SUPPLEMENTARY INFORMATION: NHTSA regulation Part 583 (49 CFR 583), *Automobile Parts Content Labeling* requires passenger vehicles manufactured after October 1, 1994 to have labels specifying their percentage value of U.S./Canadian parts content, the country of assembly, and countries of origin of the engine and transmission (59 FR 37294). This regulation implements the American Automobile Labeling Act (AALA) of 1992, and its purpose is to help consumers in the selection of new vehicles by providing information about the country of origin of vehicles and their parts.

As required by the Government Performance and Results Act of 1993 and Executive Order 12866 (58 FR 51735), NHTSA reviews existing regulations to determine if they are achieving policy goals. This evaluation is based on a 1998 consumer survey to see if new-vehicle purchasers know about the labels, understand them, and/or use them to help select a vehicle; manufacturer and dealer surveys to learn about their response to the labels; and statistical analyses of the actual trends in U.S./Canadian parts content in new motor vehicles after 1994.

Over 75 percent of the 646 consumer survey participants were unaware of the existence of the AALA labels. Many participants who did read the label said they used the country-of-assembly information, but none said they used the numerical U.S./Canadian parts content score or the engine/transmission information. Overall U.S./Canadian parts content in new cars and light trucks dropped from 70 percent in model year 1995 to 67.6 percent in 1998; however, it increased from 47 to 59 percent in transplants while dropping from 89 to 84 percent in Big 3 vehicles.

How can I influence NHTSA's thinking on this evaluation?

NHTSA welcomes public review of the technical report and invites reviewers to submit comments about the data and the statistical methods used in the analyses. NHTSA will submit to the Docket a response to the comments and, if appropriate, additional analyses that update, supplement or revise the technical report.

The agency is especially interested in learning of any additional data or information on the following topics:

- Measures that could make the labels more widely known, more convenient, easier to understand or more influential for consumers, or less costly to produce.
- Evidence that consumers are aware of and/or influenced by the labels, or related information.
- Evidence that the labels, or related data, have been used as a marketing, advertising, or public-information tool by manufacturers, dealers, or any other organizations.
- Evidence that the labels, or related considerations have influenced decisions on where to manufacture or purchase parts, or to assemble vehicles.
- Factors that have influenced the trends in U.S./Canadian parts content before, during and after the 1994-98 period studied in the report.
