Title: Inquiry Routing and Information System (IRIS).

OMB Control Number: 2900-NEW-IRIS.

Type of Review: New collection.

Abstract: The World Wide Web is a powerful medium for the delivery of information and services to veterans, dependents, and active duty personnel worldwide. The proposed Inquiry Routing and Information System (IRIS) would allow a VA customer to be able to submit his or her questions at any time and receive answers more quickly than through standard mail. Because the system is automated, inquires would be directed to the appropriate individual/office automatically. The contact information being solicited will be used to identify the particular veteran. VA

personnel will use the contact information to determine the location of a specific veteran's file, and to accomplish the action requested by the correspondent such as processing a benefit claim or filing material in the individual's claims folder.
