Description: In the Fourteenth Report and Order, Twenty-Second Order on Reconsideration in CC Docket No. 96-45 and Report and Order in CC Docket No. 00-256, released May 23, 2001 (FCC 01-157), consistent with the recommendation of the Federal-State Joint Board on Universal Service (Joint Board), the Commission adopts rules for determining high-cost universal service support for rural telephone companies for the next five years based upon the proposals made by the Rural Task Force. The Commission also addresses certain proposals made by the Multi-Association Group (MAG) for reforming universal services rules applicable to rural carriers. As part of its proposal to reform the federal universal service support mechanism for rural carriers, the Rural Task Force proposed that rural carriers be permitted to depart from study area averaging and instead disaggregate and target per-line high-cost universal service support, including high-cost loop support, LTS, and LSS, into geographic areas below the study area level. The Rural Task Force concluded that the disaggregation and targeting of support is necessary to eliminate the economic distortions that may result from the delivery of support on a uniform per-line basis under the current mechanism. At the same time, however, the Rural Task Force stated that rural carriers need flexibility in the manner in which support is disaggregated and targeted in light of the widely varying characteristics and operating environments of rural carriers. Recognizing that a disaggregation and targeting system must meet the unique regulatory and competitive environments in each state, the Rural Task Force recommended a disaggregation system consisting of three paths. a. Election of Disaggregation Plan and Change in Path: Carriers are required to elect one of three paths within 270 days of the effective date of the Order implementing rural high-cost
