

- Grants
4. Public Programs
5. Federal/State Partnership
6. Jefferson Lecture

The remainder of the proposed meeting will be given to the consideration of specific applications and closed to the public for the reasons stated above.

Further information about this meeting can be obtained from Ms. Laura S. Nelson, Advisory Committee Management Officer, National Endowment for the Humanities, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, or by calling (202) 606-8322, TDD (202) 606-8282. Advance notice of any special needs or accommodations is appreciated.

Laura S. Nelson,

Advisory Committee, Management Officer.

BILLING CODE 7536-01-M

THE NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Meetings of Humanities Panel

AGENCY: The National Endowment for the Humanities.

ACTION: Cancellation of panel meeting.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, as amended), notice is hereby given that the following meeting of the Humanities Panel at the Old Post Office, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, has been cancelled.

FOR FURTHER INFORMATION CONTACT: Laura S. Nelson at (202) 606-8322.

Cancellation

Date: March 15, 2001.

Time: 9 a.m. to 5:30 p.m.

Room: 730.

Program: This meeting will review applications for Humanities Projects in Media, submitted to the Division of Public Programs at the February 1, 2001 deadline.

Dated: March 28, 2001.

Laura S. Nelson,

Advisory Committee, Management Officer.

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities; Comment Request.

AGENCY: National Science Foundation.

ACTION: Submission for OMB Review; Comment Request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Pub. L. 104-13. The first notice for this collection was published at 65 FR 58297 and no comments were received. Comments regarding (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for National Science Foundation, 725-17th Street, NW., Room 10235, Washington, DC 20503, and to Teresa R. Pierce, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 295, Arlington, Virginia 22230 or send email to tpierce@nsf.gov. Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling 703-292-7555.

NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Summary of Collection

Title: 2001 National Survey of Recent College Graduates

OMB Control Number: 3145-0077.

1. Abstract

The National Survey of Recent College Graduates (NSRCG) has been conducted biennially since 1974. For the 2001 cycle, a sample of individuals who have recently earned bachelor's

and master's degrees in science and engineering from U.S. institutions will be surveyed. The purpose of the study is to provide national estimates describing the relationship between education and employment for bachelor's and master's recipients in science and engineering. The study is one of three components of the Scientists and Engineers Statistical Data System (SESTAT), which produces national estimates of the size and characteristics of the nation's science and engineering population.

The National Science Foundation Act of 1950, as subsequently amended, includes a statutory charge to ". . . provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources, and to provide a source of information for policy formulation by other agencies of the Federal Government." The National Survey of Recent College Graduates is designed to comply with these mandates by providing information on the supply and utilization of scientists and engineers at the bachelor's and master's degree level. Collected data will be used to produce estimates of the characteristics of these individuals. They will also provide necessary input into the SESTAT labor force data system, which produces national estimates of the size and characteristics of the country's science and engineering population. The Foundation uses this information to prepare congressionally mandated reports such as Women and Minorities in Science and Engineering and Science and Engineering Indicators. A public release file of collected data, designed to protect respondent confidentiality, is expected to be made available to researchers on CD-ROM and on the World Wide Web.

The Survey will be primarily conducted using Computer Assisted Telephone Interviews (CATI). Questionnaires will be mailed only to those individuals who are unwilling to provide information over the telephone but willing to complete a mail questionnaire. CATI interviewing will begin in May 2001 and is estimated to end in December 2001. The survey will be collected in conformance with the Privacy Act of 1974 and the individual's response to the survey is voluntary. NSF will insure that all information collected will be kept strictly confidential and will be used only for research or statistical purposes, analyzing data, and preparing scientific reports and articles.

2. Expected Respondents

We will sample approximately 14,000 graduates with bachelor's and master's

degrees in science and engineering from U.S. academic institutions.

3. Burden on the Public

The amount of time to complete the questionnaire may vary depending on an individual's circumstances; however, on average it will take approximately 30 minutes to complete the survey. We estimate that the total annual burden will be 5,737 hours during the year.

Dated: March 1, 2001.

Teresa R. Pierce,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555-01-M

NATIONAL SCIENCE FOUNDATION

Notice of Permit Applications Received Under the Antarctic Conservation Act of 1978 (Pub. L. 95-541)

AGENCY: National Science Foundation.

ACTION: Notice of Permit Applications Received under the Antarctic Conservation Act of 1978, Public Law 95-541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by April 5, 2001. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Room 755, Office of Polar Programs, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230.

FOR FURTHER INFORMATION CONTACT: Joyce Jatko at the above address or (703) 292-8032.

SUPPLEMENTARY INFORMATION: The National Science Foundation, under the authority of the Antarctic Conservation Act of 1978, as amended, issued regulations providing for the conservation of Antarctic animals and plants. The regulations provide for a permit system for various activities in Antarctica otherwise prohibited, including entry into Antarctic Specially Protected Areas, taking of native mammals, birds, or plants, exporting or

importing any native mammal, bird or plant, or introducing into Antarctica any non-native species.

The Application Received Is as Follows

Applicant: H. William Detrich, Department of Biology, Northeastern University, Boston, MA 02215.

Permit Application No.: 2001-027.

Activity for Which Permit is

Requested: Introduce into Antarctica.

The applicant proposes to use a mixture of species of frozen fish tissues from species native to Patagonia Chile, specifically *Macruronus magellanicus* and *Dissostichus eleginoides*, as bait in experimental fishing of fish traps/pots in the Antarctic peninsula area. The bait will be used to attempt to capture Antarctic fish for ongoing studies of their biochemistry and molecular biology. In all previous research seasons, capture of fish specimens has been carried out exclusively by benthic trawling. If use of the fish traps proves to be successful, this method could reduce the necessity and frequency of trawling for specimens and resultant disruption to benthic communities and could yield a much more diverse sample of fish species for research work. It is anticipated that a maximum of twenty traps using ten to fifteen kilogram blocks of frozen bait each would be required.

Location: Antarctic peninsula area in the vicinities of Low, Brabant, Anvers, Livingston Islands and Dallmann Bay.

Dates: June 10, 2001 to July 15, 2001.

Joyce A. Jatko,

Acting Permit Officer, Office of Polar Programs.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-389]

Florida Power and Light Company, et al., St. Lucie Plant, Unit No. 2; Exemption

1.0 Background

The Florida Power and Light Company, et al. (FPL, the licensee) is the holder of Facility Operating License No. NPF-16, which authorizes operation of St. Lucie Unit No. 2. The license provides, among other things, that the facility is subject to all rules, regulations, and orders of the U.S. Nuclear Regulatory Commission (NRC, the Commission) now or hereafter in effect.

The facility consists of a pressurized water reactor located in St. Lucie County, Florida.

2.0 Purpose

Title 10 of the Code of Federal Regulations (10 CFR), part 54 addresses the various requirements for renewal of operating licenses for nuclear power plants. Section 54.17(c) of part 54 specifies:

An application for a renewed license may not be submitted to the Commission earlier than 20 years before the expiration of the operating license currently in effect.

By letter dated October 30, 2000, the licensee requested an exemption from 10 CFR 54.17(c) for St. Lucie Unit 2. At the time of the request, there were more than 22 years remaining until the expiration of the current operating license for St. Lucie Unit 2. The exemption would allow FPL to process and submit the St. Lucie Unit 2 license renewal application concurrent with the St. Lucie Unit 1 license renewal application. Because of the similarities in design, operation, maintenance, operating experience and environments of the two St. Lucie units, many of the analyses to be performed for Unit 1 would be directly applicable to Unit 2.

Based on an anticipated submittal of a renewal application in June 2002, this exemption would permit the licensee to submit a license renewal request for St. Lucie Unit 2 approximately 1 year earlier than the date specified by 10 CFR 54.17(c), in order to allow it to be prepared and submitted concurrently with the license renewal application for St. Lucie Unit 1.

3.0 Discussion

Pursuant to 10 CFR 54.15, the Commission may, upon application by any interested person or upon its own initiative, grant exemptions from the requirements of 10 CFR part 54, in accordance with the provisions of 10 CFR 50.12, when (1) the exemptions are authorized by law, will not present an undue risk to public health or safety, and are consistent with the common defense and security; and (2) when special circumstances are present.

The requirements for exemption are discussed below:

3.1 Authorized by Law

The Commission's basis for establishing the 20-year limit contained in Section 54.17(c) is discussed in the 1991 Statements of Consideration for Part 54 (56 FR 64963). The limit was established to ensure that substantial operating experience was accumulated by a licensee before a renewal application is submitted such that any
