They will discuss four alternatives identified by the Capacity Committee in 2000, as well as an additional alternative developed by the Groundfish Plan Development Team (PDT). The joint Committees will review these alternatives, identify possible revisions, and develop recommendations on which, if any, should be included as part of Amendment 13 to the Northeast Multispecies Fishery Management Plan. The Committees may also develop additional options for addressing latent effort, and may develop a schedule for addressing this issue and adopting any suggested management measures.

Although non-emergency issues not contained in this agenda may come before these groups for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.
