

sale of distributed generation products, and related businesses. The company is extremely knowledgeable about the utility business and the distribution of electricity and natural gas. It currently markets natural gas to buyers in Michigan (as well as in other states), and has an affiliate that is engaged in the distribution of microturbines and distributed generation equipment.

The Commission's goals in evaluating possible purchasers of divested assets is to maintain the competitive environment that existed prior to the acquisition. A proposed buyer must not itself present competitive problems. Exelon is a major energy company with substantial experience in natural gas, electricity, and the operation of utilities. The Commission believes that Exelon is well qualified to operate the divested assets and that divestiture to Exelon will not be anticompetitive.

By accepting the proposed consent order subject to final approval, the Commission anticipates that the competitive problems alleged in the compliant will be resolved.
