

- g. Take any vehicle through, around or beyond a restrictive sign, recognizable barricade, fence or traffic control barrier.
- h. Fail to keep their campsite/viewing area free of trash and litter during the period of occupancy or fail to remove all personal equipment, trash, and litter upon departure.

Signs and maps directing the public to the designated spectator areas will be provided by the Bureau of Land Management and/or the event sponsor. The above restrictions do not apply to emergency vehicles and vehicles owned by the United States, the State of Arizona or La Paz County. Vehicles under permit for operation by event participants must follow the race permit stipulations. Authority for closure of public lands is found in 43 CFR 8340, Subpart 8341; 43 CFR 8360, Subpart 8364.1, and 43 CFR 8372. Persons who violate this closure order are subject to arrest and, upon conviction, may be fined not more than \$100,000 and/or imprisoned for not more than 12 months.

**Notice of Proposed Closure of Certain Lands to Off-Highway Vehicle Use to Implement the Medicine Lodge Resource Management Plan, and Big Desert Management Framework Plan, Upper Snake River District, Idaho**

**AGENCY:** Bureau of Land Management, Interior.

**SUMMARY:** The Idaho Falls Field Office, Bureau of Land Management (BLM), proposes to close or seasonally restrict certain public lands in the Upper Snake River District, Idaho, to use by motor vehicles, including off-highway vehicles, snowmobiles and other snow machines under BLM's off-highway vehicle regulations. The notice affects lands covered by two land use plans and several activity level plans. The

Medicine Lodge Resource Management Plan and the Big Desert Management Framework Plan described certain lands as "Closed to Off Highway Vehicles," and classified others as "Semi-Primitive Non-Motorized." The purpose of these proposed closures is to manage the specified lands to protect watershed, wildlife, and scenic values from damage caused by off-highway vehicle use, and to prevent undue and unnecessary disturbance to big game populations migrating to crucial winter range habitat.

**DATES:** You must submit your comments to BLM at the appropriate address below on or before February 21, 2001. BLM will not necessarily consider any comments received after that date in making its decisions on the final order.

**ADDRESSES:** Anyone wishing to make comments may submit them in person or by mail to the Field Manager, BLM Idaho Falls Field Office, 1405 Hollipark Drive, Idaho Falls, ID 83401-2100.

**SUPPLEMENTARY INFORMATION:**

**I. Public Comment Procedure**

Your comments on the proposed closure order should be specific, should be confined to issues pertinent to the proposed closure order, and should explain the reason for any recommended change. Where possible, your comments should refer to the specific section or paragraph of the proposal or to the specific tract of land that you are addressing. BLM may not necessarily consider or include in the Administrative Record for the final closure order comments that BLM receives after the close of the comment period or comments delivered to an address other than those listed above.

BLM will make your comments, including your name and address, available for public review at the Idaho Falls Field Office during regular business hours (7:45 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays). Under certain conditions, BLM may keep your personal information confidential. You must prominently state your request for confidentiality at the beginning of your comment. BLM will consider withholding your name, street address, and other identifying information on a case-by-case basis to the extent allowed by law. BLM will make available to the public all submissions from organizations and businesses and from individuals identifying themselves as representatives or officials of organizations or businesses.

**II. Background**

The authority for these closures is 43 CFR 8342.2(c), which directs BLM to " \* \* \* take action by marking and other appropriate measures to identify designated areas and trails so that the public will be aware of locations and limitations applicable thereto. The authorized officer shall make appropriate informational material, including maps, available for public review."

The proposed closures implement the Medicine Lodge Resource Management Plan (RMP), the Big Desert Management Framework Plan (MFP) and associated activity level plans include the Sands Habitat Management Plan, Tex Creek Wildlife Management Area Plan, and the Snake River Activity/Operations Plan, and will remain in effect permanently with the publication of the final notice. This notice identifies by legal land description the precise areas that are closed to implement the plans.

There are several closure areas identified in the Medicine Lodge RMP. This notice only deals with the Tex Creek/Willow Creek, Big Bend Ridge, and Stinking Springs areas as well as river bottoms along the South Fork of the Snake River. The Big Desert MFP has identified a critical wildlife area along the main stem of the Snake River below Idaho Falls, Idaho.

The Tex Creek and Willow Creek areas are crucial wildlife areas lying east of Idaho Falls, Idaho. A majority of the lands are included in the Tex Creek Wildlife Management Area and are cooperatively managed with Idaho Dept. of Fish & Game and Bureau of Reclamation lands.

The closure affecting the Big Bend Ridge area implements the Sands Habitat Management Plan. An objective of this plan is to minimize the degree of harassment of elk due to human activity within the habitat management plan boundaries from November 15 to April 15 of the next year annually. Within the overall area, a seasonal "No Human Entry" closure is already in effect from January 1 through April 30 of each year throughout the majority of the wintering big game range. This closure notice would cover the transition area or migration route to the winter range and protect the habitat from OHV use. The established designated routes across public land along Fourth of July Creek, Saddorous Hill, and Hidden Reservoir/Jackson Mill roads will remain open.

Areas along the South Fork of the Snake River includes the Stinking Springs area and critical floodplain river bottom lands. The Snake River Activity/Operations Plan restricted OHV use to a

few existing roads and trails such as the Stinking Springs Trail. The river bottom lands are experiencing increases in new OHV trails. BLM considers these lands sensitive riparian habitat areas. Therefore, BLM needs to restrict OHV use on these lands.

Under the authority and for the reasons stated in the Background section, the Idaho Falls Field Office, Bureau of Land Management, issues the following closure notice.

### Closure of Certain Public Lands in the Upper Snake River District to Motor Vehicle Use

#### Tex Creek/Willow Creek Area

Effective (30 days after the date of publication of final closure order in the **Federal Register**), Bureau of Land Management (BLM)—administered public lands located in the Tex Creek/Willow Creek area, described below, that are designated as “Closed to Off Highway Vehicles (OHV)” or “Semi Primitive Non-motorized” in the Medicine Lodge Resource Management Plan are closed to motor vehicle use, including off highway vehicles (OHV) and snow machines. The only exceptions to this closure are administrative use of vehicles by the Bureau of Land Management and use by BLM permittees, including State and local government agencies. The area is bounded generally by the Bone Road on the west, Caribou National Forest on the east, the Bonneville and Bingham County lines on the south, and Ririe Reservoir to the north, and is located within the Tex Creek Wildlife Management Area. The legal description of the lands is as follows:

**Notice of Availability of the Hellgate Recreation Area Management Plan/ Draft Environmental Impact Statement (DEIS) for the 27 mile section of the Rogue River from the mouth of the Applegate River to Grave Creek**

**AGENCY:** Bureau of Land Management, Medford District Office, Grants Pass Resource Area.

**SUMMARY:** In accordance with Section 202 of the National Environmental Policy Act of 1969 and Section 202 of the Federal Land Policy and Management Act of 1976, a Recreation Area Management Plan and DEIS have been completed for a portion of the Medford District. The DEIS describes and analyzes future options for managing the 27 mile section of the Rogue River (from the mouth of the Applegate River to Grave Creek) in southern Josephine County, Oregon.

The need for action is based on BLM visitor use reports that show major increases in water-based visitor use activities, on a recreation use study, and on a scoping effort which identified visitor use conflicts. The purpose of the action is to ensure recreational use levels are in alignment with the purposes of the Wild and Scenic Rivers Act of October 2, 1968.

All of the recommend planning issues share one topic: The growth of different
