Minerals Management Service

Environmental Documents Prepared for Proposed Oil and Gas Operations on the Alaska Outer Continental Shelf

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of the Availability of Environmental Documents Prepared for Outer Continental Shelf (OCS) Mineral Exploration Proposal on the Alaska OCS.

SUMMARY: The Minerals Management Service (MMS), in accordance with Federal regulations (40 CFR 1501.4 and 1506.6) that implement the National Environmental Policy Act (NEPA), announces the availability of a NEPA-related Environmental Assessment prepared by the MMS for oil and gas exploration activities proposed on the Alaska OCS. This listing includes the only proposal for which the Alaska OCS Office prepared a Finding of No Significant Impact (FONSI) in the 3-month period preceding this Notice.

FOR FURTHER INFORMATION CONTACT: For matters pertaining to this notice, contact Mr. Paul Stang (Alaska OCS Region, Anchorage) at (907) 271-6045. The FONSI and associated EA are available for public inspection between the hours of 7:45 a.m. and 4:30 p.m., Monday through Friday at: Minerals Management Service, Alaska OCS Region, Resource Center, 949 East 36th Avenue, Anchorage, Alaska 99508-4363, phone (907) 271-6070 or (907) 271-6621 or toll free at 1-800-764-2627. Request may also be sent to MMS at akwebmaster@mms.gov.

SUPPLEMENTARY INFORMATION: The proposal is for exploratory-drilling operations that would be conducted in accordance with the OCS Lands Act. The purpose of the Environmental Assessment (EA) is to evaluate the probable environmental effects of the operations, described in the Exploration Plan (EP) for McCovey #1 Well, Beaufort Sea, Alaska, dated September 19, 2000.

The McCovey drill site would be located approximately 12.5 miles northeast of West Dock at Prudhoe Bay, 60 miles northeast of Nuiqsut, 7 miles northwest of Cross Island, and 110 miles northwest of Kaktovik in the Beaufort Sea.

The methods by which the exploratory well would be drilled are detailed in the EP and in the associated Environmental Report and Oil Discharge Prevention and Contingency Plan. Additional details about the proposed operations are included in **Federal Register** Notice 65 FR 60407 dated October 11, 2000, summarizing Phillip's (Alaska) Inc. application for an Incidental Harassment Authorization from the National Marine Fisheries Service.

Location: Lease:OCS-1577; Block: 6515.

EA Number: AK 00-01.

FONSI Date: October 19, 2000.

MMS prepares EA's and FONSI's for proposals which relate to exploration for oil and gas resources on the Alaska OCS. The EA's examine the potential environmental effects of activities described in the proposals and present MMS conclusions regarding the significance of those effects. The EA is used as a basis for determining whether or not approvals of the proposals constitute major Federal actions that significantly affect the quality of the human environment in accordance with NEPA 102(2)(C). A Finding Of No Significant Impact (FONSI) is prepared in those instances where MMS finds that approval will not result in significant effects on the quality of the human environment. The FONSI briefly presents the basis for that finding and includes a summary or copy of the EA.

This Notice constitutes the public Notice of Availability of environmental documents required under the NEPA regulations. Persons interested in reviewing environmental documents for the proposal listed above, or in obtaining information about EA's and FONSI's prepared for activities on the Alaska OCS, are encouraged to contact the Alaska OCS Regional Office of MMS.

Minerals Management Service (MMS)

Outer Continental Shelf (OCS), Gulf of Mexico (GOM) Region, Proposed Use of Floating Production, Storage and Offloading (FPSO) Systems on the GOM OCS

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of availability of the final environmental impact statement (EIS) on the proposed use of FPSO systems on the central and western GOM OCS.

The MMS prepared an EIS on FPSO systems which will be used in deepwater areas of the OCS in the GOM. The MMS based the EIS analyses on estimates of the kinds and amounts of activity onshore and offshore that could result from the deployment and use of FPSO systems to produce oil and gas in areas of the GOM where the present day oil pipeline system does not yet extend. The FPSO systems will produce the oil in the conventional fashion, but will store it on board rather than direct it into pipelines. The FPSO systems will be unloaded regularly by shuttle tankers which will transport the oil to Gulf Coast seaports.

You may obtain single copies of the final EIS, or a CD version, from the MMS, Gulf of Mexico OCS Region, Attention: Public Information Office (MS-5034), 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana 70123-2394, or by calling 1-800-200-GULF.

Notice of Intent To Issue a Temporary of Concession Contract for Gas Service at Yosemite National Park

SUMMARY: Pursuant to the National Park Service Concessions Management Improvement Act of 1998, notice is hereby given that the National Park Service intends to issue a temporary concession contract authorizing continued operation of a gas service station adjacent to the west entrance of Yosemite National Park. The operation is located on land administered by the park in the community of El Portal. The temporary concession contract will be for a term of not more than three years. This short-term concession contract is necessary to avoid interruption of public services while the National Park Service finalizes the Yosemite Valley Plan. This short-term contract will be for a three-year period beginning January 1, 2001. This notice is in pursuant to 36 CFR part 51, section 51.24(a).

SUPPLEMENTARY INFORMATION: The current concession contract at Yosemite National Park will expire on December 31, 2000.
