DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP01-70-000]

Columbia Gas Transmission Corporation; Notice of Intent To Prepare an Environmental Assessment for the Proposed West Lorain Project and Request for Comments on Environmental Issues

March 28, 2001.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the West Lorain Project involving construction and operation of facilities by Columbia Gas Transmission Corporation (Columbia) in Lorain and Holmes Counties, Ohio.¹ Columbia would increase the operating pressure of Columbia's existing 14-mile-long 20-inch diameter Line L-2542 from 440 pounds per square inch gauge (psig) to 630 psig and increase the operating pressure on 5.5 miles of Columbia's existing 12-inch diameter Line V from 500 psig to 550 psig.

Columbia would also abandon by replacement seven existing compressor units with a combined horsepower (hp) of 4,320, four gas coolers, and an existing building and appurtenances at its Wellington Compressor Station in Lorain County, Ohio and replace the abandoned compressors with two 4,500 hp electric driven compressor units. The EA will be used by the Commission in its decision-making process to determine whether the project is in the public convenience and necessity.

A fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" was attached to the project notice Columbia provided to landowners. This fact sheet addresses a number of typically asked questions, including how to participate in the Commission's proceedings. It is available for viewing on the FERC Internet website (www.ferc.fed.us).

Summary of the Proposed Project

Columbia is proposing the West Lorain Project to provide Northeast Ohio Natural Gas Corporation with up to 140,000 Dth/d (40 Mdth/d annually) for redelivery to FirstEnergy Trading Services, Inc. both wholly owned

¹ Columbia's application was filed with the Commission on January 23, 2001, under section 7 of the Natural Gas Act and Part 157 of the Commission's regulations.

subsidiaries of First Energy Corp. The additional volumes of natural gas would be provided to FirstEnergy Corp. to supply installing five new combustion turbines to be installed adjacent to two existing combustion turbines at FirstEnergy Corp.'s West Lorain Plant in Lorain County, Ohio.

No ground disturbing activities would be involved with the upgrading of these pipelines. All construction and ground disturbing activity would occur within the existing fenced area of the Wellington Compressor Station. The general location of Columbia's facilities is shown on the map attached as appendix 1.²

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us³ to discover and address concerns the public may have about proposals. We call this "scoping." The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission requests public comments on the scope of the issues it will address in the EA. All comments received are considered during the preparation of the EA. State and local government representatives are encouraged to notify their constituents of this proposed action and encourage them to comment on their areas of concern.

The EA will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

- Cultural resources
- Reliability and safety
- Air quality and noise
- Threatened and endangered species

We will evaluate possible alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas.
