

Transmittal No. 01-20**Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act****Annex
Item No. vi****(vi) Sensitivity of Technology:**

1. The F-16A Block 10 operational capability upgrade aircraft and Pratt and Whitney F-100-PW-200 engine are unclassified. The aircraft does not contain state-of-the-art technology.

2. The F-100-PW-200 engines and the associated component parts used in F-16A aircraft are unclassified. However, several manufacturing processes, design practices, and metallurgical fabrication techniques used are advanced technology methods found only in the U.S. propulsion technology industry. The sale of the engines to Hungary will not include the transfer of sensitive technology since the proposed sale does not include manufacturing processes, design practices, or metallurgical fabrication techniques.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Hungary can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
