BILLING CODE 6335-01-P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)).

Bureau: International Trade Administration.

Title: Request for Duty-Free Entry of Scientific Instruments or Apparatus.

Agency Form Number: ITA-338P.

OMB Number: 0625-0037.

Type of Request: Extension-Regular Submission.

Burden: 100 hours.

Number of Respondents: 50.

Avg. Hours Per Response: 2 hours.

Needs and Uses: The Departments of Commerce and Treasury are required to determine whether nonprofit institutions established for scientific or educational purposes are entitled to duty-free entry under the Florence Agreement of certain scientific instruments they import. Form ITA-338P enables (1) Treasury to determine whether the statutory eligibility requirements for the institution and the instrument are fulfilled, and (2) Commerce to make a comparison and finding as to the scientific equivalency of comparable instruments being manufactured in the United States. Without the collection of the information, Treasury and Commerce would not have the necessary information to carry out the responsibilities of determining eligibility for duty-free entry assigned by law.

Affected Public: State or local governments; Federal agencies; nonprofit institutions.

Frequency: On Occasion.

Respondent's Obligation: Required to obtain or retain a benefit, voluntary.

OMB Desk Officer: David Rostker, (202) 395-7340.

Copies of the above information collection proposal can be obtained by calling or writing Madeleine Clayton, Departmental Paperwork Clearance Officer, (202) 482-3129, Department of Commerce, Room 6086, 14th and Constitution, NW., Washington, DC 20230; or via the Internet at mclayton@doc.gov.

Written comments and recommendations for the proposed information collection should be sent to David Rostker, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, DC 20503 within 30 days of the publication of this notice in the **Federal Register**.

Dated: April 6, 2001.

Madeleine Clayton,

*Departmental Paperwork Clearance Officer,
Office of the Chief Information Officer.*

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: Feasibility Study for Conducting the American Community Survey in Puerto Rico.

Form Number(s): ACS-1(PR).

Agency Approval Number: None.

Type of Request: New collection.

Burden: 6,333 hours.

Number of Respondents: 10,000.

Avg Hours Per Response: 38 minutes.

Needs and Uses: The Census Bureau is developing a methodology to collect and update every year demographic, social, economic, and housing data that is essentially the same as the "long-form" data that the Census Bureau traditionally has collected once a decade as part of the decennial census. Since the Census Bureau collects the long-form data only once every 10 years, the data become out of date over the course of the decade. To provide more timely data, the Census Bureau has been developing an alternative called Continuous Measurement (CM). CM is a re-engineering effort that blends the strength of small area estimation with the high quality of current surveys. CM

will provide current data throughout the decade for small areas and small subpopulations. CM would also provide a mechanism for identifying and sampling these types of groups for future surveys providing a great advantage to the federal statistical system. The American Community Survey is the survey the Census Bureau uses for the CM program. The current plans for CM call for putting the American Community Survey in place with a new sample of households every month in every county in the United States and in Puerto Rico starting in 2003. Collecting these data from a new sample of households every month will not only provide more timely data, but will lessen respondent burden in the decennial census.

In preparation for the American Community Survey in Puerto Rico in 2003, the Census Bureau will conduct a feasibility study to assess the operational implications of using the American Community Survey data collection methods in Puerto Rico. The current design of the American Community Survey relies on three methods of data collection: mailout/mailback, computer-assisted telephone interviewing (CATI), and computer-assisted personal interviewing (CAPI). We will mail the survey to selected sample households in Puerto Rico. We will use CATI to conduct telephone interviews for all households that do not respond by mail and for which we are able to obtain telephone numbers. We will not use CAPI in Puerto Rico during this feasibility study. We will take advantage of personal visit methods used in Puerto Rico during Census 2000. The primary need for the feasibility study is to determine whether the current data collection procedures used stateside are appropriate for use in Puerto Rico.

Affected Public: Individuals or households.

Frequency: One time.

Respondent's Obligation: Mandatory.

Legal Authority: Title 13 U.S.C., Section 182.

OMB Desk Officer: Susan Schechter, (202) 395-5103.

Copies of the above information collection proposal can be obtained by calling or writing Madeleine Clayton, Departmental Paperwork Clearance Officer, (202) 482-3129, Department of Commerce, room 6086, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at mclayton@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this

notice to Susan Schechter, OMB Desk Officer, room 10201, New Executive Office Building, Washington, DC 20503.

Dated: April 6, 2001.

Circular Welded Non-Alloy Steel Pipe from the Republic of Korea; Final Results of Antidumping Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative review of circular welded non-alloy steel pipe from the Republic of Korea.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping duty order on circular welded non-alloy steel pipe from the Republic of Korea. This review covers imports of subject merchandise from three producers/exporters. We have determined that sales have been made below normal value during the review period of November 1, 1998, through October 31, 1999.

Based on our review of comments received, we have made certain changes in the margin calculation for all of the reviewed companies. Consequently, the final results differ from the preliminary results. The final weighted-average dumping margins for these firms are listed below in the section entitled "Final Results of the Review." Based on these final results of review, we will instruct the Customs Service to assess antidumping duties based on the difference between the export price and normal value on all appropriate entries.

EFFECTIVE DATE: April 11, 2001.

FOR FURTHER INFORMATION CONTACT: Gregory Campbell or Suresh Maniam, Import Administration, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 482-2239 or 482-0176, respectively.

SUPPLEMENTARY INFORMATION:

The Applicable Statute

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the "Act"), are references to

the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act ("URAA"). In addition, unless otherwise indicated, all citations to the Department of Commerce's ("Department's") regulations are to 19 CFR Part 351 (2000).

Background

The period of review ("POR") is November 1, 1998, through October 31, 1999. This review covers the following exporters (referred to collectively as "the respondents"): Hyundai Pipe Co., Ltd. ("HDP"),¹ SeAH Steel Corporation ("SeAH") and Shinho Steel Co., Ltd. ("Shinho").

On December 6, 2000, the Department published *Circular Welded Non-Alloy Steel Pipe from the Republic of Korea; Preliminary Results and Rescission in Part of Antidumping Administrative Review*, 65 FR 73218 (December 6, 2000) ("Preliminary Results"), and invited parties to comment on our *Preliminary Results*. The domestic interested parties, Allied Tube and Conduit Corp. and Wheatland Tube Co., and the respondents submitted case briefs on January 19, 2001, and rebuttal briefs on January 26, 2001. At the request of certain interested parties, we held a public hearing on March 1, 2001.

The Department has conducted this administrative review in accordance with section 751 of the Act.

Scope of Review

The merchandise subject to this review is circular welded non-alloy steel pipe and tube, of circular cross-section, not more than 406.4mm (16 inches) in outside diameter, regardless of wall thickness, surface finish (black, galvanized, or painted), or end finish (plain end, beveled end, threaded, or threaded and coupled). These pipes and tubes are generally known as standard pipes and tubes, and are intended for the low-pressure conveyance of water, steam, natural gas, air, and other liquids and gases in plumbing and heating systems, air-conditioning units, automatic sprinkler systems, and other

¹ In a letter dated January 5, 2001, HDP informed the Department that its corporate name would change to Hyundai Steel Company effective February 1, 2001. On February 27, 2001, the Department initiated a changed circumstances review to determine whether entries naming "Hyundai Hysco" as manufacturer or exporter should receive the cash deposit rate currently applied to HDP. *Certain Circular Welded Non-Alloy Steel Pipe from the Republic of Korea; Initiation of Changed Circumstances Antidumping Duty Administrative Review*, 66 FR 12460 (February 27, 2001). Pending a final determination in that changed circumstances review, we will continue to refer to the respondent in the instant review as HDP.

related uses. Standard pipe may also be used for light load-bearing applications, such as for fence tubing, and as structural pipe tubing used for framing and as support members for reconstruction or load-bearing purposes in the construction, shipbuilding, trucking, farm equipment, and other related industries. Unfinished conduit pipe is also included in this order.

All carbon-steel pipes and tubes within the physical description outlined above are included within the scope of this review except line pipe, oil-country tubular goods, boiler tubing, mechanical tubing, pipe and tube hollows for redraws, finished scaffolding, and finished conduit. In accordance with the Department's *Final Negative Determination of Scope Inquiry on Certain Circular Welded Non-Alloy Steel Pipe and Tube from Brazil, the Republic of Korea, Mexico, and Venezuela* (61 FR 11608, March 21, 1996), pipe certified to the API 5L line-pipe specification and pipe certified to both the API 5L line-pipe specifications and the less-stringent ASTM A-53 standard-pipe specifications, which falls within the physical parameters as outlined above, and entered as line pipe of a kind used for oil and gas pipelines is outside of the scope of the antidumping duty order.

Imports of these products are currently classifiable under the following Harmonized Tariff Schedule of the United States (HTSUS) subheadings: 7306.30.10.00, 7306.30.50.25, 7306.30.50.32, 7306.30.50.40, 7306.30.50.55, 7306.30.50.85, and 7306.30.50.90. Although the HTSUS subheadings are provided for convenience and customs, the written description of the scope of this proceeding is dispositive.

Product Comparisons

We compared the products sold by the respondents in the comparison market to sales that entered the United States during the POR using the methodology described in the *Preliminary Results*, with the following exception:

At the *Preliminary Results*, we included specification as a matching criterion for determining similar products for Shinho and SeAH. Consistent with our methodology in prior reviews, and in light of the lack of evidence that specification captures important differences in physical characteristics not reflected in other matching criteria, we have revised Shinho's and SeAH's margin calculations by removing specification as one of the matching criteria for similar matches. We note that HDP's
