

voltage circuits serving portable or mobile three-phase alternating current equipment; circuit breakers) to its Beulah Mine (I.D. No. 32-00043) located in Mercer County, Montana. The petitioner requests a modification of the standard to permit start-up of the electric water pumps in the pit area when there is undervoltage or loss of power to the pump box. The petitioner proposes to: (i) Use automatic resetting circuit breakers that meet the requirement of the existing standard and that would reset only after trips that are caused by undervoltage; (ii) have a qualified person record examinations and make records available for inspection upon request by interested parties; (iii) provide electrical training to all affected mining personnel before the system is put in operation, record this training and make it available for inspection at all times; (iv) obtain undervoltage release by the undervoltage unit and use a normal closed relay in combination with a capacitor trip unit to open the breaker; and (v) post visible signs at the pump controller and at the pumps, warning of automatic restart of the pumps. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard.

12. Excel Mining, LLC

[Docket No. M-2001-025-C]

Excel Mining, LLC, HC 67, Box 615, Pilgrim, Kentucky 41250 has filed a petition to modify the application of 30 CFR 75.503 (permissible electric face equipment; maintenance) and 30 CFR 18.41(f) (plug and receptacle-type connectors) to its Mine No. 2 (I.D. No. 15-09571) located in Martin County, Kentucky, and its Mine No. 3 (I.D. No. 15-08079) located in Pike County, Kentucky. The petitioner proposes to use a permanently installed locking screw threaded through a steel bracket or spring-loaded locking devices in lieu of padlocks on battery plugs for powering permissible underground mining equipment. This is to prevent the threaded rings securing the battery plugs to the battery receptacles from unintentional loosening. Warning tags stating "Do Not Disengage Plugs Under Load" will be placed on all battery connectors on the battery-powered equipment. The petitioner states that all personnel who operate and maintain the battery-powered mobile equipment would receive training before implementation of its alternative method. The petitioner asserts that the proposed alternative method would

provide at least the same measure of protection as the existing standard.

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

1. *Type of submission, new, revision, or extension:* Revision.

2. *The title of the information collection:* Proposed Rule, 10 CFR parts 51, 61, 70, 72, 73, 74, 75, 76, and 150, Material Control and Accounting Amendments.

3. *The form number if applicable:* DOE/NRC Form 742 and DOE/NRC Form 742C.

4. *How often the collection is required:* The material control and accounting plan is submitted on occasion (no new applicants are expected). Reports on excessive inventory differences are reportable on occurrence. DOE/NRC Forms 742 and 742C are submitted annually for most licensees and semiannually for 2 licensees.

5. *Who will be required or asked to report:* Applicants for and holders of specific NRC licenses to receive title to, own, acquire, deliver, receive, possess, use, or initially transfer special nuclear material.

6. *An estimate of the number of responses:* Reports of excessive inventory difference under Part 74—1 response; DOE/NRC Form 742—202 responses; DOE/NRC Form 742C—182 responses.

7. *The estimated number of annual respondents:* Part 74 reports of excessive inventory difference—1; DOE/NRC Form 742—200; DOE/NRC Form 742C—180.

10. *Abstract:* The Nuclear Regulatory Commission is proposing to amend its regulations in Parts 70, 72, and 74 that establish the requirements for material control and accounting of special nuclear material applicable to licensees who possess and use special nuclear material. The reporting requirements for submitting material balance reports (DOE/NRC Form 742) and inventory composition reports (DOE/NRC Form 742C) are being revised to reduce the

frequency and change the timing of the reports. The general MC&A requirements and the requirements for Category II facilities are being relocated from Part 70 to Part 74. The MC&A requirements for Category II facilities are also being revised to be more risk-informed. The information in the reports and records is used by the NRC staff to ensure that public health and safety of the public is protected and that licensee possession and use of special nuclear material is in compliance with license and regulatory requirements. The information collection requirements imposed on the licensee are those deemed necessary for the timely discovery of inadvertent losses of special nuclear material to the environment or the theft or diversion of special nuclear material by potentially hostile groups. Certain of the requirements are necessary to satisfy obligations of the United States under its agreements with the International Atomic Energy Agency.

Submit, by June 25, 2001, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the burden estimate accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the submittal may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O-1 F23, Rockville, MD 20852. NUCLEAR REGULATORY COMMISSION

[Docket No.: 070-3035]

Consideration of License Amendment Request for the Babcock and Wilcox Facility and Shallow Land Disposal Area in Parks Township, PA, and Opportunity for a Hearing

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of consideration of license amendment requests for the Babcock and Wilcox Facility and Shallow Land Disposal Area in Parks Township, Pennsylvania, and Opportunity for a Hearing.

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of a license amendment to Special Nuclear Material License No. SNM-2001 (SNM-2001) (the license), issued to Babcock and Wilcox Company, Pennsylvania Nuclear Service Operation, to authorize amending condition 14, "Schedule for Decommissioning Site", of its SNM-2001 License at its Shallow Land Disposal Area (SLDA) facility in Parks Township, Pennsylvania.

SLDA site is on the NRC's Site Decommissioning Management Plan and the site is being assessed by the U.S. Army Corps of Engineers (USACE) for possible remediation under the Formerly Utilized Sites Remedial Action Program (FUSRAP). SLDA has been designated as a FUSRAP site. USACE is responsible for administration and execution of FUSRAP.

The licensee has requested an Alternate Schedule for Decommissioning Plan (DP) submittal due to issues arising from USACE involvement at the SLDA site. The licensee's current DP submittal schedule for SLDA is in accordance with the conditions discussed in SNM-414 License.

On May 8, 2001, the licensee submitted a license amendment request proposing that the licensee will submit a site DP six months after the issuance of the Final USACE Preliminary
