## II. Background

#### A. What Guidance Does This PR Notice Provide?

This Pesticide Registration (PR) Notice provides a policy intended to streamline the acute toxicity review and classification process for certain granular pesticide products, including those products that contain granular

fertilizers. The policies should achieve the following objectives: Significantly reduce the number of animals subject to testing; reduce the use of Agency resources while maintaining protection of the public health and environment, and decrease the time required to register qualifying granular pesticide products. This guidance is supported by a large toxicology data base and involves the application of sound scientific principles. This notice is effective immediately, but comments will be accepted for 30 days, after which the Agency may revise the notice.

#### B. PR Notices are Guidance Documents

The PR Notice discussed in this notice provides guidance to EPA personnel and decision makers and to pesticide registrants. This notice is not binding on either EPA or pesticide registrants, and EPA may depart from the guidance where circumstances warrant and without prior notice. Likewise, pesticide registrants may assert that the guidance is not appropriate generally or not applicable to a specific pesticide or situation.
