#### **Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From France, Germany, Italy, Japan, Romania, Singapore, Sweden, and the United Kingdom; Amendment of Preliminary Results of Antidumping Duty Administrative Reviews, and Notice of Intent To Revoke Orders in Part**

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**ACTION:** Amendment of Preliminary Results of Antidumping Duty Administrative Reviews, Partial Rescission of Administrative Reviews, and Notice of Intent to Revoke Orders in Part.

**EFFECTIVE DATE:** February 26, 2001.

**FOR FURTHER INFORMATION CONTACT:** George Callen or Richard Rimlinger, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482-0180 or (202) 482-4477 respectively.

#### **Summary**

On February 5, 2001, the Department of Commerce (the Department) published in the **Federal Register** a *Notice of Preliminary Results of Antidumping Duty Administrative Reviews, Partial Rescission of Administrative Reviews, and Notice of Intent to Revoke Orders in Part*, 66 FR 8931. In that notice, at FR 8932, the Department indicated that, subsequent to the initiation of the review, we received a timely withdrawal of the request we had received for review of the antidumping duty order on ball bearings produced by SNR France. The notice should have indicated that we received a timely withdrawal of the request for review of cylindrical roller

bearings rather than ball bearings by SNR France.

#### **Amendment to Preliminary Results**

Pursuant to 751(h) of the Tariff Act, we are amending the preliminary results of administrative reviews of the antidumping duty orders on antifriction bearings (other than tapered roller bearings) and parts thereof from France, Germany, Italy, Japan, Romania, Singapore, Sweden, and the United Kingdom. Under the section of the notice entitled *Background*, the last paragraph is changed to read as follows:

“Subsequent to the initiation of these reviews, we received timely withdrawals of the requests we had received for review of SKF (France), SKF (Germany), FAG (Germany), SNR (Germany), FAG (Italy), SOMECA (Italy), Inoue Jikuu Kogyo (Japan), Izumoto Seiko Co. (Japan), Koyo Romania (Romania), NMB/Pelmech (Singapore), SKF (Sweden), Barden (U.K.), and SNR (U.K.). We also received timely withdrawals of the requests we had received for review of RHP-NSK (U.K.) and SNR (France) with respect to CRBs only. Finally, we received a timely withdrawal of the request that we had received for review of Muro Corporation (Japan) with respect to BBs only. Because there were no other requests for review of the above-named firms, we are rescinding the reviews with respect to these companies in accordance with 19 CFR 351.213(d).”

This notice is published pursuant to section 751(h) of the Tariff Act. Effective January 20, 2001, Bernard T. Carreau is fulfilling the duties of Assistant Secretary for Import Administration.

Dated: February 8, 2001.

**Bernard T. Carreau,**  
Deputy Assistant Secretary, AD/CVD  
Enforcement II.

#### **Certain Corrosion-Resistant Carbon Steel Flat Products and Certain Cut-to-Length Carbon Steel Plate From Canada: Amended Final Results of Antidumping Duty Administrative Reviews and Determination Not to Revoke in Part**

**AGENCY:** Import Administration, International Trade Administration, U.S. Department of Commerce.

**ACTION:** Notice of Amended Final Results of the Antidumping Duty

Administrative Review of Certain Corrosion-Resistant Carbon Steel Flat Products and Certain Cut-to-Length Carbon Steel Plate From Canada and Determination Not to Revoke in Part.

**SUMMARY:** We are amending our final results of the 1998-99 administrative reviews of the antidumping duty orders on Certain Corrosion Resistant Carbon Steel Products and Certain Cut-to-Length Carbon Steel Plate From Canada and Determination Not to Revoke in Part, published on January 16, 2001 (66 FR 3543), to reflect the correction of ministerial errors made in the final results for corrosion resistant carbon steel flat products. We are publishing this amendment to the final results in accordance with 19 CFR part 351 (1999).

**EFFECTIVE DATE:** February 26, 2001.

**FOR FURTHER INFORMATION CONTACT:** Elfi Blum or Abdelali Elouaradia, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington DC 20230; telephone (202) 482-0197 and (202) 482-1374, respectively.

**SUPPLEMENTARY INFORMATION:**

#### **Applicable Statute**

Unless otherwise stated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 (the Act) by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department's regulations are to 19 CFR part 351 (1999).

#### **Background**

On September 8, 2000, the Department of Commerce (the Department) published in the **Federal Register** (65 FR 54481) the preliminary results of its 1998-99 administrative reviews of the antidumping duty orders on certain corrosion-resistant carbon steel flat products and certain cut-to-length carbon steel plate from Canada. The Department published the final results of review on January 16, 2001 (66 FR 3543).

On January 16, 2001, we received timely allegations from petitioners (Bethlehem Steel Corporation, U.S. Steel Group (a unit of USX Corporation), Inland Steel Industries, Inc., AK Steel Corporation, LTV Steel Co., Inc. and National) that the Department made ministerial errors in the final results of reviews regarding Continuous Colour Coat, Ltd (CCC). Respondents did not submit any comments in reply to these ministerial error allegations.

### Scope of Review

The products covered by these administrative reviews constitute two separate "classes or kinds" of merchandise: (1) Certain corrosion-resistant carbon steel flat products, and (2) certain cut-to-length carbon steel plate.

The first class or kind, certain corrosion-resistant steel, includes flat-rolled carbon steel products, of rectangular shape, either clad, plated, or coated with corrosion-resistant metals such as zinc, aluminum, or zinc-, aluminum-, nickel- or iron-based alloys, whether or not corrugated or painted, varnished or coated with plastics or other nonmetallic substances in addition to the metallic coating, in coils (whether or not in successively superimposed layers) and of a width of 0.5 inch or greater, or in straight lengths which, if of a thickness less than 4.75 millimeters, are of a width of 0.5 inch or greater and which measures at least 10 times the thickness or if of a thickness of 4.75 millimeters or more are of a width which exceeds 150 millimeters and measures at least twice the thickness, as currently classifiable in the Harmonized Tariff Schedule (HTS) under item numbers 7210.30.0030, 7210.30.0060, 7210.41.0000, 7210.49.0030, 7210.49.0090, 7210.61.0000, 7210.69.0000, 7210.70.6030, 7210.70.6060, 7210.70.6090, 7210.90.1000, 7210.90.6000, 7210.90.9000, 7212.20.0000, 7212.30.1030, 7212.30.1090, 7212.30.3000, 7212.30.5000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7212.60.0000, 7215.90.1000, 7215.90.3000, 7215.90.5000, 7217.20.1500, 7217.30.1530, 7217.30.1560, 7217.90.1000, 7217.90.5030, 7217.90.5060, and 7217.90.5090. Included in this review are corrosion-resistant flat-rolled products of non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process (i.e., products which have been "worked after rolling")—for example, products which have been beveled or rounded at the edges. Excluded from this review are flat-rolled steel products either plated or coated with tin, lead, chromium, chromium oxides, both tin and lead ("terne plate"), or both chromium and chromium oxides ("tin-free steel"), whether or not painted, varnished or coated with plastics or other nonmetallic substances in addition to the metallic coating. Also excluded from this review are clad products in straight lengths of 0.1875 inch or more in composite thickness

and of a width which exceeds 150 millimeters and measures at least twice the thickness. Also excluded from this review are certain clad stainless flat-rolled products, which are three-layered corrosion-resistant carbon steel flat-rolled products less than 4.75 millimeters in composite thickness that consist of a carbon steel flat-rolled product clad on both sides with stainless steel in a 20%-60%-20% ratio.

The second class or kind, certain cut-to-length plate, includes hot-rolled carbon steel universal mill plates (i.e., flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 millimeters but not exceeding 1,250 millimeters and of a thickness of not less than 4 millimeters, not in coils and without patterns in relief), of rectangular shape, neither clad, plated nor coated with metal, whether or not painted, varnished, or coated with plastics or other nonmetallic substances; and certain hot-rolled carbon steel flat-rolled products in straight lengths, of rectangular shape, hot rolled, neither clad, plated, nor coated with metal, whether or not painted, varnished, or coated with plastics or other nonmetallic substances, 4.75 millimeters or more in thickness and of a width which exceeds 150 millimeters and measures at least twice the thickness, as currently classifiable in the HTS under item numbers 7208.40.3030, 7208.40.3060, and 7208.51.0030, 7208.51.0045, 7208.51.0060, 7208.52.0000, 7208.53.0000, 7208.90.0000, 7210.70.3000, 7210.90.9000, 7211.13.0000, 7211.14.0030, 7211.14.0045, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000. Included in this review are flat-rolled products of non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process (i.e., products which have been "worked after rolling")—for example, products which have been beveled or rounded at the edges. Excluded from this review is grade X-70 plate. Also excluded is cut-to-length carbon steel plate meeting the following criteria: (1) 100% dry steel plates, virgin steel, no scrap content (free of Cobalt-60 and other radioactive nuclides); (2) .290 inches maximum thickness, plus 0.0, minus .030 inches; (3) 48.00 inch wide, plus .05, minus 0.0 inches; (4) 10 foot lengths, plus 0.5, minus 0.0 inches; (5) flatness, plus/minus 0.5 inch over 10 feet; (6) AISI 1006; (7) tension leveled; (8) pickled and oiled; and (9) carbon content, 0.3 to 0.8 (maximum).

With respect to both classes or kinds, the HTS item numbers are provided for convenience and Customs purposes.

The written description remains dispositive of the scope of these reviews.

### Amended Final Results

#### CCC

*Comment 1:* Petitioners allege that, for CCC, the Department did not include indirect selling expenses in the home market, as reported by CCC in its questionnaire response, in its calculation of total cost of production and constructed value (CV).

*Department's Position:* In its calculations the Department had intended to include indirect selling expenses in the calculation of total cost of production and of CV. This omission constitutes a ministerial error in accordance with section 351.224(f) of the Department's regulations. Accordingly, for these amended final results, we have corrected this error by including the reported indirect selling expenses in our calculations of total cost of production and CV in our model match program.

*Comment 2:* Petitioners state that, for CCC, the Department incorrectly subtracted packing expenses in its calculations of net price, for cost test purposes, because packing expenses are included in the total cost of production. Moreover, petitioners assert that to make a proper cost to price comparison, packing expenses have to be included in both calculations. Finally, petitioners argue that the Department also failed to subtract the movement expenses from the gross unit price.

*Department's Position:* We agree with petitioners on both issues. We incorrectly subtracted CCC's packing expenses, instead of movement expenses, from gross unit price to arrive at a net price for cost comparison. For these amended final results, we have corrected the ministerial errors by only subtracting movement expenses to arrive at a gross unit price, for cost comparison purposes, inclusive of packing.

As a result of these corrections, the margin for corrosion-resistant carbon steel flat products from Canada for CCC has changed from 1.81 percent to 2.11 percent.

### Amended Final Results of Review

Upon review of the submitted allegations, the Department has determined that the following margins exist for the period August 1, 1998, through July 31, 1999:

Manufacturer/exporter	Margin (percent)
Certain Corrosion-Resistant Carbon Steel Flat Products: Continuous Colour Coat, Ltd Dofasco Inc. and Sorevco Inc .....	2.11
Certain Cut-to-Length Carbon Steel Plate: Clayton Steel Co .....	0.27
Gerdau MRM Steel Co .....	0.00
Metaux Russel Inc .....	68.70

The Department will determine, and the U.S. Customs Service shall assess, antidumping duties on all appropriate entries. For assessment purposes, we have calculated importer-specific *ad valorem* duty assessment rates for the merchandise based on the ratio of the total amount of antidumping duties calculated for the examined sales to the total quantity of sales examined. The Department will issue appraisal instructions directly to the Customs Service.

Furthermore, the following deposit requirements will be effective upon publication of these amended final results for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date as provided by section 751(a)(1) of the Act: (1) The cash deposit rate for each reviewed company will be the rate stated above (except that no deposit will be required for firms with zero or *de minimis* margins, *i.e.*, margins less than 0.5 percent); (2) for exporters not covered in this review, but covered in the less-than-fair-value (LTFV) investigation or a previous review, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a previous review, or the original LTFV investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be the "all others" rates established in the LTFV investigations, which were 18.71 percent for corrosion-resistant steel products and 61.88 percent for plate (see *Amended Final Determination of Sales at Less than Fair Value and Anti-Dumping Orders: Certain Corrosion Resistant Carbon Steel Flat Products and Certain Cut-to-Length Carbon Steel Plate from Canada*, 60 FR 49582 (September 26, 1995)). These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative reviews.

This administrative review and notice are issued and published in accordance with sections 751(a)(1) and (a)(2)(A) of the Act (19 U.S.C. 1675(a) and 19 CFR 351.213 and 19 CFR 351.221(b)(5). Effective January 20, 2001, Bernard T. Carreau is fulfilling the duties of the Assistant Secretary for Import Administration.

Dated: February 16, 2001.

**Bernard T. Carreau,**

*Deputy Assistant Secretary for Import Administration.*

#### Large Newspaper Printing Presses and Components Thereof, Whether Assembled or Unassembled, From Japan: Final Results Antidumping Duty Administrative Review

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**ACTION:** Notice of final results of antidumping duty administrative review.

**SUMMARY:** On October 19, 2000, the Department of Commerce published the preliminary results of the administrative review of the antidumping duty order on large newspaper printing presses and components thereof, whether assembled or unassembled, from Japan (65 FR 62700). This review covers the U.S. sales of two manufacturers/exporters, Mitsubishi Heavy Industries, Ltd. and Tokyo Kikai Seisakusho, Ltd. The period of review is September 1, 1998, through August 31, 1999.

We gave interested parties an opportunity to comment on the preliminary results. Based on our analysis of the comments received, we have made changes in the margin calculations. Therefore, the final results differ from the preliminary results. The final weighted-average dumping margins for the reviewed firms are listed below in the "Final Results of Review" section of this notice.

**EFFECTIVE DATE:** February 26, 2001.

**FOR FURTHER INFORMATION CONTACT:**

James Nunno or Christopher Priddy, Office 2, AD/CVD Enforcement Group I, Import Administration, Room B099, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202)

482-0783, or (202) 482-1130, respectively.

**SUPPLEMENTARY INFORMATION:**

**Applicable Statute and Regulations**

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department of Commerce's (the Department's) regulations are to 19 CFR Part 351 (April 1999).

**Background**

This review covers two manufacturers/exporters, Mitsubishi Heavy Industries, Ltd. (MHI) and Tokyo Kikai Seisakusho, Ltd. (TKS).

On October 19, 2000, the Department of Commerce published in the **Federal Register** the preliminary results of the antidumping duty order on large newspaper printing presses and components thereof, whether assembled or unassembled, (LNPPs) from Japan. See *Large Newspaper Printing Presses and Components Thereof, Whether Assembled or Unassembled, from Japan: Preliminary Results of Antidumping Duty Administrative Review*, 65 FR 62700 (Oct. 19, 2000) (*Preliminary Results*).

We invited parties to comment on our preliminary results of review. At the request of MHI and its affiliate MLP U.S.A., Inc., we held a public hearing on December 20, 2000. The Department has conducted this administrative review in accordance with section 751 of the Act.

**Scope of the Review**

The products covered by this review are large newspaper printing presses, including press systems, press additions, and press components, whether assembled or unassembled, whether complete or incomplete, that are capable of printing or otherwise manipulating a roll of paper more than two pages across. A page is defined as a newspaper broadsheet page in which the lines of type are printed perpendicular to the running of the direction of the paper or a newspaper tabloid page with lines of type parallel to the running of the direction of the paper.

In addition to press systems, the scope of this review includes the five press system components. They are: (1) a printing unit, which is any component that prints in monochrome, spot color, and/or process (full) color; (2) a reel tension paster, which is any component that feeds a roll of paper more than two
