

generally restricted to one .edu registration. Network Solutions currently provides registry/registrar services for the .edu domain names pursuant to Cooperative Agreement NCR-9218742 with the Department. The cooperative agreement will be made exclusively with EDUCAUSE. No other administering organization is being solicited with this notice. EDUCAUSE has the requisite technical and organizational capability as well as the educational community support to appropriately administer .edu. EDUCAUSE is a non-profit organization that emerged from the consolidation of two prominent higher education technology associations—CAUSE and Educom—since 1964. As an association with over 1,800 college and university members, it has represented the developers of the campus, regional, and national networking for higher education. EDUCAUSE currently operates an extensive web-based information system for external and internal communications with members of the public. One of EDUCAUSE's primary purposes is improving and transforming the use of information technology resources across college and university campuses. EDUCAUSE is uniquely qualified and best able to administer the .edu domain name space because of the following factors:

- EDUCAUSE is a non-profit association that advocates the development and management of networking for higher education and has widespread community respect on issues of Internet policy and technology. It represents information technology issues for higher education.

- With membership of over 1,800 higher educational institutions, EDUCAUSE has the support of significantly interested parties to implement the policy and be the technical administrator of the .edu domain. Specifically, EDUCAUSE's proposal to administer the .edu domain name space has the support of the American Council on Education, Association of American Universities, National Association of State Universities and Land Grant Colleges, American Association of State Colleges and Universities, Council of Independent Colleges, and the American Association of Community Colleges. EDUCAUSE is committed to and has demonstrated that it will represent the interests of .edu stakeholders while administering .edu through a transparent and open policy development process.

- EDUCAUSE has a unique background in higher education institutional technology, resources and

networking, and is technically capable of managing the .edu domain services ensuring continued stability of the .edu domain name space.

This cooperative agreement will be awarded for a 5-year period to be renewed indefinitely upon satisfactory performance. The cooperative agreement will be at no cost to the Federal government, and EDUCAUSE will only be able to recover its cost of administering the .edu domain services. Continuation awards within the project period will be made on the basis of satisfactory progress.

SUPPLEMENTARY INFORMATION:

I. Abstract

The United States Patent and Trademark Office (USPTO), together with the Secretary of Health and Human Services and the Department of Agriculture, administers the Federal Food, Drug and Cosmetic Act, 35 U.S.C. 156. This Act permits the USPTO to restore the patent term lost due to certain types of regulatory review by the Federal Food and Drug Administration or the Department of Agriculture. Only patents for drug products, medical devices, food additives, and color additives are eligible for extension. The maximum length that a patent may be extended (the maximum of patent term that may be restored) is five years.

Under 35 U.S.C. 156(d), an application for patent term extension must identify the approved product, the patent to be extended, the claims of the patent that claim the approved product, a method of use of the approved product, or a method of manufacturing the approved product. In addition, the application for patent term extension must provide a brief description of the activities undertaken by the applicant during the regulatory review period with respect to the approved product and the significant dates of these activities.

The statute (35 U.S.C. 156) requires the USPTO to extend the term of various patents past their original expiration dates, to grant interim extensions, to review applications for patent term extension and final eligibility decisions, to obtain additional information from the public that might influence the extension of the patent term, and to withdraw an application for a patent term extension.

The USPTO administers 35 U.S.C. 156 through 37 CFR 1.705-1.791. These rules permit the public to submit applications to the USPTO to extend the term of a patent past its original expiration date; to petition for reviews of informal extensions of applications, final eligibility decisions, and interim extensions; and to withdraw an application requesting a patent term extension after it is submitted.

The term of a patent which claims a product, a method of using a product, or a method of manufacturing a product shall be extended if the term of the patent has not expired before an application is submitted. The Federal

Food, Drug and Cosmetic Act requires that an application for patent term extension be filed with the USPTO within 60 days of a product (approved product) that was subject to regulatory review receiving permission for commercial marketing or use from the Federal Food and Drug Administration or the Department of Agriculture.

Under 35 U.S.C. 156(e), an interim extension may be granted if the term of a patent for which an application for patent term extension has been submitted under 35 U.S.C. 156(d), and which is eligible for extension, would expire before a certificate of extension is issued.

The patent term provisions of 35 U.S.C. 154(b), as amended by Title IV, subtitle D of the "Intellectual Property and Communications Omnibus Reform Act of 1999," requires the USPTO to notify the applicant of the patent term adjustment in the notice of allowance, and gives the applicant an opportunity to request reconsideration of the USPTO's patent term adjustment determination and to request reinstatement of a reduction in patent term adjustment.

The information supplied to the USPTO by an applicant requesting reconsideration of a USPTO patent term adjustment determination under 35 U.S.C. 154(b) is used by the USPTO to determine whether the USPTO's determination of patent term adjustment under 35 U.S.C. 154(b) is correct, and to determine whether the applicant is

entitled to reinstatement of reduced patent term adjustment.

The subsequent application for interim extension under 37 CFR 1.790 is part of the initial application for interim extension and has been reported as such in previous submissions of this collection. Because we are now reporting filing fees as part of the nonhour respondent cost burden, it became necessary to separate out this requirement as the filing fees are different for the two requirements.

The information supplied to the USPTO by an applicant seeking a patent term extension under 35 U.S.C. 156 and a patent term adjustment under 35 U.S.C. 154(b) is used by the USPTO, the Department of Health and Human Services, and the Department of Agriculture to determine the eligibility of a patent for extension and to determine the period of any such extension.

II. Method of Collection

By mail, facsimile, or hand carried to the USPTO when the applicant or agent files an application for a patent term extension with the USPTO, submits papers during the prosecution of the application, files a Petition for Reconsideration of Patent Term Adjustment Determination, files a Petition for Reinstatement of Patent Term Adjustment, or related papers during processing of a patent application.
