

programs: Executive Order 11246, as amended; Section 503 of the Rehabilitation Act of 1973, as amended; and 38 U.S.C. 4212, the Vietnam Era Veterans' Readjustment Assistance Act of 1974, as amended. These programs require affirmative action by Federal contractors and subcontractors and prohibit discrimination on the basis of race, color, sex, religion, national origin, disability, or veteran status. All three programs give individuals the right to file complaints. It is now well established in law that no private right of action exists under the three programs and that the exclusive remedy for complainants is the administrative procedures of the U.S. Department of Labor which are initiated by a written complaint. This is done on the Complaint Form CC-4, Complaint of Discrimination in Employment Under Federal Government Contracts, which is used for all three programs. Under Executive Order 11246, as amended, the authority for collection of complaint information is found at Section 206(b). The implementing regulations which specify the content of this information collection are found at 41 CFR 60-1.23(a).

Under the Vietnam Era Veterans' Readjustment Assistance Act of 1974, as amended, the authority for collecting complaint information is at 38 U.S.C. 4212(b). The implementing regulations which specify the content of this information collection are found at 41 CFR 60-250.26(c).

Section 503 (b) of the Rehabilitation Act of 1973, as amended, is the authority for collecting complaint information under this statute. The implementing regulations which specify the content of this information collection are found at 41 CFR 60-741.61.

II. Review Focus

The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the

use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Actions
