

The Applicant proposes to make no more than four applications of acetamidrid per season formulated as a flowable liquid containing 70% active ingredient (a.i.). A maximum of 0.2 pound of a.i. will be applied per season. The state proposes to treat up to 1.8 million acres of cotton in Texas.

Applications will be made from March 1, 2001 to September 30, 2001. If all of the 1.8 million acres are treated with the maximum amount of acetamidrid proposed (0.2 pound a.i. per acre), then a maximum of 360,000 pound active ingredient would be applied.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 of FIFRA require publication of a notice of receipt of an application for a specific exemption proposing use of a new chemical (i.e., an active ingredient) which has not been registered by the EPA. The notice provides an opportunity for public comment on the application.

The Agency, will review and consider all comments received during the comment period in determining whether to issue the specific emergency exemption requested by the Texas Department of Agriculture.
