

evaluation process, a Tribal organization may indicate to what extent it will share in the construction costs of its educational facilities replacement construction project through the use of non-Federal resources. To participate in the FY 2001 cost sharing program, a Tribe is required to contribute a tribal share equal to 50% of the total replacement school construction costs [(Pub. L. 106-291, Sec. 153(b)(3)(B)]. Congress identified Conehatta Elementary School of the Mississippi Band of Choctaw Indians as the first education facility to cost share in a Tribal school construction demonstration program [Senate Report 106-312, pg. 53; House Report 106-914, pg. 147; Public Law 106-291, Sec. 153].

The BIA will evaluate and rank applications for education facilities replacement construction projects through the use of narrative submitted by applicants, from data in the BIA's national Facilities Management Information System (FMIS), and from other BIA information sources.

BIA's Office of Indian Education Programs' Line Officers will receive training on the 2001 instructions and ranking criteria for all schools under their administrative jurisdictions and will provide technical assistance to the schools under their administrative jurisdictions. In addition to technical assistance available from the Bureau, applicants may use commercial service providers to prepare their applications. The Bureau can provide referrals, upon request, which the applicants may choose to contact independently.

The BIA will provide Bureau-funded schools with instructions and application forms. We will send all potential applicants the application forms and instructions by certified mail. Tribes and BIA-funded school boards will receive advance, written notice from Education Line Officers of replacement school construction application training session dates, times, and locations for Tribes and schools under their respective jurisdictions. The Education Line Officers will conduct training for applicants on how to complete their applications. Applications will be accepted beginning August 1, 2001, until August 21, 2001. We will use the criteria in the 2001 instructions to review and evaluate all applications that we receive on or before the deadline.

This Notice is published under authority delegated by the Secretary of the Interior to the Assistant Secretary for Indian Affairs in the Departmental Manual at 209 DM 8. 25 U.S.C. 2005(c) directed BIA to publish, in the **Federal Register**, the system used to determine

priorities for school construction projects and to submit a current priority ranking for school construction projects at the time any budget request is presented to Congress. The Conference Report for the FY 1992 Interior and Related Agencies Appropriation Act, House Report No. 256, 102d Cong., 1st Sess. 46 (1991), indicated that Congress wanted the Department to revise the priority ranking process for new school construction. The Conference Report said that BIA should emphasize tribal consultation and improve the objectivity of the ranking process, provide continuity to the priority ranking list, and provide procedures for handling emergency needs.

Dated: May 25, 2001.

OSM has submitted two requests to OMB to renew its approval of the collections of information contained in: State processes for designating areas unsuitable for surface coal mining operations, 30 CFR part 764; and Special permanent program performance standards—operations in alluvial valley floors, 30 CFR part 822. OSM is requesting a 3-year term of approval for each information collection activity.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for these collections of information are 1029-0030 for part 764, and 1029-0049 for Part 822.

As required under 5 CFR 1320.8(d), **Federal Register** notices soliciting comments on these collections of information was published on March 12, 2001 (66 FR 14420). No comments were received. The regulatory authority uses the information to identify, locate, compare and evaluate the area requested to be designated as unsuitable, or terminate the designation, for surface coal mining operations.

**Bureau Form Number:** None.

**Frequency of Collection:** Once.

**Description of Respondents:** The 4 individuals, groups or businesses who petition the States, and the 4 State regulatory authorities that must process the petitions.

Part 822 requires the permittee to install, maintain, and operate a monitoring system in order to provide specific protection for alluvial valley floors. This information is necessary to determine whether the unique hydrologic conditions of alluvial valley floors are protected according to the Act.

**Bureau Form Number:** None.
