approved an approach to work with the industry to more efficiently resolve program concerns and move toward NRC endorsement of NEI 97–06, coupled with voluntary industry implementation of improved steam generator technical specifications.

On February 4, 2000, the Nuclear Energy Institute provided the NRC staff with its proposed steam generator generic change package which was prepared under the Formal Industry initiative NEI 97–06. The staff suspended its review of NEI 97–06 as a result of regulatory activities associated with the Indian Point Unit 2 steam generator tube failure which occurred February 15, 2000. There have been several other activities in the steam generator area in the past year. These activities are discussed in Regulatory Information Summary 2000–22 dated November 3, 2000, and the lessons learned report from the review of the Indian Point Unit 2 steam generator tube failure dated October 23, 2000. These two documents are available on the NRC web site. On December 11, 2000 NEI submitted a revised Industry Steam Generator Program License Change Package and stated in their transmittal letter that the revised package supercedes the earlier version in its entirety. The NRC's Office of Nuclear Reactor Regulation (NRR) sponsored workshop will discuss recent events and their implications with respect to nuclear power plant steam generators. Proposed topics are: steam generator inspection technical issues, steam generator programmatic issues, steam generator tube integrity issues, and steam generator inspection oversight issues.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–43904; File Nos. SR–CBOE–00–58 and SR–ISE–00–15]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; International Securities Exchange, LLC; Order Approving Proposed Rule Changes Relating to an Interim Intermarket Linkage

January 30, 2001.

I. Introduction

On November 15, 2000, the Chicago Board Options Exchange, Inc. (''CBOE'') and the International Securities Exchange LLC (''ISE'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] proposals to adopt rules providing for the implementation of ''interim linkages'' with other option exchanges. On December 13, 2000, the CBOE and ISE (collectively ''Exchanges'') each submitted amendments to their rule proposals.[3] On December 19, 2000, the Exchanges' rule proposals were published for comment in the **Federal Register**.[4] The Commission did not receive comments on either the CBOE or the ISE proposals. This order approves the CBOE and the ISE proposed rule changes, as amended.

II. Description of the Proposed Rule Changes

The CBOE and ISE propose to implement certain aspects of an intermarket options linkage on an ''interim'' basis.[5] The Exchanges represent that this interim linkage would utilize existing order types to facilitate the sending and receiving of order flow between CBOE market makers and ISE market makers and their counterparts on the other options exchanges as an interim step towards development of a ''permanent'' linkage.[6]
