

inhibition of gene activation. As part of the evaluation, EPA requested the development and review of proposed minimum performance criteria that future methods of these types should achieve, in light of the performance of existing methods.

For both the receptor binding and transcriptional activation assays, the Panel will evaluate the extent to which the validation and acceptance criteria outlined in the ICCVAM Report have been addressed. The Panel will be asked to provide conclusions and recommendations regarding the usefulness and limitations of various ER and AR binding and/or transcriptional activation assays, and the adequacy of proposed technically feasible minimum performance criteria that these types of assays should achieve. Finally, the Panel will address whether and what additional test method development and validation efforts might further enhance and/or characterize the usefulness of specific *in vitro* ER and AR binding and/or transcriptional activation assays.

NICEATM is preparing background review documents on ER and AR binding and transcriptional activation testing methods that will contain comprehensive summaries of available data and related information characterizing the current validation status of these assays. The Panel will evaluate the background review documents, which will also be made available to the public.

The Peer Review Panel meeting is anticipated to take place in early 2002. Meeting information, including date and location, and public availability of the background review documents will be announced in a future **Federal Register** notice that will also be posted on the ICCVAM/NICEATM website (<http://iccvam.niehs.nih.gov>).

Request for Nominations of Experts to Serve on the Panel

NICEATM invites nominations of scientists with relevant knowledge and experience who might be considered for the independent Peer Review Panel. Areas of expertise that may be relevant include, but are not limited to, endocrinology, reproductive toxicology, cellular biology, molecular genetics and biostatistics. Each nomination should include the person's name, affiliation, contact information (i.e., mailing address, telephone and fax numbers, and e-mail address), and a brief summary of relevant experience and qualifications. Nominations should be sent to NICEATM by mail, fax or e-mail within 60 days of the publication date of this notice. Correspondence should be directed to Dr. William S. Stokes,

Director, NTP Interagency Center for the Evaluation of Alternative Toxicological Methods, NIEHS, 79 T.W. Alexander Drive, MD EC-17, P.O. Box 12233, Research Triangle Park, NC 27709; telephone: 919-541-7997; fax: 919-541-0947; e-mail: iccvam@niehs.nih.gov.

Request for Data

NICEATM welcomes data from completed studies using or evaluating ER and AR binding and/or transcriptional activation assays, and information about ongoing or planned studies using these methods. Information should address applicable aspects of the validation and regulatory acceptance criteria provided in the ICCVAM Report. Where possible, data and information should adhere to the guidance provided in NIH Publication 99-4496, Evaluation of the Validation Status of Toxicological Methods: General Guidelines for Submissions to ICCVAM (<http://iccvam.niehs.nih.gov/subguide.htm>). Both documents are available by request from NICEATM at the address provided above. Information and data should be submitted within 60 days of the publication date of this notice to ensure adequate consideration during preparation of the background review documents for the Panel. Correspondence should be sent by mail, fax or e-mail to Dr. William S. Stokes (contact information is provided in the previous section of this notice).

Background Information on ICCVAM and NICEATM

ICCVAM was established in 1997 to coordinate cross-agency issues relating to the validation, acceptance, and national/international harmonization of toxicological testing methods. Composed of representatives from fifteen Federal regulatory and research agencies that use or generate toxicological information, ICCVAM promotes the scientific validation and regulatory acceptance of toxicological test methods that enhance agencies' ability to make decisions on health risks, while refining, reducing, and replacing animal use wherever possible. ICCVAM was authorized as a permanent Federal committee on December 19, 2000 through passage of the ICCVAM Authorization Act of 2000 (Pub. L. 106-545, available at <http://iccvam.niehs.nih.gov/PL106545.htm>). NICEATM provides operational and scientific support for ICCVAM and ICCVAM-related activities. NICEATM and ICCVAM work collaboratively to develop, validate, and achieve regulatory acceptance of new and

improved test methods applicable to the needs of Federal agencies.
