Availability of a Draft Environmental Assessment and Preliminary Finding of No Significant Impact, and Receipt of an Application for an Incidental Take Permit for Residential Lot Construction and Timber Harvest in North Carolina

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

Crescent Resources, Inc. (Applicant) has requested an incidental take permit (ITP) pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973 (U.S.C. 1531 *et seq.*), as amended (Act). The Applicant anticipates incidental take of the American bald eagle (*Haliaeetus leucocephalus*) over the next 50 years associated with the construction of residential housing and during forest management activities. The level of incidental take requested in the ITP application is one existing bald eagle nest. This take will be in the form of harm and harassment associated with planned construction and forest management activities. The incidental take and measures to minimize and mitigate this take will occur on approximately 11,700 acres owned by the Applicant that surround Lake James in Burke and McDowell counties, North Carolina.

To compensate for the likely effects of these actions, the Applicant will provide six undeveloped sites, each with a 300-foot radius primary buffer zone (i.e., approximately 6.5 acres of land each), along the periphery of Lake James for bald eagle habitat conservation. Each mitigation site will be protected for the duration of the proposed permit and will contain at least one large, prominent pine tree that
