

Estimated Total Annual Burden Hours: 333.

Needs and Uses: Section 73.3550 provides that all requests for new or modified call signs be made via the on-line call sign reservation and authorization. The Commission uses an on-line system (FCC 380) for the electronic preparation and submission of requests for the reservation and authorization of new and modified call signs. Access to the call sign reservation and authorization system is made by broadcast licensees and permittees, or by persons acting on their behalf, via the Internet's World Wide Web. This on-line, electronic call sign system enables users to determine the availability and licensing status of call signs; to request an initial, or change an existing, call sign; and to determine and submit more easily the appropriate fee, if any. Section 74.783 also permits any low power television (LPTV) station to request a four-letter call sign after receiving its construction permit. All initial LPTV construction permits will continue to be issued with a five-character alpha-numeric LPTV call sign. LPTV licensees/permittees are also required to use the on-line call sign reservation and authorization system. The call sign reservation and authorization system is used by permittees, licensees or persons acting on their behalf to determine the availability of a call sign and to request an initial call sign or change an existing call sign.

Federal Communications Commission.
