United States Army*How Systems of Records Are Arranged*

Department of the Army records are identified by the directive number which prescribes the records created, maintained and used, and are published in numerical sequence by identification number. For example, a system of records about assignment of military personnel may be found in the 614 series; assignments, details and transfers'. Some subjects, such as

investigations, are treated as sub-elements of a series, e.g., 'criminal investigations', 'security', and 'military intelligence'.

How to Use the Index Guide

To locate a particular system of records, follow this general guide. The series subject corresponds to the system identification number. For example: medical records for military and civilian personnel are in the 40 series. The first letter, 'A', represents the Army, the number 40-66 is the prescribing directive, and the suffix letters are internal management devices.
