Information Collection Request

1. *Title:* Voyage-Planning for Tank-Barge Transits in the Northeast United States.

OMB Control Number: 2115-0637.

Summary: The information collected for a voyage plan serves as a preventive measure and assists in ensuring the successful execution and completion of a voyage in the First Coast Guard District. This rule [33 CFR 165.100] applies primarily to towing vessels engaged in towing certain tank barges carrying petroleum oil in bulk as cargo.

Need: The information for a voyage plan will provide a mechanism for assisting vessels towing tank barges to identify those specific risks, potential equipment failures, or human errors that may lead to accidents.

Respondents: Owners and operators of towing vessels.

Frequency: On occasion.

Burden Estimate: The estimated burden is 439 hours a year.

2. *Title:* Welding and Hot-Work Permits; Posting of Warning Signs.

OMB Control Number: 2115-0054.

Summary: The information collected here helps ensure that waterfront facilities and vessels are in compliance with safety standards. A permit must issue before welding or hot work on certain waterfront facilities; and the posting of warning signs is required on certain such facilities.

Need: The information is needed to ensure safe operations on certain waterfront facilities and vessels.

Respondents: Owners and operators of certain waterfront facilities and vessels.

Frequency: On occasion.

Burden Estimate: The estimated burden is 226 hours a year.

3. *Title:* Approval of Alterations to Marine Portable Tanks; Approval of Non-Specification Portable Tanks.

OMB Control Number: 2115-0585.

Summary: The information helps us evaluate the safety of proposed alterations to marine portable tanks and of non-specification portable tank designs used to transfer hazardous materials during offshore operations, such as those on drilling rigs. Respondents will be those who wish to alter existing marine portable tanks or use non-specification portable tanks.

Need: Approval by the Coast Guard of alterations to marine portable tanks ensures that the altered tanks retain the level of safety to which they were originally designed. Further, rules' allowing for the approval of non-specification portable tanks ensures that the rules do not frustrate innovation and new designs.

Respondents: Owners of marine portable tanks and owners and designers of non-specification portable tanks.

Frequency: On occasion.

Burden Estimate: The estimated burden is 18 hours a year.

Dated: June 15 2001.

V.S. Crea,

Director of Information and Technology.
