

the Commission found that mandatory data collection is necessary to efficiently monitor and manage numbering use. Requirements adopted in the Report and Order include the following: (a) Utilization/Forecast Report—All carriers that receive numbering resources from the NANPA or that receive numbering resources from a Pooling Administrator in thousands-blocks must report forecast and utilization data semi-annually to the NANPA. Carriers that receive intermediate numbers must report forecast and utilization data semiannually to the NANPA. Carriers whose forecast and utilization data have not changed from the previous reporting period may simply re-file the prior submission and indicate that there has been no change since the last reporting, i.e., report “no change.” All carriers are required to file their data electronically via FCC Form 502. (No. of respondents: 2700; hours per response: 44.4 hours; total annual burden: 119,880 hours). (b) Application for Initial Numbering Resources—Applications for initial numbering resources must include documentation proof that (1) the applicant is authorized to provide service in the area for which the numbering resources are requested and (2) the applicant is or will be capable of providing service within 60 days of the numbering resources activation date. Specifically, carriers must provide, as part of the applications for initial numbering resources, evidence (e.g., state commission order or state certification to operate as a carrier) demonstrating that they are licensed and/or certified to provide service in the area in which they seek numbering resources. Carriers requesting initial numbering resources must also provide to the NANPA appropriate evidence (e.g., contracts for unbundled network elements, network information showing that equipment has been purchased and that it is operational or will be operational, business plans, or interconnection agreements) that its facilities are in place or will be in place to provide service within 60 days of the numbering resources activation date. These requirements apply to carriers requesting an initial NXX code and those requesting an initial thousands-block. See 47 CFR 52.15(g). (No. of respondents: 2730; hours per response: 2; total annual burden: 5460 hours). (c) Application for Growth Numbering Resources—Applications for growth numbering resources must include a Months-To-Exhaust (MTE) worksheet. To ensure that carriers obtain numbering resources when and where they are needed to provide service,

carriers are required to provide evidence that, given their current utilization and recent historical growth, they need additional numbering resources. Non-pooling carriers must satisfy a minimum utilization threshold before obtaining additional numbering resources. See 47 CFR 52.15(g). (No. of respondents: 1700; hours per response: 2 hours; total annual burden: 3400 hours). (d) Recordkeeping Requirement—To facilitate auditing by the NANPA and by state commissions in the future, carriers are required to maintain detailed internal records of their number usage in categories more granular than the five for which they are required to report. Carriers are required to maintain internal records of their numbering resources for the following subcategories: soft dialtone numbers; ported-out numbers; dealer number pools; test numbers; employee/official numbers; Local Routing Numbers; Temporary Local Directory Numbers; and wireless E911 emergency services routing digits/key numbers. Carriers are required to maintain these data for a period of not less than 5 years. See also, Report and Order, para. 62. (No. of respondents: 2730; hours per response: 1 hour; total annual burden: 2730 hours). (e) Notifications by State Commissions—State commissions may reduce the reporting frequency for NPAs in their states to annual. State commissions must notify the Common Carrier Bureau and the NANPA prior to exercising this delegated authority. See 47 CFR 52.15(g). (No. of respondents: 50; hours per response: 1 hour; total annual burden: 50 hours). (f) Demonstration to State Commission—Carriers that open a clean thousands-block prior to utilizing in its entirety a previously-opened thousands-block should be prepared to demonstrate to the state commission: (1) a genuine request from a customer detailing the specific need for telephone numbers; (2) the inability on the part of the carrier to meet the specific customer request for telephone numbers from the supply of numbers within the carrier's currently activated thousands-block. See 47 CFR 52.15(j). (No. of respondents: 850; hours per response: 1 hour; total annual burden: 850 hours). (g) Petitions for Additional Delegation of Numbering Authority—States requesting pooling authority from the FCC must include a showing of specific criteria in their petitions. Each petition must demonstrate that: (1) That an NPA in its state is in jeopardy, (2) the NPA in question has a remaining life span of at least a year, and (3) that NPA is in one of the largest 100 MSAs, or

alternatively, the majority of wireline carriers in the NPA are LNP-capable. See also Report and Order, para. 170. (No. of respondents: 50; hours per response: 20 hours; total annual burden: 1000 hours). (h) Cost Support Data—Carriers are requested to submit cost support data so that the Commission can determine the cost associated with thousands-block number pooling. Carriers should include an analysis of the differences between the shared industry costs associated with thousands-block number pooling and the shared industry costs, if any, associated with the current practices that result in more frequent area code changes. Carriers should provide cost studies that assign costs according to the following three categories: shared industry costs; carrier-specific costs directly related to thousands/block pooling; and carrier-specific costs not directly related to thousands-block number pooling. See Report and Order, paras. 215–226. (No. of respondents: 1213; hours per response: 40 hours; total annual burden: 48,520 hours). The data collected will be used by the FCC, state regulatory commissions, and the North American Numbering Plan administrator (NANPA) to monitor numbering resource utilization by all carriers using the resource and to project the dates of area code and North American Numbering Plan exhaust. Obligation to respond: Mandatory.

Public reporting burden for the collection of information is as noted above. Send comments regarding the burden estimate or any other aspect of the collections of information, including suggestions for reducing the burden to Performance Evaluation and Records Management, Washington, DC 20554.
