SUPPLEMENTARY INFORMATION:

I. Background

The Federal Mine Safety and Health Act of 1977 (Mine Act), recognizes that the role of education and training in the

improvement of miner health and safety is an important element of federal efforts to make the nation's mines safer places in which to work. Section 115(a) of the Mine Act states that "each operator of a coal or other mine shall have a health and safety program which shall be approved by the Secretary." Title 30, C.F.R. 48.3 and 48.23 specifically address the requirements for training plans. The standards are intended to ensure that miners will be effectively trained in matters affecting their health and safety, with the ultimate goal being the reduction of frequency and severity of the injuries in the nation's mines.

II. Desired Focus of Comments

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to Training Plans. MSHA is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request may be viewed on the Internet by accessing the MSHA Home Page (<http://www.msha.gov>) and selecting "Statutory and Regulatory Information" then "Paperwork Reduction Act submission (<http://www.msha.gov/regspwork.htm>)", or by contacting the employee listed above in the **FOR FURTHER INFORMATION CONTACT**.

III. Current Actions

Approved training plans are used to implement training programs for training new miners, training newly employed experienced miners, training miners for new tasks, annual refresher training, and hazard training. The plans are also used by MSHA to ensure that all miners are receiving the training

necessary to perform their jobs in the safest manner possible.
