS PB2000–106981, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161. The toll free number is 800–553–6847. Alternatively, the method can be assessed and downloaded directly on-line at www.epa.gov/safewater/methods/sourcalt.html.

[m] MRL was established at a concentration, which is at least ¼th the lowest known adverse health concentration, at which acceptable precision and accuracy has been demonstrated in spiked matrix samples.

[n] Sample preservation techniques and holding times specified in EPA Method 524.2 must be used by laboratories using either EPA Method 502.2 or Standard Methods 6200C.

List 2—screening survey chemical contaminants

1-contaminant	2-CAS registry number	3-Analytical methods	4-Minimum reporting level	5-sampling location	6-Period during which monitoring to be completed
1,2-diphenylhydrazine	122–66–7	EPA Method 526[a]	0.5 µg/L	EPTDS[e]	2001—Selected Systems serving ≤10,000 persons; 2002—Selected systems serving > 10,000 persons.
2-methyl-phenol	95–48–7	EPA Method 528[b]	1 µg/L[f]	EPTDS[e]	Same as above.
2,4-dichlorophenol	120–83–2	EPA Method 528[b]	1 µg/L[f]	EPTDS[e]	Same as above.
2,4-dinitrophenol	51–28–5	EPA Method 528[b]	5 µg/L[f]	EPTDS[e]	Same as above.
2,4,6-trichlorophenol	88–06–2	EPA Method 528[b]	1 µg/L[f]	EPTDS[e]	Same as above.
Alachlor ESA	Reserved[d]	Reserved[d]	Reserved[d]	Reserved[d]	Reserved[d]
Diazinon	333–41–5	EPA Method 526[a]	0.5 µg/L[f]	EPTDS[e]	2001—Seleected Systems serving ≤10,000 persons; 2002—Selected systems serving > 10,000 persons.
Disulfoton	298–04–4	EPA Method 526[a]	0.5 µg/L[f]	EPTDS[e]	Same as above.
Diuron	330–54–1	EPA Method 532[c]	1 µg/L[f]	EPTDS[e]	Same as above.
Fonofos	944–22–9	EPA Method 526[a]	0.5 µg/L[f]	EPTDS[e]	Same as above.
Linuron	330–55–2	EPA Method 532[c]	1 µg/L[f]	EPTDS[e]	Same as above.
Nitrobenzene	98–95–3	EPA Method 526[a]	0.5 µg/L[f]	EPTDS[e]	Same as above.
Prometon	1610–18–0	EPA Method 526[a]	0.5 µg/L[f]	EPTDS[e]	Same as above.
RDX	121–82–4	Reserved[d]	Reserved[d]	Reserved[d]	Reserved[d].
Terbufos	13071–79-9	EPA Method 526[a]	0.5 µg/L[fK]	EPTDS[e]	2001—Selected Systems serving ≤10,000 persons; 2002-Selected systems serving > 10,000 persons.

List 2—screening survey microbiological contaminants to be sampled after notice of analytical methods availability

1-contaminant	2-identification number	3-analytical methods	4-minimum reporting level	5-sampling location	6-period during which monitoring to be completed
Aeromonas	NA	Reserved[d]	Reserved[d]	Distribution System[g]	2003[h]

Column headings are:

[1]—Chemical or microbiological contaminant: the name of the contaminants to be analyzed.

[2]—CAS (Chemical Abstract Service Number) Registry No. or Identification Number: a unique number identifying the chemical contaminants.

[3]—Analytical Methods: method numbers identifying the methods that must be used to test the contaminants.

[4]—Minimum Reporting Level: the value and unit of measure at or above which the concentration or density of the contaminant must be measured using the Approved Analytical Methods.

[5]—Sampling Location: the locations within a PWS at which samples must be collected.

[6]—Years During Which Monitoring to be Completed: the years during which the sampling and testing are to occur for the indicated contaminant.

The procedures shall be done in accordance with the documents listed next in these footnotes. The incorporation by reference of the following documents listed in footnotes a–c, was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of the documents may be obtained from the following sources. Information regarding obtaining these documents can be obtained from the Safe Drinking Water Hotline at 800–426–4791. Copies of the documents may be obtained from the sources listed in these footnotes. Information regarding obtaining these documents can be obtained from the Safe Drinking Water Hotline at 800–426–4791. Documents may be inspected at EPA's Drinking Water Docket, 401 M Street, SW., Washington, DC 20460 (Telephone: 202–260–3027); or at the Office of Federal Register, 800 North Capitol Street, NW., Suite 700, Washington, DC.

[a] EPA Method 526, ''Determination of Selected Semivolatile Organic Compounds in Drinking Water by Solid Phase Extraction and Capillary Column Gas Chromatography/Mass Spectrometry (GC/MS),'' Revision 1.0, June 2000. EPA 815–R–00–014, ''Methods for the Determination of Organic and Inorganic Compounds in Drinking Water, Volume 1,'' August 2000. Available from the National Technical Information Service, NTIS PB2000–106981, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161. The toll free number is 800–553–6847. Alternatively, the method can be assessed and downloaded directly on-line at www.epa.gov/safewater/methods/sourcalt.html.

[b] EPA Method 528, ''Determination of Phenols in Drinking Water by Solid Phase Extraction and Capillary Column Gas Chromatography/Mass Spectrometry (GC/MS),'' Revision 1.0, April 2000. EPA 815–R–00–014, ''Methods for the Determination of Organic and Inorganic Compounds in Drinking Water, Volume 1,'' August 2000. Available from the National Technical Information Service, NTIS PB2000–106981, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161. The toll free number is 800–553–6847. Alternatively, the method can be assessed and downloaded directly on-line at www.epa.gov/nerlcwww/ordmeth.htm.

[c] EPA Method 532, ''Determination of Phenylurea Compounds in Drinking Water by Solid Phase Extraction and High Performance Liquid Chromatography with UV Detection,'' Revision 1.0, June 2000. EPA 815–R–00–014, ''Methods for the Determination of Organic and Inorganic Compounds in Drinking Water, Volume 1,'' August 2000. Available from the National Technical Information Service, NTIS PB2000–106981, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161. The toll free number is 800–553–6847. Alternatively, the method can be assessed and downloaded directly on-line at www.epa.gov/safewater/methods/sourcalt.html.

[d] To be specified at a later time.

[e] Entry Points to the Distribution System (EPTDS), after treatment, representing each non-emergency water source in use over the twelve-month period of monitoring: this only includes entry points for sources in operation during the months in which sampling is to occur. Sampling must occur at the EPTDS, source water sampling points are not permitted for List 2 contaminant monitoring.

[f] Minimum Reporting Level represents the value of the lowest concentration precision and accuracy determination made during methods development and documented in the method. If method options are permitted, the concentration used was for the least sensitive option.

[g] Three samples must be taken from the distribution system, which is owned or controlled by the selected PWS. The sample locations must include one sample from a point (MD from § 141.35(d)(3), Table 1) where the disinfectant residual is representative of the distribution system. This sample location may be selected from sample locations which have been previously identified for samples to be analyzed for coliform indicator bacteria. Coliform sample locations encompass a variety of sites including midpoint samples which may contain a disinfectant residual that is typical of the system. Coliform sample locations are described in 40 CFR 141.21. This same approach must be used for the *Aeromonas* midpoint sample where the disinfectant residual would not have declined and would be typical for the distribution system. Additionally, two samples must be taken from two different locations: the distal or dead-end location in the distribution system (MR from § 141.35(d)(3), Table 1), avoiding disinfectant booster stations, and from a location where previous determinations have indicated the lowest disinfectant residual in the distribution system (LD from § 141.35(d)(3), Table 1). If these two locations of distal and low disinfectant residual sites coincide, then the second sample must be taken at a location between the MD and MR sites. Locations in the distribution system where the disinfectant residual is expected to be low are similar to TTHM sampling points. Sampling locations for TTHMs are described in 63 FR 69468.

[h] This monitoring period is contingent upon promulgation of the analytical method and minimum reporting level.

List 3—Pre-screen testing radionuclides to be sampled after notice of analytical methods availability

1-contaminant	2-CAS registry number	3-Analytical methods	4-Minimum reporting level	5-Sampling location	6-Period during which monitoring to be completed
Lead-210	14255–04–0	Reserved [a]	Reserved [a]	Reserved [a]	Reserved.[a]
Polonium-210	13981–52–7	Reserved [a]	Reserved [a]	Reserved [a]	Reserved.[a]

List 3—Pre-screen testing microorganisms to be sampled after notice of analytical methods availability

1-contaminant	2-identification number	3-Analytical methods	4-Minimum reporting level	5-Sampling location	6-Period during which monitoring to be completed
Cyanobacteria (blue-green algae, other freshwater algae and their toxins).	Reserved [a]	Reserved [a]	Reserved [a]	Reserved [a]	Reserved.[a]

* * * * *

(5) * * *

(ii) * * *

(B) *Frequency.* You must collect the samples within the timeframe and according to the following frequency specified by contaminant type and water source type:

TABLE 3.—MONITORING FREQUENCY BY CONTAMINANT AND WATER SOURCE TYPES

Contaminant type	Water source type	Timeframe	Frequency
Chemical	Surface water	Twelve (12) months	Four quarterly samples taken as follows: Select either the first, second, or third month of a quarter and sample in that same month of each of four (4) consecutive quarters [a] to ensure that one of those sampling events occurs during the vulnerable time.[b]
	Ground water	Twelve (12) months	Two (2) times in a year taken as follows: Sample during one (1) month of the vulnerable time [b] and during one (1) month five (5) to seven (7) months earlier or later.[c]
Microbiological	Surface and ground water	Twelve (12) months	Six (6) times in a year taken as follows: Select either the first, second, or third month of a quarter and sample in that same month of each of four (4) consecutive quarters, and sample an additional 2 months during the warmest (vulnerable) quarter of the year.[d]

[a] ''Select either the first, second, or third month of a quarter and sample in that same month of each of four (4) consecutive quarters'' means that you must monitor during each of the four (4) months of either: January, April, July, October; or February, May, August, November; or March, June, September, December.

[b] ''Vulnerable time'' means May 1 through July 31, unless the State or EPA informs you that it has selected a different time period for sampling as your system's vulnerable time.

[c] ''Sample during one (1) month of the vulnerable time and during one (1) month five (5) to seven (7) months earlier or later'' means, for example, that if you select May as your ''vulnerable time'' month to sample, then one (1) month five (5) to seven (7) months earlier would be either October, November or December of the preceding year, and one (1) month five (5) to seven (7) months later would be either, October, November, or December of the same year.

[d] This means that you must monitor during each of the six (6) months of either: January, April, July, August, September, October; or February, May, July, August, September, November; or March, June, July, August, September, December; unless the State or EPA informs you that a different vulnerable quarter has been selected for your system.

(C) *Location.* You must collect samples at the location specified for each listed contaminant in column 5 of the Table 1, UCMR (1999) List, in paragraph (a)(3) of this section. The sampling location for chemical contaminants must be the entry point to the distribution system or the compliance monitoring point specified by the State or EPA under 40 CFR 141.24 (f)(1), (2), and (3). Except as provided in this paragraph (a)(5)(ii)(C),

if the compliance monitoring point as specified by the State is for source (raw) water and any of the contaminants in paragraph (a)(3) of this section are detected, then you must complete the source water monitoring for the indicated timeframe and also sample at the entry point to the distribution system representative of the affected source water only for the contaminant(s) found in the source water over the next twelve month timeframe, beginning in the next required monitoring period as indicated in paragraph (a)(5)(ii)(B), Table 3 of this section, even though monitoring might extend beyond the last year indicated in column 6, Period during which monitoring to be completed, in Table 1 of paragraph (a)(3). Exception: If the State or EPA determines that sampling at the entry point to the distribution system is unnecessary because no treatment was instituted between the source water and the distribution system that would affect measurement of the contaminants listed in paragraph (a)(3) of this section, then you do not have to sample at the entry point to the distribution system. Note: The sampling for List 2 chemical contaminants must be at the entry point to the distribution system, as specified in Table 1, List 2.

* * * * *

(G) *Testing.* (*1*) Except as provided in paragraph (a)(5)(ii)(G)(*2*) and (*3*) of this section, you must arrange for the testing of the contaminants identified in List 1 of Table 1 by a laboratory certified under § 141.28 for compliance analysis using any of the analytical methods listed in column 3 for each contaminant in List 1 of Table 1, Unregulated Contaminant Monitoring Regulation (1999) List, in paragraph (a)(3) of this section, whether you use the EPA analytical methods or non-EPA methods listed in List 1 of Table 1. Laboratories are automatically certified for the analysis of UCMR contaminants in List 1 of Table 1 if they are already certified to conduct compliance monitoring for a contaminant included in the same method being approved for UCMR analysis.

(*2*) You must arrange for the testing of Perchlorate as identified in List 1 of Table 1 by a laboratory certified under § 141.28 for compliance analysis using an approved ion chromatographic method as listed in § 141.28 and that has analyzed and successfully passed the Performance Testing (PT) Program administered by EPA.

(*3*) You must arrange for the testing of the chemical contaminants identified in List 2 of Table 1 by a laboratory certified under § 141.28 for compliance analysis using EPA Method 525.2 if performing UCMR analysis using EPA Methods 526 or 528, or a laboratory certified under § 141.28 for compliance analysis using EPA Methods 549.1 or 549.2 if performing UCMR analysis using EPA Method 532. You must arrange for the testing for *Aeromonas* using the approved method as identified in List 2 of Table 1 by a laboratory which is both certified under § 141.28 for compliance analysis for coliform indicator bacteria using an EPA approved membrane filtration procedure and which also has been granted approval for UCMR monitoring of *Aeromonas* by successfully passing the *Aeromonas* Performance Testing (PT) Program administered by EPA.

* * * * *

(*7*) * * *

(i) *All systems.* You must:

(A) Analyze the additional parameters specified in paragraph § 141.40(a)(4)(i), Table 2, ''Water Quality Parameters to be Monitored with UCMR Contaminants'' for each relevant contaminant type. You must analyze the parameters for each sampling event of each sampling point, using the method indicated, and report the results using the data elements 1 through 10 in Table 1, § 141.35(d), Unregulated Contaminant Monitoring Reporting requirements;

(B) Review the laboratory results to ensure reliability; and

(C) Report the results as specified in § 141.35.

(ii) *Large systems.* If your system serves over 10,000 persons, you must collect and arrange for testing of the contaminants in List 2 and List 3 of Table 1, Unregulated Contaminant Monitoring Regulation (1999) List, in paragraph (a)(3) of this section, in accordance with the requirements set out in paragraphs (a)(4) and (5) of this section, with one exception: you must sample only at sampling locations specified in Table 1. You must send the samples to one of the laboratories approved under paragraph (G), this section. You are also responsible for reporting these results as required in § 141.35.

(iii) *Small systems.* If your system serves 10,000 or fewer persons, you must collect samples in accordance with the instructions sent to you by the EPA or State, or, if informed by the EPA or State that the EPA or State will collect the sample, you must assist the State or EPA in identifying the appropriate sampling locations and in taking the samples. EPA will report the results to you and the State.

* * * * *

(b) * * *

(1) * * *

(ix) *Revise system's treatment plant location(s) to include latitude and longitude.* For reporting to the Safe Drinking Water Information System, EPA already requires reporting of either the latitude and longitude or the street address for the treatment plant location. If the State enters into an MOA, the State must report each system's treatment plant location(s) as latitude and longitude (in addition to street address, if previously reported) by the time of the system's reporting of Assessment Monitoring results to the National Drinking Water Contaminant Occurrence Database. The State may use the latitude and longitude of facilities related to the public water system on the same site, or closely adjacent to the same site as the treatment plant, such as the latitude and longitude of the intake or wellhead/field or the entry point to the distribution system, if such measurements are available.

* * * * *

Appendix A to § 141.40—Quality Control Requirements for Testing All Samples Collected

* * * * *

(2) Detection Limit. Calculate the laboratory detection limit for each contaminant in Table 1, Unregulated Contaminant Monitoring Regulation (1999) List, of paragraph (a)(3) of this section using the appropriate procedure in the specified method with the exception that the contaminant concentration used to fortify reagent water must be less than or equal to the minimum reporting level (MRL) for the contaminants as specified in column 4, Table 1, UCMR (1999) List, in paragraph (a)(3) of this section. The calculated detection limit is equal to the standard deviation times the Student's t value for 99% confidence level with n-1 degrees of freedom. (The detection limit must be less than or equal to one-half of the MRL.)

* * * * *

(9) Detection Confirmation. Confirm any chemical contaminant analyzed using a gas chromatographic method and detected above the MRL, by gas chromatographic/mass spectrometric (GC/MS) methods. If testing resulted in first analyzing the sample extracts via specified gas chromatographic methods, an initial confirmation by a second column dissimilar to the primary column may be performed. If the contaminant detection is confirmed by the secondary column, then the contaminant must be reconfirmed by GC/MS using three (3) specified ion peaks for contaminant identification. Use one of the following confirming techniques: perform single point calibration of the GC/MS system for confirmation purposes only as long as the calibration standard is at a concentration within ± 50% of the concentration determined by the initial analysis; or perform a three (3) point calibration with single point daily calibration verification of the GC/MS

system regardless of whether that verification standard concentration is within ± 50% of sample response. If GC/MS analysis confirms the initial contaminant detection, report results determined from the initial analysis.

* * * * *

(11) Method Defined Quality Control. As appropriate to the method's requirements, perform analysis of Laboratory Fortified Blanks and Laboratory Performance Checks as specified in the method. Each method specifies acceptance criteria for these quality control checks.

[FR Doc. 01–59 Filed 1–10–01; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[OPP–301099; FRL–6762–5]

RIN 2070–AB78

Clopyralid; Pesticide Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation amends tolerances for residues of clopyralid (3,6-dichloro-2-pyridinecarboxylic acid) in or on sugar beet roots and sugar beet tops. In addition, this regulation establishes a tolerance for sugar beet molasses. Finally, the established tolerances for barley forage and milled fractions of barley, oats and wheat are being added back to the tolerance expression for clopyralid after being inadvertently deleted. Dow AgroSciences LLC requested this tolerance under the Federal Food, Drug, and Cosmetic Act, as amended by the Food Quality Protection Act of 1996.

DATES: This regulation is effective January 11, 2001. Objections and requests for hearings, identified by docket control number OPP–301099, must be received by EPA on or before March 12, 2001.

ADDRESSES: Written objections and hearing requests may be submitted by mail, in person, or by courier. Please follow the detailed instructions for each method as provided in Unit VI. of the **SUPPLEMENTARY INFORMATION.** To ensure proper receipt by EPA, your objections and hearing requests must identify docket control number OPP–301099 in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: By mail: Joanne I. Miller, Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW.,Washington, DC 20460; telephone number: (703) 305–6224; and e-mail address: miller.joanne@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected categories and entities may include, but are not limited to:

Categories	NAICS codes	Examples of potentially affected entities
Industry	111 112 311 32532	Crop production Animal production Food manufacturing Pesticide manufacturing

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action might apply to certain entities. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT.**

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select ''Laws and Regulations'', ''Regulations and Proposed Rules,'' and then look up the entry for this document under the ''**Federal Register**—Environmental Documents.'' You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/. To access the OPPTS Harmonized Guidelines referenced in this document, go directly to the guidelines at http://www.epa.gov/opptsfrs/home/guidelin.htm.

2. *In person.* The Agency has established an official record for this action under docket control number OPP–301099. The official record consists of the documents specifically referenced in this action, and other information related to this action, including any information claimed as Confidential Business Information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

II. Background and Statutory Findings

In the **Federal Register** of February 9, 1999 (64 FR 6351) (FRL–6058–3), EPA issued a notice pursuant to section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a as amended by the Food Quality Protection Act of 1996 (FQPA) (Public Law 104–170) announcing the filing of a pesticide petition (PP 8F3600) for tolerance by Dow AgroSciences LLC, 9330 Zionsville Road, Indianapolis, IN 46268. This notice included a summary of the petition prepared by Dow AgroSciences LLC, the registrant. There were no comments received in response to the notice of filing.

The petition requested that 40 CFR 180.431 be amended by establishing tolerances for residues of the herbicide clopyralid (3,6-dichloro-2-pyridinecarboxylic acid) in or on sugar beet roots at 2.0 parts per million (ppm), sugar beet tops at 3.0 ppm, and sugar beet molasses at 16.0 ppm.

Section 408(b)(2)(A)(i) of the FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is ''safe.'' Section 408(b)(2)(A)(ii) defines ''safe'' to mean that'' there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.'' This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to ''ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate

exposure to the pesticide chemical residue....''

EPA performs a number of analyses to determine the risks from aggregate exposure to pesticide residues. For further discussion of the regulatory requirements of section 408 and a complete description of the risk assessment process, see the final rule on Bifenthrin Pesticide Tolerances (62 FR 62961, November 26, 1997) (FRL–5754–7).

III. Aggregate Risk Assessment and Determination of Safety

Consistent with section 408(b)(2)(D), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure, consistent with section 408(b)(2), for tolerances for residues of clopyralid (3,6-dichloro-2-pyridinecarboxylic acid) on sugar beet roots at 2.0 ppm, sugar beet tops at 3.0 ppm, and sugar beet molasses at 10.0 ppm. EPA's assessment of exposures and risks associated with establishing the tolerance follows.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered its validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children. The nature of the toxic effects caused by clopyralid are discussed in the following Table 1 as well as the no observed adverse effect level (NOAEL) and the lowest observed adverse effect level (LOAEL) from the toxicity studies reviewed.

TABLE 1.—SUBCHRONIC, CHRONIC, AND OTHER TOXICITY

Guideline No.	Study Type	Results
870.3100	90–Day oral toxicity in mice	NOAEL = 2,000 mg/kg/day in both sexes; LOAEL = 5,000 mg/kg/day in both sexes based on decreased body weight in both sexes.
870.3200	21/28–Day dermal toxicity in rabbits	NOAEL ≥1,000 mg/kg/day for both sexes.
870.3250	90–Day dermal toxicity in rats	NA[1]
870.3465	90–Day inhalation toxicity in rats	NA
870.3700a	Prenatal developmental toxicity in rats	Maternal NOAEL = 75 mg/kg/day; LOAEL = 250 mg/kg/day based on mortality, reduced body weight gains and reduced food consumption; Developmental NOAEL ≥250 mg/kg/day
870.3700b	Prenatal developmental toxicity in rabbits	Maternal NOAEL = 110 mg/kg/day; LOAEL = 250 mg /kg/day based on mortality, clinical signs, decreased body weight gains, and lesions of the gastric mucosa; Developmental NOAEL = 110 mg/kg/day; LOAEL = 250 mg/kg/day based on decreased fetal body weight and hydrocephalus
870.3800	Reproduction and fertility effects in rats	Parental/Systemic NOAEL = 500 mg/kg/day for males and females; LOAEL = 1,500 mg/kg/day for males and females based on decreased body weights, decreased weight gain, and decreased food consumption in both sexes and slight focal hyperkeratotic changes in gastric squamous mucosa in males; Reproductive/Offspring NOAEL = 500 mg/kg/day for males and females; LOAEL = 1,500 mg/kg/day for males and females based on reduced pup weights in males and increased relative liver weight in pups of both sexes.
870.4100b	Chronic toxicity in dogs	NOAEL = 100 mg/kg/day in males and females. LOAEL = 320 mg/kg/day based upon reduction in hematological parameters in both sexes, increased absolute liver weight in males, and vacuolated adrenal cortical cells in females.
870.4300	Combined Chronic Toxicity/Carcinogenicity in rats	NOAEL = 15 mg/kg/day in males and females; LOAEL = 150 mg/kg/day based on epithelial hyperplasia and thickening of the limiting ridge of the stomach in both sexes. No evidence of carcinogenicity
870.4200b	Carcinogenicity in mice	NOAEL = 500 mg/kg/day in males and ≥2,000 mg/kg/day in females; LOAEL = 2,000 mg/kg/day in males based on decreased body weight, body weight gains, and food efficiency no evidence of carcinogenicity.
870.5300	*in vitro* and *in vivo* host mediated assay in bacteria	No evidence of induced mutant colonies over background in *Salmonella*strains TA 1,530 and G–46 and *Saccharomyces*strain D–3
870.5385	bone marrow chromosome aberrations assay	There was no significant increase in the frequency of chromosome aberrations in bone marrow at any dose tested.
870.5550	*in vitro* unscheduled DNA synthesis assay	There was no evidence of unscheduled DNA synthesis in initial or supplementary assays.

TABLE 1.—SUBCHRONIC, CHRONIC, AND OTHER TOXICITY—Continued

Guideline No.	Study Type	Results
870.5450	dominant lethal assay in rats.	No evidence of treatment related resorptions up to 400 mg/kg/day for 5 days.
870.6200a	Acute neurotoxicity screening battery in rats	NA
870.6200b	Subchronic neurotoxicity screening battery in rats	NA
870.6300	Developmental neurotoxicity in rats	NA
870.7485	Metabolism in rats	Rapidly absorbed and excreted mainly in the urine. Parent compound only is detected in the excreta.
870.7600	Dermal penetration	NA

[1]Not Applicable

B. Toxicological Endpoints

The dose at which no adverse effects are observed (the NOAEL) from the toxicology study identified as appropriate for use in risk assessment is used to estimate the toxicological level of concern (LOC). However, the lowest dose at which adverse effects of concern are identified (the LOAEL) is sometimes used for risk assessment if no NOAEL was achieved in the toxicology study selected. An uncertainty factor (UF) is applied to reflect uncertainties inherent in the extrapolation from laboratory animal data to humans and in the variations in sensitivity among members of the human population as well as other unknowns. An UF of 100 is routinely used, 10X to account for interspecies differences and 10X for intraspecies differences.

For dietary risk assessment (other than cancer) the Agency uses the UF to calculate an acute or chronic reference dose (acute RfD or chronic RfD) where the RfD is equal to the NOAEL divided by the appropriate UF (RfD = NOAEL/UF). Where an additional safety factor is retained due to concerns unique to the FQPA, this additional factor is applied to the RfD by dividing the RfD by such additional factor. The acute or chronic Population Adjusted Dose (aPAD or cPAD) is a modification of the RfD to accommodate this type of FQPA Safety Factor.

For non-dietary risk assessments (other than cancer) the UF is used to determine the LOC. For example, when 100 is the appropriate UF (10X to account for interspecies differences and 10X for intraspecies differences) the LOC is 100. To estimate risk, a ratio of the NOAEL to exposures (margin of exposure (MOE) = NOAEL/exposure) is calculated and compared to the LOC.

The linear default risk methodology (Q^*) is the primary method currently used by the Agency to quantify carcinogenic risk. The Q^* approach assumes that any amount of exposure will lead to some degree of cancer risk. A Q^* is calculated and used to estimate risk which represents a probability of occurrence of additional cancer cases (e.g., risk is expressed as 1×10^{-6} or one in a million). Under certain specific circumstances, MOE calculations will be used for the carcinogenic risk assessment. In this non-linear approach, a ''point of departure'' is identified below which carcinogenic effects are not expected. The point of departure is typically a NOAEL based on an endpoint related to cancer effects though it may be a different value derived from the dose response curve. To estimate risk, a ratio of the point of departure to exposure (MOE_{cancer} = point of departure/exposures) is calculated. A summary of the toxicological endpoints for clopyralid used for human risk assessment is shown in the following Table 2:

TABLE 2.—SUMMARY OF TOXICOLOGICAL DOSE AND ENDPOINTS FOR CLOPYRALID FOR USE IN HUMAN RISK ASSESSMENT

Exposure Scenario	Dose Used in Risk Assessment, UF	FQPA SF* and Level of Concern for Risk Assessment	Study and Toxicological Effects
Acute Dietary general population including infants and children	NOAEL = 75 mg ai/kg/day; UF = 100; Acute RfD = 0.75 mg ai/ kg/day	FQPA SF = 3X; aPAD = acute RfD/FQPA SF = 0.25 mg/kg/day	Developmental Toxicity Study - rat; Maternal LOAEL = 250 mg ai/kg/day based on decreased weight gain during gestation days 6–9.
Chronic Dietary all populations	NOAEL= 15 mg ai/kg/day; UF = 100; Chronic RfD = 0.15 mg/kg/day	FQPA SF = 3X; cPAD = chronic RfD/FQPA SF = 0.05 mg/kg/day	2–Year Chronic Toxicity/Carcinogenicity Study - rat; LOAEL = 150 mg ai/kg/day based on increased epithelial hyperplasia and thickening of the limiting ridge of the stomach in both sexes.

TABLE 2.—SUMMARY OF TOXICOLOGICAL DOSE AND ENDPOINTS FOR CLOPYRALID FOR USE IN HUMAN RISK ASSESSMENT—Continued

Exposure Scenario	Dose Used in Risk Assessment, UF	FQPA SF* and Level of Concern for Risk Assessment	Study and Toxicological Effects
Short-Term (1–7 days) and Intermediate-Term (1 week - several months) Dermal (Occupational/Residential).	none	No systemic toxicity was seen at the limit dose (1,000 mg/kg/day) in the 21–day dermal toxicity study in rabbits. This risk assessment is not required.	NA
Short-Term (1–7 days) and Intermediate-Term (1 week - several months) Inhalation (Occupational/Residential)	NOAEL= 75 mg ai/kg/day (inhalation absorption rate = 100%)	LOC for MOE = 100 (Occupational); LOC for MOE = 300 (Residential)	Developmental Toxicity Study - rat; Maternal LOAEL = 250 mg ai/kg/day based on decreased body weight gain
Cancer (oral, dermal, inhalation)	''not likely''	NA	Acceptable oral rat and mouse carcinogenicity studies; no evidence of carcinogenic or mutagenic potential.

UF = uncertainty factor, FQPA SF = FQPA safety factor, NOAEL = no observed adverse effect level, LOAEL = lowest observed adverse effect level, PAD = population adjusted dose (a = acute, c = chronic), RfD = reference dose, MOE = margin of exposure, LOC = level of concern.
*The reference to the FQPA Safety Factor refers to any additional safety factor retained of concerns unique to the FQPA.

C. Exposure Assessment

1. *Dietary exposure from food and feed uses.* Tolerances have been established (40 CFR 180.431) for the residues of clopyralid, in or on a variety of raw agricultural commodities. Risk assessments were conducted by EPA to assess dietary exposures from clopyralid (3,6-dichloro-2-pyridinecarboxylic acid) in food as follows:

i. *Acute exposure.* Acute dietary risk assessments are performed for a food-use pesticide if a toxicological study has indicated the possibility of an effect of concern occurring as a result of a one day or single exposure. The Dietary Exposure Evaluation Model (DEEM®) analysis evaluated the individual food consumption as reported by respondents in the USDA 1989–1992 nationwide Continuing Surveys of Food Intake by Individuals (CSFII) and accumulated exposure to the chemical for each commodity. The following assumptions were made for the acute exposure assessments: For all commodities, 100% crop treated was assumed and those residues will be at the level of the tolerance (with one exception: refined sugar from sugar-beet). The above assumptions result in an overestimate of human dietary exposure. All Section 18 tolerances (canola, cranberries, flax seed, peaches, and nectarines) are included in this dietary risk assessment. With the exception of sugar beets, default processing factors were used for processed commodities. The empirical processing factor of 0.1X was used for sugar-beet representing the 10-fold reduction in residues for refined sugar. The aPAD for the U.S. population is 0.25 mg/kg/day. For acute dietary risk estimates, the level of concern is >100% aPAD. The population subgroup with the highest dietary exposure from food is children 1–6 years. The percentage of dietary exposure for this subgroup is 13% of the aPAD. The acute dietary risk estimates from residues in food which result from the established and proposed uses of clopyralid are below the level of concern for the U.S. population and all population subgroups.

ii. *Chronic exposure.* In conducting this chronic dietary risk assessment the Dietary Exposure Evaluation Model (DEEM) analysis evaluated the individual food consumption as reported by respondents in the USDA 1989–1992 nationwide Continuing Surveys of Food Intake by Individuals (CSFII) and accumulated exposure to the chemical for each commodity. The following assumptions were made for the chronic exposure assessments: For all commodities, 100% crop treated was assumed and those residues will be at the level of the tolerance (with one exception: refined sugar from sugar-beet). The empirical processing factor of 0.1X was used for sugar-beet representing the 10-fold reduction in residues for refined sugar. The cPAD for the general U.S. population and all subgroups is 0.05 mg/kg/day. For chronic dietary risk estimates, the Agency's level of concern is greater than 100% of the cPAD. The subgroup with the highest chronic dietary exposure from food is children 1–6 years. The percentage of dietary exposure for this subgroup is 34% of the cPAD. The chronic dietary risk estimates from residues in food resulting from the established and proposed uses of clopyralid are below the Agency's level of concern for the U.S. population and all population subgroups.

iii. *Cancer.* The Agency concluded that clopyralid was negative for carcinogenic potential in mice and rats and classified clopyralid as ''not likely'' to be a human carcinogen. Therefore, a cancer dietary exposure analysis was not performed.

iv. *Anticipated residue and percent crop treated information.* Section 408(b)(2)(E) authorizes EPA to use available data and information on the anticipated residue levels of pesticide residues in food and the actual levels of pesticide chemicals that have been measured in food. If EPA relies on such information, EPA must require that data be provided 5 years after the tolerance is established, modified, or left in effect, demonstrating that the levels in food are not above the levels anticipated. Following the initial data submission, EPA is authorized to require similar data on a time frame it deems appropriate. As required by section 408(b)(2)(E), EPA will issue a data call-in for information relating to anticipated residues to be submitted no later than 5 years from the date of issuance of this tolerance.

2. *Dietary exposure from drinking water.* The Agency lacks sufficient monitoring exposure data to complete a comprehensive dietary exposure analysis and risk assessment for clopyralid in drinking water. Because the Agency does not have comprehensive monitoring data,

drinking water concentration estimates are made by reliance on simulation or modeling taking into account data on the physical characteristics of clopyralid.

The Agency uses the Generic Estimated Environmental Concentration (GENEEC) or the Pesticide Root Zone/ Exposure Analysis Modeling System (PRZM/EXAMS) to estimate pesticide concentrations in surface water and SCI-GROW, which predicts pesticide concentrations in groundwater. In general, EPA will use GENEEC (a tier 1 model) before using PRZM/EXAMS (a tier 2 model) for a screening-level assessment for surface water. The GENEEC model is a subset of the PRZM/ EXAMS model that uses a specific high-end runoff scenario for pesticides. GENEEC incorporates a farm pond scenario, while PRZM/EXAMS incorporate an index reservoir environment in place of the previous pond scenario. The PRZM/EXAMS model includes a percent crop area factor as an adjustment to account for the maximum percent crop coverage within a watershed or drainage basin.

None of these models include consideration of the impact processing (mixing, dilution, or treatment) of raw water for distribution as drinking water would likely have on the removal of pesticides from the source water. The primary use of these models by the Agency at this stage is to provide a coarse screen for sorting out pesticides for which it is highly unlikely that drinking water concentrations would ever exceed human health levels of concern.

Since the models used are considered to be screening tools in the risk assessment process, the Agency does not use estimated environmental concentrations (EECs) from these models to quantify drinking water exposure and risk as a %RfD or %PAD. Instead, drinking water levels of comparison (DWLOCs) are calculated and used as a point of comparison against the model estimates of a pesticide's concentration in water. DWLOCs are theoretical upper limits on a pesticide's concentration in drinking water in light of total aggregate exposure to a pesticide in food, and from residential uses. Since DWLOCs address total aggregate exposure to clopyralid they are further discussed in the aggregate risk sections below.

Based on the GENEEC and SCI-GROW models the estimated environmental concentrations (EECs) of clopyralid for acute exposures are estimated to be 27.0 parts per billion (ppb) for surface water and 9.7 ppb for ground water. The EECs for chronic exposures are estimated to be 9 ppb for surface water, (based on a 56–day concentration of 27 ppb and a 3x adjustment factor allowed by Agency policy for 56–day GENEEC values) and 9.7 ppb for ground water.

3. *From non-dietary exposure*. The term ''residential exposure'' is used in this document to refer to non-occupational, non-dietary exposure (e.g., for lawn and garden pest control, indoor pest control, termiticides, and flea and tick control on pets).

Clopyralid is currently registered for use on the following residential non-dietary sites: Turf and ornamentals (including golf courses). The risk assessment was conducted using the following residential exposure assumptions: the 75 mg/kg/day NOAEL was used in the inhalation, short-term, and intermediate-term hand-to-mouth, and episodic granular ingestion risk assessments of the residential exposure. As no dermal endpoint was selected, a dermal risk assessment was not required for residential exposure. For residential oral and inhalation risk assessments, the target margin of exposure (MOE) was 300, which incorporates the FQPA Safety Factor of 3x. MOEs calculated for residential handler's inhalation exposure and children's oral exposures were well above the target of 300; and therefore, do not exceed the Agency's level of concern.

4. *Cumulative exposure to substances with a common mechanism of toxicity*. Section 408(b)(2)(D)(v) requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider ''available information'' concerning the cumulative effects of a particular pesticide's residues and ''other substances that have a common mechanism of toxicity.''

EPA does not have, at this time, available data to determine whether clopyralid has a common mechanism of toxicity with other substances or how to include this pesticide in a cumulative risk assessment. Unlike other pesticides for which EPA has followed a cumulative risk approach based on a common mechanism of toxicity, clopyralid does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has not assumed that clopyralid has a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see the final rule for Bifenthrin Pesticide Tolerances (62 FR 62961, November 26, 1997).

D. Safety Factor for Infants and Children

1. *In general*. FFDCA section 408 provides that EPA shall apply an additional tenfold margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the data base on toxicity and exposure unless EPA determines that a different margin of safety will be safe for infants and children. Margins of safety are incorporated into EPA risk assessments either directly through use of a margin of exposure (MOE) analysis or through using uncertainty (safety) factors in calculating a dose level that poses no appreciable risk to humans.

2. *Prenatal and postnatal sensitivity*. No increased quantitative or qualitative susceptibility was seen following pre- and/or post-natal exposures. In rabbit and rat developmental toxicity studies, the effects seen in fetuses are at dose levels equal to or greater than doses where maternal toxicity is seen. In a 2-generation reproductive toxicity study in rats, the effects seen in offspring were at dose levels equal to or greater than doses where parental toxicity is seen.

3. *Conclusion*. EPA determined that an additional factor to protect infants and children was appropriate because of a data gap for a developmental neurotoxicity study in rats. This study was required due to the concern for malformations (hydrocephalus) seen in the prenatal developmental toxicity study in rabbits; EPA decided on an additional factor of 3 rather than the statutory default factor of 10 because the existing toxicology database, which is complete except for the newly required developmental neurotoxicity study, revealed no quantitative or qualitative evidence of increased susceptibility following *in utero* exposure to rats and rabbits and/or following prenatal/ postnatal exposure to rats; and dietary (food and drinking water) and residential exposure assessments will not underestimate the potential exposures for infants, children, and/or women of childbearing age from the use of clopyralid.

E. Aggregate Risks and Determination of Safety

To estimate total aggregate exposure to a pesticide from food, drinking water, and residential uses, the Agency calculates DWLOCs which are used as a point of comparison against the model estimates of a pesticide's concentration in water (EECs). DWLOC values are not regulatory standards for drinking water. DWLOCs are theoretical upper limits on

a pesticide's concentration in drinking water in light of total aggregate exposure to a pesticide in food and residential uses. In calculating a DWLOC, the Agency determines how much of the acceptable exposure (i.e., the PAD) is available for exposure through drinking water e.g., allowable chronic water exposure (mg/kg/day) = cPAD - (average food + residential exposure). This allowable exposure through drinking water is used to calculate a DWLOC.

A DWLOC will vary depending on the toxic endpoint, drinking water consumption, and body weights. Default body weights and consumption values as used by the USEPA Office of Water are used to calculate DWLOCs: 2L/70 kg (adult male), 2L/60 kg (adult female), and 1L/10 kg (child). Default body weights and drinking water consumption values vary on an individual basis. This variation will be taken into account in more refined screening-level and quantitative drinking water exposure assessments. Different populations will have different DWLOCs. Generally, a DWLOC is calculated for each type of risk assessment used: acute, short-term, intermediate-term, chronic, and cancer.

When EECs for surface water and groundwater are less than the calculated DWLOCs, OPP concludes with reasonable certainty that exposures to the pesticide in drinking water (when considered along with other sources of exposure for which OPP has reliable data) would not result in unacceptable levels of aggregate human health risk at this time. Because OPP considers the aggregate risk resulting from multiple exposure pathways associated with a pesticide's uses, levels of comparison in drinking water may vary as those uses change. If new uses are added in the future, OPP will reassess the potential impacts of residues of the pesticide in drinking water as a part of the aggregate risk assessment process.

1. *Acute risk.* Using the exposure assumptions discussed in this unit for acute exposure, the acute dietary exposure from food to clopyralid will occupy 8% of the aPAD for the U.S. population, 5% of the aPAD for females 13–50 years, 9% of the aPAD for all infants <1 year and 13% of the aPAD for children between 1 and 6 years old. In addition, there is potential for acute dietary exposure to clopyralid in drinking water. After calculating DWLOCs and comparing them to the EECs for surface and ground water, EPA does not expect the aggregate exposure to exceed 100% of the aPAD, as shown in the following Table 3:

TABLE 3.—AGGREGATE RISK ASSESSMENT FOR ACUTE EXPOSURE TO CLOPYRALID

Population Subgroup	aPAD (mg/kg)	%aPAD (Food)	Surface Water EEC (ppb)	Ground Water EEC (ppb)	Acute DWLOC (ppb)
U.S. Population	0.25	8	9	9.7	8,100
All infants (< 1 year)	0.25	9	9	9.7	2,300
Children 1–6 years	0.25	13	9	9.7	2,200
Females 13–50 years	0.25	5	9	9.7	7,200

2. *Chronic risk.* Using the exposure assumptions described in this unit for chronic exposure, EPA has concluded that exposure to clopyralid from food will utilize 14% of the cPAD for the U.S. population, 11% of the cPAD for all infants < 1 year and 34% of the cPAD for children between 1 and 6 years old. Based on the use pattern, chronic residential exposure to residues of clopyralid is not expected. In addition, there is potential for chronic dietary exposure to clopyralid in drinking water. After calculating DWLOCs and comparing them to the EECs for surface and ground water, EPA does not expect the aggregate exposure to exceed 100% of the cPAD, as shown in the following Table 4:

TABLE 4.—AGGREGATE RISK ASSESSMENT FOR CHRONIC (NON-CANCER) EXPOSURE TO CLOPYRALID

Population Subgroup	cPAD mg/kg/day	% cPAD (Food)	Surface Water EEC (ppb)	Ground Water EEC (ppb)	Chronic DWLOC (ppb)
U.S. Population	0.05	14	9	9.7	1,500
All infants (< 1 year)	0.05	11	9	9.7	450
Children 1–6 years	0.05	34	9	9.7	330
Females 13–50 years	0.05	11	9	9.7	1,300

3. *Short-term risk.* Short-term aggregate exposure takes into account residential exposure plus chronic exposure to food and water (considered to be a background exposure level).

Clopyralid is currently registered for use that could result in short-term residential exposure and the Agency has determined that it is appropriate to aggregate chronic food and water and short-term exposures for clopyralid.

Using the exposure assumptions described in this unit for short-term exposures, EPA has concluded that food and residential exposures aggregated result in aggregate MOEs of 10,000 (U.S. population, food and residential), 14,000 (females 13–50, food and residential) and 3,100 (children 1–6 years old, food and residential). These aggregate MOEs do not exceed the Agency's level of concern for aggregate exposure to food and residential uses. In addition, short-term DWLOCs were calculated and compared to the EECs for chronic exposure of clopyralid in ground and surface water. After calculating DWLOCs and comparing them to the EECs for surface and ground water, EPA does not expect short-term aggregate exposure to exceed the Agency's level of concern, as shown in the following Table 5:

TABLE 5.—AGGREGATE RISK ASSESSMENT FOR SHORT-TERM EXPOSURE TO CLOPYRALID

Population Subgroup	Aggregate MOE (Food + Residential)	Aggregate Level of Concern (LOC)	Surface Water EEC (ppb)	Ground Water EEC (ppb)	Short-Term DWLOC (ppb)
U.S. Population	10,000	300	9	9.7	8,500
Females 13–50	14,000	300	9	9.7	7,300
Children 1–6 years	3,100	300	9	9.7	2,300

4. *Intermediate-term risk*. Intermediate-term aggregate exposure takes into account residential exposure plus chronic exposure to food and water (considered to be a background exposure level).

Clopyralid is currently registered for use(s) that could result in intermediate-term residential exposure and the Agency has determined that it is appropriate to aggregate chronic food and water and intermediate-term exposures for clopyralid.

Using the exposure assumptions described in this unit for intermediate-term exposures, EPA has concluded that food and residential exposures aggregated result in aggregate MOEs of 10,000 (U.S. Population, food only), 14,000 (females 13–50, food only) and 3,800 (children 1–6 years, food and residential). These aggregate MOEs do not exceed the Agency's level of concern for aggregate exposure to food and residential uses. In addition, intermediate-term DWLOCs were calculated and compared to the EECs for chronic exposure of clopyralid in ground and surface water. After calculating DWLOCs and comparing them to the EECs for surface and ground water, EPA does not expect intermediate-term aggregate exposure to exceed the Agency's level of concern, as shown in the following Table 6:

TABLE 6.—AGGREGATE AGGREGATE RISK ASSESSMENT FOR INTERMEDIATE-TERM EXPOSURE TO CLOPYRALID

Population Subgroup	Aggregate MOE (Food + Residential)	Aggregate Level of Concern (LOC)	Surface Water EEC (ppb)	Ground Water EEC (ppb)	Inter-mediate-Term DWLOC (ppb)
U.S. Population	10,000	300	9	9.7	8,500
Females 13–50	14,000	300	9	9.7	7,300
Children 1–6 years	3,800	300	9	9.7	2,300

5. *Aggregate cancer risk for U.S. population*. The Agency concluded that clopyralid was negative for carcinogenicity potential in rats and mice and classified clopyralid as ''not likely'' to be a human carcinogen according to EPA Draft Guidelines for Carcinogen Risk Assessment. Therefore, a cancer risk assessment was not performed.

6. *Determination of safety*. Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general population, and to infants and children from aggregate exposure to clopyralid residues.

IV. Other Considerations

A. Analytical Enforcement Methodology

An adequate residue analytical method is available for enforcement of the proposed tolerances. This method, ACR 75.6, determines clopyralid as the methyl ester by gas chromatography using electron capture detection. This method has been successfully validated by the Biological and Economic Analysis Division's (BEAD) Analytical Chemistry Branch and has been published in FDA's Pesticide Analytical Manual, Vol-II (PAM II).

An adequate residue analytical method is also available for the enforcement of the proposed tolerance on animal commodities. This method, ACR 86.1, determines clopyralid as the methyl ester by gas chromatography using electron capture detection. This method has been successfully validated by BEAD's Analytical Chemistry Branch and has been published in FDA's Pesticide Analytical Manual, Vol-II (PAM II).

B. International Residue Limits

There are no Codex or Mexican maximum residue limits (MRLs). Canada has set a maximum residue limit of 2.0 ppm for barley, oats, and wheat, and 7.0 ppm for the milled fractions of barley, oats, and wheat (excluding flour).

C. Conditions

A revised label is needed to specify (1) a 48–hour restricted entry interval, and (2) whether plantback intervals for crops not listed in the crop rotation table will be 10.5 months or whether rotation to crops not listed will be prohibited. As a condition of registration, the registrant also needs to submit a developmental neurotoxicity study (870.6300) because neuropathology or central nervous system malformations were seen in the rabbit developmental toxicity study.

V. Conclusion

Therefore, tolerances are amended for residues of clopyralid (3,6-dichloro-2-pyridinecarboxylic acid), in or on sugar beet roots at 2.0 ppm and sugar beet tops at 3.0. In addition, a tolerance is established for residues of clopyralid in or on sugar beet molasses at 10 ppm. Finally, the established tolerances for barley forage at 9 ppm and milled fractions (except flour) of barley, oats and wheat at 12 ppm are being added back to the tolerance expression for clopyralid after being inadvertently deleted.

VI. Objections and Hearing Requests

Under section 408(g) of the FFDCA, as amended by the FQPA, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. The EPA procedural regulations which govern the submission of objections and requests for hearings appear in 40 CFR part 178. Although the procedures in those regulations require some modification to

reflect the amendments made to the FFDCA by the FQPA of 1996, EPA will continue to use those procedures, with appropriate adjustments, until the necessary modifications can be made. The new section 408(g) provides essentially the same process for persons to ''object'' to a regulation for an exemption from the requirement of a tolerance issued by EPA under new section 408(d), as was provided in the old FFDCA sections 408 and 409. However, the period for filing objections is now 60 days, rather than 30 days.

A. What Do I Need to Do to File an Objection or Request a Hearing?

You must file your objection or request a hearing on this regulation in accordance with the instructions provided in this unit and in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket control number OPP–301099 in the subject line on the first page of your submission. All requests must be in writing, and must be mailed or delivered to the Hearing Clerk on or before March 12, 2001.

1. *Filing the request.* Your objection must specify the specific provisions in the regulation that you object to, and the grounds for the objections (40 CFR 178.25). If a hearing is requested, the objections must include a statement of the factual issues(s) on which a hearing is requested, the requestor's contentions on such issues, and a summary of any evidence relied upon by the objector (40 CFR 178.27). Information submitted in connection with an objection or hearing request may be claimed confidential by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the information that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice.

Mail your written request to: Office of the Hearing Clerk (1900), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460. You may also deliver your request to the Office of the Hearing Clerk in Rm. C400, Waterside Mall, 401 M St., SW., Washington, DC 20460. The Office of the Hearing Clerk is open from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Office of the Hearing Clerk is (202) 260–4865.

2. *Tolerance fee payment.* If you file an objection or request a hearing, you must also pay the fee prescribed by 40 CFR 180.33(i) or request a waiver of that fee pursuant to 40 CFR 180.33(m). You must mail the fee to: EPA Headquarters Accounting Operations Branch, Office of Pesticide Programs, P.O. Box 360277M, Pittsburgh, PA 15251. Please identify the fee submission by labeling it ''Tolerance Petition Fees.''

EPA is authorized to waive any fee requirement ''when in the judgement of the Administrator such a waiver or refund is equitable and not contrary to the purpose of this subsection.'' For additional information regarding the waiver of these fees, you may contact James Tompkins by phone at (703) 305–5697, by e-mail at tompkins.jim@epa.gov, or by mailing a request for information to Mr. Tompkins at Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

If you would like to request a waiver of the tolerance objection fees, you must mail your request for such a waiver to: James Hollins, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

3. *Copies for the Docket.* In addition to filing an objection or hearing request with the Hearing Clerk as described in Unit VI.A., you should also send a copy of your request to the PIRIB for its inclusion in the official record that is described in Unit I.B.2. Mail your copies, identified by docket control number OPP–301099, to: Public Information and Records Integrity Branch, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460. In person or by courier, bring a copy to the location of the PIRIB described in Unit I.B.2. You may also send an electronic copy of your request via e-mail to: opp-docket@epa.gov. Please use an ASCII file format and avoid the use of special characters and any form of encryption. Copies of electronic objections and hearing requests will also be accepted on disks in WordPerfect 6.1/8.0 or ASCII file format. Do not include any CBI in your electronic copy. You may also submit an electronic copy of your request at many Federal Depository Libraries.

B. When Will the Agency Grant a Request for a Hearing?

A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issues(s) in the manner sought by the requestor would be adequate to justify the action requested (40 CFR 178.32).

VII. Regulatory Assessment Requirements

This final rule establishes a tolerance under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled *Regulatory Planning and Review*(58 FR 51735, October 4, 1993). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, or impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104–4). Nor does it require any prior consultation as specified by Executive Order 13084, entitled *Consultation and Coordination with Indian Tribal Governments* (63 FR 27655, May 19, 1998); special considerations as required by Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994); or require OMB review or any Agency action under Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997). This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104–113, section 12(d) (15 U.S.C. 272 note). Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) do not apply. In addition, the Agency has determined that this action will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999). Executive Order 13132 requires

EPA to develop an accountable process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' ''Policies that have federalism implications'' is defined in the Executive Order to include regulations that have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.'' This final rule directly regulates growers, food processors, food handlers and food retailers, not States. This action does not alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4).

VIII. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this final rule in the **Federal Register**. This final rule is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: December 26, 2000.

James Jones,

Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346(a) and 371.

2. Section 180.431 is amended by removing the entries for ''sugar beet roots'' and ''sugar beet tops'' and alphabetically adding commodities to the table in paragraph (a) to read as follows:

§ 180.431 Clopyralid; tolerances for residues.

(a) * * *

Commodity	Parts per million
* * * * *	
Barley, forage	9.0
* * * * *	
Barley, milled fractions (except flour)	12
* * * * *	
Beet, sugar, molasses	10
Beet, sugar, roots	2.0
Beet, sugar, tops	3.0
* * * * *	
Oats, milled fractions (except flour)	12
* * * * *	
Wheat, milled fractions (except flour)	12

* * * * *

42 CFR Part 435

[HCFA–2086–F]

RIN 0938–AJ96

Medicaid Program; Change in Application of Federal Financial Participation Limits

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: This final rule changes the current requirement that limits on Federal Financial Participation (FFP) must be applied before States use less restrictive income methodologies than those used by related cash assistance programs in determining eligibility for Medicaid. This change was originally published as a proposed rule on October 31, 2000 (65 FR 64919).

This regulatory change is necessary because the current regulatory interpretation of how the FFP limits apply to income methodologies under section 1902(r)(2) of the Social Security Act (the Act) unnecessarily restricts States' ability to take advantage of the authority to use less restrictive income methodologies under that section of the statute. While the enactment of section 1902(r)(2) of the Act could be read in the limited manner embodied in current regulations the statute does not require such a reading, and subsequent State experience with implementing section 1902(r)(2)of the Act calls into question the current regulation's approach.

EFFECTIVE DATE: These regulations are effective on March 12, 2001.

FOR FURTHER INFORMATION CONTACT: Roy Trudel, (410) 786–3417.

SUPPLEMENTARY INFORMATION: Generally, in determining financial eligibility of individuals for the Medicaid program, State agencies must apply the financial methodologies and requirements of the cash assistance program that is most closely categorically related to the individual's status. Our regulations at 42 CFR 435.601 set forth the requirements for State agencies applying less restrictive income and resource methodologies when determining Medicaid eligibility under the authority of section 1902(r)(2) of the Social Security Act (the Act). Current regulations at 42 CFR 435.1007 provide that when States use less restrictive income and resource methodologies under section 1902(r)(2), the limits on Federal Financial Participation (FFP) in section 1903(f) of the Act apply before application of any less restrictive income methodologies. We are amending that regulation to change this requirement so that the 133⅓ percent FFP limit contained in section 1903(f)(1) of the Social Security Act would apply after application of any less restrictive income methodologies under section 1902(r)(2) of the Act.

The adoption of this policy gives States additional flexibility in setting Medicaid eligibility requirements. Also, we believe adoption of this policy reflects the intent of Congress to move the Medicaid program away from cash assistance program rules, as evidenced by enactment of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, which severed the link between the Aid to Families with Dependent Children (AFDC) program and Medicaid.

I. Background

Section 2373(c) of the Deficit Reduction Act of 1984 (DRA) established a moratorium period beginning on October 1, 1981, during which the Secretary was prohibited from taking any compliance, disallowance, penalty, or other regulatory action against a State because a State's Medicaid plan included a standard or methodology for determining financial eligibility for the medically needy that the Secretary determined was less restrictive than the

standard or methodology required under the related cash assistance program.

The provisions of the DRA moratorium were clarified by section 9 of the Medicare and Medicaid Patient Program Protection Act of 1987. Section 9 amended section 2373(c) of DRA to specify that the moratorium applied to the Secretary's compliance, disallowance, penalty, or other regulatory actions against a State because the State plan is determined to be in violation of provisions of the Act for coverage, as optional categorically needy, of certain aged, blind, and disabled individuals who were in institutions or receiving home and community-based services, as well as methodologies for determining financial eligibility of the medically needy.

The moratorium applied to an amendment or other changes in Medicaid State plans, or operation or program manuals, regardless of whether the Secretary had approved, disapproved, acted upon, or not acted upon the amendment or other change, or operation or program manual.

Authority to adopt less restrictive financial methodologies as part of a State's Medicaid plan was added to the law in 1988. Section 303(e) of the Medicare Catastrophic Coverage Act of 1988, enacted on July 1, 1988 (and amended by section 608(d)(16)(C) of the Family Support Act of 1988), amended the Act to permit States to use less restrictive financial methodologies in determining eligibility not only for the medically needy eligibility group at section 1902(a)(10)(C) of the Act, but also for specified categorically needy groups of individuals. These categorically needy groups include qualified pregnant women and children (section 1902(a)(10)(A)(i)(III) of the Act), poverty level pregnant women and infants (section 1902(a)(10)(A)(i)(IV) of the Act), qualified Medicare beneficiaries (section 1905(p) of the Act), all of the optional categorically needy groups specified in section 1902(a)(10)(A)(ii) of the Act, and individuals in States that have elected, under section 1902(f) of the Act, to apply more restrictive eligibility criteria than are used by the Supplemental Security Income (SSI) program. This provision of the Medicare Catastrophic Coverage Act was effective for medical assistance furnished on or after October 1, 1982. This authority was codified in a new section 1902(r)(2) of the Act.

The application of FFP limits prior to the use of more liberal income methodologies under section 1902(r)(2) of the Act was based on the Senate Report accompanying the 1987 amendment to the DRA moratorium (Senate Report No. 109, 100th Congress, 1st session at 24–25) which stated that:

> The moratorium does not eliminate the limits on income and resources of eligible individuals and families under section 1903(f) (including the requirements that the applicable medically needy income level not exceed the amount determined in accordance with standards prescribed by the Secretary to be equivalent to 133⅓ percent of the most generous AFDC eligibility standard, and that the income of individuals receiving a State supplementary payment in a medical institution or receiving home and community-based services under a special income standard not exceed 300% of the SSI standard). The moratorium also does not permit States to provide Medicaid benefits to those who are not ''categorically related'' individuals (that is, individuals who would not be eligible for Medicaid, regardless of the amount of their income and resources)''.

Since, as the legislative history indicates, section 1902(r)(2) of the Act is essentially the codification of the DRA moratorium, we continued to apply the 133⅓ percent FFP limit at section 1903(f)(1) of the Act when developing the implementing regulations for section 1902(r)(2) of the Act.

However, subsequent experience has shown that the policy we adopted restricted the flexibility Congress intended States to have when it enacted section 1902(r)(2) of the Act in ways we did not foresee when we published the current regulations. The real effect of the policy we adopted was to make it almost impossible for States to actually use less restrictive income methodologies for many eligibility groups, including the medically needy, because use of such methodologies would violate the 133⅓ percent FFP limit. States have noted that the application of the 133⅓ percent FFP limit prior to use of less restrictive income methodologies unnecessarily limits their flexibility to provide health coverage under Medicaid and to simplify program administration by modifying cash assistance financial methodologies that do not work well in the Medicaid context.

Further, the passage of Pub. L. 104–193, the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, leads us to believe that the current application of the FFP income limits under section 1902(r)(2) of the Act no longer reflects Congressional intent. In enacting this legislation, Congress clearly expressed its intent that States should have the flexibility to depart from cash assistance program-based income criteria to define Medicaid eligibility. Given that Congress chose to sever the link between cash assistance and Medicaid under this legislation, we believe it is valid to conclude that Congress did not actually intend that FFP limits, which are based on cash assistance standards, apply prior to use of less restrictive financial methodologies under section 1902(r)(2) of the Act for those eligibility groups to which section 1902(r)(2) of the Act applies.

Also, section 1903(f) of the Act was enacted prior to section 1902(r)(2) of the Act. Had Congress intended that the 133⅓ percent FFP limit apply prior to use of less restrictive income methodologies, it could have amended section 1903(f)(1) of the Act or section 1902(r)(2) of the Act to so state. The fact that section 1903(f)(1) of the Act was not so amended indicates that Congress intended that the 133⅓ percent FFP limit apply after, not before, use of less restrictive income methodologies.

Thus, the change in this regulation gives States needed additional flexibility in setting Medicaid eligibility requirements. Even though section 1902(r)(2) of the Act was derived from the DRA moratorium, its own legislative history did not contain any similar discussion of its interaction with the section 1903(f) of the Act FFP limits. As such, we do not believe it is necessary to consider the legislative history of DRA to be determinative of Congressional understanding of the operation of section 1902(r)(2) of the Act.

II. Provisions of the Final Regulations

We are amending § 435.1007 to change the requirement that the 133 ⅓ percent FFP limit applies prior to use of any less restrictive income methodologies under section 1902(r)(2) of the Act.

Section 435.1007 Categorically Needy, Medically Needy, and Qualified Medicare Beneficiaries

In § 435.1007(b), we are deleting the phrase ''does not exceed'' and replace it with the word ''exceeds''. This is purely an editorial and technical change to correct an error in wording in the current regulation which is contrary to statute. This change is necessary in order to conform the regulation to the statute's requirement. This change was explained in the proposed rule. We received no public comments on this change.

In § 435.1007, we are amending paragraph (e) by removing the phrase ''are applied and before the less restrictive income deductions under § 435.601(c)'' and replacing it with the following language: ''and any income disregards in the State plan authorized under section 1902(r)(2)''.

We are further amending § 435.1007 by adding a new paragraph (f) to read: ''A State may use the less restrictive income methodologies included under its State plan as authorized under § 435.601 in determining whether a family's income exceeds the limitation described in paragraph (b) of this section.''

III. Analysis of and Responses to Public Comments

We received a total of 37 comments from States, advocacy groups, associations and a few individuals on the proposed regulation that was published on October 31, 2000 (65 FR 64919). All of the comments we received expressed support for the proposed change. A number chose not to offer any suggestions or other comments beyond an expression of support. Some offered examples, similar to those we included in the preamble to the NPRM, of ways States could use the proposed change to alleviate current problems with their Medicaid programs. These included such things as raising low medically needy income levels, reducing institutional bias, and administrative simplification. We appreciate the overwhelming show of support for the proposed change.

In addition to expressing support for the proposed rule, a number of commenters offered comments on five separate issues concerning the proposed change. Those comments, and our responses, are discussed below.

Comment: One commenter expressed concern that unless changes are also made to a number of subsections of 42 CFR 435, HCFA will not be bound by the proposed policy change. The commenter expressed further concern that unless additional changes are made, States might still be subject to FFP penalties if an individual's income prior to application of the less restrictive methodologies adopted pursuant to section 1902(r)(2) of the Act exceeds the FFP limitation in section 1903(f) of the Act.

Response: We do not agree that additional changes to the regulations are needed. We believe that the proposed change makes it clear that income remaining after application of any less restrictive methodologies adopted pursuant to section 1902(r)(2) of the Act is the income used to determine whether the 133⅓ percent limitation on FFP is exceeded under all circumstances. States will not be subject to FFP penalties because income prior to application of the less restrictive methodologies exceeds the 133⅓ percent limitation in section 1903(f)(1) of the Act. We proposed this change with the express intent that States would not be subject to such FFP penalties, and we believe that the changes adopted here accomplish that goal. We are clearly bound by this regulation as we are bound by all regulations that we promulgate.

Comment: Several commenters urged that the proposed change go into effect as soon as possible; some requested an effective date of January 1, 2001.

Response: We agree that the change should be effective at the earliest possible date. However, this regulation is considered to be a major rule and the statute governing congressional review of agency rulemaking requires that final regulations that are major rules cannot be effective sooner than 60 days after publication in the **Federal Register** unless a showing of good cause to dispense with the notice and public comment procedures that were included in the rule. To make this showing the agency must find that notice and public comment procedures are impracticable, unnecessary, or contrary to the public interest. We do not believe we can satisfy this test since the rule is being adopted after notice and public comment. The effective date of this change is set forth in the Effective Date section of this final rule.

Comment: Several commenters suggested that the preamble be expanded to include such things as a clear explanation and list of the eligibility groups to which the proposed change would apply, a similar list of the groups to which section 1902(r)(2) of the Act applies but which were not subject to the FFP limits under the old regulation, and discussions of steps States can take to make their income eligibility policies more supportive of efforts to integrate people with disabilities in the mainstream of community life. One commenter also suggested providing ongoing guidance on this general subject in a publicly visible place such as the HCFA website.

Response: In general, the new rule applies to all of the optional categorically needy eligibility groups cited in the statute at section 1902(a)(10)(A)(ii) of the Act *except* for those groups which were already exempt from the FFP limits under existing statute (section 1903(f)(4) of the Act). Also, the new rule applies to the medically needy.

We agree that more information about the various topics listed above would be of considerable value to States and other interested parties. However, this final rule is not a technical assistance document, and for that reason we believe that much of the detailed programmatic information and advice suggested by the commenters is best provided through other venues. Rather than include this kind of extensive material regarding more general Medicaid eligibility topics in the preamble to this final rule, we will provide guidance on these and similar issues to States and others through an administrative issuance, such as a letter to all State Medicaid Directors. Administrative guidance issued in such a form would also be available to the public on HCFA's website.

Comment: One commenter suggested that in addition to our proposed revision of the regulations at § 435.1007, we should similarly revise the regulations at § 435.1005 to allow the use of less restrictive income methodologies before applying the FFP limits for the special income level group (section 1902(a)(10)(A)(ii)(V) of the Act). This would enable States to disregard additional income for individuals eligible under this group.

Response: We understand the commenter's interest in not having the FFP limits apply to less restrictive income disregards for the special income level group. However, the Medicaid statute precludes our doing so.

Most of the eligibility groups to which the FFP limits apply are subject to a limit that is defined in section 1903(f)(1)(B)(i) of the Act as 133⅓ percent of the State's AFDC payment standard. The special income level group, however, is subject to a different FFP limit which is defined in section 1903(f)(4)(C) of the Act as 300 percent of the SSI Federal Benefit Rate. Further, this section of the statute includes specific requirements for how a person's income is to be counted in determining whether his or her income exceeds the 300 percent FFP limit. Under the statute, the person's income is determined under section 1612 of the Act, but without regard to the exclusions and disregards listed in subsection 1612(b) of the Act.

In other words, the person's gross income, without the application of any disregards normally used by the SSI program to determine eligibility, must be used to determine whether the person's income exceeds the 300 percent FFP limit. By contrast, the sections of the statute pertaining to the 133⅓ percent FFP limit do not include similar specific requirements for how income is to be counted in determining whether a person's income exceeds the FFP limit.

Because section 1903(f)(4)(C) of the Act specifies how income is to be counted in determining whether a person's income exceeds the 300

percent FFP limit, the statute precludes our being able to permit, via regulation, the use of less restrictive income methodologies prior to application of that FFP limit. The statute itself would have to be changed to permit the use of less restrictive income methodologies in that manner.

Comment: Three commenters suggested that we make the use of less restrictive methodologies mandatory for States rather than their use being optional as is now the case. One commenter further suggested that provision of home and community-based waiver services should also be made mandatory for States.

Response: Use of less restrictive methodologies and provision of home and community-based waiver services is optional for States because the Medicaid statute gives States the choice of using such methodologies and providing such services. Given the language of the statute itself, we have no authority to require through regulations that States use less restrictive methodologies or provide home and community-based waiver services.

IV. Provisions of the Final Regulations

This final rule incorporates in their entirety the provisions of the proposed rule.

V. Collection of Information Requirements

This document does not impose information collection and recordkeeping requirements. Consequently, it need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 35).

VI. Regulatory Impact

A. Overall Impact

We and the Office of Management and Budget have examined the impacts of this rule as required by Executive Order 12866 (September 1993, Regulatory Planning and Review) and the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects ($100 million or more in any one year). This rule is considered to be a major rule with economically significant effects.

The cost impact of this final rule is extremely difficult to project, given the broad discretion and flexibility that States will have in implementing its provisions. In the proposed rule we cited a projected cost to the Federal government of $860 million over 5 years for Medicaid and $100 million for Medicare. As those estimates were based on information from only two States, we solicited feedback on the potential financial impact this rule might have. We received no comments specifically related to cost issues in the responses to the proposed rule; nevertheless, we are providing additional detail concerning the original cost estimates. The table below summarizes our estimated 5-year costs to Medicaid and Medicare.

ESTIMATED COST OF REMOVING FFP LIMITS UNDER SECTION 1902(r)(2) OF THE ACT

(Costs in millions of dollars)

	FFY 2001	FFY 2002	FFY 2003	FFY 2004	FFY 2005	FFYs 2001–2005
Federal Medicaid	40	125	220	230	245	860
State Medicaid	30	100	175	185	190	680
Total Medicaid	70	225	395	415	435	1540
Medicare	10	15	25	25	25	100

As stated in the proposed rule, these estimates were developed from cost information about two States (Utah and California) which expressed interest in using the regulation to expand their Medicaid programs. Estimated costs for these States were related to their aggregate Medicaid spending for the medically needy and projected to the national level assuming that states representing one-fourth of Medicaid expenditures would implement changes of a similar magnitude. The one-fourth assumption was based on our belief that the potential costs of broader expansions would serve to limit State participation, at least during the 5-year budget window. The Medicare cost results from increased payments under the Medicare disproportionate share hospital (DSH) program and results from the anticipated increase in Medicaid enrollment accompanying the Medicaid costs shown above. Projected Medicare DSH cost per Medicaid beneficiary were applied to this increased enrollment to obtain the $100 million 5-year Medicare DSH cost.

Arriving at the Medicaid and Medicare costs was difficult due to the fact that implementation of the option under this rule is entirely at the discretion of the State. Further, States that choose to exercise the option have great latitude in establishing the extent to which, and the eligibility groups for which, the option would be applied under their State Medicaid plans.

Benefits of the Proposed Rule Change

We believe this change will benefit both States and individuals in a number of ways. For example, under normal eligibility rules, States are required to count many kinds of income. Some of these types of income are administratively burdensome to deal with, and often do not materially affect the outcome of the eligibility determination. Some examples are the value of food or shelter provided to an applicant (called in-kind support and maintenance), income belonging to a parent of a child, or a spouse who is not applying for benefits (called deemed income), and low amounts of income such as interest earned on savings accounts. This final rule will allow States to use income disregards to simplify the process of determining eligibility by not counting types of income that primarily impose an administrative burden.

Medically Needy Income Limits

Under a medically needy program, States can choose to cover under Medicaid individuals with income that is too high to otherwise be eligible, but who, by subtracting incurred medical expenses from their income, could reduce their income to the State's medically needy income standard. This process is known as spending down excess income, or ''spenddown''.

However, in many States the medically needy income standard is very low; in at least 22 States, the

medically needy income standard is actually lower than the income standard for SSI benefits ($512 a month for an individual in 2000). In four States, the medically needy income standard is less than $200 a month. This creates a situation where individuals whose income is just slightly over the limit that would allow them to receive Medicaid as SSI recipients must spend down a certain amount of ''excess'' income to reach the medically needy income level.

For example, a person with $512 a month in countable income can be eligible for SSI and receive Medicaid coverage in most States. A person with just $1 more cannot be eligible for SSI, and thus cannot receive Medicaid health coverage based on receiving SSI benefits. Depending on a particular State's medically needy income level, such an individual with $513 in countable monthly income may have to spend over $300 on medical care each month just to reach a medically needy income limit that is that far below the SSI level.

Under the Medicaid statute, States cannot just increase their medically needy income levels to deal with this problem. However, under this final rule, a State could use section 1902(r)(2) of the Act to disregard additional amounts of income under its medically needy program, effectively reducing or even eliminating the large spenddown liability described in the example above.

Helping People Move from Institutions to the Community

The medically needy spenddown problem described above can also have adverse effects for people in medical institutions who would like to receive care in community settings. Since Medicaid will pay for room and board expenses in a medical institution, the individual needs to retain relatively little income after application of the medically needy spenddown requirement. However, Medicaid will not pay for room or board expenses in a community setting. Few individuals will be able to move from a medical institution to the community if they are permitted to retain only $200–$400 after meeting Medicaid spenddown requirements.

The practical effect of this is that many people in institutions who would like to move to the community, and who would normally be able to manage in a community setting, remain in the institution because they literally cannot leave. This final rule gives States opportunities to correct spenddown problems so that more people could leave institutional settings and live in the community.

Encouraging Work Effort

While legislation enacted in the last few years has given States new options for providing Medicaid to individuals with disabilities who want to work, States may want to encourage work effort among individuals eligible under other groups such as the medically needy, or among individuals who may not readily fit into one of the new work incentives groups. One way to encourage work effort is to allow people to keep more of the income they earn without forcing them to either spend more for medical care under a medically needy spenddown, or risk losing Medicaid altogether.

Under section 1902(r)(2) of the Act a State could do that by increasing the amount of earned income that is not counted in determining a person's eligibility. However, the current application of the FFP limits to the use of less restrictive income disregards effectively precludes States from offering that kind of encouragement for many eligibility groups. This final rule removes that restriction, giving States another way to encourage work effort.

Expanding Health Coverage

In addition to the specific examples described above, section 1902(r)(2) of the Act gives States the option of extending health coverage to more individuals by disregarding additional types and amounts of income, thereby allowing people who could not otherwise meet the program's eligibility requirements to become eligible. However, the current application of the FFP limits to the use of less restrictive income disregards greatly reduces the options States have to implement that kind of health coverage expansion. This final rule will give States the full flexibility provided by section 1902(r)(2) of the Act to expand their base of eligible individuals if they choose to do so.

Youth Age 19–20 Years

This change provides State flexibility to offer health coverage to youth 19 and 20 years of age consistent with the health coverage options available under Federal law to children under 19 years of age as described in section 1902(l) of the Act. Such youth are often at a high risk of being uninsured because they are still in school or beginning employment. To clarify, youth 19 and 20 years of age are included in the group described in section 1902(a)(10)(A)(ii)(I) of the Act. Under current statutory and regulatory authority, States are able to effectively expand eligibility of all children under 19 years of age to whatever level they choose. However, the eligibility of youth 19 to 20 years of age (as children) is limited to the group noted above, and that group is currently subject to the FFP cap. This final regulation allows States to expand eligibility for these older children to the same level that they use for children under 19 years of age.

Effect on Small Businesses and Small Rural Hospitals

The RFA requires agencies to analyze options for regulatory relief of small businesses. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and government agencies. Most hospitals and most other providers and suppliers are small entities, either by nonprofit status or by having revenues of $5 million or less annually. Individuals and States are not included in the definition of a small entity.

We expect that small entities will be indirectly impacted by this final rule. We expect that any indirect impact will be positive. States will decide individually whether to take advantage of the options that this final rule makes available. If a State exercises the options under this final rule, small entities such as small businesses, nonprofit organizations, and governmental agencies may receive additional Medicaid payments as a result of their service to the increased number of individuals who would be eligible under the program. We invited comments in this area and received none. Because the indirect impact on small entities depends on the extent and degree to which States exercise the options under this rule and the number of small entities that may be indirectly impacted, we are unable with any degree of certainty to estimate the fiscal impact on small entities.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule may have significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds.

This final rule will have only indirect impact on small rural hospitals. We believe that any indirect impact will be positive. This final rule primarily affects States and each State will make its own decision regarding acceptance of the options presented in these regulations. As a result, small rural hospitals are in no way involved in the decision-making

process and would be impacted only to the extent that a State's use of less restrictive income methodologies could result in some increase in the number of individuals eligible for Medicaid. This in turn could result in a slight increase in utilization of rural hospital services which could increase the Medicaid payment received by these hospitals. We invited comments in this area and received none. Because the indirect impact on small rural hospitals depends on the extent and degree to which States exercise the options under this rule and the number of small rural hospitals that may be indirectly impacted, we are unable with any degree of certainty to estimate the fiscal impact on small rural hospitals.

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule that may result in an expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of $100 million in any one year. This final rule will have no impact on the private sector. The rule imposes no requirements on State, local or tribal governments. Rather, it offers State governments additional flexibility in operating their Medicaid programs, but does not require that they make any changes in their programs.

Federalism

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that would impose substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. This final rule imposes no requirement costs on governments, nor does it preempt State law or otherwise have Federalism implications.

We have had discussions of this issue with a number of State governments since approximately 1990. Those discussions have taken place both with individual States and with groups of States, including HCFA's Medicaid Eligibility Technical Advisory Group and the National Association of State Medicaid Directors Executive Committee. Based on the many discussions we have had, and comments we received as discussed elsewhere in this final rule, we believe States are overwhelmingly in favor of the change.

B. Anticipated Effects

1. Effects on State Governments

This final rule gives States greater flexibility in designing and operating their Medicaid programs.

2. Effects on Providers

Providers will only be indirectly affected by this rule and we expect any indirect impact will be positive. Each State will decide whether to take advantage of the options the regulations make available. To the extent that States decide to exercise their options under this final rule, we expect the ultimate indirect impact on providers to be positive due to the added Medicaid revenues that providers may garner.

3. Effects on the Medicare and Medicaid Programs

This rule may increase Medicare costs by about $100 million over 5 years. Since the rule may increase the number of individuals eligible for Medicaid who receive inpatient hospital services, it may affect the calculation of hospitals' disproportionate share hospital (DSH) calculations under the Medicare program. We estimate that Medicare DSH payments could increase by $100 million over 5 years due to changes in this rule.

Under Medicaid, it is projected that the Federal cost of this rule could be as much as $860 million over 5 years. However, because actual implementation of the provisions of the rule is strictly at the option of each State, actual Federal program costs would depend on whether, and to what degree, States choose to take advantage of the flexibility provided by this final rule.

C. Alternatives Considered

There were few alternatives to the proposed rule to consider. One alternative was to maintain the requirement that the FFP limits apply prior to use of less restrictive income methodologies under § 435.601, but allow additional disregards at a somewhat higher level than is possible under the current regulations. However, this would not provide States the level of flexibility to operate their Medicaid programs that is provided under the proposed rule, and thus would be of only limited value. We rejected this alternative because it would not give States what they need to effectively operate their Medicaid programs.

We also considered pursuing a legislative option that would have changed the Medicaid statute itself to clarify that the FFP limits at section 1903(f) of the Act should apply after, rather than before, the use of any less restrictive income methodologies under section 1902(r)(2) of the Act. However, as explained previously the current policy concerning application of the FFP limits to less restrictive income methodologies does not reflect a clear statutory requirement, but rather is an administrative interpretation of the statute. Since the statute as written will support this change in policy, we believed the issue should be addressed via a change in the regulations rather than a change in the statute. Also, we believe that this rule is the most efficient and expedient way of accomplishing the desired change.

D. Conclusion

We expect this rule to benefit State Medicaid programs and Medicaid beneficiaries by giving States additional flexibility in designing and operating their programs. In turn, this would allow States to make individuals eligible for Medicaid who otherwise could not be eligible under the current regulations.

Because this rule is considered major rule that is economically significant, we have prepared a regulatory impact statement. We believe that this rule will have an estimated cost of $960 million dollars over 5 years based on best available data. In addition, we certify that this rule will not have a significant economic impact on a substantial number of small entities or a significant impact on the operations of a substantial number of small rural hospitals.

In accordance with the provisions of Executive Order 12866, this regulation was reviewed by the Office of Management and Budget.

List of Subjects in 42 CFR Part 435

Aid to Families with Dependent Children, Grant programs-health, Medicaid, Reporting and recordkeeping requirements, Supplemental Security Income (SSI), Wages.

For the reasons set forth in the preamble, 42 CFR part 435 is amended as set forth below:

PART 435—ELIGIBILITY IN THE STATES, DISTRICT OF COLUMBIA, THE NORTHERN MARIANA ISLANDS, AND AMERICAN SAMOA

1. The authority citation for part 435 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

2. Section 435.1007 is amended by revising paragraphs (b) and (e) and adding paragraph (f) to read as follows:

§ 435.1007 Categorically needy, medically needy, and qualified Medicare beneficiaries.

* * * * *

(b) Except as provided in paragraphs (c) and (d) of this section, FFP is not available in State expenditures for individuals (including the medically needy) whose annual income after deductions specified in § 435.831(a) and (c) exceeds the following amounts, rounded to the next higher multiple of $100.

* * * * *

(e) FFP is not available in expenditures for services provided to categorically needy and medically needy recipients subject to the FFP limits if their annual income, after the cash assistance income deductions and any income disregards in the State plan authorized under section 1902(r)(2) of the Act are applied, exceeds the 133⅓ percent limitation described under paragraphs (b), (c), and (d) of this section.

(f) A State may use the less restrictive income methodologies included under its State plan as authorized under § 435.601 in determining whether a family's income exceeds the limitation described in paragraph (b) of this section.

Promotion of Competitive Networks in Local Telecommunications Markets

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Commission takes actions to further competition in local communications markets by ensuring that competing telecommunications providers are able to provide services to customers in multiple tenant environments (MTEs). The actions that the Commission takes in this item will reduce the likelihood that incumbent local exchange carriers (LECs) can obstruct their competitors' access to MTEs, as well as address particular potentially anticompetitive actions by premises owners and other third parties.

DATES: The rule changes to 47 CFR 64.2500, 64.2501, and 64.2502, shall become effective March 12, 2001. The rule changes to 47 CFR 1.4000 and the rule changes amending the definition of the term ''demarcation point'' in 47 CFR 68.3 contain an information collection requirement that has not yet been approved by OMB; the FCC will publish a document in the **Federal Register** announcing the effective date of these rule changes. Comments from the public, OMB, and other agencies on the information collections contained in this document are due March 12, 2001.

ADDRESSES: A copy of any comments on the information collections contained herein should be submitted to Judy Boley, Federal Communications Commission, Room 1–C804, 445 12th Street, SW., Washington, DC 20554, or via the Internet to jboley@fcc.gov, and to Edward C. Springer, OMB Desk Officer, Room 10236 NEOB, 725 17th Street, NW., Washington, DC 20503 or via the Internet to edward.springer@omb.eop.gov.

FOR FURTHER INFORMATION CONTACT: Lauren Van Wazer at (202) 418–0030 or Joel Taubenblatt at (202) 418–1513 (Wireless Telecommunications Bureau). For additional information concerning the information collection(s) contained in this document, contact Judy Boley at 202–418–0214, or via the Internet at jboley@fcc.gov.

SUPPLEMENTARY INFORMATION: This is a summary of the First Report and Order in WT Docket No. 99–217, the Fifth Report and Order and Memorandum Opinion and Order in CC Docket No. 96–98, and the Fourth Report and Order and Memorandum Opinion and Order in CC Docket No. 88–57 (collectively, the ''Order''), FCC 00–366, adopted October 12, 2000 and released October 25, 2000. This summary also reflects errata issued in this proceeding subsequent to the release of this Order. The Commission seeks further comments on the issues in this proceeding in a Further Notice of Proposed Rulemaking, available at the addresses listed below and summarized separately in the **Federal Register**. The complete text of the document is available for inspection and copying during normal business hours in the FCC Reference Center, 445 12th Street, SW., Washington, DC, and also may be purchased from the Commission's copy contractor, International Transcription Services, (202) 857–3800, 445 12th Street, SW., CY–B400, Washington, D.C. 20554. This document is also available via the Internet at *http://fcc.gov/Bureaus/Wireless/Orders/2000/fcc00366.pdf.*

Paperwork Reduction Act

This Order contains a new information collection as described in Section D of the Final Regulatory Flexibility Analysis set forth below. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public, Office of Management and Budget (OMB), and other federal agencies to comment on the information collection(s) contained in this Order as required by the Paperwork Reduction Act of 1995, Public Law 104–13. It will be submitted to the OMB for review under section 3507(d) of the PRA. Public, OMB, and other agency comments are due March 12, 2001. Comments should address: (a) Whether the new collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

A copy of any comments on the information collections contained herein should be submitted to Judy Boley, Federal Communications Commission, Room 1–C804, 445 12th Street, SW., Washington, DC 20554, or via the Internet to jboley@fcc.gov, and to Edward C. Springer, OMB Desk Officer, Room 10236 NEOB, 725 17th Street, NW., Washington, DC 20503 or via the Internet to edward.springer@omb.eop.gov.

OMB Control Number: 3060–XXXX.

Title: Promotion of Competitive Networks in Local Telecommunications Markets; Wireless Communications Association International, Inc. Petition for Rulemaking to Amend section 1.4000 of the Commission's Rules to Preempt Restrictions on Subscriber Premises Reception or Transmission Antennas Designed to Provide Fixed Wireless Services; Implementation of the Local Competition Provisions in the Telecommunications Act of 1996; Review of Sections 68.104 and 68.213 of the Commission's Rules Concerning

Connection of Simple Inside Wiring to the Telephone Network

Form No.: NA.

Type of Review: New collection.

Respondents: Business or other for-profit.

Number of Respondents: 5983.

Estimated Time per Response: .5 hrs. for the first information collection, 10 hrs. for the second information collection.

Total Annual Burden: 571,350 hrs.

Total Annual Costs: $11,427,000.

Needs and Uses: The first information collection relates to the revisions of the Commission's demarcation point rules, 47 CFR 68.3. Under these revisions, the LEC shall make available information on the location of the demarcation point within ten business days of a request from the premises owner. In addition, at the time of installation, the LEC shall fully inform the premises owner of its options and rights regarding the placement of the demarcation point or points. The availability of this information will facilitate efficient interaction between premises owners and LECs regarding the placement of the demarcation point, which marks the end of wiring under control of the LEC and the beginning of wiring under the control of the premises owner or subscriber. The demarcation point is a critical point of interconnection where competitive LECs can gain access to the inside wiring of the building to provide service to customers in the building.

The second information collection relates to the revisions of the Commission's rules on Over-the-Air Reception Devices, 47 CFR 1.4000. Under these revisions, as a condition of invoking protection under 47 CFR 1.4000 from government, landlord, and association restrictions, a licensee must ensure that subscriber antennas are labeled to give notice of potential radiofrequency safety hazards of these antennas. Labeling information should include minimum separation distances required between users and radiating antennas to meet the Commission's radiofrequency exposure guidelines. Labels should also include reference to the Commission's applicable radiofrequency exposure guidelines and should use the ANSI-specified warning symbol for radiofrequency exposure. In addition, the instruction manuals and other information accompanying subscriber transceivers should include a full explanation of the labels, as well as a reference to the applicable Commission radiofrequency exposure guidelines.

Synopsis of Report and Order

1. In this document, the Commission took action furthering its ongoing efforts under the Telecommunications Act of 1996 to foster competition in local communications markets. The Commission implemented measures to enhance the ability of competing telecommunications providers to provide services to customers in residential and commercial buildings or other MTEs.

Discussion

2. In the Notice of Proposed Rulemaking in WT Docket No. 99–217, 64 FR 41887, August 2, 1999, and a Third Further Notice of Proposed Rulemking in CC Docket No. 96–98, 64 FR 41884, August 2, 1999 (together, ''Competitive Networks NPRM''), the Commission requested comment on the ability of competitive telecommunications providers to access MTEs and on a variety of potential measures to improve such access. Based on the extensive record compiled in response to the Competitive Networks NPRM, the Commission adopts the following four measures to remove obstacles to competitive access in MTEs:

- First, the Commission forbids telecommunications carriers from entering into contracts to serve commercial properties that restrict or effectively restrict the property owner's ability to permit entry by other carriers.
- Second, in order to reduce competitive carriers' dependence on the incumbent LECs to gain access to on-premises wiring, while at the same time recognizing the varied needs of carriers and building owners, the Commission establishes procedures to facilitate moving the demarcation point to the minimum point of entry (MPOE) at the building owner's request, and requires incumbent LECs to timely disclose the location of existing demarcation points where they are not located at the MPOE.
- Third, the Commission determines that under Section 224 of the Communications Act, utilities, including LECs, must afford telecommunications carriers and cable service providers reasonable and nondiscriminatory access to conduits and rights-of-way located in customer buildings and campuses, to the extent such conduits and rights-of-way are owned or controlled by the utility.
- Fourth, the Commission extends to antennas that receive and transmit telecommunications and other fixed wireless signals its existing prohibition of restrictions that impair the installation, maintenance or use of certain video antennas on property within the exclusive use or control of the antenna user, where the user has a direct or indirect ownership or leasehold interest in the property.

3. Contemporaneous with this document, the Commission is publishing a Further Notice of Proposed Rulemaking that seeks comment on several potential actions related to competition in MTEs. In addition, subsequent to this document, the Commission will publish a Report and Order (FCC 00–400) that steamlines and privatizes many of the functions in part 68 of the Commission's rules and, in connection with this streamlining, makes a nonsubstantive amendment to the part 68 demarcation point definition set forth.

Final Regulatory Flexibility Analysis

4. As required by the Regulatory Flexibility Act (RFA),[1] an Initial Regulatory Flexibility Analysis (IRFA) was incorporated in the Notice of Proposed Rulemaking in WT Docket No. 99–217 and Third Further Notice of Proposed Rulemaking in CC Docket No. 96–98, released July 7, 1999 (Competitive Networks NPRM).[2] The Commission sought written public comment on the proposals in the Competitive Networks NPRM, including comment on the IRFA. The comments received are discussed below. In addition, an IRFA was incorporated in the Second Further Notice of Proposed Rulemaking in CC Docket No. 88–57 (1997 Demarcation Point Order on Reconsideration).[3] This present Final Regulatory Flexibility Analysis (FRFA) conforms to the RFA.[4]

A. Need for, and Objectives of, the Rules

4. In this Competitive Networks First Report and Order,[5] the Commission

[1] See 5 U.S.C. 603. The FRA, see 5 U.S.C. 601 *et seq.,* has been amended by the Contract With America Advancement Act of 1996, Public Law 104–121, 110 Stat. 847 (1996) (CWAAA). Title II of the CWAAA is the Small business Regulatory Enforcement Fairness Act of 1996 (SBREFA).

[2] Promotion of Competitive Networks in Local Telecommunications Markets, Notice of Proposed Rulemaking and Notice of Inquiry in WT Docket No. 99–217, and Third Further Notice of Proposed Rulemaking in CC Docket No. 96–98, 14 FCC Red 12673, 12723–12734 (1999) (Competitive Networks NPRM).

[3] Review of Sections 68.104, and 68.213 of the Commission's Rules Concerning Connection of Simple Inside Wiring to the Telephone Network, Order on Reconsideration, Second Report and order and Second Further Notice of proposed Rulemaking, CC Docket No. 88–57, 12 FCC Red 11897, 11934–39 (1997) (1997 Demarcation Point Order on Reconsideration).

[5] Promotion of Competitive Networks in Local Telecommunications Markets. First Report and Order, WT Docket No. 99–217, FCC 00–366

Continued

furthers its ongoing efforts under the Telecommunications Act of 1996[6] to foster competition in local communications markets by implementing measures to ensure that competing telecommunications providers are able to provide services to customers in multiple tenant environments (MTEs). MTEs include apartment buildings, office buildings, office parks, shopping centers, and manufactured housing communities. Based on the extensive record compiled in response to the Competitive Networks NPRM, the Commission adopts several measures to remove obstacles to competitive access in this important portion of the telecommunications market. Specifically the Commission: (1) Prohibits carriers from entering into contracts in commercial buildings that prevent access by competing carriers; (2) clarifies its demarcation point rules[7] governing control of in-building wiring and facilitates exercise of building owner options regarding that wiring; (3) concludes that the access mandated by section 224 of the Communications Act (the ''Pole Attachments Act'')[8] includes access to poles, ducts, conduits or rights-of-way that are owned or controlled by a utility within MTEs; and (4) concludes that tenants in MTEs should have the ability to place antennas one meter or less in diameter used to receive or transmit any fixed wireless service in areas within their exclusive use or control, and prohibits most restrictions on their ability to do so by extending the Commission's rules governing Over-the-Air Reception Devices (OTARDs).[9]

B. Summary of Significant Issues Raised by Public Comments in Response to the IRFA

5. Comments in response to the Competitive Networks NPRM IRFA were filed by the Community Associations Institute, *et al.* (CAI),[10] the National Association of Counties, *et al.* (NACO),[11] the Real Access Alliance (RAA),[12] and the Office of Advocacy of the U.S. Small Business Administration (SBA).[13]

6. CAI states that community associations (*i.e.,* condominiums, cooperatives and planned communities) would incur undue expense and disruptions if the Commission provides telecommunications carriers so-called ''forced access'' to association property.[14] Similarly, RAA states that the Commission's ''proposals will interfere with the ability of landlords to insure compliance with safety codes; provide for the safety of tenants, residents, and visitors; coordinate among tenants and service providers; and manage limited physical space.''[15] CAI requests that community associations be exempted from any ''forced access'' rules adopted by the Commission,[16] while RAA requests that all affected ''small businesses'' be exempted.[17] RAA also states that the Competitive Networks NPRM should be withdrawn and reissued with a revised IRFA.[18]

7. The actions taken in the Competitive Networks First Report and Order today do not impair the authority of property owners or managers, including community associations, under state law to exclude telecommunications carriers from their property.[19] Rather, the Competitive Networks First Report and Order makes clear that ''the right of access granted under section 224 lies only against utilities,''[20] as defined in section 224(a)(1) of the Act.[21] We also note that our authorization of small antennas for the provision of non-video services is limited to antennas situated on property under the control of a community association member rather than common property of the association, and therefore will not impose undue burdens or expense on community associations or small building owners.[22] CAI also states that prohibiting exclusive telecommunications contracts would adversely impact community associations.[23] The Competitive Networks First Report and Order does not prohibit such contracts for residential properties.[24] Accordingly, even assuming that such a prohibition would significantly impact community associations, no such impact will result from the actions taken in the Competitive Networks First Report and Order today.[25]

8. In its comments filed August 27, 1999, NACO states that the Commission's proposals ''for building owners and managers represent the federalizing of what is currently a growing local market in site leasing.''[26] We have deferred to the Competitive Networks Further Notice of Proposed Rulemaking (FNPRM) the issue of whether the Commission should impose a nondiscriminatory access requirement on building owners and managers.[27] NACO also states that ''[l]ocal communities would be * * * deprived of a revenue stream that could reduce local tax burdens * * *.''[28] In later filed comments, NACO reiterates its concern over ''the impact of lost right-of-way and tax revenues and the impact on infrastructure of loss of management control over the public right of way.''[29] Although we sought comment on issues related to access to public rights-of-way and franchise taxes in the Competitive Networks Notice of Inquiry, we take no action in this regard today.

9. SBA states that the IRFA ''inappropriately excludes small incumbent LECs from the definition of small business,'' and requests that the Commission reconcile its definition of small incumbent LEC with SBA's definition.[30] SBA states that, for RFA purposes, small incumbent LECs are not dominant in their field of operation because any such dominance is not ''national'' in scope.[31] In the

[30] SBA Reply Comments at 3–4. (filed Sept. 10, 1999).

[31] *Id.* at 4. The Small Business Act contains a definition of ''small business concern,'' which the RFA incorporates into its own definition of ''small business.'' See 15 U.S.C. 632(a) (Small Business Act); 5 U.S.C. 601(3) (RFA). SBA regulations

Competitive Networks NPRM IRFA, we determined that, for the purposes of the IRFA, we would use the term ''small incumbent LECs'' to refer to incumbent LECs that might be defined by the SBA as small business concerns,[32] and would explicitly include small incumbent LECs in the analysis. In this present FRFA, *infra,* we have included small incumbent LECs within the definition of small business.

10. SBA and RAA separately state that the IRFA did not comply with the RFA. NACO concurs with RAA's comments in this regard. SBA states that ''[t]he Commission does not adequately discuss any significant economic impact its access proposal may have on small business nor does it propose sufficient alternatives that might minimize this impact, as is required by the RFA.'' [33] The Commission's access proposal included two key elements: (1) A requirement that building owners provide reasonable and nondiscriminatory access to their premises; and (2) a requirement, under Section 224 of the Act, that utilities provide telecommunications carriers access to their poles, ducts, conducts, and rights-of-way within buildings. As noted above, we are deferring to the Competitive Networks FNPRM the issue of whether and, if so, the extent to which, the Commission should impose a nondiscriminatory access requirement on building owners.[34] With respect to the proposed implementation of Section 224, in the Competitive Networks NPRM, we inquired:

> Whether an overly broad construction of utility ownership or control would impose unreasonable burdens on building owners, including small building owners, or compromise their ability to ensure the safe use of rights-of-way or conduit, or engender other practical difficulties.[35]

11. After a thorough review and analysis of the comments filed on our Section 224 proposal, we have determined that a broad definition of utility ownership or control would not best serve the public interest. Rather, in order to minimize the impact of our proposal on utilities (and the buildings that they serve) that must provide access to telecommunications carriers pursuant to section 224, we find that ''state law determines whether, and the extent to which, utility ownership or control of a right-of-way exists in any factual situation within the meaning of section 224.'' [36] The Competitive Networks First Report and Order, moreover, in no way impairs the authority under state law of building owners, including small building owners, to exclude telecommunications carriers from their property.[37]

12. In addition, we note that in the Competitive Networks NPRM IRFA we discussed certain alternatives that might have lessened the possible economic input on small entities. We stated:

> [W]ith respect to our Section 224 proposal, we seek comment on whether an overly broad construction of utility ownership or control would impose unreasonable burdens on building owners, including small building owners, or compromise their ability to ensure the safe use of rights-of-way or conduit, or engender other practical difficulties. In addition, with respect to our inquiry into building owner obligations, we seek comment on whether we should limit the scope of any building owner obligation in order to avoid imposing unreasonable regulatory burden on building owners, and we suggest that a potential rule could exempt buildings that house fewer than a certain number of tenants or are under a certain size.[38]

This discussion of alternatives included cross-references to the text of the Competitive Networks NPRM, to assist the reader. We note that the final rules that we adopt here will benefit small telecommunications carriers by fostering facilities-based competition. We also anticipate that our final rules will benefit small building owners and their tenants, by ensuring that utilities cannot block access to their rights-of-way.

13. SBA states that, while we suggested some alternatives to assist small entities in the IRFA, on the whole our efforts were ''inadequate.'' SBA states that a broader analysis was required, directed not only toward the alternatives described in the above paragraph but also toward alternatives for ''small LECs and the many other small businesses listed in the IRFA.'' [39] We find that we have met the requirements of the RFA. We chose reasonable alternatives to discuss, and did not discuss alternatives for every affected entity where it would not have seemed reasonable or, perhaps, where it simply did not occur to us. We believe that the RFA requires a good faith effort on our part, but it does not require a discussion of a minimum of four alternatives [40] for each of the possibly affected entities. As noted above, we specifically discussed one definitional issue and one possible exception, to assist small entities. We also sought comment from small entities on other issues throughout the Competitive Networks NPRM and IRFA. We appreciate the comments supplied by SBA and others as a result, and have considered them in the Competitive Networks First Report and Order and this IRFA.

14. Finally, RAA contends that the IRFA provided inadequate notice as a matter of law.[41] We note that the IRFA was sufficient to generate comments from representatives of the small business community and that the record demonstrates that the IRFA met the objectives of the RFA. Delaying issuance of final rules at this time would not, therefore, advance those objectives. The IRFA provided sufficient information so that the public could react to the Commission's proposal in the Competitive Networks NPRM in an informed manner. We note that, pursuant to the Administrative Procedure Act,[42] the Commission must provide ample opportunity for the public to comment on proposed rules. In this proceeding, the Commission provided a 37-day filing period or initial comments, followed by a 21-day period for reply comments. The public thus had nearly two months to provide comments. In addition, numerous parties filed *ex parte* statements with the Commission during the course of the 13-month period after the formal comment period closed. More than 1000 comments and other submissions were filed in this proceeding. Many of the commenters, including small businesses, enthusiastically endorsed

---

interpret ''small business concern'' to include the concept of dominance on a national basis. 13 CFR 121.102(b). Since 1996, out of an abundance of caution, the Commission has included small incumbent LECs in its regulatory flexibility analyses. See, *e.g.,* Implementation of the Local Competition Provisions of the Telecommunications Act of 1996, CC Docket, 96–98, First Report and Order, 11 FCC Rcd 15499, 16144–45 (1996), 61 FR 45476 (Aug. 29, 1996).

[32] Competitive Networks NPRM IRFA, 14 FCC Rcd at 12726, paragraph 8. A ''small business'' under the RFA is one that, inter alia, meets the pertinent small business size standard (*e.g.,* a telephone communications business having 1,500 or fewer employees), and ''is not dominant in its field of operation.'' 5 U.S.C. 601(3).

[33] SBA Reply Comments at 4 (filed Sept. 10, 1999).

[34] Competitive Networks FNPRM, Section V.A., supra. In the Competitive Networks NPRM IRFA, we inquired ''whether we should limit the scope of any building owner obligation * * * [and noted] that a potential rule could exempt buildings that housed fewer than a certain number of tenants or are under a certain size.'' Competitive Networks NPRM IRFA, 14 FCC Rcd at 12733, paragraph 31.

the proposals in the Competitive Networks NPRM.

C. Description and Estimate of the Number of Small Entities to which the Rules Will Apply

15. The RFA requires that an initial regulatory flexibility analysis be prepared for notice-and-comment rulemaking proceedings, unless the agency certifies that ''the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.'' [43] The RFA generally defines ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' [44] In addition, the term ''small business'' has the same meaning as the term ''small business concern'' under the Small Business Act.[45] A small business concern is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA).[46] For many of the entities described below, we utilize SBA definitions of small business categories, which are based on Standard Industrial Classification (''SIC'') codes.

16. We have included small incumbent LECs in this present RFA analysis. As noted above, a ''small business'' under the RFA is one that, *inter alia,* meets the pertinent small business size standard (*e.g.,* a telephone communications business having 1,500 or fewer employees), and ''is not dominant in its field of operation.'' [47] The SBA contends that, for RFA purposes, small incumbent LECs are not dominant in their field of operation because any such dominance is not ''national'' in scope.[48] We have therefore included small incumbent LECs in this RFA analysis, although we emphasize that this RFA action has no effect on FCC analyses and determinations in other, non-RFA contexts.

17. This Competitive Networks First Report and Order adopts requirements that affect local exchange carriers and other utilities, building owners and managers, neighborhood associations, small governmental jurisdictions, cable operators, satellite providers, and wireless communications providers, as discussed below.

a. Local Exchange Carriers

18. The legal interpretation of section 224 set forth today, and the rule changes adopted today regarding exclusive contracts, demarcation point, and an extension of the OTARD rule will affect small LECs. Neither the Commission nor the SBA has developed a definition for small providers of local exchange services. The closest applicable definition under the SBA rules is for telephone communications companies other than radiotelephone (wireless) companies.[49] The SBA has defined establishments engaged in providing ''Telephone Communications, Except Radiotelephone'' to be small businesses when they have no more than 1,500 employees.[50] According to recent Telecommunications Industry Revenue data, 1,348 incumbent carriers reported that they were engaged in the provision of local exchange services.[51] We do not have data specifying the number of these carriers that are either dominant in their field of operations, are not independently owned and operated, or have more than 1,500 employees, and thus are unable at this time to estimate with greater precision the number of LECs that would qualify as small business concerns under the SBA's definition. Consequently, we estimate that fewer than 1,348 providers of local exchange service are small entities or small incumbent LECs that may be affected by the rules and policies adopted today.

b. Other Utilities

19. The legal interpretation of section 224 set forth today will affect utilities other than LECs. Section 224 defines a ''utility'' as ''any person who is a local exchange carrier or an electric, gas, water, steam, or other public utility, and who owns or controls poles, ducts, conduits, or rights-of-way used, in whole or in part, for any wire communications. Such term does not include any railroad, any person who is cooperatively organized, or any person owned by the Federal Government or any state.'' The Commission anticipates that, to the extent its legal interpretation of Section 224 affects non-LEC utilities, the effect would be concentrated on electric utilities.

(1) *Electric Utilities (SIC 4911, 4931 and 4939).* 20. *Electric Services (SIC 4911).* The SBA has developed a definition for small electric utility firms.[52] The Census Bureau reports that a total of 1,379 electric utilities were in operation for at least one year at the end of 1992. According to SBA, a small electric utility is an entity whose gross revenues do not exceed five million dollars.[53] The Census Bureau reports that 447 of the 1,379 firms listed had total revenues below five million dollars in 1992.[54]

21. *Electric and Other Services Combined (SIC 4931).* The SBA has classified this entity as a utility whose business is less than 95% electric in combination with some other type of service.[55] The Census Bureau reports that a total of 135 such firms were in operation for at least one year at the end of 1992. The SBA's definition of a small electric and other services combined utility is a firm whose gross revenues do not exceed five million dollars.[56] The Census Bureau reported that 45 of the 135 firms listed had total revenues below five million dollars in 1992.[57]

22. *Combination Utilities, Not Elsewhere Classified (SIC 4939).* The SBA defines this type of utility as providing a combination of electric, gas, and other services that are not otherwise classified.[58] The Census Bureau reports that a total of 79 such utilities were in operation for at least one year at the end

[43] 5 U.S.C. 605(b).

[44] 5 U.S.C. 601(6).

[45] 5 U.S.C. 601(3) (incorporating by reference the definition of ''small business concern'' in Small Business Act, 15 U.S.C. 632). Pursuant to 5 U.S.C. 601(3), the statutory definition of a small business applies ''unless an agency, after consultation with the Office of Advocacy of the Small Business Administration and after opportunity for public comment, establishes one or more definitions of such term which are appropriate to the activities of the agency and publishes such definition(s) in the **Federal Register**.''

[46] Small Business Act, 15 U.S.C. 632.

[47] 5 U.S.C. 601(3).

[48] SBA Reply Comments at 3–4. See also Letter from Jere W. Glover, Chief Counsel for Advocacy, SBA, to William E. Kennard, Chairman, FCC (May 27, 1999). The Small Business Act contains a definition of ''small business concern,'' which the RFA incorporates into its own definition of ''small business.'' See 15 U.S.C. 632(a) (Small Business Act); 5 U.S.C. 601(3) (RFA). SBA regulations interpret ''small business concern'' to include the concept of dominance on a national basis. 13 CFR 121.102(b). Since 1996, out of an abundance of caution, the Commission has included small incumbent LECs in its regulatory flexibility analyses. See, *e.g.,* Implementation of the Local Competition Provisions of the Telecommunications Act of 1996, CC Docket, 96–98, First Report and Order, 11 FCC Rcd 15499, 16144–45 (1996), 61 FR 45476 (Aug. 29, 1996).

of 1992. According to SBA's definition, a small combination utility is a firm whose gross revenues do not exceed five million dollars.[59] The Census Bureau reported that 63 of the 79 firms listed had total revenues below five million dollars in 1992.[60]

(2) *Gas Production and Distribution (SIC 4922, 4923, 4924, 4925 and 4932).* 23. *Natural Gas Transmission (SIC 4922).* The SBA's definition of a natural gas transmitter is an entity that is engaged in the transmission and storage of natural gas.[61] The Census Bureau reports that a total of 144 such firms were in operation for at least one year at the end of 1992. According to SBA's definition, a small natural gas transmitter is an entity whose gross revenues do not exceed five million dollars.[62] The Census Bureau reported that 70 of the 144 firms listed had total revenues below five million dollars in 1992.[63]

24. *Natural Gas Transmission and Distribution (SIC 4923).* The SBA has classified this type of entity as a utility that transmits and distributes natural gas for sale.[64] The Census Bureau reports that a total of 126 such entities were in operation for at least one year at the end of 1992. The SBA's definition of a small natural gas transmitter and distributor is a firm whose gross revenues do not exceed five million dollars.[65] The Census Bureau reported that 43 of the 126 firms listed had total revenues below five million dollars in 1992.[66]

25. *Natural Gas Distribution (SIC 4924).* The SBA defines a natural gas distributor as an entity that distributes natural gas for sale.[67] The Census Bureau reports that a total of 478 such firms were in operation for at least one year at the end of 1992. According to the SBA, a small natural gas distributor is an entity whose gross revenues do not exceed five million dollars.[68] The Census Bureau reported that 267 of the 478 firms listed had total revenues below five million dollars in 1992.[69]

26. *Mixed, Manufactured, or Liquefied Petroleum Gas Production and/or Distribution (SIC 4925).* The SBA has classified this type of entity as a utility that engages in the manufacturing and/or distribution of the sale of gas.[70] These mixtures may include natural gas. The Census Bureau reports that a total of 43 such firms were in operation for at least one year at the end of 1992. The SBA's definition of a small mixed, manufactured or liquefied petroleum gas producer or distributor is a firm whose gross revenues do not exceed five million dollars.[71] The Census Bureau reported that 31 of the 43 firms listed had total revenues below five million dollars in 1992.[72]

27. *Gas and Other Services Combined (SIC 4932).* The SBA has classified this entity as a gas company whose business is less than 95% gas, in combination with other services.[73] The Census Bureau reports that a total of 43 such firms were in operation for at least one year at the end of 1992. According to the SBA, a small gas and other services combined utility is a firm whose gross revenues do not exceed five million dollars.[74] The Census Bureau reported that 24 of the 43 firms listed had total revenues below five million dollars in 1992.[75]

(3) *Water Supply (SIC 4941).*

28. The SBA defines a water utility as a firm who distributes and sells water for domestic, commercial and industrial use.[76] The Census Bureau reports that a total of 3,169 water utilities were in operation for at least one year at the end of 1992. According to SBA's definition, a small water utility is a firm whose gross revenues do not exceed five million dollars.[77] The Census Bureau reported that 3,065 of the 3,169 firms listed had total revenues below five million dollars in 1992.[78]

(4) *Sanitary Systems (SIC 4952, 4953 & 4959).*

29. *Sewerage Systems (SIC 4952).* The SBA defines a sewage firm as a utility whose business is the collection and disposal of waste using sewage systems.[79] The Census Bureau reports that a total of 410 such firms were in operation for at least one year at the end of 1992. According to SBA's definition, a small sewerage system is a firm whose gross revenues did not exceed five million dollars.[80] The Census Bureau reported that 369 of the 410 firms listed had total revenues below five million dollars in 1992.[81]

30. *Refuse Systems (SIC 4953).* The SBA defines a firm in the business of refuse as an establishment whose business is the collection and disposal of refuse ''by processing or destruction or in the operation of incinerators, waste treatment plants, landfills, or other sites for disposal of such materials.''[82] The Census Bureau reports that a total of 2,287 such firms were in operation for at least one year at the end of 1992. According to SBA's definition, a small refuse system is a firm whose gross revenues do not exceed six million dollars.[83] The Census Bureau reported that 1,908 of the 2,287 firms listed had total revenues below six million dollars in 1992.[84]

31. *Sanitary Services, Not Elsewhere Classified (SIC 4959).* The SBA defines these firms as engaged in sanitary services.[85] The Census Bureau reports that a total of 1,214 such firms were in operation for at least one year at the end of 1992. According to SBA's definition, a small sanitary service firm's gross revenues do not exceed five million dollars.[86] The Census Bureau reported that 1,173 of the 1,214 firms listed had total revenues below five million dollars in 1992.[87]

(5) *Steam and Air Conditioning Supply (SIC 4961).* 32. The SBA defines a steam and air conditioning supply utility as a firm who produces and/or sells steam and heated or cooled air.[88] The Census Bureau reports that a total of 55 such firms were in operation for at least one year at the end of 1992. According to SBA's definition, a steam and air conditioning supply utility is a firm whose gross revenues do not exceed nine million dollars.[89] The Census Bureau reported that 30 of the 55 firms listed had total revenues below nine million dollars in 1992.[90]

(6) *Irrigation Systems (SIC 4971).* 33. The SBA defines irrigation systems as firms who operate water supply systems

[90] 1992 Economic Census Industry and Enterprise Receipts Size Report, Table 2D.

for the purpose of irrigation.[91] The Census Bureau reports that a total of 297 firms were in operation for at least one year at the end of 1992. According to SBA's definition, a small irrigation service is a firm whose gross revenues do not exceed five million dollars.[92] The Census Bureau reported that 286 of the 297 firms listed had total revenues below five million dollars in 1992.[93]

c. Building Owners and Managers

34. The rule changes adopted today will affect multiple dwelling unit operators and real estate agents and managers.

(1) *Multiple Dwelling Unit Operators (SIC 6512, SIC 6513, SIC 6514).*

35. The SBA has developed definitions of small entities for operators of nonresidential buildings, apartment buildings, and dwellings other than apartment buildings, which include all such companies generating $5 million or less in revenue annually.[94] According to the Census Bureau, there were 26,960 operators of nonresidential buildings generating less than $5 million in revenue that were in operation for at least one year at the end of 1992.[95] Also according to the Census Bureau, there were 39,903 operators of apartment dwellings generating less than $5 million in revenue that were in operation for at least one year at the end of 1992.[96] The Census Bureau provides no separate data regarding operators of dwellings other than apartment buildings, and we are unable at this time to estimate the number of such operators that would qualify as small entities.

(2) *Real Estate Agents and Managers (SIC 6531).*

36. The SBA defines real estate agents and managers as establishments primarily engaged in renting, buying, selling, managing, and appraising real estate for others.[97] According to SBA's definition, a small real estate agent or manager is a firm whose revenues do not exceed 1.5 million dollars.[98]

d. Neighborhood Associations

37. The extension of the OTARD rules adopted today will affect neighborhood associations. The Regulatory Flexibility Act defines ''small organization'' as ''any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.'' [99] This definition includes homeowner and condominium associations that operate as not-for-profit organizations. The Community Associations Institute estimates that there are 205,000 such associations.[100]

e. Municipalities

38. The extension of the OTARD rules adopted today will affect neighborhood associations. The term ''small governmental jurisdiction'' is defined as ''governments of * * * districts, with a population of less than 50,000.'' [101] As of 1992, there were approximately 85,006 governmental entities in the United States.[102] This number includes such entities as states, counties, cities, utility districts and school districts. Of the 85,006 governmental entities, 38,978 are counties, cities and towns. The remainder are primarily utility districts, school districts, and states. Of the 38,978 counties, cities and towns, 37,566, or 96%, have populations of fewer than 50,000.[103] The Census Bureau estimates that this ratio is approximately accurate for all governmental entities. Thus, of the 85,006 governmental entities, we estimate that 81,606 (96%) are small entities.

f. Cable Services or Systems

39. The SBA has developed a definition of small entities for cable and other pay television services, which includes all such companies generating $11 million or less in revenue annually.[104] This definition includes cable systems operators, closed circuit television services, direct broadcast satellite services, multipoint distribution systems, satellite master antenna systems and subscription television services. According to the Census Bureau data from 1992, there were 1,788 total cable and other pay television services and 1,423 had less than $11 million in revenue.[105]

40. The Commission has developed its own definition of a small cable system operator for purposes of rate regulation. Under the Commission's rules, a ''small cable company'' is one serving fewer than 400,000 subscribers nationwide.[106] Based on our most recent information, we estimate that there were 1,439 cable operators that qualified as small cable system operators at the end of 1995.[107] Since then, some of those companies may have grown to serve over 400,000 subscribers, and others may have been involved in transactions that caused them to be combined with other cable operators. Consequently, we estimate that there are fewer than 1,439 small entity cable system operators.

41. The Communications Act also contains a definition of a small cable system operator, which is ''a cable operator that, directly or through an affiliate, serves in the aggregate fewer than 1 percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed $250,000,000.'' [108] The Commission has determined that there are 66,690,000 subscribers in the United States. Therefore, we found that an operator serving fewer than 666,900 subscribers shall be deemed a small operator, if its annual revenues, when combined with the total annual revenues of all of its affiliates, do not exceed $250 million in the aggregate.[109] Based on available data, we find that the number of cable operators serving 666,900 subscribers or less totals 1,450.[110] We do not request nor do we collect information concerning whether cable system operators are affiliated with entities whose gross annual revenues exceed $250,000,000,[111] and thus are unable at this time to estimate with greater precision the number of cable system operators that would qualify as small

[111] We do receive such information on a case-by-case basis only if a cable operator appeals a local franchise authority's finding that the operator does not qualify as a small cable operator pursuant to Section 76.1403(b) of the Commission's Rules. See 47 CFR 76.1403(d).

cable operators under the definition in the Communications Act.

g. International Services

42. The Commission has not developed a definition of small entities applicable to licensees in the international services. Therefore, the applicable definition of small entity is generally the definition under the SBA rules applicable to Communications Services, Not Elsewhere Classified (NEC).[112] This definition provides that a small entity is expressed as one with $11.0 million or less in annual receipts.[113] According to the Census Bureau, there were a total of 848 communications services providers, NEC, in operation in 1992, and a total of 775 had annual receipts of less than $9.999 million.[114] The Census report does not provide more precise data.

43. *International Broadcast Stations.* Commission records show that there are 20 international broadcast station licensees. We do not request or collect annual revenue information, and thus are unable to estimate the number of international broadcast licensees that would constitute a small business under the SBA definition. However, the Commission estimates that only six international broadcast stations are subject to regulatory fee payments.

44. *International Public Fixed Radio (Public and Control Stations).* There are 3 licensees in this service subject to payment of regulatory fees. We do not request or collect annual revenue information, and thus are unable to estimate the number of international broadcast licensees that would constitute a small business under the SBA definition.

45. *Fixed Satellite Transmit/Receive Earth Stations.* There are approximately 2,679 earth station authorizations, a portion of which are Fixed Satellite Transmit/Receive Earth Stations. We do not request or collect annual revenue information, and thus are unable to estimate the number of the earth stations that would constitute a small business under the SBA definition.

46. *Fixed Satellite Small Transmit/Receive Earth Stations.* There are approximately 2,679 earth station authorizations, a portion of which are Fixed Satellite Small Transmit/Receive Earth Stations. We do not request or collect annual revenue information, and thus are unable to estimate the number of fixed satellite transmit/receive earth stations that would constitute a small business under the SBA definition.

47. *Mobile Satellite Earth Stations.* There are 11 licensees. We do not request or collect annual revenue information, and thus are unable to estimate the number of mobile satellite earth stations that would constitute a small business under the SBA definition.

48. *Radio Determination Satellite Earth Stations.* There are four licensees. We do not request or collect annual revenue information, and thus are unable to estimate the number of radio determination satellite earth stations that would constitute a small business under the SBA definition.

49. *Direct Broadcast Satellites.* Because DBS provides subscription services, DBS falls within the SBA-recognized definition of ''Cable and Other Pay Television Services.''[115] This definition provides that a small entity is one with $11.0 million or less in annual receipts.[116] As of December 1996, there were eight DBS licensees. However, the Commission does not collect annual revenue data for DBS and, therefore, is unable to ascertain the number of small DBS licensees that would be impacted by these proposed rules. Although DBS service requires a great investment of capital for operation, there are several new entrants in this field that may not yet have generated $11 million in annual receipts, and therefore may be categorized as small businesses, if independently owned and operated.

50. *Fixed Satellite Very Small Aperture Terminal (VSAT) Systems.* These stations operate on a primary basis, and frequency coordination with terrestrial microwave systems is not required. Thus, a single ''blanket'' application may be filed for a specified number of small antennas and one or more hub stations. The Commission has processed 377 applications. We do not request nor collect annual revenue information, and thus are unable to estimate the number of VSAT systems that would constitute a small business under the SBA definition.

h. Multipoint Distribution Service (MDS)

51. MDS involves a variety of transmitters, which are used to relay programming to the home or office, similar to that provided by cable television systems.[117] In connection with the 1996 MDS auction, the Commission defined small businesses as entities that had annual average gross revenues for the three preceding years not in excess of $40 million.[118] This definition of a small entity in the context of MDS auctions has been approved by the SBA.[119] These stations were licensed prior to implementation of Section 309(j) of the Communications Act of 1934, as amended.[120] Licenses for new MDS facilities are now awarded to auction winners in Basic Trading Areas (BTAs) and BTA-like areas.[121] The MDS auctions resulted in 67 successful bidders obtaining licensing opportunities for 493 BTAs. Of the 67 auction winners, 61 meet the definition of a small business. There are 2,050 MDS stations currently licensed. Thus, we conclude that there are 1,634 MDS providers that are small businesses as deemed by the SBA and the Commission's auction rules.

i. Wireless Services

52. *Broadband Personal Communications Service (PCS).* The broadband PCS spectrum is divided into six frequency blocks designated A through F, and the Commission has held auctions for each block. The Commission defined ''small entity'' for Blocks C and F as an entity that has average gross revenues of $40 million or less in the three previous calendar years.[122] For Block F, an additional classification for ''very small business'' was added and is defined as an entity that, together with its affiliates, has average gross revenues of not more than $15 million for the preceding three calendar years.[123] These regulations defining ''small entity'' in the context of broadband PCS auctions have been

[112] An exception is the Direct Broadcast Satellite (DBS) Service, *infra.*

[119] Amendment of parts 21 and 74 of the Commission's Rules with Regard to Filing Procedures in the Multipoint Distribution Service and in the Instructional Television Fixed Service and Implementation of Section 309(j) of the Communications Act—Competitive Bidding, 10 FCC Rcd 9589 (1995), 60 FR 36524 (Jul. 17, 1995).

[120] 47 U.S.C. 309(j).

[121] *Id.* A Basic Trading Area (BTA) is the geographic area by which the Multipoint Distribution Service is licensed. See Rand McNally 1992 Commercial Atlas and Marketing Guide, 123rd Edition, pp. 36–39.

[122] See Amendment of parts 20 and 24 of the Commission's Rules—Broadband PCS Competitive Bidding and the Commercial Mobile Radio Service Spectrum Cap, WT Docket No. 96–59; Amendment of the Commission's Cellular/PCS Cross-Ownership Rule, GN Docket 90–314, Report and Order, 11 FCC Rcd 7824, 7850–52, paragraphs 57–60 (1996) (*Cross Ownership Report & Order*); see also 47 CFR 24.720(b).

[123] Cross Ownership Report & Order, 11 FCC Rcd at 7852, paragraph 60.

approved by the SBA.[124] No small businesses within the SBA-approved definition bid successfully for licenses in Blocks A and B. There were 90 winning bidders that qualified as small entities in the Block C auctions. A total of 93 small and very small business bidders won approximately 40 percent of the 1,479 licenses for Blocks D, E, and F.[125] Based on this information, we conclude that the number of small broadband PCS licensees will include the 90 winning C Block bidders and the 93 qualifying bidders in the D, E, and F blocks, for a total of 183 small entity PCS providers as defined by the SBA and the Commission's auction rules.

53. *Cellular Licensees.* Neither the Commission nor the SBA has developed a definition of small entities applicable to cellular licensees. Therefore, the applicable definition of a small entity is the definition under the SBA rules applicable to radiotelephone (wireless) companies. This provides that a small entity is a radiotelephone company employing no more than 1,500 persons.[126] According to the Bureau of the Census, only twelve radiotelephone firms from a total of 1,178 such firms that operated during 1992 had 1,000 or more employees.[127] Therefore, even if all twelve of these firms were cellular telephone companies, nearly all cellular carriers were small businesses under the SBA's definition. In addition, we note that there are 1,758 cellular licenses; however, a cellular licensee may own several licenses. In addition, according to the most recent Trends in Telephone Service data, 808 carriers reported that they were engaged in the provision of either cellular service, Personal Communications Service (PCS), or Specialized Mobile Radio Telephone (SMR) service, which are placed together in the data.[128] We do not have data specifying the number of these carriers that are not independently owned and operated or have more than 1,500 employees, and thus are unable at this time to estimate with greater precision the number of cellular service carriers that would qualify as small business concerns under the SBA's definition. Consequently, we estimate that there are 808 or fewer small cellular service carriers that may be affected by any regulations adopted pursuant to this proceeding.

54. *Fixed Microwave Services.* Microwave services include common carrier,[129] private-operational fixed,[130] and broadcast auxiliary radio services.[131] At present, there are approximately 22,015 common carrier fixed licensees and 61,670 private operational-fixed licensees and broadcast auxiliary radio licensees in the microwave services. The Commission has not yet defined a small business with respect to microwave services. For purposes of this IRFA, we will utilize the SBA's definition applicable to radiotelephone companies—*i.e.,* an entity with no more than 1,500 persons.[132] We estimate, for this purpose, that all of the Fixed Microwave licensees (excluding broadcast auxiliary licensees) would qualify as small entities under the SBA definition for radiotelephone companies.

55. *Rural Radiotelephone Service.* The Commission has not adopted a definition of small entity specific to the Rural Radiotelephone Service.[133] A significant subset of the Rural Radiotelephone Service is the Basic Exchange Telephone Radio Systems (BETRS).[134] We will use the SBA's definition applicable to radiotelephone companies, *i.e.,* an entity employing no more than 1,500 persons.[135] There are approximately 1,000 licensees in the Rural Radiotelephone Service, and we estimate that almost all of them qualify as small entities under the SBA's definition.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements

56. The Competitive Networks First Report and Order requires incumbent LECs to respond promptly to requests by building owners to identify the location of the demarcation point. The Competitive Networks First Report and Order holds that if an incumbent LEC fails to produce this information within ten business days of the request, the premises owner may presume the demarcation point to be located at the minimum point of entry (MPOE).[136] The Competitive Networks First Report and Order further requires that where LECs do not establish a practice of placing the demarcation point at the MPOE, they fully inform building owners, at the time of installation, of their options regarding placement.

57. The Competitive Networks First Report and Order holds that in order to further competition, a request by a property owner to relocate the demarcation point to the MPOE must be addressed by an incumbent LEC in a reasonably timely and fair manner, so as not to unduly delay or hinder competitive LEC access. The Competitive Networks First Report and Order therefore directs incumbent LECs to conclude negotiations with requesting building owners within 45 days of such a request.

58. In addition, the Competitive Networks First Report and Order requires, as a condition of invoking protection under the OTARD rule from government, landlord and association restrictions, that licensees ensure that subscriber antennas be labeled to give notice of potential radiofrequency safety hazards of antennas used for fixed wireless transmissions. Labeling information should include minimum separation distances required between users and radiating antennas to meet the Commission's radiofrequency exposure guidelines. Labels should also include reference to the Commission's applicable radiofrequency exposure guidelines. In addition, the instruction manuals and other information accompanying subscriber transceivers should include a full explanation of the labels, as well as a reference to the applicable Commission radiofrequency exposure guidelines.

[127] 1992 Census, Series UC92–S–1, at Table 5, SIC code 4812.

[128] FCC, Common Carrier Bureau, Industry Analysis Division, Trends in Telephone Service, Table 19.3 (March 2000).

[129] 47 CFR 101 *et seq.* (formerly, part 21 of the Commission's Rules).

[130] Persons eligible under parts 80 and 90 of the Commission's rules can use Private Operational-Fixed Microwave services. See 47 CFR parts 80 and 90. Stations in this service are called operational-fixed to distinguish them from common carrier and public fixed stations. Only the licensee may use the operational-fixed station, and only for communications related to the licensee's commercial, industrial, or safety operations.

[131] Auxiliary Microwave Service is governed by part 74 of Title 47 of the Commission's Rules. See 47 CFR 74 *et seq.* Available to licensees of broadcast stations and to broadcast and cable network entities, broadcast auxiliary microwave stations are used for relaying broadcast television signals from the studio to the transmitter, or between two points such as a main studio and an auxiliary studio. The service also includes mobile TV pickups, which relay signals from a remote location back to the studio.

[132] 13 CFR 121.201, SIC 4812.

[133] The service is defined in section 22.99 of the Commission's Rules, 47 CFR 22.99.

[134] BETRS is defined in sections 22.757 and 22.759 of the Commission's Rules, 47 CFR 22.757 and 22.759.

[135] 13 CFR 121.201, SIC code 4812.

[136] The minimum point of entry is defined as ''either the closest practicable point to where the wiring crosses a property line or the closest practicable point to where the wiring enters a multiunit building or buildings.'' 47 CFR 68.3 (definition of demarcation point).

E. Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered.

59. The rule changes adopted in this Competitive Networks First Report and Order are intended to promote competition in local communications markets by implementing measures to ensure that competing telecommunications providers are able to provide services to customers in MTEs. The actions taken today will benefit consumers, telecommunications carriers, and building owners, including small entities.

60. In the Competitive Networks NPRM, we sought comment on seven proposals: (1) The tentative conclusion that, to the extent that LECs or other utilities own or control rooftop and other rights-of-way or riser conduit in MTEs, section 224 of the Act[137] requires that they permit competing providers access to such rights-of-way or conduit under just, reasonable and nondiscriminatory rates, terms, and conditions; (2) whether we should require incumbent LECs to make available to any requesting telecommunications carrier unbundled access to riser cable and wiring that they control within MTEs, subject to the Commission's future interpretation of the ''necessary'' and ''impair'' standards of section 251 of the Act;[138] (3) whether we should require building owners, who allow access to their premises to any telecommunications provider, to make comparable access available to all such providers on a nondiscriminatory basis; (4) whether we should forbid telecommunications service providers, under some or all circumstances, from entering into exclusive contracts with building owners, and abrogate any existing exclusive contracts between these parties; (5) whether we should modify our rules governing determination of the demarcation point between facilities controlled by the telephone company and by the landowner on multiple unit premises; (6) whether the rules governing access to cable home wiring for multichannel video program distribution should be extended to benefit providers of telecommunications services; and (7) whether we should adopt rules similar to those adopted in the video context under section 207 of the 1996 Act protecting the ability to place antennas to transmit and receive telecommunications signals and other signals that are not covered under section 207. After careful review and analysis of the voluminous record developed in response to the Competitive Networks NPRM, we take action on four proposals today.

61. First, we prohibit telecommunications service providers from entering into exclusive contracts to serve commercial buildings. In the Competitive Networks NPRM, we solicited comment on this proposal as an alternative to our proposal to require building owners to provide nondiscriminatory access to their premises to telecommunications providers.[139] As noted above, we received comment opposed to this second alternative. We have not adopted the latter proposal in the Competitive Networks First Report and Order; however, we do seek additional comment on it in the Competitive Networks FNPRM.[140] In the Competitive Networks NPRM, we also inquired whether we should abrogate existing exclusive contracts.[141] Based on the record in this proceeding, we have determined that abrogating exclusive contracts may interfere with the investment-backed expectations of the parties to such contracts, including small entities, and thus we defer consideration of this issue to the Competitive Networks FNPRM.[142] We also find that the record is not sufficiently developed to determine whether the prohibition on exclusive contracts should apply to residential MTEs,[143] and therefore defer this issue to the Competitive Networks FNPRM.[144] We note that there was widespread support in the record for prohibiting future exclusive contracts in commercial MTEs.[145] We also note our expectation that small entities, including small telecommunications carriers and small building owners, will benefit from the competitive telecommunications environment that the ban on exclusive contracts will foster.

62. Second, with respect to to modifying the Commission's demarcation point rules, we sought comment on, *inter alia*, establishing a uniform demarcation point at the minimum point of entry (MPOE) to multiple unit premises.[146] We have weighed the evidence in the record concerning this proposal carefully. We find that the potential financial burden of moving the demarcation point to the MPOE and the fact that it may hinder deployment of facilities by carriers, including small entities, which utilize unbundled local loops outweigh the potential benefits of adopting this proposal.[147] In the alternative, we take the following actions to promote access to telecommunications wiring by competing carriers, including small entities: (1) We clarify that the Commission's demarcation point rules govern the control of inside wiring and related facilities for purposes of competitive access, as well as the control of these facilities for purposes of installation and maintenance; (2) we require that incumbent LECs conclude negotiations with building owners to relocate the demarcation point to the MPOE within 45 days of the building owner's request; and (3) we require that incumbent LECs fulfill their duty to disclose the location of the demarcation point, where it is not located at the MPOE, within ten business days of a building owner's request.[148] Collectively, these actions ''will substantially reduce the potential for incumbent LECs to obstruct competitive access to MTEs,''[149] while imposing only minimal financial burdens. We expect that that many smaller carriers seeking competitive entry will benefit directly from these actions.

63. Third, we have adopted our proposal under section 224 of the Act[150] to require LECs and other utilities which own or control poles, ducts, conduits and other rights-of-way in MTEs, to permit competing providers access to such facilities under just, reasonable and nondiscriminatory rates, terms, and conditions. We anticipate that this action will benefit many small entities, including property owners and managers. We emphasize that our proposal as adopted will not impair the authority under state law, of property owners and managers to exclude telecommunications carriers from their

[150] 47 U.S.C. 224.

property.[151] Rather, building owners and managers, and their tenants, will benefit from our proposal because utilities, as defined in section 224(a)(1) of the Act,[152] will no longer have the unfettered ability to exclude telecommunications carriers from their poles, ducts, conduits, and defined rights-of way in MTEs. Telecommunications carriers, including small entities, will benefit from increased access to MTEs. We note that, although it did not file comments on the IRFA, the National League of Cities expressed concern that our proposed implementation of section 224 within buildings may preempt implementation or enforcement of state safety-related codes.[153] As we make clear in the Competitive Networks First Report and Order, ''our actions taken today are not intended to preempt, or impede, in any way the implementation or enforcement of state safety-related codes.'' [154]

64. Fourth, we are amending section 1.4000 of our rules (the ''OTARD rule'')[155] to protect the ability of customers to place antennas used for transmitting and receiving all forms of fixed wireless transmissions. Section 1.4000 currently prohibits any state or local law or regulation, private covenant, contract provision, lease provision, homeowners' association rule, or similar restriction that impairs the installation, maintenance, or use of certain antennas designed to receive video programming services on property within the exclusive use or control of the antenna user where the user has a direct or indirect ownership or leasehold interest in the property.

65. Currently, section 1.4000 prohibits restrictions that impair the installation, maintenance or use of: (1) Any antenna designed to receive direct broadcast satellite service, including direct-to-home satellite services, that is one meter or less in diameter or is located in Alaska; (2) any antenna designed to receive video programming services via multipoint distribution services, including multichannel multipoint distribution services, and local multipoint distribution services, and that is one meter or less in diameter; (3) any antenna designed to receive television broadcast signals; or (4) any mast supporting an antenna receiving any video programming described in the section. For the purposes of section 1.4000, a law, regulation or restriction impairs installation, maintenance or use of an antenna if it unreasonably delays or prevents installation, maintenance or use, unreasonably increases the cost of installation, maintenance or use, or precludes reception of an acceptable quality signal. Section 1.4000 also includes provisions for waiver and declaratory ruling proceedings.

66. There is widespread support in the record for an extension of the OTARD rule to include all fixed wireless services.[156] Moreover, we believe that extending the OTARD rule to include all fixed wireless services is essential to meeting our obligation to promote the deployment of advanced telecommunications capability under Section 706(a) of the 1996 Act.[157] To the extent a restriction unreasonably limits a customer's ability to place antennas to receive communications services, that restriction may impede the development of advanced, competitive services.

67. The *Competitive Networks First Report and Order* underscores the policy rationale for amending the OTARD rule:

> [D]istinguishing in the protection afforded based on the services provided through an antenna produces irrational results. Precisely the same antennas may be used for video services, telecommunications, and internet access. Indeed, sometimes a single company offers different packages of services using the same type of antennas. Under our current rules, a customer ordering a telecommunications/video package would enjoy protection that a customer ordering a telecommunications-only package from the same company using the same antenna would not. Thus, we conclude that the current rules potentially distort markets by creating incentives to include video programming service in many service offerings even if it is not efficient or desired by the consumer.[158]

We do not anticipate that today's rule change will have a significant adverse economic impact on small entities. To the contrary, we expect that small communications carriers that previously were unable to serve customers in MTEs may now be able to do so as a result of our rule change. However, we emphasize that ''the action we take today does not confer a right as against the building owner in restricted or common use areas in commercial or residential buildings, like most rooftops.'' [159] Rather our extension of the OTARD rule to wireless services ''applies only to areas within the exclusive use or control of the antenna user and in which the antenna user has a direct or indirect ownership or leasehold interest.''[160]

68. We also note that any impact on small entities is mitigated by our preservation of the exceptions to the OTARD rule permitting certain restrictions for safety and historic preservation purposes. Restrictions that would otherwise be forbidden are permitted if they are necessary to achieve certain safety or historic preservation purposes, are no more burdensome than necessary to achieve their purpose, and meet certain other conditions set forth in the OTARD rule. Finally, to address any potential concerns regarding transmitting antennas, we have determined that ''[t]o the extent that local governments, associations, and property owners elect to require professional installation for transmitting antennas, the usual prohibition of such requirements under the OTARD rule will not apply.'' [161]

Report to Congress

The Commission will send a copy of the Competitive Networks First Report and Order, including this FRFA, in a report to be sent to Congress pursuant to the Small Business Regulatory Enforcement Fairness Act of 1996, see 5 U.S.C. 801(a)(1)(A). In addition, the Commission will send a copy of the Competitive Networks First Report and Order, including the FRFA, to the Chief Counsel for Advocacy of the Small Business Administration. A copy of the Competitive Networks First Report and Order and FRFA (or summaries thereof) will also be published in the **Federal Register**. See 5 U.S.C. 604(b).

Ordering Clauses

69. Pursuant to sections 1, 2(a), 4(j), 4(i), 7, 201, 202, 205, 221, 224, 251, 303, and 405 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152(a), 154(i), 154(j), 157, 201, 202, 205, 221, 224, 251, 303, and 405, that this First Report and Order and Further Notice of Proposed Rulemaking in WT Docket No. 99–217, Fifth Report and Order and Memorandum Opinion and Order in CC Docket No. 96–98, and Fourth Report and Order and Memorandum Opinion and Order in CC Docket No. 88–57 and the amendments to the Commission's rules set forth are ADOPTED.

70. Sections 64.2500, 64.2501, and 64.2502 of the Commission's rules, 47 CFR 64.2500, 64.2501, and 64.2502, set forth in the Rule Changes, *Shall Become*

[151] See Competitive Networks First Report and Order, at paragraph 87.

[152] 47 U.S.C. 224(a)(1).

[153] National League of Cities, et al. Petition for EIS at 21–24.

[154] Competitive Networks First Report and Order, at paragraph 84.

[155] 47 CFR 1.4000.

[156] See e.g., AT&T Comments; PCIA Comments; Fixed Wireless Communications Coalition Comments; and Teligent Comments.

[157] 47 U.S.C. 157 note.

[158] Competitive Networks First Report and Order, at paragraph 98.

[159] *Id.*, at paragraph 124.

[160] *Id.*, at paragraph 100.

[161] *Id.*, at paragraph 119.

Effective March 12, 2001. The rule changes to 47 CFR 1.4000 and the rule changes amending the definition of the term ''demarcation point'' in 47 CFR 68.3 contain an information collection requirement that has not yet been approved by OMB; the FCC will publish a document in the **Federal Register** announcing the effective date of these rule changes.

71. The motions to submit Further Reply Comments filed by Concerned Communities and Organizations and the Wireless Communications Association International *Are Granted.*

72. The Petition for Clarification and Reconsideration of the 1997 Demarcation Point Order filed by Bell Atlantic *Is Granted,* as discussed in section IV.C.

73. The Petition for Clarification and Reconsideration of the 1997 Demarcation Point Order filed by BellSouth *Is Denied,* as discussed in section IV.C.

74. The Petition for Reconsideration of the Local Competition First Report and Order filed by WinStar *Is Granted* to the extent discussed in section IV.D and otherwise *Is Denied.*

75. The Petition for Environmental Impact Statement filed by the National League of Cities, the National Association of Counties, the Michigan Municipal League, and the Texas Coalition of Cities for Utility Issues *Is Denied* as discussed in Section IV.E, except to the extent that the Petition concerns issues raised in the Notice of Inquiry portion of the Competitive Networks NPRM, which will be addressed separately at a later time.

76. The Commission's Consumer Information Bureau, Reference Information Center, *Shall Send* a copy of this First Report and Order and Further Notice of Proposed Rulemaking, Fifth Report and Order and Memorandum Opinion and Order, and Fourth Report and Order and Memorandum Opinion and Order, including the Final Regulatory Flexibility Analysis and the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration in accordance with Sections 603(a) and 604(b) of the Regulatory Flexibility Act, Public Law 96–354, 94 Stat. 1164, 5 U.S.C. 603(a), 604(b).

Rule Changes

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR parts 1, 64, and 68 as follows:

PART 1—PRACTICE AND PROCEDURES

1. The authority citation for Part 1 continues to read as follows:

Authority: 47 U.S.C. 151, 154(i), 154(j), 155, 225, 303(r), 309.

2. Revise Subpart S to read as follows:

Subpart S—Preemption of Restrictions That ''Impair'' the Ability to Receive Television Broadcast Signals, Direct Broadcast Satellite Services, or Multichannel Multipoint Distribution Services or the Ability To Receive or Transmit Fixed Wireless Communications Signals

Sec.

1.4000 Restrictions impairing reception of television broadcast signals, direct broadcast satellite services, or multichannel multipoint distribution services and restrictions impairing reception or transmission of fixed wireless communications signals.

§ 1.4000 Restrictions impairing reception of television broadcast signals, direct broadcast satellite services, or multichannel multipoint distribution services and restrictions impairing reception or transmission of fixed wireless communications signals.

(a)(1) Any restriction, including but not limited to any state or local law or regulation, including zoning, land-use, or building regulations, or any private covenant, contract provision, lease provision, homeowners' association rule or similar restriction, on property within the exclusive use or control of the antenna user where the user has a direct or indirect ownership or leasehold interest in the property that impairs the installation, maintenance, or use of:

(i) An antenna that is:

(A) Used to receive direct broadcast satellite service, including direct-to-home satellite service, or to receive or transmit fixed wireless signals via satellite, and

(B) One meter or less in diameter or is located in Alaska;

(ii) An antenna that is:

(A) Used to receive video programming services via multipoint distribution services, including multichannel multipoint distribution services, instructional television fixed services, and local multipoint distribution services, or to receive or transmit fixed wireless signals other than via satellite, and

(B) That is one meter or less in diameter or diagonal measurement;

(iii) An antenna that is used to receive television broadcast signals; or

(iv) A mast supporting an antenna described in paragraphs (a)(1)(i), (a)(1)(ii), or (a)(1)(iii) of this section; is prohibited to the extent it so impairs, subject to paragraph (b) of this section.

(a)(2) For purposes of this section, ''fixed wireless signals'' means any commercial non-broadcast communications signals transmitted via wireless technology to and/or from a fixed customer location. Fixed wireless signals do not include, among other things, AM radio, FM radio, amateur (''HAM'') radio, Citizen's Band (CB) radio, and Digital Audio Radio Service (DARS) signals.

(a)(3) For purposes of this section, a law, regulation, or restriction impairs installation, maintenance, or use of an antenna if it:

(i) Unreasonably delays or prevents installation, maintenance, or use;

(ii) Unreasonably increases the cost of installation, maintenance, or use; or

(iii) Precludes reception or transmission of an acceptable quality signal.

(a)(4) Any fee or cost imposed on a user by a rule, law, regulation or restriction must be reasonable in light of the cost of the equipment or services and the rule, law, regulation or restriction's treatment of comparable devices. No civil, criminal, administrative, or other legal action of any kind shall be taken to enforce any restriction or regulation prohibited by this section except pursuant to paragraph (d) or (e) of this section. In addition, except with respect to restrictions pertaining to safety and historic preservation as described in paragraph (b) of this section, if a proceeding is initiated pursuant to paragraph (d) or (e) of this section, the entity seeking to enforce the antenna restrictions in question must suspend all enforcement efforts pending completion of review. No attorney's fees shall be collected or assessed and no fine or other penalties shall accrue against an antenna user while a proceeding is pending to determine the validity of any restriction. If a ruling is issued adverse to a user, the user shall be granted at least a 21-day grace period

in which to comply with the adverse ruling; and neither a fine nor a penalty may be collected from the user if the user complies with the adverse ruling during this grace period, unless the proponent of the restriction demonstrates, in the same proceeding which resulted in the adverse ruling, that the user's claim in the proceeding was frivolous.

(b) Any restriction otherwise prohibited by paragraph (a) of this section is permitted if:

(1) It is necessary to accomplish a clearly defined, legitimate safety objective that is either stated in the text, preamble, or legislative history of the restriction or described as applying to that restriction in a document that is readily available to antenna users, and would be applied to the extent practicable in a non-discriminatory manner to other appurtenances, devices, or fixtures that are comparable in size and weight and pose a similar or greater safety risk as these antennas and to which local regulation would normally apply; or

(2) It is necessary to preserve a prehistoric or historic district, site, building, structure or object included in, or eligible for inclusion on, the National Register of Historic Places, as set forth in the National Historic Preservation Act of 1966, as amended, 16 U.S.C. 470, and imposes no greater restrictions on antennas covered by this rule than are imposed on the installation, maintenance, or use of other modern appurtenances, devices, or fixtures that are comparable in size, weight, and appearance to these antennas; and

(3) It is no more burdensome to affected antenna users than is necessary to achieve the objectives described in paragraphs (b)(1) or (b)(2) of this section.

(c) In the case of an antenna that is used to transmit fixed wireless signals, the provisions of this section shall apply only if a label is affixed to the antenna that:

(1) Provides adequate notice regarding potential radiofrequency safety hazards, e.g., information regarding the safe minimum separation distance required between users and transceiver antennas; and

(2) References the applicable FCC-adopted limits for radiofrequency exposure specified in § 1.1310 of this chapter.

(d) Local governments or associations may apply to the Commission for a waiver of this section under § 1.3 of this chapter. Waiver requests must comply with the procedures in paragraphs (f) and (h) of this section and will be put on public notice. The Commission may grant a waiver upon a showing by the applicant of local concerns of a highly specialized or unusual nature. No petition for waiver shall be considered unless it specifies the restriction at issue. Waivers granted in accordance with this section shall not apply to restrictions amended or enacted after the waiver is granted. Any responsive pleadings must be served on all parties and filed within 30 days after release of a public notice that such petition has been filed. Any replies must be filed within 15 days thereafter.

(e) Parties may petition the Commission for a declaratory ruling under § 1.2 of this chapter, or a court of competent jurisdiction, to determine whether a particular restriction is permissible or prohibited under this section. Petitions to the Commission must comply with the procedures in paragraphs (f) and (h) of this section and will be put on public notice. Any responsive pleadings in a Commission proceeding must be served on all parties and filed within 30 days after release of a public notice that such petition has been filed. Any replies in a Commission proceeding must be served on all parties and filed within 15 days thereafter.

(f) Copies of petitions for declaratory rulings and waivers must be served on interested parties, including parties against whom the petitioner seeks to enforce the restriction or parties whose restrictions the petitioner seeks to prohibit. A certificate of service stating on whom the petition was served must be filed with the petition. In addition, in a Commission proceeding brought by an association or a local government, constructive notice of the proceeding must be given to members of the association or to the citizens under the local government's jurisdiction. In a court proceeding brought by an association, an association must give constructive notice of the proceeding to its members. Where constructive notice is required, the petitioner or plaintiff must file with the Commission or the court overseeing the proceeding a copy of the constructive notice with a statement explaining where the notice was placed and why such placement was reasonable.

(g) In any proceeding regarding the scope or interpretation of any provision of this section, the burden of demonstrating that a particular governmental or nongovernmental restriction complies with this section and does not impair the installation, maintenance, or use of devices used for over-the-air reception of video programming services or devices used to receive or transmit fixed wireless signals shall be on the party that seeks to impose or maintain the restriction.

(h) All allegations of fact contained in petitions and related pleadings before the Commission must be supported by affidavit of a person or persons with actual knowledge thereof. An original and two copies of all petitions and pleadings should be addressed to the Secretary, Federal Communications Commission, 445 12th Street, SW., Washington, DC 20554. Copies of the petitions and related pleadings will be available for public inspection in the Reference Information Center, Consumer Information Bureau, Federal Communications Commission, 445 12th Street, SW., Washington, DC 20554. Copies will be available for purchase from the Commission's contract copy center, and Commission decisions will be available on the Internet.

PART 64—MISCELLANEOUS RULES RELATING TO COMMON CARRIERS

1. The authority citation for part 64 continues to read:

Authority: 47 U.S.C. 151, 154, 201, 202, 205, 218–220, and 332 unless otherwise noted. Interpret or apply sections 201, 218, 225, 226, 227, 229, 332, 48 Stat. 1070, as amended. 47 U.S.C. 201–204, 208, 225, 226, 227, 229, 332, 501 and 503 unless otherwise noted.

2. Add Subpart Z to read as follows:

Subpart Z—Prohibition on Exclusive Telecommunications Contracts

Sec.

64.2500 Prohibited agreements.
64.2501 Scope of limitation.
64.2502 Effect of State law or regulation.

§ 64.2500 Prohibited agreements.

No common carrier shall enter into any contract, written or oral, that would in any way restrict the right of any commercial multiunit premises owner, or any agent or representative thereof, to permit any other common carrier to access and serve commercial tenants on that premises.

§ 64.2501 Scope of limitation.

For the purposes of this subpart, a multiunit premises is any contiguous area under common ownership or control that contains two or more distinct units. A commercial multiunit premises is any multiunit premises that is predominantly used for non-residential purposes, including for-profit, non-profit, and governmental uses. Nothing in this subpart shall be construed to forbid a common carrier from entering into an exclusive contract to serve only residential customers on any premises.

§ 64.2502 Effect of state law or regulation.

This subpart shall not preempt any state law or state regulation that requires a governmental entity to enter into a contract or understanding with a common carrier which would restrict such governmental entity's right to obtain telecommunications service from another common carrier.

PART 68—CONNECTION OF TERMINAL EQUIPMENT TO THE TELEPHONE NETWORK

1. The authority citation for part 68 continues to read:

Authority: Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; (47 U.S.C. 154, 155, 303).

2. Section 68.3 is amended by revising the definition of ''demarcation point'' to read as follows:

§ 68.3 Definitions.

* * * * *

Demarcation point: The point of demarcation and/or interconnection between telephone company communications facilities and terminal equipment, protective apparatus or wiring at a subscriber's premises. Carrier-installed facilities at, or constituting, the demarcation point shall consist of wire or a jack conforming to subpart F of part 68 of the Commission's rules. ''Premises'' as used herein generally means a dwelling unit, other building or a legal unit of real property such as a lot on which a dwelling unit is located, as determined by the telephone company's reasonable and nondiscriminatory standard operating practices. The ''minimum point of entry'' as used herein shall be either the closest practicable point to where the wiring crosses a property line or the closest practicable point to where the wiring enters a multiunit building or buildings. The telephone company's reasonable and nondiscriminatory standard operating practices shall determine which shall apply. The telephone company is not precluded from establishing reasonable classifications of multiunit premises for purposes of determining which shall apply. Multiunit premises include, but are not limited to, residential, commercial, shopping center and campus situations.

(a) *Single unit installations.* For single unit installations existing as of August 13, 1990, and installations installed after that date the demarcation point shall be a point within 30 cm (12 in) of the protector or, where there is no protector, within 30 cm (12 in) of where the telephone wire enters the customer's premises, or as close thereto as practicable.

(b) *Multiunit installations.* (1) In multiunit premises existing as of August 13, 1990, the demarcation point shall be determined in accordance with the local carrier's reasonable and non-discriminatory standard operating practices. Provided, however, that where there are multiple demarcation points within the multiunit premises, a demarcation point for a customer shall not be further inside the customer's premises than a point twelve inches from where the wiring enters the customer's premises, or as close thereto as practicable.

(2) In multiunit premises in which wiring is installed, including major additions or rearrangements of wiring existing prior to that date, the telephone company may place the demarcation point at the minimum point of entry (MPOE). If the telephone company does not elect to establish a practice of placing the demarcation point at the minimum point of entry, the multiunit premises owner shall determine the location of the demarcation point or points. The multiunit premises owner shall determine whether there shall be a single demarcation point location for all customers or separate such locations for each customer. Provided, however, that where there are multiple demarcation points within the multiunit premises, a demarcation point for a customer shall not be further inside the customer's premises than a point 30 cm (12 in) from where the wiring enters the customer's premises, or as close thereto as practicable. At the time of installation, the telephone company shall fully inform the premises owner of its options and rights regarding the placement of the demarcation point or points and shall not attempt to unduly influence that decision for the purpose of obstructing competitive entry.

(3) In any multiunit premises where the demarcation point is not already at the MPOE, the telephone company must comply with a request from the premises owner to relocate the demarcation point to the MPOE. The telephone company must negotiate terms in good faith and complete the negotiations within forty-five days from said request. Premises owners may file complaints with the Commission for resolution of allegations of bad faith bargaining by telephone companies. See 47 U.S.C. 208; 47 CFR 1.720 through 1.736 (1999) of this chapter.

(4) The telephone company shall make available information on the location of the demarcation point within ten business days of a request from the premises owner. If the telephone company does not provide the information within that time, the premises owner may presume the demarcation point to be at the MPOE. Notwithstanding the provisions of 47 CFR 68.110(c), telephone companies must make this information freely available to the requesting premises owner.

(5) In multiunit premises with more than one customer, the premises owner may adopt a policy restricting a customer's access to wiring on the premises to only that wiring located in the customer's individual unit that serves only that particular customer.

BILLING CODE 6712–01–U

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 51

[CC Docket Nos. 98–147, 98–11, 98–26, 98–32, 98–15, 98–78, 98–91; FCC 00–293]

Deployment of Wireline Services Offering Advanced Telecommunications Capability

AGENCY: Federal Communications Commission (FCC).

ACTION: Final Rule; denial of reconsideration.

SUMMARY: This document affirms on reconsideration the Commission's determination that section 706(a) of the Telecommunications Act of 1996 (1996 Act) does not constitute an independent grant of forbearance authority. This documents also affirms on reconsideration the requirement that incumbent local exchange carriers (LECs) must provide unbundled loops conditioned to carry advanced services, even if the incumbent is not itself providing such services.

FOR FURTHER INFORMATION CONTACT: William Kehoe, Special Counsel, Common Carrier Bureau, Policy and Program Planning Division, 202–418–1580. Further information also may be obtained by calling the Common Carrier Bureau's TTY number: 202–418–0484.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Order on Reconsideration in CC Docket No. 98–147, FCC 00–293, adopted on August 3, 2000, and released August 4, 2000. The complete text of this Order on Reconsideration is available for inspection and copying during normal business hours in the FCC Reference Information Center, Courtyard Level, 445 Twelfth Street, SW. Washington,

DC, and also may be purchased from the Commission's copy contractor, International Transcription Services (ITS), CY–B400, 445 Twelfth Street, SW., Washington, DC.

1. In the Advanced Services Order, 63 FR 45140, August 24, 1998, the Commission addressed, among other matters, petitions in which several BOCs, including Bell Atlantic and SBC, had requested that the Commission forbear from applying the provisions of sections 251(c) and 271 to their advanced services. In rejecting those requests, the Commission explained in detail why, in light of the statutory language, the framework of the 1996 Act, its legislative history, and Congress' policy objectives, the most logical statutory interpretation is that section 706(a) does not constitute an independent grant of authority. The Commission therefore determined that section 706(a) does not constitute an independent grant of forbearance authority. In petitions for reconsideration of the Advanced Services Order, Bell Atlantic and SBC challenged that determination. In the Order on Reconsideration, the Commission affirmed that section 706(a) does not constitute an independent grant of forbearance authority.

2. In the Advanced Services Order, the Commission concluded that the rules adopted in the Local Competition First Report and Order required that, to the extent technically feasible, an incumbent LEC must provide to competing carriers unbundled loops conditioned to carry advanced services, even if the incumbent is not itself providing such services. Bell Atlantic and SBC requested reconsideration of this conclusion. In the Order on Reconsideration, the Commission denied that request based on the treatment of loop conditioning in its UNE Remand Order.

Paperwork Reduction Act of 1995 Analysis

3. The actions contained in this Order on Reconsideration affirmed prior Commission actions and thus do not impose new or modified reporting requirements on the public.

Regulatory Flexibility Analysis (RFA)

4. The Order on Reconsideration affirmed prior Commission actions and thus does not change the Commission's regulatory flexibility analysis.

Procedural Matters

5. Pursuant to sections 1–4, 10, 201, 202, 251–254, 271, and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 151–154, 160, 201, 202, 251–254, 271, and 303(r), that the Petitions for Reconsideration filed September 8, 1998, by Bell Atlantic and SBC *Are Denied.*

Federal Communications Commission.

Magalie Roman Salas,

Secretary.

47 CFR Part 73

[DA 01–02, MM Docket No. 00–178, RM–9914]

Digital Television Broadcast Service; Charlotte, NC

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Charlotte-Mecklenburg Public Broadcasting Authority, licensee of noncommercial educational station WTVI–TV, NTSC channel * 42, substitutes DTV channel * 11 for station WTVI–TV's assigned DTV channel * 24 at Charlotte, North Carolina. *See* 65 FR 59388, October 5, 2000. DTV channel * 11 can be allotted to Charlotte in compliance with the principle community coverage requirements of Section 73.625(a) at reference coordinates (35–17–14 N. and 80–41–45 W.) with a power of 2.0, HAAT of 387 meters and with a DTV service population of 1747 thousand. With is action, this proceeding is terminated.

DATES: Effective February 20, 2001.

FOR FURTHER INFORMATION CONTACT: Pam Blumenthal, Mass Media Bureau, (202) 418–1600.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 00–178, adopted January 2, 2001, and released January 5, 2001. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center 445 12th Street, SW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Services, Inc., (202) 857–3800, 1231 20th Street, NW., Washington, DC 20036.

List of Subjects in 47 CFR Part 73

Television, Digital television broadcasting.

Part 73 of Title 47 of the Code of Federal Regulations is amended as follows:

PART 73—[AMENDED]

1. The authority citation for Part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334, 336.

§ 73.622 [Amended]

2. Section 73.622(b), the Table of Digital Television Allotments under North Carolina, is amended by removing DTV channel * 24 and adding DTV channel * 11 at Charlotte.

Federal Communications Commission.

RIN 0648-AO30

Taking of Marine Mammals Incidental to Commercial Fishing Operations; Harbor Porpoise Take Reduction Plan Regulations; Change to the List of Exempted Waters

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS amends the Harbor Porpoise Take Reduction Plan (HPTRP) to redefine Delaware Bay in the list of exempted waters to include waters landward of the 72 COLREGS line (International Regulations for Preventing Collisions at Sea, 1972). Members of the Mid-Atlantic Harbor Porpoise Take Reduction Team (MATRT) recommended by consensus that NMFS redefine the list of exempted waters because harbor porpoise stranding and observer data did not justify subjecting fishers in Delaware Bay to the HPTRP gear restrictions. The intent of this final rule is to exempt fishers operating in Delaware Bay from the HPTRP regulations as it is redefined under this rule.

DATES: Effective January 11, 2001.

FOR FURTHER INFORMATION CONTACT: Gregg Lamontagne, NMFS, Northeast

Region, 978-281-9291; Kim Thounhurst, NMFS Northeast Region, 978-281-9138; Diane Borggaard, NMFS, Southeast Region, 727-570-5312; or Emily Hanson, NMFS Office of Protected Resources, 301-713-2322, ext. 101.

SUPPLEMENTARY INFORMATION: Section 118 of the Marine Mammal Protection Act (MMPA) authorizes NMFS to issue regulations to implement a marine mammal take reduction plan or amendments to a marine mammal take reduction plan that, among other things, may restrict fishing by time or area. On December 2, 1998, NMFS published a final rule (63 FR 66464) implementing the HPTRP. Among other measures, the final rule identified those waters that are exempt from the HPTRP (50 CFR 229.34).

The MATRT met on January 13 and 14, 2000, in Alexandria, VA. The MATRT recommended by consensus that the line defining the exempted waters of Delaware Bay be moved seaward from 39° 16.70'N 75° 14.60'W TO 39° 11.25'N 75° 23.90'W (i.e., southern point of Nantuxent Cove, NJ to the southern end of Kelly Island, Port Mahon, DE) and be redefined as a line from the Cape May Canal to the Lewes Ferry Terminal. The MATRT concluded that there was no compelling reason for maintaining the existing position of the line in Delaware Bay, compared to other large bays in the Mid-Atlantic region (e.g., Chesapeake Bay, Long Island Sound), which typically establish the exempted waters as landward of the mouth of an inlet or the 72 COLREGS line. The MATRT believed that the existing line imposed unnecessary requirements on the Delaware Bay fishing community because harbor porpoise stranding data and observer data did not justify imposing HPTRP gear restrictions on fishers in Delaware Bay.

NMFS published a proposed rule on October 27, 2000 (65 FR 64415), to redefine exempted waters for Delaware Bay to include all marine and tidal waters landward of the 72 COLREGS demarcation line, as depicted or noted on nautical charts published by NOAA (Coast Charts 1:80,000 scale), and as described in 33 CFR part 80. Using the COLREGS line is a slight deviation from the MATRT's consensus recommendation. The 72 COLREGS line was selected instead of the line recommended by the MATRT because the 72 COLREGS line is a well known and widely published line of demarcation. The actual difference between the COLREGS line and the MATRT recommended line is a seaward shift of approximately 1 nautical mile.

In the proposed rule, NMFS requested comments on the MATRT's consensus recommendation to change the definition of small mesh gillnet to mean a gillnet constructed with a mesh size of greater than 5.5 inches (13.97 cm) but less than 7 inches (17.78 cm). As currently defined in 50 CFR 229.2, small mesh gillnet means a gillnet constructed with a mesh size of greater than 5 inches (12.7 cm) to less than 7 inches (17.78 cm). NMFS did not propose implementing the MATRT's recommendation to change the definition of small mesh gillnet because of sea sampling observer data from the Mid-Atlantic in 1999 and 2000, which reported four takes in 4.9-5.0 inch mesh size gillnet (reported by a vessel captain) with shad as the primary species sought. NMFS was concerned about implementing the MATRT's recommendation, which would relax the requirements of the HPTRP, while takes continued to occur in similar mesh sizes.

Comments and Responses to the Notice of Proposed Change to the HPTRP

Five comment letters were received in response to the October 27, 2000, proposed rule. Comment letters were received from state agencies and commercial fishing organizations. The comments are summarized here followed by NMFS responses thereto.

Comments on the Proposed Change to the List of Exempted Waters

All five commenters supported the proposed change to the line delineating exempted waters for Delaware Bay.

Response

For the reasons discussed in the preamble to the proposed rule, NMFS' is publishing this final rule to implement the change proposed on October 27, 2000 (65 FR 64415).

Comments on the MATRT's Recommendation to Change the Definition of Small Mesh Gillnet

All five commenters supported the MATRT's recommendation to redefine small mesh gillnet, primarily because of the impact the existing regulations have on the shad fishery. According to the commenters, fishers targeting shad have two options under the existing regulations, both of which could have negative impacts on the shad population, the fishers, and harbor porpoise. One, fishers may opt to use mesh sizes of 5 inches (12.7 cm) and less to avoid the requirements of the HPTRP. The use of smaller mesh leads to increased catches of smaller shad, both bucks and young females, which have a low market value. Additionally, the young females caught may not have spawned. This would cause both a negative economic impact on the fishers and a negative biological impact on shad populations. Also, fishers may opt to fish with mesh sizes of greater than 5 inches (12.7 cm) and use the twine size required by the HPTRP, which is heavier than twine size traditionally used in the shad fishery. The heavy twine size does not effectively catch shad, causing a negative economic impact on the fishers. Both options could result in increased fishing effort as more net is set to mitigate for lost catch or catch with a lower market value, which could increase the likelihood of interactions with marine mammals.

Commenters also noted that the shad fishery has exhibited low levels of harbor porpoise interaction and that the Atlantic States Marine Fisheries Commission's (ASMFC) Interstate Fishery Management Plan for shad encourages the use of mesh with a size larger than 5 inches (12.7 cm) because it increases the harvest of larger, more valuable female shad that have already spawned. Commenters stated that the ASMFC will be phasing out the ocean intercept shad fishery by 2005, however it is still economically important for fishers to be able to fish for shad until the fishery is closed.

One commenter noted that the MATRT's proposal would exempt most of Delaware's ocean gill netting operations from the HPTRP. Another commenter noted that the MATRT's recommendation would decrease the bycatch mortality of striped bass during their spring migration along the east coast. If the current definition of small mesh gillnet remains, fishers in New Jersey who want to use mesh with a size of 5.5 inch (13.97 cm) would be required to use heavier twine size than is traditionally used, which would increase striped bass mortality.

Response

NMFS is not implementing the MATRT's mesh size proposal at this time, due to takes of harbor porpoise in mesh sizes of 4.9-5.0 inches in 2000. The issue of redefining small mesh gillnet and reducing takes in gillnet gear with mesh sizes of 5 inches (12.7 cm) and less was addressed by the MATRT at its annual meeting November 28-30, 2000. The MATRT was not able to develop a consensus recommendation for NMFS to redefine small mesh gillnet while also addressing the takes observed in 1999 and 2000.

NMFS plans to continue observing the mid-Atlantic coastal gillnet fisheries,

including vessels using small mesh gillnet, and expanding observer coverage to vessels using gillnet mesh sizes of 5.0 inches (12.7 cm) or smaller to both monitor existing levels of harbor porpoise take and to learn what gear characteristics or operational characteristics take harbor porpoise. If the MATRT or fishers identify gear characteristics or operational characteristics that allow NMFS to relieve restrictions while still reducing the take of harbor porpoise incidental to commercial fishing operations, NMFS will consider implementing appropriate changes to the HPTRP. Additionally, NMFS will consult with ASMFC to determine if other options exist that NMFS has not yet considered.

Classification

NMFS prepared an Environmental Assessment (EA) of the final rule (63 FR 66464, Dec. 2, 1998) to implement the HPTRP. This final rule amends the HPTRP. NMFS prepared an EA for this action and determined that amending the HPTRP as described in this final rule will not have a significant impact on the quality of the human environment.

The Chief Counsel for Regulation for the Department of Commerce certified to the Chief Counsel for Advocacy for the Small Business Administration when this rule was proposed that it would not have a significant adverse economic impact on a substantial number of small entities. While comments were received regarding the economic impact on small entities of a MATRT recommendation which NMFS did not propose to implement in the proposal, no comments regarding the economic impact of NMFS' proposal were received. Accordingly, the basis for the certification has not changed and NMFS has not prepared a Regulatory Flexibility Analysis.

This final rule does not contain any collection of information requirement subject to the Paperwork Reduction Act.

A section 7 Endangered Species Act (ESA) consultation on the HPTRP was conducted on November 12, 1998. That consultation concluded that measures specific to the HPTRP are not likely to adversely affect any ESA listed species under NMFS jurisdiction. Due to environmental conditions, turtles do not occur in Delaware Bay during the same time that the HPTRP restrictions are in place. Therefore, lifting the restrictions in Delaware Bay is not likely to impact turtles, and therefore no further section 7 consultation is required. This final rule falls within the scope of the section 7 consultation on the HPTRP and is not likely to adversely affect endangered or threatened species.

The changes in the HPTRP made by this final rule are not expected to have adverse impacts on marine mammals.

This final rule has been determined to be not significant for the purposes of Executive Order 12866.

This final rule does not change the determination that the HPTRP will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal management programs of the Atlantic states.

This final rule is promulgated in compliance with all procedural requirements established by the Administrative Procedure Act.

List of Subjects in 50 CFR Part 229

Administrative practice and procedure, Confidential business information, Fisheries, Marine mammals, Reporting and recordkeeping requirements.

Dated: January 4, 2000.

Penelope D. Dalton,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 229 is amended as follows:

PART 229—AUTHORIZATION FOR COMMERCIAL FISHERIES UNDER THE MARINE MAMMAL PROTECTION ACT OF 1972

1. The authority citation for part 229 continues to read as follows:

Authority: 16 U.S.C. 1361 *et seq.*

2. In § 229.34, paragraph (a)(2) is revised to read as follows:

§ 229.34 Harbor Porpoise Take Reduction Plan - Mid-Atlantic.

(a) * * *

(2) Exempted waters. All waters landward of the first bridge over any embayment, harbor, or inlet will be exempted. The regulations in this section do not apply to waters landward of the following lines:

New York

40° 45.70' N 72° 45.15' W TO 40° 45.72' N 72° 45.30' W (Moriches Bay Inlet)

40° 37.32' N 73° 18.40' W TO 40° 38.00' N 73° 18.56' W (Fire Island Inlet)

40° 34.40' N 73° 34.55' W TO 40° 35.08' N 73° 35.22' W (Jones Inlet)

New Jersey/Delaware

39° 45.90' N 74° 05.90' W TO 39° 45.15' N 74° 06.20' W (Barnegat Inlet)

39° 30.70' N 74° 16.70' W TO 39° 26.30' N 74° 19.75' W (Beach Haven to Brigantine Inlet)

38° 56.20' N 74° 51.70' W TO 38° 56.20' N 74° 51.90' W (Cape May Inlet)

All marine and tidal waters landward of the 72 COLREGS demarcation line (International Regulations for Preventing Collisions at Sea, 1972), as depicted or noted on nautical charts published by NOAA (Coast Charts 1:80,000 scale), and as described in 33 CFR part 80. (Delaware Bay)

Maryland/Virginia

38° 19.48' N 75° 05.10' W TO 38° 19.35' N 75° 05.25' W (Ocean City Inlet)

37° 52.' N 75° 24.30' W TO 37° 11.90' N 75° 48.30' W (Chincoteague to Ship Shoal Inlet)

37° 11.10' N 75° 49.30' W TO 37° 10.65' N 75° 49.60' W (Little Inlet)

37° 07.00' N 75° 53.75' W TO 37° 05.30' N 75° 56.' W (Smith Island Inlet)

North Carolina

All marine and tidal waters landward of the 72 COLREGS demarcation line (International Regulations for Preventing Collisions at Sea, 1972), as depicted or noted on nautical charts published by NOAA (Coast Charts 1:80,000 scale), and as described in 33 CFR part 80.

BILLING CODE 3510–22–S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 600 and 660

[Docket No.; I.D. 121500E]

RIN 0648-AN82

Magnuson-Stevens Act Provisions; Fisheries off West Coast States and in the Western Pacific; Pacific Coast Groundfish Fishery; Annual Specifications and Management Measures

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: 2001 groundfish fishery specifications and management measures; announcement of the overfished status of darkblotched and widow rockfish; announcement of exempted fishing permits; request for comments.

SUMMARY: NMFS announces the 2001 fishery specifications and management

measures for groundfish taken in the U.S. exclusive economic zone (EEZ) and state waters off the coasts of Washington, Oregon, and California. The specifications include the levels of the acceptable biological catch (ABC) and optimum yields (OYs). The commercial OYs (the OYs reduced by expected discard and by amounts expected to be taken in tribal, recreational, and compensation fisheries) are allocated between the limited entry and open access fisheries. The management measures for 2001 are designed to keep landings within the OYs for those species for which there are OYs and to achieve the goals and objectives of the Pacific Coast Groundfish Fishery Management Plan (FMP) and associated rebuilding plans for overfished stocks, consistent with the requirements of the Magnuson Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) and the guidelines based on the National Standards in the Magnuson-Stevens Act published in the **Federal Register** on May 1, 1998. These management measures are intended to prevent overfishing and to rebuild Pacific Coast groundfish stocks. These measures are also intended to achieve as much harvest of healthier stocks as possible given the conservation requirements of the Magnuson-Stevens Act.

DATES: Effective 0001 hours local time (l.t.) January 5, 2001, until the 2002 annual specifications and management measures are effective, unless modified, superseded, or rescinded. The 2002 annual specifications and management measures will be published in the **Federal Register**. Comments must be received no later than 5:00 p.m, l.t., on February 12, 2001.

ADDRESSES: Written comments on these actions must be mailed to Donna Darm, Acting Administrator, Northwest Region (Regional Administrator), NMFS, 7600 Sand Point Way N.E., BIN C15700, Bldg. 1, Seattle, WA 98115-0070, or faxed to 206-526-6736; or Rebecca Lent, Administrator, Southwest Region, NMFS, 501 West Ocean Blvd., Suite 4200, Long Beach, CA 90802-4213, or faxed to 562-980-4047. Comments will not be accepted if submitted via e-mail or Internet. Information relevant to these specifications and management measures, which includes an environmental assessment/regulatory impact review (EA/RIR) and the stock assessment and fishery evaluation (SAFE) report, is available for public review during business hours at the offices of the NMFS Northwest Regional Administrator and the NMFS Southwest Regional Administrator, or may be obtained from the Pacific Fishery Management Council (Council), at 2130 SW Fifth Avenue, Suite 224, Portland, OR 97201, phone: 503-326-6352. Additional reports referred to in this document may also be obtained from the Council.

Send comments regarding the reporting burden estimate or any other aspect of the collection-of-information requirements in this final rule, including suggestions for reducing the burden, to one of the NMFS addresses and to the Office of Management and Budget (OMB), Washington, D.C. 20503 (ATTN: NOAA Desk Officer). Send comments regarding any ambiguity or unnecessary complexity arising from the language used in this rule to Donna Darm or Rebecca Lent.

FOR FURTHER INFORMATION CONTACT: Yvonne deReynier or Becky Renko (Northwest Region, NMFS), phone: 206-526-6140; fax: 206-526-6736 and; e-mail: *yvonne.dereynier@noaa.gov*, *becky.renko@noaa.gov*or Svein Fougner (Southwest Region, NMFS) phone: 562-980-4000; fax: 562-980-4047 and; e-mail: *svein.fougner@noaa.gov*.

SUPPLEMENTARY INFORMATION:

Electronic Access

This **Federal Register** rule also is accessible via the Internet at the Office of the Federal Register's website at http://www.access.gpo.gov/su--docs/aces/aces140.html. Background information and documents are available at the NMFS Northwest Region website at *http://www.nwr.noaa.gov/1sustfsh/gdfsh01.htm*and at the Council's website at *http://www.pcouncil.org*.

Background

The FMP requires that fishery specifications for groundfish be evaluated and revised, as necessary, each calendar year, that OYs be specified for species or species groups in need of additional protection, and that management measures designed to achieve the OYs be published in the **Federal Register** and made effective by January 1, the beginning of the fishing year. The Magnuson-Stevens Act and the FMP require that NMFS implement actions to prevent overfishing and to rebuild overfished stocks. This action announces and makes effective the final 2001 fishery specifications and the management measures that are designed to rebuild overfished stocks through constraining direct and incidental mortality, to prevent overfishing, and to achieve as much of the OYs as practicable for healthier groundfish stocks managed under the FMP. These final specifications and management measures were considered by the Council at two meetings and were recommended to NMFS by the Council at its November 2000 meeting in Vancouver, WA.

I. Final Specifications

The fishery specifications include ABCs, the designation of OYs, which may be represented by harvest guidelines (HGs) or quotas for species that need individual management, and the allocation of the commercial OYs between the open access and limited entry segments of the fishery. These specifications include fish caught in state ocean waters (0-3 nautical miles (nm) offshore) as well as fish caught in the EEZ (3-200 nm offshore). The OYs and ABCs recommended by the Council and announced in this document are consistent with the Magnuson-Stevens Act, the groundfish FMP, the rebuilding plans initially approved by NMFS in 2000 (lingcod, bocaccio, and Pacific ocean perch (POP)), and the rebuilding plans (canary rockfish and cowcod) adopted by the Council at its November 2000 meeting. In a separate **Federal Register** document, NMFS will announce the availability of canary rockfish and cowcod rebuilding plans for public review.

a/ABC applies to the U.S. portion of the Vancouver area, except as noted under individual species.

b/Lingcod was designated as overfished in 1999 when the biomass was believed to be at 10 percent of the unfished biomass. A coastwide assessment was conducted in 2000 and confirmed that the stock is overfished coastwide. Separate ABCs were calculated for the northern (Vancouver-Columbia) and southern (Eureka-Monterey-Conception) areas based on F45% Fmsy proxy. The stock assessment included parts of Canadian waters; however, the U.S. portion of the ABC for the Vancouver area was set at 44 percent of the total for that area. The total catch OY of 611 mt is the sum of the yield for the northern (307 mt) and the southern (304 mt) assessments where a constant exploitation rate that results in a 60 percent probability of rebuilding the stock to Fmsy within 9 years was used. The total catch OY is reduced by 360 mt for the amount that is estimated to be taken by the recreational fishery, resulting in a commercial OY of 251 mt. Tribal vessels land a small amount of lingcod, but do not have a specific allocation at this time. No discards are assumed.

c/"Other species", these are neither common nor important to the commercial and recreational fisheries in the areas footnoted. Accordingly, Pacific cod is included in the non-commercial OY of "other fish" and Rockfish species are included are included in either the "other rockfish" or "remaining rockfish" for the areas footnoted only.

d/Whiting is believed to be at less than 40 percent of its unfished biomass. The 1998 assessment was updated for 2000 using limited new data. The U.S.-Canada ABC (266,000 mt) is based on the updated assessment with the

application of an Fmsy proxy of F40%. Because the biomass is estimated to be within the precautionary zone, the 40-10 default harvest policy was applied reducing the coastwide ABC to 238,000 mt. The whiting U.S. ABC is 80 percent (190,400 mt) of the 238,000 mt. The U.S. total catch OY was then set equal to the U.S. ABC. The commercial OY for whiting is 162,900 mt (the 190,400 mt OY minus the 27,500 mt tribal allocation), and is allocated 42 percent to the shore-based sector, 24 percent to the mothership sector, and 34 percent to the catcher-processor sector. Discards of whiting are estimated from observer data and counted towards the OY inseason.

e/Sablefish north of 36° N. lat. is believed to be at 37 percent of its unfished biomass. The 7,661 ABC for the area north of 36° N. lat. is based on a F45% Fmsy proxy. The total catch OY (6,895 mt) is based on the application of the 40-10 harvest rate policy because the biomass is estimated to be in the precautionary zone. The total catch OY is reduced by 690 mt for the tribal set aside and by 24 mt for the compensation to vessels that conducted resource surveys. The remaining 6,181 is the commercial total catch OY. The open access allocation of 9.4 percent of the commercial OY, results in a total catch OY of 581 mt. The limited entry allocation of 90.6 percent of the commercial OY, results in a total catch OY of 5,600 mt. The limited entry OY is further divided with 58 percent (3,248 mt) allocated to the trawl fishery and 42 percent (2,352 mt) allocated to the nontrawl fishery. For the first time in 2000, discard rates will be applied by sector to obtain landed catch value.

f/Sablefish in the Conception area has an ABC (425 mt) based on historical landings. To address uncertainty in stock assessment due to limited information, the ABC was reduced by 50 percent to obtain the OY (212 mt). There are no limited entry or open access allocations in the Conception area at this time.

g/Dover sole north of 36° N. lat. was assessed as a unit in 1997 and provided an ABC (7,151 mt) for landed catch based on a F40% Fmsy proxy. The Conception area ABC (1,053 mt) is at the level established in the original FMP, and was based on average landings. To address uncertainty in stock assessment due to limited information, the Conception area landed catch ABC was reduced by 50 percent to obtain the landed catch value. The ABC in this table represents total catch and was determined by estimating that 5 percent of the total catch was discarded to obtain the landed catch. Therefore, the coastwide ABC and total catch OY is 7,677 mt. The OY is further reduced by 67 mt as compensation to vessels that conducted resource surveys, resulting in a commercial OY of 7,610 mt.

h/Petrale Sole was believed to be at 42 percent of its unfished biomass following a 1999 assessment. For 2000, the final ABC for the Vancouver-Columbia area (1,262 mt) is based on a F40% Fmsy proxy. The ABCs for the Eureka, Monterey, and Conception areas (1,500 mt) continues at the same level as 2000.

i/Pacfic ocean perch (POP) was designated as overfished in 1999. The ABC (1541 mt) is based on the 2000 assessment for the Vancouver-Columbia area (1,523 mt at F50% Fmsy proxy), plus 18 mt for the Eureka area. The 2001 OY of 303 mt for the Vancouver-Columbia-Eureka area was set in the rebuilding plan. Discards are assumed to be 16 percent for a landed catch value of 255 mt.

j/ Shortbelly rockfish remains an unexploited stock and is difficult to assess quantitatively. The 1989 assessment provided 2 alterative yield calculations of 13,900 mt and 47,000 mt. NMFS surveys indicate poor recruitment in most years since 1989, indicating low recent productivity and a naturally declining population in spite of low fishing pressure. The ABC and OY therefore are

reduced to 13,900 mt, the low end of the range in the assessment.

k/Widow rockfish is believed to be at 24 percent of its unfished biomass indicating that its overfished at this time. The ABC (3,727 mt) is based on the 2000 assessment with a F50% Fmsy proxy. Two OY options were presented to the Council ranging from 2,864 (Based on F50% Fmsy proxy and the 40-10 harvest policy) to 1,775 mt (based on F65% Fmsy proxy and the 40-10 harvest policy). The Council adopted the average of the option range resulting in a total catch OY of 2,300 mt. The OY is reduced by 40 mt for the amount estimated to be taken as recreational catch, resulting in a commercial OY of 2,260 mt. The open access allocation (68 mt) is 3 percent of the commercial OY. The limited entry allocation (2,192 mt) is 97 percent of the commercial OY. The limited entry allocation is further reduced by 250 mt for anticipated bycatch in the offshore whiting fishery, and the remainder (1,942 mt) is reduced by 16 percent (311 mt) to account for trip limit induced discards, resulting in a landed catch equivalent for the limited entry fishery of 1,631 mt (excluding harvest in the whiting fishery).

l/Canary rockfish is believed to be at 22 percent of its unfished biomass in the north (north of Cape Blanco) and 8 percent of its unfished biomass in the south (south of Cape Blanco). Canary rockfish was declared overfished in 2000. In 1999, two assessments addressed the northern and southern portions of the stock. Although each area was assessed separately, there is no definitive evidence of separate northern and southern stocks. The coastwide ABC (228 mt) is based on a Fmsy proxy of F50%. The coastwide OY (93 mt) is based on the rebuilding plan and is the sum of 73 mt for the northern area, plus 20 mt for the southern area. The OY is reduced by 44 mt for the estimated recreational catch and 5 mt for research surveys, resulting in a commercial OY of 44 mt. Tribal vessels land a small amount of canary rockfish, but do not have a specific allocation at this time. The open access allocation (5 mt) is 12.3 percent of the commercial OY. The limited entry allocation (39 mt) is 87.7 percent of the commercial OY. The limited entry allocation is further reduced by 3 mt for anticipated bycatch in the offshore whiting fishery, and the remainder (36 mt) is reduced by 16 percent (6 mt) to account for trip limit-induced discards, resulting in a landed catch equivalent for the limited entry fishery of 30 mt (excluding harvest in the whiting fishery). However, the specific open access/limited entry allocation has been suspended during the rebuilding period as necessary to meet the overall rebuilding target while allowing harvest of healthy stocks.

m/Chilipeper rockfish - the ABC (2,700 mt) for the Monterey-Conception area is based on the 1998 stock assessment with the application of F50% Fmsy proxy. Because the biomass is believed to be above 40 percent of unfished, the default OY could be set equal to the ABC. However, the OY is set at 2,000 mt, near the recent average landed catch, to discourage effort on chilipepper which is known to have bycatch of bocaccio rockfish. The OY is reduced by 15 mt for the amount estimated to be taken in the recreational fishery, resulting in a commercial OY of 1,985 mt. Open access is allocated 44.3 percent (879 mt) of the commercial OY and limited entry is allocated 55.7 percent (1,106 mt) of the commercial OY. The assumed discard in the limited entry fishery is 16 percent, resulting in a landed catch value of 929 mt.

n/Bocaccio rockfish is believed to be at 2 percent of its unfished biomass and was designated as overfished in 1999. The ABC of 122 mt is based on a F50% Fmsy proxy. The OY (100 mt) is based on the rebuilding plan which is designed to rebuild the stock to MSY in 38 years. The OY is reduced by 48 mt for the amount estimated to be taken as recreational harvest, resulting in a 52 mt commercial OY. No discard amount is assumed within this OY.

o/Splitnose rockfish (also called "rosefish") - The 2001 ABC of 615 mt in the

southern area (Monterey-Conception) is based on the Fmsy proxy of F50%. The 461 mt OY for the southern area reflects a 25 percent precautionary adjustment because of the less rigorous assessment for this stock. In the north, splitnose is included in the minor rockfish OY. The assumed discard is 16 percent for a landed catch value of 387 mt.

p/Yellowtail rockfish is believed to be at 63 percent of its unfished biomass. The ABC of 3,146 mt is based on a 2000 stock assessment for the Vancouver-Columbia-Eureka areas with the Fmsy Proxy of F50%. The OY (3,146 mt) was set equal to the ABC. To derive the commercial OY (3,086 mt) the OY is reduced by 60 mt, the amount estimated to be taken in the recreational fishery. The open access allocation (256 mt) is 8.3 percent of the commercial OY. The limited entry allocation (2,830 mt) is 91.7 percent of the commercial OY. The limited entry landed catch allocation (1,810 mt) is determined by subtracting 675 mt for anticipated bycatch in the whiting fishery then deducting 16 percent from the remainder.

q/Thornyheads - The treaty tribes estimate that 3-4 mt of thornyheads will be taken in 2001 under a trip limit of 300 lb per trip. This small amount is not subtracted from the thornyhead OYs at this time.

r/Shortspine thornyhead was believed to be at 32 percent of its unfished biomass in 1999. The ABC (757 mt) in the north (Vancouver-Columbia-Eureka-Monterey) is based on a synthesis of two stock assessments conducted in 1998 with the application of a F50% Fmsy proxy. The OY (689 mt) is based on applying the 40-10 harvest policy because the biomass is in the precautionary zone. The commercial OY is reduced by 4.1 mt deducted for compensation fishing as compensation to vessels that conducted resource surveys. Open access is allocated 0.27 percent (2 mt) of the commercial OY and limited entry is allocated 55.7 percent (683 mt) of the commercial OY. A 20 percent rate of discard is applied to the limited entry allocation to obtain the landed catch value of 546 mt.

s/Shortspine thornyhead - A separate ABC (120 mt) is established for the Conception area and is based on historical catch for the portion of the Conception area north of 34° 27' N. lat. (Point Conception). To address uncertainty in the stock assessment due to limited information, the ABC was reduced by 50 percent to obtain the OY(62 mt). There is no ABC or OY for the southern Conception area.

t/Longspine thornyhead is believed to be above 40 percent of its unfished biomass. The ABC (2,461 mt) in the north (Vancouver-Columbia-Eureka-Monterey) is based on the average of the 3-year individual ABCs at a F50%. The total catch OY (2,461 mt) is set equal to the ABC. The Commercial OY (2,453 mt) is determined by deducting 8 mt for compensation to vessels that conducted resource surveys. To derive the landed catch equivalent of 2,043 mt, the limited entry allocation is reduced by 17 percent (410 mt) for estimated discards.

u/Longspine thornyhead - A separate ABC (390 mt) is established for the Conception area and is based on historical catch for the portion of the Conception area north of 34°27' N. lat. (Point Conception). The ABC was reduced by 50 percent to obtain the OY (195 mt). This was done to address uncertainty in stock assessment due to limited information. There is no ABC or OY for the southern Conception Area.

v/Cowcod in the Conception area was assessed in 1999 and is believed to be less than 10 percent of its unfished biomass and was therefore declared as overfished in 2000. The ABC in the Conception area (5 mt) is based on the 1999 assessment, while the ABC for the Monterey (19 mt) is based on average

landings from 1993-1997. An OY of 4.8 (2.4 mt in each area) was set to allow for rebuilding.

w/Darkblotched rockfish was assessed in 2000 and is believed to be at 22 percent of its unfished biomass. The stock is considered to be overfished at this time. Historical catch assumptions from 1965-1978 affect the estimate of unfished biomass and a ABC range is presented at this time. The lower ABC (302 mt) is based on the assumption that 10 percent of the red rockfish catch during the 1960s and 1970s was darkblotched rockfish; the upper ABC (349 mt) assumes 0 percent was darkblotched. The OY (130 mt) is the constant annual catch that would rebuild the stock in 10 years, based on the assumption that 5 percent of the catch was darkblotched. Open access is allocated 2.3 percent (3 mt) of the commercial OY and limited entry is allocated 97.7 percent (127 mt) of the commercial OY (130 mt). Limited entry discard is assumed to be 16 percent of the allocation resulting in a limited entry landed catch value of 106 mt.

x/Minor rockfish north includes the "remaining rockfish" and "other rockfish" categories in the Vancouver, Columbia, and Eureka areas combined. These species include "remaining rockfish", which generally includes species that have been assessed by less rigorous methods than stock assessment, and "other rockfish", which includes species that do not have quantifiable assessments. The ABC is the sum of the individual "remaining rockfish" ABCs plus the "other rockfish" ABCs. To obtain total catch OY (3,137 mt), the remaining rockfish ABCs were reduced by 25 percent and the other rockfish ABCs were reduced by 50 percent. This was a precautionary measure due to limited stock assessment information. The OY is reduced by 645 mt for the amount estimated to be taken in the recreational fishery, resulting in a commercial OY of 2,492 mt. Open access is allocated 9.6 percent (239 mt) of the commercial OY and limited entry is allocated 90.4 percent (2,253 mt) of the commercial OY. The discard is assumed to be 16 percent (353 mt), resulting in a landed catch value of 2139 mt.

y/Minor rockfish south includes the "remaining rockfish" and "other rockfish" categories in the Monterey and Conception areas combined. These species include "remaining rockfish", which generally includes species that have been assessed by less rigorous methods than stock assessment, and "other rockfish", which includes species that do not have quantifiable assessments. The ABC (3,556 mt) is the sum of the individual "remaining rockfish" ABCs plus the "other rockfish" ABCs. To obtain total catch OY (2,040 mt), the remaining rockfish ABCs were reduced by 25 percent and the other rockfish ABCs were reduced by 50 percent. This was a precautionary measure due to limited stock assessment information. The OY is reduced by 950 mt for the amount estimated to be taken in the recreational fishery, resulting in a commercial OY of 1,090 mt. Open access is allocated 44.3 percent (483 mt) of the commercial OY and limited entry is allocated 55.7 percent of the commercial OY.

z/Bank rockfish -- The ABC is 350 mt which is based on a 2000 assessment for the Monterey and Conception areas. This stock contributes 200 mt towards the minor rockfish OY in the south.

aa/Black rockfish -- the ABC (1,115 mt), which is based on a 2000 assessment, is the sum of the assessment area (615 mt) plus the average catch in the unassessed (500 mt). This stock contributes 865 mt towards the minor rockfish OY in the north.

bb/Blackgill rockfish is believed to be at 51 percent of its unfished biomass. The ABC for the Conception area (268 mt) was based on a Fmsy proxy of F50%, and 75 mt were added for the Monterey area. The ABC for the Monterey area is the OY it reduced by 25 percent for precautionary measures because of lack of

information. This stock contributes 306 mt towards the minor rockfish south OY.

cc/"Other rockfish" includes rockfish species listed in 50 CFR 660.302 and California scorpionfish. The ABC is based on the 1996 review of commercial Sebastes landings and includes an estimate of recreational landings. These species have never been quantifiably assessed.

dd/"Other fish" includes sharks, skates, rays, ratfish, morids, grenadiers, and other groundfish species noted above in footnote b/.

BILLING CODE 3510–22–C

ABC Policy and Overfishing

The Magnuson-Stevens Act requires the FMP to prevent overfishing. Overfishing is defined in the guidelines based on the Magnuson-Stevens Act National Standards for implementing the Magnuson-Stevens Act (63 FR 24212, May 1, 1998) as exceeding the fishing mortality rate (also known as the ''exploitation rate'') needed to produce the maximum sustainable yield (Fmsy). In 2001 as in 2000, the Council continued its use of default exploitation rates as a proxy for Fmsy. Thus, the 2001 ABCs are set at the maximum sustainable yield (MSY) proxy. The OYs are set at levels that are expected to prevent overfishing, i.e., levels equal to or less than the ABCs, according to the Council's default OY policy (described later in this document).

In spring 2000, the Council's Scientific and Statistical Committee (SSC) sponsored a workshop to review the Council's groundfish exploitation rate policy. The workshop explored the historic use of different fishing mortality (F) rates, and found that the Council's past practices have generally changed in correlation with new information from and perceptions within the scientific community. An F rate that is sustainable over time would provide a relatively constant annual rate of harvest, yet would allow the stock to maintain itself, accounting for reproduction and natural mortality. Starting in the early 1990s, the Council used a standard harvest rate of F35%, which is the F rate that reduces spawning potential per recruit to 35 percent of the unfished stock's spawning potential per recruit. (Usually the size of a stock's biomass is discussed in terms of spawning potential.) Reducing the spawning potential per recruit is not the same thing as reducing the overall population size to 35 percent of the unfished population size.

A fishing rate of F35% can mean very different things for different stocks because it is a relationship dependent on the productivity of a particular stock. Highly productive stocks have individuals that reach maturity quickly and produce many young that then survive to an age when they are large enough to be caught in the fishery (recruitment). These stocks may be fished at F35% and have a higher percent of the total adult population harvested each year than a less productive stock fished at F35%. Harvest rate policies must account for several complicating factors, including the age and size at which individuals in a stock reach maturity, the relative fecundity of mature individuals over time, and the optimal stock size for the highest level of productivity within that stock.

The SSC's workshop participants reported that new scientific studies in 1998 and 1999 had shown that the F35% and F40% rates used by the Council had been too aggressive for Pacific coast groundfish stocks, such that some groundfish stocks could not maintain a viable population over time. A 1999 study, ''The Meta-Analysis of the Maximum Reproductive Rate for Fish Populations to Estimate Harvest Policy; a Review'' (Myers, *et al.*) showed that Pacific coast groundfish stocks, particularly rockfish, have very low productivity compared to other, similar species worldwide. One prominent theory about the reason for this low productivity is the large-scale, North Pacific climate shifts that are thought to cycle Pacific coast waters through warm and cool phases of 20-30 years duration. Pacific coast waters shifted to a warm phase around 1977-78, with ocean conditions less favorable for Pacific coast groundfish and other fish stocks.

After an intensive review of historic harvest rates, and current scientific literature on harvest rates and stock productivity, the SSC workshop concluded that F40% is too aggressive for many Pacific coast groundfish stocks, particularly for rockfish. For 2001 and beyond, the Council adopted the SSC's new recommendations for harvest policies of: F40% for flatfish and whiting, F50% for rockfish (including thornyheads) and F45% for other groundfish such as sablefish and lingcod. The Council also adopted a more precautionary OY policy for stocks with less rigorous stock assessments. In previous years, Council policy had been to assume that fishing mortality on these stocks was 75 percent of total mortality (fishing mortality + natural mortality). Based on SSC recommendations, the Council reaffirmed this policy, but added another precautionary adjustment, requiring that OYs for these stocks be set at 75 percent of ABCs. These changes toward more conservative harvest rates have resulted in lower ABCs and OYs for many stocks in 2001 than in 2000 (see footnotes for Table 1).

The 2001 ABCs, which are based on the best available scientific information, available include both landed catch and estimated discards, to represent total fishing mortality. ABCs apply only to U.S. waters where the assessments included Canadian waters. Stock assessment information considered in determining the ABCs is available from the Council and was made available to the public before the Council's November 2000 meeting, in stock assessment documents and reports, which are compiled into the Council's SAFE document (see **ADDRESSES**). Additional information is found in the EA prepared by the Council for this action, in the SAFE document for the 2001 specifications, and in documents available at the September and November 2000 Council meetings.

Default OY Policy

In 1999, the Council adopted a ''40-10 precautionary policy'' for setting OY that is intended to prevent species from becoming overfished. A stock that is at 40 percent of its unfished biomass is said to be at B40%. Bmsy is the stock biomass level required to achieve MSY. The Council uses B40% as as a default proxy for Bmsy for stocks with an unknown Bmsy.

According to the Council's OY policy, if the stock biomass is larger than Bmsy, the OY may be set equal to or less than ABC. A stock with a current biomass between 25 percent of the unfished level and Bmsy (the precautionary threshold)

is said to be in the ''precautionary zone.'' The Council's default OY harvest policy reduces the fishing mortality rate when a stock is at or below its precautionary threshold. The further the stock is below the precautionary threshold, the greater the reduction in OY will be relative to the ABC, until, at B10%, the OY would be set at zero. This is, in effect, a default rebuilding policy that will foster quicker return to the Bmsy level than would fishing at the ABC level. However, the Council may recommend setting the OY higher than the default OY harvest policy specifies, if justified, and as long as the OY does not exceed the ABC (Fmsy) harvest rate and is consistent with the requirements of the Magnuson-Stevens Act and complies with the National Standard Guidelines. Additional precaution may be added on a case-by-case basis at any level of current biomass that may be warranted by uncertainty in the data or by higher risks of being overfished.

If a stock falls below 25 percent of its unfished biomass (B25%), it is considered overfished, and the Magnuson-Stevens Act requires the Council to develop a rebuilding plan within 1 year. Rebuilding plans for overfished species have stock-specific allowable harvest rates, although those rates may still be consistent with this ''40-10 default OY'' policy.

2001 ABCs and OYs

The species that had ABCs and OYs in 2000 continue to have ABCs and OYs in 2001. New assessments were completed and ABCs and OYs were developed for darkblotched rockfish, widow rockfish, yellowtail rockfish, POP in the Vancouver and Columbia areas, and for lingcod, for which separate ABCs were calculated for the northern (Vancouver-Columbia) and southern (Eureka-Monterey-Conception) areas based on a coastwide assessment.

Five groundfish stocks have been designated as ''overfished'': POP, bocaccio (*S. paucispinis*), lingcod, canary rockfish (*S. pinniger*), and cowcod (*S. levis*). The OYs for overfished species have been set to be consistent with the rebuilding plans for those species. In 2001, two additional species, darkblotched and widow rockfish, will be designated as overfished. The OYs for darkblotched and widow rockfish are set at extremely low levels in anticipation of the rebuilding plans that will be required in 2002. In order to reduce associated harvest of bocaccio, the chilipepper OY is reduced by almost 25 percent.

Minor rockfish OYs are subdivided into nearshore (shallowest), shelf, and slope (deepest) categories, according to the approximate depths where those species are caught. This separation results in six distinct OYs for minor rockfish, north and south of 40°10' N. lat. For species that have rudimentary or no assessments, precautionary adjustments to the OYs continue to be made as in 2000. The 40-10 harvest policy continues to be used for assessed stocks where the biomass is estimated to be between 25 and 40 percent of the unfished biomass. Minor rockfish OYs and allocations are incorporated in Table 1a by category. Rockfish species in the nearshore, shelf, and slope categories are listed in paragraph IV.A.(21) and minor rockfish species are listed in Table 2.

As a result of the constraining management measures imposed to protect and rebuild overfished species, a number of the OYs may not be achieved in 2001, particularly for those shelf rockfish species that are not overfished but that are caught with species that are overfished. It is difficult to forecast what the actual catch of these relatively healthy species will be, but to lower the OYs for these species could unnecessarily constrain the fishery.

Several changes were made during 2000 that affect the ABCs and OYs for 2001: (1) Adoption of new default harvest rates with the default Fmsy proxy of F50% for rockfish and F40% for Pacific whiting and flatfish, and F45% for other groundfish species, resulting in lower harvest recommendations for many species; (2) the use of Experimental Data Collection Program (EDCP) data to derive new discard rates for shortspine (20 percent) and longspine thornyhead (17 percent), and new sector specific discard rates for sablefish north of 36° N. lat. that affect the landed catch OY; (3) completion of a new assessment for darkblotched rockfish, which raised uncertainty about historical catch during the 1960s and 1970s, resulting in an ABC range with the lower ABC based on the assumption that 10 percent of the historical red rockfish catch in foreign fisheries was darkblotched rockfish and the upper ABC based on the assumption that 0 percent was darkblotched; and (4) Adoption by the Council of rebuilding plans for canary rockfish and cowcod.

In 2001, as in 2000, unless otherwise specified, OYs and allocations represent total catch, and, where possible, the expected landed catch equivalent is calculated. This approach provides greater management flexibility if new information becomes available inseason because managers will then be able to modify discard estimates and management measures inseason. Derivations of the ABCs and OYs for the individual groundfish species are explained in detail in Council documents from their September 2000 and November 2000 meetings, and in the Council's SAFE document (which includes the most recent stock assessments) and are summarized in this document in Table 1a. Derivations of commercial HGs, limited entry and open access allocations, and landed catch equivalents appear in the footnotes to Table 1a, listed at the end of Table 1b.

Management measures designed to rebuild overfished species, or to prevent overfishing or to prevent a species from becoming overfished may restrict the harvest of relatively healthy stocks that are harvested with the overfished species. Consequently, fishers may not be allowed to harvest the entire OYs of these associated healthy stocks.

Determinations of Overfished Stock Status and Rebuilding Plans

The status of the resource is evaluated against the requirements of the Magnuson-Stevens Act, the guidelines based on the National Standards, and the FMP. A species is overfished if its current biomass is less than 25 percent of the unfished biomass level. The Magnuson-Stevens Act requires that a rebuilding plan be prepared within one year after the Council is notified that the species is overfished.

Requirements for developing overfished species rebuilding plans are addressed in Amendment 12 to the FMP, which NMFS approved on December 7, 2000. Before Amendment 12 was submitted for public review (September 8, 2000, 65 FR 54475), NMFS had approved the Council's first three rebuilding plans for lingcod, bocaccio, and POP (September 5, 2000, 65 FR 53646). During NMFS review of Amendment 12, the agency considered whether these three rebuilding plans met the requirements of Amendment 12 and concluded that they did not. The revocation of NMFS' prior approval of the three rebuilding plans was described in the final rule to implement Amendment 12 (65 FR 82947 December 29, 2000). NMFS determined that while the three rebuilding plans specify adequately protective harvest limits for these three species, the rebuilding plans did not meet all of the rebuilding plan content requirements described in Amendment 12. The groundfish fisheries will continue to operate under measures implementing the rebuilding plans for lingcod, bocaccio, and POP in 2001. However, NMFS has instructed the Council to re-submit rebuilding plans for these three species by January 1, 2002. NMFS has also notified the

Council via this **Federal Register** document that two additional species (dark blotched rockfish and widow rockfish) are overfished and that the Council must submit rebuilding plans for these two species within a year of this notification.

For 2001, the bocaccio OY is set at 100 mt, consistent with its initial rebuilding plan. The initial POP rebuilding plan indicated that the stock was at 13 percent of its unfished biomass, and that with an initial annual harvest of about 300 mt, the stock could be rebuilt to Bmsy within 47 years. A new POP stock assessment in 2000 estimated that the POP stock may be more abundant than suggested by the stock's 1998 assessment, which had led to the designation of POP as overfished. The 2000 assessment indicates that the POP stock is no longer below the overfished threshold, and that it may be possible to rebuild POP to Bmsy within 10 years. Although the new stock assessment supports a higher annual harvest than specified in the rebuilding plan, the SSC recommended that the Council continue to set the OY consistent with the current rebuilding plan in 2001, and re-evaluate the rebuilding scenario for 2002. The Council concurred with the SSC, and recommended an OY of 303 mt for 2001, in keeping with the initial POP rebuilding plan.

Lingcod also underwent a new, coastwide assessment in 2000. Previously, separate lingcod assessments had been done for waters north and south of Cape Blanco, with most efforts concentrated in the north. The lingcod rebuilding plan and last year's harvest management were based on a 1997 northern area assessment and an initial southern area assessment in 1999. Because of the strong history of northern area assessments and the newness of the southern area assessment, the lingcod rebuilding plan applied precautionary exploitation rates from the northern stock to the southern area biomass to set a southern ABC. For 2000, the lingcod ABCs were 450 mt in the north and 250 mt in the south, and the combined coastwide OY was 378 mt. An OY of 378 mt was set by using a constant exploitation rate that was estimated to provide a 60 percent likelihood that lingcod stocks would rebuild to Bmsy within 10 years. The initial rebuilding plan recognized that a new assessment of the entire coastwide stock was scheduled for 2000, and the Council would use the results to make any necessary adjustments for the 2001 fishing year.

While the lingcod rebuilding plan formally began in 2000, the Council had set fairly low lingcod OYs in several years prior to 2000. The 2000 lingcod stock assessment determined that lingcod stocks have responded favorably to earlier rebuilding efforts. Current assessment results show a higher spawning biomass than seen in the 1997 assessment, which is partially responsible for the higher northern lingcod ABC in 2001. The 2000 lingcod assessment finalized and updated information from the southern area to show that although southern area stocks are below the overfished threshold, they are not as depleted as the northern area stocks. Washington Department of Fish and Wildlife (WDFW) has extensive involvement in lingcod assessments, and for the 2000 assessment, that agency conducted an exhaustive analysis of its historic lingcod aging methods. WDFW improved and updated its aging methods, and found that the new methods showed a younger and more productive stock than portrayed in earlier assessments for the northern area. For 2001, the northern ABC is 610 mt and the southern ABC is 509 mt. The combined coastwide lingcod OY is 611 mt, which is the harvest level derived from a constant exploitation rate that is expected to have a 60-percent likelihood of rebuilding the stock to Bmsy within 9 years. Thus, although the lingcod OY was increased in 2001, the harvest parameters are in keeping with the initial lingcod rebuilding plan.

In the 2000 annual specifications and management measures document, NMFS announced its determination that two additional species were considered overfished: canary rockfish and cowcod (January 4, 2000, 65 FR 221). The Council prepared rebuilding plans for these two species and will submit those rebuilding plans for NMFS review in January 2001. After receipt of these plans, NMFS will publish a Notice of Availability in the **Federal Register** with a 30-day public comment period before making a decision to either approve or disapprove the rebuilding plans. Rebuilding measures for all five overfished species, plus preliminary rebuilding measures for darkblotched and widow rockfish, are included in the 2001 management measures.

The Council approved a canary rockfish rebuilding plan and 2001 OY that will limit total coastwide harvest of the canary rockfish stock to 93 mt annually for the next 2 years. This plan envisions a 57-year rebuilding period, although the actual length of time to rebuild the stock depends on its future reproductive successes and annual catch levels. The adopted rebuilding period and 2001 OY are based on a constant annual catch and a precautionary assumption about the stock's relative reproductive success. At the September meeting, the Council considered a more pessimistic recruitment forecast that would have resulted in an annual OY of 60 mt. An analysis in September-October of the regulations that would be needed to achieve this lower OY revealed that virtually all commercial fishing for groundfish and much commercial fishing for non-groundfish species on the continental shelf would have to be eliminated. Complete closure of these commercial fisheries would have had dramatic adverse economic effects on fishing industries and communities. Moreover, such a closure would have created a significant allocation problem between the recreational and commercial sectors that would have been difficult to address in such a short period of time.

After consulting with the canary rockfish stock assessment scientist at its November meeting, the Council adopted a slightly less pessimistic forecast for recent recruitment, which yielded an annual OY of 93 mt. However, the Council took a precautionary stance and adopted the OY for only the next 2 years. During that time, NMFS will conduct another survey of the groundfish resources. This survey is expected to produce information directly relevant to the uncertainty regarding recent recruitment. The new information will be incorporated into an updated stock assessment in 2002, and the canary rockfish OY will be subsequently adjusted to meet rebuilding targets. The rebuilding plan calls for annual review of the various fisheries that take canary rockfish, and includes a mandatory review of the entire plan after two years. Moreover, the plan requires the Council to consider all sources of canary rockfish fishing mortality in order to reduce the effect of the fisheries on the stock, including bycatch in the Pacific whiting, fishery, salmon troll, and pink shrimp fishery.

In order to achieve the OY called for by canary rockfish rebuilding, the Council is controlling incidental catch of canary rockfish, rather than allocating directed harvest of canary rockfish. Adhering strictly to the open access/limited entry allocation of canary rockfish that was established under the limited entry program (Amendment 6 to the FMP) does not allow this flexibility. However, Amendments 12 and 13 to the groundfish plan, which were approved in December 2000, recognize that adhering to these allocations may not be appropriate or possible for fisheries being rebuilt, and authorize deviation

from these allocations during the rebuilding period. In order to meet canary rockfish rebuilding goals while equitably distributing the adverse effects of rebuilding among the fleets, the Council has recommended suspending the open access/limited entry allocation for canary rockfish. The Council has not set a specific open access/limited entry canary rockfish allocation, but instead has crafted the most reasonable set of management measures to achieve rebuilding. Taking these steps to begin rebuilding is particularly appropriate for canary rockfish, which is taken incidentally in several state-managed, open access fisheries, such as the pink shrimp trawl fishery and the salmon troll fishery. The Council does not directly control the amount of canary rockfish taken (although it does control the amount landed) in the state-managed fisheries.

The Council's rebuilding measures for canary rockfish and cowcod and the ABCs, OYs, and management actions recommended for 2001 are consistent with the FMP and the canary rock and cowcod rebuilding plans. The draft rebuilding plans endorsed by the Council are summarized as follows:

Canary Rockfish

Areas: coastwide

Status of stock: 8 to 22 percent of unfished biomass.

Maximum allowable years to rebuild to MSY: 58 years

Probability of rebuilding to MSY biomass in 57 years: 52 percent

Expected time to rebuild: 57 years.

Fmsy proxy: F50%

ABC in 2001: 228 mt

OY in 2001: 93 mt

Management measures for 2001: Canary rockfish are primarily a shelf rockfish species, but may also move into deeper waters as they age, commonly ranging from 25 fathoms (60.96 m) to 250 fathoms (609.6 m). Historic fisheries for canary rockfish have been concentrated in waters of 50-150 fathoms depth. Their range is from the northern Baja California waters to the western Gulf of Alaska, and they may be caught either in large pelagic schools or dispersed along the rocky bottom. The large range and varied habits of canary rockfish make selecting rebuilding measures particularly difficult. Canary rockfish are caught either directly or incidentally in most West Coast groundfish fisheries. Of the 93 mt OY, 5 mt are reserved for harvest associated with scientific research, 44 mt are expected to be taken in the recreational fisheries, and 44 mt are expected to be taken as incidental catch in the commercial fisheries.

In California and Oregon recreational fisheries, the rockfish bag limit is 10 fish, no more than 1 of which may be canary rockfish; off Washington the bag limit is 10 fish, no more than 2 of which may be either canary rockfish or yelloweye rockfish. California recreational fisheries will also close for 2 months (January-February) south of Point Conception (and possibly 2 months at the end of the year), and for 4 months (January-April) between Point Conception and Cape Mendocino, with some fishing allowed shoreward of the 20-fathom depth contour. Historically, the bulk of the recreational canary rockfish landings have been made in California. Commercial fisheries for groundfish and for non-groundfish species that co-occur with canary rockfish have been restricted to minimize the incidental catch of canary rockfish. California hook-and-line commercial fisheries are closed during the same periods and in the same areas as the recreational fisheries. Moreover, new landings limits are introduced for the summer flatfish and mid-water yellowtail rockfish fisheries to reduce opportunities for incidental canary rockfish interception, and opportunities for fishing with large footrope bottom trawl gear are severely restricted. In the first few months of 2001, the states will be working with their shrimp trawl industry on using fish excluder devices to reduce incidental canary harvest in that fishery.

Cowcod

Areas: Point Conception to the U.S.-Mexico boundary.

Status of stock: 4-11 percent of unfished biomass.

Maximum allowable years to rebuild to MSY: 98.

Probability of rebuilding to MSY biomass in 98 years: 55 percent

Expected time to rebuild: 95

Fmsy proxy: F50%

ABC in 2001: 5 mt.

OY in 2001: 2.4 mt.

Management measures: Cowcod is a sedentary shelf rockfish species that ranges from waters off Washington state southward to Mexico, with several concentrated areas of abundance in waters around some of the islands and offshore banks of the Southern California Bight. Cowcod is one of the largest West Coast rockfishes, growing to 37 inches (95 cm), making it a prized recreational fisheries target. In commercial fisheries, cowcod is usually caught incidentally to other species, as it occurs too infrequently to target efficiently. All directed cowcod fishing opportunities have been eliminated in 2001. Retention of cowcod is prohibited for all commercial and recreational fisheries. To protect cowcod from incidental harvest, the Council has recommended two Cowcod Conservation Areas (CCAs) (the Eastern CCA and the Western CCA) in the Southern California Bight, delineated to encompass key cowcod habitat areas and known areas of high catches. Fishing for groundfish is prohibited within the CCAs, except that minor nearshore rockfish, cabezon, and greenling may be taken from waters where the bottom depth is less than 20 fathoms (36.9 m). A transportation corridor is provided through the Western CCA to allow commercial vessels fishing for slope rockfish and other groundfish west of the Western CCA to transport that groundfish through the Western CCA. The Western CCA is an area south of Point Conception that is bound by straight lines connecting the following points in the order listed:

33°50' N. lat., 119°30' W. long.;
33°50' N. lat., 118°50' W. long.;
32°20' N. lat., 118°50' W. long.;
32°20' N. lat., 119°30' W. long.;
33°00' N. lat., 119°30' W. long.;
33°00' N. lat., 119°50' W. long.;
33°30' N. lat., 119°50' W. long.;
33°50' N. lat., 119°30' W. long.

The transit corridor through the Western CCA is bounded on the north by the latitude line at 33°00'30'' N. lat., and on the south by the latitude line at 32°59'30'' N. lat.

The Eastern CCA is a smaller area west of San Diego that is bound by straight lines connecting the following points in the order listed:

32°40' N. lat., 118°00' W. long.;
32°40' N. lat., 117°50' W. long.;
32°30' N. lat., 117°50' W. long.;
32°40' N. lat., 118°00' W. long.

Overfishing

None of the 2001 ABCs are knowingly set higher than Fmsy or its proxy, none of the OYs are set higher than the corresponding ABCs, and the management measures herein are designed to keep harvest levels within specified OYs.

After the 1999 fishing season, NMFS determined that overfishing had occurred on three species of rockfish in that year: darkblotched rockfish, silvergrey rockfish, and yelloweye rockfish. Changes to the rockfish management structure in 2000 that divided minor rockfish into three species groups (nearshore, shelf, slope) were partially intended to ensure that those species would not be subject to overfishing harvest rates in 2000. The Council also adopted a policy for the 2000 specifications that had reduced

ABCs by 25 percent to determine OYs for those species with less rigorous stock assessments, and by 50 percent to determine OYs for those species with no stock assessment. These policies are continued in 2001.

Overfishing is difficult to detect inseason for many rockfish, particularly these minor rockfish species, because most are not individually identified on landing. Species compositions, based on proportions encountered in samples of landings, are applied during the year. However, final results are not available until after the end of the year.

Bycatch and Discards

The Magnuson-Stevens Act defines bycatch as ''fish which are harvested in a fishery, which are not sold or kept for personal use, and include economic discards and regulatory discards.'' In the Pacific Coast groundfish fishery and in many other fisheries, the term bycatch is commonly used to describe nontargeted species that are landed and sold or used. The term ''discard'' is used to describe those fish harvested that are neither landed nor used.

Groundfish management measures include provisions to reduce trip limit-induced discards and to account for those discards when setting ABCs and monitoring harvest levels. Discard rates are used to calculate an amount of assumed discard that is subtracted from the annual total catch OY to yield a landed catch equivalent. Although there is no exact measure of discard amounts in most fisheries, the assumed amounts are taken into account to prevent total harvest from exceeding the ABC. Certain species are also managed within mixed-stock groups, like the ''DTS complex'' of Dover sole, thornyheads, and sablefish. For groundfish multispecies management, trip limits are set to match the known species catch proportions, which may mean reducing trip limits on some of the more abundant species to reduce discards of less abundant species, or setting trip limits at levels that vary throughout the year according to when particular stocks are most aggregated.

Stock assessments and inseason catch monitoring are designed to account for all fishing mortality, including that resulting from fish discarded at sea. Discards in the fishery for whiting are well monitored and are accounted for inseason as they occur. In the other fisheries, discards caused by trip limits have not been monitored consistently, so discard estimates have been developed to account for this extra catch. A discard level of 16 percent of the total catch, previously measured for widow rockfish in a scientific study, is assumed for the commercial fisheries for widow rockfish, yellowtail rockfish, canary rockfish, and POP.

For 2001 fisheries, NMFS analyzed the results of the 1995 through 1998 EDCP, in which trawl vessels voluntarily fished for groundfish and either carried observers or completed detailed catch and discard logbooks. NMFS determined that EDCP data could provide a useful update for discard estimates applied to the ''DTS complex.'' Dover sole discard had been estimated at 5 percent of its total catch OY in 2000 and prior years, and data from the EDCP confirmed that estimate. Thornyhead discard estimates changed, however, from 9 percent to 17 percent of total catch OY for longspine thornyhead, and from 30 percent to 20 percent of total catch OY for shortspine thornyhead.

Sablefish is the fourth species in the DTS complex, and the only species in the complex with sector-specific allocations. In 2000 and prior years, an estimate of 10-percent discard had been taken off the top of the sablefish total catch OY before allocating the remaining catch between sectors. For 2001, the Council recommended first allocating the total catch OY between fishery sectors, and then applying sector-appropriate discard rates to each sector. Tribal sablefish longline fisheries were allocated 10 percent of the total catch OY (690 mt,), and then were discounted 3 percent of that allocation for discards, for a landed catch allocation of 669 mt. The remaining 90 percent (6,205 mt) of the total catch OY was discounted 24 mt for research, then divided between the open access (9.4 percent of the non-tribal OY, or 581 mt) and limited entry fisheries (90.6 percent of the non-tribal OY, or 5,600 mt). Open access sablefish fisheries are primarily hook-and-line daily trip limit fisheries, with an estimated discard rate of 8 percent, making the open access landed catch allocation 535 mt. The limited entry allocation is divided between the trawl sector (58 percent, or 3,248 mt) and the fixed gear sector (42 percent or 2,352 mt). EDCP data provided a trawl sector discard estimate of 22 percent, reducing the trawl landed catch allocation to 2,533 mt. The limited entry, fixed gear fishery lands most of its sablefish in a brief derby with few discard opportunities, similar to the tribal sablefish fisheries. Thus, the limited entry, fixed gear sablefish discard estimate is also 3 percent, reducing the allocation for that sector to 2,281 mt.

On December 21, 2000, NMFS approved Amendment 13 to the FMP. The amendment was intended to respond to Magnuson-Stevens Act bycatch provisions. NMFS published a proposed rule to implement Amendment 13 on November 21, 2000 (65 FR 69898), which included a full retention program for the at-sea whiting fisheries and changes to the annual management measures framework to allow better protection of overfished species from incidental catch. NMFS will soon publish a final rule that will create a regulatory framework for an observer program in the shore-based groundfish fisheries. In early 2001, the agency will be working with the three West Coast states and the interested public to develop an observer coverage plan for the purpose of gathering total catch information. NMFS hopes to place observers on groundfish vessels in summer/fall 2001. All of these efforts are expected to improve and update discard information, data on mixed-stock complex compositions, and background data for stock assessments.

II. Limited Entry and Open Access Fisheries

The FMP established a limited entry program that, on January 1, 1994, divided the commercial groundfish fishery into the limited entry and open access sectors, each with its own allocations and management measures. Limited entry and open access allocations are calculated according to a formula specified in the FMP, which takes into account the relative amounts of a species taken by each component of the fishery during the 1984-1988 limited entry window period.

Groundfish species that had limited entry and open access allocations in 2000 continue to be allocated between the two sectors in 2001. As explained earlier in the section on rebuilding plans, the limited entry/open access allocation for canary rockfish is being suspended during the rebuilding period as necessary in order to allow the Council the flexibility to develop management measures to allow access to healthy stocks while protecting canary rockfish. All OYs, and all limited entry and open access allocations are expressed in terms of total catch. In 2001, as in 2000, estimates of trip-limit induced discards that previously were taken ''off the top'' before setting the limited entry and open access allocations, will instead be deducted only from the limited entry allocations for purposes of estimating the landed catch equivalents. Estimates of discards will be applied separately inseason to the limited entry and open access allocations as data become available. Landed catch equivalents are the harvest goals used when adjusting trip

limits and other management measures during the season. Estimated bycatch of yellowtail rockfish and widow rockfish in the offshore whiting fishery is also deducted from the limited entry allocations to determine the landed catch equivalents for the target fisheries for widow and yellowtail rockfish. Although this revised process complicates the calculation of the landed catch equivalents for the limited entry allocations, it is intended to more appropriately apply the discard estimates to the fleet responsible for the discards. Discards in most open access fisheries are believed to be small, and no discard estimates are applied to the open access fishery at this time. However, they may be applied during the season as information becomes available.

Open Access Allocations

The open access fishery is composed of vessels that operate under the OYs, quotas, and other management measures governing the open access fishery, using (1) exempt gear or (2) longline or pot (trap) gear fished from vessels that do not have limited entry permits endorsed for use of that gear. Exempt gear includes all types of legal groundfish fishing gear except groundfish trawl, longline, and pots. (Exempt gear includes trawls used to harvest pink shrimp, spot, or ridgeback prawns (shrimp trawls) and, halibut or sea cucumbers south of Pt. Arena, CA (38°57'30≥ N. lat.).

Open access allocations are derived by applying the open access allocation percentages to the commercial OY. The commercial OY is the annual OY after subtracting any set-asides for recreational or tribal fishing or compensation for conducting resource surveys. For those species in which the open access share would have been less than 1 percent, no open access allocation is specified unless significant open access effort is expected.

Limited Entry Allocations

The limited entry fishery is the fishery composed of vessels using limited entry gear fished pursuant to the OYs, quotas, and other management measures governing the limited entry fishery. Limited entry gear includes longline, pot, or groundfish trawl gear used under the authority of a valid limited entry permit issued under the FMP, affixed with an endorsement for that gear. (Groundfish trawl gear excludes shrimp trawls used to harvest pink shrimp, spot prawns, or ridgeback prawns, and other trawls used to fish for California halibut or sea cucumbers south of Pt. Arena, CA.) A sablefish endorsement is also required to operate in the limited entry non-trawl regular or mop-up seasons for sablefish.

The limited entry allocation (in total catch) is the OY reduced by (1) set-asides, if any, for treaty Indian fisheries, recreational fisheries, or compensation fishing for participation in resource surveys (which results in the commercial OY or quota); and (2) the open access allocation. (Allocations for Washington coastal tribal fisheries are discussed in section V and, for whiting, at paragraph IV.B.(3).)

Following these procedures, the Regional Administrator calculated the amounts of the allocations that are presented in Table 1a to this document. Unless otherwise specified, the limited entry and open access allocations are treated as OYs in 2001. There may be slight discrepancies from the Council's recommendations due to rounding.

III. 2001 Management Measures

Before 2000, the major goals of groundfish management were to prevent overfishing while achieving the OYs and to provide year-round fisheries for the major species or species groups. Over time, however, it became apparent that a number of species could not continue to be harvested year-round at a constant harvest rate. New legislative mandates under the Magnuson-Stevens Act (as amended by the Sustainable Fisheries Act in 1996) gave highest priority to preventing overfishing and rebuilding overfished stocks to their MSY levels. The National Standard Guidelines at 50 CFR 600.310 interpreted this as ''weak stock management,'' which means that harvest of healthier stocks may need to be curtailed to prevent overfishing or to rebuild overfished stocks. Amendment 13 to the FMP, which was approved in December 2000, authorizes additional types of management measures to be adopted routinely with the annual management measures in order to achieve rebuilding.

Five FMP species have been declared overfished as of January 2000 (lingcod, bocaccio, POP, canary rockfish, and cowcod), and two more species are being declared overfished concurrent with publication of this document (darkblotched and widow rockfish). Of these species, canary rockfish is the most constraining, as its OY was reduced from 1,045 mt in 1999 to 200 mt in 2000, and to 93 mt in 2001. Canary rockfish is found coastwide on the continental shelf and is caught directly or incidentally in most West Coast fisheries (groundfish and non-groundfish. In order to rebuild these overfished species, the Council chose management measures to divert effort off the sea floor of the continental shelf, where lingcod, bocaccio, canary rockfish, cowcod, widow rockfish, and, to a lesser extent, POP and darkblotched rockfish occur. Management measures for 2001 are designed to orient these fisheries away from the shelf, while providing fishing opportunities on some, but not all, groundfish species throughout the year.

Management priorities for 2001 were guided by the following goals: (1) Prevent overfishing; (2) manage consistent with rebuilding plans for overfished species; (3) maximize harvest opportunities for non-depleted stocks while minimizing, to the extent practicable; the discard mortality of other species; (4) provide equitable harvest opportunity for both recreational and commercial sectors; (5) within the commercial fisheries, achieve limited entry and open access allocations, to the extent practicable and (6) maintain year-round commercial groundfish fishing opportunities to the extent possible.

A number of assumptions and considerations were involved in developing the management recommendations for 2001. As discussed earlier, the chief constraint for 2001 fisheries was the need to prevent directed and incidental canary rockfish harvest. Directed canary rockfish harvest can be eliminated by reducing trip limits to levels that make targeting canary rockfish unprofitable. However, reducing incidental interception of canary rockfish to minimal levels is much more difficult. For example, widow rockfish directed fishing opportunities in 2001 have been reduced because of its newly designated status as an overfished species, and reducing widow rockfish target levels is expected to also reduce incidental canary rockfish interception. Moreover, yellowtail rockfish, which is also often caught with canary rockfish, has lower trip limits this year then otherwise would have been required to take the yellowtail OY to minimize canary rockfish interception. In general, there are few yellowtail rockfish targeting opportunities for trawlers in 2001, and most yellowtail rockfish landings are allowed only when yellowtail is caught incidentally to flatfish landings or in directed midwater yellowtail fisheries. Furthermore, flatfish fisheries have been constrained by new trip limits, particularly in the summer months when canary rockfish is likely to be incidentally taken.

The Council has also continued its management strategy from 2000 that prohibited landings of many species by

vessels using large footrope trawl gear (footropes greater than 8 inches (20.5 cm) diameter). It is not possible to maintain a year-round fishery with bottom trawl gear for all groundfish species without an unacceptable level of incidental catch, and it is not possible to maintain a year-round commercial fishery if all (or even most) limited entry vessels participate all year.

Recreational fisheries effort has also been reduced to protect canary rockfish. A significant portion, 26 mt, of the 93 mt canary rockfish OY is expected to be taken in the California recreational fisheries. To constrain their recreational fisheries to even this catch level, California fishery managers recommended continuing the 2000 2-month fishery closure south of Point Conception, except for fishing for minor nearshore rockfish shoreward of the 20-fathom (36.9 m) depth contour (with the potential for an additional closure in the last 2 months of the year if needed). Between Point Conception and 40°10' N. lat., the fishery will be closed in March and April, and expanding to a partial closure in May-June, although fishing for minor nearshore rockfish shoreward of the 20-fathom (36.9 m) depth contour will be allowed. Additional changes to bag limits, hook limits, and size limits were also needed to reduce recreational canary rockfish harvest.

Cowcod protection measures described earlier in the section on cowcod rebuilding apply to all fisheries. Cowcod retention is prohibited for all fisheries and all gear types. Commercial and recreational groundfish fisheries are closed within the CCAs, except that fishing for nearshore rockfish is allowed inside 20 fathoms (36.9 m). The Council is also asking the state of California to further protect cowcod by restricting or prohibiting non-groundfish fisheries inside the CCAs.

Recreational fishing restrictions proposed for California are intended to ensure that fishing mortality will not exceed limits associated with rebuilding plans for bocaccio, canary rockfish, cowcod, and lingcod, while not restricting the fisheries so fully that charter vessels and associated firms are forced out of business. The 2-month closure off southern California is intended to reduce bocaccio catch but will provide some protection for all species. The 4-month closure off central California will provide additional protection needed for canary rockfish as well as reducing the catch of bocaccio and lingcod in that area. Reductions in bag limits and hook limits are also intended to reduce opportunities for fishers to intercept protected species. Closed CCAs will have incidental benefits in protecting bocaccio and other rockfish. Cowcod inhabit special types of habitat, and fishers (and charter operators) know well how to identify and avoid such habitat. Taken together with the proposed restrictions on commercial fisheries, the recreational fishery limits are expected to keep total fishing mortality under the established OYs.

Some commercial fishers have commented that they are being unfairly constrained relative to recreational fisheries, while some recreational fishers have commented that the commercial fisheries are being favored. In developing 2001 management measures, the Council sought a fair and equitable balance for the two sectors, and also sought to achieve needed reductions in total fishing mortality. The Council was concerned that further restrictions on recreational fishing (e.g., longer closures or lower bag limits) would prevent charter vessels operators from running charter fishing trips for a long enough period that they would go out of business. Under further restrictions, passengers may refuse to pay the price to fish or may not make enough trips in open seasons to allow operators to cover their costs. Not only would charter vessel operators be affected by changes to recreational fishery management, but related businesses would also likely suffer. The closed seasons generally cover the months that have historically accounted for the largest seasonal catches of bocaccio and other rockfishes.

Allowable commercial catches of many groundfish are even lower than in 2000, but the Council has tried to restructure the timing of differential trip limits to provide commercial fisheries with greater flexibility in their fishing patterns while not increasing the overall catches. Again, this restructuring is intended to limit the extent to which fishers would be driven out of business and related firms would suffer. Many commercial groundfish fishers have other fishing opportunities during the year, and these opportunities were taken into account. For example, the small-scale commercial fishers (and recreational fishers) in southern California would (under state regulations) still be able to fish for certain species in nearshore waters while the shelf is closed to protect overfished species.

Management measures for the limited entry fishery are found in section IV. Most cumulative trip limits, size limits, and seasons for the limited entry fishery are set out in Tables 3 and 4 of section IV. However, the limited entry nontrawl sablefish fishery, the midwater trawl fishery for whiting, and the hook-and-line fishery for black rockfish off Washington are managed separately from the majority of the groundfish species and are not fully addressed in the tables. Their framework management structure has not changed since 2000, except for the level of trip limits for sablefish and whiting, and is described in paragraphs IV.B.(2)-(4) of section IV. Other provisions for the 2000 fisheries not explicitly addressed above remain in effect for 2001 and are repeated in section IV of this document.

The following management measures, adopted this year as part of the annual management measures, are established as routine management measures: (1) Commercial trip limits that differ by gear type; (2) recreational size limits and hook limits; recreational fileting and dressing requirements for rockfish, cabezon, greenling, and lingcod; and (3) closed seasons/areas for all fisheries for all groundfish, rockfish, lingcod, and cowcod.

After hearing proposals and advice from its advisory entities and public testimony at its November 2000 meeting, the Council recommended the following actions for management in 2001.

Limited Entry Trawl

For the limited entry trawl fishery, the Council recommended a suite of gear and cumulative trip limits designed to encourage fishing with gear in times and areas where incidental catch of overfished or depleted species will be minimized. For 2001, the Council recommended continuing the use of differential trip limits for limited entry trawlers operating with different trawl gear configurations: bottom trawl with footropes greater than 8 inches (20.5 cm) in diameter; bottom trawl with footropes smaller than 8 inches (20.5 cm) in diameter; and midwater or pelagic trawl. Trawling with footropes that have roller gear or other large gear designed to bounce over tough rockpiles tends to allow those vessels greater access to areas where several of the overfished species congregate. Therefore, landings of shelf rockfish are prohibited if large footrope trawls (roller gear) are used (or on board the vessel); small amounts of shelf rockfish bycatch may be landed if small footrope trawls are used; and, targeting healthy shelf rockfish stocks is encouraged only if midwater trawls are used. This strategy of differential trip limits for different trawl gear types was used in 2000, and initial Oregon Department of Fish and Wildlife logbook data show a significant decrease in trawl activity in rocky areas of the

continental shelf. Cowcod prohibitions and closures apply to limited entry trawl vessels, although there are few limited entry trawl vessels operating south of Point Conception in CCA waters.

Chafing gear will continue to be prohibited on the body of small footrope trawls. Chafing gear protects the net from excess wear when it drags against rock piles or the sea floor. The prohibition against chafing gear makes the net more vulnerable to damage, and so encourages fishers to operate in less rocky areas.

Trawl vessels using large footrope gear (with footropes greater than 8 inches (20 cm) in diameter) are prohibited from landing nearshore and shelf rockfish and most flatfish species because their ability to fish in rocky areas would result in high incidental catch of species that cannot withstand additional fishing effort. Although vessels are not prohibited from using large footropes in nearshore and continental shelf areas, they are not allowed to retain and sell most of the species they would catch from those areas, which was a significant disincentive to operate there in 2000. Large footrope trawls may still be used on deepwater species of the continental shelf and slope, primarily Dover and rex soles, thornyheads, sablefish, and deepwater rockfish, fewer of the species needing protection in these areas would be encountered. During part of the year, predominantly winter months, large footrope trawls may also be used to harvest arrowtooth flounder and petrale sole. However, small footrope trawls are required for the rest of the year when these species are more likely to aggregate with overfished species (See Table 3).

Trip limits are imposed for arrowtooth flounder from January-April and from November-December to discourage targeting on POP, and on all flatfish species in the north in May-October to minimize canary rockfish bycatch. The lingcod trawl fishery is closed during January-April and November-December, with only an incidental catch level trip limit (400 lb (181 kg) per month) available from May-October. Lingcod closures in the winter will reduce the overall harvest and will protect spawning fish and males guarding their nests.

Another way the Council devised to allow harvest of relatively abundant stocks is through the use of midwater trawl gear. This gear is effective at harvesting certain species above the ocean floor with little or no bycatch of bottom-dwelling species such as canary rockfish. In fact, the Council believes that using midwater gear may be the best way to harvest chilipepper and yellowtail rockfish without catching canary rockfish. Consequently, larger 2-month cumulative trip limits are provided for vessels using midwater trawl gear to harvest yellowtail and chilipepper rockfish. If a fisher chooses to carry more than one type of trawl gear on board, any landing will be attributed to the gear on board with the most restrictive landing limit. To land the maximum amounts of yellowtail and chilipepper rockfish, vessels will be required to have only midwater trawl gear on board.

However, NMFS cannot guarantee that these higher midwater trawl limits will be available throughout the year, or in future years. NMFS cautions fishers to consider, before purchasing new gear, whether investing in new midwater trawl gear is cost effective. For the foreseeable future, the Council will be operating under the provisions of overfished species rebuilding plans, which will make it difficult for the Council to provide consistency in the fishery management measures it recommends from year to year.

Limited Entry Fixed Gear

Limited entry fixed-gear fisheries start the year with the same limits as the limited entry trawl fishery when there is no distinction based on type of trawl gear. It has the same limits as the small footrope trawl fishery when there is a trawl gear distinction, except for limits for sablefish, widow rockfish, yellowtail rockfish, chilipepper, and nearshore rockfish. Fixed gear cumulative trip limits for minor shelf rockfish, canary rockfish, bocaccio, and lingcod are the same as the cumulative trip limits for the small footrope trawl fishery except for the closed periods for the fixed gear fishery south of 40°10' N. lat. Cowcod prohibitions and closures apply to limited entry, fixed gear vessels.

Higher midwater trawl limits are not appropriate for fixed gear. Midwater trawls can be used to selectively harvest relatively large quantities of yellowtail and chilipepper rockfishes above the sea floor with minimal incidental catch of overfished species and at levels far exceeding recent landings by most fixed gear. There are no comparable and enforceable ways to modify fixed gear to keep it off the bottom and away from overfished species on the continental shelf.

The fixed gear fishery for widow rockfish is provided with a cumulative trip limit of 3,000 lb (1,361-kg) per month in 2001, between the 20,000-lb (9,072-kg) 2-month midwater trawl limit and the 1,000-lb (454 kg) per month small footrope trawl cumulative limit. However, the limit for the fixed gear fishery is higher than actual amounts landed by most fixed gear vessels in the past.

The fixed gear limit for yellowtail rockfish in 2001 is kept at the same level as for small footrope trawl gear, 1,500 lb (680 kg) per month. This limit will accommodate incidental catch rather than a target fishery. This limit will restrict the fixed gear fleet somewhat, but is intended and expected to minimize incidental canary rockfish catch.

The 2001 chilipepper limit of 2,500 lb (1,134 kg) per month is maintained at a lower level than trawl gear, consistent with recent landings, because bocaccio are caught in fixed gear fisheries for chilipepper.

Minor nearshore rockfish north of 40°10' N. lat. are managed to encourage fishing for black and blue rockfish, which are generally more abundant than other nearshore rockfish species. Thus, the limited entry fixed gear fishery for nearshore rockfish north of 40°10' N. lat. is 10,000 lb (4,536 kg) per 2 months, of which no more than 4,000 lb (1,814 kg) may be species other than black or blue rockfish.

The fixed gear sablefish fishery is managed under regulations at 50 CFR 660.323(a)(2) that provide for 2 seasons (the regular and mop-up seasons) during which cumulative trip limits apply. The rest of the year is designated for the ''daily trip limit'' (DTL) fishery, which is restricted by the pounds of sablefish that may be landed in each day, (300 lb (136 kg) north of 36° N. lat. and 350 lb (159 kg) south of 36° N. lat.). DTLs may not be accumulated or combined into a larger landing. North of 36° N. lat., DTL landings are also counted toward a 2-month cumulative limit of 2,700 lb (1,225 kg). South of 36° N. lat., a fisher may opt to make one landing per week above 350 lb (159 kg), but no more than 1,050 lb (476 kg).

For commercial fisheries, direct targeting and opportunities to take overfished species as bycatch are severely curtailed. Fixed gear generally has greater access than trawl gear to rockfish living on and around high relief rockpiles. To prevent commercial fixed gear vessels from fishing for nearshore rockfish, shelf rockfish, and lingcod during periods when the recreational fisheries for those species are closed, the Council recommended also closing commercial fixed gear fishing for those species during the same areas and periods. All limited entry fixed gear (pot and longline) vessels south of 40°10' N. lat. are prohibited from fishing for nearshore rockfish, shelf rockfish, and

lingcod, with allowances for vessels fishing inside of the 20-fathom (36.9 m) depth contour. (In January and February south of 34°27' N. lat., closed except for minor nearshore rockfish inside 20 fathoms (36.9 m); in March and April between 40°10' N. lat. to 34°27' N. lat., closed; in May and June between 40°10' N. lat. to 34°27' N. lat., closed except for minor nearshore rockfish inside 20 fathoms (36.9 m)). Concurrent commercial and recreational closures are expected to achieve conservation goals while reducing the conflict that sometimes occurs when one gear type is allowed to fish while the other gear type is not. The Council expects that these commercial closures will also reduce the chance that a commercial vessel could take advantage of the recreational closure to target known rockfish hotspots available only to nontrawl gear.

Open Access (Hook-and-Line, Troll, Pot, Setnet, Trammel Net)

The open access nontrawl fishery is managed separately from the limited entry fixed-gear fishery. As in the past, open access cumulative trip limits continue to be applied mostly to 1-month periods, and thornyheads may not be taken and retained north of 36° N. lat. Time and area closures are used south of 40°10' N. lat., similar to the limited entry fixed gear fisheries and for the same reasons. Vessels participating in the open access fisheries with nontrawl gear (hook-and-line, troll, pot, setnet and trammel net) south of 40°10' N. lat. are prohibited from fishing for nearshore rockfish, shelf rockfish, and lingcod, with allowances for vessels fishing inside of the 20-fathom (36.9m) depth contour. (In January and February south of 34°27' N. lat., closed except for minor nearshore rockfish inside 20 fathoms (36.9 m); in March and April between 40°10' N. lat. to 34°27' N. lat., closed; in May and June between 40°10' N. lat. to 34°27' N. lat., closed except for minor nearshore rockfish inside 20 fathoms (36.9 m)). The lingcod fishery for all open access nontrawl gears is also subject to the same closure, size limits, and cumulative trip limits as limited entry fixed gear fisheries. As in 2000, the Council wanted to provide a continued opportunity to nearshore fishers to selectively harvest black and blue rockfish north of 40°10' N. lat., while discouraging excessive harvest of other nearshore species. Consequently, the cumulative trip limit provides for landings of 3,000 lb (1,361 kg) per 2 months of nearshore rockfish, of which no more than 900 lb (408 kg) may be species other than black or blue rockfish. Cowcod prohibitions and closures apply to all open access vessels.

In 1998 and prior years, most open access limits were linked to (and could not exceed) limited entry limits, so that the open access monthly cumulative limits for most species were 50 percent of the limited entry 2-month cumulative limits for those species. Since 1999, open access cumulative limits have not been linked to limited entry cumulative limits. Open access cumulative limits may exceed those for limited entry. If a vessel with a limited entry permit uses open access gear (including exempted trawl gear) and the open access cumulative limit is larger, the vessel will be constrained by the smaller, limited entry cumulative limit for the entire cumulative period.

Open Access Exempted Trawl Gear

Open access exempted trawl gear (used to harvest spot and ridgeback prawns, California halibut, sea cucumbers, or pink shrimp) is managed with both ''per trip'' limits and cumulative trip limits. These trip limits are similar to those in 2000, and the species-specific open access limits apply but may not exceed the overall groundfish limits. The limits are 500 lb (227 kg) of groundfish per day, not to exceed 1,500 lb (680 kg) per trip in the pink shrimp fishery. For other exempted trawl gears, there is a 300-lb (136-kg) per trip limit. The pink shrimp fishery is subject to species-specific limits that are different from other open access limits for lingcod, canary rockfish, and sablefish. Cowcod prohibitions and closures apply to all open access vessels.

Recreational Fishery

Recreational fisheries are also restricted for conservation reasons, particularly for lingcod, canary rockfish, and bocaccio, which have significant recreational catches. Washington, Oregon, and California each proposed, and the Council recommended, different combinations of seasons, bag limits and size limits to best fit the needs of their recreational fisheries, while meeting the conservation goals.

For lingcod, Washington closed the recreational fishery for 5 months (January 1–March 15, October 15–December 31) and raised the bag limit from 1 to 2 fish, while maintaining the 24-inch (61 cm) minimum size limit. Oregon lowered its bag limit from 2 to 1 lingcod and maintained its 24-inch (61-cm) size limit, but removed its 34-inch (86-cm) maximum size limit. California maintained its 2 lingcod bag limit, and a minimum size limit of 26 inches (66 cm), and closed the lingcod season January-February south of 34°27' N. lat. and March-June from 40°10' N. lat. to 34°27' N. lat. As recently as 1998, all three states had 3-fish lingcod bag limits and year-round seasons for this species. Recreational fisheries measures are more liberal off Washington State and somewhat revised in Oregon because of the slightly higher lingcod OY in 2001. California fisheries in 2000 achieved the bulk of the recreational lingcod allocation and had to be curtailed late in the year to prevent the fishery from exceeding the recreational lingcod allocation in 2001.

To prevent overfishing and rebuild overfished rockfish, the states took a number of additional actions. Washington maintained its 10 rockfish bag limit, but added that no more than 2 rockfish could be either canary rockfish or yelloweye rockfish, a species on which overfishing occurred in 1999. (Yelloweye are not common in trawl catches.) Oregon maintained its 10 rockfish bag limit, of which no more than 1 may be canary rockfish, a reduction from 3 canary rockfish in 2000. California maintained its 10 rockfish bag limit, reduced its canary rockfish sublimit from 3 fish to 1 fish, and also reduced its bocaccio sublimit from 3 fish to 2 fish, and kept its 10-inch (25-cm) minimum size limit for bocaccio. California also reduced its hook-per-pole limit from 3 hooks to 2 hooks. For bocaccio, the 10-inch (25-cm) minimum size off California was adopted to discourage the targeting of young fish off piers and jetties. Bocaccio smaller than 10 inches (25 cm) are common in shallow water during their first year of life, before they have an opportunity to mature and spawn. Fish caught off piers and jetties do not suffer from decompression and are expected to have high survive if returned quickly to sea.

To assist in species identification off California, the entire skin must remain on rockfish filets. This requirement provides a more effective means of enforcing reductions in bag limits for rockfish, in general, and for bocaccio, cowcod, and canary rockfish, in particular, because it is difficult to accurately distinguish among rockfish species unless the entire skin is attached.

Size limits are imposed on the following three species to protect young fish in nearshore waters off California: cabezon, 15-inch (38-cm) size limit; kelp greenling, 12-inch (30-cm) size limit; and California scorpionfish (also called ≥sculpin≥), 10- inch (25-cm) size limit. These recreational size limits apply to species with a conservation need that are of commercial and recreational

importance. Furthermore, these species are harvested in waters that are shallow enough to ensure a high likelihood of survival following capture and release. For cabezon, greenling, and California scorpionfish, the minimum size limits are intended to provide at least 50 percent of adult females of each species with an opportunity to spawn at least once. California state law subjects commercial fisheries off California to the same size limits for these three species.

Different season closures were chosen north and south of Point Conception in order to maximize benefits to bocaccio and canary rebuilding, while limiting disruption to the overall recreational fishery to 2-month or 4-month periods. Season closures were chosen to correspond with the periods of greatest benefit statewide for bocaccio and canary rockfish. Historically, over 40 percent of annual recreational landings of bocaccio in southern California have occurred during January and February, so prohibiting most rockfish landings during those months has the highest potential benefit for bocaccio. Nearly all canary rockfish catches in California have occurred north of Point Conception, where about 39 percent of the catch occurs during March-June, which is the greatest proportion of the total annual catch taken in any four consecutive months. March-June also accounts for a comparatively high proportion of the bocaccio catch north of Point Conception.

Season closures allow for modestly higher trip and bag limits than otherwise would be possible under year-round fishing. Season closures are also expected to result in fewer discards than otherwise would occur. Concurrent seasons for recreational and commercial nontrawl fisheries are more cost effective to enforce than staggered seasons and minimize conflicts between commercial nontrawl and recreational fishers who fish for nearshore and shelf rockfish.

Additional reductions in bocaccio and canary rockfish landings will be realized from lowering the daily bag limits for those species in the recreational fishery. Changing the daily bag limit for bocaccio from three fish to two fish may reduce recreational bocaccio landings between 12 and 23 percent. Likewise, lowering the daily bag limit for canary rockfish from three fish to one fish is expected to reduce recreational landings of canary rockfish by about 36 percent.

The most dramatic change to recreational fisheries management for groundfish is the introduction of the CCAs and the prohibition on cowcod retention. Cowcod has been an attractive target fish for recreational anglers because of its rare occurrence and because it is one of the largest rockfishes (up to 37 inches (95 cm) in length). Council recommendations for cowcod harvest are intended to emphasize that cowcod are rare because they have been overfished, and that anglers need to avoid cowcod rather than pursue them. Recreational fisheries are subject to the same cowcod prohibitions and closures as commercial fisheries.

Fishing Communities and Impacts

The Magnuson-Stevens Act requires that actions taken to implement FMPs be consistent with the 10 national standards, one of which requires that conservation and management measures ''take into account the importance of fishery resources to fishing communities in order to (A) provide for the sustained participation of such communities and (B), to the extent practicable, minimize adverse economic impacts on such communities.'' Commercial and recreational fisheries for Pacific coast groundfish contribute to the economies and shape the cultures of numerous fishing communities in Washington, Oregon, and California. Meeting the needs of fishing communities has become increasingly difficult because the Council manages a fishery that is overcapitalized and contains stocks that are overfished. In setting this year's specifications and management measures, the Council took several steps to accommodate the needs of those communities within the constraints of Magnuson-Stevens Act requirements to rebuild overfished stocks and to prevent overfishing. In general, the Council allows the largest harvest possible, consistent with conservation needs of the fish stocks.

For three of the five overfished species (lingcod, bocaccio, and canary rockfish), the Council could have prohibited all landings of these species, despite knowing that these three species are caught in mixed-stock fisheries. Interception and incidental mortality for these stocks are inevitable whether a retention prohibition is in place or not. Instead, the Council looked for some minimum level of retention in both commercial and recreational fisheries that would allow fishery participants to land some of their incidental catch of those species. The Council's goal was to set retention at some minimal level that would discourage targeting, while allowing fishers to land already-dead, incidentally caught fish. The retention levels allowed for each of these species are below the overfishing level and allow rebuilding, but also account for some unintentional catch.

In addition to measures that cushion the socio-economic effects of rebuilding, the Council continued the year-round fishery opportunity that is important to the fishing and processing sectors for maintaining a continuity of employment. The Council modified the cumulative trip limit system that has been used in recent years to extend the fishing season throughout the year by providing opportunities for at least some groundfish species and by maintaining trawl gear restrictions initially adopted for 2000. These gear restrictions use operational and economic incentives to prevent bottom trawl fishing with roller gear for some species and encourage use of midwater trawl and small footrope trawls on the continental shelf where most overfished species occur. These strategies were first developed for the 2000 fishery by a group of industry participants who met with the Groundfish Management Team (GMT) about achieving conservation goals while minimizing effects on the industry and coastal communities. Offering higher limits to gear with lower bycatch rates reduces bycatch and enhances economic opportunities by providing access to healthy stocks.

Nonetheless, the effects of these 2001 management measures on some fishers and communities will be severe, particularly for those without other opportunities. For the 2001 fishery, the Council proposed stringent harvest levels intended to protect and rebuild overfished and depleted stocks. In addition to reducing OYs for overfished stocks, the Council also severely constrained harvest on healthy stocks associated with those overfished stocks. These measures were needed to ensure that rebuilding of overfished and depleted stocks could occur. However, they will cause serious socio-economic repercussions as a result of these lower harvest levels and the consequent lower landings limits.

On January 19, 2000, Commerce Secretary William Daley announced that the West Coast groundfish fishery qualified as a ''fishery failure'' under the Magnuson-Stevens Act. NMFS had determined that this ''fishery failure'' was the result of several factors, primarily a long period of low ocean productivity combined with incorrect assumptions about the productivity of groundfish stocks. As discussed earlier in the section on the Council's new and more conservative harvest policy, recent scientific studies have shown that West Coast groundfish stocks have relatively low productivity when compared to other, similar stocks throughout the world. Thus, the Council had to conservatively adjusted its current

harvest policies to account for this new information about lower groundfish productivity, and set lower harvest limits to rebuild stocks that had been inadvertently fished at overly aggressive rates in the past.

In addressing the economic side of the fishery failure, NMFS estimated that implementing 2000 OYs and landings limits would result in about a 25 percent loss ($9-11 million) in revenue for the industry, as compared to 1999 OYs and landings levels. Groundfish harvest is even more constrained for 2001 with the implementation of the canary rockfish rebuilding plan. Participation in the groundfish fishery, particularly for open access fishers, has declined over the past several years. In 1994, approximately 1,900 vessels landed groundfish in the open access fishery coastwide. In 1999, approximately 1,500 open access vessels landed groundfish in 1999. Out of the 400 vessels leaving the fishery, approximately 300 had participated in the fishery south of Cape Mendocino, CA. Participation in the open access fishery is more flexible than participation in the limited entry fishery; open access vessels are more likely to move between fisheries from year to year, or to try a new economic venture altogether. Thus, open access fleet size may be used as a gauge of the overall economic viability of the fishery.

Distribution of the economic effect of the 2001 management measures will depend on how well the fishers can adapt to the restrictions. Some user groups, particularly those able to use midwater trawl gear, will have a greater opportunity to harvest than they would have had without gear restrictions, because the Council recommended restrictions that encourage fishers to use gear that reduces incidental catch of the depleted rockfish. Other fishers will not be able to maintain a viable operation at the reduced harvest levels. The Council prepared an EA/RIR for this action, which includes a discussion of the economic and social effects of these management measures on coastal communities (see **ADDRESSES**).

Summary of Management Changes in 2001

Section IV below incorporates the regulatory text that applies to fishers operating in the Pacific coast groundfish fishery in 2001. Many provisions are the same as in 2000, but a number of revisions and format changes have been made. New cumulative trip limit periods are announced at IV.A.(1)(c) that apply to both limited entry and open access fisheries. Explanations of size limit measurements and weight conversions are found at paragraph IV.A.(6), including a new filet length description for recreational fisheries. The sablefish size limit for trawlers and the limited entry, fixed-gear regular and mop-up sablefish fisheries have been eliminated. Paragraph IV.A. (11) clarifies how cumulative trip limits are applied for a limited entry vessel operating in the open access fishery if the open access limit is larger than the limited entry limit. Paragraph IV.A.(12) on ''crossover'' provisions includes new discussions of how crossover provisions apply to minor rockfish species and how they apply to the DTS complex for limited entry trawlers. Paragraph IV.A.(13) includes a list of species that must be sorted. Gear restrictions for the limited entry fishery appear in paragraph IV.A.(14); cumulative trip limits differ for many species depending on the type of trawl gear used. The first days of the major cumulative limit periods, which establish when limited entry permit transfers must be completed, are announced in paragraph IV.A.(15). Platooning dates for the year 2000 are listed in paragraph IV.A.(16). A new paragraph IV.A.(20) is inserted to define the CCAs. Classifications of nearshore, shelf, and slope rockfish are found at paragraph IV.A.(21), and minor rockfish species are listed in Table 2.

Cumulative trip limits are set into tables, with explanations in Section IV. However, the industry is cautioned not to rely on the tables alone. The text in Section IV provides cumulative trip limit definitions and periods, size limit definitions and conversions, and other information that cannot be readily included in a table but must be understood in order to correctly use the tables. The sablefish allocations and nontrawl sablefish management, Pacific whiting allocations and seasons, and ''per trip'' limits for black rockfish off Washington State are still presented in text in paragraphs IV.B. Discussions of trip limits for exempted trawl gear in the open access fishery (paragraph IV.C.), recreational management measures (paragraph IV.D.), and tribal allocations and management measures (paragraph V.) still remain in the text.

How to Use the Trip Limit Tables

Cumulative trip limits are applied during the time periods and in the areas indicated in Tables 3-5 of Section IV. The cumulative trip limit may be taken at any time within the applicable cumulative trip limit period. All cumulative trip limit periods start at 0001 hours, local time, on the specified beginning date, except for ≥B≥ platoon trawl vessels whose limits start on the 16th of the month (see paragraph IV.A.(16).

Example 1: Line 2 of Table 3 for the limited entry trawl fishery means: North of 40°10' N. lat., the cumulative trip limit for minor slope rockfish is 1,500 lb (680 kg) per 2-month period; the 2-month periods are January 1-February 28 and March 1-April 30.

Example 2: The trip limits for bocaccio on Table 4 for limited entry fixed gear mean: From January 1 through February 28, the trip limit for bocaccio between 40°10' N. lat. and 34°27' N. lat. is 300 lb (136 kg) each month. However, the fishery for bocaccio is closed from March 1 to April 30, which means bocaccio may not be taken, retained, possessed or landed between 40°10' N. lat. and 34°27' N. lat. during that time period. The cumulative trip limit increases to 500 lb (227 kg) per month on May 1, but a fisher may not fish ahead on that amount (see paragraph IV.A.(2)). Bocaccio taken and retained north of 40°10' N. lat. are not explicitly mentioned in the table, which means they are included in the trip limit for ''minor shelf rockfish-north'' (see footnote 5 of Table 4).

IV. NMFS Actions

For the reasons stated above, the Assistant Administrator for Fisheries, NOAA (Assistant Administrator), concurs with the Council's recommendations and announces the following management actions for 2001, including both measures that are unchanged from 2000 and new measures.

A. General Definitions and Provisions

The following definitions and provisions apply to the 2001 management measures, unless otherwise specified in a subsequent **Federal Register** document:

(1) *Trip limits*. Trip limits are used in the commercial fishery to specify the amount of fish that may legally be taken and retained, possessed, or landed, per vessel, per fishing trip, or cumulatively per unit of time, or the number of landings that may be made from a vessel in a given period of time, as follows:

(a) A ''per trip'' limit is the total allowable amount of a groundfish species or species group, by weight, or by percentage of weight of legal fish on board, that may be taken and retained, possessed, or landed per vessel from a single fishing trip.

(b) A daily trip limit is the maximum amount that may be taken and retained, possessed, or landed per vessel in 24 consecutive hours, starting at 0001 hours l.t. Only one landing of groundfish may be made in that 24-hour

period. Daily trip limits may not be accumulated during multiple day trips.

(c) A cumulative trip limit is the maximum amount that may be taken and retained, possessed, or landed per vessel in a specified period of time without a limit on the number of landings or trips, unless otherwise specified. The cumulative trip limit periods for limited entry and open access fisheries, which start at 0001 hours l.t. and end at 2400 hours l.t., are as follows, unless otherwise specified:

(i) The 2-month periods are: January 1-February 28, March 1-April 30, May 1-June 30, July 1-August 31, September 1-October 31, and, November 1-December 31.

(ii) One month means the first day through the last day of the calendar month.

(iii) One week means 7 consecutive days, Sunday through Saturday.

(2) *Fishing ahead.* Unless the fishery is closed, a vessel that has landed its cumulative or daily limit may continue to fish on the limit for the next legal period, so long as no fish (including, but not limited to, groundfish with no trip limits, shrimp, prawns, or other nongroundfish species or shellfish) are landed (offloaded) until the next legal period. As stated at 50 CFR 660.302 (in the definition of ''landing''), once the offloading of any species begins, all fish aboard the vessel are counted as part of the landing. Fishing ahead is not allowed during or before a closed period (see paragraph IV.A.(7)). See paragraph IV.A.(9) for information on inseason changes to limits.

(3) *Weights.* All weights are round weights or round-weight equivalents unless otherwise specified.

(4) *Percentages.* Percentages are based on round weights, and, unless otherwise specified, apply only to legal fish on board.

(5) *Legal fish.* ''Legal fish'' means fish legally taken and retained, possessed, or landed in accordance with the provisions of 50 CFR part 660, the Magnuson-Stevens Act, any document issued under part 660, and any other regulation promulgated or permit issued under the Magnuson-Stevens Act.

(6) *Size limits and length measurement.* Unless otherwise specified, size limits in the commercial and recreational groundfish fisheries apply to the ''total length'': the longest measurement of the fish without mutilation of the fish or the use of force to extend the length of the fish. No fish with a size limit may be retained if it is in such condition that its length has been extended or cannot be determined by these methods. For conversions not listed here, contact the state where the fish will be landed.

(a) *Whole fish.* For a whole fish, total length is measured from the tip of the snout (mouth closed) to the tip of the tail in a natural, relaxed position.

(b) *''Headed'' fish.* For a fish with the head removed (''headed''), the length is measured from the origin of the first dorsal fin (where the front dorsal fin meets the dorsal surface of the body closest to the head) to the tip of the upper lobe of the tail; the dorsal fin and tail must be left intact.

(c) *Filets.* A filet is the flesh from one side of a fish extending from the head to the tail, which has been removed from the body (head, tail, and backbone) in a single continuous piece. Filet lengths may be subject to size limits for some groundfish taken in the recreational fishery off California (see paragraph IV. D.(1)). A filet is measured along the length of the longest part of the filet in a relaxed position; stretching or otherwise manipulating the filet to increase its length is not permitted.

(d) *Sablefish weight limit conversions.* The following conversions apply to both the limited entry and open access fisheries when trip limits are effective for those fisheries. For headed and gutted (eviscerated) sablefish, the conversion factor established by the state where the fish is or will be landed will be used to convert the processed weight to round weight for purposes of applying the trip limit. (The conversion factor currently is 1.6 in Washington, Oregon, and California. However, the state conversion factors may differ; fishers should contact fishery enforcement officials in the state where the fish will be landed to determine that state's official conversion factor.)

(e) *Lingcod size and weight conversions.* The following conversions apply in both limited entry and open access fisheries.

(i) *Size conversion.* For lingcod with the head removed, the minimum size limit is 19.5 inches (49.5 cm), which corresponds to 24 inches (61 cm) total length for whole fish.

(ii) *Weight conversion.* The conversion factor established by the state where the fish is or will be landed will be used to convert the processed weight to round weight for purposes of applying the trip limit. (The states' conversion factors may differ, and fishers should contact fishery enforcement officials in the state where the fish will be landed to determine that state's official conversion factor.) If a state does not have a conversion factor for headed and gutted lingcod, or lingcod that is only gutted; the following conversion factors will be used. To determin (A) *Headed and gutted.* The conversion factor for headed and gutted lingcod is 1.5. e the round weight, multiply the processed weight times the conversion factor.

(B) *Gutted, with the head on.* The conversion factor for lingcod that has only been gutted is 1.1.

(7) *Closure.* ''Closure,'' when referring to closure of a fishery, means that taking and retaining, possessing, or landing the particular species or species group is prohibited.(See 50 CFR 660.302.) Unless otherwise announced in the Federal Register, offloading must begin before the time the fishery closes. [Note: Special provisions are made for an at-sea closure at the end of the regular season for the sablefish limited entry fishery. See 50 CFR 660.323(a)(2).] The provisions at paragraph IV.A.(2) for fishing ahead do not apply during a closed period. It is unlawful to transit through a closed area with the prohibited species on board, no matter where that species was caught, except as provided for in the CCA at IV. A.(20).

(8) *Fishery management area.* The fishery management area for these species is the EEZ off the coasts of Washington, Oregon, and California between 3 and 200 nm offshore, bounded on the north by the Provisional International Boundary between the United States and Canada, and bounded on the south by the International Boundary between the United States and Mexico. All groundfish possessed between 0-200 nm offshore or landed in Washington, Oregon, or California are presumed to have been taken and retained from the EEZ, unless otherwise demonstrated by the person in possession of those fish.

(9) *Routine management measures.* Most trip, bag, and size limits in the groundfish fishery have been designated ''routine '', which means they may be changed rapidly after a single Council meeting. (See 50 CFR 660.323(b).) Council meetings in 2001 will be held in the months of March, April, June, September, and November. Inseason changes to routine management measures are announced in the **Federal Register**. Information concerning changes to routine management measures is available from the NMFS Northwest and Southwest Regional Offices (see **ADDRESSES**). Changes to trip limits are effective at the times stated in the **Federal Register**. Once a change is effective, it is illegal to take and retain, possess, or land more fish than allowed under the new trip limit. This means that, unless otherwise announced in the **Federal Register**, offloading must begin before the time a fishery closes or a more restrictive trip limit takes effect.

(10) *Limited entry limits*. It is unlawful for any person to take and retain, possess, or land groundfish in excess of the landing limit for the open access fishery without having a valid limited entry permit for the vessel affixed with a gear endorsement for the gear used to catch the fish (50 CFR 660.306(p)).

(11) *Operating in both limited entry and open access fisheries*. The open access trip limit applies to any fishing conducted with open access gear, even if the vessel has a valid limited entry permit with an endorsement for another type of gear. A vessel that operates in both the open access and limited entry fisheries is not entitled to two separate trip limits for the same species. If a vessel has a limited entry permit and uses open access gear, but the open access limit is smaller than the limited entry limit, the open access limit cannot be exceeded and counts toward the limited entry limit. If a vessel has a limited entry permit and uses open access gear, but the open access limit is larger than the limited entry limit, the smaller limited entry limit applies, even if taken entirely with open access gear.

(12) *Operating in areas with different trip limits*. Trip limits for a species or a species group may differ in different geographic areas along the coast. The following ''crossover'' provisions apply to vessels operating in different geographical areas that have different cumulative or ''per trip'' trip limits for the same species or species group. Such crossover provisions do not apply to species that are subject only to daily trip limits, or to the trip limits for black rockfish off Washington (see 50 CFR 660.323(a)(1)). In 2001, the cumulative trip limit periods for the limited entry and open access fisheries are specified in paragraph IV.A(1)(c), but may be changed during the year if announced in the **Federal Register**.

(a) *Going from a more restrictive to a more liberal area*. If a vessel takes and retains any groundfish species or species group of groundfish in an area where a more restrictive trip limit applies before fishing in an area where a more liberal trip limit (or no trip limit) applies, then that vessel is subject to the more restrictive trip limit for the entire period to which that trip limit applies, no matter where the fish are taken and retained, possessed, or landed.

(b) *Going from a more liberal to a more restrictive area*. If a vessel takes and retains a groundfish species or species group in an area where a higher trip limit or no trip limit applies, and takes and retains, possesses or lands the same species or species group in an area where a more restrictive trip limit applies, that vessel is subject to the more restrictive trip limit for the entire period to which that trip limit applies, no matter where the fish are taken and retained, possessed, or landed.

(c) *Minor rockfish*. Several rockfish species are designated with species-specific limits on one side of the 40°10 N. lat. management line, and are included as part of a minor rockfish complex on the other side of the line.

(i) If a vessel takes and retains minor slope rockfish north of 40°10' N. lat., that vessel is also permitted to take and retain, possess or land splitnose rockfish up to its cumulative limit south of of 40°10' N. lat., even if splitnose rockfish were a part of the landings from minor slope rockfish taken and retained north of 40°10 N. lat. [Note: A vessel that takes and retains minor slope rockfish on both sides of the management line in a single cumulative limit period is subject to the more restrictive cumulative limit for minor slope rockfish during that period.]

(ii) If a vessel takes and retains minor shelf rockfish north of 40°10' N. lat., that vessel is also permitted to take and retain, possess, or land chilipepper rockfish and bocaccio up to their respective cumulative limits south of 40°10' N. lat., even if either species is part of the landings from minor shelf rockfish taken and retained north of 40°10' N. lat. [Note: A vessel that takes and retains minor shelf rockfish on both sides of the management line in a single cumulative limit period is subject to the more restrictive cumulative limit for minor shelf rockfish during that period.]

(iii) If a vessel takes and retains minor shelf rockfish south of 40°10' N. lat., that vessel is also permitted to take and retain, possess, or land yellowtail rockfish and POP up to their respective cumulative limits north of 40°10' N. lat., even if either species is part of the landings from minor shelf rockfish taken and retained south of 40°10' N. lat. [Note: A vessel that takes and retains minor shelf rockfish on both sides of the management line in a single cumulative limit period is subject to the more restrictive cumulative limit for minor shelf rockfish during that period.]

(d) ''*DTS complex*.'' For 2001, differential trip limits are introduced for the ''DTS complex'' (Dover sole, shortspine thornyhead, longspine thornyhead, sablefish) north and south of the management line at 40°10' N. lat. Vessels operating in the limited entry trawl fishery are subject to the crossover provisions in this paragraph IV.A.(12) when making landings that include any one of the four species in the ''DTS complex.'' [Example: The January-February cumulative limit for Dover sole north of 40°10' N. lat. is 65,000 lb (29,484 kg) and the cumulative limit for sablefish in that same period and area is 5,000 lb (2,268 kg), while the cumulative limits south of 40°10' N. lat. are 35,000 lb (15,876 kg) for Dover sole and 8,000 lb (3,629 kg) for sablefish. Under the crossover provisions, a vessel may not take and retain Dover sole north of 40°10' N. lat. and then travel south of 40°10' N. lat. in that same 2-month period to take and retain the higher sablefish limit in the south.]

(13) *Sorting*. It is unlawful for any person to ''fail to sort, prior to the first weighing after offloading, those groundfish species or species groups for which there is a trip limit, size limit, quota, or commercial OY, if the vessel fished or landed in an area during a time when such trip limit, size limit, commercial optimum yield, or quota applied.'' This provision applies to both the limited entry and open access fisheries. (See 50 CFR 660.306(h).) The following species must be sorted in 2001:

(a) For vessels with a limited entry permit:

(i) Coastwide—widow rockfish, canary rockfish, darkblotched rockfish, minor nearshore rockfish, minor shelf rockfish, minor slope rockfish, shortspine and longspine thornyheads, Dover sole, arrowtooth flounder, rex sole, petrale sole, other flatfish, lingcod, sablefish, and Pacific whiting;

(ii) North of 40°10' N. lat.--Pacific ocean perch, yellowtail rockfish, and, for fixed gear, black rockfish and blue rockfish;

(iii) South of 40°10' N. lat.--chilipepper rockfish, bocaccio rockfish, splitnose rockfish.

(b) For open access vessels (vessels without a limited entry permit):

(i) Coastwide—widow rockfish, canary rockfish, darkblotched rockfish, minor nearshore rockfish, minor shelf rockfish, minor slope rockfish, arrowtooth flounder, other flatfish, lingcod, sablefish, and Pacific whiting;

(ii) North of 40°10' N. lat.—black rockfish, blue rockfish, Pacific ocean perch, yellowtail rockfish;

(iii) South of 40°10' N. lat.—chilipepper rockfish, bocaccio rockfish, splitnose rockfish;

(iv) South of Point Conception—thornyheads.

(14) *Limited Entry Trawl Gear Restrictions*. Limited entry trip limits may vary depending on the type of trawl gear that is on board a vessel during a fishing trip: large footrope, small footrope, or midwater trawl gear.

(a) *Types of trawl gear*—(i) Large footrope trawl gear is bottom trawl gear, as specified at 50 CFR 660.302 and

660.322(b), with a footrope diameter larger than 8 inches (20 cm) (including rollers, bobbins or other material encircling or tied along the length of the footrope).

(ii) Small footrope trawl gear is bottom trawl gear, as specified at 50 CFR 660.302 and 660.322(b), with a footrope diameter 8 inches (20 cm) or smaller (including rollers, bobbins or other material encircling or tied along the length of the footrope), except chafing gear may be used only on the last 50 meshes of a small footrope trawl, measured from the terminal (closed) end of the codend. Other lines or ropes that run parallel to the footrope may not be augmented or modified to violate footrope size restrictions.

(iii) Midwater trawl gear is pelagic trawl gear, as specified at 50 CFR 660.302 and 660.322(b)(2). The footrope of midwater trawl gear may not be enlarged by encircling it with chains or by any other means. Ropes or lines running parallel to the footrope of midwater trawl gear must be bare and may not be suspended with chains or other materials.

(b) *Cumulative trip limits and prohibitions*—(i) *Large footrope trawl.* It is unlawful to take and retain, possess or land any species of shelf or nearshore rockfish (defined at IV.A.(21) and Table 2 to Section IV) from a fishing trip if large footrope gear is onboard; this restriction applies coastwide from January 1 to December 31. North of 40°10' N. lat., it is unlawful to take and retain, possess or land petrale sole from a fishing trip if large footrope gear is onboard and the trip is conducted at least in part between May 1 and October 31; cumulative limits for ''all other flatfish'' (all flatfish except those with cumulative trip limits in Table 3 to Section IV) are lower for vessels with large footrope gear on board if the trip is conducted at least in part between May 1 and October 31. South of 40°10' N. lat., it is unlawful to take and retain, possess, or land petrale sole from a fishing trip if large footrope gear is on board and the trip is conducted at least in part during May 1-October 31; cumulative limits for arrowtooth flounder and ''all other flatfish'' are lower for vessels with large footrope gear on board if the trip is conducted at least in part between May 1 and October 31. (See Table 3). The presence of rollers or bobbins larger than 8 inches (20 cm) in diameter on board the vessel, even if not attached to a trawl, will be considered to mean a large footrope trawl is on board. Dates are adjusted for the ''B'' platoon (See IV.A.(16)).

(ii) *Small footrope or midwater trawl gear.* Cumulative trip limits for canary rockfish, widow rockfish, yellowtail rockfish, bocaccio, chilipepper, minor shelf rockfish, minor nearshore rockfish, and lingcod, as indicated in Table 3 to Section IV, are allowed only if small footrope gear or midwater trawl gear is used, and if that gear meets the specifications in paragraphs IV.A.(14).

(iii) *Midwater trawl gear.* Higher cumulative trip limits are available for limited entry vessels using midwater trawl gear to harvest widow, yellowtail, or chilipepper rockfish. Each landing that contains widow, yellowtail, or chilipepper rockfish is attributed to the gear on board with the most restrictive trip limit for those species. Landings attributed to small footrope trawl must not exceed the small footrope limit, and landings attributed to midwater trawl must not exceed the midwater trawl limit. If a vessel has landings attributed to both types of trawls during a cumulative trip limit period, landings attributed to small footrope gear are counted toward the cumulative limit for midwater trawl gear. [Example: The cumulative trip limit in January-February for widow rockfish is 20,000 lb (9,072 kg) per 2 month period, of which no more than 1,000 lb (454 kg) per month may be attributed to landings by small footrope trawl gear.]

(iv) *More than one type of trawl gear on board.* The cumulative trip limits in Table 3 of Section IV must not be exceeded. It is legal to have more than one type of limited entry trawl gear on board, but the most restrictive trip limit associated with the gear on board applies for that trip and will count toward the cumulative trip limit for that gear. [Example: If a vessel has large footrope gear on board, it cannot land chilipepper, even if the chilipepper is caught with a small footrope trawl. If a vessel has both small footrope trawl and midwater trawl gear onboard, the landing is attributed to the more restrictive small footrope trawl limit, even if midwater trawl gear was used.]

(c) *Measurement.* The footrope will be measured in a straight line from the outside edge to the opposite outside edge at the widest part on any individual part, including any individual disk, roller, bobbin, or any other device.

(d) *State landing receipts.* Washington, Oregon, and California will require the type of trawl gear on board with the most restrictive limit to be recorded on the State landing receipt(s) for each trip or an attachment to the State landing receipt.

(e) *Gear inspection.* All trawl gear and trawl gear components, including unattached rollers or bobbins, must be readily accessible and made available for inspection at the request of an authorized officer. No trawl gear may be removed from the vessel prior to offloading. All footropes shall be uncovered and clearly visible except when in use for fishing.

(15) *Permit transfers.* Limited entry permit transfers are to take effect only on the first day of a major cumulative limit period (50 CFR 660.333(c)(1)); those days in 2001 are January 1, March 1, May 1, July 1, September 1, and November 1, and are delayed by 15 days (starting on the 16th of a month) for the ''B'' platoon.

(16) *Platooning—limited entry trawl vessels.* Limited entry trawl vessels are automatically in the ≥A≥ platoon, unless the ≥B≥ platoon is indicated on the limited entry permit. If a vessel is in the ''A'' platoon, its cumulative trip limit periods begin and end on the beginning and end of a calendar month as in the past. If a limited entry trawl permit is authorized for the ''B'' platoon, then cumulative trip limit periods will begin on the 16th of the month (generally 2 weeks later than for the ''A'' platoon), unless otherwise specified.

(a) For a vessel in the ''B'' platoon, cumulative trip limit periods begin on the 16th of the month at 0001 hours, l.t., and end on the 15th of the month. Therefore, the management measures announced herein that are effective on January 1, 2001, for the ''A'' platoon will be effective on January 16, 2001, for the ''B'' platoon. The effective date of any inseason changes to the cumulative trip limits also will be delayed for 2 weeks for the ''B'' platoon, unless otherwise specified.

(b) A vessel authorized to operate in the ''B'' platoon may take and retain, but may not land, groundfish from January 1, 2001, through January 15, 2001.

(c) A vessel authorized to operate in the ''B'' platoon will have the same cumulative trip limits for the November 16, 2001, through December 31, 2001, period as a vessel operating in the ''A'' platoon has for the November 1, 2001, through December 31, 2001 period.

(17) *Exempted fisheries.* U.S. vessels operating under an exempted fishing permit issued under 50 CFR part 600 also are subject to these restrictions, unless otherwise provided in the permit.

(18) Paragraphs IV.B. and IV.C. pertain to the commercial groundfish fishery, but not to Washington coastal tribal fisheries, which are described in Section V. The provisions in paragraphs IV.B. and IV.C. that are not covered under the headings ''limited entry'' or ''open access'' apply to all vessels in the commercial fishery that take and retain groundfish, unless otherwise stated.

Paragraph IV.D. pertains to the recreational fishery.

(19) Commonly used geographic coordinates.

(a) Cape Falcon, OR—45°46' N. lat.

(b) Cape Lookout, OR—45°20'15'' N. lat.

(c) Cape Blanco, OR--42°50' N. lat.

(d) Cape Mendocino, CA—40°30' N. lat.

(e) North/South management line—40°10' N. lat.

(f) Point Arena, CA—38°57'30'' N. lat.

(g) Point Conception, CA—34°27' N. lat.

(h) International North Pacific Fisheries Commission (INPFC) subareas (for more precise coordinates for the Canadian and Mexican boundaries, see 50 CFR 660.304):

(i) Vancouver—U.S.-Canada border to 47°30' N. lat.

(ii) Columbia—47°30' to 43°00' N. lat.

(iii) Eureka—43°00' to 40°30' N. lat.

(iv) Monterey--40°30' to 36°00' N. lat.

(v) Conception—36°00' N. lat. to the U.S.-Mexico border.

(20) *Cowcod Conservation Areas.* Recreational and commercial fishing for groundfish is prohibited within the Cowcod Conservation Areas (CCAs), except that recreational and commercial fishing for minor nearshore rockfish is permitted in waters inside 20 fathoms (36.9 m). It is unlawful to take and retain, possess, or land groundfish inside the CCAs, except for nearshore rockfish taken in waters inside the 20-fathom (36.9 m)depth contour. Commercial fishing vessels may transit through the Western CCA with their gear stowed and groundfish on board only in a corridor through the Western CCA bounded on the north by the latitude line at 33°00'30≥ N. lat., and bounded on the south by the latitude line at 32°59'30''.

(i) The Western CCA is an area south of Point Conception that is bound by straight lines connecting all of the following points in the order listed:

33°50' N. lat., 119°30' W. long.;
33°50' N. lat., 118°50' W. long.;
32°20' N. lat., 118°50' W. long.;
32°20' N. lat., 119°30' W. long.;
33°00' N. lat., 119°30' W. long.;
33°00' N. lat., 119°50' W. long.;
33°30' N. lat., 119°50' W. long.;
33°50' N. lat., 119°30' W. long.

(ii) The Eastern CCA is a smaller area west of San Diego that is bound by straight lines connecting all of the following points in the order listed:

32°40' N. lat., 118°00' W. long.;
32°40' N. lat., 117°50' W. long.;
32°30' N. lat., 117°50' W. long.;
32°40' N. lat., 118°00' W. long.
32°40' N. lat., 118°00' W. long.;

(21) *Rockfish categories.* Rockfish (except thornyheads) are divided into categories north and south of 40°10' N. lat., depending on the depth where they most often are caught: nearshore, shelf, or slope. (The term '' *Sebastes complex*'' no longer is used. Scientific names appear in Table 2.) New trip limits have been established for ''minor rockfish'' species according to these categories (see Tables 2-5).

(a) Nearshore rockfish consists entirely of the minor rockfish species listed in Table 2.

(b) Shelf rockfish consists of canary rockfish, shortbelly rockfish, widow rockfish (*Sebastes entomelas*), yellowtail rockfish, bocaccio, chilipepper, cowcod, and the minor shelf rockfish species listed in Table 2.

(c) Slope rockfish consists of Pacific ocean perch, splitnose rockfish, darkblotched rockfish, and the minor slope rockfish species listed in Table 2.

BILLING CODE 3510–22–S

Table 2 – Minor Rockfish Species (excludes thornyheads)

North of 40°10' N. lat.	South of 40°10' N. lat.

Limited Entry Fishery

(1) General. Most species taken in limited entry fisheries will be managed with cumulative trip limits (see paragraph IV.A.(1)(c), size limits (see paragraph IV.A.(6)), and seasons (see paragraph IV.A. (7)). The trawl fishery has gear requirements and trip limits that differ by the type of trawl gear on board (see paragraph IV.A.(14)). For the first time in 2001, cowcod retention is prohibited in all fisheries and groundfish vessels operating south of Point Conception must adhere to CCA

restrictions (see paragraph IV.A. (20)). Most of the management measures for the limited entry fishery are listed above and in Tables 3 and 4, and may be changed during the year by announcement in the **Federal Register**. However, the management regimes for several fisheries (nontrawl sablefish, Pacific whiting, and black rockfish) do not neatly fit into these tables and are addressed immediately following Tables 3 and 4.

37	small footrope trawl	Without flatfish, 1,500 lb/ month. As flatfish bycatch, per trip limit is the sum of 33% (by weight) of all flatfish except arrowtooth flounder, plus 10% (by weight) of arrowtooth flounder, not to exceed 2,500 lb/ trip and 20,000 lb/ 2 months.		Without flatfish, 1,500 lb/ month. As flatfish bycatch, per trip limit is the sum of 33% (by weight) of all flatfish except arrowtooth flounder, plus 10% (by weight) of arrowtooth flounder, not to exceed 7,500 lb/ trip and not to exceed 15,000 lb/ 2 months.			Without flatfish, 1,500 lb/ month. As flatfish bycatch, As flatfish bycatch, per trip limit is the sum of 33% (by weight) of all flatfish except arrowtooth flounder, plus 10% (by weight) of arrowtooth flounder, not to exceed 2,500 lb/ trip and 30,000 lb/ 2 months
38	**Bocaccio - South**[6/]	300 lb/ month		500 lb/ month			300 lb/ month
39	**Chilipepper - South**[6/]						
40	mid-water trawl	25,000 lb/ 2 months					
41	small footrope trawl	7,500 lb/ 2 months					
42	Cowcod	**Retention is Prohibited**					
43	**Minor nearshore rockfish**						
44	North	200 lb/ month					
45	South	200 lb/ month					
46	Lingcod[7/]	No retention		400 lb/ month			No retention

1/ Trip limits apply coastwide unless otherwise specified. "North" means 40°10' N. lat. To the U.S.-Canada border. "South" means 40°10' N. lat. To the U.S.-Mexico border. 40°10' N. lat is about 20 nm south of Cape Mendocino, CA.

2/ Gear requirements and prohibitions are explained at paragraph IV.A.(14)

3/ "Other" flatfish means all flatfish at 50 CFR 660.302 except those in this Table 3 with a trip limit.

4/ The whiting "per trip" limit in the Eureka area inside 100 fm is 10,000 lb/ trip throughout the year. See IV.B.(3)c). The 20,000 lb/ trip limit applices before and after the primary season.

5/ Small footrope trawl means a bottom trawl net with a footrope no larger than 8 inches (20 cm) in diameter. Midwater gear also may be used; the footrope must be bare. See paragraph IV.A. (14).

6/ Yellowtail rockfish and POP in the south, and bocaccio, and chilipepper rockfishes in the north are included in the trip limits for minor shelf rockfish in the appropriate area (Table 2).

7/ The size limit for lingcod is 24 inches (61 cm) total length.

To convert pounds to kilograms, divide by 2.20462, the number of pounds in one kilogram.

Table 4. 2001 Trip Limits[1/] for Limited Entry Fixed Gear

1/ Trip limits apply coastwide unless otherwise specified. "North" means 40°10' N. lat. To the U.S.-Canada border. "South" means 40°10' N. lat. To the U.S.-Mexico border. 40°10' N. lat is about 20 nm south of Cape Mendocino, CA.

2/ "Other flatfish" means all flatfish at 50 CFR 660.302 except those in this Table 4 with a trip limit.

3/ The whiting "per trip" limit in the Eureka area inside 100 fm is 10,000 lb/ trip throughout the year. See IV.B.(3)c).

4/ Closed means that it is prohibited to take and retain, possess, or land the designated species in the time or area indicated. See IV.A.(7). in the time or area indicated. See IV.A.(7).

5/ Yellowtail rockfish and POP in the south, and bocaccio, and chilipepper rockfishes in the north are included in the trip limits for minor shelf rockfish in the appropriate area (Table 2).

6/ The "per trip limit for black rockfish off Washington also applies. See paragraph IV.B.(4).

7/ The size limit for lingcod is 24 inches (61 cm) in the north, and 26 inches (66 cm) in the south, total length.

To convert pounds to kilograms, divide by 2.20462, the number of pounds in one kilogram.

BILLING CODE 3510–22–C

(2) *Sablefish*. The limited entry sablefish allocation is further allocated 58 percent to trawl gear and 42 percent to nontrawl gear. See footnote e/ of Table 1a.

(a) *Trawl trip and size limits*. Management measures for the limited entry trawl fishery for sablefish are listed in Table 3.

(b) *Nontrawl trip and size limits*. To take, retain, possess, or land sablefish during the regular or mop-up season for the nontrawl limited entry sablefish fishery, the owner of a vessel must hold a limited entry permit for that vessel, affixed with both a gear endorsement for longline or trap (or pot) gear, and a sablefish endorsement. (See 50 CFR 663.23(a)(2)(i).) A sablefish endorsement is not required to participate in the limited entry daily trip limit fishery.

(i) *Regular and mop-up seasons*. Starting and ending dates for the regular and mop-up seasons, and the size of the cumulative trip limits for the regular and mop-up seasons (see 50 CFR 660.323(a)(2)) will be announced later in the year.

(ii) *Daily trip limit*. The daily trip limit, which is listed in Table 4 and which applies to sablefish of any size, is in effect north of 36° N. lat. until the closed periods before or after the regular season as specified at 50 CFR 660.323(a)(2), between the end of the regular season and the beginning of the mop-up season, and after the mop-up season. The daily trip limit for sablefish taken and retained with nontrawl gear south of 36° N. lat. also is listed in Table 4, and continues throughout the year unless otherwise announced in the **Federal Register** because the regular and mop-up seasons do not apply south of 36° N. lat.

(3) *Whiting*. Additional regulations that apply to the whiting fishery are found at 50 CFR 660.306 and at 50 CFR 660.323(a)(3) and (a)(4).

(a) *Allocations*. The nontribal allocations are HGs, based on percentages that are applied to the commercial OY of 162,900 mt in 2001 (see 50 CFR 660.323(a)(4)), as follows:

(i) *Catcher/processor sector*--55,386 mt (34 percent);

(ii) *Mothership sector*--39,096 mt (24 percent);

(iii) *Shore-based sector*--68,418 mt (42 percent). No more than 5 percent (3,421 mt) of the shore-based whiting allocation may be taken before the shore-based fishery begins north of 42° N. lat.

(iv) *Tribal allocation*--See paragraph V.

(b) *Seasons*. The 2001 primary seasons for the whiting fishery start on the same dates as in 2000, as follows (see 50 CFR 660.323(a)(3)):

(i) *Catcher/processor sector*--May 15;

(ii) *Mothership sector*--May 15;

(iii) *Shore-based sector*--June 15 north of 42° N. lat.; April 1 between 42°-40°30' N. lat.; April 15 south of 40°30' N. lat.

(c) *Trip limits*. (i) *Before and after the regular season*. The ''per trip'' limit for whiting before and after the regular season for the shore-based sector is announced in Table 3, as authorized at 50 CFR 660.323(a)(3) and (a)(4). This trip limit includes any whiting caught shoreward of 100 fathoms (183 m) in the Eureka area.

(ii) *Inside the Eureka 100-fm (183 m) contour*. No more than 10,000 lb (4,536 kg) of whiting may be taken and retained, possessed, or landed by a vessel that, at any time during a fishing trip, fished in the fishery management area shoreward of the 100-fathom (183-m) contour (as shown on NOAA Charts 18580, 18600, and 18620) in the Eureka area.

(4) *Black rockfish. The regulations at 50 CFR 660.323(a)(1) state*: The trip limit for black rockfish (*Sebastes melanops*) for commercial fishing vessels using hook-and-line gear between the U.S.-Canada border and Cape Alava (48°09'30'' N. lat.) and between Destruction Island (47°40'00'' N. lat.) and Leadbetter Point (46°38'10'' N. lat.), is 100 lb (45 kg) or 30 percent, by weight of all fish on board, whichever is greater, per vessel per fishing trip.≥ These ≥per trip≥ limits apply to limited entry and open access fisheries, in conjunction with the cumulative trip limits and other management measures listed in Tables 4 and 5 of Section IV. The crossover provisions at paragraphs IV.A. (12) do not apply to the black rockfish per-trip limits.

C. Trip Limits in the Open Access Fishery

Open access gear is gear used to take and retain groundfish from a vessel that does not have a valid permit for the Pacific coast groundfish fishery with an endorsement for the gear used to harvest the groundfish. This includes longline, trap, pot, hook-and-line (fixed or mobile), set net and trammel net (south of 38° N. lat. only), and exempted trawl gear (trawls used to target non-groundfish species: pink shrimp or prawns, and, south of Pt. Arena, CA (38°57'30≥ N. lat.), California halibut or sea cucumbers). Unless otherwise specified, a vessel operating in the open access fishery is subject to, and must not exceed any trip limit, frequency limit, and/or size limit for the open access fishery. The crossover provisions at paragraph IV.A.(12) that apply to the limited entry fishery apply to the open access fishery as well.

(1) *All open access gear except exempt trawl gear*. The trip limits, size limits, seasons, and other management measures for open access groundfish gear, except exempted trawl gear, are listed in Table 5. The trip limit at 50 CFR 660.323(a)(i) for black rockfish caught with hook-and-line gear also applies. (The black rockfish limit is repeated at paragraph IV.B.4.)

44	40°10' - 34°27' N. lat.	1,800 lb/ 2 months	CLOSED 3/	Shoreward of 20 ftm depth: 1,800 lb/ 2 months, otherwise CLOSED 3/	1,800 lb/ 2 months	
45	South of 34°27' N. lat.	Shoreward of 20 ftm depth: 1,800 lb/ 2 months, otherwise CLOSED 3/	1,800 lb/ 2 months			
46	**Lingcod 7/**					
47	North	CLOSED 3/		400 lb/ month		CLOSED 3/
48	South					
49	40°10' - 34°27' N. lat.	CLOSED 3/			400 lb/ month	CLOSED 3/
50	South of 34°27' N. lat.	CLOSED 3/		400 lb/ month		CLOSED 3/

1/ Trip limits apply coastwide unless otherwise specified. "North" means 40°10' N lat to the U.S. - Canada border "South" means 40°10' N lat to the U.S.-Mexico border. 40°10' N lat is about 20 nm south of Cape Mendocino, CA.
2/ "Other flatfish" means all flatfish at 50 CFR 660.302 except those in this Table 4 with a trip limit.
3/ Closed means that it is prohibited to take, retain, possess, or land the designated species in the time or area indicated. (See IV.A. (7).)
4/ Yellowtail rockfish and POP in the south, and bocaccio, and chilipepper rockfishes in the north are included in the trip limits for minor shelf rockfish in the appropriate area (Table 2).
5/ The "per trip" limit for black rockfish off Washington also applies. See paragraph IV.B.(4).
6/ See IV.C.(4) for limits specific to Pacific City, Oregon.
7/ The size limit for lingcod is 24 inches (61 cm) in the north, and 26 inches (66 cm) in the south, total length.
To convert pounds to kilograms, divide by 2.20462, the number of pounds in one kilogram.

BILLING CODE 3510–22–C

(2) *Groundfish taken with exempted trawl gear by vessels engaged in fishing for spot and ridgeback prawns, California halibut, or sea cucumbers.* (a) *Trip limits.* The trip limit is 300 lb (136 kg) of groundfish per fishing trip. Limits and closures in Table 5 also apply and are counted toward the 300 lb (136 kg) groundfish limit. In any landing by a vessel engaged in fishing for spot and ridgeback prawns, California halibut, or sea cucumbers with exempted trawl gear, the amount of groundfish landed may not exceed the amount of the target species landed, except that the amount of spiny dogfish (*Squalas acanthias*) landed may exceed the amount of target species landed. Spiny dogfish are limited by the 300 lb (136 kg) per trip overall groundfish limit. The daily trip limits for sablefish coastwide and thornyheads south of Pt. Conception and the overall groundfish ''per trip'' limit may not be multiplied by the number of days of the fishing trip.

(b) State law. These trip limits are not intended to supersede any more restrictive state law relating to the retention of groundfish taken in shrimp or prawn pots or traps.

(c) *Participation in the California halibut fishery.* A trawl vessel will be considered participating in the California halibut fishery if:

(i) It is not fishing under a valid limited entry permit issued under 50 CFR 660.333 for trawl gear;

(ii) All fishing on the trip takes place south of Pt. Arena; and

(iii) The landing includes California halibut of a size required by California Fish and Game Code section 8392(a), which states: ''No California halibut may be taken, possessed or sold which measures less than 22 inches (56 cm) in total length, unless it weighs 4 lbs (1.8144 kg) or more in the round, 3 and one-half lbs (1.587 kg) or more dressed with the head on, or 3 lbs (1.3608 kg) or more dressed with the head off. Total length means ''the shortest distance between the tip of the jaw or snout, whichever extends farthest while the mouth is closed, and the tip of the longest lobe of the tail, measured while the halibut is lying flat in natural repose, without resort to any force other than the swinging or fanning of the tail.''

(d) *Participation in the sea cucumber fishery.* A trawl vessel will be considered to be participating in the sea cucumber fishery if:

(i) It is not fishing under a valid limited entry permit issued under 50 CFR 660.333 for trawl gear;

(ii) All fishing on the trip takes place south of Pt. Arena; and

(iii) The landing includes sea cucumbers taken in accordance with California Fish and Game Code, section 8396, which requires a permit issued by the State of California.

(3) *Groundfish taken with exempted trawl gear by vessels engaged in fishing for pink shrimp* . (a) The trip limit is 500 lb (227 kg) of groundfish per day, multiplied by the number of days of the fishing trip, but not to exceed 1,500 lb (680 kg) of groundfish per trip. The following sublimits also apply and are counted toward the overall 500 lb (227 kg) per day and 1,500 lb (680 kg) per trip groundfish limits:

(i) Canary rockfish:

(A) April 1 through 30, 2001: 50 lb (23 kg) per month

(B) Starting May 1, 2001: 200 lb (91 kg) per month

(ii) Lingcod:

(A) April 1 through 30, 2001: closed

(B) Starting May 1, 2001: 400 lb (181 kg) per month, with a minimum size limit (total length) of 24 inches (61 cm) north of 40°10' N. lat. and 26 inches (66 cm) south of 40°10' N. lat.

(C) November 1 through December 31: closed.

(iii) Sablefish: Starting April 1, 2001: 2,000 lb (907 kg) per month.

(iv) Thornyheads: Closed north of Pt. Conception (34°27' N. lat.)

(b) For all other groundfish species, the trip limits in Table 5 apply to groundfish taken with exempted trawl gear by vessels engaged in fishing for pink shrimp and count toward the overall 500 lb (227 kg) per day and 1,500 lb (680 kg) per trip groundfish limits.

(c) In any trip in which pink shrimp trawl gear is used, the amount of groundfish landed may not exceed the amount of pink shrimp landed.

(d) Operating in pink shrimp and other fisheries during the same cumulative trip limit period. Notwithstanding section IV.A.(11), a vessel that takes and retains pink shrimp and also takes and retains groundfish in either the limited entry or another open access fishery during the same applicable cumulative limit period that it takes and retains pink shrimp (which may be 1 month or 2 months, depending on the fishery and the time of year), the vessel may retain the larger of the two limits, but only if the limit(s) for each gear or fishery are not exceeded when operating in that fishery or with that gear. The limits are not additive; the vessel may not retain a separate trip limit for each fishery.

(4) *Landings in Pacific City, OR.* For purposes of this paragraph, Pacific City, OR, is the area between 45°03'50'' N. lat. and 45°20'15'' N. lat.

(a) January 1 to March 31, 2001; October 1 to December 31, 2001: No more than 200 lb (91 kg) of minor nearshore rockfish may be landed per month in Pacific City, OR.

(b) April 1 to September 30, 2001: No more than 2,200 lb (998 kg) of minor nearshore rockfish may be landed per month in Pacific City, OR. Within the 2,200 lb (998 kg) monthly limit, no more than 700 lb (318 kg) may be species other than black or blue rockfish.

D. Recreational Fishery

(1) *California.* [Note: California law provides that, in times and areas when the recreational fishery is open, there is 20-fish bag limit for all species of finfish, within which no more than 10 fish of any one species may be taken or possessed by any one person.] For each person engaged in recreational fishing seaward of California, the following seasons and bag limits apply:

(a) *Rockfish.* (i) *Cowcod Conservation Areas.* Recreational fishing for groundfish is prohibited within the Cowcod Conservation Areas, as described above at IV.A.(20), except that fishing for minor nearshore rockfish is permissible in waters inside of the 20-fathom (36.9 m) depth contour.

(ii) *Seasons.* North of 40°10' N. lat., recreational fishing for rockfish is open from January 1 through December 31. South of 40°10' N. lat. and north of Point Conception (34°27' N. lat.), recreational fishing for rockfish is closed from March 1 through April 30. This area is also closed to recreational rockfish fishing from May 1 through June 30, except that fishing for minor nearshore rockfish is permitted inside the 20-fathom (36.9 m) depth contour. South of Point Conception (34°27' N. lat.), recreational fishing for rockfish is closed from January 1 through February 28, except that fishing for minor nearshore rockfish is permitted inside the 20-fathom (36.9 m) depth contour. Recreational fishing for cowcod is prohibited all year in all areas.

(iii) *Bag limits, boat limits, hook limits.* In times and areas when the recreational season for rockfish is open, there is a 2-hook limit per fishing line, and the bag limit is 10 rockfish per day, of which no more than 2 may be bocaccio (*Sebastes paucispinis*) and no more than 1 may be canary rockfish. Cowcod may not be retained. Bocaccio and canary rockfish are not minor nearshore rockfish and thus, may not be retained in the area between 40°10' N. lat. and Point Conception (34°27' N. lat.) from May 1 through June 30. [Note: California scorpionfish, *Scorpaena guttata*, are subject to California's 10-fish bag limit per species, but are not

counted toward the 10-rockfish bag limit.] Multi-day limits are authorized by a valid permit issued by California and must not exceed the daily limit multiplied by the number of days in the fishing trip.

(iv) *Size limits.* The following rockfish size limits apply: bocaccio may be no smaller than 10 inches (25 cm), and California scorpionfish may be no smaller than 10 inches (25 cm).

(v)*Dressing/Fileting* . Rockfish skin may not be removed when fileting or otherwise dressing rockfish taken in the recreational fishery. The following rockfish filet size limits apply: bocaccio filets may be no smaller than 5 inches (12.8 cm); California scorpionfish filets may be no smaller than 5 inches (12.8 cm); and brown-skinned rockfish filets may be no smaller than 6.5 inches (16.6 cm). ''Brown-skinned'' rockfish include the following species: brown (*S. auriculatus*), calico (*S. dalli*), copper (*S. caurinus*), gopher (*S. carnatus*), kelp (*S. atrovirens*), olive (*S. serranoides*), speckled (*S. ovalis*), squarespot (*S.* hopinski), and yellowtail (*S. flavidus*).

(b) *Roundfish* (Lingcod, cabezon, kelp greenling--(i) *Seasons.* South of 40°10' N. lat. and north of Point Conception (34°27' N. lat.), recreational fishing for lingcod is closed from March 1 through June 30. South of Point Conception (34°27' N. lat.), recreational fishing for lingcod is closed from January 1 through February 28.

(iii) *Bag limits, boat limits, hook limits.* In times and areas when the recreational season for lingcod is open, there is a 2-hook limit per fishing line, and the bag limit is 2 lingcod per day. Multi-day limits are authorized by a valid permit issued by California and must not exceed the daily limit multiplied by the number of days in the fishing trip.

(iv) *Size limits.* The following roundfish size limits apply: lingcod may be no smaller than 26 inches (66 cm) total length, cabezon (*Scorpaenichthys marmoratus*) may be no smaller than 15 inches (38 cm); and kelp greenling (*Hexagrammos decagrammus*) may be no smaller than 12 inches (30 cm).

(v) *Dressing/Fileting.* Cabezon and kelp greenling taken in the recreational fishery may not be fileted at sea. Lingcod filets may be no smaller than 18 inches (46.1 cm).

(2) *Oregon.* The bag limits for each person engaged in recreational fishing seaward of Oregon are: 1 lingcod per day, which may be no smaller than 24 inches (61 cm) total length; and 10 rockfish per day, of which no more than 1 may be canary rockfish.

(3) *Washington.* For each person engaged in recreational fishing seaward of Washington, the following seasons and bag limits apply:

(a) *Rockfish.* There is a rockfish bag limit of no more than 10 rockfish per day, of which no more than 2 may be canary or yelloweye rockfish (*S. ruberrimus*).

(b) *Lingcod.* Recreational fishing for lingcod is closed between January 1, 2001, and March 15, 2001, and between October 15, 2001, and December 31, 2001. When the recreational season for lingcod is open, there is a bag limit of 2 lingcod per day, which may be no smaller than 24 inches (61 cm) total length.

V. Washington Coastal Tribal Fisheries

In 1994, the U.S. government formally recognized that the four Washington Coastal Tribes (Makah, Quileute, Hoh, and Quinault) have treaty rights to fish for groundfish, and concluded that, in general terms, the quantification of those rights is 50 percent of the harvestable surplus of groundfish available in the tribes' usual and accustomed (U and A) fishing areas (described at 50 CFR 660.324).

A tribal allocation is subtracted from the species OY before limited entry and open access allocations are derived. The treaty tribal fisheries for sablefish, black rockfish, and whiting are separate fisheries, not governed by the limited entry or open access regulations or allocations. The tribes regulate these fisheries so as not to exceed their allocations.

The tribal allocation for black rockfish is the same in 2001 as in 2000. As with non-tribal sablefish allocations, the tribal allocation for sablefish in 2001 is revised from prior years. In the past, 10 percent of the total catch OY was deducted for discard in all fisheries. Then, the tribal sablefish allocation was set at 10 percent of that landed catch OY, with the remaining 90 percent divided between various non-tribal fisheries. For 2001 and beyond, the Council recommended dividing the total catch OY according to the customary allocations for all sectors, including 10 percent for the tribes, and then reducing the allocations for each fishing sector by sector-specific discard mortality rates. Tribal sablefish fisheries are primarily longline fisheries and are estimated to have a 3-percent discard mortality rate. Thus, the tribal sablefish allocation is 10 percent of the total catch OY, 689.5 mt, less 3 percent discard mortality (20.7 mt), or approximately 669 mt.

For 2001, the tribes proposed a Pacific whiting allocation of 27,500 mt, and the Council voted to adopt this proposal. The 2001 allocation is based on a ''sliding scale'' proposal presented by the Makah Tribe in 1998 that determines the tribal allocation based on the level of the overall U.S. OY. The ''sliding scale'' proposal was previously used in both 1999 and 2000 to determine the tribal allocation. As discussed earlier, the U.S. whiting OY is reduced in 2001, based on lower estimated stock abundance, to 190,400 mt. Under the 1998 Makah ''sliding scale'' proposal, a 190,400 mt U.S. OY results in a 27,500 mt Makah whiting allocation. No other tribes proposed to harvest whiting in 2001.

The right of the Washington coastal treaty tribes to harvest Pacific whiting in accordance with the legal principles established in the ongoing case of U.S. v. Washington, No. 9213, Phase I (W.D. Wash), was sustained in Subproceeding 96-2, Order Granting Makah's Motion for Summary Judgment (Nov. 5, 1996), and in the separate, consolidated cases of *Midwater Trawlers Cooperative* v. *U.S. Department of Commerce*, Civ. Nos. 96-808R, C96-671R, C99-415R, and C99-500R (W.D. Wash.), Order Granting Defendants' Motions for Summary Judgment (July 26, 2000). In the latter cases, the court held that the tribes have a treaty right to harvest Pacific whiting; that the Federal defendants did not act arbitrarily and capriciously in recognizing the tribes' right; that the Secretary of Commerce did not act arbitrarily and capriciously in extending the tribes' usual and accustomed fishing areas into the United States' exclusive economic zone; that the Secretary appropriately recognized the tribes as co-managers of the shared resources in the final rule providing for tribal groundfish allocations (see 50 CFR 660.324(d)); and that the 1999 tribal allocation, which represented a compromise of different views of the treaty entitlement, was not arbitrary and capricious. This decision has been appealed to the Ninth Circuit Court of Appeals by non-treaty fishers and by the State of Oregon, and briefs will be submitted in the near future.

Quantification of the treaty right remains an issue. Under the applicable treaty rights law, Washington coast treaty tribes have treaty rights to harvest half the harvestable surplus of whiting found in their usual and accustomed fishing areas, determined according to the conservation necessity principle. The conservation necessity principle means that the determination of the amount of fish available for harvest must be based solely on resource conservation needs. This determination is difficult because, with the exception of cases involving Pacific halibut (*Makah* v. *Brown* Civil No. C-85- 1606R (W.D. Wash.) and *U.S.* v. *Washington*,

Subproceeding No. 92-1 (W.D. Wash.)), the legal and technical precedents are based on the biology, harvest, and conservation requirements for Pacific salmon and shellfish, which are very different than Pacific whiting. Quantifying the tribal right to Pacific whiting is further complicated by data limitations, and by scientific uncertainties surrounding Pacific whiting biology and conservation needs.

In 1996, the Makah initiated a subproceeding in *U.S.* v. *Washington*, Civil No. 9213-Phase I, Subproceeding No. 96-2, regarding their treaty right to whiting, including the issue of the appropriate quantification of that right. This subproceeding is ongoing, with briefing scheduled on the quantification issue in early 2001. However, taking into account the existing case law in *U.S.* v. *Washington*, the Makah Tribe's 1998 ''sliding scale'' proposal and its supporting materials, the Council's recommendation for the 2001 tribal allocation, and the continuing uncertainties surrounding a precise quantification of the tribal right, NMFS will allocate 27,500 mt of Pacific whiting in 2001 to the Makah Tribe.

For some species on which the tribes have a modest harvest, no specific allocation has been determined. Rather than try to reserve specific allocations for the tribes, which may not be needed by the tribes, NMFS is establishing trip limits recommended by the tribes and the Council to accommodate modest tribal fisheries. For lingcod, all tribal fisheries are restricted to 300 lb (126 kg) per trip. Tribal fisheries are not expected to take more than 3 mt of lingcod in 2001. For the Sebastes complex and other rockfish species, the 2001 tribal longline and trawl fisheries will operate under trip and cumulative limits. Tribal fisheries will operate under 300 lb (136 kg) per trip limits each for canary rockfish and for thornyheads, and under the same trip limits as the limited entry fisheries for all other rockfish. A 300-lb (136-kg) canary rockfish trip limit is expected to result in landings of 1,000-2,000 lb (0.5-1 mt). A 300-lb (136-kg) thornyhead limit is expected to result in landings of 8,000-9,000 lb (3-4 mt). Because of the small expected tribal groundfish catch, it is not anticipated that tribal trip limits will be reduced during the year unless OY's are achieved or unless inseason catch statistics demonstrate that the tribes have taken half of the available harvest in the tribal U and A fishing areas.

The Assistant Administrator (AA) announces the following tribal allocations for 2001, including those that are the same as in 2000. Trip limits for certain species were recommended by the tribes and the Council and are specified here with the tribal allocations:

A. Sablefish

The tribal allocation is 669 mt, 10 percent of the total catch OY, less 3 percent estimated discard mortality.

B. Rockfish

(1) For the commercial harvest of black rockfish off Washington State, a HG of: 20,000 lb (9,072 kg) north of Cape Alava (48°09'30'' N. lat.) and 10,000 lb (4,536 kg) between Destruction Island (47°40′00'' N. lat.) and Leadbetter Point (46°38'10'' N. lat.).

(2) Thornyheads are subject to a 300-lb (136-kg) trip limit.

(3) Canary rockfish are subject to a 300-lb (136-kg) trip

(4) Other rockfish are subject to the same trip limits as the limited entry fishery, as published in this document. The tribal limit will not change unless the tribal limits are revised separately from the limited entry limits.

C. Lingcod

Lingcod are subject to a 300-lb (136-kg) trip limit.

D. Pacific whiting

The tribal allocation is 27,500 mt.

VI. Issuance of Exempted Fishing Permits (EFPs)

At the November 2000, Council meeting, NMFS received an application from the States of Washington, Oregon, and California for renewal of the EFPs for the shore-based whiting fishery for 2001. An opportunity for public comment was provided during the Council meeting. The Council recommended that NMFS issue the EFPs, as requested by the States. Renewal of these EFPs, to about 40 vessels, would continue an ongoing program to collect information on the incidental catch of salmon and non-whiting groundfish in whiting harvests delivered to shore-based processing facilities.

Because whiting deteriorates rapidly, it must be handled quickly and immediately chilled to maintain the quality. As a result, many vessels dump catch directly or near directly into the hold and are unable to effectively sort their catch. The issuance of EFPs will allow vessels to delay sorting of prohibited species and groundfish caught in excess of cumulative trip limits until offloading. Delaying sorting until the vessel offloads will allow state biologists to collect incidental catch data for total catch estimates while maintaining whiting quality. Without an EFP, groundfish regulations at 50 CFR 660.306(b) require vessels to sort out prohibited species and return them to sea as soon as practicable with minimum injury. To allow state biologists to sample unsorted whiting, it is also necessary to include provisions for potential overages of groundfish trip limits which would be otherwise prohibited by regulations at 50 CFR 660.306(h). NMFS approves the request to renew the EFP for the shore-based whiting fishery in 2001.

Classification

The final specifications and management measures for 2001 are issued under the authority of, and are in accordance with, the Magnuson-Stevens Act, the FMP, and 50 CFR parts 600 and 660 subpart G (the regulations implementing the FMP).

This package of specifications and management measures is a delicate balance designed to allow as much harvest of healthy stocks as possible, while protecting overfished and other depressed stocks. Delay in implementation of the measures could upset that balance and cause harm to some stocks and it could require unnecessarily restrictive measures later in the year to make up for the late implementation. Much of the data necessary for these specifications and management measures came from the current fishing year. The Assistant Administrator for Fisheries, NOAA (AA) has determined that there is good cause under 5 U.S.C. 553(b)(B) to waive prior notice and opportunity for public comment for the specifications and management measures. Because of the timing of the receipt, development, review, and analysis of the fishery information necessary for setting the initial specifications and management measures, and the need to have these specifications and management measures in effect at the beginning of the 2001 fishing year, Amendment 4 to the FMP, implemented on January 1, 1991, recognized these timeliness considerations and set up a system by which the interested public is notified, through Federal Register publication and Council mailings, of Council meetings and of the development of these measures and is provided the opportunity to comment during the Council process. The public participated in GMT, Groundfish Advisory Subpanel, SSC, and Council meetings in September and November 2000 where these recommendations were formulated. Additional public comments on the specifications and management measures will be accepted

for 30 days after publication of this document in the **Federal Register**.

There is no burden for the public to come into compliance with the harvest specifications and management measures designed to achieve those specifications that are announced by this rule. As described above, the interested public has participated in the Council process to formulate these regulations. The Council has provided information to the industry on the above management measures and specifications through the newsletters that it sends to fishery participants. Moreover, NMFS has provided notice through the U.S. Coast Guard Notice to Mariners, and the states of Washington, Oregon, and California also disseminate information. Therefore, the AA finds, for good cause under 5 U.S.C. 553(d)(3), that it is unnecessary to delay for 30 days the effective date of the specifications and management measures. Because of the need to have these specifications and management measures in effect as close to the beginning of the 2001 fishing year as possible, the AA also finds, for good cause under 5 U.S.C. 553(d)(3), that it is contrary to the public interest to delay for 30 days the effective date of the specifications and management measures.

This action has been determined to be not significant for purposes of Executive Order 12866.

Because prior notice and opportunity for public comment are not required for the annual specifications and management measures by 5 U.S.C. 553, or any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, are not applicable.

This action refers to a collection-of-information requirements subject to the Paperwork Reduction Act (PRA). Permit requirements have been approved by OMB under control number 0648-203 for Federal fisheries permits. The public reporting burden for applications for exempted fishery permits is estimated at 1 hour per response; the burden for reporting by exempted fishing permittees is estimated at 30 minutes per response. These estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and revising the collection of information. Send comments regarding these burden estimates or any other aspect of the data requirements, including suggestions for reducing the burden to NMFS and to OMB (see **ADDRESSES**).

Notwithstanding any other provisions of the law, no person is required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB control number.

The President has directed Federal agencies to use plain language in their communications with the public, including regulations. To comply with this directive, we seek public comment on any ambiguity or unnecessary complexity arising from the language used in this rule (see **ADDRESSES**).

NMFS issued Biological Opinions (BOs) under the Endangered Species Act on August 10, 1990, November 26, 1991, August 28, 1992, September 27, 1993, May 14, 1996, and December 15, 1999 pertaining to the effects of the groundfish fishery on chinook salmon (Puget Sound, Snake River spring/summer, Snake River fall, upper Columbia River spring, lower Columbia River, upper Willamette River, Sacramento River winter, Central Valley, California coastal), coho salmon (Central California coastal, southern Oregon/northern California coastal, Oregon coastal), chum salmon (Hood Canal, Columbia River), sockeye salmon (Snake River, Ozette Lake), steelhead (upper, middle and lower Columbia River, Snake River Basin, upper Willamette River, central California coast, California Central Valley, south-central California, southern California), and cutthroat trout (Umpqua River, southwest Washington/Columbia River). NMFS has concluded that implementation of the FMP for the Pacific Coast groundfish fishery is not expected to jeopardize the continued existence of any endangered or threatened species under the jurisdiction of NMFS, or result in the destruction or adverse modification of critical habitat. This action is within the scope of these consultations. NMFS has re-initiated consultation on the Pacific whiting fishery associated with the BO issued on December 15, 1999. During the 2000 whiting season, the whiting fisheries exceeded the chinook bycatch amount specified in the Biological Opinion's incidental take statement's incidental take estimates, 11,000 fish, by approximately 500 fish. The re-initiation will focus primarily on additional actions that the whiting fisheries would take to reduce chinook interception, such as time/area management. NMFS expects that the re-initiated BO will be complete by May 2001. During the reinitiation, fishing under the FMP is within the scope of the December 15, 1999 BO, so long as the annual incidental take of chinook stays under the 11,000 fish bycatch limit. Because the majority of the catch will occur in late spring and summer. It is highly unlikely that the 11,000 fish bycatch limit will be exceeded.

The Council prepared an Environmental Impact Statement (EIS) for the FMP in 1982 and prepared Supplemental EISs for Amendments 4(1990) and 6 (1992) in accordance with the National Environmental Policy Act (NEPA). In addition, the Council prepared an environmental assessment for this action.

This action would set 2001 fishery specification and management measures that are designed to rebuild overfished stocks through constraining direct and incidental mortality, to prevent overfishing, and to achieve as much of the OYs as practicable for healthier groundfish stocks managed under the FMP. Five species managed under the FMP have been determined to be overfished: lingcod, bocaccio, POP, canary rockfish, and cowcod. NMFS is declaring two additional species (widow and darkblotched rockfish) overfished. Under the Magnuson-Stevens Act requirements for protecting overfished species, the 2001 management measures have been designed to keep directed and incidental catch of overfished species at levels that will allow those species to rebuild their populations. For 2001, commercial landings limits and recreational bag limits have been reduced, and time area closures have been expanded to protect overfished species. These fisheries have been operating under protective measures for several years.

Based on the biological, physical and socio-economic impacts of the alternatives that have been assessed in the EA, it was determined that implementation of the 2001 specifications and management measures would not significantly affect the quality of the human environment. Therefore, the preparation of an EIS for this action is not required by Section 102(2)(C) of NEPA or its implementing regulations.

Dated: January 4, 2001.

William T. Hogarth,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

Vol. 66, No. 8
Thursday, January 11, 2001

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG–116048–99]

RIN 1545–AX63

Stock Transfer Rules: Supplemental Rules

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: This document withdraws proposed regulations relating to an election available to certain taxpayers under section 367(b). The withdrawal corresponds to the upcoming expiration of the availability of the election.

FOR FURTHER INFORMATION CONTACT: Mark Harris at (202) 622–3860 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

On January 24, 2000, the IRS and Treasury published in the **Federal Register** proposed regulations (65 FR 3629) (the proposed regulations), temporary regulations (65 FR 3586) (the temporary regulations), and final regulations (65 FR 3589) (the final regulations) under section 367(b) of the Internal Revenue Code. The proposed and temporary regulations provide a modified version of an election contained in the proposed section 367(b) regulations issued on August 26, 1991 (1991 proposed regulations), which was not adopted in the final regulations. This election allows certain taxpayers to recognize the gain (but not the loss) realized in certain section 367(b) exchanges, rather than including the all earnings and profits amount in income. The preamble to the final regulations explains the reasons for not including the taxable exchange election in the final regulations (65 FR 3589 at 3592).

The IRS and Treasury issued the proposed and temporary regulations in order to provide taxpayers with an opportunity to comment on the decision not to include the taxable exchange election in the final regulations. Section 1.367(b)–3(b)(4)(ii) of the proposed and temporary regulations provide that the taxable exchange election is applicable for transactions that occur between February 23, 2000, and February 24, 2001. A public hearing was scheduled for April 20, 2000, and written comments were to be received by April 24, 2000. No one requested to speak at the public hearing, and no comments were submitted. In particular, the IRS and Treasury have not received any comments suggesting revisions to the effective date articulated in § 1.367(b)–3(b)(4)(ii). Accordingly, this document withdraws § 1.367(b)–3(b)(4) of the proposed regulations published in the **Federal Register** on January 24, 2000 (65 FR 3629).

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Withdrawal of Proposed Amendments to the Regulations

Accordingly, under the authority of 26 U.S.C. 7805, proposed amendments to 26 CFR part 1 relating to § 1.367(b)–3(b)(4) published January 24, 2000 (65 FR 6329), are withdrawn.

Robert E. Wenzel,

Deputy Commissioner of Internal Revenue.

RIN 1545–AX85

Disclosure of Returns and Return Information to Designee of Taxpayer

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: In the Rules and Regulations section of this issue of **Federal Register**, the IRS is issuing a temporary regulation relating to the disclosure of returns and return information to the designee of a taxpayer. The text of that temporary regulation also serves as the text of this regulation.

DATES: Written and electronic comments and requests for a public hearing must be received by April 11, 2001.

ADDRESSES: Send submissions to: CC:M&SP:RU (REG–103320–00), room 5226, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand delivered Monday through Friday between the hours of 8 a.m. and 5 p.m. to: CC:M&SP:RU (REG–103320–00), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC. Alternatively, taxpayers may submit comments electronically via the Internet by selecting the ''Tax Regs'' option on the IRS Home Page, or by submitting comments directly to the IRS Internet site: http://www.irs.gov/prod/tax_regs/comments/html.

FOR FURTHER INFORMATION CONTACT: Joseph Conley (202) 622–4580 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

Section 6103(c), as amended by section 1207 of the Taxpayer Bill of Rights II, Public Law 104–168 (110 Stat. 1452), authorizes the IRS to disclose returns and return information to such person or persons as the taxpayer may designate in a request for or consent to disclosure or to any other person at the taxpayer's request to the extent necessary to comply with a request for information or assistance made by the taxpayer to such other person. Disclosure is permitted subject to such requirements and conditions as may be prescribed by regulations. With the amendment in 1996, Congress eliminated the longstanding requirement that disclosures to designees of the taxpayer must be pursuant to the written request or consent of the taxpayer. The purpose of this amendment to section 6103(c) was to assist the IRS in developing a paperless tax administration system that relies on, among other things, electronic communication. H.R. Rep. No. 104–506, at 49 (1996), reprinted in 1996 U.S.C.A.N. 1143, 1172.

On October 3, 1980, a final regulation (TD 7723) relating to the disclosure of tax returns and return information to a

person designated by the taxpayer in a written request or consent was published in the **Federal Register** (45 FR 65564). Since the publication of this final regulation, the IRS has determined that further guidance on written consent requirements is necessary.

This document contains a proposed regulation that authorizes the disclosure of tax returns and return information to a designee of the taxpayer pursuant to nonwritten requests or consents authorizing the disclosures. Such proposed regulation also amends the existing regulation to clarify the rules applicable to written requests or consents to disclosure.

The text of the temporary regulation published in this issue of the **Federal Register** serves as the text of this proposed regulation. The preamble to the temporary regulation explains the regulation.

Special Analysis

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It is hereby certified that this proposed regulation will not impose a significant economic impact on a substantial number of small entities. The regulation is intended to reduce the burden on taxpayers and to facilitate the development of a paperless tax administration system. The prior regulation required that a taxpayer provide a written request or consent before the IRS could disclose the taxpayer's return information to a designee of the taxpayer; this regulation permits such a disclosure, under certain specified circumstances, pursuant to the taxpayer's nonwritten request or consent. The regulation also provides parameters for the development of consents for the electronic filing program, and it reduces the burden on taxpayers in combined Federal-State return filing programs by facilitating the electronic filing of a Federal-State return by means of a single electronic transmission.

Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel of Small Business Administration for comment on its impact on small businesses.

Comments and Requests for a Public Hearing

Before the proposed regulation is adopted as a final regulation, consideration will be given to any electronic and written comments (a signed original and eight (8) copies) that are submitted timely to the IRS. The IRS and Treasury Department specifically request comments on consents or notices authorizing disclosures in an electronic environment. Additionally, the IRS and Treasury Department specifically request comments on the clarity of the proposed regulation and how it can be made easier to understand. All comments will be available for public inspection and copying. A public hearing may be scheduled if requested in writing by a person that timely submits comments. If a public hearing is scheduled, notice of the date, time, and place for the hearing will be published in the **Federal Register**.

Drafting Information

The principal author of this regulation is Jamie Bernstein, Office of the Associate Chief Counsel, Procedure and Administration (Disclosure & Privacy Law Division). However, other personnel from the IRS and Treasury Department participated in its development.

List of Subjects in 26 CFR part 301

Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Penalties, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 301 is amended as follows:

PART 301—PROCEDURE AND ADMINISTRATION

Paragraph 1. The authority citation for part 301 is amended by adding an entry in numerical order to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Section 301.6103(c)–1 also issued under 26 U.S.C. 6103(c). * * *

Par. 2. Section 301.6103(c)–1 is added to read as follows:

§ 301.6103(c)–1 Disclosure of returns and return information to designee of taxpayer.

[The text of this proposed section is the same as the text of § 301.6103(c)–1T published elsewhere in this issue of the **Federal Register**.]

Robert E. Wenzel,

Deputy Commissioner of Internal Revenue.

BILLING CODE 4830–01–P

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 914

[SPATS No. IN–151–FOR]

Indiana Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Proposed rule; public comment period and opportunity for public hearing.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) is opening the public comment period for a previously submitted proposed amendment to the Indiana regulatory program (Indiana program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). Indiana proposes the addition of a statute concerning post mining land use changes as nonsignificant permit revisions. The amendment is intended to revise the Indiana program to improve operational efficiency. This document gives the times and locations that the Indiana program and proposed amendment to that program are available for your inspection, the comment period during which you may submit written comments on the amendment, and the procedures that we will follow for the public hearing, if one is requested.

DATES: We will accept written comments until 4:00 p.m., e.s.t., February 12, 2001. If requested, we will hold a public hearing on the amendment on February 5, 2001. We will accept requests to speak at the hearing until 4:00 p.m., e.s.t. on January 26, 2001.

ADDRESSES: You should mail or hand deliver written comments and requests to speak at the hearing to Andrew R. Gilmore, Director, Indianapolis Field Office, at the address listed below.

You may review copies of the Indiana program, the amendment, a listing of any scheduled public hearings, and all written comments received in response to this document at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. You may receive one free copy of the amendment by contacting OSM's Indianapolis Field Office.

Andrew R. Gilmore, Director, Indianapolis Field Office, Office of Surface Mining Reclamation and Enforcement, Minton-Capehart Federal Building, 575 North Pennsylvania Street, Room 301,

Indianapolis, IN 46204, Telephone: (317) 226–6700.
Indiana Department of Natural Resources, Bureau of Mine Reclamation, 402 West Washington Street, Room W–295, Indianapolis, Indiana 46204, Telephone: (317) 232–1291.
Indiana Department of Natural Resources, Division of Reclamation, R.R. 2, Box 129, Jasonville, Indiana 47438–9517, Telephone: (812) 665–2207.

FOR FURTHER INFORMATION CONTACT: Andrew R. Gilmore, Director, Indianapolis Field Office. Telephone: (317) 226–6700. Internet: INFOMAIL@indgw.osmre.gov.

SUPPLEMENTARY INFORMATION:

I. Background on the Indiana Program

On July 29, 1982, the Secretary of the Interior conditionally approved the Indiana program. You can find background information on the Indiana program, including the Secretary's findings, the disposition of comments, and the conditions of approval in the July 26, 1982, **Federal Register** (47 FR 32107). You can find later actions on the Indiana program at 30 CFR 914.10, 914.15, and 914.16.

By letter dated May 14, 1998 (Administrative Record No. IND–1606), Indiana submitted a proposed amendment to us accordance with SMCRA. The proposed amendment concerned revisions of and additions to the Indiana Code (IC) made by House Enrolled Act (HEA) No. 1074. Indiana intended to revise its program to incorporate the additional flexibility afforded by SMCRA and to provide the guidelines for permit revisions, including incidental boundary revisions. We announced receipt of the proposed amendment in the May 29, 1998, **Federal Register** (63 FR 29365), and invited public comment on its adequacy. The public comment period for the amendment closed June 29, 1998. During our review of the proposed amendment, we identified concerns relating to the proposed amendment. We notified Indiana of these concerns by letter dated September 15, 1998 (Administrative Record No. IND–1621). By letter dated December 21, 1998 (Administrative Record No. IND–1627), Indiana responded to our concerns by submitting additional explanatory information. Because Indiana did not make any substantive revisions to the amendment, we did not reopen the public comment period. On March 16, 1999, we approved Indiana's proposed amendment, with three exceptions (64 FR 12890). Specifically, we did not approve the amendment at IC 14–34–5–7(a) concerning guidance for permit revisions; the amendment at IC 14–34–5–8.2(4) concerning postmining land use changes; and the amendment at IC 14–34–5–8.4(c)(2)(K) concerning minor field revisions for temporary cessation of mining. On May 26, 1999, at Indiana's request, we provided clarification of our decision on Indiana's amendment (64 FR 28362).

On May 14, 1999, the Indiana Coal Council (ICC) filed a lawsuit against OSM for the disapproval of Indiana's amendment at IC 14–34–5–7(a) and IC 14–34–5–8.2(4). On September 25, 2000, the U.S. District Court for the Southern District of Indiana handed down its decision on the ICC's lawsuit. The court found that, in the case of IC 14–34–5–7(a) concerning guidance for permit revisions, OSM had not acted arbitrary and capricious. Therefore, the court upheld our decision. However, in the case of IC 14–34–5–8.2(4) concerning postmining land use changes, the Court found that our decision was arbitrary and capricious, and remanded the matter to OSM for ''further consideration.'' In accordance with the Court's ruling, we are opening the public comment period for section 8.2(4) of Indiana's proposed amendment submitted on May 15, 1998, so that we can properly consider whether the proposed amendment satisfies the applicable program approval criteria of 30 CFR 732.15.

II. Description of the Proposed Amendment

The full text of the proposed program amendment submitted by Indiana is available for public inspection at the locations listed above under **ADDRESSES**. A discussion of the proposed amendment is presented below.

IC 14–34–5–8.2(4), Nonsignificant Permit Revisions

Indiana proposes to add language at IC 14–34–5–8.2(4) to provide that postmining land use changes other than residential, commercial or industrial, recreational, or developed water resources meeting MSHA requirements for a significant impoundment are nonsignificant permit revisions, and therefore are not subject to the notice and hearing requirements of IC 14–34.

III. Public Comment Procedures

Under the provisions of 30 CFR 732.17(h), we are seeking comments on whether the proposed amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If we approve the amendment, it will become part of the Indiana program.

Written Comments: If you submit written or electronic comments on the proposed rule during the 30-day comment period, they should be specific, should be confined to issues pertinent to the notice, and should explain the reason for your recommendation(s). We may not be able to consider or include in the Administrative Record comments delivered to an address other than the one listed above (see **ADDRESSES**).

Electronic Comments: Please submit Internet comments as an ASCII, WordPerfect, or Word file avoiding the use of special characters and any form of encryption. Please also include ''Attn: SPATS NO. IN–151–FOR'' and your name and return address in your Internet message. If you do not receive a confirmation that we have received your Internet message, contact the Indianapolis Field Office at (317) 226–6700.

Availability of Comments: Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours at OSM's Indianapolis Field Office (see **ADDRESSES**). Individual respondents may request that we withhold their home address from the administrative record, which we will honor to the extent allowable by law. There also may be circumstances in which we would withhold from the administrative record a respondent's identity, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. However, we will not consider anonymous comments. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

Public Hearing: If you wish to speak at the public hearing, contact the person listed under **FOR FURTHER INFORMATION CONTACT** by 4:00 p.m., e.s.t. on January 26, 2001. We will arrange the location and time of the hearing with those persons requesting the hearing. If no one requests an opportunity to speak at the public hearing, the hearing will not be held.

To assist the transcriber and ensure an accurate record, we request, if possible, that each person who speaks at a public hearing provide us with a written copy of his or her testimony. The public hearing will continue on the specified date until all persons scheduled to speak have been heard. If you are in the audience and have not been scheduled to speak and wish to do so, you will be

allowed to speak after those who have been scheduled. We will end the hearing after all persons scheduled to speak and persons present in the audience who wish to speak have been heard.

If you are disabled and need a special accommodation to attend a public hearing, contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Public Meeting: If only one person requests an opportunity to speak at a hearing, a public meeting, rather than a public hearing, may be held. If you wish to meet with us to discuss the proposed amendment, you may request a meeting by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**. All such meetings are open to the public and, if possible, we will post notices of meetings at the locations listed under **ADDRESSES**. We will also make a written summary of each meeting a part of the Administrative Record.

IV. Procedural Determinations

Executive Order 12866—Regulatory Planning and Review

This rule is exempted from review by the Office of Management and Budget under Executive Order 12866.

Executive Order 12630—Takings

This rule does not have takings implications. This determination is based on the analysis performed for the counterpart Federal regulations.

Executive Order 13132—Federalism

This rule does not have federalism implications. SMCRA delineates the roles of the Federal and State governments with regard to the regulation of surface coal mining and reclamation operations. One of the purposes of SMCRA is to ''establish a nationwide program to protect society and the environment from the adverse effects of surface coal mining operations.'' Section 503(a)(1) of SMCRA requires that State laws regulating surface coal mining and reclamation operations be ''in accordance with'' the requirements of SMCRA, and section 503(a)(7) requires that State programs contain rules and regulations ''consistent with'' regulations issued by the Secretary under SMCRA.

Executive Order 12988—Civil Justice Reform

The Department of the Interior has conducted the reviews required by section 3 of Executive Order 12988 and has determined that, to the extent allowed by law, this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments since each program is drafted and promulgated by a specific State, not by OSM. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and 30 CFR 730.11, 732.15, and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR Parts 730, 731, and 732 have been met.

National Environmental Policy Act

Section 702(d) of SMCRA (30 U.S.C. 1292(d)) provides that a decision on a proposed State regulatory program provision does not constitute a major Federal action within the meaning of section 102(2)(C) of the National Environmental Policy Act (NEPA) (42 U.S.C. 4332(2)(C)). A determination has been made that such decisions are categorically excluded from the NEPA process (516 DM 8.4.A).

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. 3507 *et seq.*).

Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal which is the subject of this rule is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Accordingly, this rule will ensure that existing requirements previously promulgated by OSM will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

Small Business Regulatory Enforcement Fairness Act

This rule is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. This rule:

a. Does not have an annual effect on the economy of $100 million.

b. Will not cause a major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions.

c. Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S. based enterprises to compete with foreign-based enterprises.

This determination is based upon the fact that the State submittal which is the subject of this rule is based upon counterpart Federal regulations for which an analysis was prepared and a determination made that the Federal regulation was not considered a major rule.

Unfunded Mandates

This rule will not impose a cost of $100 million or more in any given year on any governmental entity or the private sector.

List of Subjects in 30 CFR Part 914

Intergovernmental relations, Surface mining, Underground mining.

Dated: January 3, 2001.

Richard J. Seibel,

Acting Regional Director, Mid-Continent Regional Coordinating Center.

BILLING CODE 4310–05–P

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

RIN 2900–AK63

Disease Associated With Exposure to Certain Herbicide Agents: Type 2 Diabetes

AGENCY: Department of Veterans Affairs.

ACTION: Proposed rule.

SUMMARY: The Department of Veterans Affairs (VA) is proposing to amend its adjudication regulations concerning presumptive service connection for certain diseases for which there is no record during service. This proposed amendment is necessary to implement a decision of the Secretary of Veterans Affairs under the authority granted by the Agent Orange Act of 1991 that there is a positive association between exposure to herbicides used in the Republic of Vietnam during the Vietnam era and the subsequent development of Type 2 diabetes. The intended effect of this proposed amendment is to establish presumptive service connection for that condition based on herbicide exposure.

DATES: Comments must be received on or before March 12, 2001.

ADDRESSES: Mail or hand-deliver written comments to: Director, Office of Regulations Management (02D), Department of Veterans Affairs, 810 Vermont Ave., NW., Room 1154, Washington, DC 20420; or fax comments to (202) 273–9289; or e-mail comments to *OGCRegulations@mail.va.gov.* Comments should indicate that they are submitted in response to ''RIN 2900–AK63.'' All comments received will be available for public inspection in the Office of Regulations Management, Room 1158, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday (except holidays).

FOR FURTHER INFORMATION CONTACT: Bill Russo, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, telephone (202) 273–7210.

SUPPLEMENTARY INFORMATION: Section 3 of the Agent Orange Act of 1991, Pub. L. 102–4, 105 Stat. 11, directed the Secretary to seek to enter into an agreement with the National Academy of Sciences (NAS) to review and summarize the scientific evidence concerning the association between exposure to herbicides used in support of military operations in the Republic of Vietnam during the Vietnam era and each disease suspected to be associated with such exposure. Congress mandated that NAS determine, to the extent possible: (1) Whether there is a statistical association between the suspect diseases and herbicide exposure, taking into account the strength of the scientific evidence and the appropriateness of the methods used to detect the association; (2) the increased risk of disease among individuals exposed to herbicides during service in the Republic of Vietnam during the Vietnam era; and (3) whether there is a plausible biological mechanism or other evidence of a causal relationship between herbicide exposure and the suspect disease. Section 3 of Pub. L. 102–4 also required that NAS submit reports on its activities every two years (as measured from the date of the first report) for a ten-year period.

Section 2 of Pub. L. 102–4 provides that whenever the Secretary determines, based on sound medical and scientific evidence, that a positive association (*i.e.,* the credible evidence for the association is equal to or outweighs the credible evidence against the association) exists between exposure of humans to an herbicide agent (*i.e.,* a chemical in an herbicide used in support of the United States and allied military operations in the Republic of Vietnam during the Vietnam era) and a disease, the Secretary will publish regulations establishing a presumptive service connection for that disease. Presumptive service connection relaxes the evidentiary burden, so that the claimant need not provide direct evidence of a link between his or her disease and the claimant's exposure to Agent Orange. Instead, such a link is presumed and may be rebutted only if there is affirmative evidence to the contrary.

If the Secretary determines that a presumption of service connection is not warranted, he is to publish a notice of that determination, including an explanation of the scientific basis for that determination. The Secretary's determination must be based on consideration of the NAS reports and all other sound medical and scientific information and analysis available to the Secretary.

(Under Section 2 of Pub. L. 102–4, any veteran who served in Vietnam during the Vietnam Era and has one of the diseases on the presumptive list codified at 38 CFR 3.309(e), is presumed to have been exposed to herbicides. Under current law, the Vietnam Era is defined as January 9, 1962 through May 7, 1975, for the purposes of such presumptions. 38 U.S.C. 1116.)

Although Pub. L. 102–4 does not define ''credible,'' it does instruct the Secretary to ''take into consideration whether the results [of any study] are statistically significant, are capable of replication, and withstand peer review.'' Simply comparing the number of studies which report a positive relative risk to the number of studies which report a negative relative risk for a particular condition is not a valid method for determining whether the weight of evidence overall supports a finding that there is or is not a positive association between herbicide exposure and the subsequent development of the particular condition. Because of differences in statistical significance, confidence levels, control for confounding factors, bias, and other pertinent characteristics, some studies are clearly more credible than others, and the Secretary has given the more credible studies more weight in evaluating the overall weight of the evidence concerning specific diseases.

I. History of Agent Orange Presumptions

NAS issued its initial report, entitled ''Veterans and Agent Orange: Health Effects of Herbicides Used in Vietnam,'' (VAO) on July 27, 1993. The Secretary subsequently determined that a positive association exists between exposure to herbicides used in the Republic of Vietnam and the subsequent development of Hodgkin's disease, porphyria cutanea tarda, multiple myeloma, and certain respiratory cancers; and that there was no positive association between herbicide exposure and any other condition, other than chloracne, non-Hodgkin's lymphoma, and soft-tissue sarcomas, for which presumptions already existed. A notice of the diseases that the Secretary determined were not associated with exposure to herbicide agents was published on January 4, 1994 (see 59 FR 341–46).

NAS issued its second report, entitled ''Veterans and Agent Orange: Update 1996'' (Update 1996), on March 14, 1996. The Secretary subsequently determined that a positive association exists between exposure to herbicides used in the Republic of Vietnam and the subsequent development of prostate cancer and acute and subacute peripheral neuropathy in exposed persons. The Secretary further determined that there was no positive association between herbicide exposure and any other condition, other than those for which presumptions already existed. A notice of the diseases that the Secretary determined were not associated with exposure to herbicide agents was published on August 8, 1996 (see 61 FR 41442–49).

NAS issued a third report, entitled ''Veterans and Agent Orange: Update 1998'' (Update 1998), on February 11, 1999. The focus of this updated review was on new scientific studies published since the release of Update 1996 and updates of scientific studies previously reviewed. The Secretary determined that there was no positive association between herbicide exposure and any condition other than those for which presumptions already existed. A notice of this determination was published on November 2, 1999 (see 64 FR 59232–59243).

II. History of NAS Review of Type 2 Diabetes

In VAO, Update 1996, and Update 1998, NAS placed metabolic and digestive disorders (including Type 2 diabetes) in the category labeled ''Inadequate/Insufficient Evidence to Determine Whether an Association Exists.'' According to NAS, this means that the available studies are of insufficient quality, consistency, or statistical power to permit a conclusion regarding the presence or absence of an association. For example, studies fail to

control for confounding factors, have inadequate exposure assessments, or fail to address latency.

However, after NAS released Update 1998 the National Institute of Occupational Safety and Health (NIOSH) published a report that detects an association, though not a strong association, between Type 2 diabetes and dioxin exposure. The study does suggest a dose response relationship because of excess cases of Type 2 diabetes found in workers having the highest serum-lipid levels of dioxin (Calvert GM, Sweeney MH, Deddens J, Wall DK. 1999. Evaluation of Type 2 diabetes, Serum Glucose and Thyroid Function Among U.S. Workers Exposed to 2,3,7,8 tetrachlorodibenzo-p-dioxin. Occupational and Environmental Medicine 56:270–276). The Secretary concluded that the NIOSH study was potentially important enough that it warranted a full review by NAS as soon as possible, and he directed VA to amend its contract with NAS for the third biennial update to require a special report on herbicide exposure and Type 2 diabetes, as a separate deliverable.

In February 2000, before NAS released its report on herbicide exposure and Type 2 diabetes, the U.S. Air Force released data from its study of participants in operation Ranch Hand (the crews assigned to spray Agent Orange from aircraft in Vietnam) (AFHS. 2000. Air Force Health Study: An Epidemiologic Investigation of Health Effects in Air Force Personnel Following Exposure to Herbicides. 1997 Follow-up Examination Results. Brook AFB, TX: Air Force Research Laboratory. AFRL-HE-BR-TR–2000–02.) On April 10, 2000, VA asked NAS to include an analysis of the new Ranch Hand data in its report on Type 2 diabetes. NAS agreed to do so.

III. October 2000 NAS Review of Type 2 Diabetes

NAS issued its report, ''Veterans and Agent Orange: Herbicide/Dioxin Exposure and Type 2 Diabetes'' (VAO: Diabetes) on October 11, 2000. NAS concluded that ''there is limited/suggestive evidence of an association between exposure to the herbicides used in Vietnam or the contaminant dioxin and Type 2 diabetes.'' (''Type 2 diabetes'' is also referred to as ''Type II diabetes mellitus'' or ''adult-onset diabetes.'') The term ''limited/suggestive evidence'' means ''evidence is suggestive of an association between herbicides and the outcome, but limited because chance, bias, and confounding could not be ruled out with confidence.'' NAS based its conclusion on the totality of the scientific evidence on this issue, not one particular study. (VAO: Diabetes).

Mortality Studies on Type 2 Diabetes

In VAO: Diabetes, NAS noted that positive associations between herbicides and Type 2 diabetes are reported in many mortality studies. NAS stated that these may underestimate the incidence of Type 2 diabetes because: (1) It is not typically fatal; (2) its known complications, as opposed to Type 2 diabetes itself, may be more likely to be listed as the cause of death on the death certificate; and (3) contributory causes of death are not routinely recorded on death certificates. In one mortality study reviewed by NAS, people living near the site of a 1976 industrial accident involving dioxin were found to have a higher risk of death from Type 2 diabetes than a reference population, in all exposure zones in which deaths were recorded. (Pesatori AC, Zocchetti C, Guercilena S, Consonni D, Turrini D, Bertazzi, PA. 1998. Dioxin exposure and non-malignant health effects: a mortality study. Occupational and Environmental Medicine. 55:126–131.) Two studies of a group of workers exposed to TCDD at 12 U.S. plants found positive, but non-statistically significant associations between measures of exposure and notations of Type 2 diabetes on death certificates, although the later paper also found a significant negative trend between Type 2 diabetes mortality and cumulative TCDD exposure. (Steenland K, Nowlin S, Ryan B, Adams S. 1992. Use of multiple-cause mortality data in epidemiological analyses: US rate and proportion files developed by the National Institute for Occupational Safety and Health and the National Cancer Institute. American Journal of Epidemiology 136(7):855–862; Steenland K, Piacetelli L, Deddens J, Fingerhut M, Chang LI. 1999. Cancer, heart disease and diabetes in workers exposed to 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin. Journal of the National Cancer Institute 91(9):779–786.) Another study, which examined workers who produced or sprayed phenoxy herbicides and chlorophenols, reported an elevated relative risk of mortality from Type 2 diabetes in exposed workers versus non-exposed referents. (Vena J, Boffetta P, Becher H, Benn T, Bueno-de-Mesquita HB, Coggon D, Colin D, Flesch-Janys D, Green L, Kauppinen T, Littorin M, Lynge E, Mathews JD, Neuberger M, Pearce N, Pesatori AC, Saracci R, Steenland K, Kogevinas M. 1998. Exposure to dioxin and nonneoplastic mortality in the expanded IARC international cohort study of phenoxy herbicide and chlorophenol production workers and sprayers. Environmental Health Perspectives 106 (Supplement 2):645–653.) In addition, earlier studies previously reviewed by NAS in and VAO, Update 1996, and Update 1998 showed an inconsistent but weakly positive association between exposure measures and Type 2 diabetes.

Morbidity Studies on Type 2 Diabetes

In VAO: Diabetes, NAS noted that, ''Positive associations are reported in most of the morbidity studies identified by the [NAS Committee to Review the Evidence Regarding the Link Between Exposure to Agent Orange and Diabetes].'' NAS discussed a number of epidemiological studies. In a study of a population near an Arkansas plant that manufactured pesticides, researchers found that insulin levels were significantly higher in the group with high dioxin levels. The study authors concluded that this was evidence that dioxin may cause insulin resistance. (Cranmer M, Louie S, Kennedy RH, Kern PA, Fonseca VA. 2000. Exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) is associated with hyperinsulinemia and insulin resistance. Toxicological Sciences 56(2): 431–436.) A survey of Australian Vietnam veterans found a statistically significant excess of self-reported Type 2 diabetes—2,391 cases were reported when 1,780 were expected. (Commonwealth Department of Veterans Affairs. 1998a. Morbidity of Vietnam Veterans: A Study of the Health of Australia's Vietnam Veteran Community. Volume 1: Male Vietnam Veterans Survey and Community Comparison Outcomes. Canberra: Commonwealth Department of Veterans Affairs.)

The 1999 NIOSH study (Calvert et al., 1999) reported an elevated incidence of Type 2 diabetes in individuals who had high levels of serum dioxin relative to others examined in that study. A study of the Ranch Hand comparison group, reported in 1999 and published in 2000, showed similar findings. (Longnecker MP, Michalek JE. 2000. Serum dioxin level in relation to Type 2 diabetes among Air Force veterans with background levels of exposure. Epidemiology 11(1):44–48.) The Air Force's subsequent analysis of Ranch Hand data (AFHS, 2000) showed almost identical Type 2 diabetes incidence in Ranch Hand and the matched comparison group. However, this study did show significant dose-response relationships between dioxin levels and Type 2 diabetes incidence, controlling for confounding variables.

Biological Plausibility

Regarding biologic plausibility, NAS concluded in VAO: Diabetes that animal, laboratory, and human studies constitute ''reasonable evidence that TCDD exposure could affect Type 2 diabetes risk in humans.'' This conclusion is based mainly on three studies. (Michalek JE. 1999. Oral presentation: Workshop on the Evidence Regarding a Link Between Exposure to Agent Orange and Diabetes. Washington, DC: Institute of Medicine, July 23; Longnecker MP and Michalek JE. 2000. Serum Dioxin Level in relation to Type 2 diabetes among Air Force veterans with background levels of exposure. Epidemiology 11(1):44–48; Cranmer M, Louie S, Kennedy RH, Kern PA, Fonseca VA. 2000. Exposure to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) is associated with hyperinsulinemia and insulin resistance. Toxicological Sciences 56(2): 431–436.)

IV. The Secretary's Determination on Diabetes

NAS reviewed all known relevant scientific and medical articles published since Update 1998, and prior studies, as an integral part of the process that resulted in VAO: Diabetes. In VAO: Diabetes, NAS observed that, ''Although some of the risk estimates in the studies examined by the committee are not statistically significant and, individually, studies can be faulted for various methodological reasons, the accumulation of positive evidence is suggestive.''

After considering all of the evidence, the Secretary has determined that there is a positive association between exposure to herbicides and Type 2 diabetes and, therefore, a presumption of service connection is warranted.

V. Compliance With the Congressional Review Act, the Regulatory Flexibility Act, and Executive Order 12866

We estimate that the five-year cost of this proposed rule from appropriated funds would be $3.3 billion in benefits costs and $62 million in government operating expenses. Since it is likely that the adoption of the proposed rule may have an annual effect on the economy of $100 million or more, the Office of Management and Budget has designated this proposed rule as a major rule under the Congressional Review Act, 5 U.S.C. 802, and a significant regulatory action under Executive Order 12866, Regulatory Planning and Review. The following information is provided pursuant to E.O. 12866.

This proposed rule is necessary to comply with the Agent Orange Act of 1991, which requires VA to establish a presumption of service connection if the Secretary finds that there is a positive association between exposure to herbicides used in the Republic of Vietnam during the Vietnam era and the subsequent development of any particular disease. As explained above, the Acting Secretary has found that there is such an association regarding Type 2 diabetes. There are no feasible alternatives to this proposed rule, since the Agent Orange Act of 1991 requires the Secretary to promulgate it once he finds the positive association described above. The adoption of the proposed rule would not interfere with state, local or tribal governments in the exercise of their governmental functions.

Benefits Costs

Historical statistics indicate that the total number of veterans who served in the Republic of Vietnam or its surrounding waters was about 2.6 million. We estimate that about 2.3 million of these veterans are alive today. Using information gained from VAO: Diabetes and VA's Office of Planning and Analysis, VA applied a prevalence rate of 9% to the current population to determine the number of veterans who might have Type 2 diabetes today. VA assumes that over five years, about 90% of these same veterans would file a diabetes-related claim. We expect that 8 out of 10 claims will be made by first time applicants (original) and that 2 out of 10 will come from veterans already service connected for some other issue (reopened). The average monthly award made on account of diabetes or its ancillary conditions for original and reopened claims is estimated to be $462 and $786, respectively. These figures are based on average benefits to current beneficiaries for all conditions and include dependents' benefits and unemployability benefits where applicable. A moderate number of DIC and burial claims have also been factored into this estimate.

VA estimates the cumulative totals of benefits awards to claimants for years 2001–2005 as follows: 10,199, 80,526, 129,988, 159,198 and 178,356. Benefits costs (in $ million) for years 2001–2005 are as follows: $16.6, $303, $720.1, $1,010.7, and $1,205.3, for a total cost of $3.3 billion over five years. This cost estimate also provides for a nominal number of DIC payments and burial awards. Anticipated cost-of-living allowances (COLA's), per current economic assumptions, were factored into this estimate; however, no retroactive payments were considered.

Administrative Costs.

The administrative workload caused by this proposed rule is expected to be 13,361 claims filed in 2001 and more than 220,000 over five years. Full time employee resources devoted to processing claims in years one through five would be 128, 378, 311, 185, and 123, respectively. Administrative workloads assume that not all claims would be granted; it is probable that diabetes related claims will be received from veterans who never served in the Republic of Vietnam. GOE costs (in $ million) for years 2001–2005 are as follows: $6.4, $18.6, $16.5, $11.9, and $8.2, for a total GOE cost of $62 million over five years.

The Secretary hereby certifies that this regulatory amendment will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. The reason for this certification is that these amendments would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), these amendments are exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

The Catalog of Federal Domestic Assistance program numbers are 64.100, 64.101, 64.104, 64.105, 64.106, 64.109, and 64.110.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Disability benefits, Health care, Pensions, Veterans, Vietnam.

Approved: December 6, 2000.

Hershel W. Gober,

Acting Secretary of Veterans Affairs.

For the reasons set forth in the preamble, 38 CFR part 3 is proposed to be amended as follows:

PART 3—ADJUDICATION

Subpart A—Pension, Compensation, and Dependency and Indemnity Compensation

1. The authority citation for part 3, subpart A continues to read as follows:

Authority: 38 U.S.C. 501(a), unless otherwise noted.

2. In § 3.309, paragraph (e), the listing of diseases is amended by adding ''Type 2 diabetes (also known as Type II diabetes mellitus or adult-onset diabetes)'' between ''Chloracne or other acneform disease consistent with chloracne'' and ''Hodgkin's disease'' to read as follows:

§ 3.309 Diseases subject to presumptive service connection.

* * * * *

(e) * * *

Type 2 diabetes (also known as Type II diabetes mellitus or adult-onset diabetes)

* * * * *

BILLING CODE 8320–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[FRL–6931–7]

National Priorities List for Uncontrolled Hazardous Waste Sites, Proposed Rule No. 35

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Comprehensive Environmental Response, Compensation, and Liability Act (''CERCLA'' or ''the Act''), requires that the National Oil and Hazardous Substances Pollution Contingency Plan (''NCP'') include a list of national priorities among the known releases or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States. The National Priorities List (''NPL'') constitutes this list. The NPL is intended primarily to guide the Environmental Protection Agency (''EPA'' or ''the Agency'') in determining which sites warrant further investigation to assess the nature and extent of public health and environmental risks associated with the site and to determine what CERCLA-financed remedial action(s), if any, may be appropriate. This proposed rule proposes to add five new sites to the NPL, all to the General Superfund Section of the NPL. (Please note that one of the sites is being reproposed to the NPL.)

DATES: Comments regarding any of these proposed listings must be submitted (postmarked) on or before March 12, 2001.

ADDRESSES: By Postal Mail: Mail original and three copies of comments (no facsimiles or tapes) to Docket Coordinator, Headquarters; U.S. Environmental Protection Agency; CERCLA Docket Office; (Mail Code 5201G); 1200 Pennsylvania Avenue, NW., Washington, DC 20460.

By Express Mail or Courier: Send original and three copies of comments (no facsimiles or tapes) to Docket Coordinator, Headquarters; U.S. Environmental Protection Agency; CERCLA Docket Office; 1235 Jefferson Davis Highway; Crystal Gateway #1, First Floor; Arlington, VA 22202.

By E-Mail: Comments in ASCII format only may be mailed directly to *superfund.docket@epa.gov.* E-mailed comments must be followed up by an original and three copies sent by mail or express mail.

For additional Docket addresses and further details on their contents, see section II, ''Public Review/Public Comment,'' of the Supplementary Information portion of this preamble.

FOR FURTHER INFORMATION CONTACT: Yolanda Singer, phone (703) 603–8835, State, Tribal and Site Identification Center, Office of Emergency and Remedial Response (Mail Code 5204G); U.S. Environmental Protection Agency; 1200 Pennsylvania Avenue, NW., Washington, DC 20460; or the Superfund Hotline, Phone (800) 424–9346 or (703) 412–9810 in the Washington, DC metropolitan area.

I. Background

A. What Are CERCLA and SARA?

In 1980, Congress enacted the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. 9601–9675 (''CERCLA'' or ''the Act''), in response to the dangers of uncontrolled releases of hazardous substances. CERCLA was amended on October 17, 1986, by the Superfund Amendments and Reauthorization Act (''SARA''), Pub. L. 99–499, 100 Stat. 1613 *et seq.*

B. What Is the NCP?

To implement CERCLA, EPA promulgated the revised National Oil and Hazardous Substances Pollution Contingency Plan (''NCP''), 40 CFR part 300, on July 16, 1982 (47 FR 31180), pursuant to CERCLA section 105 and Executive Order 12316 (46 FR 42237, August 20, 1981). The NCP sets guidelines and procedures for responding to releases and threatened releases of hazardous substances, pollutants, or contaminants under CERCLA. EPA has revised the NCP on several occasions. The most recent comprehensive revision was on March 8, 1990 (55 FR 8666).

As required under section 105(a)(8)(A) of CERCLA, the NCP also includes ''criteria for determining priorities among releases or threatened releases throughout the United States for the purpose of taking remedial action and, to the extent practicable, taking into account the potential

urgency of such action for the purpose of taking removal action.'' ''Removal'' actions are defined broadly and include a wide range of actions taken to study, clean up, prevent or otherwise address releases and threatened releases (42 U.S.C. 9601(23)).

C. What Is the National Priorities List (NPL)?

The NPL is a list of national priorities among the known or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States. The list, which is appendix B of the NCP (40 CFR part 300), was required under section 105(a)(8)(B) of CERCLA, as amended by SARA. Section 105(a)(8)(B) defines the NPL as a list of ''releases'' and the highest priority ''facilities'' and requires that the NPL be revised at least annually. The NPL is intended primarily to guide EPA in determining which sites warrant further investigation to assess the nature and extent of public health and environmental risks associated with a release of hazardous substances. The NPL is only of limited significance, however, as it does not assign liability to any party or to the owner of any specific property. Neither does placing a site on the NPL mean that any remedial or removal action necessarily need be taken. See Report of the Senate Committee on Environment and Public Works, Senate Rep. No. 96–848, 96th Cong., 2d Sess. 60 (1980), 48 FR 40659 (September 8, 1983).

For purposes of listing, the NPL includes two sections, one of sites that are generally evaluated and cleaned up by EPA (the ''General Superfund Section''), and one of sites that are owned or operated by other Federal agencies (the ''Federal Facilities Section''). With respect to sites in the Federal Facilities section, these sites are generally being addressed by other Federal agencies. Under Executive Order 12580 (52 FR 2923, January 29, 1987) and CERCLA section 120, each Federal agency is responsible for carrying out most response actions at facilities under its own jurisdiction, custody, or control, although EPA is responsible for preparing an HRS score and determining whether the facility is placed on the NPL. EPA generally is not the lead agency at Federal Facilities Section sites, and its role at such sites is accordingly less extensive than at other sites.

D. How Are Sites Listed on the NPL?

There are three mechanisms for placing sites on the NPL for possible remedial action (see 40 CFR 300.425(c) of the NCP): (1) A site may be included on the NPL if it scores sufficiently high on the Hazard Ranking System (''HRS''), which EPA promulgated as an appendix A of the NCP (40 CFR part 300). The HRS serves as a screening device to evaluate the relative potential of uncontrolled hazardous substances to pose a threat to human health or the environment. On December 14, 1990 (55 FR 51532), EPA promulgated revisions to the HRS partly in response to CERCLA section 105(c), added by SARA. The revised HRS evaluates four pathways: Ground water, surface water, soil exposure, and air. As a matter of Agency policy, those sites that score 28.50 or greater on the HRS are eligible for the NPL; (2) Each State may designate a single site as its top priority to be listed on the NPL, regardless of the HRS score. This mechanism, provided by the NCP at 40 CFR 300.425(c)(2) requires that, to the extent practicable, the NPL include within the 100 highest priorities, one facility designated by each State representing the greatest danger to public health, welfare, or the environment among known facilities in the State (see 42 U.S.C. 9605(a)(8)(B)); (3) The third mechanism for listing, included in the NCP at 40 CFR 300.425(c)(3), allows certain sites to be listed regardless of their HRS score, if all of the following conditions are met:

- The Agency for Toxic Substances and Disease Registry (ATSDR) of the U.S. Public Health Service has issued a health advisory that recommends dissociation of individuals from the release.
- EPA determines that the release poses a significant threat to public health.
- EPA anticipates that it will be more cost-effective to use its remedial authority than to use its removal authority to respond to the release.

EPA promulgated an original NPL of 406 sites on September 8, 1983 (48 FR 40658). The NPL has been expanded since then, most recently on December 1, 2000 (65 FR 75179).

E. What Happens to Sites on the NPL?

A site may undergo remedial action financed by the Trust Fund established under CERCLA (commonly referred to as the ''Superfund'') only after it is placed on the NPL, as provided in the NCP at 40 CFR 300.425(b)(1). (''Remedial actions'' are those ''consistent with permanent remedy, taken instead of or in addition to removal actions. * * *'' 42 U.S.C. 9601(24).) However, under 40 CFR 300.425(b)(2) placing a site on the NPL ''does not imply that monies will be expended.'' EPA may pursue other appropriate authorities to remedy the releases, including enforcement action under CERCLA and other laws.

F. How Are Site Boundaries Defined?

The NPL does not describe releases in precise geographical terms; it would be neither feasible nor consistent with the limited purpose of the NPL (to identify releases that are priorities for further evaluation), for it to do so.

Although a CERCLA ''facility'' is broadly defined to include any area where a hazardous substance release has ''come to be located'' (CERCLA section 101(9)), the listing process itself is not intended to define or reflect the boundaries of such facilities or releases. Of course, HRS data (if the HRS is used to list a site) upon which the NPL placement was based will, to some extent, describe the release(s) at issue. That is, the NPL site would include all releases evaluated as part of that HRS analysis.

When a site is listed, the approach generally used to describe the relevant release(s) is to delineate a geographical area (usually the area within an installation or plant boundaries) and identify the site by reference to that area. As a legal matter, the site is not coextensive with that area, and the boundaries of the installation or plant are not the ''boundaries'' of the site. Rather, the site consists of all contaminated areas within the area used to identify the site, as well as any other location to which contamination from that area has come to be located, or from which that contamination came.

In other words, while geographic terms are often used to designate the site (*e.g.,* the ''Jones Co. plant site'') in terms of the property owned by a particular party, the site properly understood is not limited to that property (*e.g.,* it may extend beyond the property due to contaminant migration), and conversely may not occupy the full extent of the property (*e.g.,* where there are uncontaminated parts of the identified property, they may not be, strictly speaking, part of the ''site''). The ''site'' is thus neither equal to nor confined by the boundaries of any specific property that may give the site its name, and the name itself should not be read to imply that this site is coextensive with the entire area within the property boundary of the installation or plant. The precise nature and extent of the site are typically not known at the time of listing. Also, the site name is merely used to help identify the geographic location of the contamination. For example, the ''Jones Co. plant site,'' does not imply that the Jones company

is responsible for the contamination located on the plant site.

EPA regulations provide that the ''nature and extent of the problem presented by the release'' will be determined by a Remedial Investigation/Feasibility Study (''RI/FS'') as more information is developed on site contamination (40 CFR 300.5). During the RI/FS process, the release may be found to be larger or smaller than was originally thought, as more is learned about the source(s) and the migration of the contamination. However, this inquiry focuses on an evaluation of the threat posed; the boundaries of the release need not be exactly defined. Moreover, it generally is impossible to discover the full extent of where the contamination ''has come to be located'' before all necessary studies and remedial work are completed at a site. Indeed, the boundaries of the contamination can be expected to change over time. Thus, in most cases, it may be impossible to describe the boundaries of a release with absolute certainty.

Further, as noted above, NPL listing does not assign liability to any party or to the owner of any specific property. Thus, if a party does not believe it is liable for releases on discrete parcels of property, supporting information can be submitted to the Agency at any time after a party receives notice it is a potentially responsible party.

For these reasons, the NPL need not be amended as further research reveals more information about the location of the contamination or release.

G. How Are Sites Removed From the NPL?

EPA may delete sites from the NPL where no further response is appropriate under Superfund, as explained in the NCP at 40 CFR 300.425(e). This section also provides that EPA shall consult with states on proposed deletions and shall consider whether any of the following criteria have been met: (i) Responsible parties or other persons have implemented all appropriate response actions required; (ii) All appropriate Superfund-financed response has been implemented and no further response action is required; or (iii) The remedial investigation has shown the release poses no significant threat to public health or the environment, and taking of remedial measures is not appropriate. As of January 3, 2001, the Agency has deleted 229 sites from the NPL.

H. Can Portions of Sites Be Deleted From the NPL as They Are Cleaned Up?

In November 1995, EPA initiated a new policy to delete portions of NPL sites where cleanup is complete (60 FR 55465, November 1, 1995). Total site cleanup may take many years, while portions of the site may have been cleaned up and available for productive use. As of January 3, 2001, EPA has deleted portions of 21 sites.

I. What Is the Construction Completion List (CCL)?

EPA also has developed an NPL construction completion list (''CCL'') to simplify its system of categorizing sites and to better communicate the successful completion of cleanup activities (58 FR 12142, March 2, 1993). Inclusion of a site on the CCL has no legal significance.

Sites qualify for the CCL when: (1) Any necessary physical construction is complete, whether or not final cleanup levels or other requirements have been achieved; (2) EPA has determined that the response action should be limited to measures that do not involve construction (*e.g.,* institutional controls); or (3) The site qualifies for deletion from the NPL.

As of January 3, 2001, there are a total of 759 sites on the CCL. For the most up-to-date information on the CCL, see EPA's Internet site at *http://www.epa.gov/superfund.*

II. Public Review/Public Comment

A. Can I Review the Documents Relevant to This Proposed Rule?

Yes, documents that form the basis for EPA's evaluation and scoring of the sites in this rule are contained in dockets located both at EPA Headquarters in Washington, DC and in the Regional offices.

B. How Do I Access the Documents?

You may view the documents, by appointment only, in the Headquarters or the Regional dockets after the appearance of this proposed rule. The hours of operation for the Headquarters docket are from 9 a.m. to 4 p.m., Monday through Friday excluding Federal holidays. Please contact the Regional dockets for hours.

Following is the contact information for the EPA Headquarters docket: Docket Coordinator, Headquarters, U.S. EPA CERCLA Docket Office, Crystal Gateway #1, 1st Floor, 1235 Jefferson Davis Highway, Arlington, VA 22202, 703/603–9232. (Please note this is a visiting address only. Mail comments to EPA Headquarters as detailed at the beginning of this preamble.)

The contact information for the Regional dockets is as follows:

Ellen Culhane, Region 1 (CT, ME, MA, NH, RI, VT), U.S. EPA, Records Center, Mailcode HSC, One Congress Street, Suite 1100, Boston, MA 02114–2023; 617/918–1225

Ben Conetta, Region 2 (NJ, NY, PR, VI), U.S. EPA, 290 Broadway, New York, NY 10007–1866; 212/637–4435

Dawn Shellenberger (GCI), Region 3 (DE, DC, MD, PA, VA, WV), U.S. EPA, Library, 1650 Arch Street, Mailcode 3PM52, Philadelphia, PA 19103; 215/814–5364

Joellen O'Neill, Region 4 (AL, FL, GA, KY, MS, NC, SC, TN), U.S. EPA, 61 Forsyth Street, SW, 9th floor, Atlanta, GA 30303; 404/562–8127

Janet Pfundheller, Region 5 (IL, IN, MI, MN, OH, WI), U.S. EPA, Records Center, Superfund Division SMR–7J, Metcalfe Federal Building, 77 West Jackson Boulevard, Chicago, IL 60604; 312/353–5821

Brenda Cook, Region 6 (AR, LA, NM, OK, TX), U.S. EPA, 1445 Ross Avenue, Mailcode 6SF–RA, Dallas, TX 75202–2733; 214/665–7436

Michelle Quick, Region 7 (IA, KS, MO, NE), U.S. EPA, 901 North 5th Street, Kansas City, KS 66101; 913/551–7335

David Williams, Region 8 (CO, MT, ND, SD, UT, WY), U.S. EPA, 999 18th Street, Suite 500, Mailcode 8EPR–SA, Denver, CO 80202–2466; 303/312–6757

Carolyn Douglas, Region 9 (AZ, CA, HI, NV, AS, GU), U.S. EPA, 75 Hawthorne Street, San Francisco, CA 94105; 415/744–2343

Robert Phillips, Region 10 (AK, ID, OR, WA), U.S. EPA, 11th Floor, 1200 6th Avenue, Mail Stop ECL–110, Seattle, WA 98101; 206/553–6699

You may also request copies from EPA Headquarters or the Regional dockets. An informal request, rather than a formal written request under the Freedom of Information Act, should be the ordinary procedure for obtaining copies of any of these documents.

C. What Documents Are Available for Public Review at the Headquarters Docket?

The Headquarters docket for this rule contains: HRS score sheets for the proposed sites; a Documentation Record for the sites describing the information used to compute the score; information for any sites affected by particular statutory requirements or EPA listing policies; and a list of documents referenced in the Documentation Record.

D. What Documents Are Available for Public Review at the Regional Dockets?

The Regional dockets for this rule contain all of the information in the Headquarters docket, plus, the actual reference documents containing the data principally relied upon and cited by EPA in calculating or evaluating the HRS score for the sites. These reference documents are available only in the Regional dockets.

E. How Do I Submit My Comments?

Comments must be submitted to EPA Headquarters as detailed at the beginning of this preamble in the ''Addresses'' section. Please note that the addresses differ according to method of delivery. There are two different addresses that depend on whether comments are sent by express mail or by postal mail.

F. What Happens to My Comments?

EPA considers all comments received during the comment period. Significant comments will be addressed in a support document that EPA will publish concurrently with the **Federal Register** document if, and when, the site is listed on the NPL.

G. What Should I Consider When Preparing My Comments?

Comments that include complex or voluminous reports, or materials prepared for purposes other than HRS scoring, should point out the specific information that EPA should consider and how it affects individual HRS factor values or other listing criteria (*Northside Sanitary Landfill* v. *Thomas*, 849 F.2d 1516 (D.C. Cir. 1988)). EPA will not address voluminous comments that are not specifically cited by page number and referenced to the HRS or other listing criteria. EPA will not address comments unless they indicate which component of the HRS documentation record or what particular point in EPA's stated eligibility criteria is at issue.

H. Can I Submit Comments After the Public Comment Period Is Over?

Generally, EPA will not respond to late comments. EPA can only guarantee that it will consider those comments postmarked by the close of the formal comment period. EPA has a policy of not delaying a final listing decision solely to accommodate consideration of late comments.

I. Can I View Public Comments Submitted by Others?

During the comment period, comments are placed in the Headquarters docket and are available to the public on an ''as received'' basis. A complete set of comments will be available for viewing in the Regional docket approximately one week after the formal comment period closes.

J. Can I Submit Comments Regarding Sites Not Currently Proposed to the NPL?

In certain instances, interested parties have written to EPA concerning sites which were not at that time proposed to the NPL. If those sites are later proposed to the NPL, parties should review their earlier concerns and, if still appropriate, resubmit those concerns for consideration during the formal comment period. Site-specific correspondence received prior to the period of formal proposal and comment will not generally be included in the docket.

III. Contents of This Proposed Rule

A. Proposed Additions to the NPL

With today's proposed rule, EPA is proposing to add five new sites to the NPL; all to the General Superfund Section of the NPL. (Please note that the Cooper Drum site in California is being reproposed.) The sites in this proposed rulemaking are being proposed based on HRS scores of 28.50 or above. The sites are presented in Table 1 which follows this preamble.

B. Status of NPL

Currently, the NPL consists of 1,229 final sites; 1,069 in the General Superfund Section and 160 in the Federal Facilities Section. With this proposal of 5 new sites, there are now 67 sites proposed and awaiting final agency action, 61 in the General Superfund Section and six in the Federal Facilities Section. Final and proposed sites now total 1,296. (These numbers reflect the status of sites as of January 3, 2001. Site deletions occurring after this date may affect these numbers at time of publication in the **Federal Register**.)

IV. Executive Order 12866

A. What Is Executive Order 12866?

Under Executive Order 12866, (58 FR 51735 (October 4, 1993)) the Agency must determine whether a regulatory action is ''significant'' and therefore subject to OMB review and the requirements of the Executive Order. The Order defines ''significant regulatory action'' as one that is likely to result in a rule that may: (1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

B. Is This Proposed Rule Subject to Executive Order 12866 Review?

No, the Office of Management and Budget (OMB) has exempted this regulatory action from Executive Order 12866 review.

V. Unfunded Mandates

A. What Is the Unfunded Mandates Reform Act (UMRA)?

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal Agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with ''Federal mandates'' that may result in expenditures by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year. Before EPA promulgates a rule for which a written statement is needed, section 205 of the UMRA generally requires EPA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows EPA to adopt an alternative other than the least costly, most cost-effective, or least burdensome alternative if the Administrator publishes with the final rule an explanation why that alternative was not adopted. Before EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must have developed under section 203 of the UMRA a small government agency plan. The plan must provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in

the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

B. Does UMRA Apply to This Proposed Rule?

No, EPA has determined that this rule does not contain a Federal mandate that may result in expenditures of $100 million or more for State, local, and tribal governments in the aggregate, or by the private sector in any one year. This rule will not impose any federal intergovernmental mandate because it imposes no enforceable duty upon State, tribal or local governments. Listing a site on the NPL does not itself impose any costs. Listing does not mean that EPA necessarily will undertake remedial action. Nor does listing require any action by a private party or determine liability for response costs. Costs that arise out of site responses result from site-specific decisions regarding what actions to take, not directly from the act of listing a site on the NPL.

For the same reasons, EPA also has determined that this rule contains no regulatory requirements that might significantly or uniquely affect small governments. In addition, as discussed above, the private sector is not expected to incur costs exceeding $100 million. EPA has fulfilled the requirement for analysis under the Unfunded Mandates Reform Act.

VI. Effect on Small Businesses

A. What Is the Regulatory Flexibility Act?

Pursuant to the Regulatory Flexibility Act (5 U.S.C. 601 et seq., as amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996) whenever an agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effect of the rule on small entities (i.e., small businesses, small organizations, and small governmental jurisdictions). However, no regulatory flexibility analysis is required if the head of an agency certifies the rule will not have a significant economic impact on a substantial number of small entities. SBREFA amended the Regulatory Flexibility Act to require Federal agencies to provide a statement of the factual basis for certifying that a rule will not have a significant economic impact on a substantial number of small entities.

B. Has EPA Conducted a Regulatory Flexibility Analysis for This Rule?

No. While this rule proposes to revise the NPL, an NPL revision is not a typical regulatory change since it does not automatically impose costs. As stated above, adding sites to the NPL does not in itself require any action by any party, nor does it determine the liability of any party for the cost of cleanup at the site. Further, no identifiable groups are affected as a whole. As a consequence, impacts on any group are hard to predict. A site's inclusion on the NPL could increase the likelihood of adverse impacts on responsible parties (in the form of cleanup costs), but at this time EPA cannot identify the potentially affected businesses or estimate the number of small businesses that might also be affected.

The Agency does expect that placing the sites in this proposed rule on the NPL could significantly affect certain industries, or firms within industries, that have caused a proportionately high percentage of waste site problems. However, EPA does not expect the listing of these sites to have a significant economic impact on a substantial number of small businesses.

In any case, economic impacts would occur only through enforcement and cost-recovery actions, which EPA takes at its discretion on a site-by-site basis. EPA considers many factors when determining enforcement actions, including not only a firm's contribution to the problem, but also its ability to pay. The impacts (from cost recovery) on small governments and nonprofit organizations would be determined on a similar case-by-case basis.

For the foregoing reasons, I hereby certify that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. Therefore, this proposed regulation does not require a regulatory flexibility analysis.

VII. National Technology Transfer and Advancement Act

A. What Is the National Technology Transfer and Advancement Act?

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104–113, section 12(d) (15 U.S.C. 272 note), directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.*, materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. The NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

B. Does the National Technology Transfer and Advancement Act Apply to This Proposed Rule?

No. This proposed rulemaking does not involve technical standards. Therefore, EPA did not consider the use of any voluntary consensus standards.

VIII. Executive Order 12898

A. What Is Executive Order 12898?

Under Executive Order 12898, ''Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations,'' as well as through EPA's April 1995, ''Environmental Justice Strategy, OSWER Environmental Justice Task Force Action Agenda Report,'' and National Environmental Justice Advisory Council, EPA has undertaken to incorporate environmental justice into its policies and programs. EPA is committed to addressing environmental justice concerns, and is assuming a leadership role in environmental justice initiatives to enhance environmental quality for all residents of the United States. The Agency's goals are to ensure that no segment of the population, regardless of race, color, national origin, or income, bears disproportionately high and adverse human health and environmental effects as a result of EPA's policies, programs, and activities, and all people live in clean and sustainable communities.

B. Does Executive Order 12898 Apply to This Proposed Rule?

No. While this rule proposes to revise the NPL, no action will result from this proposal that will have disproportionately high and adverse human health and environmental effects on any segment of the population.

IX. Executive Order 13045

A. What Is Executive Order 13045?

Executive Order 13045: ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997) applies to any rule that: (1) Is determined to be ''economically significant'' as defined under E.O. 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the

environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency.

B. Does Executive Order 13045 Apply to This Proposed Rule?

This proposed rule is not subject to E.O. 13045 because it is not an economically significant rule as defined by E.O. 12866, and because the Agency does not have reason to believe the environmental health or safety risks addressed by this proposed rule present a disproportionate risk to children.

X. Paperwork Reduction Act

A. What Is the Paperwork Reduction Act?

According to the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information that requires OMB approval under the PRA, unless it has been approved by OMB and displays a currently valid OMB control number. The OMB control numbers for EPA's regulations, after initial display in the preamble of the final rules, are listed in 40 CFR part 9. The information collection requirements related to this action have already been approved by OMB pursuant to the PRA under OMB control number 2070–0012 (EPA ICR No. 574).

B. Does the Paperwork Reduction Act Apply to This Proposed Rule?

No. EPA has determined that the PRA does not apply because this rule does not contain any information collection requirements that require approval of the OMB.

XI. Executive Orders on Federalism

A. What Are The Executive Orders on Federalism and Are They Applicable to This Proposed Rule?

Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' ''Policies that have federalism implications'' is defined in the Executive Order to include regulations that have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.''

Under Section 6 of Executive Order 13132, EPA may not issue a regulation that has federalism implications, that imposes substantial direct compliance costs, and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments, or EPA consults with State and local officials early in the process of developing the proposed regulation. EPA also may not issue a regulation that has federalism implications and that preempts State law, unless the Agency consults with State and local officials early in the process of developing the proposed regulation.

This proposed rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. Thus, the requirements of section 6 of the Executive Order do not apply to this rule.

XII. Executive Order 13084

What is Executive Order 13084 and Is It Applicable to this Proposed Rule?

Under Executive Order 13084, EPA may not issue a regulation that is not required by statute, that significantly or uniquely affects the communities of Indian tribal governments, and that imposes substantial direct compliance costs on those communities, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by the tribal governments, or EPA consults with those governments. If EPA complies by consulting, Executive Order 13084 requires EPA to provide to the Office of Management and Budget, in a separately identified section of the preamble to the rule, a description of the extent of EPA's prior consultation with representatives of affected tribal governments, a summary of the nature of their concerns, and a statement supporting the need to issue the regulation. In addition, Executive Order 13084 requires EPA to develop an effective process permitting elected officials and other representatives of Indian tribal governments ''to provide meaningful and timely input in the development of regulatory policies on matters that significantly or uniquely affect their communities.''

This proposed rule does not significantly or uniquely affect the communities of Indian tribal governments because it does not significantly or uniquely affect their communities. Accordingly, the requirements of section 3(b) of Executive Order 13084 do not apply to this proposed rule.

TABLE 1.—NATIONAL PRIORITIES LIST PROPOSED RULE NO. 35, GENERAL SUPERFUND SECTION

State	Site name	City/county

Coast Guard

46 CFR Part 66

[USCG–1998–3798]

RIN 2115–AF13

Numbering of Undocumented Barges

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to promulgate statutory requirements for numbering and marking barges in reserved part 66 of Title 46, Code of Federal Regulations. This rulemaking

will establish a statutorily required numbering system for undocumented barges more than 100 gross tons operating on the navigable waters of the United States. A barge numbering system will help identify parties responsible for the illegal abandonment of barges and prevent future marine pollution from abandoned barges.

DATES: Comments and related material must reach the Docket Management Facility on or before April 11, 2001. Comments sent to the Office of Management and Budget (OMB) on collection of information must reach OMB on or before March 12, 2001.

ADDRESSES: To make sure your comments and related material are not entered more than once in the docket, please submit them by only one of the following means:

(1) By mail to the Docket Management Facility, USCG–1998–3798, U.S. Department of Transportation, room PL–401, 400 Seventh Street, SW., Washington, DC 20590–0001.

(2) By delivery to room PL–401 on the Plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202–366–9329.

(3) By fax to the Docket Management Facility at 202–493–2251.

(4) Electronically through the Web Site for the Docket Management System at http://dms.dot.gov.

You must also mail comments on collection of information to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street, NW., Washington, DC 20503, ATTN: Desk Officer, U.S. Coast Guard.

The Docket Management Facility maintains the public docket for this rulemaking. Comments and material received from the public, as well as documents mentioned in this preamble as being available in the docket, will become part of this docket and will be available for inspection or copying at room PL–401 on the Plaza level of the Nassif Building, 400 Seventh Street SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. You may also find this docket on the Internet at *http://dms.dot.gov.*

FOR FURTHER INFORMATION CONTACT: For questions on this proposed rule, call LCDR Robyn MacGregor, Project Manager, Office of Waterways Security and Safety (G–MWP), Coast Guard, telephone 202–267–0483. For questions on viewing or submitting material to the docket, call Dorothy Beard, Chief, Dockets, Department of Transportation, telephone 202–366–9329.

SUPPLEMENTARY INFORMATION:

Request for Comments

We encourage you to participate in this rulemaking by submitting comments and related material. If you do so, please include your name and address, identify the docket number for this rulemaking (USCG–1998–3798), indicate the specific section of this document to which each comment applies, and give the reason for each comment. You may submit your comments and material by mail, hand delivery, fax, or electronic means to the Docket Management Facility at the address under **ADDRESSES**; but please submit your comments and material by only one means. If you submit them by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit them by mail and would like to know they reached the Facility, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period. We may change this proposed rule in view of them.

Public Meeting

The Coast Guard plans no public meeting. You may request a public meeting by submitting a comment requesting one to the address under **ADDRESSES**. The request should include the reasons why a meeting would be beneficial. If the Coast Guard determines that a meeting should be held, we will announce the time and place in a later notice in the **Federal Register**.

Background and Purpose

According to a 1992 Government Accounting Office (GAO) report on abandoned vessels, nearly 1,300 vessels were abandoned in the navigable waters of the United States. Almost 600 of the abandonments were barges. According to the same report, between the years of 1988 and 1992, 82 water pollution incidents occurred which originated from abandoned vessels, 37 of which required cleanup operations. During that period, the Coast Guard conducted oil removal operations for 14 additional vessels that posed a potential threat of discharge or release. The combined cost of these operations was $4.4 million, with $2.5 million spent on two separate removal operations from the same vessel, an abandoned barge located in Empire, Louisiana.

During the 1988 to 1992 period, barges that used inland waterways were exempted from vessel documentation. Additionally, there were no Federal laws prohibiting vessel owners from abandoning vessels. Therefore, it was often very difficult to identify and locate owners of abandoned vessels. In many cases where ownership was determined, owners were unable to remove their abandoned vessels for a variety of reasons (*e.g.*, deceased, bankrupt, etc.). Without a process linking abandoned vessels to responsible parties, the government has little chance of recovering vessel removal or pollution response costs.

In an annual summary report on abandoned vessels submitted in 1997 by the Captains of the Ports (COTP), each COTP documented the number of abandoned vessels within their geographic areas of responsibility. The report stated that 2,697 abandoned vessels existed along our navigable waters. Of this total, 1,010 were barges.

Based on the GAO Report, the annual COTP summary report with supplementary Coast Guard testimony, industry representatives, and others, Congress passed the Abandoned Barge Act of 1992 (Pub. L. 102–587, sections 5301–05) (''the Act''). During passage of the Act, Congress noted that abandoned barges are often used for the illegal disposal of hazardous cargo, waste, and petroleum products. This illegal disposal can lead to actual or potential pollution incidents. To prevent these incidents, the Act added a new chapter 47 to title 46 of the United States Code that prohibits abandoning barges in the navigable waters of the United States. The Act also amended 46 U.S.C. 12301 to require the numbering of undocumented barges measuring more than 100 gross tons operating on the navigable waters of the United States.

This numbering system provides a means for identifying parties responsible for the now illegal abandonment of barges. More importantly, it will help identify those parties who may be held liable for the removal and proper disposal of any hazardous substances stored or deposited on board abandoned barges, as well as for the removal of the barges from the nation's waterways. This potential for liability would serve as a deterrent to barge abandonment.

Regulatory History

On October 18, 1994, the Coast Guard published a notice in the **Federal Register** [59 FR 52646] requesting comments on issues related to a numbering system for undocumented barges measuring more than 100 gross tons. The primary issues addressed in the notice concerned who should

administer a barge numbering system, what type of number should be required, and how much the numbering system would cost. The Coast Guard received twenty-one comments in response to the notice.

On July 6, 1998, the Coast Guard published an Advanced Notice of Proposed Rulemaking (ANPRM), discussing the proposed regulation, comments received from the previous notice, and a preliminary regulatory assessment (63 FR 36384). The comments we received are discussed below.

Discussion of Comments

We received comments from four respondents to our 1998 ANPRM (one respondent submitted the same comments twice; we are only counting it once). The comments directed our attention to such issues as the placement of the barge number markings, the source of the barge number, the application form, the phase-in period for the requirements based on the effective date of this rule, and fees for obtaining a barge number.

Placement of Markings

Three respondents stated that the Coast Guard should be consistent in marking requirements by following the regulations already in place for documented vessels. External markings would be an additional requirement on uninspected, undocumented barges and may interfere with other required markings, *e.g.* vessel name. The Coast Guard agrees that consistency is important and has written the requirements to mirror existing marking regulations as closely as possible. The purpose of these proposed markings and the circumstances under which they would be used are different, however. The proposed markings would be used to identify an owner of an abandoned barge. Many abandoned barges in the past contained unknown materials when abandoned, or were subsequently used as a dumping site for any number of unidentified materials. Many of these abandoned barges quickly become inaccessible to investigators without putting the investigator at great risk. Thus the quickest, safest, least expensive way to identify a barge owner is by requiring a unique number be located where it may be viewed without having to climb on the barge or enter any compartments or voids.

No respondents voiced objections to permanently marking the number on the vessel, although it was suggested that a particular method of marking be required. The Coast Guard values the diversity that exists and strives to permit as much autonomy as possible. As such, the Coast Guard would not be more specific than to require permanent markings as described in the proposed regulations, which are consistent with current requirements for marking documented vessels.

Barge Numbers

Three comments recommended recycling existing official numbers, and adding a prefix to those numbers to further identify the barge. The comments suggested using a ''D'' preceding the number to indicate a barge that had previously been documented, or using ''CG'' preceding the number to indicate a barge that is currently inspected but not documented. In both cases, the numbers would have already been recorded in Coast Guard records and official ''D'' numbers already permanently marked on barges. The Coast Guard agrees, and proposes that existing official numbers and CG numbers be accepted. However, we will not be distinguishing the numbers in the manner suggested by the commenter.

Application Form

One comment expressed concern that the information the Coast Guard proposed collecting was more than what was necessary to indicate ownership of a barge and would be broader than what is required for documented barges. We have developed a form titled Application for Certification of Number for Undocumented Barge that we feel limits the amount of information collected to what is absolutely necessary to enable the Coast Guard to identify and locate the owner of future abandoned barges. The application is available on the docket under the section labeled **ADDRESSES**. We welcome any comments on the application you have.

This comment also expressed concern for the increased burden on owners having to update the information each time an address, phone number, or the like changed. In addition, they argued that the new owner should inherit the responsibility for notifying the National Vessel Documentation Center (NVDC) of a change in ownership. We note that the ''old'' owner certainly retains an interest in ensuring that NVDC and the Coast Guard are aware of who owns and is responsible for a barge. The only times we propose requiring owners notify the NVDC of changes is after any change in ownership, or upon destruction of the barge. Previous owners would be required to notify NVDC of the change in ownership, whereas new owners would be required to submit a request for a certification of number issued to them within 60 days. Owners of barges that are destroyed would be required to notify NVDC of the destruction, just as owners of certificated barges must notify the Coast Guard when they elect to take a barge out of service within 60 days of destruction or removal from service.

One comment supported any opportunities to simplify the application process, including the use of electronic filing. The Coast Guard agrees, and will make electronic filing available in the future. The application will be available on the internet at the NVDC website. Applicants would be able to download the form and mail it in once they have completed filling it out.

Implementation Period

One comment suggested a phase-in period for the effective date of the regulation. Their suggestions included allowing up to six months to file an application and up to two years to mark barges. The Coast Guard agrees that the system proposed by these regulations could not be accomplished overnight and wishes to minimize the impact on owners' operations. Thus, the Coast Guard has proposed a one-year period for owners to submit applications to the Coast Guard, and a five-year period for the marking of all existing barges. Barges currently under construction would be numbered and marked in accordance with the regulations prior to being placed in service.

Fees

Three comments were opposed to fees. The argument followed that there is no benefit to owners from this regulation and no services rendered. The Coast Guard agrees and has not proposed a fee schedule to implement or maintain this requirement.

Miscellaneous

Comments varied on the costs associated with permanently marking barges, barge employment, maintenance intervals for undocumented barges, average life service, average annual construction rates, and average number of owners. A summary of the costs and benefits associated with this rulemaking is included below.

Discussion of Proposed Rules

General Requirements

The Coast Guard proposes adding regulations that would require owners of barges greater than 100 gross tons to obtain a unique number issued by the National Vessel Documentation Center (NVDC) for that barge. The barge

number would remain with it for the entirety of its life.

Regulations requiring the documentation and measurement of vessels are codified in 46 CFR parts 66 through 69. We propose establishing the requirements for numbering and marking barges over 100 gross tons in part 66, which is currently reserved. The requirements we propose to include in part 66 consist of a ''Definitions'' section that gives relevant meaning to specific terms used in this part, a section to identify those barges that must comply with this new barge numbering system, a method for applicable barges to calculate the barge's gross tonnage, and an application procedure for barge owners to follow when requesting a barge number from NVDC. The new regulations of part 66 would also identify to barges owners their right to appeal, the penalties for not fully complying with this part, and clarify what circumstances would invalidate a Certificate of Number.

In addition, barge owners would be required to permanently mark the barge by carving, punch-marking, or welding the number on some clearly visible internal structural part of the vessel, such as the main beam. The barge would also need to be permanently marked externally at the highest part of the vessel's hull or permanent structure, so that the number can be seen from either side.

Existing barges would be required to comply with the regulation no later than five years from the publication date of the final rule.

Previously documented barges would be allowed to use the official number or CG number previously assigned.

Definitions

The definitions for the terms necessary to determine gross tonnage, currently found in 46 CFR part 69, would be adopted. The proposed regulations would also add definitions for the terms ''barge'', ''barge number'', ''official number'', ''simplified measurement system'', ''undocumented barge'', and ''navigable waters''.

Regulatory Evaluation

This proposed rule is not a ''significant regulatory action'' under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not ''significant'' under the regulatory policies and procedures of the Department of Transportation (DOT)(44 FR 11040, February 26, 1979).

A draft Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is available in the docket as indicated under **ADDRESSES**. A summary of the Evaluation follows:

The Abandoned Barge Act of 1992 (the Act) states ''The Secretary shall require an undocumented barge more than 100 gross tons operating on the navigable waters of the United States to be numbered.'' This analysis supports the regulatory evaluation of implementing a numbering system for undocumented barges of more than 100 gross tons, per the Act. The numbering system would provide an identification of the parties responsible and liable for the illegal abandonment of a barge. It would also enhance the Government's recovery of costs associated with the removal of the barge. Currently, there is no formal method for linking an abandoned undocumented barge to a responsible party, and consequently, there is little chance of the Government recovering costs incurred from the removal.

Population: There are approximately 20,000 undocumented barges greater than 100 gross tons operating in the navigable waters of the United States. Of these undocumented barges, it is estimated that 89 percent operate in the waters of the Mississippi River System and the Gulf Intracoastal Waterway. Additionally, most of the 20,000 undocumented barges are dry cargo barges (86 percent) with the remainder being construction barges (10 percent) and tank barges (4 percent).

Cost and benefit: Through analysis of this rulemaking we revealed that both the barge industry and the Government would incur the costs of implementing and administrating the barge number system. The cost to the barge industry includes administration costs, transportation costs and the cost to affix the number to the barge. The cost to the government includes cost associated with developing and implementing a database for the barge number system and the cost associated with administering the system. It is assumed that the Coast Guard would have sole responsibility for implementing and administrating the numbering system for abandoned barges.

Potential direct benefits would accrue to the Government. Most of these benefits would come from cost avoidance for removal and cleanup of abandoned barges. Additional benefits would be noticed from the reimbursement of Government incurred cost that is received from the responsible barge owner who abandoned his barge. There are no direct benefits identified for the barge industry.

Alternatives: Two alternative methods of numbering were posited: (1) Welding, punch-marking, or carving the number on the barge, and (2) painting the number on the barge. For welding the number to the barge, alternative 1, the assumption is that 15 percent of undocumented barges would need to tow the barge to an appropriate welding facility, whereas the other 85 percent of undocumented barges would not need a tow. For painting the number on the barge, alternative 2, the assumption is that the barge number would be painted without requiring a tow to a facility. Therefore, alternative 2 would not incur towing costs. With either alternative 1 or alternative 2, the estimated initial cost of $18,000 would be incurred by the Coast Guard to develop and install a database for managing information from the barge numbering system. The unit costs for the 30-year study period for both alternatives are summarized in Table 1.

TABLE 1.—UNIT COST SUMMARY

	Alternative 1 welding [1]	Alternative 2 painting
Government Costs:		
Administration Cost/Barge	$62	$62
Industry Cost/Barge:		
Existing Barges—Tow Req.	2,977	
Existing Barges—No Tow Req.	844	153
Future Barges	282	65
Total Cost/Barge:		
Existing Barges—Tow Req.	3,039	

TABLE 1.—UNIT COST SUMMARY—Continued

	Alternative 1 welding [1]	Alternative 2 painting
Existing Barges—No Tow Req.	906	215
Future Barges	344	127

[1] Costs include Gas-freeing, chemist certificate.

To develop the range of potential benefits that might result from alternative 1 and alternative 2, three scenarios are considered: (1) Barges greater than 100 tons are no longer abandoned (best case scenario), (2) illegally abandoned barges are abandoned with the number intact, and (3) illegally abandoned barges are abandoned with the barge number removed or obliterated (worst case scenario). The estimated annual benefits for each scenario are characterized in Table 2.

TABLE 2.—ANNUAL BENEFITS

	Scenario 1	Scenario 2	Scenario 3
Removal Cost Recovery	$250,000	$90,000	$0
Clean Up Cost Recovery	429,890	154,760	0
Investigation Savings	1,500	1,090	0
Total Annual Savings	681,390	245,850	0

The net present values (present value of benefits—present value of costs) were calculated over a 30-year period, from 2001 to 2030, using a discount rate of 7 percent. These values were discounted to year 1999. The total present value cost was calculated by multiplying the unit cost by the number of affected barges for each year from 2001 through 2030. The cost and benefit analyses in all three scenarios revealed no net benefit with welding the number to the barge (alternative 1). However, a cost and benefit analysis of the first scenario for alternative 2 identified a net benefit. The other two scenarios for painting the barge number on the barge revealed no net benefits. Table 3 summarizes the alternatives net present values for the 30-year period.

TABLE 3.—NET PRESENT VALUES—30 YEAR PERIOD

	Scenario 1	Scenario 2	Scenario 3
Alternative 1—Welding			
PV Benefit	$6,787,290	$2,448,903	$0
PV Cost	21,169,984	21,169,984	21,169,984
Net PV	(14,382,694)	(18,721,081)	(21,169,984)
Alternative 2—Painting			
PV Benefit	6,787,290	2,448,903	0
PV Cost	5,625,686	5,625,686	5,625,686
Net PV	1,161,604	(3,176,783)	(5,625,686)

The costs associated with welding the number to the barge were found to be significantly higher than the cost of painting. However, welding the numbers to the barges is the recommended alternative because it will be more difficult to remove the identification number on illegally abandoned barges. Therefore, it will help identify parties responsible for illegally abandoning barges and prevent future marine pollution from abandoned barges. Painted numbers can easily be removed, thus making it difficult to identify the responsible barge owner.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

Affected small entities: Companies that own and lease barges vary widely in size and operation. The Army Corp of Engineer's ''Waterborne Transportation Lines of the United States, Volume 2—Vessel Company Summary'' database was queried to identify owners of undocumented barges more than 100 gross tons. The query identified 660 owners with undocumented barge fleets ranging from 1 to 1,608 barges. The results of the query also revealed that 15 percent of the barge operators own over 85 percent of the affected barges. A majority (74 percent) of the affected owners have undocumented barge fleets of less than 10. Table 4 presents the number of affected owners by fleet size.

TABLE 4.—NUMBER OF AFFECTED FLEET OWNERS

Fleet size range	Number of owners	Percentage of owners	Number of affected barges	Percentage of affected barges (percent)
Greater than 1000	3	0.5%	4,040	23%
100 to 999	34	5.2%	8,970	50%
20 to 99	59	8.9%	2,594	14%
10 to 19	75	11.4%	1,024	6%
Fewer than 10	489	74.0%	1,329	7%
Total	660	100.0%	17,957	100%

The Small Business Administration, in 13 CFR 121–201, defines small business by either the number of employees or the amount of receipts in dollars. Revenue or labor-force information for many of the companies can be obtained from sources such as: Dun & Bradstreet, American Business and Lexis-Nexis. We assumed that if a company was a subsidiary or branch of a parent company, then that subsidiary or branch was inseparable from the larger firm.

From those 660 companies we drew a random sample of 101 companies using a confidence level of 95 percent and a confidence interval of 9. From the random sample of 101 companies we found data for 66 (or 65 percent) of them. Furthermore, from the 66 firms we identified 20 owned/operated by large companies and the remaining 46 owned/operated by small businesses. According to the small business size standard of the SIC (Standard Industrial Classification) and NAICS (North American Industry Classification System) Codes, we determined that the 46 identified entities qualified as small businesses because their revenues/number of employees do not exceed the specified standard in the corresponding SIC and NAICS codes definitions. This represents 69.7 percent of the 66 companies from which we have information. Therefore, we are 95 percent certain that 61.8 percent to 78.2 percent of the firms are small entities.

The determined small businesses cover several industry segments, therefore the corresponding SIC and NAICS codes analyzed for each company also cover a wide range. However, we determined that the most frequently identified SIC and NAICS codes when analyzing the small companies are as follows in table 5:

TABLE 5.—THE SMALL BUSINESSES MOST FREQUENTLY IDENTIFIED SIC AND NAICS CODES FROM THE RANDOM SAMPLE

Classification systems		Description		Definition		Number of small businesses
SIC	NAICS	SIC	NAICS	SIC	NAICS	
1629	23493	Heavy Construction, N.E.C.	Industrial Nonbuilding Structure Construction.	$27, 5Mil	$27, 5Mil	7
	23499		All Other Heavy Construction		$27, 5Mil	
3731	336611	Shipbuilding and Repair of Nuclear Propelled Ships.	Ship Building and Repair	1,000E	1,000E	3
4449	483211	Water Transportation of Freight, N.E.C.	Inland Water Transportation	500E	500E	8
4492	48833	Towing and Tug Boat	Navigational Services to Shipping	$5Mil	$5Mil	4
4499	532411	Water Transportation Services, N.E.C..	Commercial Air, Rail and Water Transportation Equipment Rental and Leasing.	$5Mil	$5Mil	3
5032	42132	Brick, Stone and Related Construction Materials.	Brick, Stone and Related Construction Material Wholesalers.	100E	100E	5

Cost for small entities: The costs to small business entities would depend only on the entity's fleet size. Below we show the impact on small businesses for welding barge numbers to the barge, our chosen alternative. We assume a 15 percent probability the vessel will need a tow, and an 85 percent probability that the vessel will not need a tow for welding. Therefore for the purpose of this analysis we estimate an expected cost of $1,164/barge (0.15 × $2,977/barge + 0.85 × $844/barge = $1,164/barge). The analyzed small business entities have relatively small fleets, with a median fleet size of 2. The median cost per company is $2,328/company (2 barges/company × $1,164/barge). The median revenue of a small business in our sample is $3,750,000. Therefore, the annual median impact on a small business is 0.06 percent ($2,328/$3,750,000 × 100) of annual revenue. For 45 of 46 small businesses the impact was less than 1 percent of the average revenues per year. For 46 of 46 small businesses the impact was less than 1.2 percent of the average revenue per year. In addition, the industry has a five year phase-in period to comply.

Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment to the Docket Management Facility at the address under **ADDRESSES**. In your comment, explain why you think it qualifies and how and to what degree this rule would economically affect it.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in

understanding this proposed rule so that they can better evaluate its effects on them and participate in the rulemaking. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult LCDR Robyn MacGregor, Project Manager, Office of Waterways Security and Safety (G–MWP), telephone 202–267–0483. Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247).

Collection of Information

This proposed rule would call for a collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). As defined in 5 CFR 1320.3(c), ''collection of information'' comprises reporting, recordkeeping, monitoring, posting, labeling, and other, similar actions. The title and description of the information collections, a description of those who must collect the information, and an estimate of the total annual burden follow. The estimate covers the time for reviewing instructions, searching existing sources of data, gathering and maintaining the data needed, and completing and reviewing the collection.

Title: Numbering and Marking Undocumented Barges Greater than 100 gross tons.

Summary of the Collection of Information: The Abandoned Barge Act of 1992, sections 5301 to 5305 of Public Law 102–587, enacted on November 4, 1992, added a new chapter 47 to Title 46 of United States Code (46 U.S.C. 4701–4705) and amended 46 U.S.C. 12301 to require the numbering of undocumented barges measuring more than 100 gross tons operating on the navigable waters of the United States. The numbering system provides a means for identifying the parties responsible and liable for illegal abandonment. The information collections described in this supporting statement are necessary to implement the requirements described in 46 CFR part 66.

The table below identifies the subjects of the collection of information.

TABLE 6.—CFR, SUBJECT AND AFFECTED POPULATION

46 CFR part 66	Subject and affected population
Section 66.25(a)(1)	Filling out the Application for Certificate of Number for Undocumented Barge (CG–5683) and submitting it to the National Vessel Documentation Center. • The owners of undocumented barges greater than 100 gross tons.
Section 66.5 and 66.25(a)(2)	Recordkeeping the Certificate of Number for Undocumented Barge. • The owners of undocumented barges greater than 100 gross tons.
Section 66.25(a)(2)	Notifying the National Vessel Documentation Center of a replacement of a Certificate of Number for Undocumented Barge (CG–5683) document. • The owners of undocumented barges greater than 100 gross tons, in case of a defaced Certificate of Number.
Section 66.25(a)(3) and 66.35(d)	Notifying the National Vessel Documentation Center of the sale of a barge or upon the destruction of a barge with a valid Certificate of Number for Undocumented Barge (CG–5683). • The old owners of undocumented barges greater than 100 gross tons, in case barges are sold or destroyed.
Section 66.35(b)	Permanently attaching the number issued by the National Vessel Documentation Center to the barge. • The owners of undocumented barges greater than 100 gross tons.

Need for Information: This proposed rule contains burdens for the owners of undocumented barges greater than 100 gross tons. The information required is as follows:

(a) *Filling out the Application for Certificate of Number for Undocumented Barge (CG–5683) and submitting it to the National Vessel Documentation Center.* The owners of undocumented barges greater than 100 gross tons (including the owners of previously documented barges but no longer carrying a Certificate of Documentation) would fill out the Coast Guard Application for Certificate of Number for Undocumented Barge that contains the following necessary information to determine the ownership of the barge:

- The owner's name and address
- The barge length, breadth, depth, year built, hull material, barge name, and official number (if applicable).

(b) *Recordkeeping the Certificate of Number for Undocumented Barge (CG–5683).* Once the owners of barges obtain a Certificate of Number for Undocumented Barge, this would serve as evidence of ownership for determining liability in connection with the abandoned barge. Also, in case the owner applies for replacement of a defaced document, the outstanding Certificate of Number for Undocumented Barge must also be submitted to NVDC. This implies that the owner creating a recordkeeping burden must keep the Certificate of Number.

(c) *Notifying the National Vessel Documentation Center of a Replacement of a Certificate of Number for Undocumented Barge (CG–5683).* Owners requesting the replacement of a defaced document as a Certificate of Number for Undocumented Barge fill out the application form CG–5683 and submit the outstanding Certificate of Number for Undocumented Barge to NVDC.

(d) *Notifying the National Vessel Documentation Center of the sale of a barge or upon the destruction of a barge with a valid Certificate of Number for Undocumented Barge (CG–5683).* In case a barge is sold, the seller would have to provide a copy of the bill of sale to the NVDC. The owners would have to notify the NVDC by using Form CG–5683 upon the destruction of a barge with a valid Certificate of Number for Undocumented Barge within 60 days of the barge's destruction. This way the NVDC will maintain and update the numbering system for undocumented barges measuring more than 100 gross tons.

(e) *Permanently attaching the number issued by the National Vessel Documentation Center to the barge.* Owners (including the owners of

previously documented barges but no longer carrying a Certificate of Documentation) would have to permanently mark the barge by either welding, punch-marking, or carving the number issued by the NVDC, so that alteration, removal, or replacement would be obvious. The barge would be marked three times as follows: internally on the main beam and externally at the highest point on each side of the vessel's hull or permanent structure so that the number can be seen from either side.

Proposed Use of Information: This information collection would provide methods for identifying the parties responsible and liable for the illegal abandonment of a barge. It also would enhance the Government's recovery of costs associated with the removal of the barge. The information required for ''Numbering and Marking Undocumented Vessels greater than 100 gross tons'' would be collected on forms that are available at the National Vessel Documentation Center (NVDC). The information would have to be submitted by the vessel owner to NVDC. Once the application is processed, the NVDC would issue a Certificate of Number for Undocumented Barge to the owner who would then mark the issued barge number to the barge. Without the information an undocumented barge greater than 100 gross tons on the navigable waters of the United States would not be numbered as stated in the Abandonment Barge Act of 1992. Therefore, it would be impossible to identify the responsible owners of an illegally abandoned barge and consequently, there would be a little chance of the government recovering costs incurred from the removal.

Description of the Respondents: Each owner of undocumented Barge greater than 100 gross tons would be affected by these collections requirements.

Number of Respondents: We estimate those 660 owners of undocumented barges greater than 100 gross tons would be required to comply with the proposed requirements.

Frequency of Response Owners of undocumented barges greater than 100 gross tons would have to initially apply to the NVDC in order to obtain a Certificate of Number for Undocumented Barge. The number mentioned in the certificate would be permanently marked to the barge and would stay with the barge for the entirety of its life.

When needed, the owners of previously numbered barges can apply to the NVDC for the replacement of a defaced Certificate of Documentation. Also, in case of a change in ownership of a previously numbered barge, the new owner would have to submit an application for a Certificate of Number to be issued in the new owner's name. The seller would have to provide a copy of the bill of sale.

On occasion, upon destruction of a barge numbered under this part, an owner would have to notify NVDC using Form CG–568, Application for Certificate of Number.

Burden of Response: We identified 660 owners of 17,957 undocumented barges more than 100 gross tons identified, querying the Army Corp of Engineer's (USACE) ''Waterborne Transportation Lines of the United States, Volume 2—Vessel Company Summary'' database. The total estimated number of undocumented barges is approximately 20,000 and includes construction barges. The number was estimated based on queries of USACE data and the Coast Guard Marine Safety Management System data of all currently undocumented barges.

The 1,400 previously documented barges no longer carrying a Certificate of Documentation are included in the 20,000 total number of undocumented barges. In order to estimate the number of affected barges in future years (i.e., barges to be constructed in the future that will require numbering), we used a regression analysis. We based our analysis on the Coast Guard's Marine Safety Information System data series concerning the number of barges over 100 gross tons constructed in the period of time from 1985 up to 1999. We forecasted the number of new constructed undocumented barges over 100 gross tons to be constructed for the regulatory evaluation period of time.

In the first five years, from 2001 up to 2005, owners of currently undocumented barges (20,000) would have to comply with the proposed regulation as well as owners of the barges that are sold or destroyed and owners of newly constructed barges. Thereafter, beginning with 2006 the annual burden will be placed only on owners of newly constructed barges and owners of sold or destroyed barges. The burden due to the currently 20,000 undocumented barges is evenly distributed in the five-year phase in period. Therefore, we estimate that owners of 4,000 barges/year would have to apply for a Certificate of Undocumented Barge.

We are presenting for public comment our estimate of affected entities and the burden posed to them for the first three years this proposed rule would be enforced. These estimates are found in table 7.

TABLE 7.—NUMBER OF AFFECTED BARGES

Year	Currently undocumented barges	New constructed barges (forecasted)	Sold barges per year (10% (2+3))	Total permanently marked barges (2+3)	Total barges for which NVDC will be notified (2+3+4)
1	2	3	4	5	6
2001	4,000	513	451	4,513	4,964
2002	4,000	525	453	4,525	4,978
2003	4,000	536	454	4,536	4,990
Average per year	4,000	525	453	4,525	4,978

We indicate below the hour burden according to the requirements in this Collection of Information.

(a) *Filling out the Application for Certificate of Number for Undocumented Barge (CG–5683) and submitting it to the National Vessel Documentation Center. We estimate that the average time for filling out this form is 15 minutes. The owners of 4,978 barges would have to fill out the form.*

Annual burden: 0.25 hours/barge × 4,978 barges/year = 1,245 hours/year.

(b) *Recordkeeping the Certificate of Number for Undocumented Barge (CG–*

5683). We estimate that it takes an owner 10 minutes to file the Certificate of Number for Undocumented Barges in an accessible place.

Annual burden: 0.17 hours/barge × 4,978 barges/year = 846 hours/year.

(c) *Notifying the National Vessel Documentation Center of a replacement of a Certificate of Number for Undocumented Barge (CG–5683) document.* We estimate that the number of replacements of defaced Certificate of Number documents is less than 5 percent (249 barges = 5% × 4,978 barges per year) from the total number of barges for which the owners would have a Certificate of Number. We estimate that it would take 15 minutes to an owner to fill out the application for the Certificate of Number and 5 minutes to submit the defaced Certificate of Number to the NVDC.

Annual burden: 0.33 hours/barge × 249 barges/year = 82 hours/year.

(d) *Notifying the National Vessel Documentation Center of a change in ownership of the barge, or upon the destruction of a barge with a valid Certificate of Number for Undocumented Barge (CG–5683).* We estimate that it would take 10 minutes to an owner to submit a copy of the bill of sale or the Certificate of Number for Undocumented Barges to the NVDC as follows:

- If the barge ownership changes : we estimate that 10 percent of 4,978 undocumented barges would be sold per year (498 barges).
- Upon the destruction of a barge: 10 percent of 4,978 barges per year (498 barges).

Annual burden: 0.17 hours/year × 996 barges = 169 hours/year.

(e) *Permanently attaching the number issued by the National Vessel Documentation Center to the barge.* Owners (including the owners of previously documented barges but no longer carrying a Certificate of Documentation) would have to permanently mark the barge by carving, punch-marking, or welding the number issued by the National Vessel Documentation Center. The barge would be marked three times as follows: internally on the main beam and also externally at the highest part of the vessel's hull or permanent structure so that the number can be seen from either side. We estimate that it takes 2 hours to permanently affix the numbers to a barge.

Annual burden: 2 hours/year × 4,525 barges = 9,050 hours/year.

The total annual hour burden is: 1,245hours/year + 846hours/year + 82hours/year + 169hours/year + 9,050hours/year = 11,392hours/year.

Annualized Costs: The owners of undocumented barges would incur costs. We estimated the annual average burden for information collection activities would cost $724,737 annually in current dollars. We identify below the cost burden according to the requirements covered in this Collection of Information.

(a) *Filling out the Application for Certificate of Number for Undocumented Barge (CG–5683) and submitting it to the National Vessel Documentation Center.* Approximately 1,245 burden hours would be required annually for filling out applications for Certificate of Numbers for Undocumented Barges to NVDC, by vessel owners. We estimate wages for a barge owner at $66 per hour.

The annual cost to the industry is: $82,170 (1,245hours/year × $66/hour).

(b) *Recordkeeping the Certificate of Number for Undocumented Barge (CG–5683).* Approximately 846 burden hours per year would be required by industry to file the certificate of number in a safe, accessible place. We estimate wages for a barge owner at $66 per hour.

The annual cost to the industry is: $55,836 (846hours/year × $66/hour).

(c) *Notifying the National Vessel Documentation Center of a replacement of a Certificate of Number for Undocumented Barge (CG–5683) document.* Approximately 82 burden hours per year would be required by industry to apply for replacement of a defaced document, the outstanding Certificate of Number. The Coast Guard estimates wages for a barge owner at $66 per hour.

The annual cost to the industry is: $5,412 (82hours/year × $66/hour).

(d) *Notifying the National Vessel Documentation Center of a change in ownership of the barge or upon the destruction of a barge with a valid Certificate of Number for Undocumented Barge (CG–5683).* Approximately 169 burden hours would be required annually for surrendering bills of sale or Certificates of Number for Undocumented Barge to NVDC, by vessel owners when there is a change in ownership of a barge, or upon the destruction of barges. We estimate wages for a barge owner at $66 per hour.

The annual cost to the industry is: $11,169 (169hours/year × $66/hour).

(e) *Permanently attaching the number issued by the National Vessel Documentation Center to the barge.* Approximately 9,950 burden hours would be required annually to permanently attach (weld) the numbers to barges. We estimate the hourly rate of a welder to be $63 per hour.

The annual cost to the industry is: $570,150 (9,050hours/year × $63/hour).

The total annual cost burden to the industry is: $82,170/year + $55,83/year + $5,412/year + $11,169/year + $570,150/year = $724,737/year.

Estimate of Total Annual Burden: We estimated the annual average burden for information collection activities would be 11,392 hours annually.

Public Comments on the Collection of Information: As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)), we have submitted a copy of this proposed rule to the Office of Management and Budget (OMB) for its review of the collection of information.

We ask for public comment on the proposed collection of information to help us determine how useful the information is; whether it can help us perform our functions better; whether it is readily available elsewhere; how accurate our estimate of the burden of collection is; how valid our methods for determining burden are; how we can improve the quality, usefulness, and clarity of the information; and how we can minimize the burden of collection.

If you submit comments on the collection of information, submit them both to OMB and to the Docket Management Facility where indicated under **ADDRESSES**, by the date under **DATES**.

You need not respond to a collection of information unless it displays a currently valid control number from OMB. Before the requirements for this collection of information become effective, we will publish notice in the **Federal Register** of OMB's decision to approve, modify, or disapprove the collection.

Federalism

Under Executive Order 13132, section 3 (b), the Coast Guard finds that a uniform system of identifying the owners of undocumented barges is in the national interest because of the problem of abandoned barges identified by Congress in the Abandoned Barge Act, 46 U.S.C. 4701–4705. One of the ways Congress specified for determining whether a barge is abandoned is if the owner states that it is not abandoned, 46 U.S.C. 4702(a)(3). However, that presupposes that the Coast Guard can identify who the current owner is. The Coast Guard already maintains a listing for documented barges. That leaves the Coast Guard unable to identify the owners of undocumented barges.

On October 18, 1994, the Coast Guard published a Request for Comments on this rulemaking project. (59 FR 52646) We noted our intent to consult with

State Boating Law Administrators, State Numbering Authorities, and with the National Association of State Boating Law Administrators' (NASBLA). We also solicited general comments, and asked a number of direct questions. One of those questions was whether the Coast Guard, the individual states, or some other entity should have the authority to assign numbers and maintain ownership information for undocumented barges. We received 21 comments, seventeen of which answered this question. All seventeen responded that the Coast Guard should be the entity assigning numbers and maintaining ownership information. Seven of these respondents were state agencies. (The Request for Comments and all received comments are available for viewing in the electronic docket.)

On July 6, 1998, we published an ANPRM which indicated our intent to establish the numbering system outlined in this NPRM. No commenters, state or otherwise, requested that the system be run by a State or other entity. (The ANPRM and comments are available for viewing in the electronic docket.)

Given this established lack of State interest in regulating in this area, any further consultation with State and local officials under Executive Order 13132, Section 3 (b) is unnecessary and not required by that order.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their regulatory actions not specifically required by law. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This proposed rule would not effect a taking of private property or otherwise have taking implications under E.O. 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not concern an environmental risk to health or risk to safety that may disproportionately affect children.

Environment

We considered the environmental impact of this proposed rule and concluded that, under figure 2–1, paragraph (34)(d), of Commandant Instruction M16475.1C, this proposed rule is categorically excluded from further environmental documentation. The proposed rule is a procedural regulation that does not have any environmental impact because the action does not have a significant effect on the quality of the human environment. A ''Categorical Exclusion Determination'' is available in the docket where indicated under **ADDRESSES**.

List of Subjects in 46 CFR Part 66

Penalties, Reporting and recordkeeping requirements, Vessels.

For the reasons discussed in the preamble, the Coast Guard proposes to add 46 CFR part 66 to read as follows:

PART 66—REQUIREMENT FOR UNDOCUMENTED BARGES

Sec.
66.5 Purpose.
66.10 Applicability.
66.15 Definitions.
66.20 Determining the gross tonnage for a barge.
66.25 Application procedure.
66.30 Invalidation of Certificate of Number.
66.35 Marking requirements.
66.40 Right of appeal.
66.45 Penalties.

Authority: 46 U.S.C. 4701 *et seq.*, 12301; 49 CFR 1.46(zz).

§ 66.5 Purpose.

A Certificate of Number for Undocumented Barge is required for the operation of undocumented barges greater than 100 gross tons on the navigable waters of the United States and serves as evidence of ownership for determining liability in connection with abandoned barges.

§ 66.10 Applicability.

This part applies to your barge if it meets the following three conditions:

(a) It is greater than 100 gross tons;

(b) It operates on the navigable waters of the United States; and

(c) It is not currently documented by the U.S. Coast Guard.

§ 66.15 Definitions.

The following definitions are for terms used in this part.

Barge means any vessel not equipped with a means of self-propulsion.

Barge number means that unique number issued to a barge by the National Vessel Documentation Center (NVDC). The barge number will remain with the barge throughout its life.

Navigable waters means the waters of the United States, including the territorial seas.

Official number means the number assigned and marked on a currently or previously documented barge in accordance with 46 CFR part 67, subparts H and I.

Simplified measurement system has the same meaning as is given in 46 CFR part 69, subpart E.

Undocumented barge means a barge that does not have a current Certificate of Documentation issued under 46 CFR part 67.

§ 66.20 Determining the gross tonnage for a barge.

(a) If your barge must comply with this part, you may determine its gross tonnage by using the simplified measurement system described in 46 CFR 69.209. The terms and measurements used in that section have the meanings assigned to them in 46 CFR 69.203 and 69.207, respectively. You do not need to submit the application for measurement services outlined in 46 CFR 69.205, and no tonnage certifying document will be issued.

(b) If you do not use the Simplified Measurement System, the gross tonnage is the tonnage assigned under any other applicable measurement system of 46 CFR part 69, as indicated on an appropriate tonnage certifying document. In this case, the gross tonnage assigned under the Standard or Dual Measurement systems (46 CFR part 69, subparts C and D, respectively) should be used if your vessel is also assigned tonnage under the Convention system (46 CFR part 69, subpart B).

§ 66.25 Application procedure.

(a) As owner of a vessel applying for a Certificate of Number for Undocumented Barge (CG–5683); requesting replacement of a Certificate of Number for Undocumented Barge (CG–5683); or providing notification of the sale of a barge with a valid Certificate of Number for Undocumented Barge (CG–5683) you must submit the following to the National Vessel Documentation Center (NVDC):

(1) Application for Certificate of Number for Undocumented Barge (CG–5683);

(2) If the application is for replacement of a defaced document, the outstanding Certificate of Number for Undocumented Barge (CG–5683); or

(3) If providing notification of a transfer of ownership, the seller must provide a copy of the bill of sale.

(b) New owners of barges previously numbered under this part must submit an application for a Certificate of Number to be issued in the new owner's name.

(c) Upon receipt of the Certificate of Number for Undocumented Barge (CG–5683), ensure that the vessel is marked in accordance with the requirements set forth in § 66.9 of this part.

(d) Upon destruction of a barge numbered under this part, an owner must notify NVDC using Form CG–5683, Application for Certificate of Number. This notification must be made within 60 days of the barge's destruction.

(e) Applications for Certificate of Number of Undocumented Barge may be obtained from the National Vessel Documentation Center or downloaded from their website.

§ 66.30 Invalidation of Certificate of Number.

A Certificate of Number becomes invalid upon the transfer of ownership of a barge numbered under this part.

§ 66.35 Marking requirements.

(a) Your barge number must be marked in block type Arabic numerals not less than four (4) inches in height on:

(1) Some clearly visible internal structural part of the vessel; and

(2) At the highest part of the vessel's hull or permanent structure such that the number can be seen from either side.

(b) Your barge number must be permanently attached to the vessel, by either welding, punch-marking, or carving, so that alteration, removal, or replacement would be obvious.

(c) If this part applies to you, and your undocumented barge is in operation on the date this rule is published, you have five years from that date to obtain a barge number and meet the permanent marking requirements of this part.

(d) If your undocumented barge has a build date after publication of this rule, you must obtain a Certificate of Number and meet the permanent marking requirements of this part prior to placing the barge in operation.

§ 66.40 Right of appeal.

If you are directly affected by this part and wish to appeal a decision or action made by or on behalf of the U.S. Coast Guard, you may do so in accordance with 46 CFR part 1, subpart 1.03.

§ 66.45 Penalties.

Violation of this part is subject to the criminal and civil penalties set forth in 46 U.S.C. 12309. If the violation involves the operation of a vessel, the vessel also is liable in rem to the United States Government for a civil penalty of not more than $1,000.

Dated: January 5, 2001.

R.C. North,

Rear Admiral, Coast Guard, Assistant Commandant for Marine Safety and Environmental Protection.

BILLING CODE 4910–15–U

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 01–4, MM Docket No. 01–3, RM–10010]

Digital Television Broadcast Service; Jacksonville, NC

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition filed by The University of North Carolina, licensee of noncommercial educational station WUNM–TV, Jacksonville, North Carolina, requesting the substitution of DTV channel *18 for station WUNM–TV's assigned DTV channel *44. DTV Channel *18 can be allotted to Jacksonville, North Carolina, in compliance with the principle community coverage requirements of Section 73.625(a) at reference coordinates (35–06–18 N. and 77–20–15 W.). As requested, we propose to allot DTV Channel *18 to Jacksonville with a power of 65 and a height above average terrain (HAAT) of 561 meters.

DATES: Comments must be filed on or before February 26, 2001, and reply comments on or before March 13, 2001.

ADDRESSES: Federal Communications Commission, 445 12th Street, SW., Room TW–A325, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Malcolm G. Stevenson, Schwartz, Woods & Miller, 1350 Connecticut Avenue, NW., Suite 300, Washington, DC 20036–1717.

FOR FURTHER INFORMATION CONTACT: Pam Blumenthal, Mass Media Bureau, (202) 418–1600.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 01–3, adopted January 3, 2001, and released January 5, 2001. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center 445 12th Street, SW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Services, Inc., (202) 857–3800, 1231 20th Street, NW., Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

List of Subjects in 47 CFR Part 73

Television, Digital television broadcasting.

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 73 as follows:

PART 73—TELEVISION BROADCAST SERVICES

1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334, and 336.

§ 73.622 [Amended]

2. Section 73.622(b), the Table of Digital Television Allotments under North Carolina is amended by removing DTV Channel *44 and adding DTV Channel *18 at Jacksonville.

Federal Communications Commission.

Barbara A. Kreisman,

Chief, Video Services Division, Mass Media Bureau.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 01–01, MM Docket No. 01–1, RM–10013]

Digital Television Broadcast Service; Macon, GA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition filed by Gannett Georgia, L.P., licensee of station WMAZ–TV, NTSC channel 13, Macon, Georgia, requesting the substitution of DTV channel 4 for station WMAZ–TV's assigned DTV channel 45. DTV Channel 4 can be allotted to Macon, Georgia, in compliance with the principal community coverage requirements of Section 73.625(a) at reference coordinates (32–45–10 N. and 83–33–32 W.). As requested, we propose to allot DTV Channel 4 to Macon with a power of 5.0 and a height above average terrain (HAAT) of 238 meters.

DATES: Comments must be filed on or before February 26, 2001, and reply comments on or before March 13, 2001.

ADDRESSES: Federal Communications Commission, 445 12th Street, SW., Room TW–A325, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Marnie K. Sarver, Wiley, Rein & Fielding, 1776 K Street, NW., Washington, DC 20006 (Counsel for Gannett Georgia, L.P.).

FOR FURTHER INFORMATION CONTACT: Pam Blumenthal, Mass Media Bureau, (202) 418–1600.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 01–1, adopted January 2, 2001, 2000, and released January 5, 2000. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center, 445 12th Street, SW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Services, Inc., (202) 857–3800, 1231 20th Street, NW., Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. DEPARTMENT OF AGRICULTURE

Rural Utilities Service

Associated Electric Cooperative, Inc., Notice of Availability of an Environmental Assessment

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice of availability of an environmental assessment.

SUMMARY: Notice is hereby given that the Rural Utilities Service (RUS) is issuing an environmental assessment with respect to the potential environmental impacts related to the construction of three 100-megawatt, natural gas fired combustion turbine electric generators in west-central Johnson County, Missouri. RUS may provide financing assistance to Associated Electric Cooperative for the project.

FOR FUTHER INFORMATION CONTACT: Bob Quigel, Environmental Protection Specialist, Engineering and Environmental Staff, Rural Utilities Service, Stop 1571, 1400 Independence Avenue, SW., Washington, DC 20250–1571, telephone: (202) 720–0468. Bob's e-mail address is *bquigel@rus.usda.gov.* Information is also available from Jerry Bindel of Associated Electric Cooperative, P.O. Box 754, Springfield, Missouri 65801–0754 telephone (417) 885–9272. Jerry's e-mail address is *jbindel@aeci.org.*

SUPPLEMENTARY INFORMATION: Associated Electric Cooperative proposes to construct and operate three, 100-megawatt, simple cycle combustion turbine generators on an 80 acre site in Johnson County, Missouri. The entire plant would use about 11 acres of the site. The site is located approximately 2 miles north of Holden, Missouri. State Highway 131 borders the eastern edge of the site.

The primary fuel for the units would be natural gas with fuel oil backup. The generators are Siemens Westinghouse V84.2 dry low-nitrogen combustors. Each generating unit would be approximately 60 feet wide and 150 feet long. The exhaust stacks would be 90 feet high. An electric substation, a 100-foot by 60-foot maintenance building, water storage tanks, fuel oil storage tank and unloading area, a gas conditioning area and pump house would be located near the combustion turbines. A 150-foot microwave tower would be located on site to enable controlling the plant from a remote location. A 1,300-foot natural gas pipeline and approximately 2.6 miles of electric transmission line will be needed at the site to supply natural gas to the units and connect them to the existing electric transmission grid.

Subsequent to receiving a stormwater permit from the Missouri Department of Natural Resources (MDNR), Associated Electric Cooperative initiated land clearing activities at the site. However, no permanent foundations or plant structures can be constructed on the site until Associated Electric Cooperative has received the air permit for the project from the Air Quality Control Program of the MDNR.

Associated Electric Cooperative prepared an environmental analysis for RUS which describes the project and assesses its environmental impacts. RUS has conducted an independent evaluation of the environmental analysis and believes that it accurately assesses the impacts of the proposed project. This environmental analysis will serve as RUS' environmental assessment of the project. No significant impacts are expected as a result of the construction of the project.

The environmental assessment can be reviewed at the Associated Electric Cooperative headquarters located at 2814 South Golden Street, Springfield, Missouri 65807–3213. Copies of this document will also be available at the Holden Public Library, 101 West Third Street, Holden, Missouri 64040–1302, telephone (816) 732–4545. It can also be reviewed at the headquarters of RUS at the address provided above.

Questions and comments should be sent to RUS at the address provided. RUS will accept questions and comments on the environmental assessment for at least 30 days from the date of publication of this notice.

Any final action by RUS related to the proposed project will be subject to, and contingent upon, compliance with all relevant Federal environmental laws and regulations and completion of environmental review procedures as prescribed by the 7 CFR part 1794, Environmental Policies and Procedures.

Dated: January 4, 2001.

Lawrence R. Wolfe,

Acting Director, Engineering and Environmental Staff.

Small Grant Programs

Availability of 2001 Funds for: (1) Precision Measurement Grants—Availability of Funds; (2) Physics Laboratory (PL), 2001 Summer Undergraduate Research Fellowships (SURF); (3) Materials Science and Engineering Laboratory (MSEL), 2001 Summer Undergraduate Research Fellowships (SURF); (4) Manufacturing Engineering Laboratory (MEL), 2001 Summer Undergraduate Research Fellowships (SURF); (5) Information Technology Laboratory (ITL), 2001 Summer Undergraduate Research Fellowships (SURF); (6) Building and Fire Research Laboratory (BFRL), 2001 Summer Undergraduate Research Fellowships (SURF); (7) Electronics and Electrical Engineering Laboratory (EEEL), 2001 Summer Undergraduate Research Fellowships (SURF); (8) Materials Science and Engineering Laboratory (MSEL) Grants Program—Availability of Funds; (9) Fire Research Grants Program—Availability of Funds; (10) Physics Laboratory (PL) Grants Program—Availability of Funds; (11) Chemical Science and Technology Laboratory (CSTL) Grants Program—Availability of Funds; (12) Manufacturing Engineering Laboratory (MEL) Grants Program—Availability of Funds; and; (13) Electronics and Electrical Engineering Laboratory (EEEL) Grants Program—Availability of Funds.

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice

SUMMARY: The purpose of this notice is to inform potential applicants that the following programs of the National Institute of Standards and Technology (NIST) are offering financial assistance as follows: (1) The Precision Measurement Grants Program; (2) the 2001 Summer Undergraduate Research Fellowships (SURF) in the areas of Atomic, Molecular and Optical (AMO) and Radiation Physics, in Materials Science and Engineering, in Manufacturing Engineering, in Information Technology, in Building and Fire Research, and in Electronics and Electrical Engineering; (3) the Materials Science and Engineering Grants Program; (4) the Fire Research Grants Program; (5) the Physics Laboratory Grants Program; (6) the Chemical Science and Technology Laboratory Grants Program; (7) the Manufacturing Engineering Laboratory (MEL) Grants Program, and (8) the Electronics and Electrical Engineering (EEEL) Grants Program. In order to make any awards this fiscal year, it is necessary to begin the application process now. The issuance of awards is subject to the availability of FY 2001 funds. Further notice will be made in the **Federal Register** about the final status of funding for these programs at the appropriate time. NIST shall not be liable for any proposal preparation costs.

The Precision Measurement Grants Program is seeking proposals for significant, primarily experimental, research in the field of fundamental measurement or the determination of fundamental constants.

The programs ''SURFing the Physics Laboratory,'' ''SURFing the Materials Science and Engineering Laboratory,'' ''SURFing the Manufacturing Engineering Laboratory,'' ''SURFing the Information Technology Laboratory,'' ''SURFing the Building and Fire Research Laboratory,'' and ''SURFing the Electronics and Electrical Engineering Laboratory'' will provide an opportunity for the NIST Physics Laboratory (PL), Materials Science and Engineering Laboratory (MSEL), Manufacturing Engineering Laboratory (MEL), Information Technology Laboratory (ITL), Building and Fire Research Laboratory (BFRL), and Electronics and Electrical Engineering Laboratory (EEEL), and the National Science Foundation (NSF) to join in a partnership to encourage outstanding undergraduate students to pursue careers in science and engineering.

The PL program will involve students in world-class atomic, molecular, optical (AMO) and radiation physics research with internationally known physicists in the NIST Physics Laboratory. The MSEL program will provide research opportunities with internationally known NIST scientists in the fields of ceramics, solid state chemistry, metallurgy, polymers, neutron condensed matter science, and materials reliability. The MEL program will provide research opportunities with internationally known NIST scientists in the fields of intelligent systems, manufacturing metrology, precision engineering, and manufacturing systems integration. The ITL program will provide research opportunities with internationally known NIST scientists in the field of networking, software quality, security, information access, convergent systems, mathematical science, and statistics. The BFRL program will provide research opportunities with internationally known NIST scientists in the fields of building materials (concrete, coating), structure (earthquake), building environment (indoor air quality, thermal machinery), and fire science and engineering. The EEEL program will provide research opportunities with internationally known NIST scientists in the fields of semiconductors (including mainstream silicon, power devices, and compound semiconductors), fundamental electrical measurements, electronic instrumentation, electrical systems, and electronic information. The NIST Program Directors will work with physics, materials science, manufacturing engineering, intelligent systems, automated production, precision engineering, information technology, building materials, constructed structures, and other science-related department chairs and directors of multi-disciplinary academic organizations to identify outstanding undergraduates (including graduating seniors) who would benefit from off-campus summer research in an honors academy environment.

The Materials Science and Engineering Laboratory (MSEL) Grants Program is continuing its program for grants and cooperative agreements in the following fields of research: Ceramics, Metallurgy, Polymer Sciences, Neutron Scattering Research and Spectroscopy.

The Fire Research Grants Program is limited to innovative ideas in the fire research area generated by the proposal writer, who chooses the topic and approach, consistent with the program description and objectives of this notice.

The Physics Laboratory (PL) Grants Program will provide grants and cooperative agreements in the following fields of research: Electron and Optical Physics, Atomic Physics, Optical Technology, Ionizing Radiation, and Time and Frequency.

The Chemical Science and Technology Laboratory (CSTL) Grants Program will provide grants and cooperative agreements in the following fields of research: Biotechnology, Process Measurements, Surface and Microanalysis Science, Physical and Chemical Properties, and Analytical Chemistry.

The Manufacturing Engineering Laboratory (MEL) Grants Program is initiating a program for grants and cooperative agreements in the following fields of research: Dimensional Metrology for Manufacturing, Mechanical Metrology for Manufacturing, Intelligent Systems, and Information Systems Integration for Application in Manufacturing.

The Electronics and Electrical Engineering (EEEL) Grants Program provides grants and cooperative agreements for the development of fundamental electrical metrology and of metrology supporting industry and government agencies in the broad areas of semiconductors, electronic instrumentation, radio-frequency technology, optoelectronics, magnetics, video, electronic commerce as applied to electronic products and devices, the transmission and distribution of electrical power, national electrical standards (fundamental, generally quantum-based physical standards), and law enforcement standards.

Precision Measurement Grants Program

Dates: Applicants for the Precision measurement Grants Program must submit an abbreviated proposal for preliminary screening. Based on the merit of the abbreviated proposal, applicants will be advised whether a full proposal should be submitted. The abbreviated proposals must be received at the address listed below no later than the close of business February 1, 2001. The semi-finalists will be notified of their status by March 23, 2001, and will be requested to submit full proposals to NIST by close of business on May 11, 2001. NIST expects to issue awards on or before September 30, 2001.

Addresses: For the Precision Measurement Grants Program, applicants are requested to direct technical questions and submit an abbreviated proposal (original and two (2) signed copies), with a description of their proposed work of no more than five (5) double spaced pages to: Dr. Peter J. Mohr, Chairman, NIST Precision Measurement Grants Committee,

National Institute of Standards and Technology, Bldg. 225, Rm. B161, 100 Bureau Drive, Stop 8401, Gaithersburg, MD 20899–8401, Tel: (301) 975–3217, E-mail: mohr@nist.gov, Website: http://physics.nist.gov/pmg.

Authority: The authority for the Precision Measurement Grants Program is as follows: As authorized by 15 U.S.C. 272(b) and 9c), NIST conducts directly, and supports through grants and cooperative agreements, a basic and applied research program in the general area of fundamental measurement and the determination of fundamental constants of nature.

Program Description and Objectives: The program description and objectives for the Precision Measurement Grants Program are as follows: As part of its research program, since 1970 NIST has awarded Precision Measurement Grants to U.S. universities and colleges so that faculty may conduct significant, primarily experimental research in the field of fundamental measurement or the determination of fundamental constants. NIST sponsors these grants and cooperative agreements primarily to encourage basic, measurement-related research in U.S. universities and colleges and to foster contacts between NIST scientists and those faculty members of U.S. academic institutions who are actively engaged in such work. The Precision Measurement Grants are also intended to make it possible for researchers to pursue new, fundamental measurement ideas for which other sources of support may be difficult to find. There is some latitude in research topics that will be considered under the Precision Measurement Grants Program. The key requirement is that the proposed project support NIST's ongoing work in the field of basic measurement science, which includes:

1. Experimental and theoretical studies of fundamental physical phenomena which test the basic laws of physics or which may lead to new or improved fundamental measurement methods and standards.

2. The determination of important fundamental physical constants.

Although proposals for either experimental or theoretical research will be considered, the former will be given preference because of the more immediate applicability of experimental work to metrology, Proposals from workers at the assistant and associate professor level who have some record of accomplishment are especially encouraged in view of the comparative difficulty aspiring researchers have in obtaining funds.

Typical projects which have been funded through the NIST Precision Measurement Grants Program include:

(1) A test of local Lorentz invariance using polarized ^{21}Ne nuclei, T.E. Chupp, Harvard University.

(2) A new method to search for an electric dipole moment of the electron, L.R. Hunter, Amherst College.

(3) High-precision timing of millisecond pulsars, D.R. Stinebring, Princeton University.

(4) Development of an atom interferometer gyroscope for tests of general relativity, M. Kasevich, Stanford University.

(5) Spectroscopy of francium: towards a precise parity nonconservation measurement in a laser trap, Luis A. Orozco, State University of New York at Stony Brook.

(6) Measurement of the magnetically-induced QED birefringence of the vacuum, Siu Au Lee, Colorado State University.

(7) Measurement of Newton's constant *G* using a new method, J.H. Gundlach, University of Washington.

(8) Measurement of the polarization of the cosmic microwave background, S.T. Staggs, Princeton University.

Eligibility: Eligible applicants are institutions of higher education, other non-profits, commercial organizations, international organizations, state, local and Indian tribal governments and Federal agencies. Applications from non-Federal and Federal applicants will be competed against each other. Proposals selected for funding from non-Federal applicants will be funded through a project grant or cooperative agreement under the terms of this notice. Proposals selected for funding from non-NIST Federal agencies will be funded through an interagency transfer. Please Note: Before non-NIST Federal applicants may be funded, they must demonstrate that they have legal authority to receive funds from another federal agency in excess of their appropriation. As this announcement is not proposing to procure goods or services from applicants, the Economy Act (31 U.S.C. 1535) is not an appropriate legal basis.

Funding Availability: For the *Precision Measurement Grants Program*, the annual budget is approximately $300,000. Two new grants in the amount of $50,000 per year will be awarded; the remaining $200,000 will fund continuing grants. Applicants must propose multi-year projects, not to exceed three (3) years. The scope of work must be clearly severable into annual increments of meaningful work that represent solid accomplishments in case continued funding is not made available to the applicant. Because of commitments for supporting multi-year programs, only a portion of the budget is available to initiate new programs or continue existing ones in any one year.

Proposal Review Process and Evaluation Criteria: For the *Precision Measurement Grants Program*, to simplify the proposal writing and evaluation process, the following selection procedure will be used:

Applicants will initially submit abbreviated proposals and these will be reviewed on the basis of the evaluation criteria given below. The NIST Precision Measurement Grants Committee and an Outside Review Committee will then select approximately four to eight semifinalists and request that these candidates submit full proposals. The same committees will evaluate the detailed proposals based on the same evaluation criteria. In making recommendations for funding, the program's selecting official will take into consideration the results of the evaluations, the extent to which the proposed research would support NIST's understanding, improvement, or development of measurement methods or physical standards, and his or her judgment as to which applications, when the slate is taken as a whole, are likely to best further the objectives of the NIST Precision Measurements Grants Program, as described above in the Program Description and Objectives section. Two grantees for fiscal year 2002 will be selected. The final approval of selected applications and award of grants or cooperative agreements will be made by the NIST Grants Officer based on compliance with application requirements as published in this notice, compliance with applicable legal and regulatory requirements, and whether the recommended applicants appear to be responsible. Applicants may be asked to modify objectives, work plans, or budgets and provide supplemental information required by the agency prior to award. The decision of the Grants Officer is final.

The evaluation criteria to be used in evaluating the abbreviated application proposals and full proposals are:

1. The importance of the proposed research—Does it have the potential of answering some currently pressing question or of opening up a whole new area of activity?

2. The relationship of the proposed research to NIST's ongoing work—Will it support one of NIST's current efforts to develop a new or improved fundamental measurement method or physical standard, or to better understand an important, but already existing, measurement method or physical standard?

3. The feasibility of the research—Is it likely that significant progress can be made in a three year time period with the funds and personnel available?

4. The past accomplishments of the applicant—Is the quality of the research previously carried out by the prospective grantee such that there is a high probability that the proposed research will be successfully carried out?

Each of these factors is given equal weight in the evaluation process.

Award Period: For the Precision Measurement Grants Program, NIST is now accepting applications for two new grants in the amount of $50,000 per year to be awarded for the period October 1, 2001, through September 30, 2002 (fiscal year 2002). Each award may be continued for up to two additional years; however, future or continued funding will be at the discretion of NIST based on satisfactory performance, continuing relevance to program objectives, and the availability of funds.

Matching Requirements: The Precision Measurement Grants Program does not require any matching funds.

Application Kit: For the Precision Measurement Grants Program, an application kit, containing all required application forms and certifications, is available by contacting Ms. Michelle Hane, (301) 975–4397.

PL, MSEL, MEL, ITL, BFRL, and EEEL SURF Programs

Dates: The PL, MSEL, MEL, ITL, BRFL, and EEEL SURF Programs proposals must be received no later than the close of business February 15, 2001.

Addresses: For the PL, MSEL, MEL, ITL, BFRI, and EEEL SURF Programs, applicant institutions must submit one signed original and two (2) copies of the proposal to: Attn.: Ms. Anita Sweigert, National Institute of Standards and Technology; 100 Bureau Drive, Stop 8400, Gaithersburg, MD 20899–8400, Tel: (301) 975–4200, E-Mail: anita.sweigert@nist.gov, Website: http://www.surf.nist.gov

Technical questions for the PL, MSEL, MEL, ITL, BFRL, and EEEL SURF Programs should be directed to the following contact persons: for the PL SURF Program, Dr. Marc Desrosiers, Tel: (301) 975–5639, E-mail: marc.desrosiers@nist.gov; for the MSEL SURF Program, Dr. Terrell A. Vanderah, Tel: (301) 975–5785, E-mail: terrell.vanderah@nist.gov; for the MEL SURF Program, Ms. Lisa Jean Fronczek, Tel: (301) 975–6633, E-mail: *lfronczek@nist.gov:* for the ITL SURF Program, Dr. Larry Reeker, Tel: (301) 975–5147, E-mail: *larry.reeker@nist.gov:* for the BFRL SURF Program, Dr. Chris White, Tel: (301) 975–6016, E-mail: *cwhite@nist.gov:* and for the EEEL SURF Program, Dr. David Newell, Tel: (301) 975–4228, E-mail: david.newell@nist.gov.

Authority: The authority for the PL, MSEL, MEL, ITL, BFRL and EEEL SURF Programs is as follows: 15 U.S.C. 278g–l sizes NIST to fund financial assistance awards to students at institutions of higher learning within the United States. These students must show promise as present or future contributors to the missions of NIST. Cooperative agreements are awarded to assure continued growth and progress of science and engineering in the United States, including the encouragement of women and minority students to continue their professional development.

Program Description and Objectives: The program description and objectives for the PL, MSEL, MEL, ITL, BFRL, and EEEL SURF Programs are as follows: To build a mutual beneficial relationship between the student, the institution of higher learning, and NIST. This is the ninth year of the PL SURF Program, which is partially funded by the NSF Physics Division as a Research Experience for Undergraduates (REU) site. This is the fourth year of the MSEL SURF Program funded by the NSF Division of Materials Research (DMR) as a Research Experience for Undergraduates (REU) site. This is the third year of the MEL SURF Program funded by the NSF Division of Engineering Education and Centers (EEC) as a Research Experience for Undergraduates (REU) site. This is the first year of the ITL, BFRL, and EEEL SURF Programs. Less than ten percent of the associated student subsistence, travel and lodging has been provided in costs sharing by the participating institutions in previous years.

NIST is one of the nation's premiere research institutions for the physical and engineering sciences and, as the lead Federal agency for technology transfer, provides a strong interface between government, industry and academia. NIST embodies a special science culture, developed from a large and well-equipped research staff that enthusiastically blends programs that address the immediate needs of industry with longer-term research that anticipates future needs. This occurs in few other places and enables the Physics Laboratory, the Materials Science and Engineering Laboratory, the Manufacturing Engineering Laboratory, the Information Technology Laboratory, the Building and Fire Laboratory, and the Electronics and Electrical Engineering Laboratory to offer unique research and training opportunities for undergraduates, providing them a research-rich environment and exposure to state of the art equipment.

Attending to the long-term needs of many U.S. high-technology industries, NIST's Physics Laboratory conducts basic research in the areas of quantum, electron, optical, atomic, molecular, and radiation physics. To achieve these goals, PL staff develop and utilize highly specialized equipment, such as polarized electron microscopes, scanning tunneling microscopes, lasers, and x-ray and synchrontron radiation sources. Research projects can be theoretical or experimental and will range in focus from computer modeling of fundamental processes through trapping atoms and choreographing molecular collisions, to standards for radiation therapy.

NIST's Materials Science and Engineering Laboratory conducts basic research in the electronic, magnetic, optical, superconducting, mechanical, thermal, chemical, and structural properties of metals, ceramics, polymers, and composites. Much of this applied research is devoted to overcoming barriers to the next technological revolution, in which individual atoms and molecules will serve as the fundamental building blocks of devices. Preparation of unique materials by atomic level tailoring of multi-layers, perfect single crystals, and nanocomposites are just some of the future technologies being developed and explored in NIST's MSEL. To achieve these goals, staff develop and utilize highly specialized equipment, such as high resolution electron microscopes, atomic force microscopes, neutron scattering instruments, x-ray diffraction sources, lasers, magnetometers, plasma furnaces, melt spinners, molecular beam epitaxy systems, and thermal spray systems. Research projects can be theoretical or experimental and will range in focus from the structural, chemical, and morphological characterization of advanced materials made in the NIST laboratories to the accurate measurement of the unique properties possessed by these special materials.

NIST's Manufacturing Engineering Laboratory conducts theoretical and experimental research in length, mass, force, vibration, acoustics, and ultrasonics, as well as intelligent machines, precision control of machine tools, information technology for the integration of all elements of a product's life cycle. Much of this applied research is devoted to overcoming barriers to the next technological revolution, in which manufacturing facilities are spread across the globe. MEL's research and development leads to standards, test

methods and data that are crucial to industry's success in exploiting advanced manufacturing technology. Critical components of manufacturing at any level are measurement and measurement-related standards, not just of products, but increasingly of information about products and processes. Thus, MEL programs enhance both physical and information-based measurements and standards. Research projects can be theoretical or experimental, and will range in focus from intelligent machine control, characterizing a manufacturing process or improving product data exchange, to the accurate measurement of an artifact's dimensions.

NIST's Information Technology Laboratory responds to industry and user needs for objective, neutral tests for information technology. These are enabling tools that help companies produce the next generation of products and services, and that help industries and individuals use these complex products and services. ITL works with industry, research and government organizations to develop and demonstrate tests, test methods, reference data, proof of concept implementations and other infrastructural technologies. Program activities include: high performance computing and communications systems; emerging network technologies; access to, exchange, and retrieval of complex information; computational and statistical methods; information security; and testing tools and methods to improve the quality of software.

NIST's Building and Fire Research Laboratory provides technical leadership and participates in developing the measurement and standards infrastructure related to materials critical to U.S. industry, academia, government, and the public. Building and Fire Research programs at NIST cover a full range of materials issues from design to processing to performance. Separate research initiatives address concrete, coating, earthquake resistance of structures, fire science and engineering, the theory and modeling of materials, and materials reliability. Through laboratory-organized consortia and one-on-one collaborations, BFRL's scientists and engineers work closely with industrial researchers, manufacturers of high-technology products, and the major users of advanced materials.

NIST's Electronics and Electrical Engineering Laboratory strives to be the world's best source of fundamental and industrial-reference measurement methods and physical standards for electrotechnology. To be a world-class resource for semiconductor measurements, data, models, and standards focused on enhancing U.S. technological competitiveness in the world market, research is conducted in semiconductor materials, processing, devices, and integrated circuits to provide, through both experimental and theoretical work, the necessary basis for understanding measurement-related requirements in semiconductor technology. To provide the world's most technically advanced and fundamentally sound basis for all electrical measurements in the United States, research projects include maintaining and disseminating the national electrical standards, developing the measurement methods and services needed to support electrical materials, components, instruments, and systems used for the generation, transmission, and application of conducted electrical power, and related activities in support of the electronics industry including research on video technology and electronic product data exchange.

SURF students will have the opportunity to work one-on-one with our nation's top scientists and engineers. it is anticipated that successful SURF students will move from a position of reliance on guidance from their research advisors to one of research independence during the twelve-week period. One goal of this partnership is to provide opportunities for our nation's next generation of scientists and engineers to engage in world-class scientific research at NIST, especially in ground-breaking areas of emerging technologies. This carries with it the hope of motivating individuals to pursue a Ph.D. in physics, materials science, engineering, mathematics, or computer science, and to consider research careers. *SURFing the Physics Laboratory, SURFing the Materials Science and Engineering Laboratory, SURFing the Manufacturing Engineering Laboratory, SURFing the Information Technology Laboratory, SURFing the Building and Fire Research Laboratory*, and *SURFing the Electronics and Electrical Engineering Laboratory* will help to forge partnerships with NSF and with post-secondary institutions that demonstrate strong, hands-on undergraduate science curricula, especially those with a demonstrated commitment to the education of women, minorities, and students with disabilities.

Eligibility: For the *PL, MSEL, MEL, ITL, BFRL, AND EEEL SURF Programs*, colleges and universities in the United States and its territories with degree granting programs in materials science, chemistry, engineering, computer science, mathematics, or physics. Participating students must be U.S. citizens or permanent U.S. residents.

Funding Availability: For the *PL SURF Program*, the NIST Physics Laboratory will commit approximately $50,000 to support these cooperative agreements. The NIST Physics Laboratory's REU Program is anticipating renewal of funding by the NSF at the level of $70,000 per year. The anticipated direct costs for subsistence, travel, lodging, and conference attendance for twenty-five students is about $150,000. The actual number of awards made under this announcement will depend on the level of cost sharing by academic partners.

For the *MSEL SURF Program*, the NIST Materials Science and Engineering Laboratory anticipates receiving funding as a NSF REU Program at the level of $50,000 per year. For the *MEL SURF Program*, the NIST Manufacturing Engineering Laboratory anticipates receiving funding as a NSF REU Program at the level of $52,000 per year. For the *ITL SURF Program*, the NIST Information Technology Laboratory anticipates receiving funding as a NSF REU Program at the level of $50,000 per year. For the *BFRL SURF Program,* the NIST Building and Fire Laboratory anticipates receiving funding as a NSF REU Program at the level of $50,000 per year. for the *EEEL SURF Program,* the NIST Electronics and Electrical Engineering Laboratory anticipates receiving funding as a NSF REU Program at the level of $50,000 per year. It is anticipated that the funding for the *MSEL, MEL, ITLBFRL, and EEEL SURF Programs* will provide for the costs of subsistence, travel and lodging, and the conference attendance of eight students for each program. The actual number of awards made under this announcement will depend on the level of cost sharing by academic partners.

For all SURF Programs described in this notice, it is expected that individual awards to institutions will range from approximately $3,000 to $70,000.

Proposal Review Process and Evaluation Criteria: The PL, MSEL, MEL, ITL, BFRL, and EEEL SURF Programs conduct an initial screening of all proposals received by the deadline for incomplete or non-responsive applications, which will be returned to the applicants. All proposals will then be reviewed and ranked by a panel of three NIST scientists appointed by the Program Directors on the basis of the evaluation criteria. Proposals should include the following:

(A) Student Information:

(1) student application information cover sheet:

(2) official transcript for each student nominated for participation (students must have a recommended G.P.A. of 3.0 or better, out of a possible 4.0);

(3) a personal statement from each student and statement of commitment to participate in the 2001 SURF program, including a description of the student's prioritized research interests;

(4) a resume for each student; and

(5) two letters of recommendation for each student.

(B) Information About the Applicant Institution:

(1) description of the institution's education and research philosophy, faculty interests, on-campus research program(s) and opportunities, and overlapping research interests of NIST and the institution; and

(2) a statement addressing issues of academic credit and cost sharing.

For the PL, MSEL, MEL, ITL, BFRL, and EEEL SURF Programs, the evaluation criteria are:

Evaluation of Student's Academic Ability and Commitment to Program Goals (70%): Includes, but is not limited to, evalution of the following completed course work; expressed research interest; prior research experience, grade point average in courses relevant to program, career plans, honors and activities.

Evaluation of Applicant Institution's Commitment to Program Goals (30%): Includes, but is not limited to, evaluation of the following: institution's focus on AMO physics, materials science, manufacturing research and all of its components, including but not limited to engineering, computer science, physics, electrical engineering, and mathematics; overlap between research interests of the institution and NIST; emphasis on undergraduate hands-on research; undergraduate participation in research conferences/programs; on-campus research facilities; part participation by students/institution in such programs; and commitment to educate women, minorities, and persons with disabilities. In the spirit of a true partnership, successful applicant institutions will be encouraged to contribute some partial support to the program. A suggested level of participation would be: to directly cover (partially or entirely) student travel (one round trip common carrier) or lodging costs (approximately $2,200); total coverage of indirect costs and/or fringe benefits (NIST will not authorize funds for indirect costs of fringe benefits); a stated intent to support the participating student(s) at a research conference; and/or awarding of academic credit for the student research.

In recommending applications for funding, the program's selecting official will take into consideration the results of the panel's evaluations, including rank, the program objectives of the NIST laboratories as described above, and the selecting official's judgment as to which applications, when the slate is taken as a whole, are likely to best further the goals of the SURF Program. The level of cost sharing will not be considered in the award decision. The final approval of selected applications and award of cooperative agreements will be made by the NIST Grants Officer based on compliance with application requirements as published in this notice, compliance with applicable legal and regulatory requirements, and whether the recommended applicants appear to be responsible. Applicants may be asked to modify objectives, work plans, or budgets and provide supplemental information required by the agency prior to award. The decision of the Grants Officer is final.

Award Period: For the PL, MSEL, MEL, ITL, BFRL, and EEEL SURF Programs these programs are anticipated to run between May 21 through August 10, 2001; adjustments may be made to accommodate specific academic schedules (e.g., a limited number of 10-week cooperative agreements).

Matching Requirements: The PL, MSEL, MEL, ITL, BFRL, and EEEL SURF Programs encourage, but do not require, cost sharing.

Application Kit: For the PL, MSEL, MEL, ITL, BFRL, and EEEL SURF Programs, an application kit, containing all required forms and certifications, may be obtained by contacting Ms. Anita Sweigert, (301) 975–4200; websites for each program's application kit may be accessed through the following website: *http://www.surf.nist.gov.*

MSEL Grants Program

Dates: The MSEL Grants Program proposals must be received no later than the close of business September 30, 2001. Proposals received after June 30, 2001 will continue to be processed and considered for funding but may be funded in the next fiscal year, subject to the availability of funds. Each applicant must submit one signed original and two copies of each proposal along with a Grant Application. (Standard Form 424 REV. 7/97 and other required forms).

Addresses: For the MSEL Grants Program, submit one signed original and two copies of the proposal, clearly marked to identify the field of research to: Materials Science and Engineering Laboratory, Attn: Ms. Marlene Taylor, National Institute of Standards and Technology, 100 Bureau Drive, Stop 8501, Building 223, Room A305, Gaithersburg, Maryland 20899–8501, Tel: (301) 975–5653, E-mail: marlene.taylor@nist.gov.

Authority: The authority for the *MSEL Grants Program* is as follows: As authorized under 15 U.S.C. 272(b) and (c), the MSEL conducts a basic and applied research program directly and through grants and cooperative agreements to eligible recipients.

Program Description and Objectives: All proposals submitted to the MSEL Grants Program must be in accordance with the program objectives listed below. The appropriate Program Manager for each field of research may be contacted for clarification of the program objectives.

I. Ceramics Division, 852—The primary objective is to supplement division activities in the area of ceramic processing, tribology, composites, machining, interfacial chemistry, and microstructural analysis. The contact person for this division is: Dr. Ronald Munro and he may be reached at (301) 975–6127 or by e-mail at ronald.munro@nist.gov.

II. Polymers Division, 854—The primary objective is to support division programs in electronic materials, biomaterials, multiphase materials and processing characterization through participation in research on metrology, synthesis, processing and characterization of structure, mechanical, thermal and electrical properties. The contact person for this division is: Dr. Bruno Fanconi and he may be reached at (301) 975–6769 or by e-mail at bruno.fanconi@nist.gov.

III. Metallurgy Division, 855—The primary objective is to develop techniques to predict, measure and control transformations, phases, microstructure and kinetic processes as well as mechanical, physical and chemical properties in metals and their alloys. The contact person for this division is: Dr. Robert Schaefer and he may be reached at (301) 975–5961 or by e-mail at robert.schaefer@nist.gov.

IV. NIST Center for Neutron Research, 856—The primary objective is to develop high resolution cold and thermal neutron scattering research approaches and related physics, chemistry, macromolecular and materials applications. The contact person for this division is: Dr. John J. Rush and he may be reached at (301) 975–6231 or by e-mail at john.rush@nist.gov.

Eligibility: The MSEL Grants Program will be open to institutions of higher

education; hospitals; non-profit organizations; commercial organizations; state, local, and Indian tribal governments; foreign governments; organizations under the jurisdiction of foreign governments; and international organizations.

Funding Availability: In fiscal year 2001, the MSEL Grants Program anticipates funding of approximately $2,500,000, including new awards and continuing projects. Most grants and cooperative agreements are expected to be in the $25,000 to $100,000 per year range.

Proposal Review Process and Evaluation Criteria: For the MSEL Grants Program proposals will be reviewed in a two-step process. First, at least three independent, objective individuals knowledgeable about the particular scientific area described in the section above that the proposal addresses will conduct a technical review of proposals, as they are received on a rolling basis, based on the evaluation criteria. Second, the Division Chief or Center Director will make application selections. In making application selections, the Division Chief or Center Director will take into consideration the results of the reviewer's evaluations, the compatibility of the applicant's proposal with the program objectives of the particular division or center that the proposal addresses, and the Division Chief or Center Director's judgment as to whether the application is likely to further the objectives of the MSEL Grants Program. These objectives are described above in the ''Program Objectives'' section. The final approval of selected applications and award of financial assistance will be made by the NIST Grants Officer based on compliance with application requirements as published in this notice, compliance with applicable legal and regulatory requirements, and whether the recommended applicants appear to be responsible. Applicants may be asked to modify objectives, work plans, or budgets and provide supplemental information required by the agency prior to award. The decision of the Grants Officer is final.

For the MSEL Grants Program, the evaluation criteria the technical reviewers will use in evaluating the proposals are as follows:

1. *Rationality.* Reviewers will consider the coherence of the applicant's approach and the extent to which the proposal effectively addresses scientific and technical issues.

2. *Qualification of Technical Personnel.* Reviewers will consider the professional accomplishments, skills, and training of the proposed personnel to perform the work in the project.

3. *Resources Availability.* Reviewers will consider the extent to which the proposer has access to the necessary NIST or other facilities and overall support to accomplish project objectives.

4. *Technical Merit of Contribution.* Reviewers will consider the potential technical effectiveness of the proposal and the value it would contribute to the field of materials science and engineering and neutron research.

Each of these factors will be given equal weight in the evaluation process.

Award Period. For the MSEL Grants Program, proposals will be considered for research projects from one to three years. When a proposal for a multi-year award is approved, funding will generally be provided for only the first year of the program. If an application is selected for funding, NIST has no obligation to provide any additional funding in connection with that award. Continuation of an award to increase funding or extend the period of performance is at the total discretion of NIST. Funding for each subsequent year of a multi-year proposal will be contingent upon satisfactory progress, continued relevance to the mission of the MSEL program, and the availability of funds. The multi-year awards must have scopes of work that can be easily separated into annual increments of meaningful work that represent solid accomplishments if prospective funding is not made available to the applicant, (*i.e.,* the scopes of work for each funding period must produce identifiable and meaningful results in and of themselves).

Matching Requirements: The MSEL Grants Program does not require any matching funds.

Application Kit: For the MSEL Grants Program, an application kit, containing all required application forms and certifications is available by contacting Ms. Marlene Taylor, (303) 975–5653.

Fire Research Grants Program

Dates: The Fire Research Grants Program proposals must be received no later than the close of business September 30, 2001. Proposals received after June 30, 2001 will continue to be processed and considered for funding but may be funded in the next fiscal year, subject to the availability of funds.

Addresses: For the Fire Research Grants Program submit one signed original and two copies of the proposal to: Building and Fire Research Laboratory (BFRL), Attn.: Ms. Sonya Parham, National Institute of Standards and Technology, 100 Bureau Drive, Stop 8602, Gaithersburg, Maryland 20899–8602, Tel: (301) 975–6854, E-mail: *sonya.parham@nist.gov*, Website: http://www.bfrl.nist.gov.

Authority: As authorized by 15 U.S.C. 278f, the NIST Building and Fire Research Laboratory conducts directly and through grants and cooperative agreements, a basic and applied fire research program.

Program Description and Objectives: The program description and objectives for the Fire Research Grants Program are as follows:

A. *Fire Dynamics:* To develop understanding and predictive methods for dynamic fire phenomena to advance fire science and engineering practice. To perform research to understand the heat and mass transfer processes occurring in fires in order to improve predictions of the growth, spread, suppression, and emissions from fires of all scales. Experiments and metrology are developed and used to develop, support, and verify advanced computer simulations of fire phenomena, fire hazards, fire protection, and fire fighting.

B. *Large Fire Research:* To develop understanding of the behavior, prevention, and control of large fires through measurement, prediction and demonstration. This includes new understanding and technology related to: fire suppression and control, fire fighting operations, burning characteristics of assemblies, thermal and chemical emissions, smoke transport processes; fire modeling; fire investigations; fire suppression agents; use of combustion for environmental cleanup; and field measurement of both structural and unconfined fires. To perform research the results of which are used in fire fighting, fire protection, fire investigation, and construction to reduce the impact of fire on people, property, and the environment.

C. *Fire Safety Systems:* To perform research and development and demonstrate the advanced fire safety systems that utilize deterministic fire modeling. These systems are intended to enhance the quality, reliability, and accuracy of data and predictions available to quantify fire events with applications to buildings, fire protection systems, transportation systems and vehicles, training, fire fighting, fire investigations, and codes and standards. To perform research to advance the capabilities of fire models and their applications, including: developing methods to assess fire hazard and risk; creating advanced, usable models for the calculation of building fires and their effect on the environment and structure; integrating fire models with

building control and fire alarm systems, developing advanced information systems for fire fighters; developing a protocol for determining the accuracy of algorithms and comprehensive models; developing data bases to facilitate use of fire models; and advancing the concepts of performance-based engineering.

D. *Advanced Fire Measurements:* To produce the scientific basis and robust measurement methods for characterizing fires and their effluents at full- and reduced-scales. This includes discrete point, volume-integrated, and time- and space-resolved measurements for such properties as temperature, smoke density, chemical species, and flow velocity. Laboratory and computational research are also performed to understand the underpinning fire phenomena to ensure the soundness of the developed measurement techniques.

E. *Materials Fire Research*: To perform research enabling the confident development by industry of new, less-flammable materials and products. This capability is based on understanding fundamentally the mechanisms that control the ignition, flame spread and burning rate of materials, as well as and the chemical and physical characteristics that affect these aspects of flammability. This includes: developing methods of measuring the response of a material to fire conditions that enable assured prediction of the full-scale performance of the final product; developing computational molecular dynamics and other mechanistic approaches to understand flame retardant mechanisms and the effects of polymer chemical structure on flammability; characterizing the burning rates of charring and non-charring polymers and composites; and delineating and modeling the enthalpy and mass transfer mechanisms of materials combustion.

F. *Fire Sensing and Extinguishment*: To develop understanding, metrology and predictive methods to enable high-performance fire sensing and extinguishment systems; and devising new approaches to minimize the impact of unwanted fires and the suppression process. This includes: performing research for the identification and in-situ measurement of the symptoms of pending and nascent fires and the consequences of suppression; devising or adapting monitors for these variables and the intelligence for timely interpretation of the data; developing methods to characterize the performance of new approaches to fire detection and suppression; determining mechanisms for deflagration and detonation suppression by advanced agents and principles for their optimal use; and modeling the extinguishment process.

Eligibility: The Fire Research Grants Program will be open to institutions of higher education; hospitals; non-profit organizations; commercial organizations; state, local, and Indian tribal governments; foreign governments; organizations under the jurisdiction of foreign governments; and international organizations. Immediate family members of NIST Building and Fire Research Laboratory (BFRL) staff are ineligible for support from the Fire Research Grants Program.

Funding Availability: For the Fire Research Grants Program, the annual budget is approximately $700 thousand. Because of commitments for the support of multi-year projects, only a portion of the budget is available to initiate new programs in any one year. Most grants and cooperative agreements are in the $10,000 to $100,000 per year range.

Proposal Review Process and Evaluation Criteria: For the Fire Research Grants Program, all proposals are assigned, as received on a rolling basis, to the appropriate group leader of the six programs listed above in program description and objectives. Proposals are evaluated for technical merit based on the evaluation criteria by at least three reviewers chosen from NIST professionals, technical experts from other interested government agencies, and experts from the fire research community at large. Both the technical value of the proposal and the relationship of the work proposed to the needs of the specific program are taken into consideration in the group leader's recommendation to the Division Chief. In making the final application selections, the Division Chief will take into consideration the results of the evaluations, the scores of the reviewers, the group leader's recommendation, and the Division Chief's judgment as to whether the application is likely to further the objectives of the Fire Research Grants Program, as described above. The final approval of selected applications and award of financial assistance will be made by the NIST Grants Officer based on compliance with application requirements as published in this notice, compliance with applicable legal and regulatory requirements, and whether the recommended applicants appear to be responsible. Applicants may be asked to modify objectives, work plans, or budgets and provide supplemental information required by the agency prior to award. The decision of the Grants Officer is final. Applicants should allow up to 90 days processing time.

For the Fire Research Grants Program, the technical evaluation criteria includes the following:

a. *Technical quality of the research.* Reviewers will assess the rationality, innovation and imagination of the proposal and the fit to NIST's in-house fire research program. (0–35 points)

b. *Potential impact of the results.* Reviewers will assess the potential impact and the technical application of the results to our in-house programs and the fire safety community. (0–25 points)

c. *Staff and institution capability to do the work.* Reviewers will evaluate the quality of the facilities and experience of the staff to assess the likelihood of achieving the objective of the proposal. (0–20 points)

d. *Match of budget to proposed work.* Reviewers will assess the budget against the proposed work to ascertain the reasonableness of the request. (0–20 points)

Award Period: For the Fire Research Grants Program, proposals will be considered for research projects from one to three years. When a proposal for a multi-year project is approved, funding will initially be provided for only the first year of the program. If an application is selected for funding, DoC has no obligation to provide any additional future funding in connection with that award. Funding for each subsequent year of a multi-year proposal will be contingent on satisfactory progress, continuing relevance to the mission of the NIST Fire Research program, and the availability of funds.

Matching Requirements: The Fire Research Grants Program does not require any matching funds.

Application Kit: For the Fire Research Grants Program, an application kit, containing all required application forms and certifications is available by contacting Ms. Sonya Parham, (301) 975–6854, website: http://www.bfrl.nist.gov.

Physics Laboratory Grants Program

Dates: The Physics Laboratory Grants Program proposals must be received no later than the close of business September 30, 2001. Proposals received after June 30, 2001 will continue to be processed and considered for funding but may be funded in the next fiscal year, subject to the availability of funds.

Addresses: For the Physics Laboratory Grant Program applicants are requested to submit one signed original and two copies of the proposal clearly marked to identify the field of research to: Attn. Ms. Anita Sweigert, National Institute of Standards and Technology, 100 Bureau

Drive, Stop 8400, Gaithersburg, MD. 20899–8400, Tel (301) 975–4200, E-Mail: *anita.sweigert@nist.gov.*

Authority: As authorized under 15 U.S.C. 272 (b) and (c), the Physics Laboratory conducts a basic and applied research program directly and through grants and cooperative agreements to eligible recipients.

Program Description and Objectives: All proposals submitted to the Physics Laboratory Grants Program must be in accordance with the program objectives listed below. The appropriate Program Manager for each field of research may be contacted for clarification of the program objectives.

I. Electron and Optical Physics Division, 841—The primary objective is to supplement division activities in characterization of nanometer-scale electronic and magnetic structures, characterization of EUV optical components to support semiconductor lithography and ultraviolent radiometric metrology. The contact person for this division is: Dr. Charles W. Clark and he may be reached at (301) 975–3709.

II. Atomic Physics Division, 842—The primary objective is to support division programs aimed at determining basic atomic properties and developing new metrology techniques in atomic spectroscopy, quantum processes, plasma radiation, laser cooling and trapping, and quantum metrology. The contact person for this division is: Dr. Wolfgang L. Wiese and he may be reached at (301) 975–3200.

III. Optical Technology Division, 844—The primary objective is to develop improve and maintain national standards for radiation thermometry, spectroradiometry, photometry, and spectrophotometry as well as conduct basic theoretical and experimental research on the photophysical and photochemical properties of materials, in radiometric and spectroscopic techniques and instrumentation, and in the application of optical technologies. The contact person for this division is: Dr. Albert C. Parr and he may be reached at (301) 975–2316.

IV. Ionizing Radiation Division, 846—The primary objective is to provide primary standards and measurement methods and technology to support the division's work in meeting national needs in radiation interactions and dosimetry, neutron interactions, dosimetry and radioactivity including both theoretical/experimental and applied research programs. The contact person for this division is: Dr. Bert M. Coursey and he may be reached at (301) 975–5584.

V. Time and Frequency Division, 847—The primary objective is to supplement division basic and applied research programs in the areas of phase noise measurements, network synchronization, ion storage, atomic standards and optical frequency measurements in support of future standards, dissemination services, and measurement methods. The contact person for this division is: Dr. Donald B. Sullivan and he may be reached at (303) 497–3772.

Eligibility: The Physics Laboratory Grants Program will be open to institutions of higher education; hospitals; non-profit organizations; commercial organizations; state, local, and Indian tribal governments; foreign governments; organizations under the jurisdiction of foreign governments; and international organizations.

Funding Availability: In fiscal year 2001, the Physics Laboratory anticipates funding of approximately $1,400,000, which may be increased to approximately $2,000,000 should additional funding become available, including new awards and continuing projects. Individual awards are expected to range from approximately $5,000 to $250,000.

Proposal Review Process and Evaluation Criteria: For the Physics Laboratory Grants Program, proposals will be reviewed in a two-step process. First, at least three independent, objective individuals knowledgeable about the particular scientific area described in the section above that the proposal addresses will conduct a technical review of each proposal, based on the evaluation criteria described below. Reviews will be conducted on a monthly basis, and all proposals received during the month will be ranked based on the reviewers' scores. Second, the Division Chief will make final application selections. In making application selections, the Division Chief will take into consideration the results of the reviewers' evaluations, the compatibility of the applicant's proposal with the program objectives of the particular division or center that the proposal addresses, and the Division Chief's judgment as to whether the application is likely to further the objectives of the Physics Laboratory Grants Program. These objectives are described above in the ''Program Objectives'' section. The final approval of selected applications and award of financial assistance will be made by the NIST Grants Officer based on compliance with application requirements as published in this notice, compliance with applicable legal and regulatory requirements, and whether the recommended applicants appear to be responsible. Applicants may be asked to modify objectives, work plans, or budgets and provide supplemental information required by the agency prior to award. The decisions of the Grants Officer are final.

For the Physics Laboratory Grants Program, the evaluation criteria the technical reviewers will use in evaluating the proposals are as follows:

1. *Rationality.* Reviewers will consider the coherence of the applicant's approach and the extent to which the proposal effectively addresses scientific and technical issues.

2. *Qualifications of Technical Personnel.* Reviewers will consider the professional accomplishments, skills,and training of the proposed personnel to perform the work in the project.

3. *Resources Availability.* Reviewers will consider the extent to which the proposer has access to the necessary NIST or other facilities and overall support to accomplish project objectives.

4. *Technical Merit of Contribution.* Reviewers will consider the potential technical effectiveness of the proposal and the value it would contribute to the field of physics.

Each of these factors will be given equal weight in the evaluation process.

Award Period: For the Physics Laboratory Grant Program, proposals will be considered for research projects from one to three years. When a proposal for a multi-year project is approved, funding will generally be provided for only the first year of the program. If an application is selected for funding, NIST has no obligation to provide any additional funding in connection with that award. Continuation of award to increase funding or extend the period of performance is at the total discretion of NIST. Funding for each subsequent year of a multi-year proposal will be contingent upon satisfactory progress, continued relevance to the mission of the Physics Laboratory program, and the availability of funds. The multi-year awards must have scopes of work that can be easily separated into annual increments of meaningful work that represent solid accomplishments if prospective funding is not made available to the applicant, (*i.e.*, the scopes of work for each funding period must produce the identifiable and meaningful results in and of themselves).

Matching Requirements: The Physics Laboratory Grants Program does not require any matching funds.

Application Kit: For the Physics Laboratory Grants Program, an application kit, containing all required

application forms and certifications is available by contacting Ms. Anita Sweigert, (301) 975–4201.

Chemical Science and Technology Laboratory Grants Program

Dates: The Chemical Science and Technology Laboratory Grant Program proposals must be received no later than the close of business September 30, 2001. Proposals received after June 30, 2001 will continue to be processed and considered for funding but may be funded in the next fiscal year, subject to the availability of funds.

Addresses: For the Chemical Science and Technology Laboratory Grant Program applicants are requested to submit one signed original and two copies of the proposal clearly marked to identify the field of research to: Attn. Dr. William F. Koch, National Institute of Standards and Technology, 100 Bureau Drive, Stop 8300, Gaithersburg, MD. 20899–8300, Tel (301) 975–8301, E–Mail: *william.koch@nist.gov*.

Authority: As authorized under 15 U.S.C. 272(b) and (c), the Chemical Science and Technology Laboratory conducts a basic and applied research program directly and through grants and cooperative agreements to eligible recipients.

Program Description and Objectives: All proposals submitted to the Chemical Science and Technology Laboratory Grants Program must be in accordance with the program objectives listed below. The appropriate Program Manager for each field of research may be contacted for clarification of the program objectives.

I. Biotechnology Division, 831—The primary objective is to advance the commercialization of biotechnology by developing the scientific/engineering technical base, reliable measurements, standards, data and models to enable U.S. industry to quickly and economically produce biochemical products with appropriate quality control. The contact person for this division is: Dr. Gary L. Gilliland, and he may be reached at (301) 975–2629.

II. Process Measurement Division, 836—The primary objective is to develop and provide measurement standards and services, measurement techniques, recommended practices, sensing technology, instrumentation, and mathematical models required for analysis, control, and optimization of industrial processes. The Division's research seeks fundamental understanding of, and generates key data pertinent to, chemical process technology. These efforts include the development and validation of data-predictive computational tools and correlation's, computer simulations of processing operations, and provision of requisite chemical, physical, and engineering data. The contact person for this division is: Dr. James R. Whetstone, and he may be reached at (301) 975–2609.

III. Surface and Microanalysis Science Division, 837—The primary objective is to promote U.S. economic growth, safety, health, and environmental quality by working with industry, other government agencies, and standards organizations to develop and apply key technologies, measurements, and standards for spatially and temporally resolved chemical characterization. The contact person for this division is: Dr. Richard R. Cavanagh, and he may be reached at (301) 975–2368.

IV. Physical and Chemical Properties Division, 838—The primary objective is to be the Nation's reference laboratory for measurements, standards, data, and models for, the thermophysical and thermochemical properties of gases, liquids, and solids—both pure materials and mixtures. The rates and mechanisms of chemical reactions in the gas and liquid phases, fluid-based physical processes and systems, including separations, low-temperature refrigeration, and low-temperature heat transfer and flow. The contact person for this division is: Dr. Mickey Haynes, and he may be reached at (303) 497–3247.

V. Analytical Chemistry Division, 839—The primary objective is to serve as the Nation's reference laboratory for chemical measurements and standards to enhance U.S. industry's productivity and competitiveness, assure equity in trade, and provide quality assurance for chemical measurements used for assessing and improving public health, safety, and the environment. The contact person for this division is: Dr. Willie E. May, and he may be reached at (301) 975–3108.

Eligibility: The Chemical Science and Technology Laboratory Grants Program will be open to institutions of higher education; hospitals; non-profit organizations; commercial organizations; state, local, and Indian tribal governments; foreign governments; organizations under the jurisdiction of foreign governments; and international organizations.

Funding Availability: In fiscal year 2001, the Chemical Science and Technology Laboratory anticipates funding of approximately $1,000,000. Individual awards are expected to range from approximately $5,000 to $100,000.

Proposal Review Process and Evaluation Criteria: For the Chemical Science and Technology Laboratory Grants Program, proposals will be reviewed in a two-step process. First, at least three independent, objective individuals knowledgeable about the particular scientific area described in the section above that the proposal addresses will conduct a technical review of each proposal, based on the evaluation criteria described below. Reviews will be conducted on a monthly basis, and all proposals received during the month will be ranked based on the reviewers' scores. Second, the Division Chief will make application selections. In making application selections, the Division Chief will take into consideration the results of the reviewers' evaluations, the compatibility of the applicants' proposal with the program objectives of the particular division or center that the proposal addresses, and the Division Chief's judgment as to whether the application is likely to further the objectives of the Chemical Science and Technology Laboratory Grants Program. These objectives are described above in the ''Program Objectives'' section. The final approval of selected applications and award of financial assistance will be made by the NIST Grants Officer based on compliance with application requirements as published in this notice, compliance with applicable legal and regulatory requirements, and whether the recommended applicants appear to be responsible. Applicants may be asked to modify objectives, work plans, or budgets and provide supplemental information required by the agency prior to award. The decisions of the Grants Officer are final.

For the Chemical Science and Technology Laboratory Grants Program, the evaluation criteria the technical reviewers will use in evaluating the proposals are as follows:

1. *Rationality.* Reviewers will consider the coherence of the applicant's approach and the extent to which the proposal effectively addresses scientific and technical issues.

2. *Qualifications of Technical Personnel.* Reviewers will consider the professional accomplishments, skills, and training of the proposed personnel to perform the work in the project.

3. *Resources Availability.* Reviewers will consider the extent to which the proposer has access to the necessary NIST or other facilities and overall support to accomplish project objectives.

4. *Technical Merit of Contribution.* Reviewers will consider the potential technical effectiveness of the proposal and the value it would contribute to the field of chemistry.

Each of these factors will be given equal weight in the evaluation process.

Award Period: For the Chemical Science and Technology Laboratory Grant Program, proposals will be considered for research projects from one to three years. When a proposal for a multi-year award is approved, funding will generally be provided for only the first year of the program. If an application is selected for funding, NIST has no obligation to provide any additional funding in connection with that award. Continuation of an award to increase funding or extend the period of performance is at the total discretion of NIST. Funding for each subsequent year of a multi-year proposal will be contingent upon satisfactory progress continued relevance to the mission of the Chemical Science and Technology Laboratory program, and the availability of funds. The multi-year awards must have scopes of work that can be easily separated into annual increments of meaningful work that represent solid accomplishments if prospective funding is not made available to the applicant (*i.e.* the scopes of work for each funding period must produce identifiable and meaningful results in and of themselves).

Matching Requirements: The Chemical Science and Technology Laboratory Grants Program does not require any matching funds.

Contact: For information on the Chemical Science and Technology Laboratory Grants Program, please contact Dr. William Koch, (301) 975–8301.

Manufacturing Engineering Laboratory (MEL) Grants Program

Dates: The MEL Grants Program proposals must be received no later than the close of business September 30, 2001. Proposals received after June 30, 2001 will continue to be processed and considered for funding but may be funded in the next fiscal year, subject to the availability of funds. Each applicant must submit one signed original and two copies of each proposal along with a Grant Application (Standard Form 424 REV. 7/97 and other required forms).

Addresses: For the MEL Grants Program, submit one signed original and two copies of the proposal, clearly marked to identify the field of research, to: Manufacturing Engineering Laboratory, Attn: Mrs. Barbara Horner, National Institute of Standards and Technology, 100 Bureau Drive, Stop 8200, Building 220, Room B322, Gaithersburg, Maryland 20899–8200, Tel: (301) 975–3400, E-mail: *barbara.horner@nist.gov.*

Authority: As authorized under 15 U.S.C. 272(b) and (c), the MEL conducts a basic and applied research program directly and through grants and cooperative agreements to eligible recipients.

Program Description and Objectives: All proposals submitted must be in accordance with the program objectives listed below. The appropriate Program Manager for each field of research may be contacted for clarification of the program objectives.

I. Precision Engineering Division, 821—The primary objective is to support laboratory programs in the areas of Engineering Metrology, Large-Scale Metrology, Nanometer-Scale Metrology, and Surface Metrology. The contact person for this division is: Dr. Dennis Swyt, and he may be reached at (301) 975–3463; dennis.swyt@nist.gov.

II. Manufacturing Metrology Division, 822—The primary objective is to support laboratory programs in Machining Systems; Mechanical Metrology; Advanced Optics Metrology; and Sensors, Interfaces, Predictive Process Engineering; and Networks for Metrology and Manufacturing. The contact person for this division is: Dr. E. Clayton Teague, and he may be reached at (301) 975–6600; clayton.teague@nist.gov.

III. Intelligent Systems Division, 823—The primary objective is to support laboratory programs in Intelligent Open Architecture Control of Manufacturing Systems, Intelligent Controls of Mobility Systems, and Intelligent Systems. The contact person for this division is: Dr. John M. Evans, and he may be reached at (301) 975–3418; j.evans@nist.gov.

IV. Manufacturing Systems Integration Division, 826—The primary objective is to support laboratory programs in Information Technology Metrology for Manufacturing, Manufacturing Enterprise Engineering, Manufacturing Simulation and Visualization, Product Engineering, and Nano-manufacturing. The contact person for this division is: Dr. Steven R. Ray, and he may be reached at (301) 975–3508; steven.ray@nist.gov.

Eligibility: The MEL Grants Program will be open to institutions of higher education; hospitals; non-profit organizations; commercial organizations; state, local, and Indian tribal governments; foreign governments; organizations under the jurisdiction of foreign governments; and international organizations.

Funding Availability: In fiscal year 2001, MEL Grants Program anticipates funding of approximately $750,000, including new awards and continuing projects. Individual awards are expected to range from approximately $25,000 to $300,000.

Proposal Preview and Evaluation Criteria: The MEL Grants Program will conduct an initial screening for incomplete or non-responsive applications, which will be returned to the applicants. Proposals will then be reviewed in a two-step process. First, at least three independent, objective individuals knowledgeable about the particular scientific area described in the section above that the proposal addresses will conduct a technical review of proposals, based on the evaluation criteria described below. Reviews will be conducted no less than once per quarter, and all proposals since the last review session will be ranked based on the reviewers' scores. Second, the Division Chief or Laboratory Director will make application selections. In making application selections, the Division Chief or Laboratory Director will take into consideration the results of the reviewers' evaluations, the compatibility of the applicant's proposal with the program objectives of the particular division that the proposal addresses, and the Division Chief's or Laboratory Director's judgment as to whether the application is likely to further the objectives of the MEL Grants Program. These objectives are described above in the Program Objectives. The final approval of selected applications and award of financial assistance will be made by the NIST Grants Officer based on compliance with application requirements as published in this notice, compliance with applicable legal and regulatory requirements, and whether the recommended applicants appear to be responsible. Applicants may be asked to modify objectives, work plans, or budgets and provide supplemental information required by the agency prior to award. The decision of the Grants Officer is final.

For the MEL Grants Program, the evaluation criteria the technical reviewers will use in evaluating the proposals are as follows:

1. *Rationality.* Reviewers will consider the coherence of the applicant's approach and the extent to which the proposal effectively addresses scientific and technical issues.

2. *Technical Merit of Contribution.* Reviewers will consider the potential technical effectiveness of the proposal and the value it would contribute to the field of manufacturing engineering and metrology research.

3. *Qualifications of Technical Personnel.* Reviewers will consider the professional accomplishments, skills, and training of the proposed personnel to perform the work in the project.

4. *Resources Availability.* Reviewers will consider the extent to which the proposer has access to the necessary NIST or other facilities and overall support to accomplish project objectives.

Each of these factors will be given equal weight in the evaluation process.

Award Period: For the MEL Grants Program, proposals will be considered for research projects from one to three years. When a proposal for a multi-year award is approved, funding will generally be provided for only the first year of the program. If an application is selected for funding, NIST has no obligation to provide any additional funding in connection with that award. Continuation of an award to increase funding or extend the period of performance is at the total discretion of NIST. Funding for each subsequent year of a multi-year proposal will be contingent upon satisfactory progress, continued relevance to the mission of the MEL program, and the availability of funds. The multi-year awards must have scopes of work that can be easily separated into annual increments of meaningful work that represent solid accomplishments if prospective funding is not made available to the applicant, (*i.e.,* the scopes of work for each funding period must produce identifiable and meaningful results in and of themselves).

Matching Requirements: The MEL Grants Program does not require any matching funds.

Application Kit: An application kit, containing all required application forms and certifications is available by electronic mail to: Mrs. Barbara Horner, *barbara.horner@nist.gov.* Alternatively, Mrs. Horner can be contacted at (301) 975–3400.

Electronics and Electrical Engineering (EEEL) Grants Program

Dates: The Electronics and Electrical Engineering Grants Program proposals must be received no later than the close of business September 30, 2001. Proposals received after June 30, 2001 will continue to be processed and considered for funding but may be funded in the next fiscal year, subject to the availability of funds.

Addresses: For the Electronics and Electrical Engineering Grants Program, submit one signed original and two copies of the proposal package to: Electronics and Electrical Engineering Laboratory, Attn.: D.J. Hamilton, National Institute of Standards and Technology, 100 Bureau Drive, Stop 8100, Gaithersburg, MD 20899–8100, Tel.: (301) 975–2227, Fax: (301) 975–4091.

Authority: As authorized by 15 U.S.C. 272(b) and (c), the NIST Electronnics and Electrical Engineering Laboratory conducts a basic and applied research program directly and through grants and cooperative agreements to eligible recipients.

Program Description and Objectives: The Electronics and Electrical Engineering Grants Program solicits proposals in support of the broad program objectives identified below.

The Electronics and Electrical Engineering Grants Program supports the formal mission of the associated Laboratory: The Electronics and Electrical Engineering Laboratory promotes U.S. economic growth by providing measurement capability of high impact focused primarily on the critical needs of the U.S. electronics and electrical industries, and their customers and suppliers.

More specifically, the Electronics and Electrical Engineering Grants Program solicits proposals to support specific programs in the areas of metrology for semiconductors (including mainstream silicon, power devices, and compound semiconductors), superconductors (including cryoelectronics and bulk superconductors), electronic instrumentation, radio-frquency technology (including microwave and millimeter-wave, antennas, and electromagnetic compatibility/interference), optoelectronics, magnetics (including bulk magnetic materials and magnetic data storage), video (including flat-panel displays), electronic commerce as applied to electronic products and devices, the transmission and distribution of electrical power, national electrical standards (fundamental, generally quantum-based physical standards), and law enforcement (clothing, communication systems, emergency equipment, investigative aids, protective equipment, security systems, vehicles, speed-measuring equipment, weapons, and analytical techniques and standard reference materials used by the public safety community).

For details on these various activities, please see the Electronics and Electrical Engineering Laboratory website at *http://www.eeel.nist.gov.* Note that documents describing the current programs for the five technical divisions and two offices are available through the home page.

Technical contacts for these areas are:

Semiconductors

Semiconductor Electronics Division—Division Chief: Dr. David G. Seiler; (301) 975–2054; *david.seiler@nist.gov*

Office of Microelectronics Programs—Director: Dr. Stephen Knight; (301) 975–4400; *stephen.knight@nist.gov*

Superconductors (bulk); Magnetics

Laboratory Acting Deputy Director: Dr. Alan H. Cookson; (301) 975–2220; *alan. cooson@nist.gov*

Superconductors (cryoelectronics); National electrical standards (Josephson array development)

Electromagneteic Technology Division—Division Chief: Dr. Richard E. Harris; (303) 497–3678; *richard.harris@boulder.nist.gov*

Electronic instrumentation; Video; Electronic commerce; National electrical standards (other than Josephson array development)

Electricity Division—Division Chief: Dr. Bruce F. Field; (301) 975–2400; *bruce.field@nsit.gov*

Radio-frequency technology

Radio-Frequency Technology Division—Division Chief: Dr. Dennis S. Friday; (303) 497–3132; Friday@boulder.nist.gov

Optoelectronics

Optoelectronics Division; Office of Optoelectronics Programs—Division Chief and Office Director: Dr. Gordon W. Day; (303) 497–5432; *gwday@boulder.nist.gov*

Law Enforcement

Office of Law Enforcement Standards—Director: Dr. Kathleen Higgins; (301) 975–2757; *kathleen.higgins@nist.gov*

Eligibility: The Electronics and Electrical Engineering Grants Program is open to institutions of higher education; hospitals; non-profit organizations; commercial organizations; state, local, and Indian tribal governments; foreign governments; organizations under the jurisdiction of foreign governments; and international organizations.

Funding Availability: Over the past three years, the Electronics and Electrical Engineering laboratory funded a total of approximately $1,000,000 in grants and cooperative agreements. The amount available each year fluctuates considerably based on programmatic needs. Individual awards are expected to range between $5,000 and $150,000.

Proposal Review Process and Evaluation Criteria: For the Electronics and Electrical Engineering Grants Program, proposals will be distributed to the appropriate Division Chief or Office Director based on technical area by one or more technical professionals familiar with the programs of the

Electronics and Electrical Engineering Laboratory. The Divisions and Offices will be asked to score proposals based on the following criteria and weights:

Proposal addresses specific program or project need not met (25%)
Proposal provides evidence of applicant's expertise in relevant technical area (20%)
Proposal offers innovative approach (20%)
Proposal provides realistic schedule with defined milestones (20%)
Proposal provides adequate rationale for budget (15%)

Reviews will be conducted on a monthly basis during the first quarter, and quarterly thereafter, and all proposals received during the month or quarter will be ranked based on the reviewers' scores. Based on the reviewers' scores, recommendations of with the Division Chiefs and Office Directors, the availability of funding, and the Laboratory Director's judgment as to whether the application is likely to further the objectives of the Electronics and Electrical Engineering Grants Program, as described above, the Laboratory Director will provide recommendations to the NIST Grants Officer. The final approval of selected applications and award of financial assistance will be made by the NIST Grants Officer based on compliance with application requirements as published in this notice, compliance with applicable legal and regulatory requirements, and whether the recommended applicants appear to be responsible. Applicants may be asked to modify objectives, work plans, or budgets and provide supplemental information required by the agency prior to award. The decision of the Grants Officer is final. Applicants should allow up to 90 days processing time.

Award Period: For the Electronics and Electrical Engineering Grants Program, proposals will be considered for research projects from one to three years. When an proposal for a multi-year award is approved, funding will generally be provided for only the first year of the program. If an application is selected for funding, NIST has not obligation to provide any additional funding in connection with that award. Continuation of an award to increase funding or extend the period of performance is at the total discretion of NIST. Funding for each subsequent year of a multi-year proposal will be contingent upon progress, continued relevance to the mission of the Electronics and Electrical Engineering Grants Program, and the availability of funds. The multi-year awards must have scopes of work that can be easily separated into annual increments of meaningful work that represent solid accomplishments if prospective funding is not made available to the applicant, (*i.e.,* the scopes of work for each funding period must produce identifiable and meaningful results in and of themselves).

Matching Requirements. The Electronics and Electrical Engineering Grants Program does not require any matching funds.

Application Kit: An application kit, containing all required application forms and certifications is available by contacting: D.J. Hamilton, (301) 975–2227.

Additional Information: The following information is applicable to all programs described above.

Funding Availability: For all Financial Assistance programs listed above, awards are contingent on the availability of funds.

Catalog of Federal Domestic Assistance Name and Number: Measurement and Engineering Research and Standards—11.609.

For Further Information Contact: All grants administration questions concerning these programs should be directed to the NIST Grants Office at (301) 975–5718.

Application Kit: The application kit includes the following:

SF 424 (Rev 7/97)—Application for Federal Assistance
SF 424A (Rev 7/97)—Budget Information—Non-Construction Programs, including a detailed budget narrative explaining the details of each budget category and the basis for the cost. If indirect costs are included in the budget, a copy of the applicant's negotiated indirect cost rate must be submitted, if available.
SF 424B (Rev 7/97)—Assurances—Non-Construction Programs
CD 511 (7/91)—Certification Regarding Debarment, Suspension, and Other Responsibility Matters; Drug-free Workplace Requirements and Lobbying
CD 512 (7/91)—Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion—Lower Tier Covered Transactions and Lobbying
SF–LLL—Disclosure of Lobbying Activities
CD–346—Applicant for Funding Assistance

Paperwork Reduction Act: The Standard form 424 and other Standard Forms in the application kit are subject to the requirements of the Paperwork Reduction Act and have been approved by OMB under Control No. 0348–0043, 0348–0044, 0348–0040, and 0348–0046.

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with a collection, subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid OMB Control Number.

Research Projects Involving Human Subjects, Human Tissue, Data or Recordings Involving Human Subjects: Any proposal that includes research involving human subjects, human tissue, data or recordings involving human subjects must meet the requirements of the Common Rule for the Protection of Human Subjects, codified for the Department of Commerce at 15 CFR Part 27. In addition, any proposal that includes research on these topics must be in compliance with any statutory requirements imposed upon NIH and other federal agencies regarding these topics, all regulatory policies and guidance adopted by NIH, FDA, and other federal agencies on these topics, and all Presidential statements of policy on these topics.

The NIH recently released their guidelines on the use of human pluripotent stem cells derived from human embryos in research. The NIST is currently reviewing these guidelines. Until NIST has had the opportunity to fully assess the new guidelines and develop appropriate implementing procedures, NIST will not consider proposals that involve human pluripotent stem cells derived from human embryos for funding.

On December 3, 2000, the U.S. Department of Health and Human Services (DHHS) introduced a new Federalwide Assurance of Protection of Human Subjects (FWA). The FWA covers all of an institution's Federally-supported human subjects research, and eliminates the need for other types of Assurance documents. In anticipation of the new Assurance, the Office for Human Research Protections (OHRP) has suspended processing of multiple project assurance (MPA) renewals. All existing MPAs will remain in force until further notice. OHRP will continue to accept new single project assurances (SPAs) until approximately March 1, 2001. For information about FWAs, please see the OHRP website at *http://ohrp.osophs.dhhs.gov/whatsnew.htm.*

In accordance with the DHHS change, NIST will continue to accept the submission of human subjects protocols

that have been approved by Institutional Review Boards (IRBs) possessing a current, valid MPA from DHHS. NIST also will accept the submission of human subjects protocols that have been approved by IRBs possessing a current, valid FWA from DHHS. NIST will not issue an SPA for any IRB reviewing any human subjects protocol proposed to NIST.

Research Projects Involving Vertebrate Animals: Any proposal that includes research involving vertebrate animals must be in compliance with the National Research Council's ''Guide for the Care and Use of Laboratory Animals'' which can be obtained from National Academy Press, 2101 Constitution Avenue, NW., Washington, DC 20055. In addition, such proposals must meet the requirements of the Animal Welfare Act (7 U.S.C. 2131 *et seq.*), 9 CFR parts 1, 2, and 3, and if appropriate, 21 CFR part 58. These regulations do not apply to proposed research using pre-existing images of animals or to research plans that do not include live animals that are being cared for, euthanased, or used by the project participants to accomplish research goals, teaching, or testing. These regulations also do not apply to obtaining animal materials from commercial processors of animal products or to animal cell lines or tissues from tissue banks.

Matching Funds: Although many of the programs described in this notice do not require cost share, if it is determined that your proposal falls within the authority of 19 U.S.C. 2543–45 cost share will be required as follows:

Pursuant to 19 U.S.C. 2543–45, financial assistance shall not exceed 75 percent of such program or activity, when the primary purpose of such program or activity is—

(1) To increase the awareness of proposed and adopted standards-related activities;

(2) To facilitate international trade through the appropriate international and domestic standards-related activities;

(3) To provide adequate United States representation in international standards-related activities; and

(4) To encourage United States exports through increased awareness of foreign standards-related activities that may affect United States exports.

Type of Funding Instrument: The funding instrument will be a grant or cooperative agreement, depending on the nature of the proposed work. A grant will be used unless NIST is ''substantially involved'' in the project, in which case a cooperative agreement will be used. A common example of substantial involvement is collaboration between NIST scientists and recipient scientists or technicals. Further examples are listed in Section 5.03.d of Department of Commerce Administrative Order 203–26, which can be found at *http://www.osec.doc.gov/bmi/daos/203–26.htm.* NIST will make decisions regarding the use of a cooperative agreement on a case-by-case basis. Funding for contractual arrangements for services and products for delivery to NIST is not available under this announcement.

Additional Requirements

Primary Application Certifications: All primary applicant institutions must submit a completed form CD–511, ''Certifications Regarding Debarment, Suspension and Other Responsibility Matters; Drug-Free Workplace Requirements and Lobbying,'' and the following explanations must be provided:

1. *Nonprocurement Debarment and Suspension.* Prospective participants (as defined at 15 CFR Part 26, Section 105) are subject to 15 CFR Part 26, ''Nonprocurement Debarment and Suspension'' and the related section of the certification form prescribed above applies;

2. *Drug-Free Workplace.* Grantees (as defined at 15 CFR Part 26, Section 605) are subject to 15 CFR Part 26, Subpart F, ''Government wide Requirements for Drug-Free Workplace (Grants)'' and the related section of the certification form prescribed above applies;

3. *Anti-Lobbying.* Persons (as defined at 15 CFR Part 28, Section 105) are subject to the lobbying provisions of 31 U.S.C. 1352, ''Limitation on use of appropriated funds to influence certain Federal contracting and financial transactions,'' and the lobbying section of the certification form prescribed above applies to applications/bids for grants, cooperative agreements, and contracts for more than $100,000, and loans and loan guarantees for more than $150,000, or the single family maximum mortgage limit for affected programs, whichever is greater.

4. *Anti-Lobbying Disclosure.* Any applicant institution that has paid or will pay for lobbying using any funds must submit an SF–LLL, ''Disclosure of Lobbying Activities,'' as required under 15 CFR Part 28, Appendix B.

5. *Lower-tier Certifications.* Recipients shall require applicant/bidder institutions for subgrants, contracts, subcontracts, or other lower tier covered transactions at any tier under the award to submit, if applicable, a completed Form CD–512, ''Certifications Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transactions and Lobbying;'' and disclosure form, SF–LLL, ''Disclosure of Lobbying Activities.'' Form CD–512 is intended for the use of recipients and should not be transmitted to NIST. SF–LLL submitted by any tier recipient or subrecipient should be submitted to NIST in accordance with the instructions contained in the award document.

Name Check Reviews: All for-profit and non-profit applicants will be subject to a name check review process. Name checks are intended to reveal if any key individuals associated with the applicant have been convicted of or are presently facing, criminal charges such as fraud, theft, perjury, or other matters which significantly reflect on the applicant's management honesty or financial integrity. Form CD–346 must be completed for all personnel with key programmatic or fiduciary responsibilities.

Preaward Activities: Applicants (or their institutions) who incur any costs prior to an award being made do so solely at their own risk of not being reimbursed by the Government. Notwithstanding any verbal assurance that may have been provided, there is no obligation on the part of NIST to cover pre-award costs.

No Obligation for Future Funding: If an application is accepted for funding, DOC has no obligation to provide any additional future funding in connection with that award. Renewal of an award to increase funding or extend the period of performance is at the total discretion of NIST.

Past Performance: Unsatisfactory performance under prior Federal awards may result in an application not being considered for funding.

False Statements: A false statement on an application is grounds for denial or termination of funds, and grounds for possible punishment by a fine or imprisonment as provided in 18 U.S.C. 1001.

Delinquent Federal Debts: No award of Federal funds shall be made to an applicant who has an outstanding delinquent Federal debt until either:

1. The delinquent account is paid in full,

2. A negotiated repayment schedule is established and at least one payment is received, or

3. Other arrangements satisfactory to DoC are made.

Indirect Costs: Regardless of any approved indirect cost rate applicable to the award, the maximum dollar amount of allocable indirect costs for which the

DoC will reimburse the Recipient shall be the lesser of:

(a) the Federal Share of the total allocable indirect costs of the award based on the negotiated rate with the cognizant Federal agency as established by audit or negotiation; or

(b) the line item amount for the Federal share of indirect costs contained in the approved budget of the award.

For the *Physics, MSEL, ITL, BFRL, and EEEL SURF Programs,* no Federal funds will be authorized for Indirect Costs (IDC) nor fringe benefits; however, an applicant may provide for IDC and/or fringe benefits under his/her portion of Cost Sharing.

Purchase of American-made Equipment and Products: Applicants are hereby notified that they are encouraged, to the greatest practicable extent, to purchase American-made equipment and products with funding provided under this program.

Federal Policies and Procedures: Recipients and subrecipients under each of the above grant programs shall be subject to all Federal laws and Federal and Departmental regulations, policies, and procedures applicable to financial assistance awards, including 15 CFR Part 14 and 15 CFR Part 24, as applicable.

Each of the above grant programs does not directly affect any state or local government.

Applications under these programs are not subject to Executive Order 12372, ''Intergovernmental Review of Federal Programs.''

Executive Order Statement: This funding notice was determined to be ''not significant'' for purposes of Executive Order 12866.

Dated: January 4, 2001.

Karen H. Brown,

Deputy Director.

BILLING CODE 3510–13–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 010501B]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council's (Council) Highly Migratory Species Plan Development Team (HMSPDT) will hold a work session, which is open to the public.

DATES: The HMSPDT will meet on Monday, February 5, 2001 through Thursday, February 8, 2001, from 8 a.m. to 5 p.m. each day. On Friday, February 9, 2001, the HMSPDT will meet from 8 a.m. until business for the day is completed.

ADDRESSES: The work session will be held in the large conference room at NMFS Southwest Fisheries Science Center, 8604 La Jolla Shores Drive, Room D-203, La Jolla, CA 92038-0271; (619) 546-7000.

Council address: Pacific Fishery Management Council, 2130 SW Fifth Avenue, Suite 224, Portland, OR 97201.

FOR FURTHER INFORMATION CONTACT: Dan Waldeck, Pacific Fishery Management Council; (503) 326-6352.

SUPPLEMENTARY INFORMATION: The primary purpose of the work session is to continue review and revision of the draft fishery management plan (FMP) for highly migratory species (HMS); the draft FMP is scheduled for review by the Council in March 2001.

The proposed FMP and its associated regulatory analyses would be the Council's fourth FMP for the exclusive economic zone off the West Coast. Development of the FMP is timely, considering the new mandates under the Magnuson-Stevens Act, efforts by the United Nations to promote conservation and management of HMS resources through domestic and international programs, and the increased scope of international activities related to HMS fisheries in the eastern Pacific Ocean.

Although non-emergency issues not contained in the HMSPDT meeting agenda may come before the HMSPDT for discussion, those issues may not be the subject of formal HMSPDT action during this meeting. HMSPDT action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the HMSPDT's intent to take final action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Ms. Carolyn Porter at (503) 326-6352 at least 5 days prior to the meeting date.

Dated: January 5, 2001.

Richard W. Surdi,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 01–911 Filed 1–10–01; 8:45 am]

BILLING CODE 3510-22-S

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Restraint Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Cambodia

January 8, 2001.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits.

EFFECTIVE DATE: January 11, 2001.

FOR FURTHER INFORMATION CONTACT: Roy Unger, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port, call (202) 927–5850, or refer to the U.S. Customs website at http://www.customs.gov. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The Bilateral Textile Agreement of January 20, 1999, between the Governments of the United States and Cambodia establishes limits for the period January 1, 2001 through December 31, 2001.

These limits may be revised if Cambodia becomes a member of the World Trade Organization (WTO) and the United States applies the WTO agreement to Cambodia.

In addition, these limits include a nine percent (9%) increase to all of Cambodia's quotas under the Labor Standards provision of the U.S.-Cambodia bilateral textile agreement (see **Federal Register** notice 64 FR 60428, published on November 5, 1999).

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to establish the 2001 limits.

Carryforward used in the year 2000 is being deducted from the 2001 limits.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 64 FR 71982, published on December 22, 1999). Information regarding the 2001 CORRELATION will be published in the **Federal Register** at a later date.

Richard B. Steinkamp,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

January 8, 2001.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Pursuant to section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended; and the Bilateral Textile Agreement, dated January 20, 1999, between the Governments of the United States and Cambodia, you are directed to prohibit, effective on January 11, 2001, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories, produced or manufactured in Cambodia and exported during the twelve-month period beginning on January 1, 2001 and extending through December 31, 2001, in excess of the following levels of restraint:

Category	Twelve-month restraint limit
331/631	1,890,086 dozen pairs.
334/634	197,391 dozen.
335/635	79,607 dozen.
338/339	2,902,810 dozen.
340/640	918,543 dozen.
345	115,124 dozen.
347/348/647/648	3,483,372 dozen.
352/652	734,834 dozen.
438	94,618 dozen.
445/446	122,310 dozen.
638/639	1,045,012 dozen.
645/646	306,181 dozen.

The limits set forth above are subject to adjustment pursuant to the provisions of the current bilateral agreement between the Governments of the United States and Cambodia.

Products in the above categories exported during 2000 shall be charged to the applicable category limits for that year (see directive dated December 10, 1999) to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such products shall be charged to the limits set forth in this directive.

These limits may be revised if Cambodia becomes a member of the World Trade Organization (WTO) and the United States applies the WTO agreement to Cambodia.

Moreover, these limits may be revised in light of the U.S. determination as to whether working conditions in the Cambodian textile and apparel sector substantially comply with Cambodian labor law and internationally recognized core labor standards (see **Federal Register** notice 64 FR 60428, published on November 5, 1999).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Richard B. Steinkamp,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 01–1009 Filed 1–9–01; 11:28 am]

BILLING CODE 3510–DR–F

DEPARTMENT OF EDUCATION

National Assessment Governing Board; Meeting

AGENCY: National Assessment Governing Board; Education.

ACTION: Notice of closed teleconference meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming teleconference meeting of the Executive Committee of the National Assessment Governing Board. This notice also describes the functions of the Board. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act.

Date: January 22, 2001.

Time: 4 p.m., adjournment, approximately, 5 p.m. (closed).

Location: National Assessment Governing Board; 800 North Capitol Street, NW., Suite #825, Washington, DC 20001.

FOR FURTHER INFORMATION CONTACT: Ray Fields, Assistant Director for Policy, National Assessment Governing Board, 800 North Capitol Street, NW., Suite 825, Washington, DC 20002–4233, Telephone: (202) 357–6938.

SUPPLEMENTARY INFORMATION: The National Assessment Governing Board is established under section 412 of the National Education Statistics Act of 1994 (Title IV of the Improving America's Schools Act of 1994) (Pub. L. 103–382).

The Board is established to formulate policy guidelines for the National Assessment of Educational Progress. The Board is responsible for selecting subject areas to be assessed, developing assessment objectives, identifying appropriate achievement goals for each grade and subject tested, and establishing standards and procedures for interstate and national comparisons.

Under Pub. L. 105–78, the National Assessment Governing Board is also granted exclusive authority over developing the Voluntary National Tests pursuant to contact number RJ9753001.

On Monday, January 22, the Executive Committee will hold a closed teleconference meeting from 3 to 5 p.m. to review and discuss the qualifications of individuals to fill two vacant National Assessment Governing Board staff positions. Based upon these discussions, the Executive Committee will approve the hire of the individuals selected to fill the position Assistant Director for Psychometrics and the position Operations Officer. This meeting will relate solely to the internal personal rules and practices of an agency and will disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy, and, as such, is protected by exemptions (2) and (6) of Section 552b(c) of Title 5 U.S.C.

A summary of the activities of the closed teleconference, and other related matters which are informative to the public and consistent with the policy of the section 5 U.S.C. 552b(c), will be available to the public within 14 days after the meeting. Records are kept of all Board proceedings and are available for public inspection at the U.S. Department of Education, National Assessment Governing Board, Suite 825, 800 North Capitol Street, NW., Washington, DC, from 8:30 a.m. to 5 p.m.

Roy Truby,

Executive Director, National Assessment Governing Board.

[FR Doc. 01–795 Filed 1–10–01; 8:45 am]

BILLING CODE 4001–01–M

DEPARTMENT OF ENERGY

Office of Science Financial Assistance Program Notice 01–08; Scientific Discovery Through Advanced Computing: Computational Chemistry

AGENCY: U.S. Department of Energy.

ACTION: Notice inviting research grant applications.

SUMMARY: The Office of Basic Energy Sciences of the Office of Science (SC), U.S. Department of Energy (DOE), hereby announces its interest in receiving applications for projects in theory, modeling, and simulation

activities associated with the computational chemistry component of the Scientific Discovery through Advanced Computing (SciDAC) research program. The full text of Program Notice 01–08 is available via the Internet using the following web site address: *http://www.science.doe.gov/production/grants/grants.html.*

DATES: Preapplications referencing Program Notice 01–08, should be received by 4:30 p.m., E.S.T., February 7, 2001. A response encouraging or discouraging the submission of a formal application will be communicated by electronic mail by February 27, 2000. Formal applications in response to this notice should be received by 4:30 p.m., E.S.T., March 15, 2001, to be accepted for merit review and funding in FY 2001.

ADDRESSES: Preapplications referencing Program Notice 01–08 should be sent via e-mail using the following address: sharon.bowser@science.doe.gov.

Formal applications referencing Program Notice 01–08, should be forwarded to: U.S. Department of Energy, Office of Science, Grants and Contracts Division, SC–64, 19901 Germantown Road, Germantown, MD 20874–1290, ATTN: Program Notice 01–08. This address must be used when submitting applications by U.S. Postal Service Express Mail or any commercial mail delivery service, or when hand-carried by the applicant.

FOR FURTHER INFORMATION CONTACT: Dr. William H. Kirchhoff, Office of Science, U.S. Department of Energy, 19901 Germantown Road, Germantown, MD 20874–1290, telephone: (301) 903–5809, E-mail: william.kirchhoff@science.doe.gov, fax: (301) 903–4110.

SUPPLEMENTARY INFORMATION:

Background: Scientific Discovery Through Advanced Computing

Advanced scientific computing will be a key contributor to scientific research in the 21st Century. Within the Office of Science (SC), scientific computing programs and facilities are already essential to progress in many areas of research critical to the nation. Major scientific challenges exist in all SC research programs that can best be addressed through advances in scientific supercomputing, *e.g.*, designing materials with selected properties, elucidating the structure and function of proteins, understanding and controlling plasma turbulence, and designing new particle accelerators. To help ensure its missions are met, SC is bringing together advanced scientific computing and scientific research in an integrated program entitled ''Scientific Discovery Through Advanced Computing.''

The Opportunity and the Challenge

Extraordinary advances in computing technology in the past decade have set the stage for a major advance in scientific computing. Within the next five to ten years, computers 1,000 times faster than today's computers will become available. These advances herald a new era in scientific computing. Using such computers, it will be possible to dramatically extend our exploration of the fundamental processes of nature (*e.g.*, the structure of matter from the most elementary particles to the building blocks of life) as well as advance our ability to predict the behavior of a broad range of complex natural and engineered systems (*e.g.*, the earth's climate or an automobile engine).

To exploit this opportunity, these computing advances must be translated into corresponding increases in the performance of the scientific codes used to model physical, chemical, and biological systems. *This is a daunting problem.* Current advances in computing technology are being driven by market forces in the commercial sector, not by scientific computing. Harnessing commercial computing technology for scientific research poses problems unlike those encountered in previous supercomputers, in magnitude as well as in kind. As noted in the 1998 report [1] from the NSF/DOE ''National Workshop on Advanced Scientific Computing'' and the 1999 report [2] from the President's Information Technology Advisory Committee, this problem will only be solved by increased investments in *computer software*—in research and development on scientific simulation codes as well as on the mathematical and computing systems software that underlie these codes.

Investment Plan of the Office of Science

To meet the challenge posed by the new generation of terascale computers, SC will fund a set of coordinated investments as outlined in its long-range plan for scientific computing, *Scientific Discovery through Advanced Computing* [3] submitted to Congress on March 30, 2000. First, it will create a Scientific Computing Software Infrastructure that bridges the gap between the advanced computing technologies being developed by the computer industry and the scientific research programs sponsored by the Office of Science. Specifically, the SC effort proposes to:

- Create a new generation of Scientific Simulation Codes that take full advantage of the extraordinary computing capabilities of terascale computers.
- Create the Mathematical and Computing Systems Software to enable the Scientific Simulation Codes to effectively and efficiently use terascale computers.
- Create a Collaboratory Software Environment to enable geographically separated scientists to effectively work together as a team and to facilitate remote access to both facilities and data.

These activities are supported by a Scientific Computing Hardware Infrastructure that will be tailored to meet the needs of its research programs. The Hardware Infrastructure is robust, to provide the stable computing resources needed by the scientific applications; agile, to respond to innovative advances in computer technology that impact scientific computing; and flexible, to allow the most appropriate and economical resources to be used to solve each class of problems. Specifically, the SC proposes to support:

- A Flagship Computing Facility, the National Energy Research Scientific Computing Center (NERSC), to provide the robust, high-end computing resources needed by a broad range of scientific research programs.
- Topical Computing Facilities to provide computing resources tailored for specific scientific applications and to serve as the focal point for an application community as it strives to optimize its use of terascale computers.
- Experimental Computing Facilities to assess the promise of new computing technologies being developed by the computer industry for scientific applications.

Both sets of investments will create exciting opportunities for teams of researchers from laboratories and universities to create new revolutionary computing capabilities for scientific discovery.

Background: Theory, Modeling, and Simulation for Chemistry

This solicitation addresses the Scientific Simulation Codes element of the SciDAC program and in particular, theory, modeling, and simulation for chemistry.

Great progress has been made in the past half century in bringing molecular theory and modeling from a purely qualitative aid to an exact predictive tool for describing the chemical reactions of three and four atom systems, most notably for atoms in the first two rows of the periodic table. Predictive tools for many processes of importance to the Department of Energy's mission such as, but not limited to, combustion and catalysis occur between more complex molecules and between molecules and extended structures such as clusters or surfaces. Moreover, processes such as combustion and catalysis involve a complex interaction of chemistry with fluid dynamics. Predictive modeling of such processes is currently beyond the capabilities of existing computational resources and computational methods.

Applications are solicited for the development of computational approaches to solving problems in the modeling of chemical processes that exceed current computational capabilities. Of particular interest are long-standing problems in computational approaches to predicting chemistry such as:

- Reduction of the power law scaling of current quantum chemistry algorithms for systems with large numbers of atoms and electrons, *i.e.*, alternative approaches to handling the electron correlation problem for many electron systems.
- Calculation with chemical accuracy of the properties of open shell systems such as free radicals and excited electronic states appropriate to many areas of chemistry.
- Calculation of the significant properties of complex systems consisting of hundreds of reactions coupled with fluid dynamics and turbulence.

Advances in computational chemistry in recent years in providing accurate descriptions of increasingly complex systems have come as much from improvements in theory and software as from improved computational hardware. Consequently, applications submitted under this announcement may address fundamental aspects of chemical theory so long as they promise to break through the barriers that currently exist in computational models. That is, while it is anticipated that successful applicants to this announcement will be primarily concerned with taking advantage of the computational resources being developed under SciDAC, it is not necessarily a requirement.

Collaboration

It is expected that all applications submitted in response to this notice will be for collaborative projects, possibly involving more than one institution. Applications submitted from different institutions, which are directed at a common research activity, may include a common technical description of the overall research project. However, each must have a qualified principal investigator, who is responsible for the part of the effort at each institution, and separate face pages and budget pages for each institution. The budget for the proposed work in computer science and applied mathematics should be clearly identified and described, as the Office of Advanced Scientific Computing Research may support this work (up to 20–25% of the total project cost). In addition, if the distinct scope of work proposed for each institution is not specified in the common technical description, it must be clearly stated in the individual applications. Applicants should include cost sharing whenever feasible. Collaborations with researchers in federal laboratories and Federally Funded Research and Development Centers (FFRDCs), including the DOE National Laboratories are encouraged.

Since each project will be developing new computational tools and physics models that could be useful in other projects, it is important that there be good communication between the different projects. Greater collaboration than usual is anticipated to be required for the research projects likely to be funded under this notice. The investigators involved should anticipate regularly scheduled meetings, not to exceed three per year, during the start up of the SciDAC program in order to assure the necessary coordination of efforts between physical scientists, mathematicians, and computer scientists.

Program Funding

It is anticipated that up to $1 million annually will be available for multiple awards for research in the areas described in this notice. Initial awards will be made in FY 2001 in the categories described above, and applications may request project support for up to three years. All awards are contingent on the availability of funds, research progress, and programmatic needs. Annual budgets for successful, individual projects submitted under this notice are expected to range from $100,000 to $500,000 per project in FY 2001, depending on the number of investigators and institutions involved. Annual budgets may increase in subsequent years but will be subject to the overall annual maximum guidance and availability of funds. Any proposed effort that exceeds the annual maximum ($1 million) in the subsequent years should be separately identified for potential award increases if additional funds become available.

As required by the SC Grant Application Guide, applicants must submit their budgets using the Budget Page (DOE Form 4620.1) with one Budget Page for each year of requested funding. The requested funding for the proposed work in computer science and applied mathematics should be included with the other projects costs on the Budget Page. However, applicants are also requested to list the proposed computer science and applied mathematics costs separately in an appendix, as the Office of Advanced Scientific Computing Research may support this work (up to 20–25% of the total project cost).

Preapplications

Preapplications are strongly encouraged but not required prior to submission of a full application. However, notification of a successful preapplication is not an indication that an award will be made in response to the formal application. The preapplication should identify on the cover sheet the institution, Principal Investigator name(s), address(s), telephone, and fax number(s) and E-mail address(es), title of the project, and the field of scientific research. A brief (one-page) vitae should be provided for each Principal Investigator. The preapplication should consist of a two to three page narrative describing the research project objectives, the approach to be taken, and a description of any research partnerships. Preapplications will be reviewed by DOE relative to the scope and research needs of the computational chemistry program.

Merit Review

Applications will be subjected to scientific merit review (peer review) and will be evaluated against the following evaluation criteria listed in descending order of importance as codified at 10 CFR 605.10(d):

1. Scientific and/or Technical Merit of the Project,

2. Appropriateness of the Proposed Method or Approach,

3. Competency of Applicant's Personnel and Adequacy of Proposed Resources,

4. Reasonableness and Appropriateness of the Proposed Budget.

The evaluation under item 2, Appropriateness of the Proposed Method or Approach, will also consider the quality of the plan for effective coupling to emerging advances in supercomputing.

Note that external peer reviewers are selected with regard to both their scientific expertise and the absence of conflict-of-interest issues. Non-federal reviewers may be used, and submission of an application constitutes agreement that this is acceptable to the investigator(s) and the submitting institution. Reviewers will be selected to represent expertise in the technology areas proposed, applications groups that are potential users of the technology, and related programs in other Federal Agencies or parts of DOE such as the Advanced Strategic Computing Initiative (ASCI) within DOE's National Nuclear Security Administration.

Information about the development and submission of applications, eligibility, limitations, evaluation, selection process, and other policies and procedures including detailed procedures for submitting applications from multi-institution partnerships may be found in 10 CFR Part 605, and in the Application Guide for the Office of Science Financial Assistance Program. Electronic access to the Guide and required forms is made available via the World Wide Web at: *http://www.science.doe.gov/production/grants/grants.html.* The Project Description must be 20 pages or less, including tables and figures, but exclusive of attachments. The application must contain an abstract or project summary, letters of intent from collaborators, and short vitae.

(The Catalog of Federal Domestic Assistance Number for this program is 81.049, and the solicitation control number is ERFAP 10 CFR Part 605.)

Issued in Washington, DC on January 4, 2001.

Ralph H. De Lorenzo,

Acting Associate Director of Science for Resource Management.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP98–100–001]

Algonquin Gas Transmission Company; Notice of Application

January 5, 2001.

Take notice that on December 20, 2000, Algonquin Gas Transmission Company (Algonquin) filed an abbreviated application in Docket No. CP98–100–001 to amend its Certificate of Public Convenience and Necessity, pursuant to section 7 of the Natural Gas Act and Part 157 of the Federal Energy Regulatory Commission's Regulations, issued to Algonquin by the Commission's May 27, 1998 ''Order Issuing Certificate'' in Docket No. CP98–100–000, as more fully set forth in the application which is on file with the Commission and open to public inspection. This filing may be viewed via the internet at *http://www.ferc.fed.us/online/rims,htm* (call 202–208–2222 for assistance). Any questions regarding the application should be directed to S.E. Tillman, Director of Regulatory Affairs, Algonquin Gas Transmission Company, P.O. Box 1642, Houston, Texas 77251–1642 at (713) 627–5113.

The May 27 Order authorized Algonquin to construct and operate pipeline facilities to provide transportation service to ANP Bellingham Energy Company. In this application, Algonquin requests all authorizations necessary to amend its certificate to revise the initial monthly demand rate under Rate Schedule AFT–CL from $.8399 per Dth to $.9714 per Dth to reflect increased costs associated with construction of the lateral project. Algonquin submits that the increase in estimated costs of approximately $700,000 is a result of: (1) Higher contractor costs; (2) higher right-of-way costs; and (3) increased AFUDC due to attenuation of the construction schedule. In addition, Algonquin provides that since the costs of the proposed facilities will be recovered through an incremental reservation charge, the amendment will have no adverse impact on existing customers.

The application also provides that ANP Bellingham has authorized Algonquin to state that ANP Bellingham agrees to pay such revised rate and does not oppose Algonquin filing to modify the original approved initial rate.

Algonquin provides that no other changes are contemplated with regard to the facilities authorized in Docket No. CP98–100–000, nor in the service to be provided for the proposed receipt or delivery point.

Any person desiring to be hear or to make any protest with reference to said application should on or before January 18, 2001, file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, a motion to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and procedure (18 CFR 385.211 and 385.214) and the regulations under the NGA (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding must file a petition to intervene in accordance with the Commission's rules. Comments and protests may be filed electronically via the internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site at *http://www.ferc.fed.us/efi/doorbell.htm.*

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Commission by sections 7 and 15 of the NGA and the Commission's Rules of Practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that the proposal is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given. Under the procedure provide for, unless otherwise advised, it will be unnecessary for the Applicants to appear or to be represented at the hearing.

David P. Boergers,

Secretary.

[Docket No. RP00–325–001]

Colorado Interstate Gas Company; Notice of Tariff Filing

January 5, 2001.

Take notice that on January 2, 2001, Colorado Interstate Gas Company (CIG), tendered for filing to become part of its FERC Gas Tariff, First Revised Volume No. 1, the pro forma tariff sheets filed pursuant to Order No. 637 and which are listed in Appendix A to the filing.

CIG states these tariff sheets reflect the changes to its tariff required to comply with Order No. 637, 637–A and 637–B (Order).

CIG further states that the pro forma tariff sheets filed in this filing reflect changes from its originally filed pro forma tariff sheets filed June 15, 2000, which CIG agreed to in a September 20, 2000 response to interventions and during technical conferences.

CIG further states that copies of this filing have been served on all parties in this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with section 385.211 of the Commission's Rules and Regulations. All such protests must be filed on or before January 22, 2001. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. This filing may be viewed on the web at *http://www.ferc.fed.us/online/rims.htm* (call 202–208–2222 for assistance). [Docket No. RP96–389–017]

Columbia Gulf Transmission Company; Notice of Negotiated Rate Filing

January 5, 2001.

Take notice that on December 29, 2000, Columbia Gulf Transmission Company (Columbia Gulf) tendered for filing to the Federal Energy Regulatory Commission (Commission) the following Amendment Agreement to a recently filed negotiated rate transaction:

Amendment Agreement to ITS–2 Service Agreement No. 69314 between Columbia Gulf Transmission Company and Amoco Energy Trading Corporation dated November 30, 2000, as Amended December 22, 2000.

Columbia Gulf states that transportation service which was scheduled to commence December 1, 2000 and terminate December 31, 2000. The parties have executed an Amendment Agreement extending the term through January 31, 2001. All other terms and provisions remain unchanged and in full force and effect.

Columbia Gulf states that copies of the filing have been served on all parties on the official service list created by the Secretary in this proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. [Docket No. RP00–555–002]

Dominion Transmission, Inc.; Notice of Compliance Filing

January 5, 2001.

Take notice that on January 2, 2001, Dominion Transmission, Inc. (DTI) tendered for filing as part of its FERC Gas Tariff, Third Revised Volume No. 1, the following tariff sheet, with an effective date of September 23, 2000.

Substitute Original Sheet No. 1092.

DTI states that the filing is made as a compliance filing pursuant to the Commission's December 15, 2000 order in the captioned proceedings. 93 FERC ¶61,284 (2000). As directed by the Commission, DTI has stated in its tariff that information regarding its shared personnel and facilities is available on its website. In addition, DTI included a ministerial change, updating phone numbers in a related complaint procedures tariff provision. DTI

proposes an effective date of September 23, 2000, for the filed tariff sheet to coincide with the effective date of the remainder of its original Third Revised Volume No. 1.

DTI states that copies of its filing have been served upon DTI's customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed in accordance with section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Sea Robin Pipleline Company; Notice of Flowthrough Crediting Report

January 5, 2001.

Take notice that on December 21, 2000, Sea Robin Pipeline Company (Sea Robin) submitted its Annual Flowthrough Crediting Mechanism Filing. Sea Robin states that this filing was made pursuant to section 27 of the General Terms and Conditions of Sea Robin's FERC Gas Tariff which requires the crediting of certain amounts received as a result of resolving monthly imbalances between its gas and liquefiables shippers and under its operational balancing agreements, and imposing scheduling penalties during the 12 month period ending October 31, 2000.

Sea Robin reports that it paid $373,679.45 in excess of amounts received from shippers. In accordance with section 27.1, the excess amount paid by Sea Robin will be carried forward and offset against any accumulated amounts during the subsequent twelve-month period.

Sea Robin further states that a copy of this filing is available for public inspection during regular business hours at Sea Robin's office at 5444 Westheimer Road, Houston, Texas 77056–5306. In addition, copies of this filing are being served on all affected customers, applicable state regulatory agencies and parties to the proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with section 385.211 of the Commission's Rules and Regulations. All such protests must be filed in accordance with section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. This filing may be viewed on the web at *http://www.fed.us/online/rims.htm* (call 202–208–2222 for assistance).

Comments and protests may be filed electronically via the internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site at *http://www.ferc.fed.us/efi/doorbell.htm.*

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. RP96–312–037 and GT01–5–001]

Tennessee Gas Pipeline Company; Notice of Compliance Filing

January 5, 2001.

Take notice that on December 19, 2000, Tennessee Gas Pipeline Company (''Tennessee''), P.O. Box 2511, Houston, Texas 77252, tendered for filing (1) Substitute Original Sheet No. 30G and First Revised Sheet No. 413A for inclusion in Tennessee's FERC Gas Tariff, Fifth Revised Volume No. 1, and (2) a copy of a July 31, 2000 Gas Transportation Agreement between Tennessee and Milford Power Company (the ''Milford Agreement'').

Tennessee states that the Milford Agreement and First Revised Sheet No. 413A are being filed in compliance with the Commission's December 13, 2000 letter order (''December 13 Order'') in the above-referenced proceeding. In that regard, in its December 13 Order, the Commission found the Milford Agreement to be a non-conforming service agreement. In addition, Tennessee has revised Original Tariff Sheet No. 30G to indicate that the Milford Agreement deviates in a material respect from Tennessee's pro forma Rate Schedule FT–A Gas Transportation Agreement Tennessee requests that the Commission approve the Milford Agreement and First Revised Sheet No. 413A affective January 18, 2001 and Substitute Original Sheet No. 30G effective December 15, 2000.

Tennessee states that copies of the filing have been mailed to all affected customers and state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission,

888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. This filing may be viewed on the web at *http://www.ferc.fed.us/online/rims.htm* (call 202–208–2222 for assistance). DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP97–255–020]

TransColorado Gas Transmission Company; Notice of Tariff Filing

January 5, 2001.

Take notice that on January 3, 2001, TransColorado Gas Transmission Company (TransColorado) tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1, Twentieth Revised Sheet No. 21 and Sixteenth Revised Sheet No. 22, with an effective date of January 3, 2001.

TransColorado states that the filing is being made in compliance with the Commission's letter order issued March 20, 1997, in Docket No. RP97–255–000, to be effective January 3, 2001.

TransColorado states that the tendered tariff sheets revised TransColorado's Tariff to reflect the negotiated-rate contract with Enserco Energy, Inc.

TransColorado stated that a copy of this filing has been served upon all parties to this proceeding, TransColorado's customers, the Colorado Public Utilities Commission and the New Mexico Public Utilities Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. [Docket No. RP97–255–018]

TransColorado Gas Transmission Company; Notice of Tariff Filing

January 5, 2001.

Take notice that on December 28, 2000, pursuant to 18 CFR 154.7 and 154.203, and in compliance with the Commission's letter order issued March 20, 1997, in Docket No. RP97–255–000, TransColorado Gas Transmission Company (TransColorado) tendered for filing and acceptance, to be effective January 1, 2001, Eighteenth Revised Sheet No. 21 and Fourteenth Revised Sheet No. 22 to Original Volume No. 1 of its FERC Gas Tariff.

The tendered tariff sheets revised TransColorado's Tariff to reflect the amended negotiated-rate contract with Retex, Inc. as well as the deletion of expired contracts. TransColorado requested waiver of 18 CFR 154.207 so that the tendered tariff sheets may become effective January 1, 2001.

TransColorado stated that a copy of this filing has been served upon all parties to this proceeding, TransColorado's customers, the Colorado Public Utilities Commission and the New Mexico Public Utilities Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. Transcontinental Gas Pipe Line Corporation; Notice of Compliance Filing

January 5, 2001.

Take notice that on December 29, 2000, Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing the calculation of the appropriate refund amount with interest and the supporting workpapers in Docket No. TM99–6–29–001. Transco also tendered for filing pro forma tariff sheets to its FERC Gas Tariff, Third Revised Volume No. 1 reflecting revised fuel retention percentages for the annual period commencing April 1, 2000. The proposed effective date of such tariff sheets is April 1, 2000.

Transco states that the instant filing is submitted in compliance with the Commission's Notice of Extension of Time issued November 30, 2000 in Docket No. TM99–6–29–001. In that notice, the Commission granted Transco an extension of time to file its refund calculation and justification of the appropriate refunds with interest as specified by the Commission's October 30, 2000 ''Order on Rehearing''.

Transco states that it is serving copies of the instant filing to its affected customers and interested State Commissions.

Any person desiring to protest said filing should file a protest with the Federal Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed on or before January 12, 2001. Transwestern Pipeline Company; Notice of Proposed Changes in FERC Gas Tariff

January 5, 2001.

Take notice that on December 29, 2000, Transwestern Pipeline Company (Transwestern) tendered for filing to become part of Transwestern's FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets, proposed to become effective on January 1, 2001.

Fifth Revised Sheet No. 5B.05
Fourth Revised Sheet No. 5B.07

Transwestern states that the above sheets are being filed to describe a negotiated rate agreement with Reliant Energy Services, Inc. in accordance with the Commission's Policy Statement on Alternatives to Traditional Cost-of-Service Ratemaking for Natural Gas Pipelines.

Transwestern further states that copies of the filing have been mailed to each of its customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP01–60–000]

Williams Gas Pipelines Central, Inc.; Notice of Request Under Blanket Authorization

January 5, 2001.

Take notice that on December 28, 2000, Williams Gas Pipelines Central, Inc. (Williams), P.O. Box 20008, Owensboro, Kentucky 42304, filed in Docket No. CP01–60–000 a request pursuant to sections 157.205 and 157.211 of the Commission's Regulations (18 CFR 157.205 and 157.211) under the Natural Gas Act (NGA) for authorization to construct and operate delivery point facilities for service to a residential end-user in Johnson County, Kansas, under Williams' blanket certificate issued in Docket No. CP82–479–000, pursuant to section 7 of the NGA, all as more fully set forth in the application which is on file with the Commission and open to public inspection. This filing may be viewed on the web at *http://www.ferc.fed.us/online/htm* (call 202–208–2000 for assistance).

Williams requests authorization to construct and operate delivery point facilities to serve Mr. Dennis M. Langley, who requires the gas for residential heating and cooling use. It is stated that Williams will use the facilities to transport up to 20 Dt equivalent of natural gas per day on a firm basis for a 10-year term, pursuant to section 284.223 of the Commission's regulations. It is stated further that Mr. Langley may also receive additional volumes on an interruptible basis. Williams estimates the cost of the facilities at $25,664 and states that it would be reimbursed for the cost by Mr. Langley. It is explained that Mr. Langley's natural gas requirements are currently being supplied by Kansas Gas Service, Inc., a local distribution company that is an existing customer of Williams. It is asserted that Williams has sufficient capacity to render the proposed service without detriment or disadvantage to its other existing customers and that Williams' tariff does not prohibit the addition of delivery point facilities. It is further asserted that the proposal will have no significant impact on Williams' peak day and annual deliveries.

Any questions regarding the application may be directed to David N. Roberts, Manager of Certificates and Tariffs, at (270) 688–6712, Williams Gas Pipelines Central, Inc., P.O. Box 20008, Owensboro, Kentucky 42304.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to section 157.205 of the Regulations under the NGA (18 CFR 157.205) a protest to the request. Comments and protests may be filed electronically in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's website at *http://ferc.fed.us/efi/doorbell.htm*. If no protest is file within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the NGA.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP01–204–000]

Williston Basin Interstate Pipeline Company; Notice of Fuel Reimbursement Charge Filing

January 5, 2001.

Take notice that on December 29, 2000, Williston Basin Interstate Pipeline Company (Williston Basin), tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1 and Original Volume No. 2 the following revised tariff sheets, to become effective February 1, 2001:

Second Revised Volume No. 1

Fortieth Revised Sheet No. 15
Twenty-first Revised Sheet No. 15A
Forty-second Revised Sheet No. 16
Twenty-first Revised Sheet No. 16A
Thirty-ninth Revised Sheet No. 18
Twenty-first Revised Sheet No. 18A
Twenty-first Revised Sheet No. 19
Twenty-first Revised Sheet No. 20
Thirty-fifth Revised Sheet No. 21

Original Volume No. 2

Eight-fourth Revised Sheet No. 11B

Williston Basin states that the revised tariff sheets reflect revisions to the fuel reimbursement charge and percentage components of the Company's relevant gathering, transportation and storage rates, pursuant to Williston Basin's Fuel Reimbursement Adjustment Provision contained in section 38 of the General Terms and Conditions of its FERC Gas Tariff, Second Revised Volume No. 1.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER01–424–001, et al.]

Pacific Gas and Electric Company, et al.; Electric Rate and Corporate Regulation Filings

January 4, 2001.

Take notice that the following filings have been made with the Commission:

1. Pacific Gas and Electric Company

[Docket No. ER01–424–001]

Take notice that on December 26, 2000, Pacific Gas and Electric Company (PG&E), tendered a filing to pass-through certain charges in conformance with the California Independent System Operator Corporation's December 15, 2000 informational filing in FERC Docket No. ER01–313–001.

PG&E requests an effective date of January 1, 2001, or the date the Commission makes effective ISO rates included in the ISO's informational filing of December 15, 2000.

Copies of this filing have been served upon the California Public Utilities Commission, all affected customers and the official service list in FERC Docket No. ER01–424–000.

Comment date: January 17, 2001, in accordance with Standard Paragraph E at the end of this notice.

2. Constellation Energy Group, Inc., Constellation Enterprises, Inc. (On Behalf of Themselves and Their Public Utility Subsidiaries), Constellation Power Source, LLC, Constellation Power Source Generation, LLC, and Calvert Cliffs Nuclear Power Plant, LLC

[Docket Nos. EC01–50–000 and ER01–824–000]

Take notice that on December 28, 2000, Constellation Energy Group, Inc. (CEG) and Constellation Enterprises, Inc., on behalf of themselves and their public utility subsidiaries, (jointly the Applicants) submitted for filing, pursuant to Section 203 of the Federal Power Act (FPA) and Part 33 of the Commission's regulations, an Application for authorization to transfer certain jurisdictional transmission facilities as part of transactions involving an intra corporate realignment, purchase by an affiliate of The Goldman Sachs Group, Inc. of an indirect ownership interest in certain jurisdictional public utilities to be owned by a to-be-formed entity, and the distribution by CEG of its shares in the new entity to the public shareholders of CEG. In addition, pursuant to Section 205 of the FPA and 18 CFR 35.16, Constellation Power Source, LLC, Constellation Power Source Generation, LLC and Calvert Cliffs Nuclear Power Plant, LLC have filed notices of succession with the Commission.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

3. Xcel Energy Services Inc.

[Docket No. EC01–51–000]

Take notice that on December 29, 2000, Xcel Energy Services Inc. (Xcel Services) submitted an application pursuant to section 203 of the Federal Power Act and Part 33 of the regulations of the Federal Energy Regulatory Commission (Commission) to effect certain transactions incident to the transfer by Southwestern Public Service Company (SPS) of certain jurisdictional facilities. Xcel Services submitted the application on behalf of SPS and the affiliates of SPS that will be formed to effect the transfer of jurisdictional facilities that is the subject of the application. Xcel Services states that the transfer of jurisdictional facilities is necessary to separate the corporate ownership of SPS' generation and power marketing business from the corporate ownership of SPS' transmission and distribution business as required by retail choice laws in the states of Texas and New Mexico.

Comment date: January 19, 2001, in accordance with Standard Paragraph E at the end of this notice.

4. Mountain View Power Partners, LLC

[Docket No. EG01–93–000]

Take notice that on December 29, 2000, Mountain View Power Partners, LLC (Mountain View), whose sole member is currently SeaWest WindPower, Inc., located at 1455 Frazee Road, San Diego, California, 92108, filed with the Federal Energy Regulatory Commission an application for determination of exempt wholesale generator status pursuant to Part 365 of the Commission's regulations.

Mountain View will construct, own or lease and operate a wind-powered generating facility of approximately 44.4 MW capacity in the San Gorgonio Pass of Riverside County, California, near the City of Palm Springs. The proposed wind power plant is expected to deliver test power to the grid no later than February 15, 2001 and to commence commercial operations by May 1, 2001.

Comment date: January 25, 2001, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

5. Disropi, S.A.

[Docket No. EG01–94–000]

Take notice that on December 29, 2000 Disropi, S.A., a corporation (sociedad anonima) organized under the laws of Costa Rica (Applicant)1, with its principal place of business at c/o Energia Global de Costa Rica S.A., Parque Empresa Forum, Piso 1, Edificio B, Condominio No. 1, Santa Ana, Costa Rica, filed with the Federal Energy Regulatory Commission an application for determination of exempt wholesale generator status pursuant to Part 365 of the Commission's regulations.

Applicant operates an approximately 20 megawatt (net), wind powered electric power production facility located in north central Costa Rica.

Comment date: January 25, 2001, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

6. FirstEnergy Generation Corp.

[Docket No. EG01–95–000]

Take notice that on December 29, 2000, FirstEnergy Generation Corp. submitted an application for determination of exempt wholesale generator status pursuant to Section 32 of the Public Utility Holding Company Act of 1935 and Part 365 of the Commission's regulations.

The applicant states that it is a wholly-owned subsidiary of FirstEnergy Services Corp., and that it was created to implement a state-mandated restructuring plan that requires the corporate separation of FirstEnergy Corp.'s competitive generation activities from its transmission and distribution activities. The applicant states further that it will operate the facilities identified in the filing for the purposes of producing and selling power at wholesale.

Comment date: January 25, 2001, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

7. Wolverine Power Supply Cooperative, Inc.

[Docket No. ES01–14–000]

Take notice that on December 22, 2000, Wolverine Power Supply Cooperative, Inc. (Wolverine) submitted an application seeking authorization to execute a guarantee of debt in an amount not to exceed $500,000 incurred by Wolverine Power Marketing Cooperative, Inc., a distribution cooperative member of Wolverine.

Wolverine also seeks a waiver of the Commission's competitive bidding and negotiated placement requirements at 18 CFR 34.2.

Comment date: January 17, 2001, in accordance with Standard Paragraph E at the end of this notice.

8. Entergy Services, Inc., On behalf of the Entergy Operating Companies: Entergy Arkansas, Inc., Entergy Gulf States, Inc., Entergy Louisiana, Inc., Entergy Mississippi, Inc., and Entergy New Orleans, Inc.

[Docket No. RT01–75–001]

Take notice that on December 29, 2000, Entergy Services, Inc., on behalf of the Entergy Operating Companies, Entergy Arkansas, Inc., Entergy Gulf States, Inc., Entergy Louisiana, Inc., Entergy Mississippi, Inc., and Entergy New Orleans, Inc. (collectively Entergy), filed an Application for approval of Transco's rate structure pursuant to Section 205 of the Federal Power Act and Order No. 2000.

Entergy will create Transco, an independent, incentive-driven transmission company to operate under the oversight, and within the umbrella, of the Southwest Power Pool Regional Transmission Organization. Entergy also submitted for filing a Transmission Cost Transition Agreement, an Open Access Distribution Service Tariff and a Notice of Cancellation for the MSS–2 service schedule of the Entergy System Agreement.

Comment date: January 29, 2001, in accordance with Standard Paragraph E at the end of this notice.

9. Pacific Gas and Electric Company

[Docket No. ER01–783–000]

Take notice that on December 26, 2000, Pacific Gas and Electric Company (PG&E), tendered for filing a changes in rates for the Transmission Revenue Balancing Account Adjustment (TRBAA) rate set forth in its Transmission Owner Tariff (TO Tariff) and for the Reliability Services (RS) rates set forth in both its TO Tariff and its Reliability Services Tariff (RS Tariff) (certain customers' RS rates are in the TO Tariff while other customers' RS rates are in the separate RS Tariff). The TO Tariff TRBAA rate is proposed to be a negative $0.00157 per kilowatt-hour, a reduction from the present rate of negative $0.00017 per kilowatt-hour and the proposed overall average RS rates are approximately 23% lower than the currently effective rates for 2000. These changes in rates are to become effective January 1, 2001.

Copies of this filing have been served upon the California Independent System Operator, California Independent System Operator-registered Scheduling Coordinators, Southern California Edison Company, San Diego Gas and Electric Company, the California Public Utilities Commission and those parties to the official service lists in FERC Docket Nos. ER99–4323–000 and ER01–66–000.

Comment date: January 17, 2001, in accordance with Standard Paragraph E at the end of this notice.

10. Avista Corp.

[Docket No. ER01–784–000]

Take notice that on November 26, 2000, Avista Corp. (AVA), tendered for filing with the Federal Energy Regulatory Commission executed Service Agreements for Short-Term Firm and Non-Firm Point-To-Point Transmission Service under AVA's Open Access Transmission Tariff—FERC Electric Tariff, Volume No. 8 with El Paso Merchant Energy, L. P.

AVA requests the Service Agreements be given a respective effective date of December 19, 2000.

Comment date: January 17, 2001, in accordance with Standard Paragraph E at the end of this notice.

11. Cinergy Services, Inc.

[Docket No. ER01–785–000]

Take notice that on December 26, 2000, Cinergy Services, Inc. (Cinergy), tendered for filing a Network Service Agreement, Network Operating Agreement, and Specifications for Network Integration Service under Cinergy's Open Access Transmission Tariff (OATT) entered into between Cinergy and The Village of Blanchester.

An application for Network Integration Service for The Village of Blanchester, Ohio has been included as an Exhibit to the Service Agreement under OATT.

Copies of the filing were served upon The Village of Blanchester, Ohio.

Comment date: January 17, 2001, in accordance with Standard Paragraph E at the end of this notice.

12. Florida Power Corporation

[Docket No. ER01–786–000]

Take notice that on December 26, 2000, Florida Power Corporation (Florida Power), tendered for filing an executed Interconnection and Operating Agreement (Interconnection Agreement) with Vandolah Power Company, L.L.C., (Vandolah). The Interconnection Agreement was filed as a service agreement under Florida Power's open access transmission tariff (OATT), FERC Electric Tariff, First Revised Volume No. 6. The Interconnection Agreements set forth the terms and conditions governing the interconnection between Vandolah's yet-to-be constructed generating facility and the Company's transmission system, including the Company's construction of required interconnection facilities.

Florida Power requests a November 26, 2000 effective date.

Copies of the filing were served upon the El Paso Merchant Energy Company (Vandolah's partner in this generating facility project) and the Florida Public Service Commission.

Comment date: January 17, 2001, in accordance with Standard Paragraph E at the end of this notice.

13. New England Power Pool

[Docket No. ER01–787–000]

Take notice that on December 26, 2000, the New England Power Pool (NEPOOL) Participants Committee tendered for filing and acceptance materials to permit NEPOOL to expand its membership to include Calpine Energy Services, L.P. (CES) and to terminate the membership of Calpine Power Services Company (CPS).

NEPOOL requests a November 1, 2000, effective date for the commencement of CES participation in and CPS termination from NEPOOL.

The Participants Committee states that copies of these materials were sent to the New England state governors and regulatory commissions and the Participants in NEPOOL.

Comment date: January 17, 2001, in accordance with Standard Paragraph E at the end of this notice.

14. AES Medina Valley Cogen, L.L.C.

[Docket No. ER01–788–000]

Take notice that on December 26, 2000, AES Medina Valley Cogen, L.L.C. (Medina), Mossville, Illinois, tendered for filing with the Commission of a Service Agreement with Central Illinois Light Company to make energy sales pursuant to the terms of a Tolling Agreement.

Copies of the filing were served on the affected customer and the Illinois Commerce Commission.

Comment date: January 17, 2001, in accordance with Standard Paragraph E at the end of this notice.

15. PJM Interconnection, L.L.C.

[Docket No. ER01–789–000]

Take notice that on December 26, 2000, PJM Interconnection, L.L.C. (PJM), on behalf of the PJM Reliability Committee, tendered for filing amendments to Sections 1.56, 10.2, and Schedules 5.2, and 7, of the Reliability Agreement Among Load Serving Entities in the PJM Control Area (RAA) to continue the current ALM credit treatment under the RAA after the Pool-Wide Choice Date and until May 31, 2001, and to modify the definition of ''Weighted Vote'' and the cost sharing provisions. The entire RAA also is filed in accordance with Order No. 614.

Copies of this filing were served upon all parties to the RAA and each state electric utility regulatory commission in the PJM control area.

Comment date: January 17, 2001, in accordance with Standard Paragraph E at the end of this notice.

16. Avista Corp.

[Docket No. ER01–790–000]

Take notice that on December 26, 2000, Avista Corp., (AVA), tendered for filing with the Federal Energy Regulatory Commission executed Service Agreements for Short-Term Firm and Non-Firm Point-to-Point Transmission Service under AVA's Open Access Transmission Tariff—FERC Electric Tariff, Volume No. 8 with El Paso Merchant Energy, L.P.

AVA requests the Service Agreements be given a respective effective date of December 19, 2000

Comment date: January 17, 2001, in accordance with Standard Paragraph E at the end of this notice.

17. Allegheny Energy Supply Conemaugh, LLC

[Docket No. ER01–791–000]

Take notice that on December 26, 2000, Allegheny Energy Supply Conemaugh, LLC (Allegheny), tendered for filing a market rate tariff of general applicability under which it proposes to sell capacity and energy to affiliates and non-affiliates at market-based rates, and to make such sales to affiliates with franchised service areas at rates capped by a publicly available regional index price.

Allegheny requests an effective date no later than January 1, 2001.

Comment date: January 17, 2001, in accordance with Standard Paragraph E at the end of this notice.

18. WPS Resources Operating Companies

[Docket No. ER01–792–000]

Take notice that on December 26, 2000, WPS Resources Operating Companies (WPSR), tendered for filing Notice of Cancellation for two Long-Term Firm Point-to-Point transmission service agreements under its open access transmission tariff, First Revised Volume No. 1 (OATT): one with Consolidated Water Power Company (CWP) and one with Wisconsin Public Power, Inc., (WPPI). WPSR seeks to cancel these two service agreements because under Wisconsin's electricity restructuring, the American Transmission Company, LLC (ATCLLC) will provide transmission service to these customers effective January 1, 2001.

WPSR requests that these cancellations take effect January 1, 2001.

Copies of the filing were served upon CWP, WPPI, Manitowoc Public Utilities, ATCLLC, the Michigan Public Service Commission and the Public Service Commission of Wisconsin.

Comment date: January 17, 2001, in accordance with Standard Paragraph E at the end of this notice.

19. PacifiCorp

[Docket No. ER01–793–000]

Take notice that on December 26, 2000, PacifiCorp tendered for filing a Notice of Termination with the Federal Energy Regulatory Commission with respect to the Power Sales Agreement between PacifiCorp and Cheyenne Light, Fuel and Power Company dated June 21, 1995 (Agreement).

PacifiCorp requests that a waiver of prior notice be granted and that an effective date of December 31, 2000 be assigned to the Notice of Termination consistent with the termination date set forth in the Agreement.

Copies of this filing were supplied to Cheyenne and the Wyoming Public Service Commission.

Comment date: January 17, 2001, in accordance with Standard Paragraph E at the end of this notice.

20. Duke Electric Transmission, a division of Duke Energy Corporation

[Docket No. ER01–794–000]

Take notice that on December 27, 2000, Duke Electric Transmission (Duke ET), a division of Duke Energy Corporation tendered for filing an amendment to its open access transmission tariff, implementing interconnection procedures.

Duke requests that the proposed amendment be permitted to become effective on December 27, 2000.

Duke states that this filing is in accordance with Part 35 of the Commission's Regulations and a copy has been served on the North Carolina Utilities Commission and the South Carolina Public Service Commission.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

21. American Transmission Company

[Docket No. ER01–795–000]

Take notice that on December 27, 2000, American Transmission Company LLC (ATCLLC), tendered for filing a Distribution-Transmission Interconnection Agreement between ATCLLC and Edison Sault Electric Company.

ATCLLC requests an effective date of January 1, 2001.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

22. Potomac Electric Power Company

[Docket No. ER01–796–000]

Take notice that on December 27, 2000, Potomac Electric Power Company (Pepco), tendered for filing pursuant to Section 205 of the Federal Power Act an executed Interconnection Agreement (Gude Facility), dated as of December 22, 2000, between Pepco and Pacific Energy Operating Group, L.P.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

23. PacifiCorp

[Docket No. ER01–797–000]

Take notice that on December 27, 2000, PacifiCorp tendered for filing in accordance with 18 CFR 35 of the Commission's Rules and Regulations, an unexecuted service agreement under its market-based tariff, PacifiCorp FERC Electric Tariff, Third Revised Volume No. 12.

PacifiCorp has requested an effective date of January 1, 2001.

Copies of this filing were supplied to the Wyoming Public Service Commission and the Public Utility Commission of Oregon.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

24. PacifiCorp

[Docket No. ER01–798–000]

Take notice that on December 27, 2000, PacifiCorp, tendered for filing in accordance with 18 CFR 35 of the Commission's Rules and Regulations,

revisions to Schedules 4, 7 and 8 as well as Attachment 7 to its open access transmission tariff, PacifiCorp's FERC Electric Tariff, Second Revised Volume No. 11 (Tariff). The revisions modify the procedures used in the handling of energy imbalances and transmission losses under the Tariff.

PacifiCorp has requested an effective date of January 1, 2001.

Copies of this filing were supplied to the Washington Utilities and Transportation Commission and the Public Utility Commission of Oregon.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

25. Duke Energy Corporation

[Docket No. ER01–799–000]

Take notice that on December 27, 2000, Duke Energy Corporation (Duke), tendered for filing a Service Agreement with the Tennessee Valley Authority, for Firm Transmission Service under Duke's Open Access Transmission Tariff.

Duke requests that the proposed Service Agreement be permitted to become effective on November 28, 2000.

Duke states that this filing is in accordance with Part 35 of the Commission's Regulations and a copy has been served on the North Carolina Utilities Commission.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

26. Duke Energy Corporation

[Docket No. ER01–800–000]

Take notice that on December 27, 2000, Duke Energy Corporation (Duke), tendered for filing a Service Agreement with Duke Energy Trading and Marketing, L.L.C. for Firm Transmission Service under Duke's Open Access Transmission Tariff.

Duke requests that the proposed Service Agreement be permitted to become effective on November 28, 2000.

Duke states that this filing is in accordance with Part 35 of the Commission's Regulations and a copy has been served on the North Carolina Utilities Commission.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

27. American Electric Power Service Corporation

[Docket No. ER01–801–000]

Take notice that on December 27, 2000, American Electric Power Service Corporation (AEPSC), tendered for filing Service Agreements under its Wholesale Market Tariff pursuant to which AEPSC may make power sales to certain affiliates to enable the companies to make sales to residential, commercial, and industrial retail customers in those states that have implemented retail access programs.

AEPSC requests an effective date of December 28, 2000.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

28. PECO Energy Company

[Docket No. ER01–802–000]

Take notice that on December 27, 2000, PECO Energy Company (PECO), tendered for filing under Section 205 of the Federal Power Act, 16 U.S.C. S 792 *et seq.*, an Agreement dated December 13, 2000 with Mack Services Group (MSG) under PECO's FERC Electric Tariff Original Volume No. 1 (Tariff).

PECO requests an effective date of December 13, 2000 for the Agreement.

PECO states that copies of this filing have been supplied to Mack Services Group and to the Pennsylvania Public Utility Commission.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

29. PECO Energy Company

[Docket No. ER01–803–000]

Take notice that on December 27, 2000, PECO Energy Company (PECO), tendered for filing under Section 205 of the Federal Power Act, 16 U.S.C. S 792 *et seq.*, an Agreement dated December 21, 2000 with Louisiana Generating LLC. (LAG) under PECO's FERC Electric Tariff Original Volume No. 1 (Tariff).

PECO requests an effective date of December 21, 2000 for the Agreement.

PECO states that copies of this filing have been supplied to Louisiana Generating LLC and to the Pennsylvania Public Utility Commission.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

30. PECO Energy Company

[Docket No. ER01–804–000]

Take notice that on December 27, 2000, PECO Energy Company (PECO), tendered for filing under Section 205 of the Federal Power Act, 16 U.S.C. S 792 *et seq.*, an Agreement dated December 19, 2000 with Green Mountain Energy Company (GMEC) under PECO's FERC Electric Tariff Original Volume No. 1 (Tariff).

PECO requests an effective date of December 19, 2000, for the Agreement.

PECO states that copies of this filing have been supplied to Green Mountain Energy Company and to the Pennsylvania Public Utility Commission.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

31. California Independent System Operator Corporation

[Docket No. ER01–805–000]

Take notice that on December 27, 2000, the California Independent System Operator Corporation, tendered for filing a Scheduling Coordinator Agreement between the ISO and Sempra Energy Solutions for acceptance by the Commission.

The ISO states that this filing has been served on Sempra Energy Solutions and the California Public Utilities Commission.

The ISO is requesting waiver of the 60-day notice requirement to allow the Scheduling Coordinator Agreement to be made effective as of December 18, 2000.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

32. California Independent System Operator Corporation

[Docket No. ER01–806–000]

Take notice that on December 27, 2000, the California Independent System Operator Corporation (ISO), tendered for filing a Meter Service Agreement for Scheduling Coordinators between the ISO and Sempra Energy Solutions for acceptance by the Commission.

The ISO states that this filing has been served on Sempra Energy Solutions and the California Public Utilities Commission.

The ISO is requesting waiver of the 60-day notice requirement to allow the Meter Service Agreement to be made effective as of December 18, 2000.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

33. Wisconsin Public Service Corporation

[Docket No. ER01–807–000]

Take notice that on December 27, 2000, Wisconsin Public Service Corporation (WPSC) tendered a Notice of Cancellation of its Rate Schedule FERC No. 57, the 1995 ''Dewey Substation—Transmission Tap Payment Agreement'' with Wisconsin Power and Light Company (WPL).

WPSC requests waiver of the Commission's notice requirements so that this cancellation can be made effective January 1, 2001.

Copies of the filing were served upon WPL and the state commissions of Wisconsin and Michigan.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

34. Wisconsin Public Service Corporation

[Docket No. ER01–808–000]

Take notice that on December 27, 2000, Wisconsin Public Service Corporation (WPSC), tendered a Notice of Cancellation of its Rate Schedule FERC No. 45, an agreement with Wisconsin Power and Light Company (WPL) which provides for WPL to pay WPSC for WPSC's installation and construction of facilities to interconnect its Aurora Street Substation with WPL's transmission lines.

WPSC requests waiver of the Commission's notice requirements so that this cancellation can be made effective January 1, 2001.

Copies of the filing were served upon WPL, American Transmission Company, L.L.C. and the state commissions of Wisconsin and Michigan.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

35. WPS Resources Operating Companies

[Docket No. ER01–809–000]

Take notice that on December 27, 2000, WPS Resources Operating Companies (WPSR), tendered for filing revised executed service agreements with Madison Gas & Electric Company (MGE) and Wisconsin Public Power, Inc. (WPPI) for ancillary and distribution services under WPSR's open access transmission tariff, FERC Electric Tariff, First Revised Volume No. 1. WPSR also submits a notice of cancellation of WPPI's prior network service agreement under WPSC's predecessor transmission tariff.

WPSR requests waiver of the Commission's notice requirements to permit these documents to become effective on January 1, 2001.

Copies of the filing were served upon MGE, WPPI, the Michigan Public Service Commission and the Public Service Commission of Wisconsin.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

36. The Cincinnati Gas & Electric Company

[Docket No. ER01–810–000]

Take notice that on December 27, 2000, The Cincinnati Gas & Electric Company (CG&E), tendered for filing a Notice of Cancellation with Narrative Statement to terminate the Electric Service Agreement between CG&E and The West Harrison Gas and Electric Company (West Harrison).

CG&E requests that the termination be effective as of January 1, 2001, the date of the merger of West Harrison with PSI Energy, Inc., whereupon West Harrison will cease to exist as a legal entity.

Copies of the filing were served upon the affected customer and the Public Utilities Commission of Ohio and the Indiana Utility Regulatory Commission.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

37. Allegheny Energy Supply Company, LLC

[Docket No. ER01–811–000]

Take notice that on December 27, 2000, Allegheny Energy Supply Company, LLC (AE Supply), tendered for filing proposed amendments to its market rate tariff and code of conduct all as more fully described in the Application.

AE Supply requests an effective date of December 28, 2000.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

38. Geysers Power Company LLC

[Docket No. ER01–812–000]

Take notice that on December 27, 2000, Geysers Power Company, LLC (Geysers Power), tendered for filing its updated Rate Schedules for the calendar year 2001 for Reliability Must-Run services provided to the California Independent System Operator Corporation (CAISO) pursuant to the Geysers Main RMR Agreement accepted by the Commission in *California ISO Corp., et al.*, 87 FERC ¶ 61,250 (1999).

Copies of this filing have been served upon the CAISO, the California Public Utilities Commission, and Pacific Gas and Electric Company.

Comment date: January 18, 2001, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of these filings are on file with the Commission and are available for public inspection. This filing may also be viewed on the Internet at *http://www.ferc.fed.us/online/rims.htm* (call 202–208–2222 for assistance).

David P. Boergers,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP00–36–000]

Guardian Pipeline, L.L.C.; Notice of Availability of the Final Environmental Impact Statement for the Proposed Guardian Pipeline Project

January 5, 2001.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared this final environmental impact statement (final EIS) on natural gas pipeline facilities proposed by Guardian Pipeline, L.L.C. (Guardian) in the above-referenced docket.

The final EIS was prepared to satisfy the requirements of the National Environmental Policy Act. The staff concludes that approval of the proposed project, with appropriate mitigating measures as recommended, would have limited adverse environmental impact. The final EIS evaluates alternatives to the proposal, including system alternatives; route alternatives; route variations, and minor route variations.

The final EIS addresses the potential environmental effects of the construction and operation of the following facilities in Illinois and Wisconsin:

- 141.3 miles of 36-inch-diameter pipeline extending from Joliet, Illinois to Ixonia, Wisconsin;
- 8.5 miles of 16-inch-diameter lateral pipeline in Walworth and Waukesha Counties, Wisconsin (Eagle Lateral);
- A total of 0.11, 24, and 16-inch-diameter pipeline to connect the project to existing pipeline systems in Will County, Illinois;

One 22,225-horsepower compressor station (Joliet Compressor Station) in Will County, Illinois;

- Seven new meter stations; and
- Associated pipeline facilities, including eight mainline valves.

The purpose of the Guardian Pipeline Project is to transport up to 750,000 decatherms per day of natural gas from the Chicago Hub to markets in northern Illinois and Wisconsin.

Wisconsin Gas Company (WGC) also proposes to construct about 35 miles of 30-, 24-, and 16-inch diameter pipeline (WGC Lateral Line Project) extending eastward from the northern terminus of the Guardian Pipeline in Wisconsin. WGC's Lateral Line Project is under the jurisdiction of the Public Service Commission of Wisconsin (PSCW). Although these facilities are not under the jurisdiction of the FERC, they are analyzed in this final EIS. The PSCW is participating in the EIS process as a cooperating agency, as is the Wisconsin Department of Natural Resources.

This final EIS has been placed in the public files of the FERC and is available for public inspection at: Federal Energy Regulatory Commission, Public Reference and Files Maintenance Branch, 888 First Street, NE., Washington, DC 20426, (202) 208–1371.

Copies of the final EIS have been mailed to Federal, state, and local agencies, public interest groups, individuals who have requested the final EIS, newspapers, and parties to this proceeding. In addition, a limited number of copies are available from the Public Reference and Files Maintenance Branch identified above.

Additional information about the proposed project is available from the Commission's Office of External Affairs, at (202) 208–1008 or on the FERC Internet website (*www.ferc.fed.us*) using the ''RIMS'' link to information in this docket number. Click on the ''RIMS'' link, select ''Docket #'' from the RIMS Menu, and follow the instructions. For assistance with access to RIMS, the RIMS helpline can be reached at (202) 208–2222.

Similarly, the ''CIPS'' link on the FERC Internet website provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings. From the FERC Internet website, click on the ''CIPS'' link, select ''Docket #'' from the CIPS menu, and follow the instructions. For assistance with access to CIPS, the CIPS helpline can be reached at (202) 208–2474.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice of Transfer of License and Soliciting Comments, Motions To Intervene, and Protests

January 5, 2001.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Application Type:* Transfer of License.

b. *Project No.:* 11351–008.

c. *Date Filed:* September 26, 2000, as supplemented December 7, 2000.

d. *Applicants:* Debra Whitehead and William S. Woods.

e. *Name of Project:* Old Columbia Dam.

f. *Location:* On the Duck River in Columbia County, Tennessee. The project does not utilize federal or tribal lands.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* William S. Woods, 505 Riverside Drive, Columbia, TN 38401, (931) 388–3292.

i. *FERC Contact:* Regina Saizan, (202) 219–2673.

j. *Deadline for filing comments and or motions:* January 31, 2001.

All documents (original and eight copies) should be fled with: David P. Boergers, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. Comments and protests may be filed electronically via the internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site at *http://www.ferc.fed.us/efi/doorbell.htm.*

Please include the Project Number (11351–008) on any comments or motions filed.

k. *Description of Transfer:* The applicants seek Commission approval to transfer the license for the project, which was the subject of bankruptcy proceedings, to Mr. Woods. Mr. Woods purchased the project's generating equipment at an auction sale.

l. *Location of the Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE., Room 2A, Washington, DC 20426, or by calling (202) 208–1371. This filing may be viewed on *http://www.ferc.fed.us/online/rims.htm* (call (202) 208–2222 for assistance). A copy is also available for inspection and reproduction at the address in item h above.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, 214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title ''COMMENTS'', ''RECOMMENDATIONS FOR TERMS AND CONDITIONS'', ''PROTEST'', OR ''MOTION TO INTERVENE'', as applicable, and the Project Number of the particular application to which the filing refers. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

David P. Boergers,

Secretary.

BILLING CODE 6717–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Statement of Organization, Functions and Delegations of Authority

Part A (Office of the Secretary), Chapter AE (Office of the Assistant Secretary for Planning and Evaluation (OASPE), of the Statement of Organization, Functions and Delegation of Authority for the Department of Health and Human Services (most recently amended at 63 FR 48 on March 12, 1998) is amended as follows:

I. Chapter AE, paragraph C. ''The Office of Health Policy,'' delete in its entirety and replace with the following:

C. The Office of Health Policy—The Office of Health Policy is responsible for policy development and coordination—including policy and long-range planning; policy, economic, program, and budget analyses; review of regulations and formulation of budget and legislation—and for the conduct and coordination of research, evaluation, and information dissemination on issues relating to health policy. In these matters, the office works closely with the Public Health Service components and the Health Care Financing Administration.

1. The Division of Health Financing Policy is responsible for functions related to the Department's health financing programs, primarily Medicare, SCHIP, and Medicaid and policies affecting health care financing and health care costs. Formulate and analyze alternative legislative and regulatory proposals: conduct short-term policy analyses and evaluations on the efficacy of existing and potential policies and programs in terms of cost, effectiveness and other variables; and synthesize technical analyses performed outside of the Government in a manner that is relevant to policy formulation.

2. The Division of Public Health Systems is responsible for functions related to public health programs and policies. Relevant topic areas include disease control; health promotion and disease prevention; health care resources development; health care and services delivery; alcohol, drug abuse and mental health services; as well as biomedical research and food and drug safety, to the extent these issues pertain to the application of public health practices. Conduct and prepare studies on the design and effectiveness of health promotion, disease prevention, and disease control activities undertaken by both the public and private sectors. Conduct policy research and evaluation studies characterizing the relationship between the medical services delivery system and population-based public health services, as well as examining the interaction of public health entities at all levels of government, to explore the structure, function, capacity, and practices of the public health system.

3. The Division of Health Delivery Systems is responsible for functions related to health services, health organizations and health delivery systems. Topics include consumer issues such as quality and consumer protections; private insurance; health care organization and financial issues. Analyze trends in the private health care sector; prepare and conduct studies on the interactions of the private and public health care sectors in terms of cost effectiveness, service levels and effects on consumers; analyze alternative legislative and regulatory proposals; prepare short-term policy analyses and evaluations of existing and potential policies and programs, particularly those that cut across the Department's program areas. The Division also coordinates work and plays a liaison role across the Department and with other Departments (including Treasury, Justice and Labor).

4. The Division of Health Policy Research and Planning is responsible for all functions related to the development of a comprehensive research, information, and analytical program to gain basic information in the areas of health services and financing focusing on health policy issues. Plan and implement health services and financing research to respond to OS analytic needs, including information sharing and coordination across Federal agencies and OPDIV's, and collaborations or partnerships with the health services research community. As part of this function the Division coordinates closely with other ASPE and OPDIV offices on health data and health information policy issues. The Division also works closely with the ASPE Division of Data Policy and OPDIV offices on the identification and coordination of cross-cutting health data information policy issues, and brings such issues to the HHS Data Council for consideration and resolution. The Division also directs, manages, and conducts a cross-cutting analyses, research, evaluation, and legislative and budget activities for health services and financing policy initiatives focusing on health policy issues.

II. Chapter AE, paragraph F. ''The Office of Science Policy,'' delete in its entirety and replace with the following:

F. The Office of Science Policy—The Office of Science Policy (OSP) is responsible for guiding and coordinating the development of science policy throughout the Department. As directed by the Secretary of the ASPE, OSP establishes and leads broadly representative, multi-office working groups to develop policy initiatives related to complex science and technology issues that cut across the missions of several entities within the Department. OSP generally leads these working groups in presentations to the Secretary, other senior DHHS staff, to members and/or staff of the Congress, and to others outside DHHS.

OSP is the OASPE lead on issues or initiatives that are heavily science-based, including public health issues that involve complex and/or rapidly evolving science and technology. OSP is responsible for guiding and coordinating the incorporation of science-policy considerations within regulatory proposals, legislative proposals, Congressional testimony, press releases, and other public documents describing major Departmental initiatives. OSP provides critique and advice regarding the science-policy content of such documents, which typically originate from DHHS Operating Divisions or other units within the Office of the Secretary. In selected instances, OSP initiates and directs the development of such documents.

OSP is responsible for creating and maintaining effective communication with scientific and technical communities outside the Department regarding science-policy issues. This includes liaison with the Office of Science and Technology Policy, Executive Office of the President. It also includes active participation in inter-agency science and technology activities (such as those sponsored by the National Science and Technology Council) and government/private-sector collaborations related to science policy (such as those sponsored by the National Academy of Sciences). These duties also include service as the Secretary's representative in meetings with leaders of research universities, scientific societies, professional associations, and industrial organizations involved in biomedical, behavorial, or social-science research or in the delivery of health and human services. In all of these areas, OSP staff coordinate their activities as appropriate with those of other components within OASPE; with other components and officials of the Office of the Secretary (including the Assistant Secretary for health in his/her role as the Secretary's senior advisor on public health and science); and with the Operating Divisions of the Department.

Dated: January 4, 2001.

John J. Callahan,

Assistant Secretary for Management and Budget.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–01–15]

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 639–7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques for other forms of information technology. Send comments to Anne O'Connor, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS–D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

Proposed Project

Alaska Air Carrier Operator and Pilot Survey—NEW—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC). The mission of the National Institute for Occupational Safety and Health is to promote safety and health at work for all people through research and prevention.

There is evidence that a disproportionate number of all U.S. aircraft crashes occur in Alaska. Between 1990–1998 there were 823 commuter and air taxi crashes in the U.S., of which 229 (28 percent) were fatal, resulting in 653 deaths. Alaska accounted for 304 (37 percent) of the total crashes, 49 of which were fatal (21 percent of the U.S. fatal crashes), resulting in 131 deaths (20 percent of all U.S. deaths) (NTSB Aviation Accident Database, 1999). Aviation crashes are now the leading cause of occupational fatalities in Alaska.

To address this compelling occupational issue in Alaska, Congress supported implementation of a federal initiative to reduce aviation-related injuries and fatalities. The initiative is a three-year commitment led by a partnership of four federal agencies who share an interest in promoting aviation safety and preventing aircraft crashes—the Federal Aviation Administration (FAA), the National Transportation Safety Board (NTSB), National Weather Service (NWS), and the National Institute for Occupational Safety and Health (NIOSH). The purpose of this joint initiative is to reduce the number of aircraft crashes and deaths, and promote aviation safety within the air transportation industry in Alaska.

This initiative complements another federal/industry initiative to reduce aviation fatalities—the Capstone Program. The Capstone Program, currently implemented in the Bethel, Alaska area includes installation of improved avionics in aircraft used in FAR Part 135 operations, an improved ground infrastructure for weather information, data link communications and Flight Information Services, and the development of new GIS-based non-precision instrument approaches at remote airports.

As part of these initiatives, air carrier operators and pilots will be surveyed to obtain information on what they perceive are the risks and hazards contributing to aircraft accidents in Alaska, their opinions about current safety programs, and what they think could be done to improve aviation safety. This information will be analyzed to identify common risk factors, compare them to risk factors identified from analysis of accident reports and published literature, and assess the effectiveness of current and new potential safety interventions. These findings will be useful to Alaska's air transportation industry for trend information to evaluate interventions.

To reduce the total respondent burden and increase efficiency in data collection, we are coordinating and combining the information gathering process for both the joint initiative and a safety study of the Capstone initiative into one effort. The joint initiative will conduct two statewide surveys: approximately 400 participants in the air carrier operator survey and 500 participants in the pilot survey. The Capstone safety study will add questions to both surveys for respondents in the implementation area, and in addition will continue to survey pilots using Capstone equipment for the duration of that program (through fall 2002). Follow up surveys to assess the effectiveness of the implementation measures would re-survey approximately half of the original statewide sample: about 200 air carrier operators and 250 pilots.

We will use the results of the initial statewide surveys to (1) recommend ways to improve air transportation safety; (2) identify measures to put the recommendations into effect; and (3) guide the ongoing research. Follow up surveys will assess the effectiveness of the program and identify potential improvements. We will use the results of the Capstone study surveys to assess the effectiveness of that program and to recommend improvements. The information can be obtained only from the respondents, as it requests information on skills, knowledge, attitudes, and business practices for which no other source is available.

Based on an average wage of $20.00 per hour for all respondents, the total annual cost is $15,400.

Survey	No. of respondents	No. of responses/ respondent	Avg. burden per response (in hrs.)	Total burden (in hrs.)
J1a. Statewide Operators	400	1	30/60	200
J2a. Statewide Pilots	500	1	30/60	250
C1. Additional questions: Capstone area operators	30	1	15/60	7.5
C2. Additional questions: Capstone area Pilots	50	1	15/60	12.5
C3. Capstone pilots not included in statewide survey	150	1	30/60	75
J1b. Post Implementation: Operators	200 (sample from J1a)	1	30/60	100

Survey	No. of respondents	No. of responses/ respondent	Avg. burden per response (in hrs.)	Total burden (in hrs.)
J2b. Post Implementation: Pilots	250 (sample from J1b)	1	30/60	125
Total				770

Dated: January 3, 2001.

Nancy Cheal,

Acting Associate Director for Policy, Planning and Evaluation Centers for Disease Control and Prevention (CDC).

Centers for Disease Control and Prevention

Disease, Disability, and Injury Prevention and Control Special Emphasis Panel (SEP): Prevention Education and Access to Care Services for Persons Infected and Affected by HIV

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC) announces the following meeting.

Name: Disease, Disability, and Injury Prevention and Control Special Emphasis Panel (SEP): Prevention Education and Access to Care Services for Persons Infected and Affected by HIV, Program Announcement ı01012, meeting.

Times and Dates: 9 a.m.–9:30 a.m., February 5, 2001 (Open). 9:30 a.m.–4:30 p.m., February 5, 2001 (Closed).

Place: National Center for HIV, STD, and TB Prevention, CDC, 8 Corporate Square Blvd., Conference Room 1A, B, and C, Atlanta, Georgia 30329.

Status: Portions of the meeting will be closed to the public in accordance with provisions set forth in section 552b(c)(4) and (6), Title 5 U.S.C., and the Determination of the Associate Director for Management and Operations, CDC, pursuant to Public Law 92–463.

Matters To Be Discussed: The meeting will include the review, discussion, and evaluation of applications received in response to Program Announcement #01012.

FOR FURTHER INFORMATION CONTACT: Elizabeth A. Wolfe, Prevention Support Office, National Center for HIV, STD, and TB Prevention, CDC, Corporate Square Office Park, 8 Corporate Square Boulevard, M/S E07, Atlanta, Georgia 30329, telephone 404/639–8025.

The Director, Management Analysis and Services office has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Dated: January 5, 2001.

Carolyn J. Russell,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention CDC.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

[HCFA–2112–N]

Medicaid Program; Infrastructure Grant Program To Support the Competitive Employment of People With Disabilities

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice.

SUMMARY: This notice announces the availability of our funding, through grants, for eligible States under the Ticket to Work and Work Incentives Improvement Act of 1999. The grant program is designed to assist States in developing infrastructures to support the competitive employment of people with disabilities by extending necessary Medicaid coverage to these individuals. This notice also contains pertinent information where States may apply for the grant program.

DATES: States should submit a notice of intent to apply for a grant no later than March 15, 2001.

Deadline for Grant Submission: Grant applications must be submitted by May 21, 2001 to be considered under the Fiscal Year 2002 annual funding cycle.

ADDRESSES: Standard application forms and related instructions are available from and must be formally submitted to: Marilyn Lewis-Taylor, Health Care Financing Administration, Office of Internal Customer Support, AGG, Grants Management Staff, Mail Stop C2–15–21, 7500 Security Boulevard, Baltimore, Maryland 21244–1850, (410) 786–5701, Internet:*Mlewistaylor@hcfa.gov.*

Please note: While State agencies are only required to submit an original and two copies, submission of an original and *14 copies* will greatly expedite the application process.

Website: You may access up-to-date information about the Medicaid Infrastructure Grants and obtain a complete Grant Solicitation at: *http://www.hcfa.gov/medicaid/twwiia/twwiiahp.htm.*

FOR FURTHER INFORMATION CONTACT: Questions about the grants may be directed to: Joe Razes, TWWIIA Program Manager, Disabled and Elderly Health Programs Group, Center for Medicaid and State Operations, Health Care Financing Administration, Room S2–14–26, 7500 Security Boulevard, Baltimore, MD 21244–1850, (410) 786–6126, Internet:JRazes@hcfa.gov.

SUPPLEMENTARY INFORMATION: On May 31, 2000, we published a notice in the **Federal Register** (65 FR 34715) to announce our availability of funding, through grants, for eligible States under the Ticket to Work and Work Incentives Improvement Act of 1999. In that notice, we solicited eligible States to apply for those grants to provide financial assistance for the Competitive Employment of People with Disabilities under the Medicaid program. States that wish to apply for these grants and desire further detailed information, such as application requirements, review procedures, an explanation of a timely submission, and other relevant information, should refer to the above-mentioned **Federal Register** notice and Website listed.

Authority: Section 203 of the Ticket to Work and Work Incentive Improvement Act of 1999, Public Law 106–170. (Catalog of Federal Domestic Assistance Program No. 93.779, Health Care Financing Research, Demonstration, and Evaluations)

Dated: January 5, 2001.

Robert A. Berenson,

Acting Deputy Administrator, Health Care Financing Administration.

Proposed Collection; Comment Request; Validation of Questionnaires Used for Occupational Exposure Assessment in Case-Control Studies: Occupational History Questionnaire With Foundry Worker and Textile Industry Job Modules

SUMMARY: In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, for opportunity for public comment on proposed data collection projects, the National Cancer Institute (NCI) will publish periodic summaries of proposed projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

Proposed Collection

Title: Validation of Questionnaires Used for Occupational Exposure Assessment in Case-Control Studies: Occupational History Questionnaire with Foundry Worker and Textile Industry Job Modules.

Type of Information Collection Request: New.

Need and Use of Information Collection: This study will investigate the validity and reliability of exposure assessments based on occupational history questionnaires supplemented with industry specific job modules as compared to exposure assessments made based on actual measurement taken in the workplace environments. The results will be used to assess the potential magnitude of exposure misclassification in case-control studies using these types of exposure assessment methods.

Frequency of Response: One time study.

Affected Public: Large and small factories in Shanghai, China.

Type of Respondents: Factory workers.

The annual burden is as follows:

Estimated Number of Respondents: 120.

Estimated Number of Responses per Respondent: 1.

Average Burden Hours per Respondent: 0.5 hours.

Estimated Total Annual Burden Hours Requested: 60.

Request for Comments

Written comments and/or suggestions from the public and affected agencies are invited on one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility and clarity of the information to be collected; and (4) Ways to enhance the quality, utility and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments Due Date

Comments regarding this information collection are best assured of having their full effect if received on or before March 12, 2001.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and instruments, contact Dr. Joseph Coble, Project Officer, National Cancer Institute, 6120 Executive Blvd, EPS 8110, Rockville, MD 20892–7240, or call non-toll free number (301) 435–4702, email your request to *jcoble@mail.nih.gov.*

Dated: January 3, 2001.

Reesa Nichols,

NCI Project Clearance Liaison.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Cancer Institute; Opportunity for a Cooperative Research and Development Agreement (CRADA) for the Identification and Development of Chemical Compounds That Interact With the Polo-Box of Polo Kinases, as Potential Therapeutic Targets for the Inhibition of Cellular Proliferation

National Cancer Institute (NCI) has extended the deadline for submission of written notices and proposals regarding the CRADA opportunity described in the **Federal Register** Notice number 213, volume 65, dated November 2, 2000.

AGENCY: National Institutes of Health, PHS, DHHS.

ACTION: Notice of extension of announcement of opportunity for a Cooperative Research and Development Agreement (CRADA) for the identification and development of chemical compounds that interact with the polo-box of polo kinases, as potential therapeutic targets for the inhibition of cellular proliferation.

SUMMARY: Members of the polo subfamily of protein kinases play important roles in cell proliferation, and regulation of polo kinases may be crucial in the control of cell division. The polo kinases contain a distinct region of homology in the C-terminal non-catalytic domain, termed the polo-box. Scientists from the National Cancer Institute (NCI) have demonstrated that over-expression of this non-catalytic C-terminal domain in budding yeast results in a dominant-negative inhibition of cell division. NCI seeks a Cooperative Research and Development Agreement (CRADA) Collaborator to aid in the identification and development of chemical compounds that interact with the polo-box of polo kinases, as potential therapeutic targets for the inhibition of cellular proliferation.

DATES: Interested parties should notify this office in writing of their interest in filing a formal proposal on or before March 12, 2001. Potential CRADA Collaborators will then have until on or before April 11, 2001 to submit a formal proposal. CRADA proposals submitted thereafter may be considered if a suitable CRADA Collaborator has not been selected.

ADDRESSES: Inquiries and proposals regarding this opportunity should be addressed to Laura A. Henmueller, Ph.D., Technology Development Specialist (Tel: 301–496–0477, FAX: 301–402–2117), Technology Development and Commercialization Branch, National Cancer Institute, 6120 Executive Blvd., Suite 450, Rockville, MD 20852. Inquiries directed to obtaining patent license(s) needed for participation in the CRADA opportunity should be addressed to Vasant Gandhi, J.D., Ph.D., Technology Licensing Specialist, Office of Technology Transfer, National Institutes of Health, 6011 Executive Blvd., Suite 325, Rockville, MD 20852, (Tel: 301–496–7056, ext. 224, FAX: 301–402–0220).

SUPPLEMENTARY INFORMATION: A Cooperative Research and Development Agreement (CRADA) is the anticipated joint agreement to be entered into with NCI pursuant to the Federal Technology Transfer Act of 1986 and Executive Order 12591 of April 10, 1987 as amended. NCI is looking for a CRADA partner to aide NCI in the identification and development of chemical compounds which act as polo-box inhibitors. The expected duration of the

CRADA would be from one (1) to five (5) years.

Members of the polo subfamily of protein kinases appear to play pivotal roles in cell division and proliferation. These include mammalian Plk, Snk, and Fnk/Prk, *Xenopus laevis* Plx1, *Drosophila melanogaster* polo, *Schizosaccharomyces pombe* Plo1, and *Saccharomyces cerevisiae* Cdc5. The polo subfamily members are characterized by the presence of a distinct region of homology in the C-terminal non-catalytic domain, termed the polo-box, which is essential for subcellular localization and mitotic functions of the polo kinases. Regulation of polo kinases may be crucial in the control of cell division. In mammalian cells, Plk is expressed at high levels in mitotically active cells and in tumors of various origins. Constitutive expression of Plk in NIH3T3 cells induces oncogenic focus formation, and these Plk-transformed cells can form tumors in nude mice. These data suggest that Plk expression is closely related to cellular proliferation, and that uncontrolled Plk expression may lead to the development of cancers in humans. Genetic and biochemical analyses indicate that polo kinases regulate diverse cellular events at various stages of the M phase. In addition to their roles in spindle formation and centrosome maturation, polo kinases appear to regulate important biochemical steps at the G2/M transition, such as activation of Cdc2 through Cdc25C phosphatase, DNA damage checkpoint adaptation, and activation of the anaphase-promoting complex (APC) in various eukaryotic systems. In addition, recent data suggest that polo kinases play important roles in cytokinesis.

In budding yeast, overexpression of the non-catalytic C-terminal domain of either Plk or Cdc5 (plkΔN or cdc5ΔN), but not the corresponding polo-box mutant, results in severe connected cell morphology. Provision of functional Cdc5 remedies this phenotype, indicating that over-expression of *cdc*5Δ*N* or *plk*Δ*N* results in a dominant-negative inhibition of cell division and that an intact polo-box is required for this event. These data raise an intriguing possibility that conditional expression of the polo-box domain may selectively inhibit the mitotic functions of polo kinases. Furthermore, our observation suggests that the polo-box peptide may act as a potential anti-cancer therapeutic agent. Alternatively, isolation of small chemical compounds that bind to the polo-box and interfere with its function may yield a strategy to regulate highly proliferative malignant cells. We have developed two yeast strains that conditionally express the polo-box domains of Plk (KLY1212) or Cdc5 (KLY1083). Isolation of chemical compounds alleviating the dominant-negative cell division defect of these strains may lead to identification of polo-box inhibitors. Since the polo-box is an essential and unique domain for polo kinases, these inhibitors may likely provide selective tools to control the cell proliferation without interfering with other protein kinases.

The described methods are the subject of a U.S. provisional patent application filed May 23, 2000 by the Public Health Service on behalf of the Federal Government. Furthermore, the initial report and characterization of the invention is described in: Song S, and Lee KS. A novel function of *Saccharomyces cerevisiae* CDC5 in cytokinesis (submitted for publication). Further reference to the invention can be found in: (1) Song S, Grenfell TZ, Garfield S, Erikson RL, and Lee KS. (2000). Essential function of the polo box of Cdc5 in subcellular localization and induction of cytokinetic structures. Mol. Cell. Biol. 20, 286–298, and (2) Lee KS, Grenfell TZ Yarm, FR, and Erikson RL (1998). Mutation of the polo-box disrupts localization and mitotic functions of the mammalian polo kinase Plk. Proc. Natl. Acad. Sci. USA 95:9301–9306.

Under the present proposal, the goal of the CRADA will involve the following:

(1) Identification and isolation of chemical compounds that alleviate the dominant-negative cell division defect of yeast strains that conditionally express the polo-box domains of Plk or Cdc5.

(2) Development of these chemical compounds as tools to control cellular proliferation without interfering with other protein kinases.

Party Contributions

The role of the NCI in the CRADA may include, but not be limited to:

1. Providing intellectual, scientific, and technical expertise and experience to the research project.

2. Providing the CRADA Collaborator with information and data relating to polo kinases.

3. Planning research studies and interpreting research results.

4. Carrying out research which validates and expands on the role of the dominant-negative inhibition of cell proliferation found using the intact polo-box.

5. Publishing research results.

6. Developing additional potential applications related to inhibition of cell proliferation using polo-box inhibitors.

The Role of the CRADA Collaborator May Include, but Not Be Limited To:

1. Providing significant intellectual, scientific, and technical expertise or experience to the research project.

2. Planning research studies and interpreting research results.

3. Providing technical and/or financial support to facilitate scientific goals and for further design of applications of the technology outlined in the agreement.

4. Publishing research results.

Selection Criteria for choosing the CRADA collaborator may include, but not be Limited to:

1. A demonstrated record of success in the areas of isolation, purification, characterization, and therapeutic development of chemical compounds.

2. A demonstrated background and expertise in cancer-related sciences.

3. The ability to collaborate with NCI on further research and development of this technology. This ability will be demonstrated through experience and expertise in this or related areas of technology indicating the ability to contribute intellectually to ongoing research and development.

4. The demonstration of adequate resources to perform the research and development of this technology (*e.g.* facilities, personnel and expertise) and to accomplish objectives according to an appropriate timetable to be outlined in the CRADA Collaborator's proposal.

5. The willingness to commit best effort and demonstrated resources to the research and development of this technology, as outlined in the CRADA Collaborator's proposal.

6. The demonstration of expertise in the commercial development and production of products related to this area of technology.

7. The level of financial support the CRADA Collaborator will provide for CRADA-related Government activities.

8. The willingness to cooperate with the National Cancer Institute in the timely publication of research results.

9. The agreement to be bound by the appropriate DHHS regulations relating to human subjects, and all PHS policies relating to the use and care of laboratory animals.

10. The willingness to accept the legal provisions and language of the CRADA with only minor modifications, if any. These provisions govern the distribution of future patent rights to CRADA inventions. Generally, the rights of ownership are retained by the organization that is the employer of the inventor, with (1) the grant of a license

for research and other Government purposes to the Government when the CRADA Collaborator's employee is the sole inventor, or (2) the grant of an option to elect an exclusive or nonexclusive license to the CRADA Collaborator when the Government employee is the sole inventor.

Dated: December 19, 2000.

BILLING CODE 4140–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Neurological Disorders and Stroke; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant application, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Neurological Disorders and Stroke Special Emphasis Panel.

Date: January 9, 2001.

Time: 2:00 pm to 4:00 pm.

Agenda: To review and evaluate grant applications.

Place: Neuroscience Center, National Institutes of Health, 6001 Executive Blvd., Bethesda, MD 20892, (Telephone Conference Call).

Contact Person: Raul A. Saavedra, PhD, Scientific Review Administrator, Scientific Review Branch, Division of Extramural Research, NINDS/NIH/DHHS, Neuroscience Center, 6001 Executive Blvd., Suite 3208, MSC 9529, Bethesda, MD 20892–9529, 301–496–9223.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

(Catalogue of Federal Domestic Assistance Program Nos. 93.853, Clinical Research Related to Neurological Disorders; 93.854, Biological Basis Research in the Neurosciences, National Institutes of Health, HHS)

Dated: January 4, 2001.

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel.

Date: January 3, 2001.

Time: 12 PM to 2 PM.

Agenda: To review and evaluate grant applications.

Place: NIH, Rockledge 2, Bethesda, MD 20892, (Telephone Conference Call).

Contact Person: Elliot Postow, PHD, Scientific Review Administrator, Division of Clinical and Population-Based Studies, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4160, MSC 7806, Bethesda, MD 20892, (301) 435–0911, postowe@csr.nih.gov.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

Name of Committee: Center for Scientific Review Special Emphasis Panel.

Date: January 4, 2001.

Time: 2 PM to 5 PM.

Agenda: To review and evaluate grant applications.

Place: NIH, Rockledge 2, Bethesda, MD 20892, (Telephone Conference Call).

Contact Person: Joanne T. Fujii, PHD, Scientific Review Administrator, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5218, Bethesda, MD 20892, (301) 435–1178, fujiij@drg.nih.gov.

DEPARTMENT OF HOUSING AND URBAN AND DEVELOPMENT

[Docket No. FR–4561–N–85]

Notice of Submission of Proposed Information Collection to OMB; Multifamily Coinsurance Claims Packages, Section 223(f)

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proopsal.

DATES: *Comments Due Date:* March 12, 2001.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB approval number (2502–0420) and should be sent to: Joseph F. Lackey, Jr., OMB Desk Officer, Office of Management and Budget, Room 10235, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Wayne Eddins, Reports Management Officer, Q, Department of Housing and Urban Development, 451 Seventh Street, Southwest, Washington, DC 20410; e-mail *Wayne_Eddins@HUD.gov;* telephone (202) 708–2374. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Eddins.

SUPPLEMENTARY INFORMATION: The Department has submitted the proosal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35). The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the OMB approval number, if applicable; (4) the description of the need for the information and its proposed use; (5) the agency form number, if applicable; (6) what members of the public will be affected by the proposal; (7) how frequently information submissions will be required; (8) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of responses, and hours of response; (9) whether the proposal is new, an extension, reinstatement, or revision of

an information collection requirement; and (10) the name and telephone number of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

This Notice also lists the following information:

Title of Proposal: Multifamily Coinsurance Claims Pacakage, Section 223(f).

OMB Approval Number: 2502–0420.

Form Numbers: HUD–27008, 27009B, 27009D, 27009F.

Description of the Need for the Information and Its Proposed Use: Mortgagees submit Section 223(f) Coinsurance Claims when an insured mortgage is defaulted. HUD computes the claim settlement due the mortgage from the information collected on the subject package.

Respondings: Business or other for-profit, State, Local or Tribal Government.

Frequency of Submission: On occasion.

Reporting Burden:

Number of respondents	x	Frequency of response	×	Hours of response	=	Burden hours
12		1		6		72

Total Estimated Burden Hours: 72.

Status: Reinstatement, with change.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 35, as amended.

Dated: January 4, 2001.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Advisory Board for Exceptional Children

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, the Bureau of Indian Affairs announces a meeting of the Advisory Board for Exceptional Children in Tempe, Arizona, to discuss the impact of Public Law 105–17, the Individuals with Disabilities Education Act Amendments of 1997, on Indian children with disabilities.

DATES: The Board will meet from 8 a.m. to 4:30 p.m. on Thursday, January 18, 2001; from 8 a.m. to 4:30 p.m. on Friday, January 19, 2001; and from 9 a.m. to 12 p.m. (MST) on Saturday, January 20, 2001

ADDRESSES: The meetings will be held at the Holiday Inn-Tempe/Arizona State University, 915 East Apache Boulevard, Tempe, Arizona 85281. Telephone (480) 968–3451; Fax (480) 968–6262.

Written statements may be submitted to William A. Mehojah, Director, Office of Indian Education Programs, Bureau of Indian Affairs, 1849 C Street, NW., MS–3512, Washington, DC 20240; Telephone (202) 208–6123; Fax (202) 208–3312.

FOR FURTHER INFORMATION CONTACT: Dr. Angelita Felix, Lead Education Specialist, Bureau of Indian Affairs, Office of Indian Education Programs, Division of School Improvement, P.O. Box 1088, Albuquerque, New Mexico 87103; Telephone (505) 248–7529.

SUPPLEMENTARY INFORMATION: The purpose of the Board is to provide advice to the Secretary of the Interior, through the Assistant Secretary—Indian Affairs, on the needs of Indian children with disabilities, as mandated by the Individuals with Disabilities Education Act Amendments of 1997, Public Law 105–17, June 4, 1997.

The agenda for this meeting will cover public comments, approval of minutes, executive committee reports, new business: Approval of by laws, annual report, comprehensive system of a personnel development plan, Office of Special Education Program (OSEP) data collection update, Federal Advisory Committee Act requirements, OSEP improvement plan and Division of School Improvement update. The meeting is open to the public.

The next Board meeting will be held on or about June 14, 2001. Location, date, and time may be obtained from the Division of School Improvement, telephone (505) 248–7527 or 7529; Fax (505) 248–7546.

Dated: December 28, 2000.

Kevin Gover,

Assistant Secretary—Indian Affairs.

BILLING CODE 4310–02–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NV–930–1430–ET]

Termination of Segregation; NV

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of termination of segregation.

SUMMARY: This action terminates a portion of the segregation known as the Lincoln Douglas Land Exchange. The land will be opened to the public land laws generally, including the mining and mineral leasing laws.

EFFECTIVE DATE: February 12, 2001.

ADDRESSES: Written comments should be addressed to: Bureau of Land Management, Gene L. Drais, Assistant Field Manager, Nonrenewable Resources, HC 33, Box 33500, Ely, NV 89301–9408.

FOR FURTHER INFORMATION CONTACT: Doris Metcalf, Land Law Examiner, at the above address or telephone (775) 289–1852.

SUPPLEMENTARY INFORMATION: Pursuant to the authority delegated by appendix 1 of Bureau of Land Management Manual 1203 dated November 25, 1998, that portion identified below as being part of the Lincoln Douglas Exchange is hereby terminated in its entirety:

Mount Diablo Meridian, Nevada

T. 6 S., R. 57 E.,
Section 25, NW¼NW¼,
T.5 N., R. 66E.,
Section 15, N½NE¼,
T.5 N., R. 66E.,
Section 26, SW½SW¼,
Section 28, NW¼SE¼.

The area described contains 240 acres in Lincoln County.

The classification made pursuant to the Act of October 21, 1976, amended, and segregated the public land from all other forms of appropriation under the public land laws, including location under the United States mining laws and the mineral leasing laws. The segregation request has been withdrawn, therefore, is no longer needed.

At 10 a.m. on February 12, 2001, the land will be open to the operation of the public land laws and the mineral leasing laws, subject to valid existing rights, existing classifications and withdrawals, and requirements of applicable law. All valid applications received prior to or at 9 a.m. on February 12, 2001, will be considered as simultaneously filed. All other applications received will be considered in order of filing.

At 9 a.m. on February 12, 2001, the lands described above will be opened to location and entry under the United States mining laws, subject to valid existing rights, the provisions of existing withdrawals, other segregations of record, and the requirements of applicable law. Appropriation of lands under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

Dated: December 27, 2000.

Daniel R. Netcher,

Assistant Field Manager, Nonrenewable Resources.

BILLING CODE 4310–HC–M

DEPARTMENT OF THE INTERIOR

Reclamation Bureau

Trinity River Basin Fish and Wildlife Task Force; Meeting

AGENCY: Bureau of Reclamation (Reclamation), Department of the Interior.

ACTION: Notice of public meeting.

SUMMARY: In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92–463), announcement is made of a meeting of the Trinity River Basin Fish and Wildlife Task Force.

DATES: The meeting will be held on Thursday, February 8, 2001, 9 a.m. to 4 p.m.

ADDRESSES: The meeting will be at the Best Western, 1413 Howe Avenue, Sacramento, California 95825. Telephone 916/922–9833 (FAX 916/922–3384).

FOR FURTHER INFORMATION CONTACT: Mr. Russell P. Smith, Chief, Environmental and Natural Resource Division, Northern California Area Office, 1639 Shasta Dam Boulevard, Shasta Lake, California 96019. Telephone: 530/275–1554 (TDD 530/275–8991).

SUPPLEMENTARY INFORMATION: The Trinity River Basin Fish and Wildlife Task Force will meet to formulate and implement the ongoing Trinity River watershed ecosystem management program for fish and wildlife. This program considers the needs of multiple species and their interactions with physical habitats in restoring the natural function, structure, and species composition of the ecosystem, recognizing that all components are interrelated. Topics will include how future decisions for the Trinity Program will be made and the role of the Task Force.

Dated: January 4, 2001.

Lester A. Snow,

Regional Director.

BILLING CODE 4310–MN–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act

In accordance with the policy of the Department of Justice, notice is hereby given that a proposed consent decree in *United States* v. *American Allied Additivies, Inc., et al.,* Civ. No. 1:00CV1014, was lodged with the United States District Court for the Northern District of Ohio, on December 20, 2000. That action was brought against defendants pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) for, *inter alia,* payment of past costs incurred, and future costs to be incurred, by the United States at the American Allied Additives Superfund Site in Cleveland, Ohio. This decree requires seven defendants to pay $23,927.00 in satisfaction of the United States' claims against them for response costs incurred and to be incurred in connection with the site. The United States is continuing litigation and settlement efforts against other defendants in the lawsuit.

The Department of Justice will receive comments relating to the proposed consent decree for a period of 30 days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530. All comments should refer to *United States* v.

American Allied Additives, Inc., et al., D. J. Ref. 90–11–2–1318.

The proposed consent decree may be examined at the office of the United States Attorney for the Northern District of Ohio, 1800 Bank One Center, 600 Superior Avenue, Cleveland, Ohio 44114–2600; and at the Region V office of the Environmental Protection Agency, 777 West Jackson Boulevard, Chicago, Illinois 60604–3590. A copy of the proposed consent decree may be obtained in person or by mail from the Department of Justice Consent Decree Library, P.O. Box 7611, Washington, DC 20044–7611. In requesting a copy, plese enclose a check in the amount of $8.25 (25 cents per page reproduction costs) payable to the Consent Decree Library. When requesting a copy, plese refer to *United States* v. *American Allied Additives, Inc., et al.,* D.J. Ref. 90–11–2–1318.

Bruce S. Gelber,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 01–922 Filed 1–10–01; 8:45 am]

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under the Clean Air Act

Under 28 CFR 50.7, Notice is hereby given that on December 27, 2000, a proposed Consent Decree in *United States and People of the State of Illinois* v. *Archer Daniels Midland Company,* Civil Action No. 00–2338, was lodged with the United States District Court for the Central District of Illinois.

In this action the United States and the People of the State of Illinois seek civil penalties and injunctive relief against Archer Daniels Midland Company (''ADM'') pursuant to Section 113(b) of the Clean Air Act (''CAA''), 42 U.S.C. 7413(b) (1983), amended by, 42 U.S.C. 7413(b) (Supp. 1991), for alleged violations at ADM's Wet Corn Mill Plant located in Decatur, Illinois. Under the settlement, ADM will install venturi scrubbers at fiber feed dryers 5 and 6 at the Wet Corn Mill Plant which will reduce emissions of particulate matter (''PM''). In addition, ADM will pay a civil penalty of $1,463,500, to be equally shared between the United States and the State of Illinois.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the Consent Decree. Comments should be addressed to the Assistant Attorney General, environment and Natural Resources Division, U.S. Department of Justice, P.O. Box 7611, Washington, DC 2044–7611, and should refer to *United States and People of the State of Illinois* v. *Archer Daniels Midland Company,* D.J. Ref. 90–5–2–1–2035/1.

The Consent Decree may be examined at the Office of the United States Attorney for the Central District of Illinois, 600 E. Monroe Street, Springfield, Illinois 62705, and at U.S. EPA Region 5, 77 West Jackson Blvd., Chicago, Illinois 60604. A copy of the Consent Decree may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611. In requesting a copy, please enclose a check in the amount of $8.50 (25 cents per page reproduction cost) payable to the Consent Decree Library.

Bruce Gelber,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act

In accordance with Department of Justice policy codified at 28 CFR 50.7 and section 122 of the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended (''CERCLA''), 42 U.S.C. 9622, notice is hereby given that on December 20, 2000, a proposed consent decree in *United States* v. *Dayton Power & Light Co., et al.*, No. C–3–98–451, was lodged with the United States District Court for the Southern District of Ohio. The consent decree represents a settlement of claims against Robert B. Snyder and the Robert L. Snyder Trust (collectively, ''Settling Defendants'') under CERCLA § 107(a), 42 U.S.C. § 9607(a), for the recovery of response costs incurred or to be incurred by the United States in connection with the Sanitary Landfill (IWD) Superfund Site (''Site'') in Moraine, Ohio. Each of the Settling Defendants is an owner and operator of the Site, which was operated as a licensed landfill by Sanitary Landfill Company and its successor corporations from 1971 to 1980. The U.S. Environmental Protection Agency incurred costs of approximately $1.2 million in responding to the release or threatened release of hazardous substances at the Site. Under the terms of the consent decree, the Settling Defendants agree to pay to the United States $10,000 in response costs within thirty (30) days of entry of the consent decree. In consideration for this payment, the Settling Defendants will receive a covenant not to sue for Site response costs and contribution protection. The settlement is based on the Settling Defendants' limited ability to pay.

For a period of thirty (30) days from the date of this publication, the Department of Justice will receive comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, U.S. Department of Justice, 950 Pennsylvania Avenue, NW, Washington, DC 20530, and should refer to *United States* v. *Dayton Power & Light Co., et al.,* Civil Action No. C–3–98–451; D.J. Ref. No. 90–11–2–1113A.

The consent decree may be examined at the Office of the United States Attorney, 602 Federal Building, 200 W. 2nd Street, Dayton, Ohio 45402, and at the U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604. A copy of the consent decree may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611. In requesting a copy, please enclose a check in the amount of $5.25 (21 pages at 25 cents per page reproduction cost).

Bruce S. Gelber,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under the Clean Air Act, Clean Water Act, RCRA, and EPCRA

Under 28 CFR 50.7, notice is hereby given that on December 22, 2000, a proposed Complaint and Consent Decree in *United States* v. *Koch Petroleum Group, L.P.,* Civil Action No. 00–2756–PAM–SRN, was lodged with the United States District Court for the District of Minnesota.

In this action the United States sought civil penalties and injunctive relief against Koch Petroleum Group, L.P., (''Koch'') pursuant to section 113(b) of the Clean Air Act (''CAA''), 42 U.S.C. 7413(b) (1983), *amended by,* 42 U.S.C. 7413(b) (Supp. 1991), the Resource Conservation and Recovery Act, (''RCRA''), 42 U.S.C. 6901 *et seq.*; the Emergency Planning and Community Right to Know Act (''EPCRA''), 42 U.S.C. 11004(a); and the Clean Water

Act (''CWA''), 33 U.S.C. 1321(b)(3) and (j) for alleged violations at Koch's 3 refineries: Pine Bend, Minnesota, and the East and West refineries in Corpus Christi, Texas. Under the settlement, Koch will implement innovative pollution control technologies to greatly reduce emissions of nitrogen oxides (''NO_X'') and sulfur dioxide (''SO2'') from refinery process units and adopt facility-wide enhanced monitoring and fugitive emission control programs. In addition, Koch will pay a civil penalty of $4.5 million, $3.5 million of which is for settlement of the RCRA claims. The state of Minnesota will join in this settlement as a signatory to the Consent Decree.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, PO Box 7611, U.S. Department of Justice, Washington, DC 20044–7611, and should refer to *United States* v. *Koch Petroleum Group, L.P.,* D.J. Ref. 90–5–2–1–07110.

The Consent Decree may be examined at the Office of the United States Attorney, 234 United States Courthouse, 110 South Fourth Street, Minneapolis, Minnesota 55401 and at U.S. EPA Region 5, 77 West Jackson Blvd., Chicago, Illinois 60604. A copy of the Consent Decree may also be obtained by mail from the Consent Decree Library, PO Box 7611, U.S. Department of Justice, Washington, DC 20044–7611. In requesting a copy, please enclose a check in the amount of $39.50 (25 cents per page reproduction cost) payable to the Consent Decree Library.

Bruce Gelber,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree for Natural Resource Damages Under CERCLA

Notice is hereby given that on December 28, 2000, a proposed consent decree in *United States* v. *Lone Mountain Processing, Inc.,* Civil Action No. 2:00CV00200, was lodged with the United States District Court for the Western District of Virginia.

The consent decree settles claims against Lone Mountain Processing, Inc., under section 107(f) of the Comprehensive Environmental Response, Compensation and Liability Act, as amended, 42 U.S.C. 9607. The releases that give rise to the claims are from coal slurry spills from a coal processing plant owned by Lone Mountain in Lee County, Virginia, and took place on or about August 9, 1996, and October 24, 1996. The releases caused injury to natural resources in the Powell River Wasteshed and injured species and habitat for which the Department of Interior has trusteeship. The Consent Decree settles the natural resource damage claim in exchange for a payment by Lone Mountain of $2,450,000.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the consent decrees. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Lone Mountain Processing, Inc.*, D.J. Ref. 90–5–1–1–06615.

The consent decree may be obtained by mail from the Department of Justice Consent Decree Library, PO Box 7611, Washington, DC 20044–7611. In requesting copies from the Consent Decree Library, please enclose a check in the amount of $3.50 for the consent decree payable to the Consent Decree Library.

Bruce S. Gelber,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Clean Water Act

In accordance with the Departmental policy, 28 U.S.C. 50.7, notice is hereby given that a proposed Consent Decree in *United States of America and State of Louisiana* v. *City of Mandeville, Louisiana,* Civil Action No. 00–366 ''R'' (5) was lodged on December 12, 2000, with the United States District Court for the Eastern District of Louisiana.

The Consent Decree settles an action brought under sections 309(b) of the Clean Water Act (''CWA''), 33 U.S.C. 1319(b). The Consent Decree requires the City of Mandeville, Louisiana (''Mandeville'') to pay a civil penalty to the United States in the amount of $56,500, requires injunctive relief to bring Mandeville into compliance with the Clean Water Act, and provides for interim limits for the discharge of ammonia-nitrogen, biochemical oxygen demand (''BOD''), and total suspended solids (''TSS'') from Mandeville's public sewage treatment plant.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States of America and State of Louisiana* v. *City of Mandeville, Louisiana,* (E.D. La.), DOJ Ref. #90–5–1–1–06613.

The proposed Consent Decree may be examined at the office of the United States Attorney, Eastern District of Louisiana, Hale Boggs Federal Building, 501 Magazine Street, Second Floor, New Orleans, LA 70130, the U.S. Environmental Protection Agency, Region VI, 1445 Ross Avenue, Dallas, Texas 75202; and at the Consent Decree Library, 1120 G Street, NW., Third Floor, Washington, DC 20005, (202) 624–0892. A copy of the proposed Consent Decree may be obtained in person or by mail from the Consent Decree Library, P.O. Box 7611, Washington, DC 20044–7611. When requesting a copy please refer to *United States of America and State of Louisiana* v. *City of Mandeville, Louisiana,* (E.D. La.), DOJ Ref. #90–5–1–1–06613 enclose a check in the amount of $7.00 (25 cents per page reproduction costs), payable to the ''Consent Decree Library.''

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act

In accordance with 28 CFR 50.7 and section 122 of the Comprehensive Response, Compensation and Liability Act (''CERCLA''), 42 U.S.C. 9622, the Department of Justice gives notice that a proposed consent decree in *United States* v. *Mark IV Industries, Inc. et al.,* No. 1:00CV918 (W.D. Mich.), was lodged with the United States District Court for the Western District of Michigan on December 18, 2000, pertaining to the implementation of the United States Environmental Protection

Agency's selected remedial action for the Electro-Voice Superfund Site (''EV Site''), Buchanan, Berrien County, Michigan.

Under the proposed consent decree, Mark IV Industries, Inc. will implement U.S. EPA's selected remedy for operable unit 2 (''OU2'') at the Site, and pay U.S. EPA's oversight costs. The Consent Decree includes a covenant not to sue by the United States under sections 106 and 107 of the Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. 9601 *et seq.* (''CERCLA''), and section 7003 of the Resource Conservation and Liability Act (''RCRA''), 42 U.S.C. 6973.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resource Division, United States Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Mark IV Industries, Inc. et al.,* No. 1:00CV918 (W.D. Mich.), and DOJ Reference No. 90–11–2–07050. Commentors may request an opportunity for a public meeting in the affected area, in accordance with RCRA section 7003(d), 42 U.S.C. 6973(d).

The proposed consent decree may be examined at: (1) The Office of the United States Attorney for the Western District of Michigan, 330 Ionia, NW., Grand Rapids, Michigan 49503 (616) 456–2404; and (2) the United States Environmental Protection Agency (Region 5), 77 West Jackson Boulevard, Chicago, Illinois 60604–3590 (contact Kris Vezner (312–886–6827)) a copy of the proposed consent decree may be obtained by mail from the Consent Decree Library, PO Box 7611, Washington, DC 20044. In requesting a copy, please refer to the referenced case and DOJ Reference Number and enclose a check in the amount of $18.25 for the consent decree only (73 pages at 25 cents per page reproduction costs), or $75.75 for the consent decree and all appendices (303 pages), made payable to the consent Decree Library.

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act

In accordance with the policy of the Department of Justice, notice is hereby given that a proposed consent decree in *United States* v. *Michigan Consolidated Gas Co.,* Civ. No. 01–70007, was lodged with the United States District Court for the Eastern District of Michigan, on January 2, 2001. That action was brought against defendant pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) for payment of past costs incurred, and future costs to be incurred, by the United States at the Lower Ecorse Creek Superfund Site in Wyandotte, Michigan. This decree requires the defendant to pay $230,000.00 in satisfaction of the United States' claims against it for response costs incurred and to be incurred in connection with the site.

The Department of Justice will receive comments relating to the proposed consent decree for a period of 30 days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530. All comments should refer to *United States* v. *Michigan Consolidated Gas Co.,* D.J. Ref. 90–11–3–1744.

The proposed consent decree may be examined at the office of the United States Attorney for the Eastern District of Michigan, 211 W. Fort Street, Suite 2001, Detroit, MI 48226–3211; and at the Region V office of the Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604–3590. A copy of the proposed consent decree may be obtained in person or by mail from the Department of Justice Consent Decree Library, PO Box 7611, Washington, DC 20044–7611. In requesting a copy, please enclose a check in the amount of $4.25 (25 cents per page reproduction costs) payable to the Consent Decree Library. When requesting a copy, please refer to *United States* v. *Michigan Consolidated Gas Co.,* D.J. Ref. 90–11–3–1744.

Bruce S. Gelber,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under the Clean Air Act, Clean Water Act, RCRA, and EPCRA

Under 28 CFR 50.7, notice is hereby given that on December 19, 2000, a proposed Complaint and Consent Decree in *United States* v. *Nucor Corporation*, Civil Action No. 4–00:3945–24, was lodged with the United States District Court for the District of South Carolina.

This is a national, multi-facility, multi-media enforcement action against Nucor Corporation (''Nucor''), a major manufacturer of steel and steel products. This action is brought pursuant to section 113(b) of the Clean Air Act (''CAA''), 42 U.S.C. 7413(b) (1983), *amended by* 42 U.S.C. 7413(b) (Supp. 1991); the Resource Conservation and Recovery Act, (''RCRA''), 42 U.S. 6901 *et seq.*; the Emergency Planning and Community Right to Know Act (''EPCRA''), 42 U.S.C. 11004(a); and the Clean Water Act (''CWA''), 33 U.S.C. 1251 *et seq.* This settlement involves 8 steel mini-mills and 6 steel fabrication facilities located in Alabama, Arkansas, Indiana, Nebraska, South Carolina, Texas, and Utah, in EPA Regions 4, 5, 6, 7, and 8. The Complaint alleges that Nucor violated the Prevention of Significant Deterioration (''PSD'') and New Source Performance Standard (''NSPS'') provisions of the Clean Air Act and that K061 dust, a waste product from the electric arc furnaces (''EAFs'') and a RCRA listed hazardous waste, was disposed of illegally at the facilities and contributed to National Pollution Discharge Elimination System (''NPDES'') permit and Industrial Storm Water violations of the Clean Water Act. In addition, the Complaint alleges that K061 dust has contaminated soil and groundwater at Nucor's steel mills.

The proposed settlement will require Nucor to pilot air pollution control technologies for control of NO_x emissions from its EAFs and reheat furnaces. Nucor will also conduct sampling of ground water and soils at all facilities, identify areas of contamination and perform corrective action in accordance with an EPA-approved RCRA statement of work for each facility. in addition, Nucor will implement enhancements to its management of K061, and its process and storm water to ensure continued compliance with CWA requirements. Nucor will also pay a civil penalty of $9 million, and spend $4 million on Supplemental Environmental Projects. The states of Arkansas, Nebraska, and Utah are joining in this settlement as

Plaintiff-Interveners and will share in the civil penalties. The state of South Carolina will also be a signatory to the Consent Decree under a provision of state law that authorizes its participation, however, South Carolina will not file a separate enforcement action and will not share in the civil penalties.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environmental and Natural Resources Division, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611, and should refer to *United States* v. *Nucor Corporation*, D.J. Ref. 90–5–2–1–06407/1.

The Consent Decree may be examined at the Office of the United States Attorney, 1st Union Building, 1441 Main Street, Suite 500, Columbia, South Carolina 29201 and at U.S. EPA, Multimedia Enforcement Division, Office of Regulatory Enforcement, 1200 Pennsylvania Ave., NW., Washington, DC 20460. A copy of the Consent Decree may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611. In requesting a copy, please enclose a check in the amount of $60.25 (25 cents per page reproduction cost) payable to the Consent Decree Library.

Bruce Gelber,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on December 28, 2000, a proposed Consent Decree in *United States* v. *Puerto Rico Medical Services Administration*, Civil Action No. 00–2620, was lodged with the United States District Court for the District of Puerto Rico. The proposed Consent Decree will resolve the United States' claims under the Clean Air Act, 42 U.S.C. 7401 *et seq.* on behalf of the U.S. Environmental Protection Agency against defendant Puerto Rico Medical Services Administration (''PRMSA'').

Pursuant to the Consent Decree, PRMSA will pay a civil penalty of $65,000. In addition, PRMSA agrees to comply with the New Source Performance Standards (''NSPS'') with respect to two boiler affected facilities, to assure that relevant Puerto Rico Environmental Quality Board (''EQB'') Air permits state that the boilers are subject to Subpart Dc of the NSPS, to combust only low sulfur distillate fuel in both of the boilers, and to conduct a performance test for opacity with respect to one of its boilers. Finally, PRMSA has agreed to finance the performance of a Supplemental Environmental Project at a cost of $100,000.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Any comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, P.O. Box 7611, Ben Franklin Station, Washington, DC 20044, and should refer to *United States* v. *Puerto Rico Medical Services Administration*, Civil Action No. 00–2620, D.J. Ref. 90–5–2–1–06109.

The proposed Consent Decree may be examined at the Office of the United States Attorney, District of Puerto Rico, Federal Office Building, Carlos E. Chardon Avenue, Hato Rey, Puerto Rico 00918, and at Region II, United States Environmental Protection Agency, 290 Broadway, New York, New York 10007. A copy of the proposed Consent Decree may be obtained by mail from the Department of Justice Consent Decree Library, P.O. Box 7611, Ben Franklin Station, Washington, DC 20044. In requesting a copy, please enclose a check (there is a 25 cent per page reproduction cost) in the amount of $9.00 payable to the Consent Decree Library.

Notice of Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act

Notice is hereby given that a consent decree in *United States of America* v. *Sonoco Products Company,* Civil Action No. 00–CV–5802 (E.D. Pa.) was lodged with the court on November 15, 2000.

The proposed consent decree resolves the claims of the United States of America against defendant Sonoco Products Company, under section 107 of the Comprehensive Environmental Response, Compensation and Liability Act, as amended (''CERCLA''), 42 U.S.C. 9607, for past response costs at the Struble Trail Superfund Site located at East Caln Township, in Chester County, Pennsylvania (the ''Site''), which was owned and operated by Downingtown Paper Company, the predecessor by merger to the Defendant, Sonoco Products Company. The decree obligates the Settling Defendant to reimburse $36,936.98 of the United States' past response costs.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611, and should refer to *United States of America* v. *Sonoco Products Company,* DOJ Ref. #90–11–3–07203.

The proposed consent decree may be examined and copied at the Office of the United States Attorney, 615 Chestnut Street, Suite 1250, Philadelphia, PA 19106; or at the Region III Office of the Environmental Protection Agency, c/o Thomas A. Cinti, Assistant Regional Counsel, 1650 Arch Street, Philadelphia, PA 19103. A copy of the proposed consent decree may be obtained by mail from the Consent Decree Library, P.O. Box No. 7611, Washington DC 20044. In requesting a copy, please refer to the referenced case and enclose a check in the amount of $5.25 (25 cents per page reproduction costs), payable to the Consent Decree Library. A copy of the exhibits to the decree may be obtained from the same source for an additional charge.

Notice Pursuant to the National Cooperative Researach and Production Act of 1993—4C Founders

Notice is hereby given that, on November 2, 2000, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* (''the Act''), 4C Founders has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities

of the parties and (2) the nature and objectives of the venture. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to Section 6(b) of the Act, the identities of the parties are Intel Corporation, Santa Clara, CA; International Business Machines Corporation, Armonk, NY; Matsushita Electric Industrial Co., Ltd., Osaka, JAPAN; and Toshiba Corporation, Tokyo, JAPAN. The nature and objectives of the venture are to develop interoperable specifications or the protection of copyrighted digital audio and video content from unauthorized interception and copying; and to promote adoption of the specifications by (i) licensing them on reasonable and nondiscriminatory terms. (ii) providing technical support to adopters, content providers, and other who implement the specifications; (iii) generating and supplying keys for encryption and decryption of the digital content so protected; (iv) providing a means to receive comments and feedback from parties implementing the specifications; and (v) consulting with standards bodies, and others engaged in related specifications efforts, and potential users of the specifications. The 4C Founders' specifications will include information directing specific implementations only as necessary to enable, promote, and improve protection of digital audio and video content; to preserve the security of the protection method; and to promote interoperability of products (including information technology and consumers electronic devices), media which implement the specifications, and the means for distributing content so protected.

In furtherance of the purposes stated above, the 4C Founders may, among other things, engage in theoretical analysis; experimentation; systematic study; research; development; testing; extension of investigative findings or theories of a scientific or technical nature into practical application for experimental and demonstration purposes; collection, exchange and analysis of research or production information; enter into agreements to carry out the objectives of the Founders; establish and operate facilities for conducting such venture conduct such venture on a protected and proprietary basis; prosecute applications for patents and grant licenses for the results of such venture; and any combination of these activities.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Enterprise Computer Telephony Forum

Notice is hereby given that, on October 10, 2000, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* (''the Act''), Enterprise Computer Telephone Forum (''ECTF'') has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership status. The notifications were filed for the purpose of extending the Act's provisions limiting the

recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, StarGen, Inc., Marlborough, MA; ESI, Plano, TX; Karel Elektronik S.A., Ankara, TURKEY; Integrated Device Technology, Inc., Santa Clara, CA; Call Sciences, Inc., Edison, NJ; ADICTI Corp., Taichung, TAIWAN; and Inovax Engenharia de Sistemas Ltd., Rio de Janeiro, BRAZIL have been added as parties to this venture. Also, StarBridge Technologies, Inc., Marlborough, MA has been dropped as a party to this venture.

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and ECTF intends to file additional written notifications disclosing all changes in membership.

On February 20, 1996, ECTF filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on May 13, 1996, (61 FR 22074).

The last notification was filed with the Department on August 2, 2000. A notice was published in the **Federal Register** pursuant to section 6(b) of the Act on October 26, 2000 (65 FR 64236).

Constance K. Robinson,

Director of Operations, Antitrust Division.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—IOPS.ORG Project

Notice is hereby given that, on January 27, 2000, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* (''the Act''), the Corporation for National Research Initiatives (''CNRI'') has filed written notifications simultaneously on behalf of a Cooperative Project between CNRI and participants known as the IOPS.ORG Project (''IOPS'') with the Attorney General and the Federal Trade Commission disclosing changes in its membership status. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, AT&T Global Networking Services, Basking Ridge, NJ; Broadwing Communications Services, Inc., Austin, TX; Cable & Wireless, Washington, DC; Conxion, Santa Clara, CA; and Qwest, Denver, CO have been added as Primary Members of this project. ANS CO+RE Systems, Inc., Elmsford, NY; BBN Corporation, Cambridge, MA; MCI Telecommunications, Washington, DC; PSINet, Inc., Herndon, VA; and UUNET Technologies, Fairfax, VA have been discontinued as Primary Members of this project.

The following companies have changed their names: AT&T Corporation, Basking Ridge, NJ is now AT&T Worldnet, Basking Ridge, NJ; GTE Intelligent Network Systems, Inc., Irving TX is now GTE Internetworking, Irving, TX; NETCOM On-Line Communications Services, Inc., San Jose, CA is now ICG Communications, Englewood, CO; and Sprint Communications Company, LLP, Kansas City, MO is now Sprint Internet Service Center, Kansas City, MO.

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and CNRI intends to file additional written notifications disclosing all changes in membership.

On July 2, 1997, CNRI filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on October 6, 1997 (62 FR 52152).

BILLING CODE 4410–11–M

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance and NAFTA Transitional Assistance

In accordance with section 223 of the Trade Act of 1974, as amended, the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA–W) issued during the period of December, 2000 and January, 2001.

In order for an affirmative determination to be made and a certification of eligibility to apply for worker adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number of proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the Absolute decline in sales or production.

Negative Determinations for Worker Adjustment Assistance

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicate that increased imports did not contribute importantly to work separations at the firm.

TA–W–38,153; Agco Corp., Coldwater, OH
TA–W–37,904; Fieldcrest Cannon, Inc., Pillowtex, Plant #7, Salisbury, NC
TA–W–38,292; Carolina Mills, Plant #25, St. Pauls, NC
TA–W–38,182; Cox Target Media Sales, Inc., Washington, NC;
TA–W–38–101 & A; Bonney Forge Corp., Allentown , PA, and Mt. Union, PA
TA–W–37,941; Royal Oak Enterprises, Inc., Licking, MO
TA–W–38,162; Excel Finishing, Inc., Old Fort, NC
TA–W–38,093; Kezar Falls Woolen Co., A Div. of Robinson Manufacturing Co., Parsonsfield, ME
TA–W–38,169 & A; Quality Veneer and Lumber, Hanel Lumber Div., Hold River, OR and Odell, OR

In the following cases, the investigation revealed that the criteria for eligibility have not been met for the reasons specified.

TA–W–38,343; United Steelworkers of America, Local 2176, Gadsden, AL
TA–W–38,203; Anchor Glass Container, Dayville, CT
TA–W–38,199; Uniscribe Professional Services, Inc., Wheeling, WV
TA–W–38,313, Winn-Dixie Raleigh, Inc., Garden City, SC
TA–W–38,205; Crater Lake Potato Distributors, Klamath Falls, OR

The workers firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA–W–38,193; Contract Apparel, Inc., El Paso, TX
TA–W–38,186; Nine West Distribution Center, Cincinnati, OH
TA–W–38,267; A and B Component Parts Shubuta, MS
TA–W–38,052; Pulaski Furniture, Plant #2, Martinsville, VA
TA–W–38,298; JN Oil and Gas, Inc., Headquartered in Billings, MT and Operating in the Following States: A; MT, B; TX, C; ND, D; WY, E; OK, F; KS
TA–W–38,026; Holcroft, LLC, Livonia, MI
TA–W–38,227; Vulcan Materials, Attalla, AL
TA–W–38,181; PPG Industries, Inc., Springdale, PA
TA–W–38,254; Parker Hannifin Corp., Process Filtration Div., Lebanon, IN
TA–W–38,151; Elliott Turbomachinery, Inc., Jeannette, PA
TA–W–38,138; Raytheon Corp., Lewisville, TX

Increased imports did not contribute importantly to workers separations at the firm.

TA–W–38,071; Molteck Power Systems, Gainesville, FL

The investigation revealed that criteria (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA–W–38,253; Intercontinental Branded Apparel, Ellwood Ave., Buffalo, NY
TA–W–38,230; Heraeus Sensor Nite Co., Ellwood City, PA

The investigation revealed that criteria (1) has not been met. A significant number or proportion of the workers did not become totally or partially separated from employment as required for certification.

Affirmative Determinations for Worker Adjustment Assistance

The following certifications have been issued; the date following the company name and location of each determination references the impact date for all workers of such determination.

TA–W–38,165; L and L Manufacturing Co., Inc., L and L Factory, Los Angeles, CA; September 19, 1999.
TA–W–38,116; S. I. Cutting Service, Opalocka, FL: September 13, 1999.
TA–W–38,015; Boyt Brands, Bedford, IA: August 11, 1999.
TA–W–38,224; Handy Girl, LLC, Deer Park, MD: March 7, 2000.
TA–W–38,246; Jakel, Inc., East Prairie, MO: October 13, 1999.
TA–W–38,210; Chilton Toys, Div. of Strombecker Corp., Seymour, WI: September 26, 1999.
TA–W–38,139; Lyall Alabama, Ardmore, AL: September 6, 1999.
TA–W–38,351; Tyco Electronics, Sanford, ME: November 7, 1999.
TA–W–38,333; Smith and Wesson, Springfield, MA: November 2, 1999.
TA–W–38,250; Designer Hearths, Inc., Missoula, MT: October 17, 1999.
TA–W–38,259; Precision Interconnect Medical Cable Div., Waupin, WI: October 17, 1999.
TA–W–38,090; Waynesboro Apparel, Inc., Waynesboro, TN: August 31, 1999.
TA–W–38,236; PACE Industries, Puget Div., Inc., Fircrest, WA: October 6, 1999.
TA–W–38,226; Stimson Lumber co., Bonner, MT: October 4, 1999.
TA–W–38,975; U.S. Textile Corp., Newland, NC: July 25, 1999.
TA–W–38,092; Xerox Colorgraphx Systems, San Jose, CA: September 1, 1999.
TA–W–38,335; Victor Electric Wire and Cable Corp., Coventry, RI: November 1, 1999.
TA–W–38,896; Knowles Electronics, Inc., Hearing Aid Component Unit, Itasca, IL and Elgin, IL: July 5, 1999.
TA–W–38,152; Montgomery Hosiery Mill, Inc., Star, NC: September 18, 1999.
TA–W–38,172; Maxxim Medical, Los Gator, CA: September 15, 1999.
TA–W–38,180; Northern Cap Manufacturing Co., Little Falls, MN: September 25, 1999.
TA–W–38,251; Technical Ruber and Plastic Corp., Clifton, NJ: October 10, 1999.
TA–W–38,433; Full Line Distributors, Inc., d/b/a L.A.T. Sportswear, Canton, GA: December 6, 1999.
TA–W–38,361; Don Shapiro Industries, Inc., Action West Div., El Paso, TX: May 13, 2000.
TA–W–38,224; Utica Cutlery Co., Utica Stainless Div., Utica, NY: October 4, 1999.
TA–W–38,367; Key Industries, Inc., Erin, TN: November 14, 1999.
TA–W–38,436; United States Leather, Lackawanna Leather, Including Leased Workers of Snelling Personnel Services, El Paso, TX: December 1, 1999.
TA–W–38,200; M. Fine and Sons Manufacturing Co., Inc., Loretto, TN: September 17, 1999.
TA–W–38,003; Parker Seal Co., Berea, KY: August 28, 1999.
TA–W–38,318; Pyramid Mountain Lumber, Inc., Seeley Lake, MT: October 30, 1999.
TA–W–38,225; Alcoa Fujikura Ltd., Heavy Truck and Industrial Div., Shelbyville, KY: October 6, 1999.
TA–W–38,303; CMI Industries, Inc., Geneva, AL: October 27, 1999.

TA–W–38,278; Breli Originals, Inc., New York, New York: October 23, 1999.

TA–W–38,222; Whatman, Inc., Clifton, NJ: October 2, 1999.
TA–W–38,126 & A; Eastland Shoe Manufacturing Corp., Lisbon Falls, ME and Freeport, ME: November 17, 2000.
TA–W–38,184; JB Sportswear, Union, MS: October 10, 1999.
TA–W–38,371; Sasib Food and Beverage Machinery, Sasib Packaging North America, Depere, WI: November 14, 1999.

Also, pursuant to Title V of the North American Free Trade Agreement Implementation Act (Pub. L. 103–182) concerning transitional adjustment assistance hereinafter called (NAFTA–TAA) and in accordance with section 250(a), Subchapter D, Chapter 2, Title II, of the Trade Act as amended, the Department of Labor presents summaries of determinations regarding eligibility to apply for NAFTA–TAA issued during the month of December, 2000 and January 2001.

In order for an affirmative determination to be made and a certification of eligibility to apply for NAFTA–TAA the following group eligibility requirements of Section 250 of the Trade Act must be met:

(1) That a significant number of proportion of the workers in the workers' firm, or an appropriate subdivision thereof, (including workers in any agricultural firm or appropriate subdivision thereof) have become totally or partially separated from employment and either—

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely,

(3) That imports from Mexico or Canada of articles like or directly competitive with articles produced by such firm or subdivision have increased, and that the increases imports contributed importantly to such workers' separations or threat of separation and to the decline in sales or production of such firm or subdivision; or

(4) That there has been a shift in production by such workers' firm or subdivision to Mexico or Canada of articles like or directly competitive with articles which are produced by the firm or subdivision.

Negative Determinations NAFTA–TAA

In each of the following cases the investigation revealed that criteria (3) and (4) were not met. Imports from Canada or Mexico did not contribute importantly to workers' separations. There was no shift in production from the subject firm to Canada or Mexico during the relevant period.

NAFTA–TAA–04297; Aavid Thermalloy, Santa Ana Plant, Santa Ana, CA
NAFTA–TAA–04029 & A; Knowles Electronics, Inc., Hearing Aid Component Unit Itasca, IL and Elgin, IL
NAFTA–TAA–04125 A; Allegheny Ludlum Corp., Jessop Plate Mill, Jessop O & T, Washington Flat Roll (Formerly Washington Steel Corp), Washington, PA and Houston, PA
NAFTA–TAA–04150; Holcroft, LLC, Livonia, MI
NAFTA–TAA–04198; PPG Industries, Inc., Springdale, PA

Antonio Clothing, New York, NY; Notice of Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on September 25 in response to a worker petition which was filed by the Union of Needletrades, Industrial and Textile Employees on behalf of workers at Antonio Clothing, New York, New York.

The Department has been unable to locate an official of the company to obtain the information necessary to conduct an investigation. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed in Washington, D.C. this 5th day of December, 2000.

[TA–W–38,113]

Eramet Marietta Incorporated North Plant, Marietta, OH; Notice of Revised Determination on Reopening

On December 22, 2000, the Department, on its own motion, reopend its investigation for workers and former workers at the subject firm in Marietta, Ohio.

The initial petition filed with the Department on behalf of workers of Eramet Marietta Incorporated, North Plant, Marietta, Ohio, was denied on November 21, 2000. The investigation revealed that the ''contributed importantly'' criterion of the worker group eligibility requirements of section 222 of the Trade Act of 1974, as amended, was not met. Although the company reported that it would rely on impor purchases of manganese metal, company imports had not as yet occurred. The notice was published in the **Federal Register** on December 21, 2000. (65 FR 80457).

By letter dated, December 15, 2000, the company informed the Department that the subject firm has accepted the first delivery of imported managense metal.

Conclusion

After careful consideration of the new facts obtained on reopening, it is concluded that increased imports of articles like or directly competitive with manganese metal contributed importantly to the decline in sales and to the total or partial separation of workers at the subject firm. In accordance with the provisions of the Trade Act of 1974, I make the following revised determation:

All workers of Eramet Marietta Incorporated, North Plant, Marietta, Ohio, who became totally or partially separated from employment on or after September 11, 1999, through two years from the date of this certification, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC this 26th day of December 2000.

Edward A. Tomchick,

Director, Division of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 (''the Act'') and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Division of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Division of Trade Adjustment Assistance, at the address shown below, not later than January 22, 2001.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Division of Trade Adjustment Assistance, at the address shown below, not later than January 22, 2001.

The petitions filed in this case are available for inspection at the Office of the Director, Division of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, Room C–5311, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, D.C. this 18th day of December, 2000.

Edward A. Tomchick,

Director, Division of Trade Adjustment Assistance.

Harbor Industries Traverse City, MI; Notice of Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on December 11, 2000, in response to a worker petition which was filed on behalf of workers at Harbor Industries, Traverse City, Michigan.

The petitioner has requested that the petition be withdrawn. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, D.C. this 20th day of December 2000.

[TA–W–38,192 and NAFTA–4187]

Metal Powder Products Company Logan, OH; Notice of Negative Determination Regarding Application for Reconsideration

By application dated December 13, 2000, the International Association of Machinists and Aerospace Workers, Local Lodge 55, District 28, requested administrative reconsideration of the Department's negative determination regarding eligibility to apply for Trade Adjustment Assistance (TAA) and North American Free Trade Agreement-Transitional Adjustment Assistance (NAFTA–TAA), applicable to workers and former workers of the subject firm. The denial notices were signed November 30, 2000, and published in the **Federal Register** on December 21, 2000; the TAA at (65 FR 80457) and the NAFTA–TAA at (65 FR 80458).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The denial of TAA for workers producing powdered metal parts for industrial applications at Metal Powder Products Company, Logan, Ohio, was based on the finding that the ''contributed importantly'' criterion of the group eligibility requirements of section 222 of the Trade Act of 1974 was not met. The subject firm transferred all of the production from Logan, Ohio to other domestic facilities. Prior to the closure of the Metal Powder Products Company plant in Logan, Ohio, sales and production remained nearly constant.

The Department's denial of NAFTA–TAA for the same worker group was based on the finding that criteria (3) and (4) of the group eligibility requirements of paragraph (a)(1) of section 250 of the Trade Act of 1974, as amended, were not met. There was no shift in production of powder metal parts from the subject firm to Mexico or Canada, nor were there company imports of like or directly competitive products from Mexico or Canada.

The petitioner asserts that the subject firm took some of the key management staff to the Powder Metal Products plant in Mexico and production there has increased. Although not elaborated on in the initial investigation, the company acknowledged a recent acquisition of a plant in Mexico. That plant, however, serves the auto market in that country and none of the production was shifted from Logan, Ohio to Mexico, nor will any of the production be coming back to the United States.

The petitioner also provided a shipping label from Metal Powder Specialities in Logan, Ohio, to an address in Mexico. The shipping label to Mexico, by itself, does not present any new information which would warrant worker group certification.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decisions. Accordingly, the application is denied.

Signed at Washington, DC this 26th day of December 2000.

Edward A. Tomchick,

Director, Division of Trade Adjustment Assistance.

Employment and Training Administration

[Docket No. NAFTA–03838 and NAFTA–03838A]

Rugged Sportswear, Siler City, North Carolina; Rugged Sportswear, Walstonburg, North Carolina; Amended Certification Regarding Eligibility to Apply for NAFTA Transitional Adjustment Assistance

In accordance with section 250(a), Subchapter 2, Title II, of the Trade Act of 1974, as amended (19 U.S.C. 2273), the Department of Labor issued a Certification of Eligibility to Apply for NAFTA Transitional Adjustment Assistance on May 30, 2000, applicable to workers of Rugged Sportswear, Siler City, North Carolina. The notice was published in the **Federal Register** on June 8, 2000 (65 FR 36470).

At the request of the company, the Department reviewed the certification for workers of the subject firm. New information shows that worker separations occurred at the subject firms' Walstonburg, North Carolina facility when it closed in October, 2000. The workers were engaged in the production of sweat shirts, sweat pants and sweat shorts.

Accordingly, the Department is amending the certification to include the workers at the Walstonburg, North Carolina location of Rugged Sportswear.

The intent of the Department's certification is to include all workers of Rugged Sportswear who were adversely affected by a shift of production to Mexico.

The amended notice applicable to NAFTA–03838 is hereby issued as follows:

''All workers of Rugged Sportswear, Siler City, North Carolina (NAFTA–03838) and Walstonburg, North Carolina (NAFTA–03838A) who became totally or partially separated from employment on or after March 31, 1999 through May 30, 2002 are eligible to apply for NAFTA–TAA under Section 250 of the Trade Act of 1974.''

Signed at Washington, D.C. this 15th day of December, 2000.

Linda G. Poole,

Certifying Officer, Division of Trade Adjustment Assistance.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 01–002]

5th Digital Earth Community Meeting

AGENCY: National Aeronautics and Space Administration (Lead Agency).

ACTION: Notice of meeting.

SUMMARY: The Federal Interagency Digital Earth Working Group will hold the 5th Digital Earth Community Meeting that will focus on accomplishments thus far, and the future of Digital Earth. The intent of this meeting is to continue the efforts of enabling and facilitating the evolution of Digital Earth, a digital representation of the planet that will allow people to access and apply geo-spatial data from multiple resources. Federal, state, and local government along with private industry, academia and others will participate in presentations, workshops and panel discussions. Together we will educate and empower each other to continue to develop the Digital Earth environment.

DATES: Wednesday, January 31, 2001 from 8 am to 5 pm. Registration beginning at 7:30 am.

ADDRESSES: Capitol Union Building, Penn State University at Harrisburg, 777 W. Harrisburg Pike, Middletown, PA 17057.

FOR FURTHER INFORMATION CONTACT: To register for the meeting, please contact PSU Continuing Education at 717–948–6505 or e-mail: pshceweb@psu.edu. If you would like to present at this meeting, please contact Dr. Todd Bacastow at 814–863–0049 or e-mail bacastow@psu.edu. The deadline for registration is Wednesday, January 24, 2001. This is an outreach service of the College of Earth and Mineral Sciences.

SUPPLEMENTARY INFORMATION:

Format: The one day session will concentrate on presentations, workshops, and panel discussions. The status of The National Digital Earth Initiative, What is Digital Earth and It's Community, Using Digital Earth Guidelines, Developing Applications,

Involving Students, and Data Accessibility will all be discussed. Upcoming conferences, organizational committees and collaborative efforts will be addressed as well. There will be space available for personal demonstrations—and discussions throughout the day. Although the meeting is open to all interested parties, time availability for presentations and demonstrations is limited and will be allocated on a first come basis. All interested parties must contact Dr. Todd Bacastow by January 17, 2001.

Web Information: Additional details on the Community Meeting will be posted to *www.digitalearth.gov* in the near future.

Dated: January 2, 2001.

Thomas S. Taylor,

NASA Digital Earth Program Manager.

NATIONAL SCIENCE FOUNDATION

Comment Request: National Science Foundation Proposal/Award Information—Grant Proposal Guide

AGENCY: National Science Foundation.

ACTION: Notice.

SUMMARY: The National Science Foundation (NSF) is announcing plans to request renewed clearance of this collection. In accordance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, we are providing opportunity for public comment on this action. After obtaining and considering public comment, NSF will prepare the submission requesting OMB clearance of this collection for no longer than 3 years.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Written comments should be received by March 12, 2001 to be assured of consideration. Comments received after that date will be considered to the extent practicable.

ADDRESSES: Written comments regarding the information collection and requests for copies of the proposed information collection request should be addressed to Suzanne Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Blvd., Rm. 295, Arlington, VA 22230, or by e-mail to splimpto@nsf.gov.

FOR FURTHER INFORMATION CONTACT: Suzanne Plimpton on (703) 292–7556 or send e-mail to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Title of Collection: ''National Sciences Foundation Proposal/Award Information-Grant Proposal Guide''

OMB Approval Number: 3145–0058.

Expiration Date of Approval: July 31, 2003.

Type of Request: Intent to seek approval to extend with revision an information collection for three years.

Proposed Project: The National Science Foundation Act of 1950 (Public Law 81–507) set forth NSF's mission and purpose:

''To promote the progress of science; to advance the national health, prosperity, and welfare; to secure the national defense. * * *''

The Act authorized and directed NSF to initiate and support:

- Basic scientific research and research fundamental to the engineering process;
- Programs to strengthen scientific and engineering research potential;
- Science and engineering education programs at all levels and in all the various fields of science and engineering;
- Programs that provide a source of information for policy formulation; and
- Other activities to promote these ends. Over the years, NSF's statutory authority has been modified in a number of significant ways. In 1968, authority to support applied research was added to the Organic Act. In 1980, The Science and Engineering Equal Opportunities Act gave NSF standing authority to support activities to improve the participation of women and minorities in science and engineering.

Another major change occurred in 1986, when engineering was accorded equal status with science in the Organic Act. NSF has always dedicated itself to providing the leadership and vision needed to keep the words and ideas embedded in its mission statement fresh and up-to-date. Even in today's rapidly changing environment, NSF's core purpose resonates clearly in everything it does: promoting achievement and progress in science and engineering and enhancing the potential for research and education to contribute to the Nation. While NSF's vision of the future and the mechanisms it uses to carry out its charges have evolved significantly over the last four decades, its ultimate mission remains the same.

Use of the Information: The regular submission of proposals to the Foundation is part of the collection of information and is used to help NSF fulfill this responsibility by initiating and supporting merit-selected research and education projects in all the scientific and engineering disciplines. NSF receives more than 30,000 proposals annually for new projects, and makes approximately 10,000 new awards. Support is made primarily through grants, contracts, and other agreements awarded to approximately 2,800 colleges, universities, academic consortia, nonprofit institutions, and small businesses. The awards are based mainly on evaluations of proposal merit submitted to the Foundation (proposal review is cleared under OMB Control No. 3145–0060).

The Foundation has a continuing commitment to monitor the operations of its information collection to identify and address excessive reporting burdens as well as to identify any real or apparent inequities based on gender, race, ethnicity, or disability of the proposed principal investigator(s)/project director(s) or the co-principal investigator(s)/co-project director(s).

Burden on the Public: The Foundation estimates that an average of 120 hours is expended for each proposal submitted. An estimated 38,000 proposals are expected during the course of one year. These 4,560,000 public burden hours annually.

Dated: January 8, 2001.

Suzanne H. Plimpton,

NSF Reports Clearance Officer.

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Computing-Communications Research; Notice of Meetings

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meetings of the Special Emphasis Panel in Computing-Communications Research (#1192):

Date/Time and Place

January 29, 2001; 8 a.m.–5 p.m.—National Science Foundation, 4201 Wilson Boulevard, Arlington, VA
February 1–2, 2001; 8 a.m.–5 p.m.—Westin LAX Los Angeles, CA
February 5–6, 2001; 8 a.m.–5 p.m.—National Science Foundation, 4201 Wilson Boulevard, Arlington, VA
February 12–13, 2001; 8 a.m.–5 p.m.—National Science Foundation, 4201 Wilson Boulevard, Arlington, VA

Type of Meetings: Closed.

Contact Person: Frank Anger, National Science Foundation, 4201 Wilson Boulevard, Room 1145, Arlington, VA 22230, (703) 292–8911.

Purpose of Meetings: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate Information Technology Research pre-proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a

proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

Dated: January 8, 2001.

Karen J. York,

Committee Management Officer.

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Electrical and Communications Systems; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting:

Name: Special Emphasis Panel in Electrical and Communications System (1196).

Date and Time: January 18–19, 2001; 8:30 a.m. to 5 p.m.

Place: National Science Foundation, 4201 Wilson Boulevard, Room 830, Arlington, VA 22230.

Type of Meeting: Closed.

Contact Person: Dr. Kishan Baheti, National Science Foundation, 4201 Wilson Boulevard, Room 675, Arlington, VA 22230. Telephone: (703) 292–8339.

Purpose: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate research proposals in the Electronics, Photonics and Device Technologies Program as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

Dated: January 8, 2001.

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Human Resource Development; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended) the National Science Foundation announces the following meeting:

Name: Special Emphasis Panel in Human Resource Development (1199).

Date and Time: February 1–2, 2001; 8:30 am–5:30 pm.

Place: National Science Foundation, 4201 Wilson Boulevard, Rooms 830, Arlington, VA 22230.

Type of Meeting: Part-Open.

Contact Person: Drs. A. James Hicks, Victor Santiago, Roosevelt Johnson and Joseph Bragin, Division of Human Resource Development, Room 815, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230. Telephone: (703) 306–1632.

Purpose of Meeting: To carryout a Committee of Visitors review of Historically Black Colleges and Universities—UP (HBCU), Louis Stokes Alliances for Minority Participation (LSAMP), Alliance for Graduate Education and the Professoriate (AGEP) and Centers for Research Excellence in Science & engineering (CREST).

Agenda:

Closed: February 1, 2001, 8:30 am–5:30 pm and February 2, 2001, 8:30 am–3:30 pm. To review the merit review process covering funding decisions made during the immediately preceding three fiscal years.

Open: February 2, 2001, 3:30 pm–5:30 pm. Discussions on the impact of projects funded and an evaluation of the programs.

Reason for Closing: During the closed session, the Committee will be reviewing proposal actions that will include privileged intellectual property and personal information that could harm individuals if they were disclosed. Such deliberations are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

Dated: January 8, 2001.

NUCLEAR REGULATORY COMMISSION

Notice of a Public Meeting on Assessing Future Regulatory Research Needs

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of public meeting.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) will hold a third meeting of nuclear experts from the government, the nuclear industry, academia, and the public on January 24–25, 2001. As a result of the first two meetings, the nuclear experts issued a draft report composed of the individual views of the experts on the role and direction of regulatory research. The draft report contains a number of recommendations. The purpose of this meeting is to evoke and evaluate strategies for implementing the recommendations. RES will provide the panel with RES perspectives. The licensing offices and the Regions will also provide an overview of their technical assistance and research activities. The meeting is open to the public and all interested parties may attend.

DATES: The meeting will be held from 8:00 AM to 5:00 PM on January 24 and 25, 2001, at the Marriott Residence Inn located at 7335 Wisconsin Avenue in Bethesda, Maryland 20804. The telephone number of the hotel is 301–718–0200.

FOR FURTHER INFORMATION CONTACT: Questions with respect to this meeting should be referred to James W. Johnson, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission at (301) 415–6293; fax 301–415–5153; E-mail *jwj@nrc.gov.*

SUPPLEMENTARY INFORMATION: Parking is available in the hotel for a modest cost. Additional parking in Bethesda is somewhat limited. The hotel can also be reached by Metro.

The hotel is located one block south of the Bethesda Metro stop on the Red Line and is on the opposite side of the street from the Metro station. Seating for the public is limited and therefore will be on a first-come, first serve basis.

Dated at Rockville, Maryland, this 5th day of January 2001.

For the Nuclear Regulatory Commission.

Ashok C. Thadani,

Director, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission.

NUCLEAR REGULATORY COMMISSION

Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Special Nuclear Material of Less Than Critical Mass Licenses

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of availability.

SUMMARY: The NRC is announcing the availability of final NUREG–1556, Volume 17, ''Consolidated Guidance about Materials Licenses: Program-Specific Guidance about Special Nuclear Material of Less Than Critical Mass Licenses,'' dated November 2000.

The NRC is using Business Process Redesign techniques to redesign its materials licensing process, as described in NUREG–1539, ''Methodology and Findings of the NRC's Materials Licensing process Redesign.'' A critical element of the new process is consolidating and updating numerous guidance documents into a NUREG-series of reports. This final NUREG report is the 17th guidance document developed to support an improved materials licensing process.

This guidance is intended for use by applicants, licensees, and the NRC staff, and will also be available to Agreement States. This document combines and updates the guidance found in Regulatory Guide 10.3 ''Guide for the preparation of Applications for Special Nuclear Material Licenses of Less Than Critical mass Quantities.'' This final report takes a more risk-informed, performance-based approach to licensing quantities of special nuclear material of less than critical mass, and reduces the information (amount and level of detail) needed to support an application to use this material.

A free single copy of final NUREG 1556, Volume 17, may be requested by writing to the US Nuclear Regulatory Commission, ATTN: Mrs. Carrie Brown, Mail Stop TWFN 9–C24, Washington, DC 20555–0001. Alternatively, submit requests through the Internet by addressing electronic mail to *cxb@nrc.gov.* A copy of this final NUREG 1556 Volume 17, is available for inspection and/or copying for a fee in the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC 20555–0001.

FOR FURTHER INFORMATION CONTACT: Mrs. Carrie Brown, TWFN 9–F–24, Division of Industrial and Medical Nuclear Safety, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 415–8092.

Electronic Access: Final NUREG–1556, Vol. 17 is available electronically by visiting the NRC's Home Page (*http://www.nrc.gov/nrc/nucmat.html*)

Dated at Rockville, Maryland, this 21st day of December, 2000.

For the Nuclear Regulatory Commission.

Patricia K. Holahan,

Chief, Rulemaking and Guidance Branch, Division of Industrial and Medical Nuclear Safety, NMSS.

BILLING CODE 7590–01–M

SECURITIES AND EXCHANGE COMMISSION

[Rule 15g–9; SEC File No. 270–325; OMB Control No. 3235–0385]

Proposed Collection; Comment Request

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comment on the collection of information described below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Rule 15g–9, Sales Practice Requirements for Certain Low-Priced Securities

Section 15(c)(2) of the Securities Exchange Act of 1934 (the ''Exchange Act'') authorizes the Commission to promulgate rules that prescribe means reasonably designed to prevent fraudulent, deceptive, or manipulative practices in connection with over-the-counter (''OTC'') securities transactions. Pursuant to this authority, the Commission in 1989 adopted rule 15a–6 (the ''Rule''), which was subsequently redesignated as rule 15g–9, 17 CFR 240.15g–9. The Rule requires broker-dealers to produce a written suitability determination for, and to obtain a written customer agreement to, certain recommended transactions in low-priced stocks that are not registered on a national securities exchange or authorized for trading on NASDAQ, and whose issuers do not meet certain minimum financial standards. The Rule is intended to prevent the indiscriminate use by broker-dealers of fraudulent, high-pressure telephone sales campaigns to sell low-priced securities to unsophisticated customers.

The staff estimates that approximately 270 broker-dealers incur an average burden of 78 hours per year to comply with this rule. Thus, the total annual burden to comply with the Rule is estimated at 21,060 hours (270 × 78).

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents; and (d) ways to minimuze the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your comments to Michael E. Bartell, Associate Executive Director, Office of Information Technology, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

Dated: January 4, 2001.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

Issuer Delisting; Notice of Application to Withdraw From Listing and Registration; (Ceridian Corporation, Common Stock, $.50 Par Value) File No. 1–01969

January 4, 2001.

Ceridian Corporation (''Company'') has filed applications with the Securities and Exchange Commission (''Commission''), pursuant to section 12(d) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 12d2–2(d) thereunder,[2] to withdraw its Common Stock, $.50 par value (''Security''), from

[1] 15 U.S.C. 78*l*(d).

[2] 17 CFR 240.12d2–2(d).

listing and registration on the Pacific Exchange, Inc. (''PCS'') and on the Chicago Stock Exchange, Inc. (''CHX'').

In addition to its listing on the PCX and CHX, the Security is currently listed on the New York Stock Exchange, Inc. (''NYSE''). The Company has resolved to reduce the number of listings of its Security in order to avoid the costs associated with maintaining multiple listings. The Comany desires to continue only its listing on the NYSE.

The Company has stated in its application that it has complied with the respective rules of the PCX and CHX governing the withdrawal of security by its issuer and that both the PCX and the CHX have in turn indicated that they will not oppose such proposed withdrawals. The Company's application shall not have any effect on the Security's continued listing on the NYSE or on its registration under section 12(b) of the Act.[3]

Any interested person may, on or before January 26, 2001, submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609, facts bearing upon whether the application has been made in accordance with the respective rules of the PCX and CHX and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission by the Division of Market Regulations, pursuant to delegated authority.[4]

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–43798; File No. SR–BSE–00–12]

Self-Regulatory Organizations; Order Approving Proposed Rule Change by the Boston Stock Exchange, Inc. Relating to the Time Period for Filing Claims Against Specialists

January 3, 2001.

I. Introduction

On September 21, 2000, the Boston Stock Exchange, Inc. (''BSE''), filed with the Securities and Exchange Commission (''Commission'') a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder.[2] On October 3, 2000, the BSE filed Amendment No. 1 to the proposed rule change.[3] Notice of the proposed rule change, as amended, was published for comment in the **Federal Register** on November 1, 2000.[4] No comments were received on the proposal. This order approves the proposed rule change.

II. Description of the Proposed Rule Change

The BSE proposes to amend Chapter XV, Section 14, of its rules, titled ''Claims and Reports Against Specialists''. The amendment shortens the permitted time period for: filing claims against specialists relating to erroneous comparisons and the omission of a report that was properly made, to three business days. The amendment will bring the time frames in the rule into parity with the settlement period required by Rule 15c6–1 under the Act.[5]

III. Discussion

After careful review, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.[6] In particular, the Commission believes that the proposal is consistent with section 6(b)(5) of the Act,[7] which requires, among other things, that the rules of an exchange be designed to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities. The Commission believes that shortening the time frame within which a claim relating to an erroneous comparison must be made so that it is consistent with the settlement time frame mandated by Rule 15c6–1 under the Act should promote timely settlement of securities transactions.

IV. Conclusion

For the foregoing reasons, the Commission finds that the proposed rule change is consistent with the requirements of the Act, and the rules and regulations thereunder.

It Is Therefore Ordered, pursuant to section 19(b)(2) of the Act,[8] that the proposed rule change (File No. SR–BSE–00–12), as amended, is approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[9]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Docket No. Release No. 34–43810; File No. SR–EMCC–00–07]

Self-Regulatory Organizations; Emerging Markets Clearing Corporation; Notice of Filing and Order Granting Accelerated Approval of a Proposed Rule Change Related to Making a Security Ineligible for Processing

January 4, 2001.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] notice is hereby given that on August 28, 2000, the Emerging Markets Clearing Corporation (''EMCC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which items have been prepared primarily by EMCC. The Commission is publishing this notice and order to solicit comments from interested persons and to grant accelerated approval of the proposal.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change permits EMCC in certain circumstances to remove a security from its list of EMCC eligible instruments and to exit open

transactions in that security from its clearance system.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, EMCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. EMCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.[2]

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

EMCC's rules permit EMCC to remove a security from its list of those securities eligible for processing through EMCC's system in certain circumstances. However, EMCC's rules do not permit EMCC to exit any pending trades in such a security from its system for any reason other than where the security is no longer deliverable through a qualified securities depository. Without the ability to exit pending trades from its processing system, there may be circumstances where a member may lose important rights in a security by virtue of the continued inclusion of its trades in EMCC's processing system.

The proposed rule change therefore would permit EMCC to make a security ineligible for processing in its system and to exit pending trades in that security by issuing appropriate instructions to its affected members if in EMCC's judgment a member may lose important rights by reason of the security's continued status as an EMCC eligible instrument. For example, where an EMCC eligible instruments is subject to a restructuring which includes a voluntary exchange offer, a party to a pending trade in that security may lose the right to receive the exchange security of its original counterparty does not take appropriate protective action. In that case, the parties can best protect their rights by dealing directly with each other outside of EMCC. In that event, EMCC would notify all members of the security's removal and issue instructions in a manner it determines is appropriate to the affected members and to the extent applicable to the relevant qualified securities depository naming members as the contraparties to the affected transactions. EMCC would issue such instructions with a view towards minimizing the number of such instructions issued in a given instance.

EMCC believes that this rule change will facilitate the prompt and accurate clearance and settlement of emerging market securities transactions and therefore believes that it is consistent with section 17A(b)(3)(F) of the Act.[3]

(B) Self-Regulatory Organization's Statement on Burden on Competition

EMCC does not believe that the proposed rule change will have an impact on or impose a burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments relating to the proposed rule change have been solicited or received. EMCC will notify the Commission of any written comments received by EMCC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder and particularly with the requirements of section 17A(b)(3)(F).[4] Section 17A(b)(3)(F) requires that the rules of a clearing agency be designed to promote the prompt and accurate clearance and settlement of securities transactions. The proposed rule is designed and should enable EMCC to help its members not lose important rights with respect to emerging market debt securities which are subject to restructurings or other similar actions. As a result, the rule change should promote the prompt and accurate clearance and settlement of the securities transactions.

EMCC has requested that the Commission approve the proposed rule change prior to the thirtieth day after publication of the notice of the filing. The Commission finds good cause for approving the rule change prior to the thirtieth day after publication of the notice of filing because approval to this proposed rule filing will allow EMCC to be prepared to take the appropriate actions wherever the next restructuring or similar event occurs which involves an EMCC eligible instrument.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of EMCC. All submissions should refer to File No. SR–EMCC–00–07 and should be submitted by February 1, 2001.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[5] that the proposed rule change (File No. SR–EMCC–00–07) be and hereby is approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[6]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–43808; File No. EMCC–00–08]

Self-Regulatory Organizations; Emerging Markets Clearing Corporation; Notice of Filing of Proposed Rule Change to Permit Members to Satisfy Clearing Fund Obligations With Either Immediately Available Funds or Eligible Treasury Securities

January 4, 2001.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] notice is hereby given that on November 3, 2000, the Emerging Markets Clearing Corporation (''EMCC'') filed with the Securities and Exchange Commission (''Commission'') the

[2] The Commission has modified the text of the summaries prepared by EMCC.

[3] 15 U.S.C. 78q–1(b)(3)(F).

[4] 15 U.S.C. 78q–1(b)(3)(F).

[5] 15 U.S.C. 78s(b)(2).

[6] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

proposed rule change as described in Items I, II, and III below, which items have been prepared primarily by EMCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested parties.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would allow EMCC members to satisfy their obligations to make additional clearing fund deposits with either immediately available funds, as currently required, or eligible treasury securities.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis, for, the Proposed Rule Change

In its filing with the Commission, EMCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it receive on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. EMCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.[2]

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

EMCC's Rule 4, section 5(iii) currently requires that members satisfy their obligation to make additional required deposits (''margin'') to the clearing fund in immediately available funds. EMCC Rule 4, section 8 permits the substitution of eligible collateral for clearing fund cash. On the same day a cash deposit is made, members may substitute eligible treasury securities[3] or an eligible letter of credit[4] for all or a portion of any such margin cash deposited provided the member maintains the requisite minimum ratios of cash to securities and/or letters of credit.[5]

To accommodate member requests, EMCC proposes changing Rule 4, section 5(iii) to allow members the option of meeting clearing fund margin calls with either cash or eligible treasury securities. The proposed rule change increases operating efficiencies by transforming what is currently a two-step process into a single step process. Eligible treasury securities so deposited would be valued at 96% of their current market value as provided in Section 8 of EMCC Rule 4. Notwithstanding the change, EMCC would retain the right, in its discretion, to require additional deposits to be made in cash.

EMCC believes that the proposed rule change is consistent with the requirements of section 17A of the Act[6] and the rules and regulations thereunder applicable to EMCC because it will promote operating efficiencies and will facilitate the prompt and accurate clearance and settlement of emerging market securities transactions.

(B) Self-Regulatory Organization's Statement on Burden on Competition

EMCC does not believe that the proposed rule change will have an impact on or impose a burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments relating to the proposed rule change have been solicited or received. EMCC will notify the Commission of any written comments received by EMCC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to ninety days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consent, the Commission will:

(A) By order approve such proposed rule change or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing also will be available for inspection and copying at the principal office of EMCC. All submissions should refer to File No. SR–EMCC–00–08 and should be submitted by February 1, 2001.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[7]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 01–896 Filed 1–10–01; 8:45 am]

BILLING CODE 8010–01–M

[2] The Commission has modified the text of the summaries prepared by EMCC.

[3] As defined in EMCC Rule 1, the term ''eligible treasury security'' means an unmatured, marketable debt security in book-entry form that is a direct obligation of the United States Government.

[4] As defined in EMCC Rule 1, the term ''eligible letter of credit'' means a letter of credit that:

(a) Is issued by an approved letter of credit issuer;

(b) Contains the unqualified commitment of such issuer to pay a specified sum of money upon demand (properly drawn under the letter of credit) at any time prior to the expiration of the letter of credit;

(c) Is irrevocable and may be neither revoked nor amended to reduce its amount except upon the issuer's written notice to EMCC of its intent to revoke or amend, which must be given not less than five full business days prior to the date fixed for such revocation or amendment, and EMCC's consent to the revocation or amendment, which shall be given promptly upon EMCC's determination that the member either has substituted other collateral of at least equal value prior to such revocation or amendment or otherwise will have sufficient remaining value in its clearing fund deposit at the time of such revocation or amendment to satisfy its anticipated required fund deposit;

(d) States that (1) it will be duly honored upon presentment of it to the issuing bank and (2) partial drawings are permitted; and

(e) Is in a form and contains such other terms and conditions as may be required by EMCC.

[5] EMCC Rule 4, Sections 2 and 8(c).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–43793; File No. SR–GSCC–00–08]

Self-Regulatory Organizations; Government Securities Clearing Corporation; Notice of Filing of Proposed Rule Change Relating to Permitting Clearing Fund Offsets for Category 2 Dealer Netting Members and Futures Commission Merchants

January 3, 2001.

Pursuant to section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act''), notice is hereby given that on July 31, 2000, the Government Securities Clearing Corporation (''GSCC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by GSCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would enable GSCC to provide offsets in the clearing fund calculation for Category 2 Dealer Netting Members and Category 2 Futures Commission Merchants (''FCMs'') (collectively, ''category 2 members'') that meet all of GSCC's requirements for participating in its netting system.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, GSCC included statements concerning the purpose of and basis for the proposed rules change and discussed any comments it received on the proposed rules change. The text of these statements may be examined at the places specified in Item IV below. GSCC has prepared summaries, set forth in sections A, B and C below, of the most significant aspects of such statements.[2]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

GSCC has established two membership categories (''category 1'' and ''category 2'') for dealers and FCMs that want to participate in GSCC's netting system. GSCC established a ''Category 2'' membership for dealers and FCMs that meet all of GSCC's requirements for participating in the netting system but have less net worth than GSCC's category 1 members. The minimum net worth requirement for category 1 members is $50 million, and the minimum net worth requirement for category 2 members is $25 million.[3]

While category 2 members have a lower net worth threshold than category 1 members, category 2 members currently have a more stringent clearing fund requirement under GSCC Rule 4, section 2(d). Specifically, the clearing fund requirement for category 2 members is calculated (i) without the benefit of any of the offsets across opposite net settlement positions[4] that are permitted for category 1 members and (ii) with margin factors set at the 99 percent-of-movements confidence level[5] (while margin factors for a category 1 member are set at the 95 percent confidence level). In addition, if a category 2 member elects to receive credit forward margin amounts[6] in its daily funds-only settlements, its margin factors are set at levels that are based on the greater of: (i) the category 2 margin factors or (ii) margin factors adjusted to reflect GSCC's historical two-day price volatility data covering 95 percent of all movements.[7]

GSCC currently has no active category 2 members. GSCC believes that certain entities that meet the eligibility requirements for category 2 membership and who recognize the many benefits of GSCC's netting system have not applied for membership because they consider the liquidity burden associated with the current clearing fund calculation to be too onerous. In order to broaden the availability of GSCC's netting services, GSCC proposes to allow for offsets in the clearing fund calculation for category 2 members. The current prohibition of offsets for category 2 members was implemented years ago as a conservative measure designed to avoid any risk arising from the creation of the category 2 level. Now, after many years of experience in conducting risk assessments, netting, and calculating margin, GSCC believes that prohibiting offsets is overly conservative and punitive. In addition, expanding the roster of GSCC netting members should also enhance the netting benefits for the existing members that currently trade with potential category 2 members.

Recognizing that category 2 members have smaller net worth bases and may therefore be deemed to pose a greater risk of default than category 1 members, the margin factors applied to category 2 members will continue to be set at the 99 percent confidence level (versus 95 percent for category 1 members). Furthermore, category 2 members will still be required to make an election regarding the receipt of forward margin. By permitting certain offsets for category 2 members and at the same time maintaining the more stringent margin factor requirements, GSCC will collect sufficient margin from duly approved category 2 members while expanding the range of netting members in a prudent manner.

GSCC believes that the proposed rule change is consistent with section 17A(b)(3)(F)[8] of the Act and the rules and regulations thereunder because it will (i) permit new entities to join GSCC and realize the benefits of participating in its netting system and (ii) enhance the netting benefits of existing members that currently trade with the potential members.

B. Self-Regulatory Organization's Statement on Burden on Competition

GSCC does not believe that the proposed rule change will have an impact or impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change From Members, Participants or Others

Written comments relating to the proposed rule change have not yet been solicited or received.[9] GSCC will notify the Commission of any written comments received by GSCC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal**

[1] 15 U.S.C. 78s(b)(1).

[2] The Commission has modified the text of the summaries prepared by GSCC.

[3] Both categories have identical requirements for minimum excess net or liquid capital of $10 million.

[4] This means that GSCC does not allow category 2 members to offset long positions versus short positions.

[5] This means that the category 2 margin factors are based on GSCC's historical daily price volatility data covering 99 percent of all movements.

[6] A credit forward margin amount refers to GSCC's daily process of computing a member's collateral by marking to market the member's transactions that will settle in the future. The result will produce a net credit or a net debit. If the member has a net credit, it can elect to have GSCC pay it the value of the net credit. If the member has a net debit, it must pay GSCC.

[7] A category 2 member that elects to receive credit forward margin amounts will have higher margin factors than a category 2 member that does not make that election.

[8] 15 U.S.C. 78q–1(b)(3)(F).

[9] Members will be notified of the rule change filing, and comments will be solicited by an Important Notice.

Register or within such longer period (i) as the Commission may designate up to ninety days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room in Washington, DC. Copies of such filing will also be available for inspection and copying at GSCC's principal office. All submissions should refer to File No. SR–GSCC–00–08 and should be submitted by February 1, 2001.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[10]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–43794; File No. SR–GSCC–00–10]

Self-Regulatory Organizations; Government Securities Clearing Corporation; Notice of Filing of Proposed Rule Change Relating to the Submission of Repo Collateral Substitutions

January 3, 2001.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] notice is hereby given that on September 11, 2000, the Government Securities Clearing Corporation (''GSCC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change and on November 20, 2000, amended the proposed rule change as described in Items I, II and III below, which items have been prepared primarily by GSCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested parties.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change amends GSCC's rules relating to repo collateral substitutions processes and the fees associated with such substitutions.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, GSCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. GSCC has prepared summaries, set forth in section A, B, and C below, of the most significant aspects of these statements.[2]

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Support of repo collateral substitutions has been an integral part of GSCC's array of services for blind-brokered repo markets since its introduction in 1996. Over the past two years, however, GSCC members have at times engaged in certain practices in connection with the repo collateral substitution process that present risk to GSCC and its members by placing an inordinate level of stress on the operational infrastructures of GSCC and its inter-dealer broker members, and by causing undue fail-financing expenses for other members. GSCC desires to prohibit these practices and to impose an additional risk management measure on the repo substitution process.

1. Late Notifications

Over the past two years, there have been an increasing number of occasions where GSCC experienced dramatic increases in the number of substitutions requests.[3] In addition, many members have not followed The Bond Market Association's (''TBMA'') published deadlines for substitution requests applicable to dealers and brokers which has resulted in GSCC receiving the substitution requests late in the day.[4] Specifically, some dealers are not complying with the substitution deadlines and some brokers, in turn, are not able to submit the requisite notifications to GSCC in a timely manner. The combination of the increased volume and the late submissions has, on certain occasions, placed an inordinate amount of stress on both GSCC's and the brokers' infrastructures. In addition, because ''new'' collateral is often delivered at or too near the close of the securities Fedwire to be redelivered by GSCC, GSCC is forced in many instances to obtain overnight financing, the cost of which is passed on to the netting members.[5]

GSCC has requested a number of times over the past two years that industry participants voluntarily comply with TBMA deadlines for

[1] 15 U.S.C. 78s(b)(1).

[2] The Commission has modified the text of the summaries prepared by GSCC.

[3] These spikes in substitution requests occur most often at month-end and quarter-end.

[4] Update 98–3 of the TBMA's Repo Trading Practices Guidelines (August 1996) (hereinafter ''TBMA's Guidelines'') states:

Unless the parties to a trade otherwise agree, in all trades executed through brokers, dealers should notify the brokers of any substitution of collateral *no later than 9:55 a.m. (New York Time).* In turn the broker should notify the counterparty dealer of the substitution by *10:00 a.m. (New York time).* Substitution notifications received after the relevant deadline will be accommodated on a *''best efforts''* basis. Additionally, dealers should provide brokers with the description of the substituted collateral by *11:00 a.m. (New York time).* (Emphasis in original.)

[5] GSCC's Rule 12 provides that the costs or expenses incurred by GSCC in obtaining financing under such circumstances are generally allocated pro rata among all netting members based upon usage of GSCC's services. Rule 12 also provide that if the GSCC Board determines that a netting member has on a frequent basis and without good cause caused GSCC to incur financing costs, the member can become obligated to pay for or reimburse GSCC for the entire amount of the financing costs.

submitting the requisite notifications for repo collateral substitution requests and that GSCC receive the notifications by or shortly after the 11:00 a.m. TBMA deadline by which the broker should have all requisite substitution information. There has not been sufficient compliance with these requests. Therefore, GSCC believes it is necessary to amend its rules to impose deadlines for the submission of the requisite notifications to GSCC.

Under the proposed rule change, GSCC will amend Rule 18 (''Special Provisions for Repo Transaction''), its Schedule of Timeframes, and its Fee Schedule to initially impose: (i) a deadline of noon (12 p.m.) after which the dealer member that initiated the substitution will be subject to a late fee of $500 per substitution notification and (ii) an absolute deadline of 12:30 p.m. after which GSCC will reject the substitution notification.[6] GSCC will extend these submission deadlines by one hour on those days that the TBMA announces in advance will be extraordinary volume days. All required information must be included in the notification in order for it to be deemed to be received by the imposed deadlines. Finally, substitution notifications or amendments thereto will no longer be accepted verbally but instead will only be accepted through the use of GSCC's designated messaging utility that is available to all repo netting participants.

2. Improper Use of Delivery Identification Codes

The other inappropriate practice in which members have been engaging with respect to the repo collateral substitution process involves the manner in which some members have been identifying the securities being delovered to GSCC. There are two codes that can be used to identify a securities delivery over the Fedwire: (i) A delivery code and (ii) a reversal code. The delivery code indicates to the receiver of the securities that the securities are being delivered to satisfy a ''pending receive'' obligation. The reversal code indicates that a delivery of securities has been rejected and is being sent back to the initiating party. (The industry terminology for this situations a ''DK,'' that is the receiver of the securities ''does not know'' transaction.)

There have been occasions where GSCC has received a securities delivery in relation to a repo collateral substitution before receiving the requisite substitution notification because members have been submitting the notifications to GSCC late in the day. Without the requisite notification, GSCC ''does not know'' the transaction for which the securities are being delivered and thus is forced to DK the securities. These securities eventually are redelivered to GSCC. However, many members have been redelivering the securities to GSCC using a reversal code instead of a delivery code.[7]

When GSCC receives a repo collateral substitution notification, it establishes a ''pending receive'' instruction on the clearing bank's system. The only automated way in which that ''pending receive'' may be satisfied is by securities identified by a delivery code. If the securities are sent using a reversal code, they will not automatically match the obligation that they are supposed to satisfy. A securities delivery identified by a reversal code appears from GSCC's point of view to be a DK of an original delivery (sent by GSCC) causing GSCC staff to have to research the reason for the DK. In instances where this process occurs near the close of the securities Fedwire, GSCC may be required to obtain overnight financing, the cost of which is usually borne by all members.

The proposed rules change revises Rule 12 (''Securities Settlement'') to make clear that the use of the reversal codes in the situation described above is improper and that members may not use a reversal code for a securities delivery obligation to GSCC unless the member has obtained GSCC's prior consent. Moreover, the proposed rule changes provide that, if GSCC is required to obtain overnight financing with respect to securities delivered in violation of this new rule, the entire amount of the financing cost will be borne by the offender. It should be noted that a member may continue to use a reversal code under circumstances where it wishes to indicate to GSCC (with GSCC as the initiating party of a securities delivery to the member) that it ''does not know'' the transaction. For example, if GSCC sends a securities delivery to a member in error, it is appropriate for the member to DK such delivery.

3. Prohibition of Substitutions Outside of GSCC

For risk management reasons, it is important to require that repo collateral substitutions with respect to repos that are in GSCC's net be made through GSCC. GSCC marks-to-market and establishes settlement obligations based on the transaction information underlying a repo transaction as it knows it. If a repo substitution occurs outside of GSCC, these calculations, which are vital for risk management purposes, will be incorrect. Therefore, GSCC proposes to change Rule 18 to add a requirement that all collateral substitutions with regard to repos that are on GSCC's books pending settlement must be made through GSCC.

4. Definition of a ''Repo Broker''

In order to accommodate proposed changes to Section 4 of Rule 18, which will permit a repo broker to submit a repo collateral substitution, GSCC is proposing to add the definition of repo broker to its definitions under Rule 1. A repo broker will be defined as an inter-dealer broker or a division or other separate operating unit within a dealer netting member that operates in the same manner as a broker and that participates in GSCC's repo netting service pursuant to the same requirements imposed under Rule 15 governing special provisions for certain netting members and Rule 19 governing special provisions for brokered repo transactions.

GSCC believes that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to GSCC and in particular with section 17A(b)(3)(F) of the Act because it will prohibit practices that are potentially harmful to GSCC's risk management process and operational infrastructure, and will result in undue financing costs for members.

B. Self-Regulatory Organization's Statement on Burden on Competition

GSCC does not believe that the proposed rule change will have an impact or impose a burden on competition.

C. Self-Regulatory Organization's Statement on comments on the Proposed rule Change Received From Members, Participants or Others

Written comments relating to the proposed rule change have not yet been solicited or received. GSCC will notify the Commission of any written comments received by GSCC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period (i)

[6] The 12:00 p.m. deadline is one hour after which the broker should have received all of the requisite substitution information under TBMA guidelines. In the future, GSCC may change these deadlines depending on market practice. GSCC will notify its members of any changes in these timeframes in advance by an important notice.

[7] These members are, in effect, ''DK-ing'' a GSCC ''DK.''

as the Commission may designate up to ninety days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing also will be available for inspection and copying at GSCC's principle office. All submissions should refer to File No. SR–GSCC–00–10 and should be submitted by February 1, 2001.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[8]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–43795; File No. SR–ISE–00–21]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the International Securities Exchange LLC, Relating to Marking Orders

January 3, 2001.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 28, 2000, the International Securities Exchange LLC (''Exchange'' or ''ISE'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend ISE Rule 712 to provide that Members mark orders appropriately. The text of the proposed rule change is as follows. New text is italicized and deleted text is bracketed.

Rule 712. Submission *of Orders and* [for] Clearance *of Transactions*

(a) *Order Identification. When entering orders on the Exchange, each Member shall submit trade information in such form as may be prescribed by the Exchange in order to allow the Exchange to properly prioritize and match orders and quotations pursuant to Rule 713 and report resulting transactions to the Clearing Corporation.*

[(a)]*(b)* All transactions made on the Exchange shall be submitted for clearance to the Clearing Corporation, and all such transactions shall be subject to the rules of the Clearing Corporation. Every Clearing Member shall be responsible for the clearance of the Exchange Transactions of such Clearing Member and of each Member who gives up such Clearing Member's name pursuant to a letter of authorization, letter of guarantee or other authorization given by such Clearing Member to such Member, which authorization must be submitted to the Exchange.

[(b)]*(c)* On each business day at or prior to such time as may be prescribed by the Clearing Corporation, the Exchange shall furnish the Clearing Corporation a report of each Clearing Member's matched trades.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the ISE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The Exchange has prepared summaries, set forth in Sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

When entering an order on the Exchange, certain information, such as account type (*e.g.,* Public Customer or Firm Proprietary), must be indicated for the System to execute orders as specified in the Exchange's rules. Rather than relying upon ISE Rule 400 (Just and Equitable Principles of Trade) as the authority for the Exchange to conduct investigations and bring enforcement actions for misrepresenting trade information when entering orders, the Exchange proposes to adopt a rule specifying that Members are required to submit trade information to allow the Exchange to properly prioritize and match orders and quotations pursuant to the ISE Rule 713 (Priority of Quotes and Orders).

2. Statutory Basis

The basis under the Act for this proposed rule change is the requirement under section 6(b)(5)[3] that an exchange have rules that are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78f(b)(5).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change: (1) Does not significantly affect the protection of investors or the public interest; (2) does not impose any significant burden on competition; (3) does not become operative for 30 days from the date of filing; and (4) the Exchange provided the Commission with written notice of its intent to file the proposed rule change at least five days prior to the filing date, the proposed rule change has become effective pursuant to section 19(b)(3)(A) of the Exchange Act [4] and Rule 19b–4(f)(6) [5] thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or apropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submisssions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than these that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's's Public Reference. Room. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR–ISE–00–21 and should be submitted by February 1, 2001.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[6]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–43799; International Series Release No. 1244; File No. SR–Phlx–00–111]

Self-Regulatory Organizations; Notice of Filing and Order Granting Accelerated Approval of Proposed Rule Change by the Philadelphia Stock Exchange, Inc. To Amend Temporarily Rule 1063(a) and Options Floor Procedure Advices A–10 and C–1, Which Address Trading in Foreign Currency Options

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 2, 2001, the Philadelphia Stock Exchange, Inc. (''Phlx'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Phlx. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons and to approve the proposal on an accelerated basis. By its terms, the proposed rule change will be effectively only until March 31, 2001.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Phlx proposes to amend Phlx Rule 1063(a), Phlx Options Floor Procedure Advice A–10, and Phlx Options Floor Procedure Advice C–1. The proposed amendments would provide a temporary exception from the current requirement that a Registered Options Trader (''ROT'') be present at the trading post in certain circumstances. The exception is limited to foreign currency options (''FCOs'').The proposal would also make certain non-substantive stylistic changes to Floor Procedure Advices A–10 and C–1. The text of the proposed rule change is available at the principal office of the Phlx and at the Commission

[6] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b-4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Phlx included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it had received on the proposal. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in section A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Phlx is seeking approval of temporary amendments to Phlx Rule 1063(a) (''Responsibilities of Floor Brokers''), Phlx Options Floor Procedure Advice A–10 (''Specialist Trading With Book''), and Phlx Options Floor Procedures Advice C–1 (''Ascertaining the Presence of ROTs in a Trading Crowd''), as discussed below. Phlx Rule 1063(a) currently provides Floor Brokers that at least one ROT is present at the trading post before representing an order for execution. Phlx Options Floor Procedure Advice A–10 currently provides that in any instance where a Specialist wishes to participate as principal in a trade with an order placed on that Specialist's book, the Specialist must ensure that at least one ROT is present in the trading crowd and is aware of the Specialist's intention to trade with the book both at the time of and immediately before the order's execution. Phlx Options Floor Procedure Advice C–1 currently provides that, before executing an options order, a Floor Broker representing the order shall ascertain that at least one ROT is present in the trading crowd at the post where the order is executed.

The Phlx has been advised that as of January 3, 2001, no ROTs will be doing business on a regular basis on the Phlx's Foreign Currency Options Floor ''FCO floor''),[3] although it is possible that, depending on the ROTs' business plans and objectives, a ROT may continue to do business on the FCO floor on a part-time basis during a transition period. The Phlx believes it is likely that there will be periods of time when FCO

[3] The Phlx's FCO trading floor is located in the same building as its equity options trading floor, but is in a different room.

Specialists and FCO Floor Brokers will be present on the FCO floor with no FCT ROTs present. The Phlx believes that compliance with Phlx Rule 1063(a) and Phlx Options Floor Procedure Advices A–10 and C–1 would not be possible under those circumstances.

The Phlx intends the proposed temporary rule change to provide an exception, effective until March 31, 2001, from the requirements in Phlx Rule 1063(a) and Phlx Options Floor Procedure Advices A–10 and C–1 that an ROT be present at the trading post in certain circumstances.[4] The Phlx represents that the exception would apply only if not ROT is present on the FCO floor when an FCO Specialist trades as principal with an order on the book, or when an FCO Floor Broker represents an order or executes a trade. The Phlx believes that the proposed temporary rule change would enable it to provide fair and orderly markets in FCOs in the event the FCO ROTs are absent from the FCO floor during the period that begins on the date of this Order and ends on March 31, 2001. The Phlx represents that, no later than January 12, 2001, it will file a proposed rule change seeking permanently to amend Phlx Rule 1063 and Phlx Floor Options Procedure Advices A–10 and C–1.

2. Statutory Basis

The Phlx believes that the proposed rule change is consistent with section 6(b) of the Act in general, and furthers the objectives of section 6(b)(5) in particular, in that it is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, and processing information with respect to transactions in securities, to remove impediments to and perfect the mechanism of a free and open market system, and, in general, to protect investors and the public interest. Moreover, the Phlx believes that the proposed rule change is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. In the Phlx's view, the proposed rule change will permit Phlx Specialists to continue to trade as principal with orders on the book, and will allow Phlx Floor Brokers to continue to represent and execute orders in FCOs in the event that no ROTs are present on the FCO floor at any time from the date of this Order until March 31, 2001.

B. Self-Regulatory Organization's Statement on Burden on competition

The Phlx does not believe that the proposed rule change will impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Phlx has neither solicited nor received written comments on the proposed rule change.

III. Commission's Findings and Order Granting Accelerated Approval of the Proposed Rule Change

The Commission has reviewed the Phlx's proposed rule change carefully and finds, for the reasons set forth below, that the proposal is consistent with the requirements of Section 6 of the Act and the rules and regulations thereunder applicable to a national securities exchange, particularly section 6(b)(5) of the Act.[5] The Commission believes that the proposed temporary rule change will enable the Phlx to provide fair and orderly markets in FCOs in the event that ROTs are absent from the FCO floor during the period beginning on the date of this Order and ending on March 31, 2001. Specifically, the Commission believes that, pursuant to the proposed temporary rule, Phlx Specialists will be able to trade as principals with FCO orders on the book and Phlx Floor Brokers will be able to represent and execute orders in FCOs at a time when the Phlx has been informed that ROTs no longer will be doing business on a regular basis on the FCO floor. In view of the foregoing, the Commission believes that the proposed rule change is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Accordingly, the Commission finds that the proposed temporary rule change furthers the objectives of the Act.

The Phlx has requested that, pursuant to section 19(b)(2) of the act,[6] the Commission grant accelerated approval of the proposed rule change prior to the thirtieth day after the date of publication of notice of this filing in the **Federal Register**. The Commission finds good cause to approve the proposed temporary rule change effective immediately, so that Phlx Specialists and Floor Brokers may continue to operate in accordance with Phlx rules in the event that no ROTs are present on the FCO floor beginning January 3, 2001. The Commission expects that, no later than January 12, 2001, the Phlx will file a proposed rule change seeking permanently to amend Phlx Rule 1063 and Phlx Floor Options Procedure Advices A–10 and C–1.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the Phlx. All submissions should refer to File No. SR–Phlx–00–111 and should be submitted by February 1, 2001.

V. Conclusion

It Is Therefore Ordered, pursuant to section 19(b)(2) of the Act,[7] that the proposed rule change (File No. SR–Phlx–00–111) is hereby approved on an accelerated basis and shall be in effect until March 31, 2001.[8]

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[9]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–43790; International Series Release No. 1243; File No. SR–Phlx–00–66]

Self-Regulatory Organizations; Order Approving a Proposed Rule Change by the Philadelphia Stock Exchange, Inc., Relating to the Narrowing of the Exercise Strike Price Interval for Foreign Currency Options on the Euro

January 2, 2001.

I. Introduction

On July 12, 2000, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] the Philadelphia Stock Exchange, Inc. (''Phlx'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change to reduce, from two cents to one cent, the strike price interval for foreign currency options on the Euro denominated in U.S. dollars (''Euro FCOs''). The proposed rule change and Amendment No. 1 thereto[3] were published for comment and appeared in the **Federal Register** on November 21, 2000.[4] The Commission received no comments on the proposal. This order approves the Phlx's proposed rule change, as amended.

II. Description of the Proposal

The Phlx proposes to adopt a narrower strike price interval with respect to American-style and European-style, standardized Euro FCOs with one, two, three, six, nine, and twelve months until expiration. Currently, Euro FCOs are listed at two-cent intervals. The Phlx proposes to reduce the exercise strike price interval of all Euro FCO series to one cent because the spot price of the Euro has declined against the U.S. dollar. For example, the Euro was worth $1.18738 in 1999, but was worth only $.8544 by October 2000.[5]

The Phlx's exercise strike price interval policies are administered pursuant to Phlx Rule 1012 (''Series of Options Open for Trading''). In accordance with Phlx Rule 1012, the Phlx lists regular and month-end Euro FCO contracts for each of the six expiration months. The Phlx currently lists Euro FCO contracts at two-cent strike price intervals; for example, it recently listed Euro FCOs at strike prices of $.80, $.82, $.84, $.86, $.88, and $.90 for each expiration month. The Phlx's adoption of the proposed one-cent exercise strike price interval would mean, in this example, that the additional strike prices of $.81, $.83, $.85, $.87, and $.89 would become available for trading in all six expiration months.

The Phlx represents that the purpose of the proposed rule change is to respond to customer demand for a narrower strike price interval as a result of a decline in the underlying price of the Euro as expressed in U.S. dollars. The Phlx believes that the proposed rule change makes economic sense because a narrower strike price interval in Euro FCOs would enable market participants to tailor their investment strategies more closely to the precise movement of the Euro. The Phlx notes that the Commission previously has permitted narrower exercise strike price intervals with respect to foreign currency options based on the market value of the respective underlying security.[6] The Phlx represents that it will distribute a memorandum to all of its members and FCO participants notifying them of the change in the exercise strike sprice interval for Euro FCO contracts, effective as of the date of Commission approval.[7]

The adoption of a narrower price interval for Euro FCOs would mean that additional Euro FCO series would become available for trading at the Phlx. The Phlx notes that its Selective Quoting Facility[8] would apply to all Euro FCO series traded. The Selective Quoting Facility provides that when the Phlx designates a particular foreign currency option series as a ''non-update strike.'' its quotes are not made avaialble for continuous dissemination to the public throughout the trading day. The Phlx believes that, by reducing the number of strike prices that are continuously updated and disseminated, the Selective Quoting Facility enables more timely and accurate quote displays of foreign currency options. Accordingly, the Phlx believes that the predicted increase in the number of Euro FCO series will not adversely affect its quote traffic and computer processing capacity.

III. Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules thereunder applicable to a national securities exchange, particularly section 6(b)(5) of the Act.[9] The Commission notes that the proposal is consistent with prior Commission orders approving narrow strike price intervals based upon the market values of the underlying securities.[10] Moreover, the Commission believes that the Phlx's proposal to adopt a one-cent strike price interval with respect to Euro FCOs will allow market participants to tailor their Euro FCO positions more finely and manage their currency risk with respect to the Euro more effectively. Accordingly, the Commission believes that the narrowing of the strike price interval for Euro FCOs will promote just and equitable principles of trade.

The Commission notes, however, that the narrowing of the strike price interval may disperse trading interest to a degree that excessively dilutes liquidity in open Euro FCO series. Therefore, in evaluating the appropriate strike price interval for the Euro FCOs, the Commission must weigh the presumed benefit of a wider array of investment opportunities against the potential hazard of a proliferation of illiquid options series. The Commission believes that the Phlx proposal strikes a reasonable balance between those competing concerns. Although the proposal will make additional Euro FCO series available for trading, the Commission expects the Phlx to continue its current policy of delisting options series with no open interest,[11]

Continued

thereby eliminating any illiquid Euro FCO series that may result from the implementation of this proposal.

Furthermore, because the Phlx will apply its Selective Quoting Facility to determine whether to disseminate the quotes of the additional Euro FCO series throughout the trading day, the Commission believes that the Phlx's computer system can manage the additional quote traffic that the new Eruo FCO options series are expected to generate. Nevertheless, the Commission requests that the Phlx monitor the volume of additional options series listed as a result of this rule change and ensure that the additional series do not adversely affect the computer system's processing capacity.

IV. Conclusion

It Is Therefore Ordered, pursuant to section 19(b)(2) of the Act,[12] that the proposed rule change (File No. SR–Phlx–00–66) is approved.[13]

For the Commission, by the Division of the Market Regulation, pursuant to delegated authority.[14]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–43792; File No. SR–Phlx–00–98]

Self-Regulatory Organizations; Order Granting Approval to Proposed By-Law Changes by the Philadelphia Stock Exchange, Inc. to Clarify References in the Exchange's By-Laws and Rules to the Allocation, Evaluation and Securities Committee

January 2, 2001.

I. Introduction

On November 7, 2000, the Philadelphia Stock Exchange, Inc. (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4[2] thereunder, a proposed by-law change to clarify references in Exchanges by-laws and rules to the Allocation, Evaluation and Securities Committee. On November 29, 2000, the Commission published the proposal in the **Federal Register.**[3] The Commission received no comments on the proposal. This order approves the proposed by-law change.

II. Description of the Proposal

On July 5, 2000, the Commission approved a proposal to amend Phlx By-Law Article X, Section 10–7, to divide the Exchange's Allocation, Evaluation and Securities Committee into two separate committees: the Options Allocation, Evaluation and Securities Committee and the Equity Allocation, Evaluation and Securities Committee.[4] Currently, various sections of the Exchange's by-laws and rules refer simply to the ''Allocation, Evaluation and Securities Committee.'' Phlx proposes to amend its by-laws to clarify that references to the ''Allocation, Evaluation and Securities Committee'' in the Exchange by-laws and rules may mean either the Options Allocation, Evaluation and Securities Committee or the Equity Allocation, Evaluation and Securities Committee, as the context requires, and thus to ensure that the by-laws and rules pertaining to each committee remain consistent.

III. Discussion

The Commission has determined that the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to a national securities exchange.[5] In particular, the Commission finds that the proposal is consistent with section 6(b)(5) of the Act which requires, among other things, that the rules of an exchange be designed to foster cooperation and coordination with persons engaged in regulating and facilitating transactions in securities, to remove impediments to and perfect the mechanisms of a free and open market, and to protect investors and the public interest.[6] The Commission believes that in clarifying references to the Allocation, Evaluation and Securities Committee—which recently was split into two separate committees—the proposal will help ensure consistency in the Exchange's by-laws and rules which, therefore, furthers the purposes of the Act.

IV. Conclusion

It Is Therefore Ordered, pursuant to section 19(b)(2) of the Act,[7] that the proposed rule change (SR–Phlx–00–98) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Margaret H. McFarland,

Deputy Secretary.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster #3310]

State of Alabama; Amendment #1

In accordance with notices received from the Federal Emergency Management Agency, dated December 22 and December 28, 2000, the above-numbered Declaration is hereby amended to include Cherokee and Jefferson Counties in the State of Alabama as a disaster area due to damages caused by severe storms and tornadoes, and to establish the incident period for this disaster as beginning on December 16, 2000 and continuing through December 22, 2000.

In addition, applications for economic injury loans from small businesses located in the following contiguous counties may be filed until the specified date at the previously designated location: Cleburne County, Alabama, and the counties of Chattooga, Floyd, and Polk in the State of Georgia. All other contiguous counties have been previously declared.

All other information remains the same, *i.e.,* the deadline for filing applications for physical damage is February 16, 2001 and for economic injury the deadline is September 18, 2001.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008)

Dated: January 3, 2001.

Herbert L. Mitchell,

Acting Associate Administrator for Disaster Assistance.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster #3315]

State of Arkansas

As a result of the President's major disaster declaration on December 29, 2000, I find that the following Counties in the State of Arkansas constitute a disaster area due to damages caused by a severe winter ice storm beginning on December 12, 2000 and continuing: Arkansas, Benton, Bradley, Calhoun, Clark, Cleveland, Columbia, Crawford, Crittenden, Cross, Dallas, Desha, Drew, Faulkner, Franklin, Garland, Grant, Hempstead, Hot Spring, Howard, Jackson, Jefferson, Johnson, Lafayette, Lee, Lincoln, Little River, Logan, Lonoke, Madison, Miller, Mississippi, Monroe, Montgomery, Nevada, Ouachita, Perry, Pike, Poinsett, Polk, Prairie, Pulaski, Saline, Scott, Sebastian, Sevier, St. Francis, Union, Washington, White, Woodruff, and Yell. Applications for loans for physical damage as a result of this disaster may be filed until the close of business on February 27, 2001, and for loans for economic injury until the close of business on October 1, 2001 at the address listed below or other locally announced locations: U.S. Small Business Administration, Disaster Area 3 Office, 4400 Amon Carter Blvd., Suite 102, Fort Worth, TX 76155.

In addition, applications for economic injury loans from small businesses located in the following contiguous counties may be filed until the specified date at the above location: Ashley, Carroll, Chicot, Cleburne, Conway, Craighead, Independence, Lawrence, Newton, Phillips, Pope, and Van Buren Counties in Arkansas; Bossier, Caddo, Claiborne, Morehouse, Union, and Webster Counties, Louisiana; Bolivar, Coahoma, De Soto, and Tunica Counties in Mississippi; Adair, Delaware, Le Flore, McCurtain, and Sequoyah Counties, Oklahoma; Dyer, Lauderdale, Shelby, and Tipton Counties in Tennessee; Barry, Dunklin, McDonald, and Pemiscot Counties, Missouri; and Bowie and Cass Counties, Texas.

The interest rates are:

For Physical Damage:
Homeowners With Credit Available Elsewhere—7.000%
Homeowners Without Credit Available Elsewhere—3.500%
Businesses With Credit Available Elsewhere—8.000%
Businesses and Non-Profit Organizations Without Credit Available Elsewhere—4.000%
Others (Including Non-Profit Organizations) With Credit Available Elsewhere—7.000%
For Economic Injury:
Businesses and Small Agricultural Cooperatives Without Credit Available Elsewhere—4.000%

The number assigned to this disaster for physical damage is 331511. For economic injury the numbers are 9K1000 for Arkansas, 9K1100 for Louisiana, 9K1200 for Mississippi, 9K1300 for Oklahoma, 9K1400 for Tennessee, 9K1500 for Missouri and 9K1600 for Texas.

[Delegation of Authority No. 23–C, Revision 4]

Inspector General; Delegation of Authority and Line of Succession

Delegation of authority No. 23–C is hereby revised to effect a delegation of authority and provide a line of succession from the Inspector General as follows:

I. Pursuant to authority vested in me by the Inspector General Act of 1978, as amended, in the event of the death, disability, absence, resignation, or removal of the Inspector General, Small Business Administration, the officials designated below, in the order indicated, and in the absence of the specific designation of another official in writing by the Inspector General or the Acting Inspector General, are hereby authorized to and shall serve as Acting Inspector General. The designated officials shall perform the duties and are delegated the full authority and power ascribed to the Inspector General by law and regulation as well as those authorities delegated to the Inspector General by the Administrator, Small Business Administration:

1. Deputy Inspector General
2. Counsel to the Inspector General
3. Assistant Inspector General for Auditing
4. Assistant Inspector General for Investigations
5. Assistant Inspector General for Inspection and Evaluation
6. Assistant Inspector General for Management and Policy

II. Anyone designated by the Inspector General as acting in one of the positions listed above remains in the line of succession; otherwise, the authority moves to the next position.

III. This delegation is not in derogation of any authority residing in the above officials relating to the operations of their respective programs, nor does it affect the validity of any delegations currently in force and effect and not specifically cited as revoked or revised herein.

IV. The authorities delegated herein may not be redelegated.

Dated: January 3, 2001.

Phyllis K. Fong,

Inspector General.

BILLING CODE 8025–01–P

DEPARTMENT OF STATE

[Public Notice 3535]

Bureau of Educational and Cultural Affairs; College and University Affiliations Program for Tunisia; Notice: Request for Grant Proposals

SUMMARY: The Office of Global Educational Programs of the Bureau of Educational and Cultural Affairs announces an open competition for an assistance award program to support the development of programs of instruction and faculty training at universities in Tunisia in business management, public administration, or another field with significant potential impact on the Tunisian economy. Accredited, post-secondary educational institutions meeting the provisions described in IRS regulation 26 CFR 1.501(c) may apply to pursue institutional or departmental objectives in partnership with one or more Tunisian institutions with support from the College and University Affiliations Program. The means for achieving the objectives of the applicant and its partner(s) may include mentoring, teaching, consultation, research, distance education, internship training, and professional outreach to public and private sector managers and entrepreneurs.

Overview and Project Objectives

The project is designed to assist Tunisian universities to develop a modern curriculum and program in business management or public administration to facilitate the development of business activity and the quality, efficiency and integrity of the private and public sectors in Tunisia. While priority will be given to competitive proposals in business management, proposals in public administration and other fields are also eligible if the proposals demonstrate their potential impact on the Tunisian economy.

Proposals emphasizing practical strategies to assist the Tunisian faculty and administrators to develop new curricula, teaching methodologies and programs are encouraged. All proposals should explain the potential impact of the project on the Tunisian economy.

Bureau policy stipulates that awards to organizations with less than four years' experience in conducting international exchanges are limited to $60,000. Funds will be awarded for a period up to three years to assist with the costs of exchanges, educational materials, and to increase library holdings and improve Internet connections. Up to 20% of the grant total may be used towards costs of

project administration. Indirect administrative costs are not an eligible expense for Bureau funding under this competition, but may be presented as part of the U.S. institutional contribution.

The project should pursue these objectives through a strategy that coordinates the participation of junior and senior level faculty, administrators or graduate students for any appropriate combination of teaching, mentoring, internships, in-service training and outreach, for exchange visits ranging from one week to an academic year. Visits of one semester or more for participants from Tunisia are strongly encouraged and program activities must be tied to the goals and objectives of the program. Proposals may also include English language training for selected participants whose existing English skills may need to be strengthened or refreshed.

U.S. Institution and Participant Eligibility

In the United States, participation in the program is open to accredited two and four-year colleges and universities, including graduate schools. Applications from consortia or other combinations of U.S. colleges and universities are eligible. Secondary U.S. partners may include governmental and non-governmental organizations, as well as non-profit service and professional organizations. The lead U.S. university in the consortium or other combination of cooperating institutions is responsible for submitting the application. Each application must document the lead organization's authority to represent all U.S. cooperating partners.

Participants representing the U.S. institution must be U.S. citizens. With the exception of outside consultants reporting on the degree to which project objectives have been achieved, participants who are traveling under the Bureau's grant funds must be teachers, advanced graduate students who are teaching or research assistants, or administrators from the participating institution(s). Advanced graduate students are eligible for Bureau-funded participation in this program only if they are working under the direction of an accompanying faculty participant.

Tunisian Institution and Participant Eligibility

In Tunisia, the partner must be a recognized institution of post-secondary education. Secondary foreign partners may include relevant governmental and non-governmental organizations, as well as non-profit service and professional organizations concerned with issues in business development or public administration training in Tunisia.

Foreign participants must be citizens or permanent residents of Tunisia and must be qualified to receive a J–1 visa.

Budget Guidelines

Applicants may submit a budget proposing up to $120,000 for funding by the Bureau. Requests for amounts smaller than the maximum are eligible. Budget and budget notes should carefully justify the amounts needed. There must be a summary budget as well as a breakdown reflecting the program and administrative budgets including unit costs. Cost sharing will be considered an important indicator of institutional commitment. Please refer to the Solicitation Package for complete guidelines and formatting instructions.

Announcement Title and Number

All correspondence with the Bureau of Educational and Cultural Affairs concerning this RFGP should reference the above title ''College and University Affiliations Program in Tunisia'' and reference number ECA/A/S/U–01–19.

FOR FURTHER INFORMATION CONTACT: Contact the Humphrey Fellowships and Institutional Linkages Branch, Office of Global Educational Programs, Bureau of Educational and Cultural Affairs; ECA/A/S/U, Room 349, SA–44; U.S. Department of State, 301 4th Street, SW., Washington, DC 20547, phone (202) 619–5289, fax: (202) 401–1433, e-mail: mpizarro@pd.state.gov to request a Solicitation Package.

The Solicitation Package contains detailed award criteria, required application forms, and guidelines for preparing proposals, including specific criteria for preparation of the proposal budget. Please specify the above reference number on all inquiries and correspondence.

Please read the complete **Federal Register** announcement before sending inquiries or submitting proposals. Once the RFGP deadline has passed, Bureau staff may not discuss this competition with applicants until the proposal review process has been completed.

To Download a Solicitation Package Via Internet

The entire Solicitation Package may be downloaded from the Bureau's website at http://exchanges.state.gov/education/rfgps. Please read all information before downloading.

Deadline of Proposals

All proposal copies must be received at the Bureau of Educational and Cultural Affairs by 5 p.m. Washington DC time on Friday, April 20, 2001. Faxed documents will not be accepted at any time. Documents postmarked by the due date but received on a later date will not be accepted.

It is the responsibility of each applicant to ensure compliance with the deadline.

Approximate Program Dates

Grants should begin on or about August 1, 2001.

Duration

August 1, 2001–August 31, 2004.

Submissions

The U.S. institutional partner must submit the proposal. Applicants must follow all instructions in the Solicitation Package. The original and 10 copies of the application should be sent to: U.S. Department of State, SA–44, Ref.: ECA/A/S/U–01–19, Program Management, ECA/EX/PM, Room 534, 301 4th Street, SW., Washington, DC 20547.

All copies should include the documents specified under Tabs A through E in the ''Project Objectives, Goals, and Implementation'' (POGI) section of the Solicitation Package. The documents under Tab F of the POGI should be submitted with the original application and with one of the ten copies.

Proposals that do not follow RFGP requirements and the guidelines appearing in the POGI and PSI may be excluded from consideration due to technical ineligibility.

Applicants must also submit the ''Executive Summary'' and ''Proposal Narrative'' Sections of the proposal on a 3.5'' diskette, formatted for DOS. This material must be provided in ASCII text (DOS) format with a maximum line length of 65 characters. The Bureau will transmit these files electronically to the Public Affairs Section of the U.S. Embassy in Tunis for its review, with the goal of reducing the time it takes to get the Embassy's comments for the Bureau's grants review process.

Diversity, Freedom and Democracy Guidelines

Pursuant to the Bureau's authorizing legislation, projects must maintain a non-political character and should be balanced and representative of the diversity of American political, social, and cultural life. ''Diversity'' should be interpreted in the broadest sense and encompass differences including, but not limited to, ethnicity, race, gender, religion, geographic location, socio-economic status, and physical challenges. Applicants are strongly

encouraged to adhere to the advancement of this principle both in program administration and in program content.

Please refer to the review criteria under the ''Support for Diversity'' section for specific suggestions on incorporating diversity into the total proposal. Public Law 104–319 provides that ''in carrying out programs of educational and cultural exchange in countries whose people do not fully enjoy freedom and democracy,'' the Bureau ''shall take appropriate steps to provide opportunities for participation in such programs to human rights and democracy leaders of such countries.'' Public Law 106—113 requires that the governments of the countries described above do not have inappropriate influence in the selection process. Proposals should reflect advancement of these goals in their program contents, to the full extent deemed feasible.

Review Process

The Bureau will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines stated herein and in the Solicitation Package. All eligible proposals will be reviewed by the program office, as well as the Public Affairs Section of the U.S. Embassy in Tunis. Eligible proposals will be subject to compliance with Federal and Bureau regulations and guidelines and forwarded to Bureau grant panels for advisory review. Proposals may also be reviewed by the Office of the Legal Adviser or by other Department elements. Final funding decisions are at the discretion of the Department of State's Assistant Secretary for Educational and Cultural Affairs. Final technical authority for assistance awards (grants or cooperative agreements) resides with the Bureau's Grants Officer.

Review Criteria

State Department officers in Washington, D.C. and overseas will use the criteria below to reach funding recommendations and decisions. Technically eligible applications will be competitively reviewed according to the criteria stated below. These criteria are not rank-ordered or weighed.

1. Quality of the Program Idea

Proposals should exhibit originality, substance, precision, and resourcefulness. Proposals should exhibit sensitivity to the region, and have reasonable and feasible project objectives that are relevant to the needs of a Tunisian university. Proposals should describe projected benefits to the institutions involved as well as to wider communities of educators and practitioners in Tunisia.

2. Program Planning

Proposals should include creative, realistic and feasible program plans as well as a detailed schedule, which should include a well-reasoned combination of useful and appropriate mentoring, teaching techniques and outreach activities supporting the project objectives.

3. Support of Diversity

Proposals should demonstrate substantive support of the Bureau's policy on diversity by explaining how issues of diversity relate to project objectives and how these issues will be addressed during project implementation. Proposals should also outline the institutional profile of each participating institution with regard to issues of diversity.

4. Institutional Capacity and Commitment

Proposals should demonstrate significant understanding of the needs and capacities of the Tunisian university partner(s) as well as the needs and capacity of the U.S. institution, and should demonstrate a strong commitment to on-going cooperation during and after the period of the grant activity. Relevant factors include: the availability of a sufficient number of faculty and/or administrators willing and able to participate in project activities. Proposals should demonstrate a promise of long-term impact and a plan for follow-on activities.

5. Institutional Record/Ability

Proposals should demonstrate an institutional record of administering successful exchange programs, including responsible fiscal management and full compliance with all reporting requirements for past Bureau grants as determined by the State Department's contracts officers. The Bureau will consider the past performance of prior recipients and the demonstrated potential of new applicants. Reviewers will also consider the quality of exchange participants' academic credentials, skills, commitment and experience relative to the goals and activities of the project plan.

6. Project Evaluation

The proposal should outline a methodology to assess progress toward the achievement of project goals. The final evaluation should include an external component and observations about anticipated long-term impact on the Tunisian economy.

7. Cost-Effectiveness

Administrative and program costs should be reasonable and appropriate with cost sharing provided as a reflection of commitment to the pursuit of project objectives.

Authority

Overall grant making authority for this program is contained in the Mutual Educational and Cultural Exchange Act of 1961, Public Law 87–256, as amended, also known as the Fulbright-Hays Act. The purpose of the Act is ''to enable the Government of the United States to increase mutual understanding between the people of the United States and the people of other countries * * *; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations * * * and thus to assist in the development of friendly, sympathetic and peaceful relations between the United States and the other countries of the world.'' The funding authority for the program cited above is provided through the U.S. North African Economic Partnership.

Notice

The terms and conditions published in this RFGP are binding and may not be modified by any Bureau representative. Explanatory information provided by the Bureau that contradicts published language will not be binding. Issuance of the RFGP does not constitute an award commitment on the part of the Government.

The Bureau reserves the right to reduce, revise, or increase proposal budgets in accordance with the needs of the program and the availability of funds. Awards made will be subject to periodic reporting and evaluation requirements.

Notification

Final awards cannot be made until funds have been appropriated by Congress, allocated and committed through internal Bureau procedures.

Dated: January 2, 2001.

William B. Bader,

Assistant Secretary for Educational and Cultural Affairs, U.S. Department of State.

BILLING CODE 4710–05–U

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Docket No. MC–F–20975]

Stagecoach Holdings plc and Coach USA, Inc., et al.-Control-B & B Bus Corporation, Inc., et al.

AGENCY: Surface Transportation Board, Transportation.

ACTION: Notice tentatively approving finance application.

SUMMARY: Stagecoach Holdings plc (Stagecoach), and its subsidiary, Coach USA, Inc. (Coach), both noncarriers that control motor passenger carriers, and various subsidiaries of each (collectively, applicants), filed an application under 49 U.S.C. 14303 for Stagecoach, related applicants, Coach, and Coach's wholly owned subsidiary, Coach USA Northeast, Inc. (Coach Northeast), to acquire control of twenty-four New Jersey-based motor passenger carriers (New Jersey Carriers),[1] which hold federally issued operating authority to provide charter and special operations between points in the United States.[2] Persons wishing to oppose the application must follow the rules at 49 CFR 1182.5 and 1182.8. The Board has tentatively approved the transaction, and, if no opposing comments are timely filed, this notice will be the final Board action.

DATES: Comments must be filed by February 26, 2001. Applicants may file a reply by March 12, 2000. If no comments are filed by February 26, 2001, this notice is effective on that date.

ADDRESSES: Send an original and 10 copies of any comments referring to STB Docket No. MC–F–20975 to: Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, NW., Washington, DC 20423–0001. In addition, send one copy of comments to applicants' representative: Betty Jo Christian, Steptoe & Johnson LLP, 1330 Connecticut Avenue, NW., Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Beryl Gordon, (202) 565–1600. (TDD for the hearing impaired: 1–800–877–8339.)

SUPPLEMENTARY INFORMATION: Stagecoach is a public limited company organized under the laws of Scotland, and Coach is a Delaware corporation. Stagecoach and its subsidiaries currently control Coach and its noncarrier regional management subsidiaries, as well as the motor passenger carriers jointly controlled by Coach and the management subsidiaries.[3]

Applicants state that, in June 2000, Coach purchased all of the outstanding stock of nineteen of the New Jersey Carriers, and acquired five additional carriers in that transaction by virtue of the fact that some of the nineteen carriers had wholly owned subsidiaries. Simultaneously with the purchase, Coach established five independent voting trusts, and placed 20% of the stock of each of the twenty-four New Jersey Carriers into each of the five separate voting trusts, to ensure no unlawful control of the carriers pending Board approval of the application.

Applicants submit that the federal and state operating authorities held by the New Jersey Carriers will not be transferred from one entity to another as a result of the control transaction, and that there will be no change in the operations of any of the New Jersey Carriers.

Under 49 U.S.C. 14303(b), we must approve and authorize a transaction we find consistent with the public interest, taking into consideration at least: (1) The effect of the transaction on the adequacy of transportation to the public; (2) the total fixed charges that result; and (3) the interest of affected carrier employees.

Applicants have submitted the information required by 49 CFR 1182.2, including information to demonstrate that the proposed transaction is consistent with the public interest under 49 U.S.C. 14303(b). Specifically, applicants have shown that the proposed transaction will have a positive effect on the adequacy of transportation to the public and will result in no increase in fixed charges, and no changes in employment. *See* 49 CFR 1182.2(a)(7). Additional information, including a copy of the application, may be obtained from the applicants' representative.

On the basis of the application, we find that the proposed transaction is consistent with the public interest and should be authorized. If any opposing comments are timely filed, this finding will be deemed vacated and, unless a final decision can be made on the record as developed, a procedural schedule will be adopted to reconsider the application. *See* 49 CFR 1182.6(c). If no opposing comments are filed by the expiration of the comment period, this decision will take effect automatically and will be the final Board action.

Board decisions and notices are available on our website at: ''WWW.STB.DOT.GOV.''

This decision will not significantly affect either the quality of the human environment or the conservation of energy resources.

It is ordered:

1. The proposed acquisitions of control are approved and authorized, subject to the filing of opposing comments.

2. If timely opposing comments are filed, the findings made in this decision will be deemed as having been vacated.

3. This decision will be effective on February 26, 2001, unless timely opposing comments are filed.

4. A copy of this notice will be served on: (1) the U.S. Department of Transportation, Federal Motor Carrier Safety Administration—MC–RI, 400 Virginia Avenue, SW., Suite 600, Washington, DC 20024; (2) the U.S. Department of Justice, Antitrust Division, 10th Street & Pennsylvania Avenue, NW., Washington, DC 20530; and (3) the U.S. Department of Transportation, Office of the General Counsel, 400 7th Street, SW., Washington, DC 20590.

Decided: January 4, 2001.

By the Board, Chairman Morgan, Vice Chairman Burkes, and Commissioner Clyburn.

Vernon A. Williams,

Secretary.

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Finance Docket No. 33978]

Summit View, Inc.—Acquisition of Control Exemption—Pittsburgh Industrial Railroad, Inc.

Summit View, Inc. (Summit), a noncarrier holding company, has filed a notice of exemption to acquire control, through stock purchase of the Pittsburgh Industrial Railroad, Inc. (PIRR), a Class III rail carrier, operating in the State of Pennsylvania.[1] PIRR is a wholly owned subsidiary of Railtex, Inc.[2]

The transaction was scheduled to be consummated on or shortly after December 19, 2000.

Summit currently controls seven existing Class III rail carriers: Ohio Central Railroad, Inc.; Ohio Southern Railroad, Inc.; Austintown Railroad, Inc.; Warren & Trumbull Railroad; Columbus & Ohio River Railroad Company, Ohio Pennsylvania Railroad Company, and Youngstown Belt Railroad Company.

Summit states that: (i) The railroads do not connect with each other; (ii) the transaction is not part of a series of anticipated transactions that would connect the railroads with each other; and (iii) the transaction does not involve a Class I carrier. Therefore, the transaction is exempt from the prior approval requirements of 49 U.S.C. 11323. *See* 49 CFR 1180.2(d)(2).

Under 49 U.S.C. 10502(g), the Board may not use its exemption authority to relieve a rail carrier of its statutory obligation to protect the interests of its employees. Section 11326(c), however, does not provide for labor protection for transactions under sections 11324 and 11325 that involve only Class III rail carriers. Because this transaction involves Class III rail carriers only, the Board, under the statute, may not impose labor protective conditions for this transaction.

If the notice contains false or misleading information, the exemption is void *ab initio.* Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

An original and 10 copies of all pleadings, referring to STB Finance Docket No. 33978, must be filed with the Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, N.W., Washington, DC 20423–0001. In addition, a copy of all pleadings must be served on Kelvin J. Dowd, Esq., Slover & Loftus, 1224 Seventeenth Street, N.W.,Washington, DC 20036.

Board decisions and notices are available on our website at *http://WWW.STB.DOT.GOV.*

Decided: January 4, 2001.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

BILLING CODE 4915–00–P

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

Proposed Extension of Information Collection; Comment Request

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury.

ACTION: Notice and request for comment.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995. Currently, the OCC is soliciting comment concerning its extension of an information collection titled, ''Community Development Corporation and Project Investments and Other Public Welfare Investments—12 CFR 24.''

DATES: You should submit written comments by March 12, 2001.

ADDRESSES: You should direct all written comments to the Public Information Room, Office of the Comptroller of the Currency, Mailstop 1–5, Attention: 1557–0194, 250 E Street, SW., Washington, DC 20219. In addition, you may send comments by facsimile transmission to (202) 874–4448, or by electronic mail to regs.comments@occ.treas.gov. You can inspect and photocopy the comments at that address. You can make an appointment to inspect the comments by calling (202) 874–5043.

FOR FURTHER INFORMATION CONTACT: You can request additional information from or obtain a copy of the collection from Jessie Dunaway, OCC Clearance Officer, or Camille Dixon, (202) 874–5090, Legislative and Regulatory Activities Division (1557–0194), Office of the Comptroller of the Currency, 250 E Street, SW., Washington, DC 20219.

SUPPLEMENTARY INFORMATION: The OCC is proposing to extend OMB approval of the following information collection:

Title: Community Development Corporation and Project Investments and Other Public Welfare Investments—12 CFR 24.

OMB Number: 1557–0194.

Description: This submission covers an existing regulation and involves no change to the regulation or to the information collections embodied in the regulation. This regulation implements 12 U.S.C. 24 (Eleventh) which authorizes national banks to make investments that are designed primarily to promote the public welfare, including the welfare of low-and moderate-income families and communities (such as through the provision of housing, services, or jobs) consistent with safe and sound banking practices. The statute requires the OCC to limit a national bank's investment in any one project as well as its aggregate investment in such projects. This regulation requires national banks to make occasional filings to the OCC regarding investment proposals, certain self-certifications, and requests from 3-rated banks to self-certify.

The OCC is providing national banks with a form by which they make these filings and notify the OCC of investments authorized by 12 U.S.C. 24 (Eleventh). National banks must use this form either to self-certify an investment, pursuant to 12 CFR 24.5(a), or to submit a request for prior OCC approval of an investment, pursuant to 12 CFR 24.4(a) and 24.5(b). The OCC's form simplifies the self-certification and prior approval processes by outlining the rule's requirements and allowing banks to check off most responses. This streamlining of information that national banks must submit to the OCC helps to reduce the time and burden attendant to the rule's notification and approval processes. The OCC intends that this form will encourage banks to increase or enhance their investments under part 24.

A national bank that is not eligible to self-certify investments under 12 CFR 24.2(e), but is at least adequately capitalized and has a composite rating of at least 3 with improving trends under the Uniform Financial Institutions Rating System, may continue to submit a letter to the OCC's Community Development Division

[1] *See Pittsburgh Industrial Railroad, Inc.—Acquisition and Operation Exemption—Consolidated Rail Corporation and the Pittsburgh, Chartiers and Youghiogheny Railway Company,* STB Finance Docket No. 33308 (STB served Dec. 27, 1996).

[2] *See Railtex, Inc.—Continuance in Control Exemption—Pittsburgh Industrial Railroad, Inc.,* STB Finance Docket No. 33309 (STB served Dec. 27, 1996).

requesting the authority to self-certify investments, pursuant to 12 CFR 24.5(a)(4). The bank may also use the OCC's form to request prior OCC approval of its investments.

The information collection requirements in 12 CFR part 24 are located as follows:

Self certification of public welfare investments (12 CFR 24.5(a)): To self-certify an investment, an eligible bank shall submit a letter of self-certification to the OCC, within 10 days after it makes an investment.

Letters from 3-rated banks requesting to self-certify (12 CFR 24.5(a)(4)): A national bank that is not an eligible bank but that is at least adequately capitalized, and has a composite rating of at least 3 with improving trends under the Uniform Financial Institutions Rating System, may submit a letter to the OCC requesting authority to self-certify investments.

Investments requiring prior approval (12 CFR 24.5(b)): If a national bank does not meet the requirements for self-certification set forth in part 24, the bank must submit a proposal to the OCC requesting prior approval for an investment.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 204.

Estimated Total Annual Responses: 204.

Frequency of Response: On occasion.

Estimated Total Annual Burden: 408 burden hours.

An agency may not conduct or sponsor, and a respondent is not required to respond to an information collection unless the information collection displays a currently valid OMB control number.

Comments submitted in response to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;

(b) The accuracy of the agency's estimate of the burden of the collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: January 5, 2001.

Mark J. Tenhundfeld,

Assistant Director, Legislative & Regulatory Activities Division.

OCC's Form for Processing National Bank Community Development (Part 24) Investments

National banks may make investments designed primarily to promote the public welfare under the community development investment authority in 12 USC 24 (Eleventh) and its implementing regulation, 12 CFR 24 (Part 24). Part 24 contains the OCC guidelines to determine whether an investment is designed primarily to promote the public welfare and procedures that apply to these investments. National banks must submit the completed Form to self-certify or request prior approval of a public welfare investment.

Please provide the following information about the investing bank.

Bank name and charter:	Address:
Telephone number:	
Facsimile number:	
E-mail address/URL:	

Please indicate the process that the bank requests.

____Self-certification (12 CFR 24.5(a)) complete sections 1 and 2.

____Prior approval (12 CFR 24.5(b)) complete section 2.

Section 1 '' Self-Certification Only (12 CFR 24.5(a))

1. Please respond to the following questions to determine whether the bank is eligible to self-certify its Part 24 investments (12 CFR 24.2 (e)).

a. Is the bank ''well-capitalized,'' as defined in 12 CFR 6.4(b)(1)?

____Yes

____No (please answer question 1e.)

b. Does the bank have a composite rating of 1 or 2 under the Uniform Financial Institutions Rating System?

____Yes

____No (please answer question 1e.)

c. What was the bank's most recent Community Reinvestment Act rating?

____Outstanding

____Satisfactory

____Other (please answer question 1e.)

d. Is the bank under a cease and desist order, consent order, formal written agreement, or Prompt Corrective Action directive?

____Yes (please answer question 1e.)

____No

e. Has the OCC provided written notification that the bank may submit Part 24 self-certifications or otherwise be treated as an ''eligible bank'' for the purposes of Part 24?

____Yes (Please attach a copy of the OCC's written notification.)

____No (This investment cannot be self-certified. Please either: (a) send a letter to the OCC to request authorization to self-certify; or (b) complete section 2 to request prior OCC approval).

2.Please respond to the following questions about the bank's investment to determine whether the bank may self-certify its Part 24 investments (12 CFR 24.4(a) and 24.5(a)(5)):

a. Does the bank's aggregate outstanding investments under Part 24 exceed 5 percent of its capital and surplus?

____Yes (This investment cannot be self-certified. Please complete section 2 to request prior OCC approval.)

____No

b. Does this investment involve properties carried on the bank's books as ''other real estate owned''?

____Yes (This investment cannot be self-certified. Please complete section 2 to request prior OCC approval.)

____No

c. Has the OCC determined, in published guidance, that this investment type is inappropriate for self-certification? [For information about such investments, please refer to the most recent OCC Directory of National Bank Community Development Investments, visit the OCC's web page (http://www.OCC.treas.gov), or contact the OCC's

Community Development Division (202) 874–4930).]

____Yes (This investment cannot be self-certified. Please complete section 2 to request prior OCC approval.)

____No

(To continue the self-certification process or to request prior OCC approval, please proceed to section 2 of this Form.)

Section 2—All Requests

1. Please indicate the following about the bank's investment:

a. The name of the CDC, CD project, or entity into which the bank's investment has been or will be made. _____

b. The date on which the subject investment was or will be made.

_____

c. The type of investment (debt or equity).

_____

2. Please indicate how the bank's investment is consistent with Part 24 requirements for investment limits under 12 CFR 24.5.

a. Dollar amount of the bank's investment that is the subject of this submission: $ _____

b. Dollar amount of the bank's aggregate outstanding Part 24 investments (include this investment): $ _____

c. Bank's capital and surplus: $ _____ (Please indicate date _____.)

d. Percentage of the bank's capital and surplus represented by the aggregate outstanding Part 24 investments and commitments (include this investment) _____ %

e. Does this investment expose the bank to unlimited liability?

____ Yes (This investment cannot be made under Part 24.)

____No (Please explain in question 4b.)

3. Please indicate how the bank's investment is consistent with Part 24 requirements for public welfare investments under 12 CFR 24.3(a):

a. Check at least one of the following that benefits primarily from the bank's investment:

____ Low- and moderate-income individuals.

____ Low- and moderate-income areas.

____ Areas targeted for redevelopment by local, state, tribal, or federal government (including federal enterprise communities and federal empowerment zones).

b. Please identify at least one of the following activities that the bank's investment provides or supports:

____ Affordable housing, community services, or permanent jobs for low- and moderate-income individuals.

____ Equity or debt financing for small businesses.

____ Area revitalization or stabilization.

____ Other activities, services, or facilities that primarily promote the public welfare.

4.Please attach a brief description of the bank's investment. (See 12 CFR 24.5(a)(2)(iii) and (b)(2)(iii)). Include the following information in the description:

a. The activity or activities of the entity in which the bank has or will invest. (See examples of investment activities described in 12 CFR 24.6(a)).

b. Explain how the investment does not expose the bank to unlimited liability, such as by describing the structure of the investment (*e.g.,* CDC subsidiary, multibank CDC, multi-investor CDC, limited partnership, limited liability company, community development bank) and by providing any other relevant information.

c. The total funding for the project from all sources, if known.

d. The geographic area served by the investment entity.

e. Any community development partners involved in the project (*e.g.,* government or public agencies, nonprofits, other investors), if known.

f. Supplemental information (*e.g.,* prospectus, annual report, web address that contains information on the entity in which the investment is made), if available.

5.Please identify the type(s) of nonbank community support for or participation in the investment. (See 12 CFR 24.3(b)):

____ Representation on the board of directors by nonbank community representatives with expertise relevant to the proposed investment.

____ Establishment of an advisory board for the bank's community development activities that includes nonbank community representatives with expertise relevant to the proposed investment.

____ Formation of a formal business relationship with a community-based organization for the proposed investment.

____ Contractual agreements with community partners to provide services for the proposed investment.

____Joint ventures with local small businesses in the proposed investment.

____Financing for the proposed investment from the public sector or community development organizations or the receipt of federal low-income housing tax credits by the project in which the investment is made (directly or through a fund that invests in such projects).

____Other (please describe).

BILLING CODE 4810–33–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0578]

Proposed Information Collection Activity: Proposed Collection; Comment Request

AGENCY: Veterans Health Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Veterans Health Administration (VHA) is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed reinstatement, without change, of a previously approved collection for which approval has expired, and allow 60 days for public comment in response to the notice. This notice solicits comments on information needed to determine the appropriate payment for medical care rendered to Vietnam Veterans' children who have spina bifida.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before March 12, 2001.

ADDRESSES: Submit written comments on the collection of information to Ann Bickoff, Veterans Health Administration (191A1), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420. Please refer to ''OMB Control No. 2900–0578'' in any correspondence.

FOR FURTHER INFORMATION CONTACT: Ann Bickoff at (202) 273–8310.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Public Law 104–13; 44 U.S.C., 3501—3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VHA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VHA's functions, including whether the information will have practical utility; (2) the accuracy of VHA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title: Provision of Health Care to Vietnam Veterans' Children with Spina Bifida.

OMB Control Number: 2900–0578.

Type of Review: Reinstatement, without change, of a previously approved collection for which approval has expired.

Abstract: The information collected will be used to determine appropriate payment for medical care rendered to Vietnam veterans' children with spina bifida. Without the information, VA will be unable to determine the correct amount to reimburse providers for their services.

Affected Public: Business or Other For-Profit and Individuals or Households.

Estimated Total Annual Burden: 1,584 hours.

Estimated Average Burden Per Respondent: 8 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 12,000.

Dated: December 1, 2000.

By direction of the Secretary.

Barbara H. Epps,

Management Analyst, Information Management Service.

[FR Doc. 01–818 Filed 1–10–01; 8:45 am]

Title: Regulation for Informed Consent for Patient Care (Title 38 CFR 17.32).

OMB Control Number: 2900–0583.

Type of Review: Reinstatement, without change, of a previously approved collection for which approval has expired.

Abstract: The information collection subject to this rulemaking concerns the disclosure requirements that non-VA physicians contracting to perform services for VA must follow in conducting informed consent procedures. The information provided is designed to ensure that the patients (or in some cases, others) have sufficient information to provide informed consent.

Affected Public: Individuals or Households.

Estimated Total Annual Burden: 60,000 hours.

Estimated Average Burden Per Respondent: 15 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 240,000.

Dated: December 1, 2000.

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–NEW]

Agency Information Collection Activities Under OMB Review

AGENCY: Veterans Health Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C., 3501 *et seq.*), this notice announces that the Veterans Health Administration (VHA), Department of Veterans Affairs, has submitted the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument.

DATES: Comments must be submitted on or before February 12, 2001.

FOR FURTHER INFORMATION OR A COPY OF THE SUBMISSION CONTACT: Denise McLamb, Information Management Service (045A4), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 273–8030 or FAX (202) 273–5981. Please refer to ''OMB Control No. 2900–NEW.''

SUPPLEMENTARY INFORMATION:

Titles: a. Application for Furnishing Nursing Home Care to Beneficiaries of Veterans Affairs, VA Form 10–1170.

b. Residential Care Home Program—Sponsor Application, VA Form 10–2407.

OMB Control Number: 2900–NEW.

Type of Review: New Collection.

Abstract: VA medical centers and VA Central Office use the information on the forms to determine non-Federal nursing home or the residential care home qualifications for providing care to veterans.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published on March 9, 2000, at pages 12626 and 12627.

Affected Public: Not-for-profit institutions, Individuals or households, Business or other for-profit.

Estimated Annual Burden:

a. VA Form 10–1170—167 hours.

b. VA Form 10–2407—83 hours.

Estimated Average Burden Per Respondent:

a. VA Form 10–1170—20 minutes.

b. VA Form 10–2407—5 minutes.

Frequency of Response: One time.

Estimated Number of Respondents:

a. VA Form 10–1170—500.

b. VA Form 10–2407—1,000.

Send comments and recommendations concerning any aspect of the information collection to VA's OMB Desk Officer, OMB Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503 (202) 395–7316. Please refer to ''OMB Control No. 2900–NEW'' in any correspondence.

Dated: November 28, 2000.

By direction of the Secretary.

Barbara H. Epps,

Management Analyst, Information Management Service.

Agency Information Collection Activities Under OMB Review

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C., 3501 *et seq.*), this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, has submitted the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument.

DATES: Comments must be submitted on or before February 12, 2001.

FOR FURTHER INFORMATION OR A COPY OF THE SUBMISSION CONTACT: Denise McLamb, Information Management Service (045A4), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 273–8030 or FAX (202) 273–5981. Please refer to ''OMB Control No. 2900–0002.''

SUPPLEMENTARY INFORMATION:

Title: Income-Net Worth and Employment Statement, VA Form 21–527.

OMB Control Number: 2900–0002.

Type of Review: Reinstatement, without change, of a previously approved collection for which approval has expired.

Abstract: VA Form 21–527 is used to solicit income, net worth, and employment information. The information is used to determine eligibility and benefit rates for veteran's disability pension and compensation based on individual unemployability.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published on September 14, 2000, at pages 55678–55679.

Affected Public: Individuals or households.

Estimated Annual Burden: 104,440 hours.

Estimated Average Burden Per Respondent: 60 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 104,440.

Send comments and recommendations concerning any aspect of the information collection to VA's OMB Desk Officer, OMB Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503 (202) 395–7316. Please refer to ''OMB Control No. 2900–0002'' in any correspondence.

Dated: November 28, 2000.

By direction of the Secretary.

Barbara H. Epps,

Management Analyst, Information Management Service.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0018]

Agency Information Collection Activities Under OMB Review

AGENCY: Office of General Counsel, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C., 3501 *et seq.*), this notice announces that the Office of General Counsel (OGC), Department of Veterans Affairs, has submitted the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument.

DATES: Comments must be submitted on or before February 12, 2001.

FOR FURTHER INFORMATION CONTACT: Denise McLamb, Information Management Service (045A4), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 273–8030 or FAX (202) 273–5981. Please refer to ''OMB Control No. 2900–0018.''

SUPPLEMENTARY INFORMATION:

Titles: a. Application for Accreditation as Service Organization Representative, VA Form 21.

b. Appointment of Individual as Claimant's Representative, VA Form 22a.

OMB Control Number: 2900–0018.

Type of Review: Reinstatement, with change, of a previously approved collection for which approval has expired.

Abstract: VA Form 21 will be used to obtain basic information necessary to

determine whether an individual may be accredited as a service organization representative for purposes of representation of claimants before VA. The information will be used by VA to evaluate qualifications, ensure against conflicts of interest, and allow appropriate organization officials to certify the character and qualifications of applicants.

VA Form 22a will be used by a claimant for VA benefits to confer power of attorney upon an attorney or agent in order that the attorney or agent may represent the claimant in proceedings before VA. The information is necessary for determining whether access to claimant records may be provided and for notification purposes.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published on December 2, 1999, at pages 67625 and 67626.

Affected Public: Individuals or households, Business or other for-profit and Not-for-profit institutions and State, Local or Tribal Government.

Estimated Annual Burden: 2,775 hours.

a. VA form 21—275 hours.

b. VA Form 22a—2,500 hours.

Estimated Average Burden Per Respondent: 30 minutes.

a. VA form 21—15 minutes.

b. VA Form 22a—15 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 11,100.

a. VA Form 21—1,100.

b. VA Form 22a—10,000.

Send comments and recommendations concerning any aspect of the information collection to VA's OMB Desk Officer, OMB Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503 (202) 395–7316. Please refer to ''OMB Control No. 2900–0018'' in any correspondence.

Dated: November 28, 2000.

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0176]

Agency Information Collection Activities Under OMB Review

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C., 3501 *et seq.*), this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, has submitted the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument.

DATES: Comments must be submitted on or before February 12, 2001.

FOR FURTHER INFORMATION CONTACT: Denise McLamb, Information Management Service (045A4), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 273–8030 or FAX (202) 273–5981. Please refer to ''OMB Control No. 2900–0176.''

SUPPLEMENTARY INFORMATION:

Title: Monthly Record of Training and Wages, VA Form 28–1905c.

OMB Control Number: 2900–0176.

Type of Review: Reinstatement, without change, of a previously approved collection for which approval has expired.

Abstract: A trainer uses the form as an outline for recording veterans' progress toward their rehabilitation goals as well as recording veterans' on-job training monthly wages. Trainers report these wages on the form only at the beginning of the program and at any time the trainee's wage rate changes. Following a veteran's completion of a vocational rehabilitation program, the trainer submits the form to VA for review by the veteran's case manager.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published on September 22, 2000, at page 57434.

Affected Public: Individuals or households, Business or other for-profit.

Estimated Annual Burden: 3,000 hours.

Estimated Average Burden Per Respondent: 15 minutes.

Frequency of Response: Monthly.

Estimated Number of Respondents: 12,000.

Send comments and recommendations concerning any aspect of the information collection to VA's OMB Desk Officer, OMB Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503 (202) 395–7316. Please refer to ''OMB Control No. 2900–0176'' in any correspondence.

Dated: December 5, 2000.

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0219]

Agency Information Collection Activities Under OMB Review

AGENCY: Veterans Health Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C., 3501 *et seq.*), this notice announces that the Veterans Health Administration (VHA), Department of Veterans Affairs, has submitted the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument.

DATES: Comments must be submitted on or before February 12, 2001.

FOR FURTHER INFORMATION CONTACT: Denise McLamb, Information Management Service (045A4), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 273–8030 or FAX (202) 273–5981. Please refer to ''OMB Control No. 2900–0219.''

SUPPLEMENTARY INFORMATION:

Titles:

a. Application for CHAMPVA Benefits, VA Form 10–10D.

b. CHAMPVA Claim Form, VA Form 10–7959A.

c. CHAMPVA—Other Health Insurance (OHI) Certification, VA Form 10–7959C.

d. CHAMPVA Potential Liability Claim, VA Form 10–7959D.

e. VA Spina Bifida Healthcare Benefits—Claim for Miscellaneous Expenses, VA Form 10–7959E.

OMB Control Number: 2900–0219.

Type of Review: Reinstatement, with change, of a previously approved collection for which approval has expired.

Abstract: The following forms are used by Civilian Health and Medical Program-VA (CHAMP–VA) and spina bifida claimants to claim reimbursement for medical care and by VA to determine eligibility, process claims, detect fraud and recover costs from third parties.

a. VA Form 10–10D is used to determine eligibility of persons applying for healthcare benefits under the CHAMPVA program.

b. VA Form 10–7959A is used to adjudicate claims for CHAMPVA.

c. VA Form 10–7959C is used to systematically obtain Other Health Insurance information and to correctly coordinate benefits among all liable parties.

d. VA Form 10–7959D is used to recover costs associated with healthcare services related to injury or illness caused by a third party.

e. VA Form 10–7959E is used by VA Spina Bifida Healthcare beneficiaries to claim payment or reimbursement for healthcare services and related travel expenses.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published on June 7, 2000, at pages 36219 and 36220.

Affected Public: Individuals or households, Business or Other for-Profit.

Estimated Annual Burden: 60,600 hours.

a. VA Form 10–10D—1,500 hours.
b. VA Form 10–7959A—50,000 hours.
c. VA Form 10–7959C—10,333 hours.
d. VA Form 10–7959D—1,167 hours.
e. VA Form 10–7959E—1,600 hours.

Estimated Average Burden Per Respondent:

a. VA Form 10–10D—10 minutes.
b. VA Form 10–7959A—10 minutes.
c. VA Form 10–7959C—10 minutes.
d. VA Form 10–7959D—7 minutes.
e. VA Form 10–7959E—4 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 405,000.

a. VA Form 10–10D—9,000.
b. VA Form 10–7959A—300,000.
c. VA Form 10–7959C—62,000.
d. VA Form 10–7959D—10,000.
e. VA Form 10–7959E—24,000.

Send comments and recommendations concerning any aspect of the information collection to VA's OMB Desk Officer, OMB Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503 (202) 395–7316. DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0335]

Agency Information Collection Activities Under OMB Review

AGENCY: Veterans Health Administration, Department of Veterans Affairs

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C., 3501 *et seq.*), this notice announces that the Veterans Health Administration (VHA), Department of Veterans Affairs, has submitted the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument.

DATES: Comments must be submitted on or before February 12, 2001.

FOR FURTHER INFORMATION CONTACT: Denise McLamb, Information Management Service (045A4), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 273–8030 or FAX (202) 273–5981. Please refer to ''OMB Control No. 2900–0335.''

SUPPLEMENTARY INFORMATION:

Title: Dental Record Authorization and Invoice for Outpatient Services, VA Form 10–2570d.

OMB Control Number: 2900–0335.

Type of Review: Reinstatement, without change, of a previously approved collection for which approval has expired.

Abstract: VA Form 10–2570d is used to serve the following multi-purposes: (1) VA authorization to the veteran to seek a private dentist for examination; (2) Fee dentist's record of examination findings; (3) Dentist's treatment plan and listing of services needed; (4) Listing of dentist's usual and customary fees for specific services involved in treatment plan; (5) VA review, verification and authorization of treatment to the fee dentist; (6) Dentist's certification of services completed; (7) VA's permanent record of treatment provided for veterans and statement of exhaustion of benefits, if indicated; VA's approval of dental services and total fees for payment; (8) Fiscal approval and certification of payment and amount. Without this information, veterans' dental treatment needs could not be identified, fees for services could not be established, the veterans could not receive treatment, and the fee dentist could not be reimbursed.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published on December 23, 1999, at pages 72144 and 72145.

Affected Public: Business or other for Profit.

Estimated Annual Burden: 14,333 hours.

Estimated Average Burden Per Respondent: 20 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 43,000.

Send comments and recommendations concerning any aspect of the information collection to VA's OMB Desk Officer, OMB Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503 (202) 395–7316. SUPPLEMENTARY INFORMATION:

Title: Agent Orange Registry Code Sheet, VA Form 10–9009.

OMB Control Number: 2900–0376.

Type of Review: Reinstatement, with change, of a previously approved collection for which approval has expired.

Abstract: The Agent Orange Registry Code Sheet is used to obtain information from veterans during an interview with the examining physician and Agent Orange Coordinator or other designated personnel. The information obtained is encoded onto the code sheet and entered into a computerized Agent Orange Registry. The registry provides a mechanism to catalogue prominent symptoms, reproductive health, diagnoses and enables VA to communicate with Agent Orange veterans through newsletters. The newsletter informs veterans of any increased health risks resulting from exposure to dioxin or other toxic agents, research finding or new compensation policies.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published on May 16, 2000, at pages 31209–31210.

SUPPLEMENTARY INFORMATION:

Title: Claim for Repurchase of Loan, VA Form 26–8084.

OMB Control Number: 2900–0377.

Type of Review: Extension of a currently approved collection.

Abstract: VA Form 26–8084 is used and completed by the holder of a delinquent vendee account, which has been guaranteed by VA. The holder of a delinquent vendee account is legally entitled to repurchase of the loan by VA when the loan has been continuously in default for three months and the amount of the delinquency equals or exceeds the sum of two monthly installments.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published on August 25, 2000 at page 51901.

SUPPLEMENTARY INFORMATION:

Title: Invitation, Bid, and/or Acceptance or Authorization, VA Form 26–6724.

OMB Control Number: 2900–0432.

Type of Review: Extension of a currently approved collection.

Abstract: The form is used to solicit competitive bids; serves as a work order for repair of properties acquired by VA; serves as a record of contractor bids, VA acceptance of bids, inspection of completed work and contractor invoices and payments.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** notice with a 60-day comment period soliciting comments on this collection of information was published on September 14, 2000, at pages 55679–55680.

Affected Public: Business or other for profit.

Estimated Annual Burden: One (1) hour is being claimed for inventory purposes. The solicitation of bids is a common practice in the real estate management industry, and the submission of bids is routine with repair contractors.

Estimated Average Burden Per Respondent: 30 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 60,000.

The PRA submission describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument.

DATES: Comments must be submitted on or before February 12, 2001.

FOR FURTHER INFORMATION OR A COPY OF THE SUBMISSION CONTACT: Denise McLamb, Information Management Service (045A4), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 273–8030 or FAX (202) 273–5981. Please refer to ''OMB Control No. 2900–0567'' in any correspondence.

SUPPLEMENTARY INFORMATION:

Title: PMC Insert, VA Form 40–0247.

OMB Control Number: 2900–0567.

Type of Review: Reinstatement, without change, of a previously approved collection for which approval has expired.

Abstract: The purpose of the PMC Insert is to allow an eligible recipient, which includes the next of kin, other relatives or friends, *i.e.*, surviving spouses, sons, daughters, grandchildren, and others, to request additional certificates and/or replacements or corrected certificates upon receipt of the original PMC. Replacements are requested due to PMCs being bent, water soaked, or other damage during mail handling; corrected PMCs are requested due to an incorrect name of the deceased veteran. The PMC is a gold foiled-embossed certificate containing the Great Seal of the United States and bearing the President's signature. It is mailed to relatives and friends of deceased, honorably discharged veterans honoring their military service to our Nation. In most cases involving recent deaths, the local VA Regional Office originates the application process without request from the next of kin as part of processing death benefits claims.

The PMC Insert is not self-initiated by the general public/eligible recipients. There is no form or application that is used to initiate an original request. Original requests are normally in the form of letters and/or telephone calls from eligible recipients.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** notice with a 60-day comment period soliciting comments on this collection of information was published on August 31, 2000, at pages 53093 and 53094.

Affected Public: Individuals or households.

Estimated Annual Burden: 1,298 hours.

Estimated Average Burden Per Respondent: 2 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 38,952.

Send comments and recommendations concerning any aspect of the information collection to VA's OMB Desk Officer, OMB Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503 (202) 395–7613. Please refer to ''OMB Control No. 2900–0567'' in any correspondence.

Dated: November 28, 2000.

By direction of the Secretary.

Barbara H. Epps,

Management Analyst, Information Management Service.

Agency Information Collection Activities Under OMB Review

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C., 3501 *et seq.*), this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, has submitted the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument.

DATES: Comments must be submitted on or before February 12, 2001.

FOR FURTHER INFORMATION OR A COPY OF THE SUBMISSION CONTACT: Denise McLamb, Information Management Service (045A4), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 273–8030 or FAX (202) 273–5981. Please refer to ''OMB Control No. 2900–0577.''

SUPPLEMENTARY INFORMATION:

Title: Spina Bifida Award Attachment Important Information, VA Form 21–0307.

OMB Control Number: 2900–0577.

Type of Review: Extension of a currently approved collection.

Abstract: The form is used to provide children of Vietnam veterans with Spina Bifida with information about VA health care and vocational training and gives steps they must take to apply for such benefits.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register**

notice with a 60-day comment period soliciting comments on this collection of information was published on August 31, 2000, at page 53094.

Affected Public: Individuals or households.

Estimated Annual Burden: 500 hours.

Estimated Average Burden Per Respondent: 15 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 2,000.

Send comments and recommendations concerning any aspect of the information collection to VA's OMB Desk Officer, OMB Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503 (202) 395–7316. Please refer to ''OMB Control No. 2900–0577'' in any correspondence.

Dated: November 28, 2000.

By direction of the Secretary.

DEPARTMENT OF VETERANS AFFAIRS

Enhanced-Use Development at the Samuel S. Stratton VA Medical Center, Albany, New York

AGENCY: Department of Veterans Affairs.

ACTION: Notice of Designation and Notice of Intent to Execute an Enhanced-Use Lease.

SUMMARY: The Acting secretary of the Department of Veterans Affairs (VA) is designating the Samuel S. Stratton VA Medical Center, Albany, New York, as a site for Enhanced-Use lease development. VA intends to execute an Enhanced-Use lease of 2.5 acres to the Renaissance Corporation of America for construction of a 1,220-space parking garage.

FOR FURTHER INFORMATION CONTACT: Jake Gallun, Portfolio Manager, Asset and Enterprise Development Service (181B), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 565–4307.

SUPPLEMENTARY INFORMATION: 38 U.S.C. Sec. 8161, *et seq.,* specifically provides that the Secretary may enter into an Enhanced-Use lease, if the Secretary determines that at least part of the use of the property under the lease will be to provide appropriate space for an activity contributing to the mission of the Department; the lease will not be inconsistent with and will not adversely affect the mission of the Department; and the lease will enhance the property. The project meets these requirements.

Dated: December 20, 2000.

Hershel W. Gober,

Acting Secretary of Veterans Affairs.

State Child Health; Implementing Regulations for the State Children's Health Insurance Program

AGENCY: Health Care Financing Administration (HCFA) , HHS.

ACTION: Final rule.

SUMMARY: Section 4901 of the Balanced Budget Act of 1997 (BBA) amended the Social Security Act (the Act) by adding a new title XXI, the State Children's Health Insurance Program (SCHIP) . Title XXI provides funds to States to enable them to initiate and expand the provision of child health assistance to uninsured, low-income children in an effective and efficient manner. To be eligible for funds under this program, States must submit a State plan, which must be approved by the Secretary.

This final rule implements provisions related to SCHIP including State plan requirements and plan administration, coverage and benefits, eligibility and enrollment, enrollee financial responsibility, strategic planning, substitution of coverage, program integrity, certain allowable waivers, and applicant and enrollee protections. This final rule also implements the provisions of sections 4911 and 4912 of the BBA, which amended title XIX of the Act to expand State options for coverage of children under the Medicaid program. In addition, this final rule makes technical corrections to subparts B, and F of part 457.

DATES: This final rule is effective April 11, 2001. *Compliance dates:* To the extent contract changes are necessary, however, States will not be found out of compliance until the next contract cycle. By contract cycle, we mean the earlier of the date of the original period of the existing contract, or the date of any modification or extension of the contract (whether or not contemplated within the scope of the contract) .

FOR FURTHER INFORMATION CONTACT: Regina Fletcher for general information, (410) 786–3293; Diona Kristian for subpart A, State plan, (410) 786–3283; Judy Rhoades for subpart C, Eligibility, (410) 786–4462; Regina Fletcher for subpart D, Benefits, (410) 786–5916; Nancy Fasciano for subpart E, Cost sharing, (410) 786–4578; Kathleen Farrell for subpart G, Strategic planning, (410) 786–1236; Terese Klitenic for subpart H, Substitution of coverage, (410) 786–5942; Maurice Gagnon for subpart I, Program integrity (410) 786–60619; Cindy Shirk for subpart J, Allowable waivers, (410) 786–1304; Christina Moylan for subpart K, Applicant and enrollee protections (410) 786–6102; Judy Rhoades for Expanded coverage of children under Medicaid and Medicaid coordination, (410) 786–4462; Christine Hinds for Medicaid disproportionate share hospital expenditures, (410) 786–4578; and Joan Mahanes for the Vaccines for Children program, (410) 786–4583.

SUPPLEMENTARY INFORMATION: *Copies:* To order copies of the **Federal Register** containing this document, send your request to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954. Specify the date of the issue requested and enclose a check or money order payable to the Superintendent of Documents, or enclose your Visa or Master Card number and expiration date. Credit card orders can also be placed by calling the order desk at (202) 512–1800 or by faxing to (202) 512–2250. The cost for each copy is $9. As an alternative, you can view and photocopy the **Federal Register** document at most libraries designated as Federal Depository Libraries and at many other public and academic libraries throughout the country that receive the **Federal Register**.

This **Federal Register** document is also available from the **Federal Register** online database through GPO Access, a service of the U.S. Government Printing Office. Free public access is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web; the Superintendent of Documents home page address is *http://www.access.gpo.gov/nara_docs/,* by using local WAIS client software, or by telnet to *swais.access.gpo.gov,* then login as guest (no password required). Dial-in users should use communications software and modem to call 202–512–1661; type swais, then login as guest (no password required).

I. Background

Section 490l of the BBA, Public Law 105–33, as amended by Public Law 105–100, added title XXI to the Act. Title XXI authorizes the SCHIP program to assist State efforts to initiate and expand the provision of child health assistance to uninsured, low-income children. Under title XXI, States may provide child health assistance primarily for obtaining health benefits coverage through (1) a separate child health program that meets the requirements specified under section 2103 of the Act; (2) expanding eligibility for benefits under the State's Medicaid plan under title XIX of the Act; or (3) a combination of the two approaches. To be eligible for funds under this program, States must submit a State child health plan (State plan), which must be approved by the Secretary.

The State Children's Health Insurance Program is jointly financed by the Federal and State governments and is administered by the States. Within broad Federal guidelines, each State determines the design of its program, eligibility groups, benefit packages, payment levels for coverage, and administrative and operating procedures. SCHIP provides a capped amount of funds to States on a matching basis for Federal fiscal years (FY) 1998 through 2007. At the Federal level, SCHIP is administered by the Department of Health and Human Services, through the Center for Medicaid and State Operations (CMSO) of the Health Care Financing Administration (HCFA). Federal payments under title XXI to States are based on State expenditures under approved plans effective on or after October 1, 1997.

This final rule implements the following sections of title XXI of the Act:

- Section 2101 of the Act, which sets forth the purpose of title XXI, the requirements of a State plan, State entitlement to title XXI funds, and the effective date of the program.
- Section 2102 of the Act, which sets forth the general contents of a State plan, including eligibility standards and methodologies, coordination, and outreach.
- Section 2103 of the Act, which contains coverage requirements for children's health insurance.
- The following parts of section 2105 of the Act: 2105(c)(2)(B), which relates to cost-effective community based health delivery systems; 2105(c)(3), which relates to waivers for purchase of family coverage; 2105(c)(5), which relates to offsets for cost-sharing receipts, and 2105(c)(7) which relates to limitations on payment for abortion.
- Section 2106 of the Act, which describes the process for submission and approval of State child health plans and plan amendments.
- Section 2107 of the Act, which sets forth requirements relating to strategic objectives, performance goals and program administration.

• Section 2108 of the Act, which requires States to submit annual reports and evaluations of the effectiveness of the State's title XXI plan.
• Section 2109 of the Act, which sets forth the relation of title XXI to other laws.
• Section 2110 of the Act, which sets forth title XXI definitions.

This final rule also implements the provisions of sections 4911 and 4912 of the BBA, that amended title XIX of the Act to provide expanded coverage to children under the Medicaid program. Specifically, section 4911 of the BBA set forth provisions for use of State child health assistance funds for enhanced Medicaid match for expanded eligibility under Medicaid to provide medical assistance to optional targeted low-income children. Section 4912 of the BBA added a new section 1920A to the Act creating a new option to provide presumptive eligibility for children. Both title XXI and title XIX statutory provisions are discussed in detail in section II. of this preamble.

This final rule also implements section 704 of the Balanced Budget Refinement Act of 1999 (BBRA, Public Law 106–113), enacted on November 29, 1999, which requires the Secretary to refer to the title XXI program as the ''State Children's Health Insurance Program'' or ''SCHIP'' in any publication or other official communication.

We note that on May 24, 2000, HCFA published in the **Federal Register** a final rule (HCFA 2114–F) concerning financial program allotments and payments to States under SCHIP at (65 FR 33616). In that rule, we implemented section 2104 and portions of section 2105 of the Act, which relate to allotments and payments to States under title XXI. For a detailed discussion of title XXI and related title XIX financial provisions, including the allotment process, the payment process, financial reporting requirements and the grant award process, refer to the May 24, 2000 final rule (65 FR 33616). Please note that, to eliminate duplication and provide clarity, this final rule also amends selected sections of the financial rule within Subpart B.

II. Provisions of the Proposed Rule and Discussion of Public Comments

A. Overview

1. Summary of Proposed Provisions and Significant Revisions in This Final Rule.

On November 8, 1999, we published a proposed rule that set forth the programmatic provisions of the State Children's Health Insurance Program (64 FR 60882). The provisions of the proposed regulation were largely based on previously released guidance, and therefore represented policies that had been in operation for some time. In the proposed rule, we identified a number of areas in which we elaborated on previous guidance or proposed new policies.

We received 109 timely comments on the proposed rule. Interested parties that commented included States, advocacy organizations, individuals, and provider organizations. The comments received varied widely and were often very detailed. We received a significant number of comments on the following areas: State plan issues, such as when an amendment to an existing plan is needed; information that should be provided or made available to potential applicants, applicants and enrollees; the exemption to cost sharing for American Indian/Alaska Native children; eligibility and ''screen and enroll'' requirements; Medicaid coordination issues; eligibility simplification options such as presumptive eligibility; the definition of a targeted low-income child; substitution of private coverage; data collection on race, ethnicity, gender and primary language; grievance and appeal procedures and other enrollee protections; and premium assistance for employer-sponsored coverage.

All public comments have been summarized and are discussed in detail in section II below. A brief summary of key issues discussed in the proposed rule as well as significant revisions made in this final rule follows:

• Subpart A—State Plan Requirements

The proposed regulation included several conditions under which States must submit amendments to approved SCHIP plans. For example, we proposed that a State must submit a plan amendment when the funding source of the State share changes, prior to such change taking effect. In addition, we proposed that amendments to impose cost sharing on beneficiaries, increase existing cost-sharing charges, or increase the cumulative cost-sharing maximum considered the same as amendments proposing a restriction in benefits. We noted that States would be required to follow rules regarding prior public notice and retroactive effective dates for these amendments.

The final regulation clarifies several issues surrounding the circumstances under which amendments must be submitted. It lists more clearly the program changes that must be included in the State plan by submitting an amendment. In addition, the final rule modifies the budget requirements to require a 1-year projected budget for those amendments that have a significant budgetary impact. Budgets are no longer required with every State plan amendment; however States must submit a 3-year projected budget with its annual report (discussed in subpart G). Finally, States must submit an amendment before making changes in the source of the non-Federal share of funding.

We have provided additional clarification with regard to the requirements for coordination between SCHIP and Medicaid, as well as coordination with other public programs. We have modified the regulation text to further emphasize the need for coordination with other public programs after screening for Medicaid eligibility during the SCHIP application process, as well as assisting in enrollment in SCHIP of children determined ineligible for Medicaid.

The section laying out provisions for enrollment assistance and information requirements has been modified to include the provision of linguistically appropriate materials to families of potential applicants, applicants and enrollees in SCHIP to assist them in making informed health care decisions about their health plans, professionals and facilities. We have also clarified that, in addition to information about the types of benefits and participating providers. In addition, States must inform applicants and enrollees about their rights and responsibilities regarding procedures for review of adverse decisions regarding eligibility or health services decisions and the circumstances under which they may be subject to enrollment caps and waiting lists.

• Subpart C—Eligibility, Screening, Applications and Enrollment

The proposed rule outlined provisions for eligibility and enrollment for separate child health programs and implementation of the ''screen and enroll'' requirement. It also included the title XXI restrictions on the participation of children of public agency employees who are eligible to participate in a State health benefits plan, children who are residing in institutions for mental disease (IMDs), and children who are inmates of public institutions.

The final rule further elaborates on issues surrounding eligibility, enrollment and ensuring that children eligible for Medicaid benefits are enrolled in Medicaid. We have modified the definition of ''targeted low-income child'' to parallel a modification to the definition of ''optional targeted low-

income child'' under the Medicaid regulations. This modification effectively excludes from title XXI ''maintenance of effort'' provisions certain section 1115 demonstrations that were in place on March 31, 1997, but that were so limited in scope that we do not consider them to be equivalent to Medicaid.

We clarified the standards for eligibility for separate child health programs, including: (1) Clearly permitting self-declaration of citizenship; (2) prohibiting durational residency requirements; (3) prohibiting lifetime caps or other time limits on eligibility; (4) permitting 12 months of continuous eligibility; and (5) permitting enrollment caps and waiting lists when approved as part of the State plan. In addition, we have specifically required States to implement standards for conducting eligibility determinations and a process that does not exceed 45 days (excluding days during which the application has been suspended).

The rule provides further clarification of the issues surrounding children of public employees, children in IMDs and children who are inmates of public institutions. For example, we clarified that the children of public employees are eligible only if the employer contribution under a State health benefits plan is no more than a nominal contribution of $10 per family, per month. We also modified the definition of ''State health benefits plan'' to exclude separately run county, city, or other public agency plans that receive no State contribution toward the cost of coverage and in which no State employees participate.

The final rule also further clarifies the requirements for treatment of children found to be potentially eligible for Medicaid after applying for coverage under a separate child health program. In order to ensure the effectiveness of the screening mechanisms, States are required to establish a system for monitoring the screen and enroll process. Finally, the rule lays out procedures for States that opt to provide presumptive eligibility for the separate child health program while the application and eligibility determination process is underway.

- Subpart D—Coverage and Benefits

The proposed rule provided for some flexibility for States in keeping the SCHIP benefit package current. A State using the benchmark benefit package option is not required to submit an amendment each time the benchmark package changes, as long as it continues to offer the same benefits covered under the approved State plan. However, States must submit an amendment to their State plan any time the benefits offered to enrollees change. If the change in benefits is intended to conform the separate State benefit package to the benchmark coverage, then the benefit package remains benchmark coverage. But if the change in benefits causes the State-offered benefits to differ from the benchmark coverage, then the benefits must be reclassified as benchmark equivalent or one of the other benefit package options.

The proposed rule included the requirement that States use the ''prudent layperson standard'' in defining coverage for emergency services under SCHIP. The proposed rule also required use of the American Committee on Immunization Practices (ACIP) schedule for age-appropriate immunizations.

The final rule retains all of the same provisions as included in the proposed rule. In addition, for purposes of clarity, we have moved a provision formerly found in Subpart G, Strategic Planning, Reporting, and Evaluation into this Subpart. The provision, entitled ''State assurance of access to care and procedures to assure quality and appropriateness of care'' includes the requirements for assuring access to covered services, including emergency services, well-baby, well-child and well-adolescent care, and age appropriate immunizations. This provision also requires States to assure appropriate and timely procedures to monitor and treat enrollees with chronic, complex, or serious medical conditions, including access to an adequate number of visits to specialists experienced in treating the specific medical condition. Finally, this provision requires States to assure decisions related to the provision of health services are completed within 14 days of the request for the service, in accordance with the medical needs of the child.

- Subpart E—Enrollee Financial Responsibilities

Title XXI permits States to impose cost sharing on enrollees in separate child health programs, but places a 5 percent cap on the amount of cost-sharing expenditures for families with incomes greater than 150 percent of the Federal Poverty Level (FPL). In an attempt to preserve State flexibility, we proposed to give States the option to use either gross or net family income when calculating this cost-sharing cap for families. In addition, we proposed to place a limit of 2.5 percent on cost sharing for families with incomes at or below 150 percent of the FPL, in order to ensure that those families with lower incomes will not be required to spend the same percentage of their income on cost sharing as those with higher incomes. Many commenters supported the need for this distinction, given the more limited amount of disposable income in such families. Under the proposed rule, States also had the option to apply medical costs for non-covered or non-eligible family members toward the cumulative maximum cap.

We proposed that States must have a process in place that will protect enrollees by ensuring an opportunity to pay past due cost-sharing amount before they can be disenrolled from the program for failure to pay cost sharing. We suggested that States should look for a pattern of nonpayment, and provide clear notice and opportunities for late payment before taking action to disenroll.

Finally, title XXI includes provisions to ensure enrollment and access to health care services for American Indian and Alaska Native (AI/AN) children. The proposed regulation incorporated our interpretation that in light of the unique Federal relationship with tribal governments, cost-sharing requirements for individuals who are members of a Federally recognized tribe are not consistent with this statutory requirement.

The final rule clarifies that States must provide to the family of each individual SCHIP enrollee, the cumulative cost-sharing maximum amount for that year. In addition, this subpart confirms that the State plan must clearly describe a State's cost-sharing policy in terms of which children will be subject to cost sharing, the consequences for enrollees who do not pay a charge, and the disenrollment protections provided to enrollees in the event that they do not pay the cost sharing. States must also describe the methodology to ensure that families do not exceed the cumulative cost-sharing maximum and assure that families will not be held liable for cost-sharing amounts, beyond the copayment amounts in the State plan, for emergency services provided outside of an enrollee's managed care network.

The final rule confirms the protections included in the proposed rule related to AI/AN children and clarifies that States may use self-declaration of tribal membership for identifying AI/AN children in order to facilitate implementation of the cost-sharing exemption.

The final rule continues to require that States may not impose more than one type of cost sharing on a service; and that States may only impose one copayment based on the total cost of

services furnished during one office visit.

Finally, States must provide enrollees with an opportunity to show that their family income has declined before being disenrolled for failure to pay cost sharing, because the child may have become eligible for a category with lower or no cost sharing if family income has declined. States must also provide enrollees with an opportunity for an impartial review to address disenrollment from the program for this reason (see discussion of new Subpart K, Applicant and Enrollee Protections).

• Subpart G—Strategic Planning, Reporting and Evaluation

The proposed regulation included provisions intended to ensure compliance with the statute and the elements of the State's approved title XXI plan. This subpart included the essential elements of strategic objectives and performance measures to assist the States and the Federal government in assessing the effectiveness of the SCHIP program in increasing the number of children with health insurance, and an assessment of the quality of and access to needed health care services.

The proposed rule also outlined the quarterly statistical reporting requirements and the required elements of States annual reports and the March 31, 2000 SCHIP evaluation.

The final rule confirms these requirements and further describes data elements to be reported by the States, including data on gender, race, ethnicity, and primary language. The gender, race and ethnicity data will be required in the State's quarterly statistical enrollment reports; and the annual reports will include a description of data regarding the primary language of SCHIP enrollees. In addition, the annual reports will include an updated budget for a 3-year period, including any changes in the source of the non-Federal share of State plan expenditures. The annual reports must also include description of the State's current income eligibility standards and methodologies.

Finally, the final rule notes the Secretary's intention to develop, with input from States, academic and intergovernmental organizations, a core set of national performance goals and measures. When developed, States will also be required to report on these measures in their annual reports.

• Subpart H—Substitution of Coverage

The proposed rule set forth requirements for ensuring that States have in place mechanisms aimed at preventing substitution of public coverage for private group coverage. With respect to coverage provided directly through SCHIP, the preamble included a description of HCFA's three-tiered policy to apply increased scrutiny to States' substitution prevention strategies at higher incomes. For coverage provided through premium assistance for employers' group health plans, the proposed rule set forth specific requirements for a six-month period of uninsurance and a minimum 60 percent employer premium contribution.

Due to a general lack of evidence of the existence of substitution below 200 percent of the FPL and the significant number of comments received on this subpart, we have revised the final rule to clarify our policy related to substitution. The preamble to the final rule clarifies that for coverage provided other than through premium assistance programs, we will no longer require a substitution prevention strategy for families with incomes below 250 percent of the FPL. Instead, States will be required to monitor the occurrence of substitution below 200 percent of the FPL. Between 200 and 250 percent of the FPL, we will work with States to develop procedures, in addition to monitoring, to prevent substitution that would be implemented in the event that an unacceptable level of substitution is identified. Above 250 percent of the FPL, States must have a substitution prevention mechanism in place, however we encourage States to use other strategies than waiting periods.

For States wishing to utilize premium assistance programs, we have revised the final rule to provide additional flexibility. While we have retained the 6-month waiting period without group health plan coverage, States have flexibility to include a number of exceptions for circumstances such as involuntary loss of coverage, economic hardship, and change to employment that does not offer dependent coverage. We have also removed the requirement for States to demonstrate an employer contribution of at least 60 percent when providing coverage through premium assistance programs. Rather, we have clarified that States must demonstrate cost-effectiveness of their proposals by identifying a minimum contribution level and providing supporting data to show that the level is representative of the employer-sponsored insurance market in their State.

Finally, the final rule provides that the Secretary has discretion to reduce or waive the minimum period without private group health plan coverage.

• Subpart I—Program Integrity

The provisions in this subpart are intended to preserve program integrity in the State Children's Health Insurance Program. We proposed that States must have fraud and abuse protections in place, but provided flexibility to States in developing program integrity protections for separate child health programs. States with separate child health programs may utilize systems already existing for Medicaid, but are not required to do so. In addition, we proposed that States have additional flexibility in setting procurement standards more broadly than are available under Medicaid. We proposed that States may choose to base payment rates on public and/or private rates for comparable services for comparable populations, and where appropriate, establish higher rates in order to ensure sufficient provider participation and access.

Finally, the proposed regulation included various enrollee protections consistent with the President's directive regarding the *Consumer Bill of Rights and Responsibilities,* including provisions regarding grievances and privacy protections. In response to public comment about the need for consistency of provisions throughout the final rule, we have moved the overview of the enrollee protections to the preamble of this final rule, but have removed it from the final regulation text, as it repeated the protections included throughout the proposed rule. The discussion of enrollee protections is now found in subpart K—Applicant and Enrollee Protections.

The final rule confirms the significance of maintaining program integrity in SCHIP and clarifies issues related to the certification of data that determines payment and the development of actuarially sound payment rates. It notes that States should base payment rates on public and/or private rates for comparable services for comparable populations, consistent with the principles of actuarial soundness. We have also moved the subsection formerly entitled, ''Grievances and appeals'' to the new Subpart K, where these requirements are retained and elaborated upon.

Finally, the rule confirms the importance of maintaining the integrity of professional advice to enrollees by requiring compliance with the provisions of the final Medicare+Choice rule that prohibit interference with health care professionals' advice to enrollees; require that professionals provide information about treatment options in an appropriate manner; limits

physician incentive plans; and provides requirements related to information disclosure related to physician incentive plans.

• Subpart J—Waivers

The proposed rule noted the requirements for obtaining a waiver to provide coverage through a community-based delivery system and discussed the circumstances under which a State may obtain a waiver in order to provide title XXI coverage to entire families. We proposed that in order to qualify for a family coverage waiver, the State must meet several requirements, including a requirement that the proposal be cost-effective.

In the final rule, we have clarified that the provisions of this subpart apply to separate child health programs. The provisions apply to Medicaid expansions only in cases where the State files claims for administrative costs under title XXI and seeks a waiver of limitations on such claims for coverage under a community-based health delivery system. We have clarified that HCFA will review requests for waivers under this subpart using the same time frames (the 90-day review clock) as those used for the review of State plan amendments under SCHIP. In addition, in response to comments received on this subpart, we have extended the approval period for the waivers to provide coverage through a community based delivery system from two years to three years in an attempt to better align with the period of availability for SCHIP allotments.

With regard to the family coverage waiver, the final rule clarifies that when applying the cost-effectiveness test, States must assess cost-effectiveness in its initial request for a waiver, and then annually. States may do the assessment either on a case-by-case basis or in the aggregate.

• Subpart K—Applicant and Enrollee Protections

The proposed rule emphasized the importance of enrollee protections by including many of the elements of the Consumer Bill of Rights and Responsibilities throughout the rule. In addition, an overview of these protections was presented in Subpart I—Program Integrity and Beneficiary Protections. We received several comments on our decision to implement the CBRR through this regulation. While we have retained the protections included in the proposed rule in the appropriate location as related to the issue, we have attempted to clarify the required protections by creating a new subpart dedicated to privacy and a process for review of certain eligibility and health services matters, Subpart K—Applicant and Enrollee Protections.

We have included more specific requirements than those that were included in Subpart I of the proposed rule and will require the State plan to include a description of the State's process for review and resolution of eligibility and enrollment matters such as denial or failure to make a timely determination of eligibility, and suspension or termination of enrollment, including disenrollment for failure to pay cost sharing. States must also provide enrollees with an opportunity for external review of health services matters, such as delay, denial, reduction, suspension or termination of health services, in whole or in part; and the failure to approve, furnish, or provide payment for health services in a timely manner. Exceptions to these requirements can be made in the event that the sole basis for such a decision is a change in the State plan or a change in Federal or State law that affects all or a group of applicants or enrollees without regard to their individual circumstances.

The final rule lays out requirements for the core elements of review of eligibility or health services matters, and requires that the reviews be impartial, conducted by a person or entity that has not been directly involved or responsible for the matter under review. The rule also establishes a 90-day time frame within which external reviews (or a combination of an internal and an external review) must be completed. States should take into consideration the medical needs of the patient when conducting the reviews and provide expedited time frames if an enrollee's physician determines that a longer time frame could seriously jeopardize the enrollees life, health or ability to attain or regain maximum function. If the enrollee has access to both internal and external review, each level of expedited review may take no more than 72 hours.

The final rule requires States to provide continuation of enrollment pending the completion of review of a suspension or termination of enrollment, including disenrollment for failure to pay cost sharing. States must also provide enrollees with timely written notice of any determinations subject to review including the reasons for the determination, an explanation of applicable rights to review, the time frames for review, and circumstances under which enrollment may continue pending a review.

Finally, the rule provides an exception for States that operate premium assistance programs under SCHIP. If the State utilizes a premium assistance program that does not meet the requirements for review under this Subpart, the State must give applicants and enrollees the option to enroll in the non-premium assistance program in the State. States must provide this option at initial enrollment and at each renewal of eligibility.

• Expanded Coverage of Children under Medicaid and Medicaid Coordination.

In this section we set forth our changes to the Medicaid regulations that allow for expanded coverage of children under title XIX. Although these regulations are related to title XXI and SCHIP, they are changes to the Medicaid program and all existing Medicaid regulations also apply. We set forth requirements related to presumptive eligibility for children, the enhanced FMAP (Federal medical assistance percentage) rate for children, and the new group of optional targeted low-income children established by the statute. The presumptive eligibility provisions have been clarified in this final rule to lay out specific notification requirements and establish procedures for making presumptive eligibility determinations and expands the definition of ''qualified entity'' in accordance with the Benefits Improvement and Protection Act of 2000 (BIPA). Finally, the rule establishes consistent coordination requirements between Medicaid and SCHIP.

2. General Comments

In this section, we have summarized and responded to general public comments on the SCHIP programmatic regulation. These comments relate to the program or the proposed rule as a whole and not to any particular provision of the proposed rule. All other public comments are addressed below in the context of the relevant subpart.

Comment: We received a great number of comments discussing the issue of providing SCHIP coverage through premium assistance programs. Many commenters noted the difficulty that States would have in requiring employer plans to meet the proposed requirements. Many commenters argued that the proposed rule imposed too many requirements on SCHIP coverage obtained through employer-sponsored insurance and that the proposed provisions would stifle State innovation in utilizing such insurance.

Response: At the time of publication of the proposed rule, the experience with premium assistance programs in SCHIP had been limited to only a few States. Therefore, the proposed

regulation did not include a great deal of specificity regarding the regulation's applicability to premium assistance models. We have attempted to provide States with flexibility, while ensuring that States meet their statutory obligation to all SCHIP enrollees regardless of the insurance product being provided. Further, it would not be consistent with the SCHIP statute to exempt certain enrollees from the protections established by law, simply because of the delivery model. However, we also recognize the value and the increased potential for reaching children associated with interaction with the employer-based insurance market. Thus, while we will ensure compliance with the protections set forth in this final rule, we look forward to working closely with States to help in the development and approval of proposals that utilize premium assistance programs. As noted in the overview section, we have provided some additional flexibility in subpart H, Substitution, with respect to premium assistance programs that we hope will facilitate increased use of premium assistance programs in SCHIP. We have also provided some flexibility with regard to certain enrollee protections in subpart K.

Comment: One commenter noted that there is an inequity in funding that disadvantages States that expanded eligibility prior to March 31, 1997. Another commenter indicted that it is difficult for States that had expanded Medicaid to high levels prior to March 31, 1997 to access SCHIP funds and suggested that States be allowed to use SCHIP funds to subsidize employer-sponsored insurance.

Response: We recognize the inequities that have been caused by the ''maintenance of effort'' provision in the SCHIP statute, which holds States to the current eligibility levels in effect on March 31, 1997, and we applaud States that were progressive in expanding their Medicaid programs through section 1115 demonstrations and through the flexibility provided under section 1902(r)(2) and section 1931 of the statute. However, the maintenance of effort provision in the SCHIP statute was put in place specifically to ensure that States did not roll back the eligibility and benefits standards that were in place prior to the existence of SCHIP, and to encourage further expansion in implementing States' SCHIP programs.

Comment: Several commenters asserted that the proposed regulations were overly prescriptive, limit State flexibility, and raise program administrative costs. Several commenters specifically complained that the proposed regulations appeared to push States toward Medicaid or Medicaid-like programs. Some commenters asserted that the overall approach directly contradicted Executive Order 13132 on Federalism. Some argued that the regulations should be limited to areas Congress specifically required the Secretary to address in regulations, the administrative review process for State plans, or to clarification of essential terms. While some commenters recognized the need for federal guidance, they supported the inclusion of such guidance in the preamble and other guidance documents rather than in the regulation text.

Response: In developing the proposed and final regulations, we have taken great care to try to balance the need to ensure that SCHIP will provide the full intended benefits to uninsured, low-income children with the goal of retaining as much State flexibility as possible. HCFA has tried to administer the program and develop policies in a manner that gives States a full opportunity to develop programs that met local needs, whether through a Medicaid expansion or a separate child health program.

To make it possible for States to develop and implement their programs, from the time of enactment of the SCHIP program, HCFA has worked with States to disseminate as much information as possible, as quickly as possible. In the first three months of the program's existence, we released over 100 answers to frequently asked questions and issued several policy guidance letters. We continue to take into consideration the changing needs of States. The programs that States developed vary in scope, delivery system and many other respects. The diversity and innovation that has been displayed is an indication that State flexibility does indeed exist.

In addition, we consulted with State and local officials in the course of the design and review stages of State proposals, and many of the policies found in the proposed and this final rule are a direct result of these discussions and negotiations with the States. To the extent consistent with the objectives of the statute, to obtain substantial health care coverage for uninsured low-income children in an effective and efficient manner, we have endeavored to preserve State options in implementing their programs.

We developed these final regulations with the goal of providing a balanced view of both Medicaid expansions and separate child health programs. We made careful determinations as to whether each subpart should be applicable to separate child health programs *and* Medicaid expansions, or only to separate programs. In doing this, we have attempted to maximize flexibility and avoid the need for duplication of effort, while at the same time recognizing the basic differences between the two approaches.

We believe our considerations, and the consultative process we followed during the State plan review process, fully comported with the requirements of Executive Order 13132, and the final regulations contain the framework necessary for States to achieve the statutory requirements and objectives set forth by Congress.

Comment: Several commenters were concerned that the proposed regulations would narrow available State options, with particular mention of barriers to private sector models, and impose additional burdensome requirements on States. Some commenters were concerned that the proposed regulations would require administrative costs that would be a difficult financial burden for a small separate child health program.

Response: We recognize the commenters' concern and have tried to keep potential administrative burden in mind in developing these regulations. Some administrative investment, however, is necessary to ensure proper delivery of health care coverage to uninsured low-income children, and to provide enrollees with protections to ensure that such coverage is furnished in an effective and efficient manner that is coordinated with other sources of health benefits coverage for children.

3. Table of Contents for Part 457

We set forth the new provisions for the State Children's Health Insurance Program in regulations at 42 CFR part 457, subchapter D. We note that the following table of contents is for all of part 457 and lists some subparts which have been reserved for provisions set forth in the May 24, 2000 final financial regulation (65 FR 33616).

Subchapter D—State Children's Health Insurance Program (SCHIP)

PART 457—ALLOTMENTS AND GRANTS TO STATES

Subpart A—Introduction; State Plans for Child Health Insurance Programs and Outreach Strategies

Sec.

457.1 Program description.
457.2 Basis and scope of subchapter D.
457.10 Definitions and use of terms.
457.30 Basis, scope, and applicability of subpart A.
457.40 State program administration.
457.50 State plan.

457.60 Amendments.
457.65 Effective date and duration of State plans and plan amendments.
457.70 Program options.
457.80 Current State child health insurance coverage and coordination.
457.90 Outreach.
457.110 Enrollment assistance and information requirements.
457.120 Public involvement in program development.
457.125 Provision of child health assistance to American Indian and Alaska Native children
457.130 Civil rights assurance.
457.135 Assurance of compliance with other provisions.
457.140 Budget.
457.150 HCFA review of State plan material.
457.160 Notice and timing of HCFA action on State plan material.
457.170 Withdrawal process.

Subpart B—[Reserved]

Subpart C—State Plan Requirements: Eligibility, Screening, Applications, and Enrollment

457.300 Basis, scope, and applicability.
457.301 Definitions and use of terms.
457.305 State plan provisions.
457.310 Targeted low-income child.
457.320 Other eligibility standards.
457.340 Application for and enrollment in a separate child health program.
457.350 Eligibility screening and facilitation of Medicaid enrollment.
457.353 Monitoring and evaluation of the screening process.
457.355 Presumptive eligibility.
457.380 Eligibility verification.

Subpart D—State Plan Requirements: Coverage and Benefits

457.401 Basis, scope, and applicability.
457.402 Definition of child health assistance.
457.410 Health benefits coverage options.
457.420 Benchmark health benefits coverage.
457.430 Benchmark-equivalent health benefits coverage.
457.431 Actuarial report for benchmark-equivalent coverage.
457.440 Existing comprehensive State-based coverage.
457.450 Secretary-approved coverage.
457.470 Prohibited coverage.
457.475 Limitations on coverage: Abortions.
457.480 Preexisting condition exclusions and relation to other laws.
457.490 Delivery and utilization control systems.
457.495 State assurance of access to care and procedures to assure quality and appropriateness of care.

Subpart E—State Plan Requirements: Enrollee Financial Responsibilities

457.500 Basis, scope, and applicability.
457.505 General State plan requirements.
457.510 Premiums, enrollment fees, or similar fees: State plan requirements.
457.515 Co-payments, coinsurance, deductibles, or similar cost-sharing charges: State plan requirements.
457.520 Cost sharing for well-baby and well-child care.
457.525 Public schedule.
457.530 General cost-sharing protection for lower income children.
457.535 Cost-sharing protection to ensure enrollment of American Indians/Alaska Natives.
457.540 Cost-sharing charges for children in families with incomes at or below 150 percent of the FPL.
457.555 Maximum allowable cost-sharing charges on targeted low-income children in families with income from 101 to 150 percent of the FPL.
457.560 Cumulative cost-sharing maximum.
457.570 Disenrollment protections.

Subpart F—[Reserved]

Subpart G—Strategic Planning, Reporting, and Evaluation

457.700 Basis, scope, and applicability.
457.710 State plan requirements: Strategic objectives and performance goals.
457.720 State plan requirement: State assurance regarding data collection, records, and reports.
457.740 State expenditures and statistical reports.
457.750 Annual report.

Subpart H—Substitution of Coverage

457.800 Basis, scope, and applicability.
457.805 State plan requirements: Procedures to address substitution under group health plans.
457.810 Premium assistance programs: Required protections against substitution.

Subpart I—Program Integrity

457.900 Basis, scope, and applicability.
457.902 Definitions.
457.910 State program administration.
457.915 Fraud detection and investigation.
457.925 Preliminary investigation.
457.930 Full investigation, resolution, and reporting requirements.
457.935 Sanctions and related penalties.
457.940 Procurement standards.
457.945 Certification for contracts and proposals.
457.950 Contract and payment requirements including certification of payment-related information.
457.955 Conditions necessary to contract as a managed care entity (MCE).
457.960 Reporting changes in eligibility and redetermining eligibility.
457.965 Documentation.
457.980 Verification of enrollment and provider services received.
457.985 Integrity of professional advice to enrollees.

Subpart J—Allowable Waivers: General Provisions

457.1000 Basis, scope, and applicability.
457.1003 HCFA review of waiver requests.
457.1005 Waiver for cost-effective coverage through a community-based health delivery system.
457.1010 Waiver for purchase of family coverage.
457.1015 Cost-effectiveness.

Subpart K—State Plan Requirements: Applicant and Enrollee Protections

457.1100 Basis, scope and applicability.
457.1110 Privacy protections.
457.1120 State plan requirement: Description of review process.
457.1130 Matters subject to review.
457.1140 Core elements of review.
457.1150 Impartial review.
457.1160 Time frames.
457.1170 Continuation of enrollment.
457.1180 Notice.
457.1190 Application of review procedures when States offer premium assistance for group health plans.

B. Subpart A—Introduction; State Plans for Child Health Insurance Programs and Outreach Strategies

1. Program Description (§ 457.1)

In proposed § 457.1, we set forth a description of the State Children's Health Insurance Program. Title XXI of the Social Security Act, enacted in 1997 by the BBA, authorizes Federal grants to States for provision of child health assistance to uninsured, low-income children. The program is jointly financed by the Federal and State governments and administered by the States. Within broad Federal rules, each State decides eligible groups, types and ranges of services, payment levels for benefit coverage, and administrative and operating procedures. We received no comments on this section and have retained the proposed language in this final rule.

2. Basis and Scope of Subchapter D (§ 457.2)

Proposed § 457.2 set forth the basis and scope of subchapter D. This subchapter implements title XXI of the Act, which authorizes Federal grants to States for the provision of child health assistance to uninsured, low-income children.

The regulations in subchapter D set forth State plan requirements, standards, procedures, and conditions for obtaining Federal financial participation (FFP) to enable States to provide health benefit coverage to targeted low-income children, as defined in § 457.310. We received no comments on this section and have retained the proposed language in this final rule.

3. Definitions and Use of Terms (§ 457.10)

This subpart includes the definitions relevant specifically to the State Children's Health Insurance Program under title XXI. In this subpart, we defined key terms that are specified in the statute or frequently used in this regulation. We note that those terms that are specific to certain subparts of this

regulation are defined at the opening of each subpart, however, all the terms are listed here. Because of the unique Federal-State relationship that is the basis for this program and because of our commitment to State flexibility, States have the discretion to define many terms.

We proposed the following definitions:

• *American Indian/Alaska Native (AI/AN)* means (1) a member of a Federally recognized Indian tribe, band, or group or a descendant in the first or second degree, of any such member; (2) an Eskimo or Aleut or other Alaska Native enrolled by the Secretary of the Interior pursuant to the Alaska Native Claims Settlement Act 43 U.S.C. 1601 *et seq;* (3) a person who is considered by the Secretary of the Interior to be an Indian for any purpose; (4) a person who is determined to be an Indian under regulations promulgated by the Secretary.

• *Child* means an individual under the age of 19.

• *Child health assistance* has the meaning assigned in § 457.402.

• *State Children's Health Insurance Program (SCHIP)* means a program established and administered by a State, but jointly funded with the Federal government to provide child health assistance to uninsured, low-income children through a separate child health program, a Medicaid expansion program, or a combination of both.

• *Combination program* means a program under which a State provides child health assistance through both a Medicaid expansion program and a separate child health program.

• *Contractor* has the meaning assigned in § 457.902.

• *Cost-effective* has the meaning assigned in § 457.1015.

• *Creditable health coverage* has the meaning given the term ''creditable coverage'' at 45 CFR 146.113. Under this definition, the term means the coverage of an individual under any of the following:

—A group health plan (as defined in 45 CFR 144.103).
—Health insurance coverage (as defined in 45 CFR 144.103).
—Part A or part B of title XVIII of the Act (Medicare).
—Title XIX of the Act, other than coverage consisting solely of benefits under section 1928 (the program for distribution of pediatric vaccines).
—Chapter 55 of title 10, United States Code (medical and dental care for members and certain former members of the uniformed services, and for their dependents).
—A medical care program of the Indian Health Service or of a tribal organization.
—A State health benefits risk pool (as defined in 45 CFR 146.113).
—A health plan offered under chapter 89 of title 5, United States Code (Federal Employees Health Benefits Program).
—A public health plan. (For purposes of this section, a public health plan means any plan established or maintained by a State, county, or other political subdivisions of a State that provides health insurance coverage to individuals who are enrolled in the plan.)
—A health benefit plan under section 5(e) of the Peace Corps Act (22 U.S.C. 2504(e)).

The term ''creditable health coverage'' does not include coverage consisting solely of coverage of excepted benefits including limited excepted benefits and non-coordinated benefits. (See 45 CFR 146.145)

• *Emergency medical condition* has the meaning assigned at § 457.402.

• *Emergency* services has the meaning assigned in § 457.402.

• *Employment with a public agency* has the meaning assigned in § 457.301.

• *Family income* means income as determined by the State for a family as defined by the State.

• *Federal fiscal year* starts on the first day of October each year and ends on the last day of September.

• *Fee-for-service entity* has the meaning assigned in § 457.902.

• *Grievance* has the meaning assigned in § 457.902.

• *Group health insurance coverage* means health insurance coverage offered in connection with a group health plan as defined at 45 CFR 144.103.

• *Group health plan* means an employee welfare benefit plan, to the extent that the plan provides medical care as defined in section 2791(a)(2) of the PHS Act (including items and services paid for as medical care) to employees or their dependents directly (as defined under the terms of the plan), or through insurance, reimbursement, or otherwise, as defined at 45 CFR 144.103.

• *Health benefits coverage* has the meaning assigned in § 457.402.

• *Health maintenance organization (HMO) plan* has the meaning assigned in § 457.420.

• *Joint application* has the meaning assigned in § 457.301.

• *Legal obligation* has the meaning assigned in § 457.560.

• *Low-income child* means a child whose family income is at or below 200 percent of the poverty line for the size family involved.

• *Managed care entity (MCE)* has the meaning assigned in § 457.902.

• *Medicaid applicable income level* means, with respect to a child, the effective income level (expressed as a percentage of the poverty line) that has been specified under the State plan under title XIX (including for these purposes, a section 1115 waiver authorized by the Secretary or under the authority of section 1902(r)(2)), as of March 31, 1997, for the child to be eligible for medical assistance under either section 1902(l)(2) or 1905(n)(2) of the Act.

• *Medicaid expansion program* means a program where a State receives Federal funding at the enhanced matching rate available for expanding eligibility to targeted low-income children.

• *Post-stabilization services* has the meaning assigned in § 457.402.

• *Poverty line/Federal poverty level* means the poverty guidelines updated annually in the **Federal Register** by the U.S. Department of Health and Human Services under authority of 42 U.S.C. 9902(2).

• *Preexisting condition exclusion* has the meaning assigned at 45 CFR 144.103, which provides that the term means a limitation or exclusion of benefits relating to a condition based on the fact that the condition was present before the first day of coverage, whether or not any medical advice, diagnosis, care or treatment was recommended or received before that day. A preexisting condition exclusion includes any exclusion applicable to an individual as a result of information that is obtained relating to an individual's health status before the individual's first day of coverage, such as a condition identified as a result of a pre-enrollment questionnaire or physical examination given to the individual, or review of medical records relating to the pre-enrollment period.

• *Premium assistance for employer-sponsored group health plans* means State payment of part or all of premiums for group health plan or group health insurance coverage of an eligible child or children.

• *Public agency* has the meaning assigned in § 457.301.

• *Separate child health program* means a program under which a State receives Federal funding from its title XXI allotment under an approved plan that obtains child health assistance through obtaining coverage that meets the requirements of section 2103 of the Act.

• *State* means all States, the District of Columbia, Puerto Rico, the U.S.

Virgin Islands, Guam, American Samoa and the Northern Mariana Islands.

• *State health benefits plan* has the meaning assigned in § 457.301.

• *State plan* means the approved or pending title XXI State child health plan.

• *State program integrity unit* has the meaning assigned in § 457.902.

• *Targeted low-income child* has the meaning assigned in § 457.310.

• *Uncovered child* means a child who does not have creditable health coverage.

• *Well-baby and well-child care services* means regular or preventive diagnostic and treatment services necessary to ensure the health of babies and children as defined by the State. For purposes of cost sharing, the term has the meaning assigned at § 457.520.

We note that comments concerning definitions that are specific to certain subparts are discussed at the opening of those subparts. We received the following comments on the terms defined in this section:

Comment: We received a comment suggesting that we use the terms ''SCHIP'', ''Medicaid expansion program'' and ''separate child health program'' consistently throughout the regulation. The commenter noted that we repeatedly use the term ''SCHIP'' when it appears the term ''separate child health program'' is meant.

Response: We agree with the commenter and have revised the rule for clarity and consistency. Throughout this regulation, we use the terms ''Medicaid expansion program'' and ''separate child health program'' to refer to the different types of programs that States may establish under title XXI. These terms are defined at § 457.10. We use the term ''SCHIP'', also defined at § 457.10, to refer to the State's title XXI program regardless of whether it is a Medicaid expansion program or a separate child health program.

Also for purposes of clarity and consistency, we have added definitions of the terms ''applicant'', ''enrollee'', ''health care services'', and ''uninsured or uncovered child'' to the definitions section of the final rule. We felt that it was important to make clear both the distinctions and the similarities between these two groups of children for purposes of SCHIP (either individually or through action by family or other interested parties).

''Applicant'' means a child who has filed an application (or who has had an application filed on his/her behalf) for health benefits coverage through SCHIP. A child is an applicant until the child receives coverage through SCHIP. An ''enrollee'' is a child who receives health benefits coverage through SCHIP. ''Health care services'' means any of the services, devices, supplies, therapies, or other items listed in § 457.402(a). ''Uncovered child or uninsured child'' means a child who does not have creditable health coverage.

We have added a few definitions related to presumptive eligibility under Subpart C, including ''qualified entity'', ''presumptive income standard'' and ''period of presumptive eligibility''. The Benefits Improvement and Protection Act of 2000 (BIPA) (Pub. L. 106–554) expanded the list of entities specifically eligible to make presumptive eligibility determinations and extended the provision related to presumptive eligibility for children under Medicaid to separate child health programs.

Finally, we have added the definition of ''health services initiatives'' to the overall definitions section because it is used throughout the regulation. This term was previously discussed only in Subpart J, in relation to the waiver authority to provide services through community-based delivery systems.

Comment: One commenter indicated that the definition of AI/AN should include a reference to the standards used by the Secretary to define an AI/AN. The commenter agreed with our use of section 4(c) of the Indian Health Care Improvement Act, 25 U.S.C. 1603(c) to define AI/AN. The commenter believes our proposed definition will assist States in meeting requirements regarding the AI/AN population.

Another commenter indicated that our use of the definition of AI/AN set forth in the Indian Health Care Improvement Act is appropriate for purposes of the premium and cost sharing exclusion. However, the commenter notes that the proposed definition of AI/AN set forth at § 457.10 is narrowed by the cost-sharing provisions at § 457.535, which specify that only American Indians and Alaska Natives who are members of a Federally recognized tribe are excluded from cost-sharing charges. The commenter believes that the definition of AI/AN at § 457.535 is more restrictive than that set forth in the Indian Health Care Improvement Act and has no basis in title XXI. The commenter believes that the definition at § 457.535 is also inconsistent with the proposed consultation provisions of § 457.125(a), which expressly requests that States consult with ''Federally recognized tribes and other Indian tribes and organizations in the State * * *'' The commenter asserted that there is little point in consulting with non-Federally recognized tribes about enrollment in SCHIP if the children of those tribes are not excluded from premiums and cost sharing.

Response: We have modified the definition of AI/AN, after discussion with IHS, to make the definition as consistent as possible with both the Indian Health Care Improvement Act (IHCIA) and the Indian Self Determination Act. The definition no longer includes descendants, in the first or second degree, of members of federally recognized tribes, and we have removed the reference in paragraph (4) to regulations to be promulgated by the Secretary. We believe that this definition is substantially equivalent to, and no more restrictive than, the definition in the IHCIA, but is consistent with the flexibility available under the Indian Self Determination Act. We have used this definition because it gives full weight to federally recognized government-to-government relationship between the federal government and tribal governments. We do not intend, however, to restrict the States' ability to engage in a wider scope of consultation in developing their programs.

Comment: One commenter indicated that the definition of ''child'' is inconsistent with their State's statute which considers children up to age 19 for child support purposes. Another commenter supports HCFA's definition of family income as it gives States the flexibility to define income and family.

Response: The definition of ''child'' was taken from section 2110(c) of the Act. With regard to the definition of family income, we appreciate the support and want to give States as much flexibility as possible when defining this aspect of their SCHIP programs.

Comment: We received a comment on the definition of premium assistance for employer-sponsored group health plans. The commenter states that according to the definition of this term at § 457.10, a State can pay all or part of the premium. The commenter notes that this definition appears to conflict with proposed § 457.810(b)(2)(i) and (ii) which require that an employer contribute 60 percent of the cost of the premium, or a lower amount if the State can show that the average contribution in the State is lower than 60 percent, as a protection against substitution of coverage.

Response: The commenter is correct. In order for the purchase of employer-sponsored coverage to be cost-effective in accordance with § 457.810(b)(2), it was our intent to say that the State can pay for all or part of the enrollee's share of the premium for group health plan coverage of an eligible child or children. It is unlikely that a State's payment of

all of the premium would meet the cost-effectiveness test. Accordingly, we have revised the definition of premium assistance for employer-sponsored group health plans to indicate that a State can pay for all or part of the enrollee's share of the premium.

It should also be noted that, in this final rule we have made some significant changes in the list of terms defined, in order to clarify terminology for health benefits coverage provided through a group health plan or group health coverage. We defined the term ''premium assistance for employer-sponsored group health plans.'' We also used the term ''employer-sponsored group health plan'' and ''employer-sponsored group health plan coverage'' throughout the proposed rule.
