

4. *How often the collection is required:* On occasion.

5. *Who will be required or asked to report:* Holders of operating licenses for commercial nuclear power plants.

6. *An estimate of the number of responses:* 1130 annually.

7. *The estimated number of annual respondents:* 104.

8. *An estimate of the total number of hours needed annually to complete the requirement or request:* 56,500.

9. *An indication of whether Section 3507(d), Pub. L. 104-13 applies:* Not applicable.

10. *Abstract:* With NRC Forms 366, 366A, and 366B, the NRC collects reports of the types of reactor events and problems that are believed to be significant and useful to the NRC in its efforts to identify and resolve threats to public safety. They are designed to provide the information necessary for engineering studies of operational anomalies and trends and patterns analysis of operational occurrences. The same information can be used for other analytic procedures that will aid in identifying accident precursors.

A copy of the final supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O-1 F23, Rockville, MD 20852. OMB clearance requests are available at the NRC worldwide web site: <http://www.nrc.gov/NRC/PUBLIC/OMB/index.html>. The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions should be directed to the OMB reviewer listed below by June 4, 2001. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given to comments received after this date. Amy Farrell, Office of Information and Regulatory Affairs (3150-0104), NEOB-10202, Office of Management and Budget, Washington, DC 20503.

Comments can also be submitted by telephone at (202) 395-7318.

The NRC Clearance Officer is Brenda Jo. Shelton, 301-415-7233.

Dated at Rockville, Maryland, this 27th day of April 2001.

For the Nuclear Regulatory Commission.

**Beth St. Mary,**

*Acting NRC Clearance Officer, Office of the Chief Information Officer.*

## NUCLEAR REGULATORY COMMISSION

[Docket No. 50-313]

### Entergy Operations, Inc., Arkansas Nuclear One, Unit 1, Notice of Availability of the Final Supplement 3 to the Generic Environmental Impact Statement Regarding the License Renewal of Arkansas Nuclear One, Unit 1

Notice is hereby given that the U. S. Nuclear Regulatory Commission (the Commission) has published a final plant-specific Supplement 3 to the Generic Environmental Impact Statement (GEIS), NUREG-1437, regarding the renewal of operating license DPR-51 for an additional 20 years of operation at Arkansas Nuclear One, Unit 1 (ANO-1). ANO-1 is located in Pope County, Arkansas. Possible alternatives to the proposed action (license renewal) include no action and reasonable alternative energy sources.

In Section 9.3 of the report, the staff concludes:

The staff recommends that the Commission determine that the adverse environmental impacts of license renewal for ANO-1 are not so great that preserving the option of license renewal for energy planning decisionmakers would be unreasonable. This recommendation is based on (1) the analysis and findings in the Generic Environmental Impact Statement for License Renewal of Nuclear Power Plants, NUREG-1437; (2) the Entergy ER [Environmental Report]; (3) consultation with other Federal, State, and local agencies; (4) the staff's own independent review; and (5) the staff's consideration of public comments.

The final Supplement 3 to the GEIS is available electronically for public inspection in the NRC Public Document Room located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland, or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/NRC/ADAMS/index.html> (the Public Electronic Reading Room).

**FOR FURTHER INFORMATION, CONTACT:** Mr. Thomas J. Kenyon, Generic Issues, Environmental, Financial, and Rulemaking Branch, Division of Regulatory Improvement Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Mr. Kenyon may be contacted at (301) 415-1120 or by writing to: Thomas J. Kenyon, U.S. Nuclear Regulatory Commission, MS 0-11 F1, Washington, DC 20555.

Dated at Rockville, Maryland, this 5th day of April, 2001.

For the Nuclear Regulatory Commission.

**David B. Matthews,**

*Director, Division of Regulatory Improvement Programs, Office of Nuclear Reactor Regulation.*

## NUCLEAR REGULATORY COMMISSION

### Meeting Concerning the Revision of the Oversight Program for Nuclear Fuel Cycle Facilities

**AGENCY:** Nuclear Regulatory Commission (NRC).

**ACTION:** Notice of public meeting.

**SUMMARY:** NRC will hold a public meeting at the Information Age Park Resource Center at 2000 McCracken Boulevard, Paducah, Kentucky, to provide the local public, facility employees, citizens' groups, and local officials with information about, and an opportunity to provide views on, how the NRC plans to revise and improve its oversight program for nuclear fuel cycle facilities. The oversight program applies to commercial nuclear fuel cycle facilities regulated under 10 CFR parts 40, 70, and 76. The facilities currently include gaseous diffusion plants, highly enriched uranium fuel fabrication facilities (one of which is NFS), low-enriched uranium fuel fabrication facilities, and a uranium hexafluoride (UF<sub>6</sub>) production facility. These facilities possess large quantities of materials that are potentially hazardous (*i.e.*, radioactive, toxic, and/or flammable) to the workers, public, and environment. Also, some of the facilities possess information and material important to national security. In this area, the NRC regulates both the Paducah Gaseous Diffusion Plant operated by the United States Enrichment Corporation, and the Honeywell Specialty Chemicals uranium conversion facility in Metropolis, Illinois.

The goal of this revision project is to have an oversight program that: (1) provides earlier and more objective indications of facility performance in the areas of safety and national security, (2) increases stakeholder confidence in the NRC, and (3) increases regulatory effectiveness, efficiency, and realism. To this end, the NRC is striving to make the oversight program more risk-informed and performance-based. The oversight revision project is described in SECY-99-188, "Evaluation and Proposed Revision of the Nuclear Fuel Cycle Facility Oversight Program Nuclear Fuel
