**SUPPLEMENTARY INFORMATION:**

*Affected entities:* Entities potentially affected by this action are those states and members of the public that voluntarily participate in the remedial phase of the Superfund process and those members of the public that voluntarily participate in community involvement activities during some or all phases of the Superfund process.

*Title:* National Oil and Hazardous Substances Pollution Contingency Plan (OMB Control No. 2050-0096, EPA ICR No. 1463.05) expiring on July 3, 2001.

*Abstract:* The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA or Superfund; 42 U.S.C. 9601 *et seq.*), as amended, establishes broad Federal authority to undertake removal and remedial actions in response to

releases or threats of releases of hazardous substances and certain pollutants and contaminants into the environment. The National Contingency Plan sets forth requirements for carrying out the response authorities established under CERCLA. In addition, the Government Performance and Results Act of 1993 (GPRA) requires EPA to determine and report to Congress on its effectiveness, including community involvement activities.

For states, this ICR addresses the recordkeeping and reporting provisions of the NCP that affect those states that voluntarily participate in the remedial phase of the Superfund program. (Recordkeeping and reporting requirements of the pre-remedial phase—except those tied to community involvement—have been addressed in the ICR prepared for the revisions to the Hazard Ranking System (HRS) (OMB Control No. 2050-0095). Recordkeeping and reporting provisions for the removal program—except, again, those tied to community involvement—also are not included in this ICR because the Federal government has the lead for removal actions.) Remedial responses under the Superfund program fall into the pre-remedial phase (during which the extent of site contamination is assessed) and the remedial phase (during which investigations are conducted to identify and characterize contaminants present and to determine viable remedies for a site, the remedy is chosen and the cleanup or construction is completed). The NCP includes the following reporting and recordkeeping provisions for the remedial phase of the Superfund program:

(1) States that voluntarily take the lead in remedial activities at Superfund sites must conduct the activities in a manner consistent with CERCLA (40 CFR 300.515(a)). Therefore, at a state-lead site, the state must: develop a Remedial Investigation and Feasibility Study (RI/FS); prepare a Proposed Plan; issue a Record of Decision (ROD); complete community interviews; prepare a Community Involvement Plan (CIP), and provide information to the public; and

(2) States must identify and communicate potential state applicable or relevant and appropriate requirements (ARARs) at all Superfund sites within the state (40 CFR 300.400(g)).

In addition, this ICR addresses the recordkeeping and reporting provisions of the NCP that affect communities voluntarily providing their concerns to the lead agency about the Superfund process. This ICR also addresses the recordkeeping and reporting provisions
