

that the autologous donor should not donate in the future; and

(iii) The results of tests for evidence of infection due to communicable disease agent(s), that were a basis for deferral under § 610.41 of this chapter, including results of supplemental (i.e., additional, more specific) tests as required in § 610.40(e) of this chapter.

(2) You must make reasonable attempts to notify the autologous donor's referring physician within 8 weeks after determining that the autologous donor is deferred as described in paragraph (a) of this section. You must document that you have successfully notified the autologous donor's referring physician or when you are unsuccessful that you have made reasonable attempts to notify the physician.

Dated: June 1, 2001.

Bernard A. Schwetz,

Acting Principal Deputy Commissioner.

BILLING CODE 4160-01-F

DEPARTMENT OF DEFENSE

Department of the Air Force

32 CFR Part 989

RIN 0701-AA56

Environmental Impact Analysis Process (EIAP); Correction

AGENCY: Department of the Air Force, DoD.

ACTION: Final rule; correction.

SUMMARY: The Department of the Air Force published in the **Federal Register** of March 28, 2001, a document concerning correcting amendments. This document corrects the inadvertent change to correcting amendment 45.

DATES: Effective on July 11, 2001.

FOR FURTHER INFORMATION CONTACT: Mr. Jack Bush (HQ USAF/ILEB), 1260 Air Force Pentagon, Washington, DC 20330-1260, (703) 604-0553.

SUPPLEMENTARY INFORMATION: In 32 CFR part 989, FR Doc. 01-7671 published on March 28, 2001 (66 FR 16868) make the following correction. On page 16869, correcting amendment 45, Appendix C, paragraph A3.1.3, last sentence, correct "USAF/ILEVP" to read "HQ USAF/ILEVP."

Dated: May 31, 2001.

Janet A. Long,

Air Force Federal Register Liaison Officer.

BILLING CODE 5001-05-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[FRL-6995-2]

RIN 2060-AE56

Standards of Performance for Electric Utility Steam Generating Units for Which Construction is Commenced After September 18, 1978; Standards of Performance for Industrial-Commercial-Institutional Steam Generating Units

AGENCY: Environmental Protection Agency (EPA).

ACTION: Partial withdrawal of direct final rule.

SUMMARY: Due to relevant adverse comment, the EPA is withdrawing two provisions from the direct final rule published on April 10, 2001 for Subpart Da—Standards of Performance for Electric Utility Steam Generating Units for Which Construction is Commenced After September 18, 1978, and Subpart Db—Standards of Performance for Industrial-Commercial-Institutional Steam Generating Units (66 FR 18546). These provisions deal with the revised definition of "boiler operating day" and the data substitution requirement for missing data.

DATES: This rule is effective June 11, 2001. As of June 11, 2001, the EPA withdraws the revised definition of "boiler operating day" in 40 CFR § 60.41a and 60.46a(j)(2) published on April 10, 2001 (66 FR 18546). The remaining provisions published on April 10, 2001 will be effective June 11, 2001 as stated in the April 10, 2001 direct final rule. The addition of 40 CFR 60.46a(j)(2), which deletes the data substitution requirement for missing data, is effective June 11, 2001.

ADDRESSES: Docket number A-92-71, containing supporting information used in the development of this notice is available for public inspection and copying between 8:00 a.m. and 5:30 p.m., Monday through Friday (except for Federal holidays) at the following address: U.S. Environmental Protection Agency, Air and Radiation Docket and Information Center (6102), 401 M Street, SW, Washington, DC 20460, or by calling (202) 260-7548. A reasonable fee may be charged for copying docket materials.

FOR FURTHER INFORMATION CONTACT: Mr. James Eddinger, Combustion Group, Emission Standards Division (MD-13), Office of Air Quality Planning and Standards, U.S. EPA, Research Triangle

Park, NC 27711, telephone number (919) 541-5426, electronic mail address: eddinger.jim@epa.gov.

SUPPLEMENTARY INFORMATION: Because EPA received relevant adverse comment, we are withdrawing two of the provisions included in the direct final rule for compliance and monitoring requirements for duct burners used in combined cycle systems. We published the direct final rule (66 FR 18546) and a notice of proposed rulemaking (66 FR 18579) intended to amend the emissions monitoring and compliance provisions for duct burners contained in subparts Da and Db on April 10, 2001.

We stated in that **Federal Register** that if we received relevant adverse comment by May 10, 2001 on one or more distinct provisions of the direct final rule, we would publish a timely withdrawal of those distinct provisions in the **Federal Register**. We subsequently received relevant adverse comment on two of the provisions: the revised definition of "boiler operating day" in 40 CFR 60.41a and the data substitution requirement contained in 40 CFR 60.46a(j)(2).

The adverse comments stated that the revised definition of "boiler operating day" and the inclusion of the 40 CFR part 75 data substitution requirement are independent of the amendments addressing the compliance procedures for duct burners. The commenters stated that these provisions are inconsistent with existing subpart Da procedures and their potential impacts were not analyzed or discussed in the proposal. On reviewing the relevant adverse comments, we agreed with their conclusion that these provisions are inconsistent with existing provisions in subpart Da and independent of the provisions addressing the compliance procedures for duct burners. Section 60.47a(c)(2) states that, although 40 CFR part 75 monitors can be used for subpart Da compliance, 40 CFR part 75 missing data and bias adjustment procedures shall not be used. As for the revised definition of "boiler operating day," § 60.47a(f) requires data to be collected for at least 18 hours in a "boiler operating day." The proposed revised definition of a "boiler operating day" is inconsistent with this requirement. Therefore, we are withdrawing the revised definition of "boiler operating day" and § 60.46a(j)(2) which contained the requirement for substituting data under 40 CFR part 75.

Based on the adverse comment received, we are amending subpart Da to add a revised § 60.46a(j)(2) which will become effective on June 11, 2001 as

provided in the April 10, 2001 direct final rule (66 FR 18546), as appears at the end of this document. This revised § 60.46a(j)(2) differs from the § 60.46a(j)(2) that is being withdrawn from the direct final rule by the deletion of the following statement:

This includes data substituted according to 40 CFR 75.21(i) for invalid data and 40 CFR 75.30 for missing data or data adjusted for negative bias as required by 40 CFR 75.23(d).

Based on our review of the comments received, we will, therefore, not address the comments on the withdrawn provisions in a subsequent final action on the parallel proposal published at 66 FR 18579.

The provisions for which we did not receive relevant adverse comment, as well as the revised § 60.46a(j)(2), will become effective on June 11, 2001 as provided in the April 10, 2001 direct final rule (66 FR 18546).

Dated: June 5, 2001.

Robert D. Brenner,

Acting Assistant Administrator, Office of Air and Radiation.

For reasons set out in the preamble, title 40, chapter I, part 60 of the Code of Federal Regulations is amended as follows:

PART 60—[AMENDED]

1. The authority citation for part 60 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart Da—[Amended]

2. Section 60.46a is amended by adding paragraph (j)(2) to read as follows:

§ 60.46a Compliance provisions.

* * * * *

(j) * * *

(2) The owner or operator of an affected duct burner may elect to determine compliance by using the continuous emission monitoring system specified under § 60.47a for measuring NO_x and oxygen and meet the requirements of § 60.47a. Data from a CEMS certified (or recertified) according to the provisions of 40 CFR 75.20, meeting the QA and QC requirements of 40 CFR 75.21, and validated according to 40 CFR 75.23 may be used. The sampling site shall be located at the outlet from the steam generating unit. The NO_x emission rate at the outlet from the steam generating unit shall constitute the NO_x emission rate from

the duct burner of the combined cycle system.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Parts 431, 433, 435, 436, and 457

[HCFA-2006-F3]

RIN 0938-AI28

State Child Health; Implementing Regulations for the State Children's Health Insurance Program: Further Delay of Effective Date

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule; Further delay of effective date.

SUMMARY: This final rule temporarily delays the effective date of the final rule entitled "State Child Health; Implementing Regulations for the State Children's Health Insurance Program" published in the January 11, 2001 **Federal Register** (66 FR 2490). That final rule implements provisions of the Balanced Budget Act of 1997 (BBA) related to the State Children's Health Insurance Program (SCHIP). Specifically, the final rule includes provisions related to State plan requirements and plan administration, coverage and benefits, eligibility and enrollment, enrollee financial responsibility, strategic planning, substitution of coverage, program integrity, certain allowable waivers, and applicant and enrollee protections. It also implements the provisions of sections 4911 and 4912 of the BBA, which amended title XIX of the Social Security Act to expand State options for coverage of children under the Medicaid program. In addition, the final rule makes technical corrections to subparts B and F of 42 CFR part 457.

On February 26, 2001, we initially delayed the effective date of the final rule from April 11, 2001 until June 11, 2001. The temporary 60-day delay in the effective date was necessary to give Department officials the opportunity for further review and consideration of new regulations.

We have decided to further delay the effective date of the final rule because we have determined that a short additional period is required to properly consider and promulgate necessary

revisions. To the extent that 5 U.S.C. section 553 applies to this action, this action is exempt from notice and comment because it constitutes a rule of procedure under 5 U.S.C. section 553(b) (A). Alternatively, HCFA's delay of implementation of this rule without opportunity for public comment, effective immediately upon publication today in the **Federal Register**, is based on the good cause exceptions in 5 U.S.C. sections 553(b)(B) and 553(d)(3), in that seeking public comment is impracticable, unnecessary, and contrary to the public interest. Given the imminence of the effective date, seeking prior public comment on this temporary delay would have been impractical because the time available before the effective date is too short for meaningful comment. Moreover, to the extent that seeking public comment would preclude this delay, it would be contrary to the public interest in the orderly promulgation and implementation of regulations in light of the development of necessary revisions. The immediate delay is necessary to prevent application of inconsistent standards while we issue the necessary revisions.

DATES: The effective date of the final rule amending 42 CFR parts 431, 433, 435, 436 and 457, published in the **Federal Register** on January 11, 2001, at 66 FR 2490 and delayed on February 26, 2001 at 66 FR 11547 until June 11, 2001 is further delayed until June 25, 2001.
