

liabilities associated with the production facilities of these companies were contributed to the newly formed companies in preparation for privatization.

With regard to Bolzano, the petitioners argue that the company's financial statements demonstrate the continuity in the company's business activities before and after its sale. In particular, the company's production of merchandise continued unimpeded during the period of ownership change. Therefore, the petitioners request, consistent with the methodology in the *AST Remand Redetermination*, that all non-recurring subsidies provided to Finsider/ILVA and Falck be attributed in full to CAS and Valbruna/Bolzano, respectively.

I. Abstract

Respondents will be commercial fishing industry individuals, partnerships, and corporations that want to enter into Capital Construction Fund agreements with the Secretary of Commerce. Such agreements allow deferral of Federal taxation on fishing vessel income deposited into a fund for the respondent for use in the acquisition, construction, or reconstruction of a fishing vessel. 50 CFR part 259. At the completion of the construction/reconstruction, a certificate to that effect must be submitted.

SUPPLEMENTARY INFORMATION:

Authority

Issuance of permits and permit modifications, as required by the Endangered Species Act of 1973 (16 U.S.C. 1531-1543) (ESA), is based on a finding that such permits/modifications: (1) are applied for in good faith; (2) would not operate to the disadvantage of the listed species which are the

subject of the permits; and (3) are consistent with the purposes and policies set forth in section 2 of the ESA. Authority to take listed species is subject to conditions set forth in the permits. Permits and modifications are issued in accordance with and are subject to the ESA and NMFS regulations governing listed fish and wildlife permits (50 CFR parts 222-226).

Those individuals requesting a hearing on an application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in the permit action summaries are those of the applicant and do not necessarily reflect the views of NMFS.

Species Covered in This Notice

The following species and evolutionarily significant units (ESU's) are covered in this notice:

Fish

Shortnose sturgeon (*Acipenser brevirostrum*)

New Applications Received

Application 1275: The applicant proposes to conduct a two year survey of the Nuese River to prepare a baseline study of the possible existence of shortnose sturgeon in the river. The research will use the NMFS sampling protocols for determining presence or absence of shortnose sturgeon in a selected river. The goals of the study are to determine whether shortnose sturgeon are present within the Nuese River system, and to determine if suitable shortnose sturgeon habitat is available within the river system.

Application 1276: The applicants propose to conduct an absence/presence study for shortnose sturgeon in the St. John River, Florida. Shortnose sturgeon were last reported in the system in the 1970s and 1980s. The primary objective of the study is to determine the existing population level of shortnose sturgeon within the river system. The applicant will use the NMFS approved sampling protocols for a presence/absence study. Obtaining an estimate of shortnose sturgeon numbers will allow resource partners to implement the secondary objective whereby other recovery plan strategies for the species can proceed.
