## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Agency for Toxic Substances and Disease Registry

[Program Announcement 01041]

#### Exposure to Tremolite Asbestos in Vermiculite Ore Site-Specific Health Activities; Notice of Availability of Funds

##### A. Purpose

The Agency for Toxic Substances and  
 Disease Registry (ATSDR) announces

the availability of fiscal year (FY) 2001  
 funds for a cooperative agreement  
 program to conduct site-specific health  
 activities related to human exposure to  
 contaminated vermiculite ore at sites  
 around the United States that received  
 and/or processed ore from the mine in  
 Libby, Montana.

This program addresses the "Healthy  
 People 2010" focus area of  
 Environmental Health. The purpose of  
 the program is to assist public health  
 agencies in conducting site-specific  
 health activities related to human  
 exposure to contaminated vermiculite  
 ore at sites identified by the  
 Environmental Protection Agency (EPA)  
 as receiving and/or processing ore.

##### B. Eligible Applicants

Assistance will be provided only to  
 public health agencies of States or their  
 bona fide agents or instrumentalities.  
 State organizations, including State  
 universities, must establish that they  
 meet their respective State legislature's  
 definition of a State entity or political  
 subdivision to be considered an eligible  
 applicant.

**Note:** Public Law 104-65 states that an  
 organization described in section 501(c)(4) of  
 the Internal Revenue Code of 1986 that  
 engages in lobbying activities is not eligible  
 to receive Federal funds constituting an  
 award, grant, cooperative agreement,  
 contract, loan, or any other form.

##### C. Availability of Funds

Approximately \$1,000,000 is available  
 in FY 2001 to fund approximately 10  
 awards. It is expected that the average  
 award will range from a maximum of  
 \$10,000 for the conduct of health  
 statistics reviews to a maximum of  
 \$500,000 for epidemiologic  
 investigations. It is expected that the  
 awards will begin on or about either  
 July 1, 2001 and will be made for a 12-  
 month budget period within a project  
 period of up to 3 years. Funding  
 estimates may change.

Continuation awards within an  
 approved project period will be made  
 on the basis of satisfactory progress as  
 evidenced by required reports and the  
 availability of funds.

##### Use of Funds

Funds may be expended for  
 reasonable program purposes, such as  
 personnel, travel, supplies, and services.  
 Funds for contractual services may be  
 requested; however, the grantee, as the  
 direct and primary recipient of PHS  
 grant funds, must perform a substantive  
 role in carrying out project activities  
 and not merely serve as a conduit for an  
 award to another party or provide funds

to an ineligible party. Funds may not be  
 used to purchase equipment.

##### D. Program Requirements

In conducting activities to achieve the  
 purpose of this program, the recipient  
 will be responsible for activities under  
 1. Recipient Activities, and ATSDR will  
 be responsible for the activities listed  
 under 2. ATSDR Activities.

###### 1. Recipient Activities

a. For health statistics reviews:  
 Analyze existing health outcome data of  
 select asbestos-related diseases.  
 Mortality data will be the most readily  
 available data for asbestos-related  
 diseases such as mesothelioma, lung  
 cancer, and asbestosis, although cancer  
 registry data should be utilized where  
 available.

b. For epidemiologic investigations:  
 Develop a protocol and conduct the  
 recommended investigation. This  
 protocol will undergo scientific peer  
 review as required by ATSDR.

c. Provide proof by citing a State code  
 or regulation or other State  
 pronouncement under authority of law,  
 that medical information obtained  
 pursuant to the agreement will be  
 protected from disclosure when the  
 consent of the individual to release  
 identifying information is not obtained.

d. Develop a mechanism for ongoing  
 interaction with, and education of  
 affected community.

###### 2. ATSDR Activities

a. For the health statistics review:  
 Make available to states both technical  
 assistance and a standard protocol to  
 use to analyze existing health outcome  
 data of select asbestos-related diseases.

b. For epidemiologic investigations:  
 Provide consultation and assist in  
 monitoring the data; participate if  
 requested in the study analysis and  
 collaborate, if requested, in interpreting  
 the study findings.

c. Conduct technical and peer review.

##### E. Application Content

In a narrative form, the application  
 should include a discussion of areas  
 under the "Evaluation Criteria" section  
 of this announcement as they relate to  
 the proposed program. These criteria  
 serve as the basis for evaluating the  
 application; therefore, omissions or  
 incomplete information may affect the  
 rating of the application. This program  
 does not require in-kind support or  
 matching funds, however, the applicant  
 should describe any in-kind support in  
 the application.

The narrative should be no more than  
 30 pages, double-spaced, printed on  
 one-side, with 1" margins, and
