SUPPLEMENTARY INFORMATION:

Title: Prevention of Significant Deterioration and Non-attainment New Source Review, OMB Control Number 2060-0003, EPA ICR Number 1230.10, expiration date March 31, 2001. This is a request for extension of a currently approved collection.

Abstract: Part C of the Clean Air Act (Act)—“Prevention of Significant Deterioration,” and Part D—“Plan Requirements for Nonattainment Areas,” require all States to adopt preconstruction review programs for new or modified stationary sources of air pollution. Implementing regulations for State adoption of these two New Source Review (NSR) programs into a State Implementation Plan (SIP) are promulgated at 40 CFR 51.160 through 51.166 and appendix S to part 51. Federal permitting regulations are promulgated at 40 CFR 52.21 for PSD areas that are not covered by a SIP program.

In order to receive a construction permit for a major new source or major modification, the applicant must conduct the necessary research, perform the appropriate analyses and prepare the permit application with documentation to demonstrate that their project meets all applicable statutory and regulatory NSR requirements. Specific activities and requirements are listed and described in the Supporting Statement for the ICR.

Permitting agencies, either State, local or Federal, review the permit application to affirm the proposed source or modification will comply with the Act and applicable regulations. The permitting Agency then provides for public review of the proposed project and issues the permit based on its consideration of all technical factors and public input. The EPA, more broadly, reviews a fraction of the total applications and audits the State and local programs for their effectiveness. Consequently, information prepared and submitted by the source is essential for the source to receive a permit, and for Federal, State and local environmental agencies to adequately review the permit application and thereby properly administer and manage the NSR programs.

Information that is collected and handled according to EPA’s policies set forth in title 40, chapter 1, part 2, subpart B—Confidentiality of Business Information (see 40 CFR part 2). See also section 114(c) of the Act.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA’s regulations are listed in 40 CFR part 9 and 48 CFR chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on September 5, 2000 (65 FR 53716). One written comment was received. The comment is summarized in appendix H to the Supporting Statement for the ICR, and is responded to in the appropriate sections of the Supporting Statement for the ICR.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is broken down as follows:

Type of permit action	Major PSD	Major Part D	Minor
Number of sources	320	520	56,500

information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.
