**Title:** National Science Foundation Grant Proposal Guide.

**OMB Control Number:** 3145-0058.

**Summary of Collection:** The mission of the National Science Foundation is to serve as a catalyst for progress through investment in science, mathematics and engineering. The agency is guided by its longstanding commitment to the highest standards of excellence in the support of discovery and learning. NSF pledges to provide the leadership and stewardship necessary to sustain and strengthen the Nation's science, mathematics, and engineering capabilities and to promote the use of those capabilities in service to society. NSF's continuing mission is set out in the preamble to the National Science Foundation Act of 1950 (Pub. L. 507):

To promote the progress of science; to advance the national health, prosperity, and welfare; to secure the national defense; and for other purposes.

The information collected is used to help the Foundation fulfill this responsibility by initiating and supporting merit-selected research and education projects in all the scientific and engineering disciplines. NSF receives more than 30,000 proposals annually for new or renewal support for research in math/science/engineering education projects and makes approximately 10,000 new awards. The Foundation exercises its authority primarily by making merit-based grants and cooperative agreements and providing other forms of assistance to individual researchers and groups, in partnership with over 2800 colleges, universities and other institutions—public and private, state, local and federal—throughout the U.S. The awards are based mainly on evaluations of proposal merit submitted to the Foundation (see OMB Clearance No. 3145-0060).

The Foundation has a continuing commitment to monitor the operations of its review and award processes to identify and address excessive reporting

burdens. The Foundation also is committed to monitor and identify any real or apparent inequities based on gender, race, ethnicity, or handicap of the proposed principal investigator(s)/project director(s) or co-principal investigator(s)/co-project director(s). The collection of this information is a part of the regular submission of proposal to the Foundation. This information also is protected by the Privacy Act.

#### *Description of Respondents:*

Nonprofit institutions; state, local or tribal governments; and business or other for-profit.

**Number of Respondents:** 30,000.

**Frequency of Responses:** Annually.

**Total Burden Hours:** The Foundation estimates that an average of 120 hours is expended for each proposal submitted. If an estimated 30,000 proposals are expected during the course of one year, these figures compute to an estimated 3,600,000 public burden hours annually.

Dated: June 25, 2001.
