## DEPARTMENT OF VETERANS AFFAIRS

### Privacy Act of 1974; System of Records

**AGENCY:** Department of Veterans Affairs (VA).

**ACTION:** Notice of Amendment of Systems of Records Notice "Healthcare Eligibility Records—VA".

**SUMMARY:** As required by the Privacy Act of 1974, 5 U.S.C. 552a(e), notice is hereby given that the Department of Veterans Affairs (VA) is amending the system of records currently entitled as "Healthcare Eligibility Records—VA" (89VA19) as established in **Federal Register** 59 FR 8677 dated 2/23/94 and amended in **Federal Register** 64 FR 13049 dated 3/16/99. VA is amending

the system by revising the System Location; Categories of Records in the System; Routine Use Disclosure Statements; and Policies and Practices for Storing, Retrieving, Accessing, Retaining and Disposing of Records in the System, including Storage, Retrieval and Safeguards. VA is republishing the system notice in its entirety at this time.

Title 38 U.S.C. Section 1705, requires the Veterans Health Administration (VHA) to establish a system of annual patient enrollment. VHA determined that the Health Eligibility Center (HEC) database would be expanded to serve as the central enrollment database, thereby adding veteran eligibility and enrollment information in the database. Veterans' eligibility and enrollment information maintained in this database is shared with VA health care facilities involved in the veterans' care. The National Enrollment Database (NED) located at VA's Austin Automation Center (AAC), Austin, Texas, supports the national enrollment system. The NED is populated via nightly batch updates from the HEC. The extracts do not contain federal tax information.

In an effort to facilitate patient education about VA enrollment, VHA established a call center operated by contractors. The HEC shares certain veteran data with the contractor, to facilitate the contractor's ability to accurately respond to veteran inquiries relating to enrollment and eligibility information, and to assist in fulfilling requests for enrollment-related materials (brochures, application forms, etc.). Specific data shared with the contractor include veterans' names, social security numbers, addresses, phone numbers, dates of birth, enrollment priority groups and primary health care facilities. The contractor asks the veteran caller for his or her social security number (SSN) and date of birth when it is necessary to transfer the call to a VA Medical Center or HEC for further assistance. SSN and Date of Birth information assists VA Medical Center and HEC staffs in locating the veteran's records. Other data elements provided to the contractor are utilized to assist in advising the veteran on enrollment-related matters and to mail enrollment information to the caller. Veterans also contact the call center to provide change of address information. Any updated demographic data obtained from the caller by the contractor is submitted to the HEC through electronic mail. Information is secured through use of a dedicated T-1 line, which contains a firewall to secure the data.
