## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

#### Availability of Final Environmental Assessment of Take of Nestling American Peregrine Falcons in the Contiguous United States and Alaska for Falconry

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of availability.

**SUMMARY:** This notice is to announce the availability of a Final Environmental Assessment and a Finding of No Significant Impact of take of nestling American Peregrine Falcons (*Falco peregrinus anatum*) for falconry. We published the Draft Environmental Assessment in July 2000. We considered 352 comments in revising the assessment. After completion of the Final Environmental Assessment, we also produced a Finding of No Significant Impact for the action.

**ADDRESSES:** The documents are available from the Division of Migratory Bird Management, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, Room 634, Arlington, Virginia 22203-1610. They also are available on the Division of Migratory Bird Management web pages at <http://migratorybirds.fws.gov>.

**FOR FURTHER INFORMATION CONTACT:** Dr. George T. Allen, Division of Migratory Bird Management, U.S. Fish and Wildlife Service, at 703/358-1714.

**SUPPLEMENTARY INFORMATION:** In the draft Environmental Assessment, we considered six alternatives for take of nestling American peregrine falcons (*Falco peregrinus anatum*) in the western United States and Alaska. We received 352 electronic or written comment letters on the draft Environmental Assessment. Seventeen were from State or Federal agencies; 335 were from individuals and organizations. Fifteen agency responses favored allowing take of nestlings, and 2 responses were neutral. Of the individual and organization comments received, 21 opposed take of nestlings and 314 supported allowing take. We modified the Environmental Assessment to respond to concerns expressed by agencies, organizations, and individuals.

Having reviewed the comments on the draft, our preferred alternative is to allow take of up to 5% of the American peregrine falcon nestlings produced in the States west of 100° longitude, at the discretion of each State. These States include Alaska, Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming. We believe that a conservative level of take is appropriate for a species recently removed from the List of Endangered and Threatened Wildlife and Plants, and will have no discernible effect on the American peregrine falcon population in the western United States.

Dated: May 1, 2001.

**Marshall P. Jones, Jr.,**

*Acting Director, Fish and Wildlife Service.*

## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

#### Availability of a Habitat Conservation Plan and Receipt of an Application for an Incidental Take Permit for Deer Canyon Park Preserve in the City of Anaheim, Orange County, CA

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of availability.

**SUMMARY:** This notice advises the public that the City of Anaheim (Applicant) has applied to the Fish and Wildlife Service (Service) for an incidental take permit pursuant to section 10 (a) 1 (B) of the Endangered Species Act of 1973, as amended. The proposed permit would authorize the incidental take of the federally threatened coastal California gnatcatcher (*Poliophtila californica californica*) in Deer Canyon Park Preserve, in the City of Anaheim, Orange County, California. Take would occur through the permanent loss of 1.39 acres of coastal sage scrub habitat during facility development and fuel management. The Applicant seeks a permit for a period of 30 years.

We request comments from the public on the permit application, which is available for review. The application also includes a Habitat Conservation Plan (HCP). The HCP describes the proposed project and the measures that the Applicant would undertake to minimize and mitigate take of coastal California gnatcatcher. We also request comments on our preliminary determination that the HCP qualifies as a "low-effect" habitat conservation HCP, eligible for a categorical exclusion under the National Environmental Policy Act (NEPA).

**DATES:** Written comments should be received on or before June 11, 2001.

**ADDRESSES:** Written comments should be addressed to the Field Supervisor, Fish and Wildlife Service, 2730 Loker Avenue West, Carlsbad, California 92008. Comments may be sent by facsimile to telephone (760) 431-9624.

**FOR FURTHER INFORMATION CONTACT:** Karen Evans, Division Chief, Los Angeles and Orange Counties, at the above address or call (760) 431-9440.

**SUPPLEMENTARY INFORMATION:**

### Availability of Documents

You may obtain copies of the documents for review by calling the Service's Carlsbad Fish and Wildlife Office at the above referenced telephone number. Documents also are available for public inspection, by appointment, during normal business hours at the above address.

### Background

Section 9 of the Endangered Species Act, and its implementing regulations, prohibit the "take" of fish or wildlife species listed as endangered or threatened species. Take means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture or collect listed animal species, or attempt to engage in such conduct (16 U.S.C. 1538). Harm may include significant habitat modification where it actually kills or injures wildlife by significantly impairing essential behavioral patterns, including breeding, feeding, and sheltering [50 CFR 17.3(c)]. The Service may, under certain circumstances, issue permits to authorize take of endangered or threatened wildlife species incidental to, and not the purpose of, otherwise lawful activities. Regulations governing permits for endangered or threatened species are found at 50 CFR 17.22 and 17.32.

Under the proposed action, improvement of park facilities and fire management activities would directly impact the coastal California gnatcatcher by removing 1.39 acres of coastal sage scrub vegetation utilized by coastal California gnatcatchers. The Deer Canyon Park Preserve totals approximately 130 acres. The Applicant's HCP describes consideration of alternatives to the action and provisions for minimization and mitigation of impacts.

The HCP is further designed to assure that this action does not reduce the potential for survival and recovery of the coastal California gnatcatcher in the wild, as mandated by requirements of 50 CFR Part 17.22(b)(1)(iii).

The HCP proposes the following measures to minimize the impacts of the project on coastal California gnatcatchers: (1) Fuel modification and clearing of coastal sage scrub will be conducted outside the gnatcatcher breeding season. If it is necessary to clear coastal sage scrub during the breeding season, surveys by a qualified biologist must demonstrate that gnatcatchers are not nesting or rearing chicks in the affected area; (2) a project monitor will be present during all clearing activities to make sure no birds or nests are directly harmed or
