*Description:* Sections 201-205 of the Communications Act of 1934, as amended, require that common carriers establish just and reasonable charges, practices and regulations for the service they provide. The schedules containing these charges, practices and regulations must be filed with the Commission, which is required to determine whether such schedules are just, reasonable and not unduly discriminatory. Part 61 of the Commission's Rules establishes the procedures for filing tariffs which contain the charges, practices, and regulations of the common carriers, supporting economic data and other related documents. The supporting data must also conform to other parts of the Commission's rules such as Parts 36 and 69. Part 61 prescribes the framework for the initial establishment of and subsequent revisions to tariffs. Tariffs that do not conform to Part 61 may be rejected. In addition to tariffs filed with the Commission, carriers may be required to post their schedules or rates and regulations. The information collected through a carrier's tariff is used by the Commission to determine whether the services offered are just and reasonable as the Act requires. The tariffs and any supporting documentation are examined in order to determine if the services are offered in a just and reasonable manner.

*Description:* In CC Docket Nos. 96-262, 94-1, 99-249, and 96-45, the

Commission adopted an integrated interstate access reform and universal service proposal put forth by the members of the Coalition for Affordable Local and Long Distance Service (CALLS). The CALLS Proposal resolves major outstanding issues concerning access charges. In order to implement the CALLS Proposal, the Commission imposed several information collections. The Report and Order requires price cap LECs to modify their annual access tariff filings; the Report and Order requires each price cap or competitive LEC that wishes to receive support from the interstate access universal service support mechanism to submit quarterly to USAC data showing the number of lines it served in a study area as of the last business day of the previous quarter. In addition to line count information, price cap LECs must file with USAC on June 30, 2000, October 15, 2000, April 16, 2001 and annually after that, price cap revenue data, prices for unbundled network element loops and line ports, and UNE zone boundary information. See 47 CFR section 54.802. The Report and Order requires price cap LECs who choose not to follow the voluntary portions of the CALLS Proposal to submit cost support information, which the Commission would use to set their access rate levels. The Commission will use the modified tariff information filed by the price cap LECs to ensure compliance with the various interstate access reforms of the CALLS Proposals. USAC will use the line count and other information to determine, on a per-line basis, the amount that the carrier will receive from the interstate access universal service support mechanism. The Commission will use the cost support information to ensure that the interstate access rates are just and reasonable, as required by section 201(b) of the Communications Act. *Obligation to respond:* Required to obtain or retain benefits.

Public reporting burden for the collection of information is as noted above. Send comments regarding the burden estimate or any other aspect of the collections of information, including suggestions for reducing the burden to Performance Evaluation and Records Management, Washington, DC 20554.
