

depending on data availability), using data extracts requested from each food assistance program in four sites. Records from the three food assistance programs (FSP, WIC, NSLP) will be matched using client identifiers that are common across programs, and using probabilistic record-matching techniques. The study will report on match rates and the sensitivity of match rates to the number of client identifiers used in the matching process. The study will also report rates of multiple program participation and the characteristics of clients enrolled in multiple programs versus those enrolled in a subset of programs for which they are eligible. All client identifiers will be strictly protected and will not be released in any form. The client identifiers will be used in the record linkage process and subsequently stripped from all files. Results from the linked files will be reported only in summary form.

### Forest Service

#### Southwestern Region, Arizona, New Mexico, West Texas, and West Oklahoma Amendment of Land and Resource Management Plans in the Southwestern Region

**AGENCY:** Forest Service, USDA.

**ACTION:** Cancellation of notice of intent to prepare an environmental impact statement.

**SUMMARY:** The Southwestern Region of the Forest Service planned to prepare an environmental impact statement on a proposal to amend National Forest land and resource management plans to incorporate standards and guidelines for management of habitat for American peregrine falcon, Little Colorado River spinedace, loach minnow, spikedace, Apache trout, Chihuahua chub, Gila trout, Gila top minnow, razorback sucker, southwest willow flycatcher, cactus ferruginous pygmy owl, Sonora tiger salamander, New Mexico ridgenose rattlesnake, and Pima pineapple cactus. The amendment would have added new standards and guidelines to existing direction for the protection of federally listed threatened and endangered species.

The Notice of Intent to Prepare an Environmental Impact Statement was published in the **Federal Register** on

Monday, June 1, 1998 (63 FR 29692-29695). A Revised Notice of Intent to Prepare an Environmental Impact Statement was published in the **Federal Register** on Tuesday, September 28, 1999 (64 FR 52274). Since that time, considerable analysis has gone into reviewing the adequacy of Forest Plans with respect to protection of Federally listed threatened and endangered species. We found that existing direction in the eleven Forest Plans provides adequate protection for the species considered in the consultation. Forest Plans currently allow Forest Supervisors and District Rangers the discretion to apply appropriate protection measures for Federally listed threatened and endangered species when designing site-specific projects. Site-specific projects are subject to consultation as required by Section 7 of the Endangered Species Act, further ensuring the adequacy of protective measures for Federally listed threatened and endangered species.

For these reasons, I hereby cancel the referenced Notices of Intent to Prepare an Environmental Impact Statement.
