SUPPLEMENTARY INFORMATION: This notice is relevant to the Middle Columbia River Steelhead (Oncorhynchus mykiss) Evolutionarily Significant Unit (ESU).

Background

ODFW has submitted to NMFS four FMEPs: (1) Walla Walla River Summer Steelhead and Trout Fisheries, (2) Umatilla River Summer Steelhead, Trout and Warmwater Fisheries, (3) John Day River Steelhead, Trout and Warmwater Fisheries, and (4) Deschutes River, Small Columbia Tributaries: Fifteenmile, Mill and Chenoweth Creeks Summer Steelhead, Trout and Warmwater Fisheries. These FMEPs are for inland recreational fisheries potentially affecting listed adult and juvenile MCR ESU steelhead. These include fisheries occurring in the Oregon portion of the Walla Walla River, the Umatilla River, the John Day River, the Deschutes River and in the smaller tributaries to the Columbia River in Oregon between the Hood River and the Deschutes River. The objective of these FMEPs is to harvest known, hatchery-origin steelhead and other fish species in a manner that does not jeopardize the survival and recovery of the MCR steelhead ESU. All fisheries included in these FMEPs will be managed such that only adult hatchery-origin steelhead that are adipose fin clipped may be retained. Impacts levels to listed MCR steelhead are specified in the FMEPs. Population viability analysis and risk assessments in the FMEPs indicate the extinction risk for listed steelhead is low. A variety of monitoring and evaluation tasks are specified in the FMEPs to assess the conservation of species listed as threatened. The ESA salmon and steelhead 4(d) rule (65 FR 42422, July 10, 2000) specifies categories of activities that contribute to the conservation of listed salmonids and sets out the criteria for such activities. The rule further provides that the prohibitions of paragraph (a) of the rule do not apply to activities associated with fishery harvest provided that an FMEP has been approved by NMFS to be in accordance with the salmon and steelhead ESA 4(d) rule (65 FR 42422, July 10, 2000).

Margaret Lorenz,
Acting Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 042501H]

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability and request for comment.

SUMMARY: Notice is hereby given that the Oregon Department of Fish and Wildlife (ODFW) has submitted two Fisheries Management and Evaluation Plans (FMEP) and the Idaho Department of Fish and Game (IDFG) has submitted a FMEP pursuant to the protective regulations promulgated for the Snake River (SR) steelhead under the Endangered Species Act (ESA). The FMEP specifies the future management of inland recreational fisheries potentially affecting the SR steelhead. This document serves to notify the public of the availability of the FMEPs for review and comment before a final approval or disapproval is made by NMFS.

DATES: Written comments on the draft FMEPs must be received at the appropriate address or fax number (see ADDRESSES) no later than 5 p.m. Pacific standard time on June 4, 2001.

ADDRESSES: Written comments and requests for copies of the draft FMEPs should be addressed to Richard Turner, Sustainable Fisheries Division, Hatchery and Inland Fisheries Branch, 525 N.E. Oregon Street, Suite 510, Portland, OR 97232 or faxed to 503–672–2737. The documents are also available on the Internet at http://www.nwr.noaa.gov/. Comments will not be accepted if submitted via e-mail or the Internet.

FOR FURTHER INFORMATION CONTACT: Debbie Martin, Boise, ID at phone number: 208–321–2959, or e-mail: debbie.martin@noaa.gov, or Richard Turner, Portland, OR at phone number 503–736–4737 or e-mail: rich.turner@noaa.gov regarding FMEPs.

SUPPLEMENTARY INFORMATION: This notice is relevant to the Snake River Basin Steelhead (Oncorhynchus mykiss) Evolutionarily Significant Unit (ESU).

Background

ODFW has submitted to NMFS an FMEP (Snake, Grande Ronde, and Imnaha Rivers Warmwater and Sturgeon Recreation Fisheries) for warmwater and sturgeon recreational fisheries potentially affecting listed adult and juvenile SR steelhead. This includes fisheries occurring in the Snake, Grande Ronde, and Imnaha River Basins. The objective of the FMEP is to provide a catch and release recreational fishing opportunity and harvest on introduced warmwater species in the Oregon portion of the Snake River, the Imnaha River, and the Grande Ronde River and tributaries in a manner that does not jeopardize the survival and recovery of the SR steelhead ESU. The FMEP focuses on the incidental mortality to SR steelhead from these fisheries. Impacts can result from the fisheries themselves and the potential impacts from the resident fish stocking program. Impact levels to listed steelhead populations in the ESU due to catch and release are specified in the FMEP. Population viability analyses and risk assessments in the FMEP indicate the extinction risk for listed steelhead under the proposed fishery impact levels to be low. A variety of monitoring
and evaluation tasks are specified in the FMEP to assess the abundance of steelhead, determine fishery effort and catch of steelhead, and angler compliance. A comprehensive review of the FMEP to evaluate whether the fisheries and listed steelhead populations are performing as expected will be done through regular creel surveys and angler contacts.

ODFW has submitted to NMFS an FMEP (Summer Steelhead and Trout Sport Fisheries in Grande Ronde Basin, Imnaha Basin, and Snake River) for recreational steelhead fisheries in the Grande Ronde, Imnaha, and Snake River Basins. The objective of this FMEP is to harvest known, hatchery-origin steelhead in a manner that does not jeopardize the survival and recovery of the SR steelhead ESU. Only adult hatchery-origin steelhead that are adipose fin clipped may be retained. Impact levels to listed steelhead populations in the ESU due to catch and release are specified in the FMEP. Population viability analyses and risk assessments in the FMEP indicate the extinction risk for listed steelhead under the proposed fishery impact levels to be low. A variety of monitoring and evaluation tasks are specified in the FMEP to assess the abundance of steelhead, determine fishery effort and catch of steelhead, and angler compliance. A comprehensive review of the FMEP to evaluate whether the fisheries and listed steelhead populations are performing as expected will be done through regular creel surveys and angler contacts.

As specified in the July 10, 2000 ESA 4(d) rule for salmon and steelhead (65 FR 42422), NMFS may approve an FMEP if it meets criteria set forth in § 223.203 (b)(4)(i)(A) through (l). Prior to final approval of an FMEP, NMFS must publish notification announcing its availability for public review and comment.

**Authority**

Under section 4 of the ESA, the Secretary of Commerce is required to adopt such regulations as he deems necessary and advisable for the conservation of species listed as threatened. The ESA salmon and steelhead 4(d) rule (65 FR 42422, July 10, 2000) specifies categories of activities that contribute to the conservation of listed salmonids and sets out the criteria for such activities. The rule further provides that the prohibitions of paragraph (a) of the rule do not apply to activities associated with fishery harvest provided that an FMEP has been approved by NMFS to be in accordance with the salmon and steelhead ESA 4(d) rule (65 FR 42422, July 10, 2000).

Dated: May 1, 2001.

Karen Salvini,
Acting Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

**SUPPLEMENTARY INFORMATION:** This notice is relevant to the Lower Columbia River Steelhead (Onchorhyncus mykiss) Evolutionarily Significant Unit (ESU).

**Background**

ODFW has submitted to NMFS two FMEPs: (1) Hood River Basin Steelhead, Trout and Warmwater Fisheries, and (2) Lower Columbia River ESU Steelhead, Trout, Sturgeon and Warmwater Fisheries, for inland recreational fisheries potentially affecting listed adult and juvenile LCR steelhead. These include fisheries occurring in the Hood River; the lower Willamette River and tributaries, including the Clackamas River; the Columbia River tributaries from below the Hood River downstream to the North end of Sauvie Island (near the town of St. Helens, OR); and the Sandy River. The objective of these FMEPs is to harvest known, hatchery-origin steelhead and other fish species in a manner that does not jeopardize the survival and recovery of the LCR steelhead ESU. All fisheries included in these FMEPs will be managed such that only hatchery-origin steelhead that are adipose fin clipped may be retained. Impact levels to listed LCR steelhead are specified in the FMEPs. Population viability analyses and risk assessments in the FMEP indicate the extinction risk for listed steelhead under the proposed fishery impact levels to be low. A variety of monitoring and evaluation tasks are specified in the FMEP to assess the abundance of steelhead, determine fishery effort and catch of steelhead, and angler compliance. A comprehensive review of the FMEP to evaluate whether the fisheries and listed steelhead populations are performing as expected will be done through regular creel surveys and angler contacts.

As specified in the July 10, 2000 ESA 4(d) rule for salmon and steelhead (65 FR 42422), NMFS may approve an FMEP if it meets criteria set forth in § 223.203 (b)(4)(i)(A) through (l). Prior to final approval of an FMEP, NMFS must publish notification announcing its availability for public review and comment.

**Authority**

Under section 4 of the ESA, the Secretary of Commerce is required to adopt such regulations as he deems necessary and advisable for the conservation of species listed as threatened. The ESA salmon and steelhead 4(d) rule (65 FR 42422, July 10, 2000) specifies categories of activities that contribute to the conservation of listed salmonids and sets out the criteria for such activities. The rule further provides that the prohibitions of paragraph (a) of the rule do not apply to activities associated with fishery harvest provided that an FMEP has been approved by NMFS to be in accordance with the salmon and steelhead ESA 4(d) rule (65 FR 42422, July 10, 2000).
