SUPPLEMENTARY INFORMATION:

Title: Communicable Diseases in Horses.

OMB Number: 0579-0127.

Expiration Date of Approval: January 31, 2001.

Type of Request: Reinstatement of an expired information collection.

Abstract: The Animal and Plant Health Inspection Service regulates the interstate movement of horses that have tested positive for equine infectious anemia (EIA) in order to prevent the spread of this disease (9 CFR 75.4).

Enforcing these regulations requires us to engage in a number of information gathering activities that enable us to accurately identify and track EIA reactors as they move interstate.

Specifically, this regulatory program requires the use of an official EIA test, a certificate allowing the interstate movement of an EIA reactor, and identification of the reactor. The program also involves the services of accredited veterinarians, State veterinary officials, laboratory/diagnostic/research facility personnel, and stockyard personnel, all of whom must engage in various recordkeeping and information collection activities.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities in connection with our EIA program for 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning this information collection activity. These comments will help us:

(1) Evaluate whether the information collection is necessary for the proper performance of our agency's functions, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.0912 hours per response.

Respondents: State and Federal veterinarians, accredited veterinarians, laboratory/diagnostic/research facility personnel, stockyard personnel, animal owners, and exporters.

Estimated annual number of respondents: 10,053.

Estimated annual number of responses per respondent: 107.

Estimated annual number of responses: 1,075,003.
