

(#1189.09) is 20,802 hours per year at a cost of \$2,046,564. This is an increase of 691 hours from the previously approved ICR (#1189.06). This increase in burden occurred for several reasons.

Based on its consultations with the EPA regions and authorized States, EPA decreased some of its estimates of the number of notifications and other paperwork submitted under the exclusions/exemptions at 40 CFR 261.3 and 261.4. In addition, EPA decreased its estimate of the number of facilities reading the parts 260 and 261 regulations. In ICR #1189.06, EPA estimated that 330 facilities would read the regulations each year; this estimate included facilities actively preparing/submitting paperwork, as well as those keeping records in support of their exemptions/exclusions. In this ICR, EPA revised this assumption, assuming that only facilities actively preparing/submitting paperwork would read the regulations (126 facilities/yr); facilities that already have been granted an exclusion or exemption likely would not re-read the regulations for that waste. These decreased universe estimates led to a decrease in the burdens for the corresponding paperwork requirements.

However, the burden decrease described above was offset because EPA increased the number of delisting petitions (from 15 per year in ICR #1189.06 to 20 per year in this ICR) and petitions for a variance from a solid waste (from 15 per year in ICR #1189.06 to 30 per year in this ICR). Again, EPA ascertained these estimates based on consultations with EPA regions and authorized States. EPA estimates that operation and maintenance (O&M) costs will be incurred for various activities. The largest of these are for sampling wastes for a delisting petition (\$28,006), and preparing a statement as part of a rulemaking petition (\$9,479). Total O&M costs for this ICR are \$886,315 per year. EPA estimates that there will be no capital costs incurred. Finally, EPA estimates that the average annual burden per respondent ranges from 3.5 hours (preparation of a nonwastewater exemption) to 748 hours (preparation of a delisting petition).

4. Minimize the burden of the collections of information on those who are to respond, including through the use of appropriate automated or electronic collection technologies or other forms of information technology, e.g., permitting electronic submission of responses.

IV. What Information Collection Activity or ICR Does this Action Apply to?

EPA is seeking comments on the following ICR:

Title: Partial Updating of TSCA Inventory Data Base, Production and Site Reports.

ICR numbers: EPA ICR No. 1011.05, OMB No. 2070-0070.

ICR status: This ICR is currently scheduled to expire on June 30, 2001. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's information collections appear on the collection instruments or instructions, in the **Federal Register** notices for related rulemakings and ICR notices and, if the collection is contained in a regulation, in a table of OMB approval numbers in 40 CFR part 9.

Abstract: TSCA requires EPA to compile and keep current a complete list of chemical substances manufactured or processed in the United States. EPA updates this

inventory of chemicals every 4 years by requiring manufacturers, processors, and importers to provide production volume, plant site information, and site-limited status information. This information allows EPA to identify what chemicals are or are not currently in commerce and to take appropriate regulatory action as necessary. EPA also uses the information for screening chemicals for risks to human health or the environment, for priority-setting efforts, and for exposure estimates.

Responses to this collection of information are mandatory (see 40 CFR part 710). Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

V. What are EPA's Burden and Cost Estimates for this ICR?

Under the PRA, "burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal Agency. For this collection it includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized in this notice. The public burden for this collection of information is estimated to average 11.5 hour per response. The following is a summary of the estimates taken from the ICR:

Respondents/affected entities: Manufacturers and importers of chemical substances, mixtures, or categories.

Estimated total number of potential respondents: 3,000.

Frequency of response: Once every 4 years.

Estimated average number of responses for each respondent: 1.

Estimated total burden hours: 34,500 hours.

Estimated total burden costs: \$2,426,160.

VI. Are There Changes in the Estimates from the Last Approval?

There is no change in the total estimated respondent burden compared to that identified in the information collection request most recently approved by OMB.

VII. What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

EPA Analysis of the Impact of Wet Milling on the Cry9C Protein Content in Food

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This action is part of EPA's ongoing effort to make information publicly available and to seek public input on the potential health risks to humans from consuming foods made from StarLink corn. StarLink is a variety of Bt corn that has been genetically engineered to produce a protein, Cry9C, intended to be toxic to certain insect pests of corn. EPA is soliciting public comments on its analysis of the impact on wet milling on the Cry9C protein content in human food. The assessment concludes that use of StarLink corn in wet-milling results in no (or essentially no) residues of Cry9C protein in human food fractions - corn oil, corn syrup, alcohol, corn starch. This information would support a conclusion that there is no human health risk from eating such food fractions. This Notice also lists the specific experts in the processing of corn for food from whom EPA is specifically seeking comment. The Agency will take into consideration all comments received as it revises the wet milling assessment, and the Agency will announce the availability of the final assessment in the **Federal Register**. The Agency will also consider the final assessment as it makes its decision on the pending Aventis petition.

DATES: Comments, identified by docket control number OPP-00708, must be received on or before May 3, 2001.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I. of the **SUPPLEMENTARY INFORMATION**. To ensure proper receipt by EPA, it is imperative
