**BILLING CODE 4310-84-M**

## DEPARTMENT OF THE INTERIOR

### Bureau of Reclamation

#### Arrowrock Dam Outlet Works Rehabilitation

**AGENCY:** Bureau of Reclamation, Interior.

**ACTION:** Notice of Availability of Record of Decision.

**SUMMARY:** This notice is issued under authority of the National Environmental Policy Act of 1969. The Record of Decision (ROD) signed on April 30, 2001 contains the decision of the Department of the Interior, Bureau of Reclamation (Reclamation) Pacific Northwest Region, to select and implement the Preferred Alternative (Alternative A), as described in the Final Environmental Impact Statement (FEIS). Alternative A was identified as the environmentally preferred alternative in the FEIS. This alternative best achieves the project objectives and meets the purpose and need of the project in an environmentally sensitive manner.

**ADDRESSES:** Copies of the ROD may be requested from the following locations:

- Bureau of Reclamation, Pacific Northwest Region, 1150 North Curtis Road, Suite 100, Boise, ID 83706-1234.
- Bureau of Reclamation, Snake River Area Office, 214 Broadway Ave, Boise, ID 83702-7298.
- The ROD is also available for viewing or downloading on the internet at <http://www.pn.usbr.gov/project/arrowrock/arrowrock.shtml>.

**FOR FURTHER INFORMATION CONTACT:** Steve Dunn, Environmental Specialist, (208) 334-9844.

**SUPPLEMENTARY INFORMATION:** Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, Reclamation prepared a FEIS to examine the impacts of alternative methods to rehabilitate the outlet works at Arrowrock Dam by removing the 10 lower level Ensign valves and replacing them with clamshell gates. Two action alternatives were identified that differed only in the timing of reservoir drawdown and the elevation of Arrowrock Reservoir and Lucky Peak Lake in the third construction season. The preferred alternative (alternative A) requires a longer period of drawdown of

Arrowrock Reservoir, but both Arrowrock Reservoir and Lucky Peak Lake would remain at a higher elevation than with the other action alternative. Based on comments received on the Draft EIS concerning impacts to water quality and bull trout, the preferred alternative was modified so that the probability of sluice gate use, which could release large amounts of sediment form Arrowrock Reservoir, was reduced from 42% to 15%. The No Action Alternative, which included actions that would be required for an intensive maintenance program if the Ensign valves were not replaced, was also evaluated.

Dated: May 24, 2001.

**Kenneth R. Pedde,**

*Acting Regional Director.*

## DEPARTMENT OF JUSTICE

### Office of Justice Programs

#### Agency Information Collection Activities: Proposed Collection; Comment Request

**ACTION:** Notice of Information Collection Under Review; Revision of a Currently Approved Collection Drug Court Grantee Data Collection Survey.

The Department of Justice, Office of Justice Programs has submitted the following information collection request for review and clearance in accordance with the Paperwork Reduction Act of 1995. Office of Management and Budget approval is being sought for the information collection listed below. These proposed information collection was previously published in the **Federal Register** on March 21, 2001, allowing for a 60-day public comment period.

The purpose of this notice is to allow an additional 30 days for public comment until July 19, 2001. This process is conducted in accordance with 5 CFR 1320.10.

Written comments and/or suggestions regarding the item(s) contained in each notice, especially regarding the estimated public burden and associated response time, should be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Department of Justice Desk Officer, Washington, DC 20530.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
