

to help identify issues that define the range of alternatives to be considered in the environmental impact statement. The range of alternatives considered in the DEIS will be based on the issues and specific decisions to be made. Written comments identifying issues for analysis and the range of alternatives are encouraged.

Estimated Dates for Filing

The draft EIS is expected to be filed with the EPA and to be available for public review in the summer of 2001. The comment period on the draft environmental impact statement will be 90 days from the date the EPA publishes the Notice of Availability in the **Federal Register**.

The final EIS is scheduled to be completed by February 2002. In the final EIS, the Forest Service is required to respond to comments received during the comment period that pertain to the environmental consequences discussed in the draft EIS and applicable laws, regulations, and policies considered in making a decision regarding the proposal.

The Reviewer's Obligation To Comment

The Forest Service believes it is important to give reviewers notice at this early stage of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions [*Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978)]. Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts [*Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980)]. Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 90-day comment period so that substantive comments and objects are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or

chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the Natural Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

DEPARTMENT OF AGRICULTURE

Rural Utilities Service

Rock Springs Generation, LLC; Notice of Finding of No Significant Impact

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice of finding of no significant impact.

SUMMARY: Notice is hereby given that the Rural Utilities Service (RUS) has made a finding of no significant impact with respect to the development of a 1,020-megawatt, natural gas fired combustion turbine electric generation plant in Cecil County, Maryland, by Old Dominion Electric Cooperative and Outwater Limited Funding Partnership. RUS may provide financing for the plant to an affiliate of Old Dominion Electric Cooperative to be known as the Rock Springs Generation, LLC. The specifics of that entity have yet to be determined. The plant will be named the Rock Springs Generation Station. Rock Springs Generation, LLC, will initially own one-half of the plant (510 megawatts).

FOR FURTHER INFORMATION CONTACT: Bob Quigel, Environmental Protection Specialist, Engineering and Environmental Staff, RUS, Stop 1571, 1400 Independence Avenue, SW., Washington, DC 20250-1571, telephone (202) 720-0468, e-mail at bquigel@rus.usda.gov.

SUPPLEMENTARY INFORMATION: The plant will be located in the community of Rock Springs, in northwestern Cecil County, Maryland, at the intersection of Old Mill Road and U.S. Route 222. The plant comprises six, 170-megawatt, gas-fired General Electric Frame 7FA combustion turbines. Each combustion turbine will have a 75-foot exhaust stack. The entire plant will be situated on approximately 26 acres of the 93-acre site. No major natural gas pipeline or

electric transmission line improvements will be needed beyond the proposed site boundaries. A short electric transmission line span will be constructed on a 5-acre parcel owned by Rock Springs Generation, LLC adjacent to the plant site to tie the plant to an existing 500 kilovolt transmission line located southwest of Old Mill Road.

Copies of the Finding of No Significant Impact are available from RUS at the address provided herein or from Mr. David Smith of Old Dominion Electric Cooperative, Insbrook Corporate Center, 4201 Dominion Boulevard; Glen Allen, Virginia 23060, telephone (804) 968-4045. Mr. Smith's e-mail address is dsmith@odec.com.

Dated: May 7, 2001.
