

construction of approximately 167.1 miles of pipeline loops and laterals, 132,615 horsepower (hp) of additional compression at nine existing and three new compressor stations, and other associated auxiliary facilities in various locations in Mississippi, Alabama, and Florida.

In addition, FGT proposes to acquire from Koch Gateway Pipeline Company (KGPC) an interest in KGPC's Mobile Bay Lateral that would give FGT the rights to about 50 percent of the available capacity on that system. Concurrent with FGT's filing, KGPC filed an application in Docket No. CP00-39-000 for approval to abandon by sale to FGT the interest in its Mobile Bay Lateral. However, the environmental analysis of this action qualifies as a categorical exclusion and is not included in the EIS.
