American Transportation Corp., Partial Grant and Partial Denial of Application for Decision of Inconsequential Noncompliance

American Transportation Corporation (AmTran) has determined certification labels on its AmTran buses are not in full compliance with Federal Motor Vehicle Safety Standard (FMVSS) No. 120, “Tire selection and rims for motor vehicles other than passenger cars,” and 49 CFR part 567, “Certification,” and has filed an appropriate report pursuant to 49 CFR Part 573, “Defect and Noncompliance Reports.” AmTran has also applied to be exempted from the notification and remedy requirements of 49 U.S.C. Chapter 301—“Motor Vehicle Safety” on the basis that the noncompliances and the failures to meet part 567 are inconsequential to motor vehicle safety.

Notice of receipt of the application was published, with a 30-day comment period, on September 27, 1999, in the Federal Register (64 FR 52118). NHTSA received no comments.

From October 27, 1991 through February 11, 1999, AmTran produced 1,514 buses with incorrect certification labels. AmTran states that the tire inflation pressure, as it is written on the certification label required by part 567, cannot support the weight capacity of the bus. AmTran has determined that a majority of the certification labels specify an inflation pressure that is five
