Title: Visitor knowledge and economic impact at Arapaho National Wildlife Refuge, Walden, Colorado.

OMB Approval No.: New collection.

Abstract: The National Wildlife Refuge System Improvement Act of 1997 requires that all refuges will be managed in accordance with an approved Comprehensive Conservation Plan (CCP) which, when implemented, will achieve refuge purposes; help fulfill the Refuge System mission; maintain and, where appropriate, restore the ecological integrity of each refuge and the Refuge System; help achieve the goals of the Wilderness Preservation System; and meet other mandates. An underlying component of these plans is a strong scientific foundation for establishment for refuge objectives, implementation of management actions, and quantitative monitoring of progress towards these objectives. Few studies have been conducted that evaluate public knowledge, perception, or economic value associated with National Wildlife Refuges. Information about the existing community, economic, and public relations status is a precursor to many of the habitat and visitor management decisions. The primary objective of this study is to gain sufficient knowledge about refuge visitors. Our second objective is to develop and test a set of tools that can be used/repeated at other refuges around the country. Understanding public knowledge, perception, and values is a vital component of natural resource management. Improved understanding will guide future management practices.

Bureau Form No.: None.

Frequency: One time.

Description of Respondents: Arapaho National Wildlife Refuge visitor or group of visitors.

Estimated Completion Time: 10 minutes per respondent (approximate).

Number of Respondents: 400 (575 surveys).

Burden hours: 67 hours (The burden estimates are based on 10 minutes to complete each questionnaire and a 70% return rate).
