**SUPPLEMENTARY INFORMATION:** The Department of Veterans Affairs awarded a five-year contract to the National Committee for Quality Assurance (NCQA) to conduct an accreditation program, the first of its kind, to help to ensure that VA medical centers are complying with VA and other applicable Federal regulations for the protection of human subjects of research. NCQA is a private, non-profit organization dedicated to improving health care quality, with 10 years of experience in accrediting and certifying health care programs. NCQA will partner with Medical Care Management Corporation (MCMC) to design the program and to recruit, credential and schedule surveyors. MCMC has established a large panel of experienced clinical researchers who evaluate the appropriateness of experimental treatments, conduct technology assessments and review research protocols.

VA conducts biomedical, health services, and rehabilitation research to improve the health care delivered to the Nation's veterans. The Office of Research and Development (ORD) has developed policies, consistent with the Common Rule and the Food and Drug Administration (FDA) regulations, to safeguard human subjects in research. Also, as part of its responsibilities in protecting human subjects, VA's Office of Research Compliance and Assurance (ORCA) collaborates with the Office of Research and Development in carrying out this accreditation contract, and will analyze trends from the accreditation reports for continuing quality improvement. The VA Human Research Protection Accreditation Program (VAHRPAP) will provide a routine external evaluation of compliance with VA and other Federal policies.
